In view of the fact that this station is within the area where periodic storms of severe intensity may be expected, it is considered desirable that the wharves and piers be rebuilt of masonry or concrete in a permanent manner and that all overhead wires be placed underground in conduits. This will require an additional expenditure of $200,000, making the total necessary $420,000.

It is not possible to undertake any such extensive work out of the current appropriations, and it is considered desirable to have a provision inserted in the naval appropriation bill now before the Senate providing $420,000 for this purpose. The following phraseology is suggested:

Navy aeronautic station, Pensacola, Fla.: "To repair and reconstruct, where necessary, public works damaged by storm of July, 1916, $420,000."

Sincerely, JOSEPHUS DANIELS.

Mr. SWANSON. I should now like to call up the next amendment which has been passed over.

The VICE PRESIDENT. The first amendment which has been passed over is on page 4.

Mr. SWANSON. Let that go over.

The VICE PRESIDENT. The Secretary will state the next amendment passed over.

The SECRETARY. The next amendment passed over is, on page 41, after line 23, to strike out: "Experimental laboratory: For laboratory and research work, including the construction, equipment, and operation of a laboratory, to be expended at the discretion of the Secretary of the Navy (limit of cost, not to exceed $1,500,000), $1,000,000," and insert:

Experimental and research laboratory: For laboratory and research work on the subject of gun erosion, torpedo motive power, the gyroscope, submarine guns, protection against submarine, torpedo, and mine attack, improvement in submarine attachments, improvement and development in submarine engines, storage batteries and propulsion, improvement in radio installations and such other necessary work for the benefit of the Government service, including the construction, equipment, and operation of a laboratory, the employment of scientific civilian assistants as may become necessary, to be expended under the direction of the Secretary of the Navy, $2,000,000.

Mr. SMOOT. Mr. President, it was at my request that this amendment went over. I asked that it might go over, because I had received a great many protests against this item in the bill. The objections received by me were in the form of telegrams, with very little information attached. I wrote to the parties sending the telegrams asking for detailed information and requesting that they give their reasons for their objection to the provision. I will say that up to the present time I have not received answers to my letters; perhaps I have hardly had time since I asked that the item go over and since writing the protestants to receive their replies.

I hardly feel competent, Mr. President, to express an opinion as to the real necessity for the establishment of this experimental laboratory. I suppose some good may flow from it in years to come; but, so far as any advantage may accrue to the United States as affecting the additions to the Navy as provided for in this bill or in the event we should become involved in war, either with Mexico or with some European power, I do not believe that it would amount to anything.

I take it for granted that it will require at least two years to complete the laboratory and secure the necessary instruments and machinery to operate it. It seems to me that $2,000,000 for that purpose at this particular period is an exceedingly large sum of money.

In some of the telegrams which I received it was stated that the senders did not understand why the Government of the United States should spend $2,000,000 for putting up a laboratory as a plaything for a few men. That I consider a mere statement, and had no facts to sustain it.

I had hoped that I would receive from the men sending me the protests definite information which I could present to the Senate in opposition to this item, if in my opinion it was rea-

sonable, but not having received it, and the time having arrived when the Senate must act upon the amendment, I will say no more than I have.

Mr. SWANSON. Mr. President, I simply wish to say that this is a very important matter and that it is very strongly urged by the Navy Department and the experts of that department. At the proposed laboratory there will be investigated subjects pertaining to gun erosion, torpedo motive power, and so forth.

Mr. BRANDEGEE. Mr. President, I should like to hear what the Senator is saying, but I can not hear him on account of the confusion.

Mr. SWANSON. This proposed laboratory is intended not as a plaything, as suggested by some of the parties who have corresponded with the Senator from Utah [Mr. SMOOT]. It is intended to inaugurate a practical business investigation of the needs of the Navy and the Army. Gun erosion is a very important subject. We have never had a laboratory or any proper means of practically ascertaining the best way to prevent the rapid erosion of our guns. If we can make a saving there, we will save this amount very quickly.

Mr. CLARKE of Arkansas. What is gun erosion?

Mr. SWANSON. Gun erosion is caused by the passage of the projectile and the blast of the explosion through the barrel of the gun.

Mr. OVERMAN. Has this amount been estimated for?

Mr. SWANSON. It has been estimated for, and the House made provision for it, authorizing an expenditure of $1,500,000. Unless, however, the laboratory is going to be made really efficient, there is no use appropriating for it at all, and the million and a half dollars, which was the limit of cost in the House provision, would not be sufficient. There is no great business establishment that does not have a workshop similar to the one now proposed for the Navy to study scientific and efficiency methods. The work to be done in the laboratory for the Navy Department is to be entirely under the control and the advice of scientific experts.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Idaho?

Mr. SWANSON. I yield.

Mr. BORAH. The thought to which the Senator has just given expression, that the different manufacturing establishments have these experimental stations, and so forth, had occurred to me. It must be true that the great gun factories and manufacturing establishments have applied every scientific test that is possible in their own affairs.

Mr. SWANSON. But the Senator must remember that the Government manufactures a great many of its own guns, both for the Army and for the Navy; and if private enterprise has this privilege, I do not see why the Government should be deprived of an equal opportunity to find the best, the cheapest, and the most scientific way of accomplishing something.

I should like also to say to the Senate that our air craft have not been as satisfactory as otherwise they would have been had we good motors. This is to make experiments and efforts to standardize motors for submarines and also for our air craft, among other things.

Mr. OVERMAN. How much will the building cost, Mr. President? Has the Senator any figures as to the amount necessary for the purchase of the site and the erection of the building?

Mr. SWANSON. An estimate was made of the building, of the machinery, of the apparatus, and everything that was needed by men of as high character as Edison, men in the Navy, and men who have nothing except a patriotic purpose and who desire a wise expenditure of money to accomplish governmental good.

Mr. OVERMAN. I was just asking how much the plant would cost?

Mr. SMOOT. One million five hundred thousand dollars, and $500,000 additional for operation.

Mr. SWANSON. It is the hearings, on page 332.

Mr. SMOOT. I understand the plant will cost $1,500,000.

Mr. OVERMAN. What is the other $500,000 for?

Mr. SWANSON. It is to equip it, and for running expenses.

Mr. OVERMAN. Will the running expenses in one year be $500,000?

Mr. SWANSON. This is not limited to one year. It is appropriated for that purpose until expended.

Mr. OVERMAN. Then, after we once get the plant established, we will have to appropriate money each year to carry it on.

Mr. BRANDEGEE. Mr. President, has the Senator read the testimony before the House committee in relation to this matter?

Mr. SWANSON. I have read the testimony.

Mr. BRANDEGEE. What officials of the Government appeared in behalf of this appropriation?

Mr. SWANSON. The Secretary of the Navy.

Mr. BRANDEGEE. Is he the only one?

Mr. SWANSON. I can not recall any other one. He was speaking for the Navy Department.

Mr. BRANDEGEE. Does the Senator know where it is expected that this laboratory will be located?

Mr. SWANSON. I have not the slightest idea. I do not think the department has reached any conclusion whatever in that respect.

Mr. BRANDEGEE. Has the Senator any idea whether it is to be located here in Washington, or can it be located anywhere?

Mr. SWANSON. I have not the slightest information on that subject.

Mr. BRANDEGEE. Does the Senator understand that it is going to involve the purchase of a cite for the laboratory, or that it is to be located somewhere on land that the Government already owns?

Mr. SWANSON. That is not expressed in the appropriation.

Mr. BRANDEGEE. I noticed the absence of it, and I was curious to know whether we were going to appropriate $2,000,000 for the construction and equipment of a laboratory that was not going to be standing on any land anywhere or whether it was to be suspended in nubibus.

Mr. SWANSON. If the Government has land that is suitable, I am satisfied that the department would prefer erecting it on Government land to purchasing land.

Mr. BRANDEGEE. Is the department authorized to build the laboratory on any piece of land that the Government may own anywhere?

Mr. WEEKS. Mr. President, I will suggest that this may be a part of the Aviation Corps.

Mr. BRANDEGEE. Oh, this is going to be an aviating laboratory? Well, I do not know anything about it, any more than the Senator appears to. Therefore I am not prepared to oppose it; but I really think such a proposition ought to have a little more definite statement.

Mr. TILLMAN. Mr. President, there is in existence somewhere—I gave it to the Senator from Virginia or to my clerk; it has been mislaid for a moment—a letter directly from Thomas A. Edison to me explaining what this is for.

Mr. BRANDEGEE. I did not hear the Senator.

Mr. TILLMAN. I say there is a letter in existence from Thomas A. Edison himself, explaining what this is for and what is to be accomplished by it.

Mr. BRANDEGEE. I should be very glad to hear what Mr. Edison has to say.

Mr. TILLMAN. I ask to have it read at the desk. We have just found it.

Mr. BRANDEGEE. I think it will be a good thing.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

LABORATORY OF THOMAS A. EDISON,
Orange, N. J., July 13, 1916.

Senator B. R. TILLMAN,
United States Senate, Washington, D. C.

MY DEAR SIR: Your telegram, requesting copy of Mr. Edison's letter to you re the naval laboratory, was received by me during Dr. Hutchison's absence.

I have had a copy of the letter in question made, and take pleasure in inclosing it herewith.

This letter goes forward by special-delivery mail, to insure its receipt by you to-morrow morning, the 14th instant.

Please do not hesitate to call on me if there is anything further I can do.

Respectfully,
N. M. ESROLIN,
Secretary to Dr. Hutchison.

Mr. TILLMAN. Dr. Hutchison is Thomas A. Edison's chief lieutenant and chief engineer.

I ask now to have the other letter read.

The Secretary read as follows:

ORANGE N. J., *June 5, 1916.*

Hon. B. R. TILLMAN,
United States Senate, Washington, D. C.

MY DEAR MR. TILLMAN: I was somewhat disappointed at the action of the House Naval Committee in not suggesting a little more money for the experimental laboratory.

The plans were made for a works which, when completed and fully equipped, would cost $5,000,000, but the minimum construction would cost not less than one and a half millions. It will require at least half a million after completion of the minimum to lay in a supply of materials and start operating.

For quick action it is necessary to have a considerable stock of supplies of every kind in order that there shall be no delay when the naval authorities want results quickly, especially if the laboratory is to work 24 hours daily with three shifts of men, making it possible to accomplish in 30 days what would generally require 3 months with one shift of men. In fact, with the tools proposed and the supplies, I believe it could be reduced to 15 days.

As to the amount of work to be done and the extension of buildings and machinery to the full extent of the plans and the further sums of money required, all this will, of course, depend upon the demands made by the naval authorities.

If the United States of America desires that its fighting machinery be kept up to date and not excelled or even approached by that of any other nation, so as to get machinery that has been thoroughly tested and standardized, and so that duplicates can be obtained at low costs from competitive manufacturing establishments, then the experimental laboratory is the only possible way this object can be attained; but whatever you do, vote at least two million. If this is impossible, it would be better to drop the thing altogether.

Yours, very truly, THOS. A. EDISON.

Mr. SWANSON. Mr. President, I wish to say to the Senate that we have a consulting board in the Navy, consisting of two men appointed from each of the 11 great scientific societies of America, with which the Navy will consult with reference to the running of this laboratory; and the Navy are very insistent that this item should be agreed to. They believe that it will be very beneficial, and it seems so to me.

The claim is repeatedly made that our Army and Navy do not lead in progress. Here is an opportunity to give them a chance to have the most scientific method of ascertaining the needs enumerated in this appropriation. If Senators will only read the item on page 42, they can clearly see the purposes sought to be accomplished.

Mr. LODGE. Mr. President, as I think the Senate is aware, I am very strongly in favor of this bill. I opposed this amendment in the committee. I opposed the original House provision. I must be honest about it. I think the whole thing is a sheer waste of the public money. I do not think it is needed. I think there is nothing at all to it; and I feel bound, out of respect for myself, to say that.

Mr. BORAH. Mr. President, I have undertaken to read the statement of Mr. Edison as made before the committee of the House with regard to this matter with the hope that I should find something in Mr. Edison's statement, whose word and whose views upon these matters we all profoundly respect, to justify voting for this amendment. But it seems to me to be just what the language implies, namely, an experimental laboratory. It is an idea, apparently, that certain things may be accomplished; that they desire, at least, to experiment with reference to certain things. But the objection I have to this is the loose and general way in which the amendment is drawn. There is no safeguard surrounding the expenditure. I am opposed to those lump-sum appropriations.

Mr. SMOOT. I ask for the yeas and nays on the amendment.

Mr. NORRIS. Mr. President, the amendment proposed by the committee is one that appropriates, it is true, a great deal of money. As I look at it, however, it is an investigation of a scientific nature. The investigations can not be known in advance to be either of benefit or otherwise; but any investigation of this kind necessarily must be an uncertain one. When we realize that all improvements that have been made in armaments, in guns, in ammunition, and in shells were the necessary result of investigation, it seems to me that if we want to have our Navy scientific and efficient we ought to favor any reasonable investigation, although we can not know in advance that the results are going to be beneficial.

I am opposed to the increases in the Navy. I suppose most of the Senators and a great many other people would regard me as a crank on the subject. The great agitation for preparedness that has covered such a wide field and brought within its fold armies of men and women in all walks of life all over the United States has not impressed me. I believe they are wrong. I think they have had a great effect upon public opinion and upon Members of Congress and that we are undertaking in this bill to expand away beyond reason.

I presume most of those would say in advance that I would be opposed to an amendment of this kind, but I have always contended, Mr. President, that I favor an efficient Navy. I do not believe in "peace at any price." I want to maintain the honor of our country, and if we are so unfortunate as to get into war I want us to have the best that can possibly be made through the ingenuity of mankind. Therefore I favor investigations of this kind. I am going to vote for this amendment, although I am opposed, and especially at this time, to practically all of the program in regard to the building of battleships and other similar vessels provided for in this bill. It seems to me that this goes toward efficiency, and I am in favor of efficiency in private life and in public life. I believe that whatever Navy and whatever Army we do have we ought to make it absolutely the best that we possibly can make it.

Mr. President, I remember when I first came to Congress, a little more than 13 years ago, sitting in the House of Representatives listening to a debate on one of the great appropriation bills. It was at a time when Mr. Langley had been investigating in regard to the flying machine, and there was an attempt made to provide a small appropriation in that bill to supply him with funds, and it was virtually laughed and ridiculed out of the House of Representatives. It would be interesting to read now the debates that took place then within the memory and within the recollection of all of us. Sometime, I think, when the weather is not so hot and we have more time, I am going to read to the Senate some of the things that were said then by some of the great men of the country, some still in public life. Honest as they were, they were nevertheless opposed to that investigation, because they compared Langley with Darius Green and made all similar comparisons, and, as I said, laughed the appropriation out. But time has demonstrated that Langley was really the father of the flying machine and that it was due to his initiative and his investigation to a great extent that this machine was afterwards perfected. I say "perfected"—I ought to modify that, because probably it is in its infancy now.

I hesitate, in any business, to criticize the man who wants to make an investigation. We know that improvements have been made in the past along the lines that are indicated in this amendment—improvements that would now mean the difference between success and failure of a navy founded and built according to the old plans, as against one built upon the new plans.

As long as we must have a Navy or an Army, and must equip it, I want to equip it with the best that can be obtained. It seems to me that we ought not to hesitate to vote any reasonable amount of money for any scientific investigation having for its honest object and its honest purpose the improvement of guns, the improvement of shells, the improvement of submarines, torpedoes, mines, and all similar things. This is one of the few committee amendments tending, perhaps, to expansion—although I do not think it does—that I favor; and I hope therefore that the committee amendment will be agreed to.

Mr. SWANSON. Mr. President, I certainly hope the Senate will retain this amendment. We appropriate in this bill $139,000,000 for the construction of ships of various types. We have appropriated $3,500,000 for aviation. When the department asks for a laboratory of its own, so that it will not be dependent upon outside private individuals for research and for efficiency to solve the problems of the Navy, if we are going to have a Navy, it seems to me that it is wise and proper to respond to that request and give them an opportunity to do these things.

Take the motors. The trouble with our aircraft and our submarines has been that we have not developed, either in the Navy or in private manufacturing establishments, motors that are satisfactory either for our air craft or for our submarines. Our troubles in that respect have arisen from lack of a motor. This is to make an investigation of that kind. Torpedoes require very peculiar machinery. The improvements in that line, if we make them in secret, might at some time mean either victory or defeat. This is an appropriation of $2,000,000 for efficiency.

What is the great nation of to-day, in proportion to its population, for efficiency? The German nation. Why? Because the German Government has laboratories, and the Government makes experiments. In agriculture, in war, in munitions, and in all directions the Government has great laboratories in which it can ascertain the efficient, economical, and scientific way of accomplishing things.

It seems to me the time has arrived when the Navy should have a laboratory plant under experts in the Navy with the advice of 22 of the most scientific men in America to give this Government the same opportunity and the same chance. It is useless to ridicule a consulting board of 22 scientists of this country headed by Mr. Edison, who has revolutionized many of the arts in electricity. Mr. Edison and 22 of the greatest scientists in America have agreed to give their knowledge, their genius, and their time without any expense whatever to the Government in trying to make this laboratory a success, and there will be united with the genius and skill and knowledge in the Navy these 22 scientists selected by the 11 great scientific bodies of America. It seems to me we would be derelict in our duty if we did not appropriate the sum of $2,000,000 to make this a possibility for efficiency and for success.

Now, as to the purposes. The House simply made it a million and a half without defining the purpose. The amendment of the Senate committee defines the work to be done. Anyone can read the amendment on page 42 and see that it will be of the utmost value and importance to the Navy.

Mr. BRANDEGEE. Mr. President, I am in favor of efficiency quite as much as any other Senator, and especially at this time I am in favor of anything that will contribute to the efficiency of the Army and the Navy. The trouble with this amendment is it is, in my opinion, an inefficient amendment to accomplish any desirable purpose. It is impossible, I think, for anybody to read the Senate committee's substitute amendment and form any accurate idea of what is to be done with this money. I am going to read it myself so that it will be in the RECORD:

Experimental and research laboratory: For laboratory and research work on the subject of gun erosion, torpedo motive power, the gyroscope, submarine guns, protection against submarine, torpedo and mine attack, improvement in submarine attachments, improvement and development in submarine engines, storage batteries and propulsion, improvement in radio installations and such other necessary work for the benefit of the Government service, including the construction, equipment, and operation of a laboratory, the employment of scientific civilian assistants as may become necessary, to be expended under the direction of the Secretary of the Navy, $2,000,000.

It starts out by saying "For laboratory and research work." How much of this appropriation is going to be used for the construction of a laboratory? How many scientific civilian assistants are to be hired and paid out of this appropriation of $2,000,000? This so-called scientific consulting board, I understand, is an extra official body and not under the employment of the Government at all. Who is to say what their relation will be and how much they will have to say about running this thing? Who is to say what is to be done when they disagree?

The truth of it is this appropriation of $2,000,000 is to expended by the Secretary of the Navy in his discretion. According to the letter of Mr. Edison which was read at the desk, he says there ought to be $5,000,000 appropriated for this service to do it effectively. I am perfectly willing to vote to appropriate $5,000,000 or $10,000,000 to investigate this subject if the end of it can be seen and if it is to be done upon a plan and a schedule which would appeal to the judgment of business men.

It is perfectly evident from this amendment—at least it is perfectly evident to me—that no Senator on this floor and no Senator on the committee who has advocated it has any definite idea in his mind about what is to become of this appropriation of $2,000,000, except that it is to be benevolently assimilated according to the intuitions of the Secretary of the Navy and disbursed according to his pulsating generosity.

That is not the way for the Government to go ahead and appropriate money. As to every other department of the Government the two Houses of Congress, after a specific examination of witnesses before the committee, decide what the salaries of every official and every employee, even down to stenographers and doorkeepers and clerks, shall be. Here no man knows what is to be done.

Mr. SWANSON. Will the Senator permit me?

Mr. BRANDEGEE. I will.

Mr. SWANSON. In a large construction like that of the factory of the Ford automobile, I have no doubt that they have for their purpose a regular factory with a laboratory to develop their engines and to develop their machinery. Yet this Government, in the Navy Department, has no such laboratory.

Mr. BRANDEGEE. I do not yield to the Senator to make a speech inside my speech. The Senator has made two speeches and he can make as many as he has a mind to, but not in my time. I will yield to the Senator or to any other Senator for a question.

I understand perfectly well that the Ford Motor Co. and every other successful enterprise has its advisory department and its experimental department and its laboratories and it attempts to get the best men it can for intelligent experimentations. I admit that the subjects that are enumerated in this amendment are obscure and highly technical and they are very necessary subjects to be investigated. They are being investigated before the country to-day by the very kind of experts who were mentioned by the Senator from Virginia.

It may be desirable to have a Government experimental station and an investigating laboratory here in Washington, and if so I will vote for one. I should like, however, to feel when I vote for a few trifling millions in a jaunty and flippant way that I at least could see the finishing of the factory before the money was expended and would have some sort of an estimate about what probably the next session of Congress might be called upon to appropriate for running it after the first year.

Of course this amendment contemplates not only that the laboratory will be built but it states here that this money is to be used for operating it as well. I do not know whether there is an estimate or whether it is contemplated to put this $2,000,000 in a factory or a laboratory and then at the end of the year come in with a deficiency and say, "Well, it was the opinion of such scientists in consultation with the Secretary of the Navy that it would be bad public policy for the Government to invest only $2,000,000 and we thought it would be wasting the money. Therefore, we have taken it upon ourselves to lay this plant out so that to complete it will cost $4,000,000, and we ask you for $2,000,000 to complete the plant." It does not appear from this whether the $2,000,000 is to complete it or not for laboratory and experimental purposes, including the erection of factory.

If I thought for $2,000,000 the whole laboratory could be built, completed, and equipped and then operated that would be one thing. As I said, I am willing to vote for this or any other sum if it will be handled on a business basis by a business department of the Government and officials put in charge and held responsible, the number of scientific employees enumerated, and the salaries fixed. I would be perfectly willing to vote for such a provision, but I do not think this has had proper consideration at all.

Mr. GALLINGER. I move to amend the amendment by inserting after the word "laboratory," in line 12, the words "to be located in the city of Washington on land owned by the Government."

Mr. TILLMAN. Mr. President, I am not surprised that our friends from New England should be opposed to this amendment, because their custom has been since I have been in Washington to have inventions for the benefit of themselves, not for the Government. They take out patents and charge the Government enormous profits on them. Perhaps I would do the same thing. In any experiment made by private parties it is always necessarily for the benefit of the private parties. This is a Government experiment station, or, rather, a Government laboratory, under the Secretary of the Navy, and I at least have enough faith in the Secretary to believe that he will expend this money economically and honestly, and that any inventions or discoveries that are made will be for the benefit of the Navy and not for some patentee, to grind Uncle Sam and get rich out of him.

I hope this amendment will remain in the bill.

Mr. BORAH obtained the floor.

Mr. GALLINGER. I ask that the amendment I submitted be stated at the desk.

The VICE PRESIDENT. The Secretary will state the amendment offered by the Senator from New Hampshire.

The SECRETARY. The Senator from New Hampshire proposes the following amendment to the amendment of the committee. On page 42, line 12, after the word "laboratory," insert:

To be located in the city of Washington on land owned by the Government.

Mr. BORAH. Mr. President, I realize the force of the argument made by the Senator from Nebraska [Mr. NORRIS] as to the necessity of having the scientific judgment of those who are best capable of giving it upon these matters connected with making more efficient and perfect our Navy. But the difficulty with this proposition is that it is a leap in the dark. If a bill were presented here outlining in detail how this should be done, where it should be located, how it should be managed, how it should be operated and taken care of, I could understand the force and effect of the argument of the Senator from Nebraska and I would be perfectly willing to vote with him. But I have read Mr. Edison's statement since I have been sitting here in regard to this matter, and it is just as indefinite with reference to the plans and details or with reference to the future as the general argument here in regard to it.

Doubtless Mr. Edison, with his great capacity, knows what he desires to do, but really the men who vote the money and who are responsible in the future for the large amount which is voted ought to know something about the details; and it ought to be put in the form of a bill, and it ought to come here as a separate proposition, with the details carefully stated.

Mr. Edison and his men claim that nothing less than $5,000,000 will be of any practical value. We are to make a start with $2,000,000. They all agree that they really ought to have $5,000,000 to start with, and, of course, $5,000,000 to start with would undoubtedly mean other millions annually for years to come.

In other words, we can not put up an experimental station in six months or a year and have it of any value. We must

sustain it and keep it up; and, according to the estimate made by Mr. Edison, to start out with $5,000,000 means millions of dollars annually thereafter undoubtedly for years.

Before we incur such an obligation it ought to be put in such a form that we will know precisely how it is to be administered, and how, for instance, if Mr. Edison should be called hence, who is to take his place and how it is to be operated. I think it is a matter of detail that is wanting here and not a lack of spirit to start an investigating laboratory.

Mr. SWANSON. If the Senator will permit me, this will be left under the Navy Department, and, if Mr. Edison were to die, it would still be under the control of the Navy Department. These 22 scientists are to consult with the Navy, and it is left with the experts of the Navy to have a laboratory in which to devote their minds in ascertaining the scientific facts in connection with the problems that are unsettled now and that are of the utmost importance in connection with torpedoes, submarines, air craft, the manufacture and use of gun powder, and so forth.

When the department earnestly asks to be put on an equal footing with private plants that construct guns, with private plants that make gunpowder, with private plants that sell torpedoes, with private plants that sell submarines, with their various laboratories, research work, and scientists it seems to me but right that the Government should have at least an equal opportunity to have a laboratory under the control of the Navy Department, simply consulting with the 22 scientists appointed by a body of 11 scientific institutions, who give their services to the Government and of which Mr. Edison is chairman.

Mr. BORAH. Mr. President, if the Secretary of the Navy should entertain the same view with reference to the Navy to-day or to-morrow that he entertained a year and a half ago, I would have no encouragement whatever to vote for this kind of a proposition. I am aware that since that time he entertains views which would perhaps lead him to make this a different proposition to what he would have made it a year and a half or two years ago. But suppose he should pass out of office after the 4th of next March, which is liable to happen, and suppose it should occur that the next Secretary of the Navy should have a different view of things, shall the Government of the United States appropriate $2,000,000 or $5,000,000 without any detail or instruction or provision whatever as to maintaining the laboratory—as to how it shall be maintained? Shall our judgment not be incorporated or crystallized into law? Shall we, who are responsible for the appropriation of this money, exercise no judgment whatever as to the manner in which the laboratory shall be operated and sustained?

I think we are abandoning our duty when we fail to do those things. This is just a lump-sum appropriation without any direction as to use. I am not opposed to the cause, but no cause is good enough to justify such a loose method of appropriatin.

Mr. SWANSON. What amendment would the Senator suggest defining and outlining specifically how the money shall be spent?

Mr. BORAH. It does not outline anything at all.

Mr. SWANSON. As to whether the building will cost $1,000 or $1,050 or as to whether they will need one clerk or two clerks can not be determined until it is organized and the scope of it fixed by men in whom you have confidence, it seems to me it is difficult to be more specific than the language now is.

Mr. OVERMAN. Mr. President, I asked the Senator from Virginia a question as to what would be the cost of the plant. He said $1,500,000. Then they want $500,000 in a lump sum for the purpose of carrying on the plant. It does seem to me that $500,000 for carrying on the plant is too much.

Mr. SWANSON. The Senator is mistaken. Mr. Edison in his letter said they will have to get copper and various materials to make these investigations, chemically and scientifically and practically. I can understand how a great many private manufacturing establishments competing with the Government wish to have the Government dependent upon their discoveries and their science antagonize this provision. The Government competes for submarines. There are private plants. The Government competes in powder, it competes in guns. We make some of the best guns we have. I can understand why they can ridicule this proposition. I can understand why they want to keep the Government eternally dependent upon their experiments and their discoveries. But I can not understand how in regard to this laboratory the language can be more definite than it is. Mr. Edison said that $500,000 would be needed to furnish the material and the labor for the first year. After it is organized and started you can come to a more specific direction of it. The Navy Department in this branch could not have started out with clerks 10 years ago to begin with. It is only within the last eight or nine years that there has been a divided department. You start with a lump sum and then it is divided into different departments. You ascertain what clerks are needed in each one of the departments. It is only in the last 10 or 15 years that it has been able to get outside of the lump-sum appropriation in the Navy Department.

Mr. OVERMAN. Does Mr. Edison say that it will take $500,000 to purchase material and labor?

Mr. SWANSON. His letter so states.

Mr. OVERMAN. I did not hear it read. I am heartily in favor of something on this line, but it seems to me that $500,000 is an enormous lump sum to put in the hands of one man to make what selection he pleases and pay it out just as he pleases.

Mr. SWANSON. I should like to tell the Senator that there are some inventions in connection with smokeless powder which were discovered by the Government and the Government ought not to have let other people have them. If our Government had kept those discoveries to itself, it would have been almost invaluable. The secrets of our scientific men connected with the Navy Department should be kept by the Government alone. It would be worth ten times the money if these inventions and discoveries made in these laboratories belong to the Government and are not given to all the world.

Mr. OVERMAN. The question is whether it takes $500,000 to do it.

Mr. SWANSON. No; only $2,000. Last year we had to get out an injunction to prevent our torpedoes, in which we had made the discovery, from being sold to foreign Governments by private people manufacturing them in this country.

Mr. BORAH. Mr. President, that is all very well, but it is not so guarded or protected by this amendment here. Those things might occur, even after these most valuable things should have been discovered after this laboratory research. That is the objection to it. There is no protection to the Government anywhere. There is not even protection as to the manner of expending the money. It says, "for laboratory and research work," and so forth, "to be expended under the direction of the Secretary of the Navy, $2,000,000." I repeat it is not the purpose, but the loose and reckless way in which it is done.

I am not going to criticize the Secretary of the Navy nor intimate for a moment that he would not spend it just as honestly as any other Secretary of the Navy; but does the Senator from Virginia think it wise to simply turn over vast sums of money to the unlimited discretion of the head of a bureau? It is an unwise and an unsafe way in which to legislate with reference to public money.

Mr. SWANSON. Does the Senator want me to answer that?

Mr. BORAH. Yes.

Mr. SWANSON. I will say, to begin this work Mr. Edison made a very full statement with the other men, and fixed up as accurately as could be done what was needed. They thought a great deal more than this amount would be needed. We could not say how much would be needed for the construction of the plant and the purchase of the machinery. We could not say what kind of machinery is wanted, whether it ought to be $1,000 or $10,000 for machinery. After one year from now I think Congress ought to investigate it thoroughly and rigidly and fix and determine what line of expenditure is needed, and organize that service like it organizes everything else.

I can remember when I was in the House, many years ago, the Post Office Committee appropriated a lump sum, and it could not do otherwise until the Post Office Department had decided on the number of clerks needed and the number of rural carriers. It is only by evolution and development that you can specify accurately.

All I ask is to let this start, and next year I will be as rigid and demand, as much as the Senator from Idaho, that the appropriation shall be itemized, the salaries fixed, and the entire matter organized like other departments are organized.

Mr. TILLMAN. I should like to ask the Senator from West Virginia [Mr. CHILTON] to prepare an amendment to the amendment requiring an itemized report next year as to what this money is spent for.

The VICE PRESIDENT. The question is on the amendment of the Senator from New Hampshire [Mr. GALLINGER] to the amendment of the committee.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question recurs on the amendment of the committee as amended.

Mr. CHILTON. On page 42, line 10, before the word "improvement," I move that there be inserted "aeroplanes and air craft."

Mr. SWANSON. I accept that.

Mr. CHILTON. I understand that the amendment to the amendment is accepted.

The VICE PRESIDENT. The amendment to the amendment will be agreed to, without objection.

Mr. CHILTON. After the figures "$2,000,000," in line 15, I move to insert:

$2,000,000: *Provided*, That the Secretary of the Navy shall make detailed reports to the Congress showing the manner in which all expenditures hereunder have been made.

Mr. SWANSON. I will be very glad to have that agreed to and to have the report as full and complete as possible.

Mr. GALLINGER. I think it had better be in the form of a proviso.

Mr. CHILTON. I drew it hurriedly. Let it be a proviso.

Mr. SWANSON. I accept that.

Mr. GALLINGER. Let it be read.

The SECRETARY. So as to read:

$2,000,000: *Provided*, That the Secretary of the Navy shall make detailed reports to the Congress showing the manner in which all expenditures hereunder have been made.

Mr. CLARK of Wyoming. It seems to me there ought to be some definite date as to when the report shall be made.

Mr. TILLMAN. In the next annual report.

Mr. SMOOT. I do not think it would be proper to put it in the annual report. The Secretary of the Navy ought to report to Congress not later than June 30, 1917.

Mr. CHILTON. I accept that modification.

Mr. SWANSON. We accept that.

Mr. BRANDEGEE. Let it read "not later than June 30, 1917, and annually thereafter."

Mr. SWANSON. "And annually thereafter."

Mr. CHILTON. I accept that, too.

The VICE PRESIDENT. The amendment to the amendment will be read as modified.

The Secretary read as follows:

Provided, That the Secretary of the Navy shall make detailed reports to the Congress not later than June 30, 1917, and annually thereafter, showing the manner in which all expenditures hereunder have been made.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment as amended.

Mr. NORRIS. On that I ask for the yeas and nays.

The yeas and nays were ordered.

The VICE PRESIDENT. The Secretary will call the roll.

Mr. GALLINGER. Mr. President, I will suggest the absence of a quorum.

The VICE PRESIDENT. The Senator from New Hampshire suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Martin, Va.	Smith, Ga.
Bankhead	Dillingham	Nelson	Smith, S. C.
Borah	Gallinger	Newlands	Smoot
Brady	Gronna	Norris	Sterling
Brandegee	Harding	Oliver	Swanson
Broussard	Hitchcock	Penrose	Taggart
Bryan	Hollis	Pittman	Thomas
Catron	Husting	Poindexter	Thompson
Chamberlain	Johnson, Me.	Pomerene	Tillman
Chilton	Jones	Ransdell	Walsh
Clapp	Kenyon	Shafroth	Weeks
Clark, Wyo.	La Follette	Sheppard	Williams
Culberson	Lee, Md.	Sherman	Works
Cummins	Lodge	Smith, Ariz.	

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Fifty-five Senators have answered to their names. A quorum is present.

Mr. CHILTON. Mr. President, I wish to make one suggestion, with the permission of the Senate, upon the section of the bill found on page 42, which is now under consideration. The House put in a general provision allowing $1,500,000 for a laboratory. The Senate committee proposes to increase that to $2,000,000 upon the lines of the recommendation of Mr. Edison, one of the experts who have given their services to the Government in this emergency. He said $2,000,000 would probably be sufficient for the purpose.

Mr. President, I confess that I am very much amazed that anyone who advocates preparedness for this Government should hesitate as to the advisability of this appropriation. The word which is upon the lips of the world at this time is "efficiency." Those who have been efficient in private life have pointed the way by which the Government may be efficient. Take great concerns like the Ford establishment, like the Standard Oil Co., like the United States Steel Co., and the great railroad organizations and combinations of the country, which have developed upon lines of efficiency, and the first thing which they do before they begin operations is to ascertain what they are going to do. It is impossible in manufacturing to accomplish results except by experiment.

I take no stock in this talk about the Government not getting the benefit of private invention and that this amendment may bring advantage that way; there is nothing in that. The development of an engine is simply a process of "cut and try"; it is test; and you can not test unless you have a place in which you can experiment under scientific observation and preparation.

Mr. President, it is amazing that when this Government is to start out to build a Navy and proposes to go into fields which to the most of us are new, where we must test submarine engines, air craft, and submarine craft—where they will go into all of this difficult and intricate work, involving new machinery, involving new kinds of bombs and explosives—and yet the Government must spend these hundreds of millions of dollars in the dark.

To my mind it would be most unwise for us not to profit by the lessons of experience. We have called in men who have knowledge, who have had experience in these affairs, and all of them have told us that the first thing to do is to have a laboratory, a place where we can, under the eyes and instruction of men who know, make these tests. If we do not have a laboratory we shall be simply working in the dark, blinding ourselves to the experiences of modern success, and, I might say, of intelligent management in private life. Success in private enterprise is based upon knowledge. In mechanics knowledge is based upon experiment and test. Recognizing that the great minds which had developed steam and electricity would be useful to the Government, we have called many of the successful business men and engineers to our council board, and they have patriotically responded. The first thing advised by them is to follow the rules which have brought good results in private enterprise, and in this advice the Secretary of the Navy concurs. This amendment is in response to that advice, and I submit no good reason for failing to act upon that advice has been advanced.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. WALSH in the chair). Does the Senator from West Virginia yield to the Senator from Idaho?

Mr. BORAH. I desire to ask the Senator a question.

Mr. CHILTON. I will not guarantee to answer the Senator's question, but I will endeavor to do so.

Mr. BORAH. I think the Senator will be able to answer without difficulty. Is it the purpose to defer the expenditure of the $315,000,000 proposed to be appropriated by the pending bill until this laboratory can demonstrate the wisdom of building or the best method of building the new ships?

Mr. CHILTON. I take it that we should defer the expenditure of as much of it as possible until something is demonstrated. Meanwhile we should proceed along beaten lines. I think, however, the idea is that we shall probably make some discoveries or inventions in this country which may startle the world. I think we have as much initiative here, as much brains, as much energy, and as much inventiveness as have any people on earth. We have found that some nations of the world are now facing odds in men, odds in money, odds in natural advantages, and yet they are holding their own by efficiency, and we are informed that their Governments have shown them how to be efficient. I desire that we shall follow in their tracks as nearly as we can. Our activities have been exerted along lines that develop the useful for a peaceful people. Until quite recently it has not occurred to us as a people that there exists even a remote chance that the peaceful development of our resources could be disturbed. But, since the Congress deems it wise to take out an insurance policy in the shape of a strong Navy, it is our duty to see to it that none shall surpass us; and I firmly believe that, with our talent focused upon the work, none can equal us. But we can not solve the mysteries of chemistry except by experiment; we can not make the best air craft nor the best submarine unless we proceed by patient and intelligent test, as has private enterprise. He is indeed a brave adviser who would turn down, without strong reason, the mature advice of Thomas A. Edison.

Mr. BORAH. Mr. President, I appreciate that, but I am in favor of a strong Navy, and always have been. It has, however, occurred to me that it might be well if we should defer action with reference to expending some of these larger sums until we shall have had the entire benefit of the work of this corps of experimentation; but I did not understand there was any purpose to defer the expenditure of this $315,000,000 until we had experimented as to what it was best to do with it. I wish we could have the full benefit of all the lessons of the war before expending so much money; but, on the other hand, there are many reasons which seem to forbid delay.

Mr. CHILTON. And nothing which I said should cause the Senator from Idaho to change his impression. Of course, we can go along on certain beaten tracks; we can build dreadnaughts; we can build the kind of submarines that now seem to be most efficient; but we hope to go into the field of development and experiment and be the pioneers in invention. If the

purpose of the world is to invent things which kill people, as Mr. Edison says, we can be just as efficient in that as we have been along the paths of peace.

Mr. GALLINGER. Mr. President, will the Senator from West Virginia permit me to ask him a question?

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from West Virginia yield, and, if so, to whom?

Mr. CHILTON. I will yield first to the Senator from New Hampshire.

Mr. GALLINGER. Without committing myself one way or the other on this amendment, I desire to ask the Senator from West Virginia, who has made a plea for efficiency, if he recalls the fact that in almost every appropriation bill which has been passed this year we have repudiated the tests for efficiency which private establishments have made, and that we have provided that money shall not be expended if those efficiency tests are applied? I believe the Senator from West Virginia voted for all those provisions.

Mr. CHILTON. Mr. President, the Senator from New Hampshire has made a very general statement, and not meaning to contradict the Senator, for he knows the high regard in which I *hold him*, I do not think the action of this Congress will justify the sweeping indictment which the Senator now makes.

Mr. GALLINGER. Am I not correct in my statement?

Mr. CHILTON. And it will not be long until the people will hear and try the Senator's indictment; and Senators upon this side of the Chamber have no fears as to what the popular judgment will be.

Mr. GALLINGER. I again ask the Senator from West Virginia the question whether we have not in our appropriation bills denied the Government the right of applying the efficiency tests that almost every great manufacturing establishment in this country has in vogue to-day? Is that not true?

Mr. CHILTON. I do not think so; but, even if we have done so, now is the time to stop, and we should from now on go in the right direction.

Mr. OLIVER. Mr. President——

Mr. HITCHCOCK. I should like to ask the Senator a question.

Mr. OLIVER. I call the attention of the Senator from West Virginia to the fact that that same provision is in the pending bill.

The PRESIDING OFFICER. Does the Senator from West Virginia yield; and if so, to whom?

Mr. CHILTON. I yield to the Senator from Nebraska for the present.

Mr. HITCHCOCK. Mr. President, in the bill as it came from the other House there is an appropriation of $1,500,000 for a laboratory and testing establishment.

Mr. CHILTON. No; that is merely for a laboratory.

Mr. HITCHCOCK. The amendment which the Senator advocates, and which is presented by the committee, provides for an additional $500,000. Will the Senator state what evidence there is that an additional $500,000 is needed?

Mr. CHILTON. That necessity developed further this morning, when probably the Senator from Nebraska was not in the Chamber. If he will examine the testimony of Mr. Edison, he will see that Mr. Edison testified that we should not begin this work with less than $2,000,000; and the committee thought, inasmuch as the Government had called in these master minds, who had been successful, we should largely carry out our experiments upon the lines suggested by them. It was that testimony which was before the committee that induced the committee to insert $2,000,000 instead of one and a half million dollars.

Mr. HITCHCOCK. Is it not also true that the House committee had expert testimony before it?

Mr. CHILTON. I do not know whether they had that testimony before them or not. I only know what is before us, and it would be improper for me to criticize what the House did or to make any comments upon it. I am interested only in what the Senate committee did.

Mr. SWANSON. Mr. President, if the Senator will permit me, I desire to state that the House appropriation was for a million and a half dollars, but Mr. Edison, who is the chairman of this board of experts, stated that, unless we gave them $2,000,000, that appropriation would not be sufficient to start a laboratory and do work which would be satisfactory to the Government; that we ought to either abandon it altogether or to make an appropriation of $2,000,000. He stated that one million and a half dollars would be necessary for a plant and $500,000 would be necessary for the purchase of material needed for the various experiments provided for on page 43; and that, unless Congress thought it could appropriate that amount of money for this research laboratory and experimental work, we had better make no appropriation at all; that he thought it ought to be made a success; but that it was useless to try to do it with that small amount.

Mr. HITCHCOCK. Yet, in the face of that testimony, the House only provided for an appropriation of $1,500,000.

Mr. SWANSON. The House only made an appropriation of a million and a half, but the bill came to the Senate, and Mr. Edison made that statement in a letter written to the chairman of the committee, the Senator from South Carolina [Mr. TILLMAN], which has been read.

Mr. TILLMAN. That letter from Mr. Edison was read at the Secretary's desk.

Mr. HITCHCOCK. What I am trying to find out is this: The House of Representatives went into this question very elaborately; it heard the testimony of experts; in fact, I understand the House committee gave larger and longer hearings than did the Senate committee; and yet, after those hearings, the House provided for a laboratory at a cost of $1,500,000. Now, is the Senate committee depending altogether and only upon the testimony of Mr. Edison as a reason for proposing this appropriation of an additional half million dollars?

Mr. SWANSON. No. The Secretary of the Navy also appeared before us and discussed the matter with us. He was very urgent that the appropriation should be increased to $2,000,000. It seems to me that the men who are making these estimates in the various departments and the 22 scientists, including Mr. Edison, who have no purpose, except to serve the Government without pay, should know more about this subject than we do. It seems to me, if they say it is useless to give them only a million and a half dollars for this purpose, we should follow their advice, and give the necessary sum. We presented to the Senate the recommendation of the Secretary of the Navy and also the recommendation of Mr. Edison, stating the conditions.

Mr. CLARK of Wyoming. Will the Senator from Virginia yield for a question?

Mr. SWANSON. Yes.

Mr. CLARK of Wyoming. What was the appropriation which the House of Representatives made?

Mr. SWANSON. They appropriated a million and a half dollars.

Mr. CLARK of Wyoming. They only appropriated a million dollars, I think.

Mr. SWANSON. They appropriated a million and a half dollars, but only a million dollars was authorized to be expended this year.

Mr. CLARK of Wyoming. Only a million dollars is appropriated for this year?

Mr. SWANSON. For this year.

Mr. CLARK of Wyoming. And the Senate committee proposes to appropriate a million this year. Then, the Senate committee takes the appropriation of the other House and Mr. Edison's estimate of $500,000 and adds $500,000 to both of those items in order to reach the $2,000,000?

Mr. SWANSON. The House authorized an appropriation of one and a half million dollars, and made an appropriation of $1,000,000 of that amount for this year. The Senate committee recommends an appropriation of $2,000,000, and authorizes nothing. We simply add a half million dollars. Mr. Edison says he wants to work three shifts a day to equip the laboratory and start the work quickly. His letter shows that he has thought it all out.

Mr. CLARK of Wyoming. I understand that perfectly, and I am taking that into consideration; but is not this the fact, that the House, without the letter of Mr. Edison, appropriated a million dollars, and the Senate committee, with the letter of Mr. Edison, has recommended an appropriation of $2,000,000? The House authorized the cost of the laboratory to be $1,500,000.

Mr. SWANSON. No; the Senator is mistaken. If he will look at page 42 of the bill, he will find that the limit of cost in the House bill is fixed at not to exceed a million and a half dollars.

Mr. CLARK of Wyoming. I am not speaking of the limit of cost; I am speaking of the appropriation.

Mr. SWANSON. I have said to the Senator that the House appropriated a million dollars and authorized the expenditure of a million and a half dollars.

Mr. CLARK of Wyoming. Exactly so.

Mr. SWANSON. Now, the Senate committee proposes to authorize an appropriation for the same purpose of $2,000,000.

Mr. CLARK of Wyoming. The Senate provision proposes to appropriate $2,000,000.

Mr. SWANSON. It authorizes enough to complete the laboratory.

Mr. CLARK of Wyoming. Then, my first statement is absolutely correct so far as the appropriation is concerned. The

Senate committee takes the House appropriation of $1,000,000; then it allows Mr. Edison's estimate of $500,000, and adds $500,000 more to complete what the House authorized both for this year and for future years.

Mr. SWANSON. The purpose being, as Mr. Edison says, to complete the laboratory quickly. I hope the Senator has read his letter——

Mr. CLARK of Wyoming. Yes, I have.

Mr. SWANSON. In which he says that he expects to work three shifts and to get it equipped quickly, for if it is going to be done at all it ought to be done quickly.

Mr. CLARK of Wyoming. I understand all that. The only purpose of my inquiry was to find out exactly what this appropriation consisted of and the reason for the increase of $500,000 over the House appropriation and over the amount thought necessary, as disclosed by Mr. Edison in his testimony.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from West Virginia yield to the Senator from Utah?

Mr. CHILTON. I have yielded the flood.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. SMOOT. Mr. President, the Senator having the bill in charge made the statement that the laboratory work would involve the examination of $315,000,000 work of construction work as provided in this bill.

Mr. SWANSON. The Senator is mistaken. There is not that much construction work involved in the bill. I said that $139,000,000 worth of construction work is involved in the bill. We will spend that much in new construction, including submarines, and so forth. We have not yet found a motor that is entirely satisfactory for submarine use, and everybody knows that the motors in connection with our air craft are not satisfactory.

Mr. SMOOT. I am aware of that, Mr. President.

Mr. SWANSON. I say that, in view of the amount involved in construction work, we can well afford to expend $2,000,000 for a laboratory to engage in research work and to advise the department in connection with unsolved problems.

Mr. SMOOT. The amount of construction provided for in this bill will be taken care of in Government navy yards or private yards wherever the vessels are built. Every possible test is made to-day in the navy yards of the Government, just as in private yards. The proposed laboratory will not divert the work from the navy yards, but if it is carried on in conjunction with the work in the navy yards it will result in duplication. Not only that, but this laboratory will not be located where the tests must necessarily be made. So this money which is being appropriated is for experimental work along the lines of improvements and discovery of new kinds of instruments of warfare. It is to study improvements in submarines and for the investigation of improvements in torpedoes, aeroplanes, and so forth.

The laboratory will be located under one roof; it will not be where the work in connection with naval construction is being undertaken and completed. Tests of metal are made to-day in Government yards, just as tests are made in private yards, and efficiency methods are supposed to obtain in the Government yards the same as in private yards. The board of experts referred to by the Senator will never have anything to do with that class of work. This item is for investigation, not construction.

After the hearings which the House held, and at which Mr. Edison appeared and made his statement, the House decided that they would authorize an appropriation of $1,500,000. The amount expended for the laboratory, including research work, construction, equipment, and operation, was not to exceed $1,500,000, and the House appropriated $1,000,000 for this year. Why? Because the House knew that, considering the testimony, the construction of the laboratory and the construction and gathering of the machinery could not be accomplished in a year, and so they decided that $1,000,000 was all that could be expended profitably during the year; but they provide that plans could be approved for the expenditure of $500,000 more. That is what the provision of the bill as it came from the House says, and that is the program mapped out by the House. The Senate committee now proposes to add $1,000,000 to the appropriation made by the House. That is the situation as it exists.

Mr. WILLIAMS. Mr. President, this is preeminently one of those things which, if it is to be done at all, ought to be done just as quickly as possible. Mr. Edison is exactly right about that. The House appropriated, to be expended this year, $1,000,000, and authorized $500,000 to be spent next year. Mr. Edison says that if both these sums are used we will still fall $500,000 short of what is necessary, and advises that it is better to drop the whole thing rather than to spend $1,500,000 during the two years, or even one year, and accomplish nothing.

Now, as to the importance of this laboratory: There is nothing more important in the world than to keep up with all the new ideas that are offered in connection with warfare at this time. The very fact that Germany has done that; that she has her scientific governmental and Krupp laboratories to test every new idea, to examine it thoroughly, to test everything in connection with it, from the idea itself to the finished model, accounts for the fact that she entered upon this war with superior aeroplanes, superior submarines, and superior nearly everything else, including big guns. It all came from the fact that the Government tested all those things, and that the inventions and the testing she was able in many cases to keep secret.

There is hardly a Senator here—I reckon not one—who does not get from time to time letters or see a visitor suggesting what the inventor considers a very valuable idea—valuable to the Navy or valuable to the Army or valuable in the aeronautic service. He is sent down to the Navy Department or to the War Department, where there is absolutely nobody who can give him a sufficient hearing and who can sufficiently test out his device. "I have a contrivance here," he says, "which, in my opinion, will blow up a battleship at 20 miles," let us say. He may be a wild man; in nine cases out of ten he is; perhaps in forty-nine cases out of fifty; but the fiftieth man is not a wild man, and it is the tenth or fiftieth man who counts in the world's progress in inventiveness, not only in peaceful industry but in warlike industries.

Now, what is the use of inaugurating this laboratory at all unless you inaugurate it at once and appropriate every dollar at once which you propose to authorize, and let the construction take place as soon as possible, so that the laboratory may be put in full working order, with three shifts, so that it will not be behindhand, and so that whenever any man comes with an idea it may be tested? Ideas, by the way, are the most precious thing in this world. Although perhaps nine-tenths of so-called ideas are not ideas at all, yet when a man has a real idea it is the most precious thing in the world. Now, here is a man who comes and says, "I have a new gun which, in my opinion, will shoot faster and shoot farther and more accurately and will do more damage than any other gun you have." We have no one who sits in judgment upon that who is able to assist and at the same time safeguard the inventor. Here is a man who comes along and says, "I have a peculiar sort of thing which when applied will keep barnacles off the bottoms of warships when you have not time to carry them into fresh water, so that the barnacles may drop off." On a case of that kind I myself spent I do not know how long trying to help the man who said he had it; but I never could get a test or examination of that man's invention. There is nobody to do it.

You do not want routine naval officers to do it. That has not been in the line of their thought; they are not fitted to do it. What you want is a man like Edison and men like the other men who are, as members of this board, offering their services to the country; inventors themselves, mechanicians, scientists, who know things when they see them, and who in half the time that would be consumed by others can determine, first, whether the idea is good; and, secondly, whether the method of putting the idea into practical application is good. They decide the first point upon the knowledge which they already possess of things of that sort, and then for the second point they take the machine or other thing and actually test it in the laboratory. A man comes and says, "I have a new explosive which excels anything in existence." We want, to a certain extent, to keep the testing of it private. This board can test it in secrecy in the Government laboratory, and it can at least be hoped, if the thing is proven a success, that the Government can thereafter keep its own secret.

I do not regard anything in this bill as of so much initial importance as this very item, and I regard the idea of putting off its execution, if you are going to do it at all, as folly.

> If it were done when 'tis done, then 'twere well
> It were done quickly.

If you need it, you will need it in three or four years; if you need it at all, in my opinion, you will need it in less time than that. Perhaps you will never need it at all; but it is like David Crockett's pistol. He told the boy to put it on and keep it loaded, oiled, and bright, saying:

> Maybe you will never need it at all; but if you do need it, you will need it like the dickens, and you do not want to have to lose time when you get ready to use it.

Mr. SMOOT. Mr. President, may I ask the Senator a question?

Mr. WILLIAMS. Certainly.

Mr. SMOOT. I want to call the Senator's attention to the fact that every year we appropriate not only in the Army bill but in the Navy bill hundreds of thousands of dollars——

Mr. WILLIAMS. I know that——

Mr. SMOOT. For the testing of all sorts of inventions.

Mr. WILLIAMS. Oh, yes.

Mr. SMOOT. We have a board for that purpose; that board has worked for years and years along those lines; and we have appropriated millions of dollars for that class of work.

Mr. WILLIAMS. But that is not a board composed of inventors and of chemists or other scientists or of men who have made a practical success in the particular line of work and thought. The existing boards are composed of routiners who are absolutely—well, I will not say that—but who are relatively helpless for the purpose. Those boards which test existing machinery to see whether the steel is right, to see whether the armor is of the right character, of course are fully competent for all the work they do; but if you are going to have a board to test new inventions and see that they come up to the representations, the boards that you have now do not answer the purpose. They have not behind them the laboratory, they have not, therefore, behind them the proper and full opportunity to test, and they have not behind them the thought training that makes them equipped for it.

Mr. SMOOT. Well, the boards may not be perfect; but I doubt the statement that the Senator made as to their not answering the purpose of which they were organized. There is no question but that modern inventions of all kinds that are referred to this board—and thousands and thousands of them are referred—are investigated by that board, and many of them have been adopted and many of them rejected.

Mr. WILLIAMS. Oh, yes; and I believe among those rejected was the Lewis gun.

Mr. LA FOLLETTE. Which is recognized by England to be the most efficient weapon that there is.

Mr. WILLIAMS. Yes; and they have naturally rejected a great many good things, because they are a conservative, routine body.

Mr. SMOOT. We have no reason to believe that the men that would be appointed under this provision would be any other than conservative men; and they, too, would make mistakes, the same as the board made a mistake, perhaps, in rejecting the Lewis gun.

Mr. WILLIAMS. But surely the Senator knows we have. We know the personnel of the board beforehand. We know that they are men who have made themselves illustrious in the world of invention and in the world of standardizing and in the world of industrial efficiency, in the world of "new things."

Mr. SMOOT. Mr. President, I do not think they know any more in relation to the usefulness of a gun or what it could accomplish in case of its use in war than the board that passed upon the Lewis gun. The present board consists of men that we rely upon to direct our Army and to direct our Navy. They have been educated by the Government of the United States for the purpose of knowing just what is required in a gun to make it the most effective in time of war.

Mr. SWANSON. Mr. President, will the Senator permit me to interrupt him?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Virginia?

Mr. SMOOT. I do.

Mr. SWANSON. One of the greatest problems we have to solve in connection with submarines—which, as the Senator knows, run under water entirely by electricity—is how they can make electricity and store it in batteries. Now, here is Edison, the greatest man on electricity in the world, ready to assist in solving the submarine problem if you can store enough electricity. He is willing to give his services to this Government free to solve many of those difficult problems. Now, of course, I can understand that the people who have developed other submarines do not want that done.

Mr. SMOOT. As to the intimation made by Senators that the Senators who are opposed to this provision are working in the interest of some private individual or some corporation, it is unworthy of the Senators who made it. I do not know the makers of submarines in this country, and I do not care who they are. I never think of the individual. I never legislate for individuals or any class of corporations. I vote as I think best for the country as a whole.

Mr. GALLINGER. Mr. President, the creation of a scientific and technical board appeals to me very strongly. I chance to know of two inventions that men of rather remarkable accomplishments have made during my term in the Senate that were taken to the departments, and in each instance the reply that was given was: "We have technical men in the Navy Department and in the War Department that can do this work better than any outside party," and they were rejected practically without examination.

I really do think, however, without going into the merits of this amendment particularly, that if we are to have this great Navy and this great Army it would be well for the Government to have a board of scientists such as Mr. Edison and his associates on this voluntary board, I believe it is, which has been created, and that they could be of inestimable value to the Government in passing upon inventions that might be submitted to the Government for its consideration.

Mr. TILLMAN. Mr. President, the Senator from Mississippi [Mr. WILLIAMS], with his usual penetration, has gone straight to the mark and touched a point that appeals to me very much. Not a week has passed since Congress met here that I have not had one letter, and sometimes three or four, from inventors and people who have ideas, or believe they have them, which they think will revolutionize naval warfare, and when the letters do not come, the men do. As the Senator from Mississippi said, there is no place in the Navy Department where these things can be tested out. I write letters and send the men or their letters up there to some naval officer. Usually the reply comes back that "We have examined this, and there is nothing to it."

We have already had illustrations, and mention made of the Lewis gun having been rejected by the War Department.

Therefore I believe this laboratory, which it is proposed to give the Navy Department, is one of the most vitally important items in this bill. It would be a clearing house for American inventions or American inventors—for the inventors need a clearing house more than the inventions do—whereby I and others could be relieved of these persistent and insistent geniuses, as they think themselves to be, who believe they can save the country and revolutionize naval warfare.

Naval officers have not the time, some of them have not the inclination, and some of them perhaps have not the patience, to listen to these men. We know that a long time ago Ericsson was turned down at the Navy Department with his *Monitor* idea, and yet it revolutionized naval warfare—that and the *Merrimac* together. It has never been decided which ship won, and never will be; but that naval warfare was revolutionized by that battle in Hampton Roads we all know. Ericsson was turned down by the Navy Department, as I have said; but if we had had a laboratory of some kind there, and a board, a clearing house to test new ideas and examine them carefully, it would not have happened.

Therefore I hope this bill will not be passed without this item in it.

It is not generally known, but the Navy already has a small laboratory at Annapolis where tests of various kinds are conducted, mostly of material furnished under Government specifications. I know this, because I had some coal tested there two years ago to test its qualities for naval use. The building and equipment involved an expenditure of only about $400,000, but this establishment has been justified by the character and extent of the experimental work turned out. I would advocate its enlargement instead of building a new one somewhere else, but that is not advisable; and besides, the Naval Laboratory ought to be near deep water where the largest ships can come alongside, and where propeller and other tests relating to naval architecture and marine engineering and ordnance installation could be carried on. There is no doubt in my mind that the work done at this laboratory will in a short while more than pay for itself a half dozen times over and will result in such an improvement in the construction of torpedoes, submarines, battle cruisers, and battleships that we will wonder how we got along at all without it.

Thinking it nothing but just that the American officers should be given a fair opportunity to prove their side of the case, I communicated with Gen. Crozier, Chief of the Bureau of Ordnance, of the Army, and insert herewith the letter received from him giving the facts about the test of the Lewis gun and its supposed rejection:

ORDNANCE OFFICE, WAR DEPARTMENT,
July 15, 1916.

MY DEAR SENATOR: The Lewis gun was offered for test to the Board of Ordnance and Fortification of the War Department something over three years ago. The gun was presented by a private company, which apparently controlled it, and which offered for test a gun of foreign manufacture. The gun was thereafter tested by a board composed of officers of different branches of the service, in competition with some half dozen other guns, including the one with which the service was then, and is still, armed, known as the Benet-Mercié (otherwise

known as the Hotchkiss), and the Vickers. In this test the Lewis gun performed badly, and was apologized for by its proponents as having been badly manufactured, which they claimed as the reason for its bad showing, asking that they be permitted to submit, later on, another gun for test, which was readily granted. It is very likely that the poor construction of the Lewis gun prevented the principle of its construction from being really tested, which principle therefore rested as neither established nor condemned by the test.

The two guns shown by the test to be the best were the Benet-Mercié and the Vickers, and to decide between these two a further and more extensive test was made, including the use of four guns of each type and an extensive field trial. The Vickers finally won out, but being an English gun, the European war has greatly delayed the acquisition of any supply, even by manufacture in this country where the manufacture is being prepared for.

Before the second Lewis gun was presented for test the war also made it impossible to get one, as this gun had not then been produced on this side of the ocean. Since the commencement of the European war the manufacture of the Lewis gun has been taken up at an establishment in New York, and a number have been produced for the Canadian Government. In April last the War Department secured from this company two of the guns for further test, one arranged for the use of American ammunition and the other for British ammunition. The one arranged for American ammunition did not do well, which perhaps was not astonishing, as it had not been developed for this ammunition, which is stronger than the British ammunition. The one using British ammunition did better, but the testing board, which consisted of a Cavalry officer, an Infantry officer, and an officer of ordnance, stated that it was not in its present state of development equal or superior to either the Benet-Mercié gun or the Vickers gun, and added:

"The Lewis gun, on the other hand, is lighter and simpler and has a fewer number of parts than the other guns mentioned, and in the opinion of the board the question as to whether or not it can be developed to a satisfactory degree of reliability and dependability is an open one."

So much for the official tests. Last month (June, 1916) an informal test by verbal order of the commanding general of the Eastern Department was held of the Lewis gun and the Benet-Mercié gun at Plattsburg, as a result of which the Lewis gun was declared to be superior to the Benet-Mercié gun in all respects except portability. The reason for the opposite conclusion from that which had been reached in the two official tests must be sought in the different conditions of the Plattsburg test. At that test the guns of both classes were handled by civilian attendants of the military instruction camp, but the Benet-Mercié gun was in charge of the officer commanding the machine-gun troop of a regular regiment, and its troubles were looked after by a noncommissioned officer of that troop, while the Lewis gun was in charge of an official of the manufacturing company and had its troubles seen to by an expert furnished by that company. There is no evidence as to the condition in which the Benet-Mercié gun entered the trial, or the degree of knowledge in regard to them of the military people who were in charge. These points need clearing up. The number of rounds fired at this test by the Lewis gun was less than 2,000. At the official test last April the number was 15,000.

The following is taken from the report of the official board which tested the Lewis gun in April:

EXTRACT FROM THE REPORT OF THE BOARD WHICH TESTED THE LEWIS GUN IN APRIL, 1916.

Considering the performance of the Lewis gun in the test reported herein, and comparing that performance with the performances of the Vickers gun (automatic machine gun, model of 1915) and of the Springfield gun (automatic machine rifle, caliber .30, model of 1909) in the test conducted by the board convened by S. O. No. 191, War Department, August 16, 1913, the board finds that the Lewis gun in its present state of development is not equal or superior to either of the above-mentioned guns. The Lewis gun is not as reliable or as dependable as are the other guns mentioned. The following table shows in summary the data upon which this opinion is based:

Endurance test, 15,000 rounds.

	Lewis gun.	Springfield.[1]	Vickers.
Time of firing, excluding cooling and repairing	2 h. 3 m.	2 h. 27 m.	1 h. 24 m.
Number of jams and malfunctions	314	59	23
Number of broken parts	8	7	.....
Number of parts not broken but replaced	5	.....	.....

[1] Benet-Mercié.

The Lewis gun, on the other hand, is lighter, simpler, and has a fewer number of parts than the other guns mentioned; and in the opinion of the board the question as to whether or not it can be developed to a satisfactory degree of reliability and dependability is an open one.

The board therefore finds that the results of the present test were not such as to justify the purchase of four Lewis guns chambered for the service ammunition for further test at this time, but in view of the desirable features of the gun the board recommends that if the Savage Arms Co. undertake to develop a gun for the service ammunition, a further test be made, upon their request, after the development shall have been carried to a satisfactory stage.

There being no further business before it, the board adjourned sine die.

I am, Senator, very sincerely, yours,

WILLIAM CROZIER,
Brigadier General, Chief of Ordnance.

Hon. B. R. TILLMAN,
United States Senate, Washington, D. C.

Mr. BRANDEGEE. Mr. President, as I said before, I would gladly vote for a much more comprehensive amendment than this, and a much larger laboratory and a better equipped one than this $2,000,000 will furnish, in spite of the statement of the Senator from South Carolina that he was not surprised to see this provision opposed by a New England man, because those people took out patents and held up the Government, as he says, which intimation I thought was entirely uncalled for and unworthy of the Senator.

Mr. President, I think one defect in this amendment is that it confuses the research work to be done with the laboratory to be built. It does not appear from the amendment that there is any limit of cost fixed for the laboratory; but it appropriates this $2,000,000 for laboratory and research work on various subjects, and so forth, including the construction and operation of a laboratory. It seems to me that if the committee's intention is that $2,000,000 shall be spent upon the construction and equipment of a laboratory for these purposes, it will be easy to say so; and I was simply going to suggest to the Senator in charge that if this amendment were made it would accomplish that purpose. I do not know whether he desires to accomplish that purpose or not. I assume that it will take a year or two to build the laboratory and spend the $2,000,000 on it, and I assume it is only going to be spent on that laboratory and its equipment. If so, I think we had better say so.

I would suggest, if the Senator can follow me, that in line 4 of page 42 we interline, after the word "For," on line 4, the words "construction and equipment of a," and in line 5——

Mr. SWANSON. So that it will read "For construction"?

Mr. BRANDEGEE. Yes. I will read it as I should like to have it, and then I will tell the Secretary where to make the interlineations afterwards. I would have it read in this way:

For construction and equipment of a laboratory for research work—

On all these different subjects, leaving them just as they are—

and such other necessary work for the benefit of the Government service as may become necessary, to be expended under the direction of the Secretary of the Navy, $2,000,000, which shall be the limit of cost of said laboratory.

The House provision established a limit of cost. The Senate provision does not. Now, that could be done by making it read in that way, as I said.

Mr. SWANSON. Does the Senator mean to leave the entire language as it is included in the provision? I should like to have the Senator read it again.

Mr. BRANDEGEE. I will. After the word "For," on line 4 of page 42, I would interline the words "construction and equipment of a." On line 5, the second word in the line, I would change the word "and" to the word "for," so that it would read:

For construction and equipment of a laboratory for research work on the subject of gun erosion * * * and such other necessary work for the benefit of the Government service as may become necessary, to be expended under the direction of the Secretary of the Navy, $2,000,000, which shall be the limit of cost of said laboratory.

Mr. SWANSON. I understand that would simply limit it to the laboratory, and would exclude the research work.

Mr. BRANDEGEE. If it is the intention that the research work can be done in the laboratory before it is built, I do not know how that could be accomplished.

Mr. SWANSON. They could be doing some of it.

Mr. BRANDEGEE. In other words, does the Senator intend this $2,000,000 to be spent upon a laboratory and its equipment or upon research work?

Mr. SWANSON. Both. It says both, and for some scientific assistants.

Mr. BRANDEGEE. I thought the laboratory was to be built and equipped for the purpose of conducting research work.

Mr. SWANSON. If the Senator will remember the letter of Mr. Edison, he thought that for a million and a half the laboratory could be equipped.

Mr. TILLMAN. Built and equipped.

Mr. SWANSON. Built and equipped; and then it would take half a million dollars to get the material, to employ assistants, and conduct the research work.

Mr. BRANDEGEE. I supposed the research work was to be conducted in the laboratory which is to be built for the purpose of conducting research work; but if the research work is going to be done without a laboratory, I do not see the necessity of having a laboratory.

Mr. SWANSON. I will say to the Senator that the House language was very ambiguous, and did not designate what they wanted it for, and it was left with a great deal of looseness, as we thought. They did not say what they would investigate.

Mr. BRANDEGEE. I am not defending the House language. I agree that it was loose.

Mr. SWANSON. This is an effort to designate subjects that are of practical value, that are useful, and to provide a research laboratory for these purposes. We did not care to turn a million and a half dollars over to a parcel of people for laboratory research and investigation that did not appertain to problems confronting the Navy; so we eliminated the House provision and put in subjects of practical value to the Navy.

Mr. BRANDEGEE. Mr. President, I know, of course, that the Senate committee eliminated the House provision and put in another provision, which I am criticizing. I want to ask the Senator whether he is willing to have a limit of cost put upon this laboratory, as the House put one?

Mr. SWANSON. I am willing to put the limit of cost at not to exceed $2,000,000.

Mr. BRANDEGEE. On the laboratory?

Mr. SWANSON. The laboratory and the research work. I am perfectly willing to have that done.

Mr. BRANDEGEE. How much of this $2,000,000 is to be spent on the laboratory?

Mr. SWANSON. A million and a half.

Mr. BRANDEGEE. And how much on the equipment?

Mr. SWANSON. A million and a half is for the laboratory and equipment; $500,000 is for the material and the research work and the scientists that it will be necessary to employ.

Mr. BRANDEGEE. Why not say, then, that the limit of cost on the laboratory and equipment is a million and a half?

Mr. SWANSON. I have no objection to that going in, except that it might cost a little over that. They might have to buy a very important machine that would cost $25,000 more, and they could not do it if that language were put it. If this were not to be done under the direction of 22 as fine business and scientific men as possible, it would be a different situation. These are not wild theorists that are to direct this work. These are men who have made a success of business. Mr. Edison is a business man as well as a scientist.

Mr. BRANDEGEE. I have heard all I care to hear in my time about Mr. Edison.

Mr. SWANSON. I do not care to take any more of the Senator's time.

Mr. BRANDEGEE. I acknowledge his preeminence, and if we did our work as well as he does his we would have a better amendment in this bill. If the House limited the cost of the structure and its equipment to a million and a half, and that is satisfactory to the Senator, I should think he would make the same limit here and say that the other $500,000 was to be spent, in the judgment of the Secretary, for anything he has a mind to spend it for. But this leaves it so that they can spend the whole $2,000,000 on the laboratory if they want to, and they can devote nothing to research, or they can spend it all on research.

Mr. TILLMAN. Does not the Senator realize that this will have to go to conference and that the House is going to contend for its provision, and the conferees can lick it into shape there better than we can do it here?

Mr. BRANDEGEE. Yes; I know, but when the bill comes back, as the Senator knows, after the conferees arrange it to suit themselves, and report it back here, we swallow the whole bill or else reject the whole bill. I thought we might devote a few minutes to getting it into as good shape as we could here; but if it is not desirable, I withdraw the amendment, and the Senator can do as he pleases with it.

Mr. GALLINGER. Mr. President, I have interlined my bill by adding a few words which I will submit to the Senator from Virginia. After the word "Navy," in line 15—if the Senator will turn to the bill—add the words, in parentheses, "limit of cost not to exceed $2,000,000"; and then I would appropriate a million dollars, just as the House has done.

I am not very anxious to appear in the light of an economist when the burden is upon the other side of the Chamber, but of course this laboratory will not be built in one year; it will not be equipped in one year; it would have a million dollars to operate with during the present fiscal year, and I think that is abundant.

Mr. SWANSON. I think a million and a half would be sufficient for the present appropriation.

Mr. GALLINGER. Very well; I will make it a million and a half, then—"limit of cost not to exceed $2,000,000, $1,500,000"—and I offer that amendment.

Mr. SWANSON. I accept it.

The PRESIDING OFFICER. The Senator from New Hampshire proposes an amendment which will be stated by the Secretary.

Mr. GALLINGER. I think it is understood, Mr. President.

The PRESIDING OFFICER. Very well. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the committee as amended.

Mr. CLAPP. I understood that a roll call was desired on this amendment. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Minnesota suggests the absence of a quorum. The Secretary will call the roll.

Mr. SWANSON. Does the Senator from Nebraska desire a yea-and-nay vote?

Mr. GALLINGER. The absence of a quorum is suggested.

Mr. NORRIS. I asked for a yea-and-nay vote, and it was ordered. The Senator from Minnesota——

The PRESIDING OFFICER. Debate is not in order. The Senator from Minnesota has suggested the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	Nelson	Smith, Ariz.
Borah	Fletcher	Newlands	Smith, Ga.
Brady	Gallinger	Norris	Smith, S. C.
Broussard	Johnson, Me.	Overman	Smoot
Catron	Jones	Owen	Sterling
Chamberlain	Kenyon	Pittman	Swanson
Chilton	La Follette	Poindexter	Thomas
Clapp	Lane	Ransdell	Thompson
Clarke, Ark.	Lee, Md.	Shafroth	Tillman
Culberson	Lewis	Sheppard	Williams

The PRESIDING OFFICER. Forty Senators have answered to their names—less than a quorum. The Secretary will call the names of absentees.

The Secretary called the names of absent Senators, and Mr. HOLLIS, Mr. TAGGART, Mr. TOWNSEND, and Mr. WEEKS answered to their names when called.

Mr. CLARK of Wyoming, Mr. GRONNA, Mr. OLIVER, Mr. HITCHCOCK, Mr. KERN, Mr. BECKHAM, Mr. LODGE, and Mr. VARDAMAN entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-two Senators have answered to their names. There is a quorum present.

Mr. TILLMAN. Mr. President, I ask unanimous consent to have inserted in the RECORD—not read, but printed in large type, so that it will be read after it gets there—the statement of Mr. A. M. Hunt, of the Naval Consulting Board, in regard to this laboratory.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Carolina to have certain matter incorporated in the RECORD? There being none, it is so ordered.

Mr. TILLMAN. I have marked in blue pencil the portion that I want inserted.

The matter referred to is as follows:

STATEMENT OF MR. A. M. HUNT.

"Mr. HUNT. I think, in speaking in favor of a laboratory for naval purposes, or an experimental station, that I approach the matter within perhaps a wider point of view than some of the other members of the Naval Consulting Board. I am a graduate of the Naval Academy, and served for 15 years in the Engineer Corps of the Navy, until 1894, resigning then, and since that time have been engaged in consulting engineering work in a great many varied lines of industry, reaching over the entire country from Alaska and the Pacific coast to the East. I have always retained my interest in the naval service and have followed its development and progress. When Mr. Edison was laying before the Naval Consulting Board at one of its meetings the plans which he was preparing and developing for this laboratory the question came up of the hearings to

be held before this committee, and Mr. Edison stated that he was perfectly willing to work and to get out plans, but that he was not at all fitted to argue the question, and requested that a subcommittee be formed to prepare such an argument. I was appointed on that committee, and a formal argument was prepared, which I would like to read into the record.

"The paper is as follows:

"The Government of this country now has under consideration a program looking to the expending of $500,000,000 for increasing the strength of the Navy. This money will be spent on warships, submarines, flying machines, ordnance, ammunition, etc.

"Admiral Melville, one of the most able men the United States Navy ever had, took great pains, 12 years ago, to urge the establishment of experimental laboratories for getting the best and most efficient results of any money spent on our Navy. In urging the importance of all this, he wrote:

"'If it be true that the battleship of one generation is the junk heap of the next, then an economical race like the German is pursuing a wise policy in conducting experimental research and investigation in the direction of finding out how the weak links in the naval chain can be strengthened.

"'Experience has shown that the German engineering laboratories are more than a good paying investment, for there is not an expert in that Empire familiar with the work being done at these laboratories who does not believe that their destruction would be a greater national calamity to the Navy and the nation than the loss of one of the battleships of the home squadron. The warship could be replaced in four years. It would take six years to rebuild and put in effective operation the complete installation for conducting experimental research that has been developed and perfected at the Charlottenburg and Dresden technical colleges.

"'There is probably not an eminent naval or mechanical engineer in America or England who has given consideration to this question who is not also of the opinion that the establishment of a national experimental laboratory for naval purposes will vastly contribute to military strength. Probably the majority of these experts also believe that such an institution would eventually contribute more to actual naval strength than the building of a battleship. One does not need to possess vivid imagination to realize that much is contributed to the fighting strength of a navy by carrying on research along engineering lines, and thus preventing the design, construction, and installation of appliances that are ill-suited for the purpose intended.'

"Unfortunately, Congress has not seen fit to be guided by the recommendations of this eminent officer, and the Navy Department has to-day no adequate facilities for carrying out the research and experimental investigations which should precede and accompany the expenditures contemplated.

"Any manufacturing or other establishment in this or any other country would, under similar circumstances, immediately provide such facilities, and this is what the Naval Consulting Board has advised and recommended.

"The task of developing and increasing our Navy is essentially one dependent on exact knowledge and engineering and technical skill.

"If we are content to adopt as a standard the results of the past, and not to endeavor to improve on them, then no experimental and research investigations are necessary. Naval construction, however, does not stand still, and to keep abreast with other nations, to say nothing of keeping in advance of them, means must be available to try out and test new ideas in advance of their use in actual service.

"It is true that at the different navy yards and naval stations there are laboratories in which the routine work of testing materials for use in the Navy is carried on, and a minor amount of investigation and experimental work is also conducted.

"It may be contended that the purposes of the experimental station and laboratories which have been proposed by the Naval Consulting Board can be adequately taken care of by the existing facilities. Anyone familiar with the situation at the various yards and with the conditions obtaining will at once understand the folly of such a suggestion.

"The yards and their facilities are fully occupied with active work of construction and with the maintenance of the fleet as their primary function. Anything in the nature of experimental work would be inevitably subordinated to the exigencies of this primary function, and suffer accordingly. Examples of this may be found at practically any of our yards to-day. When you are trying to discount the future, delays are fatal, and it is evident that no satisfactory results can be hoped for unless facilities, primarily intended for the investigation and experiment, are provided.

"The creation and operation of such a laboratory and experimental station as has been proposed by the Naval Consulting Board will result in the production of battleships and other elements of naval warfare which will be several years in advance of those produced under present methods.

"The extreme importance of this is self-evident, and if the above statement can be established no other justification for the expenditure required is necessary.

"Assume that the construction of a battleship has been authorized by Congress, and that the bureaus of the Navy Department are instructed to proceed with the design. The latest battleship that has been built and put into service was probably designed at least three years ago. Therefore, if the new ship is to include only elements which have been tested by actual use, she will be at least three years behind the times when she is designed and six years behind the times when she is completed and ready for service.

"This situation forces the Navy Department, if it wishes to improve on previous designs, to incorporate in the new ship many features which under present circumstances must in a large degree be untried and unproven, and which may or may not prove wholly successful.

"There will be hesitation to assume the serious risks which are involved in incorporating in such an important structure elements which may jeopardize her efficiency and usefulness.

"If such a laboratory and experimental station as has been proposed were in existence, the procedure would probably be as follows:

"The officials of the Navy Department would decide that in the new battleship they would want to incorporate certain new elements and devices. Even before designs of the ship were started, orders could be given for getting out and testing at the laboratory such new elements. Before the designs were completed, the results of such tests would be available, and the designs, as sent out to bidders, would include not only elements which had previously been in use on battleships but also new elements and improvements which had been tested at the experimental station.

"If means existed for such experimental trials, many things would be tried out which, at the present time, no naval officer would be justified in suggesting for adoption in the building of a new ship.

"The net result would be that the designs of our vessels would be the very latest word. As it is, due to justifiable conservatism, the designs do not embrace the very latest ideas.

"That we may not fall hopelessly behind in naval progress, new ideas have to be incorporated in the designs. They are worked out with all the skill and knowledge available, but they can not be submitted to actual test of operation. The design goes to the bidder. He finds that he must guarantee and make good on the operation of such new devices. Naturally he increases his bid by an amount which covers the risk which he thinks is involved, and the amount which he will have to expend in developing and testing such new elements.

"In at least certain cases it can be demonstrably shown that the delay in completing naval vessels under contract has been due to failure of these new elements when tried, and the necessity for rebuilding them or substituting other devices for them.

"Such a laboratory and experimental station would enable us not only to keep abreast of the times but ahead of them.

"The laboratory would be useful and valuable to the Navy in many other and various ways, perhaps not of as striking a character as that above set forth, but serving purposes equally useful.

"Problems vitally affecting the efficiency of the fleet are constantly before our naval officers which can not be solved without research and experiment. Much valuable and important work has been done with the limited facilities available, but much more could have been done, and many serious delays would have been avoided if the proposed laboratory had been in existence.

"The work of such a laboratory and experimental station would be a real gain in other directions than the improvement of the Navy. Advance in any line of engineering or technical industry inevitably affects all others.

"The work of such an experimental station in improving and developing advanced types of internal-combustion engines for submarines, aeroplanes, etc., will benefit the entire internal-combustion engine industry of the country. It is only necessary to recall the extent to which the gasoline engine is used for agricultural purposes and for automobiles to realize how many of the people of this country may receive direct benefits from the work done in such an establishment as is proposed.

"Investigations which would be carried on looking toward the development of the natural resources within our own country

that would furnish all the materials requisite for the manufacture of explosives would have a direct bearing upon other branches of chemical industry, such as the manufacture of fertilizers.

"It is worse than foolish to expend any money for 'naval program,' unless its expenditure will give us fighting elements of the highest and best type. It is certainly justifiable, in view of the large expenditure contemplated, to devote to investigation and experimental work, which conduce so largely to the desired result, the relatively modest gun which the Naval Consulting Board has recommended."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment passed over.

The SECRETARY. The next amendment passed over is the amendment on page 176, beginning on line 13, passed over at the request of the Senator from Idaho [Mr. BORAH].

Mr. BORAH. Mr. President, I desire to make a point of order upon the amendment found on page 170, beginning in line 13 with the words "The President" and ending at page 178, line 10, with the numerals "$50,000."

I make the point of order on the ground that it is general legislation to an appropriation bill.

Mr. SWANSON. Mr. President, the point of order is well taken if the Senator insists on the point of order. The Secretary of the Navy and others have urged this provision as being absolutely necessary; but if the Senator has any objection to it, the point of order will clearly lie. I will be willing to accept any amendment that might obviate any objection the Senator has to this provision.

Mr. BORAH. The Senator from Virginia stated to me last night that he would be glad to have me offer an amendment instead of making the point of order, but in looking over the amendment last night I found it was impossible to make an amendment and leave any vitality in it, because I think in its entirety it is bad.

I am not going to discuss it, because it is clearly, in my judgment, subject to the point of order.

Mr. SWANSON. It is clearly subject to a point of order.

Mr. BORAH. I have no doubt about that; I will take the ruling of the Chair.

The PRESIDING OFFICER. The chairman of the committee admits that it is subject to the point of order?

Mr. SWANSON. It is clearly subject to the point of order.

The PRESIDING OFFICER. The Chair sustains the point of order.

Mr. SWANSON. A similar provision was included in the Army bill. If the Senator will eliminate the provision that applies to the authorization which this amendment makes, it is then exactly the law which applies to the Army in time of emergency or war. Will that satisfy the Senator?

Mr. BORAH. I do not want to offer an amendment to it at all, for the reason that I am opposed to the entire principle. If it were desired to have this power conferred in time of war, it would be conferred, no doubt—there would be no necessity whatever for any delay—but to have this kind of a power conferred in time of peace and covering authorizations which will be carried out in time of peace is so obnoxious, to my view of matters, that I would not want to offer any amendment at all. I prefer to have the matter go out in its entirety.

Mr. SWANSON. If the Senator would offer an amendment before he makes a point of order, on page 176, line 14, to strike out this part which is the only change in the law, "or for the purpose of carrying out the authorizations for which appropriations are made in this act," I would agree to amend it by eliminating that.

The PRESIDING OFFICER. Is there objection to the matter being temporarily restored, so that the Senator from Virginia can offer his amendment to the amendment? If there be no objection it is considered temporarily restored, and the Senator from Virgina proposes the following amendment:

The SECRETARY. On page 176, lines 14 and 15, strike out the words "or for the purpose of carrying out the authorizations for which appropriations are made in this act."

Mr. LODGE. If the Chair will permit me, I think I am right in saying that a point of order having been made and sustained it is not possible to make it in order and bring it back.

The PRESIDING OFFICER. The Senator from Massachusetts is clearly right.

Mr. SWANSON. I ask unanimous consent that the amendment may be offered.

Mr. GALLINGER. It can not be offered.

Mr. LODGE. It can not be done after a point of order has once been made and sustained. You can not unmake a point of order.

Mr. GALLINGER. The Senator from Virginia can offer a separate amendment.

Mr. SWANSON. I will offer an amendment to the paragraph.

Mr. GALLINGER. Let us understand it.

Mr. LODGE. It is the same amendment modifying it as to authorization.

Mr. SWANSON. It is precisely the same as the provision for the Army. It seems to me that in war, in an emergency, the Army should not have this distinct advantage of compelling people who are reluctant to serve for the public good. It would result in the Army having a strong arm and being able to meet its requirements promptly and quickly, while the Navy would be unable to do it. It seems to me if the Army has the power the Navy ought to have it.

Mr. BORAH. Mr. President, I voted against the Army bill, so that does not appeal to me. It is extraordinary to my mind to confer this power unless in case of actual war, and if actual war exists there will be no difficulty in getting the power without any delay whatever. But even in actual war it should not be done in such terms as these.

This amendment, on page 176, reads that—

> The President, in time of war or when war is imminent, or for the purpose of carrying out the authorizations for which appropriations are made in this act, is empowered, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement, to place an order with any individual, firm, association, company, corporation, or organized manufacturing industry for such product or material as may be required, and which is of the nature and kind usually produced or capable of being produced by such individual, firm, company, association, corporation, or organized manufacturing industry.
>
> Compliance with all such orders for products or material shall be obligatory on any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof and shall take precedence over all other orders and contracts theretofore placed with such individual, firm, company, association, corporation, or organized manufacturing industry, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any plant equipped for the manufacture of shipbuilding, engineering, and ordnance material, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any manufacturing plant, which, in the opinion of the Secretary of the Navy, shall be capable of being readily transformed into a plant for the manufacture of shipbuilding, engineering, and ordnance material, or other necessary supplies or equipment, who shall refuse to give to the United States such preference in the matter of the execution of orders, or who shall refuse to manufacture the kind, quantity, or quality of shipbuilding, engineering, and ordnance material, or any necessary supplies or equipment, as ordered by the Secretary of the Navy, or who shall refuse to furnish such shipbuilding, engineering, and ordnance material, or other supplies or equipment, at a reasonable price as determined by the Secretary of the Navy, then, and in either such case the President, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement herein provided for, is hereby authorized to take immediate possession of any such plant or plants and, under the supervision of the Secretary of the Navy, to manufacture therein in time of war, or when war shall be imminent, such product or material as may be required, and any individual, firm, company, association, or corporation, or organized manufacturing industry, or the responsible head or heads thereof, failing to comply with the provisions of this section shall be deemed guilty of a felony, and upon conviction shall be punished by imprisonment for not more than three years and by a fine not exceeding $50,000.

I have no objection at all to the Government going into the manufacture of munitions of war, but to give the head of a department the right to go in at his own discretion and upon his own view as to what constitutes a right price, and so forth, take possession and make people who disagree with him as to the value or price punishable by fine and the penitentiary is something that is so obnoxious to me that I would not consent to its going in, and I would not vote for the bill if it was in.

Mr. WORKS. Mr. President, I should like to ask the Senator from Idaho if he does not think this section is in entire harmony with the balance of the bill. The whole thing is an attempt to create a military power here to control the civil power, after a while, if not now. It is one of the steps in that direction.

Mr. BORAH. I can not agree with the Senator. I think there is a way to democratize preparedness just the same as there is to democratize government, and I do not think we should ape absolute or monarchical governments in the way of preparing ourselves. There is no necessity for those things. Does anybody suppose that if war actually existed in this country or was imminent the manufacturing establishments of the country would not give their plants over to the Government if they were unable themselves to operate them effectively, or that they would not put their plants at the service of the Government to the fullest capacity? If, on the other hand, war did exist and they should fail to aid the Government, we could pass a resolution or a bill here in an hour for the purpose of taking possession of them.

Mr. WEEKS. Mr. President, I wish to call the Senator's attention to the part of the paragraph which says:

Or who shall refuse to furnish such shipbuilding, engineering, and ordnance material, or other supplies or equipment, at a reasonable price as determined by the Secretary of the Navy.

The Secretary of the Navy is on record this year in the House hearings as saying that he would not buy armor of the armor-plate plants if they would furnish it for nothing. Is it going to be left to a Secretary who made as broad a statement as that to determine what is a reasonable price, and when he determines that the going price is unreasonable permit the prosecution of men and fining them an excessive amount because they do not happen to agree with the views of a public official?

Mr. SWANSON. The Secretary of the Navy wrote a letter asking that the Navy be given the same power that we conferred on the Army.

The VICE PRESIDENT. Is a point of order made on the amendment?

Mr. OLIVER. I make the point of order.

The VICE PRESIDENT. The Chair is clearly of opinion that the amendment is not connected in any way with the rest of the bill, and sustains the point of order.

Mr. SWANSON. There is an amendment on page 62, passed over at the request of the Senator from Washington.

The VICE PRESIDENT. It will be stated.

The SECRETARY. On page 62, after line 4, insert the matter down to and including line 10 on page 63. It went over on the suggestion of the junior Senator from Washington [Mr. POINDEXTER].

Mr. POINDEXTER. Mr. President, one objection to this amendment is that it has no provision whatever in it for the appointment of the board. It says the board shall select officers for promotion. It does not state how the board shall be created. That is why I asked that it should go over. However, having called the attention of the Senator in charge of the bill to that omission, I am perfectly willing to leave it with the conference committee to supply the defect. If there is no provision for the appointment of a board, of course they could not act.

I stated the other day some possible vices that might grow out of the operation of a board of this kind, but it is all the time in the power of Congress to remedy it and abolish this board, as it did abolish the plucking board.

I am in favor myself of some system of promotion on merit. This would be a good system if it is properly administered. If it should fall into the hands of cliques or factions who would play politics in the Navy, as it has been played in conspicuous instances in the past, and compel officers seeking promotion to cater to the favor of those in charge of the naval politics, it would be so obnoxious that undoubtedly it would be abolished.

I have nothing further to say on the subject.

Mr. OLIVER. Mr. President, I should like to ask the Senator from Virginia whether the committee considered at all the advisability of making the selections in the lower instead of the higher grades? I have acquired the opinion from talks I have had with men in the Navy and in the Army as well that the time to make selections is in the early part of the officer's career, and that by the time a man reaches or perhaps passes middle life he should have made a record for himself that would entitle him to promotion by seniority. I have also heard that that is the plan followed in other navies.

While I do not propose to object to the amendment and expect to support it, I would ask the Senator whether that question came up for consideration or not?

Mr. SWANSON. The committee considered very carefully all phases of the question by selection. There are some who favor selection at the beginning, in the junior grade. If there came in at an early age 2,000 young officers, none of them with a record to show any distinctive difference, it would produce more trouble, more discontent, than any good that could possibly accrue from it. So seniority as now provided by law is applied when the promotion comes from commander to captain. We felt that the time to make the selection was when the hour of responsibility came. We thought the duty of junior lieutenants, lieutenants, and lieutenant commanders is not so distinctively responsible as to require the exercise of selection.

We believe that by requiring an examination before promotion from one grade to another inefficient people would be more or less eliminated from the Navy, because there must be an examination mentally, morally, and physically before they are promoted from one grade to another. When they come to command large battleships and to command a fleet and to outline the policy in connection with naval warfare, we thought the most capable, the most worthy, man should be selected, and we thought the hour of selection should be the hour of responsibility as that of the commander of one of the large battleships. We believed, too, that it would produce less friction after a man has served in the Navy 20 or 25 years. Then, if he has any marked superiority over others it becomes sufficiently great to be noted. I think that is better than to have the selection made early, and that it will produce less friction. That was the view which prevailed in the committee and with those who prepared this amendment.

Mr. NORRIS. Mr. President, I do not care to take the floor, but I wish to ask the Senator from Virginia a question. Referring again to the point suggested by the Senator from Washington, I wish to ask the Senator from Virginia what his idea is as to the appointment of this board.

Mr. SWANSON. All the boards are appointed by the Secretary of the Navy. That is the general method of appointment and I suppose that will prevail in this case.

Mr. WEEKS. I wish to ask the Senator in charge of the bill if he will have any objection to an amendment which will read something like this, speaking of the board:

Consisting of 9 flag officers of the line of the Navy who shall be selected by the Secretary of the Navy from the first 12 on the rear admirals list.

Mr. SWANSON. That was considered by the committee and also by those who prepared this amendment. Some wanted the first nine. These are usually men of ability. Some of them might be far off in a fleet in eastern waters when the question of promotion came up, and we thought if limited to 12 and to take 9 out of the 12, it would produce more trouble than to take any flag officers. It would simply make 12 men decide the entire recommendation and those 12 men might be with the fleet somewhere. After discussing it from the broader field we thought it would be better to leave it to the flag officers entirely who are composed of rear admirals.

Mr. WEEKS. I make the suggestion that the junior rear admirals very frequently belong to the same class at the Naval Academy with the senior captains. If they are selected from the senior rear admirals they would be farther removed from the personal equation, and being near their retirement, in all probability you would get more judicial treatment.

Mr. SWANSON. I will accept the amendment and let it go into conference and we will consider it. There has been some difference of opinion in regard to how the board should be constituted but I will accept the amendment.

Mr. WEEKS. I think it would be embarrasing to limit the number to 12.

The VICE PRESIDENT. Will the Senator from Massachusetts send up his amendment or indicate it so that the Secretary can get it accurately.

Mr. WEEKS. In line 11, page 62, after the word "board" insert the word "consisting," and then read:

Of 9 flag officers of the line of the Navy who shall be selected by the Secretary of the Navy from the first 12 on the rear admirals list.

Mr. SWANSON. I have no objection to that amendment.

The amendment to the amendment was agreed to.

Mr. NORRIS. I wish to ask the Senator from Virginia another question in regard to these promotions, entirely for information. The men selected for promotion by this board would be recommended to the President?

Mr. SWANSON. They would be recommended to the President.

Mr. NORRIS. And the President under the law, of course, would actually make the appointment that would bring about the promotion.

Mr. SWANSON. The law provides that it shall be made on the recommendation of this board.

M.. NORRIS. Suppose the law were enacted as amended now, would a President be under any constitutional obligation to comply with it? Could he disregard the recommendation if he wanted to do so?

Mr. SWANSON. That question has been debated as to whether, a law fixing a certain office, the President must not make the appointment in pursuance of the law as fixed by Congress. I would have the impression that Congress determining how officers shall obtain the rank of captain and rear admiral the President could not fill those places except by complying with the law. It has been a debated question, but I have never known any case where it was violated except, possibly, when President Johnson was impeached for violating the act of Congress in reference to the removal of the Secretary of War. There have been two lines of thought as to whether the President has the power to make these appointments, anyway. If he has, he could ignore the law of seniority that exists in the Navy now. These promotions are made entirely by seniority under the present law in the Navy. The President has, I think, always complied with that.

The idea was when the question came up as to whether he could violate it or not, that the offices being created by law and he being empowered by Congress to create offices, he must fill them as required by law, but he could violate the law of seniority as much as he could violate this.

Mr. NORRIS. I agree with the Senator that he could. The question is, could he not violate either one if he wanted to do so. In other words——

Mr. SWANSON. I do not know; I have never heard of such a case.

Mr. NORRIS. Have we not by this amendment taken away from the President any discretion whatever?

Mr. SWANSON. It does practically take it from him; it says he shall appoint them on the recommendation of the board.

Mr. NORRIS. That means, then, in its practical effect that the board makes the appointment, does it not?

Mr. SWANSON. The board makes the appointment.

Mr. NORRIS. I can see that if the board were required to recommend to the President a certain number and from that list a certain smaller number were to be appointed by the President, and it prohibited the President from going outside of that list, there might be reasons for sustaining it on constitutional ground, but if we provide by law that the President shall appoint certain officers whom a certain board has recommended to a certain position, when the Constitution gives the President the right to make the appointment, we have practically taken away from the President the constitutional prerogative of making the appointment.

Mr. SWANSON. If the Senator will permit me, the present law is that when a vacancy occurs in a higher grade the appointment shall be made from the highest in the next lower grade. The President sends the appointment to the Senate and it is confirmed, and that law has been sustained and complied with. There are two lines of thought in reference to it, one opinion being that it really deprives the President of the appointing power under the Constitution, and another line of thought being that the offices are created by Congress in a certain way and that with the creation there comes a method of filling them. I do not know whether the Supreme Court has ever passed on the question or not.

Mr. NORRIS. I suppose there is not any doubt but that these officers are officers of the United States.

Mr. SWANSON. No person is an officer of the United States unless the office is created by an act of Congress. The President can not create an office.

Mr. NORRIS. I understand. We are creating the office here.

Mr. SWANSON. But when the office is created the question has been whether the method of appointment is not a part of the creation. Congress provides that promotions shall be made in certain ways and the President signs the act of Congress concurring in it. The question is whether that does not establish the only method in which it can be filled.

Mr. NORRIS. I am referring to the constitutional provision:

> But the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

I presume these would be inferior officers, and we would have a right to provide by law for their appointment by the head of a department. In this case it would be the Secretary of the Navy. But whatever appointing power makes the appointment, we shall have in effect, by this proposed law, taken that power away by saying that these offices shall be filled from a list made up by a board, that board to make just as many suggestions as there are vacancies to be filled; in other words, there will not be any discretion left with the appointing power.

I am not objecting to the provision; but it seems to me, to avoid difficulty, we ought to leave some discretion with whatever appointing power we provide shall make the appointments.

Mr. WORKS. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. WORKS. Does not the Senator think that Congress may fix the qualifications of officers?

Mr. NORRIS. I think so.

Mr. WORKS. And that the President shall not appoint them unless they possess those qualifications?

Mr. NORRIS. I think so.

Mr. WORKS. How is that different from the provision that they shall be recommended by some body designated by Congress? One is as much of a limitation of his power as is the other.

Mr. NORRIS. The difference, as I see it, is that we provide for an office and then provide for a man who shall be qualified to fill it, his qualifications being fixed by a certain board. Then we provide that the President in this case—I presume we could just as well say the Secretary of the Navy—shall appoint that person to that place; in other words, we compel the appointing power to appoint a certain man to a certain position. My own idea is that that goes to the extreme. Of course, the other extreme would be to give him the latitude to appoint anybody without any qualifications and without recommendations from anyone; but there is a ground between the two, I should think, where a board might select a list or where we might provide by law for certain qualifications to be possessed by an official. I have no doubt that we have the perfect constitutional right to do that, but it still leaves the appointing power a discretion. In the one case it takes it away, and that takes away in reality the appointing power prescribed by the Constitution.

Mr. OLIVER. Mr. President, it seems to me that this provision is simply a modification of the rule which has prevailed in the Navy and in the Army for many years. To-day in all ranks of the Navy an officer is entitled to promotion by seniority, but he is not actually promoted until the President sends his name to the Senate and he is confirmed and receives his commission. This provision simply means that, instead of the officer being entitled to promotion by seniority, there shall be a certain method of selection of the higher ranks of the Navy. If the contention of the Senator from Nebraska is correct, then, with regard to both military and naval appointments to-day, the law is all wrong, and the President has the right to take any junior lieutenant in the Navy and make him a rear admiral, provided the Senate will confirm the appointment.

I do not think, unless you give the President the absolute discretion to promote every officer in the Navy as he sees fit, that you can place any other limitation upon the appointment than the one which is placed here in this proposed amendment.

Mr. NORRIS. Mr. President, the discussion of the question is somewhat academic. I am not opposing the provision or professing my ability to amend it. I merely suggested that it seemed to me that it would be wise to at least provide a larger list from which appointments could be made than the number of appointments that must be made. That would permit the appointing power to have some discretion.

The example given by the Senator from Pennsylvania [Mr. OLIVER] would be true if there were no law on the subject. I am not contending that Congress can not prescribe qualifications for officers, can not provide that a man to whom a certain office is to be given must have been in the junior grade a certain length of time, or something of that kind. I only suggested that there might be a question of constitutionality involved in it.

Since I took my seat a few moments ago I have been handed a copy of the Constitution, and I wish to read the provision which I had in mind, and which I then attempted to quote. It is found in paragraph 2, section 2, of Article II of the Constitution. Perhaps I had better read the entire paragraph. The language is:

> He—
>
> Referring to the President—
>
> He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and, by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court—
>
> Now, this is the language that has particular bearing—
>
> and all other officers of the United States whose appointments are not herein otherwise provided for—
>
> That is, who are not otherwise provided for in the Constitution—
>
> and which shall be established by law.

If the Constitution ended there, we could not provide that the Secretary of the Navy should make any of these appointments. The President, thus far in the constitutional provision which I have read, is given authority to appoint all the officers named by title, and "all other officers of the United States whose appointments are not otherwise provided for" in the Constitution of the United States. If the Constitution went no further, we could not by law provide for any other method of appointment; but now let me read a little further:

> But the Congress may by law vest the appointment of such inferior officers as they think proper, in the President alone—

That would be without confirmation. Second:

> in the courts of law—
>
> Third:
>
> or in the heads of departments.

The point I am making here is that Congress, under that provision of the Constitution, if it provides for an office and in the same law provides a man who shall fill it, has taken away from

the appointing power, from the President or the head of a department, if it be an inferior officer, the right to make any selection; and that takes away from him a constitutional prerogative that he possesses by virtue of the Constitution.

I mention this matter here, not because I am opposed to this provision, but because that provision of the Constitution has an important bearing upon a great many offices which are provided for by law and which are sought by law to be controlled through the operation of the Civil Service Commission. I do not know just how far the appointment of these inferior officers, such as Congress thinks to be inferior, might extend, and I do not believe the courts have decided that question; but as to such officers as Congress should think were inferior, the appointment could be delegated to the heads of departments; that would be to members of the Cabinet; second, to the courts of law; and, third, the power could be given to the President to appoint them if it were so desired without retaining in the Senate the right to pass on the appointment in the way of confirmation after it was made. So in the enforcement of the civil-service law, the Civil Service Commission is considerably handicapped because we provide that they shall make a list. I think it has always been held that the President can disregard the list if he wishes to do so, although, in my judgment, if we provided by law that these inferior officers should be appointed by the heads of departments, and then provided by law what their qualifications should be, and if we further provided by law for the Civil Service Commission or other board to make a list from which the appointments should be made, it would be perfectly constitutional, and the appointing power could not go outside of the list. In this case, if we provided a list that permitted some discretion to be exercised by the appointing power, in my judgment it would not be subject to any constitutional inhibition.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

The VICE PRESIDENT. The next amendment passed over will be stated.

The SECRETARY. The next amendment passed over was that in relation to the building program, on page 167, under the head of "Increase of the Navy."

Mr. SWANSON. Mr. President, I have an amendment which I desire to offer.

Mr. GALLINGER. Mr. President, would the Senator from Virginia, before taking up this debatable question, permit me to submit a small amendment, which I think will not be objected to?

Mr. SWANSON. I shall yield to the Senator for that purpose in a moment; but, first, I should like to dispose of the amendment which I have sent to the desk. I think it will provoke no great amount of debate.

Mr. GALLINGER. Very well.

The VICE PRESIDENT. The amendment proposed by the Senator from Virginia will be stated.

The SECRETARY. On page 174, at the end of line 21, it is proposed to insert the following:

Provided, That if, in the judgment of the Secretary of the Navy, the most rapid and economical construction of the battle cruisers authorized herein can be obtained thereby, he may contract for the construction of any or all of them upon the basis of actual cost, plus a reasonable profit, to be determined by him.

Mr. SWANSON. Mr. President, I should like to have the letter of the Secretary of the Navy read in connection with that amendment.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

NAVY DEPARTMENT,
Washington, July 7, 1916.

MY DEAR SENATOR: In connection with the new program, the question has arisen as to the practicability of building the contemplated battle cruisers by contract under the form of contract hitherto customary.

These vessels will be larger than any other vessels of war now extant or under construction, so far as the department is aware, and will also largely surpass any vessels of their class in speed and power. As you know, they will cost a great deal of money in any case, and in view of the novelty of their type with us, and the enormous power, speed, and size required, it might be found that the builders in this country undertaking their construction under the usual form of contract would cover themselves by unusually high bids, particularly in view of the present state of the shipbuilding market.

In order to make certain that the department may promptly undertake the construction of these vessels, it is believed that it would be wise to incorporate in the pending bill some such proviso as the following:

"*Provided*, That if, in the judgment of the Secretary of the Navy, the most rapid and economical construction of the battle cruisers authorized herein can be obtained thereby, he may contract for the construction of any or all of them upon the basis of actual cost, plus a reasonable profit to be determined by him."

A suitable place for the insertion of this proviso would seem to be page 174, line 21, of the bill as reported to the Senate.

Sincerely, yours,

JOSEPHUS DANIELS.

Hon. B. R. TILLMAN, United States Senator,
Chairman Committee on Naval Affairs,
United States Senate.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Virginia.

The amendment was agreed to.

Mr. GALLINGER. Mr. President, on page 140, under the head of "Improvement of construction plants: For repairs and improvement of machinery and implements," and so forth, the appropriation for the navy yard at Boston is $25,000; for the navy yard at New York, $35,000; for the navy yard at Philadelphia, $25,000; for the navy yard at Norfolk, Va., $35,000; for the navy yard at Mare Island, Cal., $35,000; and for the navy yard at Puget Sound, Wash., $25,000; while for the navy yards at Charleston, S. C., and Portsmouth, N. H., the appropriation is but $10,000.

The committee, I think, acted wisely when they increased the appropriation for the Charleston Navy Yard to $25,000; and I wish to move, Mr. President, that the appropriation, in line 8, on page 140, for the Portsmouth (N. H.) Navy Yard be increased from $10,000 to $25,000, and to let the matter go to conference.

Mr. SWANSON. I accept the amendment, and we shall let it go to conference.

The VICE PRESIDENT. The amendment proposed by the Senator from New Hampshire will be stated.

The SECRETARY. On page 140, line 8, after the name "New Hampshire," it is proposed to strike out "$10,000" and to insert "$25,000," so as to make the clause read:

Improvement of construction plants: For repairs and improvement of machinery and implements at plant at navy yard, Portsmouth, N. H., $25,000.

The amendment was agreed to.

Mr. SWANSON. I have another amendment which I desire to offer.

Mr. NORRIS. Mr. President, may I make an inquiry of the Senator from Virginia? I was under the impression that the debate on the amendments which have been considered to-day would last longer, and I think other Senators were under the same impression. There are quite a number of Senators who desire to speak, all of them briefly, I think, on the question of the increase of the Navy. Would the Senator have any objection to permitting that amendment to go over until Monday?

Mr. SWANSON. Possibly we might have some discussion of it this afternoon, but I have no idea that we will be able to dispose of it so as to have a final vote to-day.

Mr. NORRIS. I will have no objection, I will say to the Senator, to modifying the procedure and letting individual amendments come in. I am not anxious to have the Senate adjourn, but there are quite a number of Senators who are interested in the building program, and they expected that it would go over until Monday, and I think some of them are not here because of that impression. I understand they would like to hear the debate, and I want to say to the Senator that there will be, so far as I know—and I think I know—no effort whatever to prolong the discussion. There will be no lengthy speeches, so far as I know, and there will be no attempt to delay a vote.

Mr. SWANSON. I will say to the Senator that my purpose is to let that amendment go over and give an opportunity for individual amendments to be offered before it is disposed of. I think that would be the better course.

Mr. NORRIS. It would be agreeable to me to have the Senator do that.

Mr. SWANSON. There may be some Senator who would be willing to speak on the building program this afternoon, and consequently I should not like to have it go over entirely.

Mr. NORRIS. Would it be agreable to the Senator now to have it understood that that amendment will go over until Monday?

Mr. SWANSON. It will not be pressed for a vote this afternoon.

Mr. WORKS. Mr. President, I should be glad to take up some of the time this afternoon by offering some amendments, if this is the appropriate time to do so.

Mr. SWANSON. Opportunity will be given the Senator to offer any amendment he desires as soon as we get through with the committee amendments.

Mr. WORKS. I was inquiring particularly to learn whether the committee amendments had finally been disposed of.

Mr. SWANSON. No; there are a few more.

Mr. WORKS. Very well.

Mr. SWANSON. I offer the amendment which I send to the desk, to come in on page 153, at the end of line 11.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 153, at the end of line 11, it is proposed to insert the following:

Provided, That hereafter vacancies in the grade of second lieutenant shall be filled as follows: First, as far as practicable, from graduates of the Naval Academy each year upon completing the prescribed course at the Naval Academy; second, from meritorious noncommissioned officers of the Marine Corps; third, from meritorious petty officers of the Navy; fourth, from civil life: *Provided further*, That the ages of appointees from petty officers of the Navy shall be the same as now provided or may be hereafter provided for noncommissioned officers of the Marine Corps.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. Also, on page 153, line 19, after the word "Corps," insert a comma and the words "from petty officers of the Navy."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SWANSON. There was an amendment passed over in connection with the purchase of land for the gun factory at the Washington Navy Yard. The amendment went over at the request of the Senator from Colorado [Mr. THOMAS], of the Senator from Utah [Mr. SMOOT], and myself. I have asked the Navy Department to give me a full and explicit account of all the appropriations which have been made, of the law governing the matter, and of present conditions. I am satisfied that the amendment reported by the committee should be agreed to, provided the amendment to it which has been sent in by the Secretary, and which I offer at this time, is added to it.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 30, line 3, of the committee amendment, beginning with the words "Secretary of the Navy," it is proposed to strike out all down to and including the word "available," in line 4, page 31, and to insert the following:

The Secretary of the Navy is hereby authorized to enter into an agreement or agreements with such railroad company or companies as he may deem proper for the purpose of establishing, maintaining, and operating a sufficient and satisfactory track connection or connections with the railroad track system of the Washington Navy Yard as said system is now or may be hereafter established: *Provided*, That so much of said track connection or connections as can not be constructed over any right of way or property now or hereafter owned or occupied by such railroad company or companies shall be constructed wholly upon a suitable and satisfactory right of way to be provided by the United States, the title to which at all times remain in the United States: *Provided further*, That so far as may be consistent with the public interests said track connection or connections, with appurtenant turnouts and sidings, may be located and constructed in, upon, over, and through public grounds, space, and streets of the United States as the same are now or may be hereafter ascertained and established: *Provided further*, That the Secretary of the Navy is hereby authorized to acquire any part of the land or property necessary for said right of way by purchase or condemnation, and to secure the construction of the connections, sidetracks, turnouts, switches, etc., necessary to the proper operation of the yard system in connection with the said track connection or connections, and for the purpose of acquiring said right of way such part of the sums herein appropriated for additions to said navy yard as may be necessary are hereby made available: *Provided further*, That authority is hereby granted to the railroad company and its successors and assigns entering into the agreement aforesaid to construct, maintain, and operate a bridge and approaches thereto for such track connection across the Anacostia River, D. C., at a point suitable to the interests of navigation to an available point within or in the vicinity of the said navy yard, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. THOMAS. Mr. President, I ask the Senator having charge of the bill to insert in the RECORD the correspondence with the Secretary of the Navy which accompanies the proposed amendment.

Mr. SWANSON. I am going to request that that be done.

The VICE PRESIDENT. The question now is on agreeing to the amendment as amended.

The amendment as amended was agreed to.

Mr. SWANSON. I now ask that the communication from the Secretary of the Navy be incorporated in the RECORD at this point.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

NAVY DEPARTMENT,
Washington, July 14, 1916.

MY DEAR SENATOR SWANSON: Referring to my letter of July 10, 1916, relative to the proposed amendment to the Navy bill authorizing the purchase of additional land at the Washington Navy Yard and the entering into of negotiations for a railroad track connection to this yard, I have the honor to transmit herewith for your further information a memorandum, in triplicate, of the solicitor in regard to this matter.

This memorandum sets forth in detail the views of the department in regard to the need for additional land at this yard, and also shows the present situation in respect to the need for a permanent arrangement for a track connection to this yard.

Sincerely, yours,

JOSEPHUS DANIELS, *Secretary.*

Hon. CLAUDE A. SWANSON,
United States Senate.

NAVY DEPARTMENT,
OFFICE OF THE SOLICITOR,
July 14, 1916.

[Memorandum—Repurchase of additional land at Navy Yard and authority of Secretary of Navy to enter into agreement for establishing track connection.]

APPROPRIATIONS.

The appropriation referred to in the Senate amendment, at page 29 of the naval bill, H. R. 15947, print dated June 30, 1916, found in the act of March 3, 1907 (34 Stat., 1187), for a railroad bridge and track at the Washington Navy Yard, carried $40,000. Of this amount $34,000, in round numbers, is still available. The other appropriation referred to in the amendment in question, found in the act of June 24, 1910 (36 Stat., 615), carried $136,000 for improving railway facilities at the yard. Of this amount $135,000, in round numbers, remains available. This makes the total amount reappropriated and made available for the purchase of additional land $169,000, in round numbers, which added to the $331,000 proposed in the Senate amendment will make a total appropriation of $500,000 for the purposes recited in the amendment.

TRACK CONNECTION.

The present track connection at the Washington Navy Yard extends from a point on the old Baltimore and Potomac tracks, at Fifth and K Streets southeast, across Government reservations 15 and 16, across L Street, then south on Sixth Street, crossing M and entering the navy yard at the intersection of Sixth and M Streets. So much of this connection as extended from Fifth and K Streets to the Washington Navy Yard was paid for by the Government, under the provisions of the act of March 2, 1889 (25 Stat., 813), for which purpose $15,000 was appropriated. These tracks are located on grade and have been a constant source of objections made by the citizens in the vicinity.

By the acts of February 12, 1901 (31 Stat., 767), and February 28, 1903 (32 Stat., 909), certain railroad tracks in the District, including the present railroad track connection to the navy yard, were required to be removed not later than April 28, 1908. Some time prior to April 28, 1908, the Pennsylvania Co. advised the department that it proposed immediately after that date to begin tearing up the railroad track connection to the navy yard. Injunction proceedings were thereupon instituted on the part of the Government to restrain the company from removing this track, and the temporary injunction was issued by the court.

By the act of May 27, 1908 (35 Stat., 397), the Philadelphia, Baltimore & Washington Railroad Co. was authorized and directed to construct a single-track connection to the navy yard. This act likewise authorized the retention of the present track connection for two years from the date thereof. The railroad company, however, declined to construct this branch track, and there appeared to be no means whereby the Government could compel the construction thereof.

The act of June 24, 1910 (36 Stat., 615), authorized the Secretary of the Navy to enter into an agreement with the railroad company for a track connection to the navy yard along the shore of the Anacostia River and entering the navy yard on the eastern side. Under this act the United States was to furnish the railroad company a right of way from the main Pennsylvania tracks in the vicinity of L and Water Streets southeast, along the water front, down to the navy yard, and the railroad company was to expend in constructing the tracks on this Government right of way not to exceed $92,500. The department carried on extensive negotiations with the railroad company looking to the execution of the agreement contemplated, but was not successful in having an agreement executed. While the Government claimed title to practically all of the land along the water front that was needed for the right of way, there were a number of adverse claims to this property, and the railroad company declined to enter into an agreement until a right of way free of adverse claims could be provided by the Government. Under the provisions of the act the Government could not expend any money in acquiring land in private ownership until the agreement was executed, while the railroad company refused to execute the agreement until the Government was in a position to turn over a right of way free of any adverse claims of title.

In this situation the act of April 27, 1912 (37 Stat., 93), was passed, authorizing the Attorney General to institute suit to determine the title to certain lands claimed by the United States in the District of Columbia, including lands within, under, and adjacent to the Eastern Branch of the Potomac River. Under this act suit was filed by the United States under date of July 3, 1912 (U. S. *v.* Thomas W. Smith et al., in the Supreme Court of the District of Columbia, No. 31138, in equity), to determine the title to certain lands forming part of the proposed right of way. The lands involved in this suit constitute all the land to the channelward of the original high-water line in square 955 and in square 979, lying to the eastward of the navy yard. This suit is still pending, and it will undoubtedly be several years before final action may be had, particularly should appeal be taken by either party.

Under the provisions of the act of June 24, 1910, the retention of the present railroad-track connection is authorized until the new track connection therein provided for has been completed.

While the act of June 24, 1910, contemplated an expenditure by the railroad company in establishing a track connection of not to exceed $92,500, there was no means whereby the Government could force the railroad company to enter into an agreement under which they would expend that much money for the purpose contemplated, and it may well be that the real reason back of the objections made by the company to entering into the agreement in question was the fact that they

did not care to make an expenditure in this amount, particularly so as under the provisions of the act the present connection, that was paid for by the Government, was to remain until the new connection was completed. The railroad company accordingly, in the present situation, has all the yard business without incurring any additional expense in furnishing the track connection.

In case the amendment as it appears in the bill should be enacted, the Secretary would then have the right to negotiate with either the railroad company having the present track connection at the navy yard or with some other company with which it may be practicable to establish a connection in an entirely different place. So far as the requirement for the railroad company to expend the money in establishing the connection over Government right of way is concerned, it is believed that the broader powers conferred in the amendment will place the Secretary in a better position to secure the construction work by the railroad company than if the act attempted to require the railroad company to spend a specified amount, particularly so as it is doubtful whether under the circumstances there would be any legal steps that the Government could take to require an expenditure of this character on the part of the railroad company.

It is suggested that the amendment recommended in the department's letter of July 10, 1916, might be modified to read as follows:

"The Secretary of the Navy is hereby authorized to enter into an agreement or agreements with such railroad company or companies as he may deem proper for the purpose of establishing, maintaining, and operating a sufficient and satisfactory track connection or connections with the railroad-track system of the Washington Navy Yard as said system is now or may be hereafter established: *Provided*, That so much of said track connection or connections as can not be constructed over any right of way or property now or hereafter owner or occupied by such railroad company or companies shall be constructed wholly upon a suitable and satisfactory right of way to be provided by the United States, the title to which shall at all times remain in the United States: *Provided further*, That so far as may be consistent with the public interests said track connection or connections, with appurtenant turnouts and sidings, may be located and constructed in, upon, over, and through public grounds, space, and streets of the United States as the same are now or may be hereafter ascertained and established: *Provided further*, That the Secretary of the Navy is hereby authorized to acquire any part of the land or property necessary for said right of way by purchase or condemnation and to secure the construction of the connections, sidetracks, turnouts, switches, etc., necessary to the proper operation of the yard system in connection with the said track connection or connections, and for the purpose of acquiring said right of way such part of the sums herein appropriated for additions to said navy yard as may be necessary are hereby made available: *Provided further*, That authority is hereby granted to the railroad company and its successors and assigns, entering into the agreement aforesaid, to construct, maintain, and operate a bridge and approaches thereto for such track connection across the Anacostia River, D. C., at a point suitable to the interests of navigation to an available point within or in the vicinity of the said navy yard in accordance with the provisions of the act entitled 'An act to regulate the construction of bridges over navigable waters,' approved March 23, 1906."

The amendment, if modified as suggested, would, it is believed, authorize the Secretary of the Navy, if he saw fit, to enter into negotiations to provide means whereby more than one railroad company could share in the business of the navy yard, which condition would probably result in a keener competition for the Government's business and might also have the effect of reducing freight charges.

If the proposed amendment is enacted, the department contemplates providing a railroad connection at the navy yard from a point at or near New Jersey Avenue down the canal reservation in Second Street SE., entering the yard on the west side in the property that is proposed to be acquired as an addition thereto. This connection would be brought down so as to eliminate crossing the intervening streets on grade, and would also furnish a direct track connection for the District pumping plant at the foot of Second Street SE.

NEED FOR ADDITIONAL LAND.

The department proposes to acquire as an addition to the yard all of the land on the west side lying south of the south line of M Street and east of the east line of Second Street. This tract embraces squares 770, 771, 801, and 802, and the property south of Potomac Avenue to the water front, the title to which is now claimed to be in the United States. On the east side of the yard it is proposed to acquire the privately owned lands in squares 955 and 979. The total area proposed to be acquired on the west side, including streets and alleys and land already in Government ownership, amounts to about 810,000 square feet, while the total area on the east side proposed to be acquired, including streets and alleys and land already in Government ownership, comprises about 270,000 square feet, making a total area of about 1,000,000 square feet.

With respect to the necessity of acquiring additional land, the commandant of the Washington Navy Yard says that:

"At this time the necessity of gun-shop extension for heavy ordnance became so urgent that various plans were suggested to relieve the congestion and at the same time allow for future development. All suggestions that contemplated extensions to the present shops within the yard limits means the destruction of existing buildings and the paralysis of the present output for a year or more. With this in view, it was deemed good policy, in connection with the western railroad extension, to acquire land to the west and erect a gun shop that would facilitate the construction of the most advanced types of ordnance. The eastern area is not desirable for heavy ordnance shops, owing to the distance from the central power plant and the nature of the substrata, but is particularly desirable because of its water frontage. It is believed that the navy yard should control, and will in the near future require, water front from the District pumping plant at Second Street to the Anacostia Bridge at Eleventh Street SE. The western land is most desirable for heavy ordnance shops, due to the nature of the substratum, proximity to the central power plant, water front area, and railroad facilities, all harmonizing with the development plans now under consideration."

The naval bill, as now before the Senate, provides for an additional gun shop at the Washington Navy Yard to cost not exceeding $600,000. It is proposed that this additional gun shop be located on the area to be acquired on the western side of the yard. The yard authorities say that within two years the entire capacity of the present gun shop will be required for relining guns now in service and a new gun shop is urgently needed for new construction work. To locate this new shop within the present limits of the yard would necessitate extensive rearrangements of present facilities and the tearing down of valuable shops already in existence and their replacement which would add seriously to the already congested condition of the yard and for some time materially interfere with the output. In addition, the present storage facilities at the yard are already inadequate. The additional area to the west would also place the power plant in the center of industrial activities, thus reducing the amount of copper cable necessary and the loss in potential due to distance. The substratum of the western area is a hard type of clay that will support ordinary building construction without piling, reducing the cost thereof from 10 to 15 per cent in case piling were necessary. This western area would also provide excellent facilities for future expansion of the yard, and it is believed that if the land is not acquired at the present time it will be eventually necessary for the Government to acquire it at probably a materially increased cost than at which it could be acquired at the present time.

GRAHAM EGERTON.

Mr. SWANSON. The Senator from Utah [Mr. SMOOT] had an amendment which he desired to offer to the amendment, which has been agreed to, the effect of his amendment being, as I understand, to give the privilege to all railroads of using the tracks when constructed. The Senator from Utah is not present now, but I have sent for him, and if he desires to offer such an amendment I will ask that the matter be reopened.

Mr. TOWNSEND. Mr. President, I should like to call the attention of the Senator in charge of the bill to an amendment which I should like to propose, for his consideration and the consideration of the conferees, in connection with the amendment which he has offered and which has been agreed to on page 153 of the bill. I refer to the part of the bill from line 12 to line 17, inclusive, relating to the age of second lieutenants who may be commissioned in the Marine Corps from civil life. The fact is that there are several young men formerly in the service who are just above the specified age for appointment. The department would like to have the services of those young men. They resigned before the recent demand for additional officers arose. They would like to be restored. They had a higher rank than that of second lieutenant, but would be very glad to reenter the service in that grade. Therefore I should like to ask the Senator if he will not accept an amendment on page 153, after the word "*Provided*," in line 18, inserting the words, "That the Secretary of the Navy, in his discretion, may waive the age limit in favor of officers who have already had service in the Marine Corps: *Provided further*."

Mr. SWANSON. I will accept that amendment for the consideration of the conferees.

The VICE PRESIDENT. The Chair will ask the Senator from Michigan to send the amendment to the desk.

Mr. TOWNSEND. Very well.

The VICE PRESIDENT. The Secretary will state the amendment.

The SECRETARY. On page 153, line 18, after the word "*Provided*," insert:

That the Secretary of the Navy, in his discretion, may waive the age limit in favor of officers who have already had service in the Marine Corps: *Provided further*.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. WEEKS. Mr. President, I move to reconsider the vote by which the Senate adopted the amendment on page 175, commencing with line 9 and ending with line 17, relating to the fitting out of navy yards for the construction of vessels. I think I ought to say to the Senate that if the motion to reconsider carries I shall move to strike out the paragraph from the bill.

Mr. SWANSON. I suggest to the Senator that he make his speech on the motion to reconsider in order to conserve time.

Mr. WEEKS. I am not especially anxious to make a speech.

Mr. SWANSON. I expect to move to lay the motion to reconsider on the table, and that is the reason I made the suggestion to the Senator.

Before the Senator from Massachusets proceeds, however, the Senator from Utah [Mr. SMOOT] was out of the Chamber when the amendment in connection with the purchase of land for the Washington Navy Yard was considered. The Senator is now in the Chamber. I said at the time that if the Senator desired to offer an amendment I would ask that the matter be reopened. I understand the Senator desires to offer an amendment providing that all railroads may have the privilege of using the tracks.

Mr. SMOOT. That they shall all have the use of the tracks.

Mr. SWANSON. I suggest that the Senator from Utah look over the amendment adopted by the Senate a few minutes ago, so that he may prepare an amendment, to be inserted at the proper point. If he desires to offer such an amendment, I will be very glad to accept it, as provisions of that kind are usually included in all such matters affecting the city of Washington.

Mr. WEEKS. Mr. President, yesterday afternoon I submitted some comments on the cost of the maintenance of our Naval Establishment as applied to navy yards, naval stations, maga-

zines, and other similar plants. I tried to demonstrate briefly that in my judgment we have too many navy yards, and that the cost of their maintenance is altogether out of proportion to the results obtained in the construction and repair work which is carried on there. I think I demonstrated that substantially 50 per cent of the money that is actually spent in repair work and other work at the navy yards is spent in the maintenance of plants, the construction of additional buildings and additional docks, and the keeping in repair of these buildings and other appurtenances connected therewith. I followed that through a course of years, and, I think, demonstrated the fact that that is not peculiar to any one year, but that it obtains as a general course in connection with our naval appropriations.

In this particular bill the appropriation for public works is $10,335,715.70. In addition to that we appropriated this morning $450,000 for the repair or rebuilding of a plant at Pensacola, destroyed by a hurricane. That does not include the purchase of the land provided for in the last amendment considered by the Senate. It does not include a projectile plant, for which there is appropriated this year $705,000, the total appropriation for the plant, the balance to be appropriated next year, to be $1,411,000. It does not include an armor-building plant, to cost $11,000,000, so far as this appropriation is concerned, but many more millions before it is completed, in my judgment. It does not include three and a half million dollars provided for the construction of buildings and docks at the Philadelphia yard. It does not include four and a half million dollars provided in this bill for docks and buildings at the Norfolk yard. It does not include about $300,000 for the navy yard at Charleston, S. C. It does not include the million and a half dollars which we have just appropriated for the construction of an experimental laboratory.

What I want to point out, Mr. President, is that in my judgment the equipping of the navy yards, as proposed in this amendment for the construction of vessels, and especially for the construction of capital ships, is bad public policy from the standpoint of economy in the construction of ships, because I think it can be demonstrated that it costs from 10 to 20 per cent more at a navy yard than it does at a private yard. But the minute we do equip these yards for that purpose the contention is going to be made that the equipment should be used, and it will be impossible in an ordinary year to use all of the equipment for construction purposes at seven or eight or nine navy yards, as is proposed in this bill. Not every Senator knows that if he has in the territory which he represents a navy yard equipped to build a ship, and Congress appropriates money for that purpose, there will be the greatest pressure brought to bear on him to have that ship built at that navy yard, whether it can be built there as cheaply as at some other point or not, and it is going to have an influence on naval appropriations in the future which we can not estimate at this time.

I admit that if it only meant $6,000,000 for equipment as provided in this bill it would not be so bad, but it will mean the keeping in operation of that equipment, maintaining it from year to year, and a very large increase in similar appropriations which are sure to follow. I think, as I said yesterday, that it is the most indefensible—in fact, I think it is perhaps the one indefensible thing in this bill, from my standpoint. I am opposed to it not only because of its cost to-day, but for the effect it will have on the future, and I am opposed to it because it is going to mean that every ship we construct for naval purposes in the future is going to cost from 10 to 20 per cent more than it would cost if constructed at other places and in other ways.

Mr. KENYON. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Iowa?

Mr. WEEKS. I yield to the Senator.

Mr. KENYON. I think the Senator stated yesterday the number of navy yards we have in this country.

Mr. WEEKS. Yes; 26 or 27 navy yards, naval stations, and similar plants.

Mr. NELSON. How many of them can build capital ships?

Mr. KENYON. That is the question I was going to ask.

Mr. WEEKS. They can build capital ships in two yards now, and we propose to add three to that number, and in addition to that to build other vessels at four other yards, so that we would be able to build capital ships at five yards and ships of some class at nine yards altogether.

Mr. KENYON. I should like to ask the Senator further how many navy yards, in his judgment, are essential to adequately take care of the purposes of any naval situation we might have in this country?

Mr. WEEKS. I think, Mr. President, that that is a matter for discussion. There will be a difference of opinion about it; but if we were commencing a new Naval Establishment and had nothing with which to commence operations, I doubt if we would have half as many yards as we have, and perhaps not more than one-third as many. We have a Navy about two-fifths or perhaps one-third the size of that of Great Britain and we have more than twice as many yards as Great Britain.

Mr. KENYON. I should like to ask the Senator further as to why that is. Why do we have so many more navy yards than we need?

Mr. WEEKS. They have been established from time to time, sometimes as a result of local pressure; but as soon as a yard is established, even for minor purposes, there is always a pressure to add to the equipment of that yard to fit it for work which can be done at some neighboring yard. That is inevitable in our political establishment.

Mr. GALLINGER. Mr. President——

Mr. WEEKS. I yield to the Senator from New Hampshire.

Mr. GALLINGER. If I correctly understood the Senator from Massachusetts, he says we have 26 navy yards and naval stations.

Mr. WEEKS. Yes.

Mr. GALLINGER. What is covered by the term "naval stations"?

Mr. WEEKS. That term would apply to the Indianhead Proving Grounds and it would apply to the New London Naval Station, and so forth.

Mr. GALLINGER. Yes; but, as a matter of fact, they have no relation to a navy yard proper.

Mr. WEEKS. Well, yes; to some degree. It depends on what is being done there. Take Port Royal. That would be a naval station. There are buildings and equipment there, and there is an appropriation in this bill for their maintenance. There is a naval station at Cavite. There is no navy yard at Pearl Harbor at this time, but that will be a navy yard ultimately, if it is not to-day; and, as the Senator knows, large amounts of money are being spent there.

Mr. GALLINGER. Now, I want to ask the Senator whether or not it is a fact that in the navy yards proper there has been, as a rule, an abundance of work for them all?

Mr. WEEKS. Why, no. I can say distinctly, no. For instance, only two or three years ago the only work done at the New Orleans Navy Yard, where we spend $500,000 for maintenance for the year, was the repairing of the boiler of a steam launch for the Louisiana Naval Militia.

Mr. GALLINGER. That navy yard has been pretty well taken care of since then.

Mr. WEEKS. Oh, it is provided in this bill that we shall provide ways, so that ships can be built there.

Mr. GALLINGER. I apprehend they are doing much more work now. I have not looked it up. The Senator states that we have twice as many navy yards as Great Britain.

Mr. WEEKS. Yes; we have.

Mr. GALLINGER. Does the Senator include the naval stations, and call them navy yards?

Mr. WEEKS. No; I do not.

Mr. GALLINGER. What yards does the Senator include?

Mr. WEEKS. I include Portsmouth, Boston, New York, Philadelphia, Norfolk, Charleston, Pensacola, Guantanamo, Mare Island, Bremerton, and probably Cavite. I may not be accurate about it, but that is substantially the list.

Mr. GALLINGER. I will ask the Senator how much of a navy yard there is at Pensacola?

Mr. WEEKS. We have just appropriated $450,000 for the rebuilding of some buildings there that were destroyed by a hurricane recently.

Mr. GALLINGER. Yes.

Mr. WEEKS. We have enough of a navy yard there to require the expenditure of that amount of money at that point, as provided in this bill.

Mr. GALLINGER. But that amount would not go very far toward establishing a navy yard.

Mr. WEEKS. Oh, no. I will say to the Senator, however, that there is a very large plant at Pensacola—a large area, sufficient for an aviation field, and a great many buildings, though they are probably not suitable for up-to-date naval construction.

Mr. GALLINGER. Now, Mr. President, I will venture to ask the Senator if, from his personal knowledge, he is warranted in saying that we have twice as many navy yards as Great Britain?

Mr. WEEKS. I think I am.

Mr. GALLINGER. Have I not correctly read that Great Britain has twice or three times as many dry docks as we have?

Mr. WEEKS. Oh, I am not talking about dry docks.

Mr. GALLINGER. I am.

Mr. WEEKS. If the Senator limits himself to the number of dry docks, I am perfectly in agreement with him, that we should have more dry docks.

Mr. GALLINGER. As a separate matter of construction?

Mr. WEEKS. Oh, no; dry docks at the navy yards that are already established.

Mr. GALLINGER. Where does Great Britain place her dry docks?

Mr. WEEKS. She places them in her navy yards.

Mr. GALLINGER. That is, she has three or four, for instance, in one navy yard?

Mr. WEEKS. Oh, yes.

Mr. GALLINGER. Of course that answers my question.

Mr. President, I had not the privilege of listening to what the Senator from Massachusetts said yesterday about our superfluity of navy yards in this country. It is a subject that I have listened to several times before, and I know the attitude that a Secretary of the Navy from Massachusetts took on that subject. Recently I read a most remarkable pronouncement from him, in which he called attention to the Portsmouth Navy Yard as being not only superfluous but an abomination. Notwithstanding these denunciations or these criticisms, I do not think we are going to abolish any of our well-established navy yards.

Mr. WEEKS. I do not think we are. I am not at all optimistic about it. I am confident that every Senator in whose State there is a navy yard will do just what the Senator from New Hampshire is doing—rise in his place and protest against anything being done to injure the navy yard which he has under his special jurisdiction.

Mr. GALLINGER. The navy yard that I represent, as the Senator suggests, is in the State of Maine; but we have an interest in it in New Hampshire, and we are very proud of it. We are proud of the quality of our mechanics there and of the work that we are turning out. While, if there is any well-considered plan whereby the navy yards shall be reduced, we will take our chances with the rest, yet we do not want our navy yard abolished by newspaper articles or magazine contributions or speeches in the Senate. We are not going to have it abolished in that way.

Mr. WEEKS. Mr. President, I have made no motion to abolish navy yards. My motion is to prevent an appropriation being made which, I think, will add greatly to the cost of maintenance and the carrying on of our naval operations without any commensurate return.

Mr. GALLINGER. I am not going to argue that question with the Senator. Possibly the proposed appropriation is an extravagant or unnecessary appropriation. I have not looked into it. But the committee, in their wisdom, seemed to think it was wise, and I am quite inclined to follow the committees in this body unless I am persuaded that they are absolutely wrong in their conclusions.

Mr. CURTIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. I yield to the Senator.

Mr. CURTIS. Did I understand the Senator to say that there was a navy yard established, or to be established, at Pearl Harbor?

Mr. WEEKS. I think so.

Mr. CURTIS. Has there been any appropriation for it?

Mr. WEEKS. There is an appropriation in this bill of $700,000 for dock construction.

Mr. CURTIS. Has that harbor been placed in condition yet so that large vessels can be handled there?

Mr. WEEKS. I do not know that that has been done, but we have a rear admiral in command of the naval station at Pearl Harbor at this time, and we have had for the last three or four years.

Mr. CURTIS. I was in Pearl Harbor a few years ago, and the larger vessels could not be handled in the harbor at that time.

Mr. WEEKS. The docking facilities are being constructed at this time.

Mr. SMOOT. They are dredging there now for the larger vessels.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

Mr. WEEKS. Yes; I yield to the Senator from Oregon.

Mr. CHAMBERLAIN. May I ask the Senator at how many of the navy yards that are now established capital ships can be constructed?

Mr. WEEKS. Two.

Mr. CHAMBERLAIN. What are they?

Mr. WEEKS. New York and Mare Island.

Mr. CHAMBERLAIN. Those are the only two?

Mr. WEEKS. Those are the only two.

Mr. CHAMBERLAIN. Does the Senator understand, from this provision, that it is intended that the yards that are provided for are to be so remodeled and reconstructed that capital ships can be built at them?

Mr. WEEKS. At three of them; and at four additional yards ships other than capital ships can be constructed.

Mr. LODGE. There are to be four for capital ships.

Mr. CHAMBERLAIN. How does the Senator construe the section on page 43 of the bill which provides for an investigation and report as to the construction of a navy yard on the Pacific coast, while another provision of the bill provides for the construction of a capital yard on the Pacific coast? Are not the two provisions inconsistent? If there is going to be an investigation and a report, ought not that investigation to be made and the report placed in the hands of the Secretary of the Navy before a large amount of money is appropriated for the purpose of remodeling?

Mr. WEEKS. My judgment is, Mr. President, that this paragraph ought to go out of the bill. If after suitable investigation it is decided that some additional facilities should be provided at some navy yards, I would not make a contention against it; but an indiscriminate increase of naval provision for construction purposes, as provided in this bill, is very unwise, and we will recognize it as such in years to come when we make the appropriations for its maintenance.

Mr. CHAMBERLAIN. I want to call the Senator's attention to the fact that my colleague [Mr. LANE] some time in February introduced a bill for the purpose of establishing a navy yard on the Columbia River. Just let me call the Senator's attention to it, and I want to show my reason for asking these questions.

The committee took no action with reference to that proposition. The amendment that my colleague suggested was practically recommended in 1900 by a special committee that reported favorably upon the construction of such a place at the mouth of the Columbia River; and, as I understand, the evidence before the Naval Affairs Committee does not recommend the enlargement of these three yards that it is now proposed to appropriate money to enlarge. In other words, a port where a navy yard was recommended was turned down by the committee, and one which was not recommended has been appropriated for.

Mr. WEEKS. Was not that recommendation made before the establishment of the yard at Bremerton?

Mr. CHAMBERLAIN. It was in 1900.

Mr. WEEKS. I think that was before the location of the yard at Bremerton.

Mr. LODGE. I think so. Mr. President, if my colleague will yield to me for a moment, I will say to the Senator from Oregon that this appropriation was not intended to remodel any yard. The money would not be nearly sufficient to do that to one yard. The whole purpose of this is to put slips or ways for shipbuilding in yards which do not now possess them. The four yards named for capital ships are highly equipped yards—Norfolk, Philadelphia, and Boston; and Bremerton is in process of equipment. All that is needed in those yards to enable them to build capital ships is to put in slips or ways. In the other yards—Portsmouth, Charleston, and New Orleans—which are smaller yards, it is proposed to put in ways or slips for the building of the smaller ships of the Navy, which, of course, have to be built somewhere.

There is no intention of going into any general remodeling or rebuilding of yards. The sum is altogether too small for anything of that sort.

Mr. WEEKS. Mr. President, let me ask my colleague if he does not think it likely that there will be a loud cry from these yards that are now being equipped to build minor ships to be provided with suitable equipment to build capital ships as soon as another bill comes before Congress?

Mr. LODGE. I should doubt it, because what is desired in any yard is the building of ships, the work, probably, for the locality; and the small ships, of which there are so many, can be built at the smaller yards. Why, there are 20 torpedo-boat destroyers authorized in this bill, four scout cruisers, one transport, one fuel ship, and so forth, all of which could be built in these smaller yards.

Mr. WEEKS. I notice that that did not satisfy those who represented the Philadelphia Navy Yard, which in the original print of the bill which is before us——

Mr. LODGE. That was provided for in the House. It was left out by mistake in the Senate amendment. In the House provision the House had inserted it. Philadelphia is another large yard which needs only ways in order to build ships. I

mean, by that, it has the shops, it has the machinery, it has the great labor population to draw upon, and is perfectly able, if ways are put in, to build ships.

Mr. CHAMBERLAIN. Mr. President, if the Senator will allow me to interrupt him again, I am disposed to agree with the junior Senator from Massachusetts that this provision ought to be stricken from the bill. As the Senator has shown quite distinctly, it is simply the beginning of a very large appropriation, without adequate information by the committee as to what ought to be done. It seems to me that the provision which is made on page 43 of the bill is a very wise one; that is, to provide for an examination into this whole matter, and to have a report made to the Secretary of the Navy, so that when action is taken it will be made advisedly, and upon the report of an expert commission.

Mr. SWANSON. For the new navy yards?

Mr. CHAMBERLAIN. For the new navy yards, or for any navy yards. They can report at the same time upon those that are already established. It may be that some of these on which it is now proposed to expend something like $6,000,000 are not as good as some that would be investigated and reported upon by this expert commission.

I want to be perfectly frank with the Senator. The people in my section of the country have been insisting that a navy yard ought to be established at the mouth of the Columbia River. I have not been disposed to agree with that recommendation in its entirety, after having read what there is on the subject, because, while I feel its importance not only to that section but to the whole country, I think it is not a local matter. It is a national matter; and before this vast sum of money is expended the people ought to be able to judge from the reports as to whether or not the expenditure ought to be made at any particular place.

I feel now that the position of the junior Senator from Massachusetts is absolutely unassailable. The money ought not to be expended without fuller information upon this whole subject.

Mr. WEEKS. Mr. President, let me call the Senator's attention to the fact that even where there is a well-equipped yard it does not mean that the addition of facilities of this kind will not be followed by appropriations for other things contingent to this. Let us take the Norfolk yard in this bill as an indication of what may be required by a well-equipped yard. The items for public works at the Norfolk navy yard are, ventilating system, $15,000; toilet and locker facilities, $12,000; to complete 150-ton crane, $265,000; dry dock (limit of cost not exceeding $3,500,000), $500,000; one structural shop (cost not to exceed $1,000,000), $400,000.

Mr. SWANSON. Does the Senator contend that a dry dock has anything to do with construction?

Mr. WEEKS. Mr. President, I have said that I approve of the construction of more dry docks; but I am calling to the attention of the Senate the fact that when you establish one facility at a yard it is followed by many others.

Mr. SWANSON. Does not the Senator know that all that would have to be done to construct a battleship at Norfolk would be to provide a building way there—that is, a way upon which the ship could be put?

Mr. WEEKS. The Senator need not be sensitive because I am referring to Norfolk.

Mr. SWANSON. No; I am not sensitive. In the case of Boston, does not the Senator know that all that is needed to construct a battleship at Boston is a building way? They have the yard, they have the machinery, they have the land, and all they need to be able to do it is to have a building way there. These yards have been there since this Government was established. All those other expenses to which the Senator alludes are in connection with our repair work. They are to make repairs at these various yards.

Mr. WEEKS. How about a structural shop to cost a million dollars?

Mr. SWANSON. We had a fire at Norfolk. The shop was burned up. We have not had anything there in the way of new shops for years; and the department quickly recommended that while it would be intended for repairs, it could also be used, when required, for construction.

Mr. WEEKS. Salvage and tools are appropriated for to the extent of $50,000.

Mr. SWANSON. That is done every year, whether you put up buildings there or not, for repair work.

Mr. WEEKS. I simply repeat the statement that I started with—that we spend a larger amount of money for the maintenance of our manufacturing plants at navy yards than any other manufacturing establishment in the world spends, in percentage, and that we will spend a greatly increased amount if we provide for these building ways.

Mr. SWANSON. Mr. President, I will detain the Senate only a few minutes.

There is nothing in this bill that I know of in connection with construction that has not been urgently requested by the Secretary of the Navy. This provision was drawn by the Secretary of the Navy, and he urgently requested that an opportunity be given to construct some of these ships at these yards, so as not to be compelled to pay exorbitant prices to private shipbuilders.

Take the instance the senior Senator from Massachusetts [Mr. LODGE] related the other day. When battleships *No. 43* and *No. 44* were up for contract we had appropriated a general sum of money, but the only two yards in which we could construct them were filled, and consequently could not be utilized; and they would not give a bid within the authorization made by Congress.

Mr. OLIVER. Mr. President——

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Pennsylvania?

Mr. SWANSON. I yield to the Senator.

Mr. OLIVER. Is it not a fact that the reason why they could not be constructed within the amount appropriated was that the appropriation was made before the great advance in cost of construction and in price of materials? And is it not a fact that the amounts appropriated in this bill for like ships are larger than the amounts appropriated for the construction of the ships to which the Senator refers? I will prophesy that it is a fact that they will never be constructed in the navy yards, notwithstanding the great delay consequent upon so constructing them, within the appropriation.

Mr. SWANSON. Mr. President, the Senator from Pennsylvania is correct to some extent. There has been an advance, but the department does not think the advance in material is sufficient to prevent the ships from being built within the authorization. This equips four yards. With the number of ships we are building unless something like this is done we will be completely at the mercy of private shipbuilders in this program.

There is no intention of building all the ships in private yards. The department has asked Congress to give it enough yards so that there may be fuller competition between the navy yards of the Government and the private yards, that the Government may have the ships constructed at a reasonable price.

The department has urged this, the House considered it fully and passed it, and it seems to me that it would not be wise not to give the Government at the earnest request of the Navy Department this opportunity to have ships built in private yards at a fair price, and if they are not fair but are unreasonable then that they shall be constructed in Government yards.

I move to lay the motion to reconsider on the table.

Mr. CHAMBERLAIN. Mr. President, before the Senator from Virginia makes the motion to table, I wish to take issue with him in his statement that this appropriation has all been recommended by the Navy Department. On the contrary, it is rather discountenanced by the Navy Department, and I am going to call the Senator's attention to the record. As a matter of fact, the committee is acting in the teeth of recommendations heretofore made on this subject by the Secretary and his aids.

It is very natural that all these matters take a local tint. I appreciate that. There is nothing unfair on the part of Senators from particular sections of the country insisting upon the construction of these bases or navy yards and these expenditures in their particular sections. There is no better evidence that this is being done now than the fact that the distinguished Senators on the Committee on Naval Affairs are entirely within the localities where the expenditure of this $6,000,000 is to be made. There is nothing wrong about it; it is simply a case where Senators are looking to the interests of their own constituents and their own sections.

But, Mr. President, this expenditure does not involve a local proposition. It is a great national question, aye, Mr. President, it is an international question, and we ought to get entirely away from the local aspect of the matter when we come to consider the expenditure of money not so much for the present as for the future protection of our coasts and our country. Our very national life may be involved in the course we shall here decide upon.

As I said a while ago, my colleague in February introduced a bill which had for its purpose the establishment of a navy yard at the mouth of the Columbia River. That bill was as follows:

A bill authorizing the establishment of a naval base on the Columbia River near Astoria, Oreg., and making appropriation for the beginning of construction.

Be it enacted, etc., That the Secretary of the Navy be, and he is hereby, authorized to secure a suitable site on the Columbia River, Oreg., as near to the entrance as may be deemed advisable, for the construc-

tion of a first-class naval base, including the following: Building ways, for building large and small vessels; dry docks, capable of docking the largest dreadnaughts; marine railways; machine shops; boiler shops; electrical shops; pattern shops; paint shop; copper shop; galvanizing shop; joiner shop; ship-fitter shop; smithery and chain shop; sheet-metal shop; boat and aeroplane shop; sail, rigging, and flag shops; oxyhydrogen and acetylene shops; foundry; tracks and rolling stock; barracks; chemical laboratories; radio plant; magazines; hospital, dispensary; fire-engine house; stables and garages; piers; fueling plant; storehouses; office buildings; floating derrick; and sawmill; and that $3,000,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the acquisition of a site and beginning of the work of construction.

Of course, I was interested in that proposition as a local one, as the whole Northwest was interested in it. Commercial bodies of the West got behind it and a good deal of money was expended by the people of the Northwest in sending agents here to see and induce the Secretary of the Navy to authorize the construction of a navy yard at the mouth of the Columbia River.

Very naturally, Mr. President, I espoused the western side of that proposition, and I was very anxious and solicitous that something might be done in the way of the construction of a navy yard at the mouth of the Columbia River. But after looking into it and after consulting with the Secretary of the Navy and distinguished naval officers on the subject, I felt that it would be unpatriotic to undertake to get the Government to adopt a plan and expend a vast sum of money for constructing a navy yard without having sufficient information as to what ought to be done in the premises.

Mr. President, the proposition that these people were urging was based upon a report that was made by a special board of naval officers made to the Secretary of the Navy in 1900. So there was some warrant for urging it, not only because the people of that section were interested in it but because it had the indorsement of experts of the Navy. They recommended in that report the construction of a navy yard at the mouth of the Columbia River, with certain limitations disclosed by the report. The only thing that made them hesitate at that time was the fear of a lack of water on the bar at the mouth of the river, and they recommended that as soon as that obstacle was overcome the Government ought to construct a navy yard at the mouth of the Columbia River.

Mr. President, I am going to ask to have printed in the RECORD the report that was made at that time by the special board of experts. It is to be found in Senate Document No. 60, Fifty-sixth Congress, second session, pages 2, 3, and 4.

The VICE PRESIDENT. Without objection, the report will be printed.

The report is as follows:

ADVANTAGES.

Location and strategic position: The mouth of the Columbia River is one of four points on the Pacific coast of the United States which affords safe harbor for moderate-draft shipping. It is the natural outlet for an immense productive territory, and as a shipping point is important because of its excellent through railroad communications.

Its position, 550 miles from San Francisco, and the only available point between San Francisco and Puget Sound, makes it highly important, from a strategic standpoint, to have the Columbia River possible as a harbor of refuge and repair for naval vessels, more especially as the entrance to the Puget Sound naval station lies between shores, one of which belongs to another nation.

Fresh water: The Columbia River, from a point about 15 miles above its mouth, is always fresh. Numerous mountain streams make available an abundant supply of potable water anywhere on the river.

Railroad: Ample railroad communication is found in a railroad on the south or left bank of the Columbia to the mouth of the river, near and beyond Astoria. By this railroad supplies can be received from all the great railroads leading into Portland.

Labor and supplies: Portland, the largest city in the extreme Northwest, is convenient to all points on the Columbia River, and is an excellent labor and supply center.

Climate: The climate along the Columbia River is mild, with but little snow, and work at a shipyard could proceed without interruption throughout the year.

DISADVANTAGES.

Columbia River bar: In considering the advisability of establishing a dry dock on the Columbia River, the depth on water on the river bar must always be the leading consideration.

The ruling depth of the bar channel, previous to the construction of the jetty, was from 20 to 21 feet. The jetty was commenced in 1885 and completed in 1895, when a depth of 31 feet was secured in the main ship channel at low water, 30 feet having been expected.

The survey of 1896 showed a shoaling to a 30-foot channel; that of 1897 showed no change, while in 1898 the depth had decreased to 29 feet, and in 1899 to 28 feet. For these four years the decrease in depth may be said to have been fairly uniform, but last winter, during the nine months from September, 1899, to June, 1900, the bar has shoaled from 28 to 23 feet, a decrease in depth of 5 feet.

A plan has been prepared and approved by the War Department for a continuation of jetty work, with the expectation of obtaining a 40-foot channel. For this purpose an appropriation has been granted to make preparations for the proposed jetty extension, thus probably insuring the whole appropriation necessary for the complete improvement of the bar. With this work accomplished, the Army engineers expect that at least 35 feet, and probably 40 feet, will be secured.

It is also proposed to secure a depth of 25 feet at low water in the channel of the river from a point immediately above Astoria to Portland. The most serious difficulty existing at present is the shoalness of the channel from Tongue Point to Point Harrington, on the north shore, a depth of 17 feet only at mean low water being shown in some spots. This must be remedied before the river can be considered open at all times to vessels of deep draft.

Crossing bar: With or after a southeast or southwest gale the Columbia River bar is very rough and practically not navigable Under these conditions vessels are bar bound often for a considerable time.

According to numerous authorities, from 10 to 12 feet are needed under the keel of a moderate-draft vessel in very rough weather. Last winter ships drawing 17 feet coming in are reported to have touched during rough weather; for ships drawing 22 feet or over exceptionally favorable conditions of weather, tide, and bar are necessary.

Annual freshets: From the mouth of the Columbia River to just above Astoria the yearly freshets produce no effect on the height of the tide, while from this point to the mouth of the Willamette the variation in height of water from this cause is from zero to 15 feet.

The average range of tides in the vicinity of Astoria is between 7 and 8 feet.

Weather and bar conditions: For the general conditions of wind and weather and state of the bar, reference may be made to Appendix F, a table covering these points for a period of about 18 months.

In view of the above, the board is unanimously of the opinion that while the present conditions exist the benefit to be derived by the naval service would not warrant the expense of locating a dry dock and the naval station, which would result, and maintaining the same.

Should the proposed improvements of the bar and river channel be carried out and result in obtaining the necessary depth of water, which seems assured from past experience, the board is of the opinion that the location on the Columbia of a dry dock and naval station for making repairs to modern vessels of war would be most desirable from the undoubted advantages possessed by the river.

Not being able to report that the location of a dry dock on the river is advisable at this time, the board did not select any location, but is of the opinion that a desirable site could be obtained without undue expense to the Government that would meet the requirements noted in the instructions of the Bureau of Yards and Docks.

Very respectfully,

HENRY GLASS,
Captain, United States Navy, Senior Member.
PHILIP ANDREWS,
Lieutenant, United States Navy, Member.
HOMER R. STANFORD,
Civil Engineer, United States Navy, Member.

The SECRETARY OF THE NAVY,
Navy Department, Washington, D. C.

Mr. CHAMBERLAIN. Now, the committee in the amendment under consideration have abandoned that report and that recommendation entirely, and notwithstanding the fact that the conditions exist now which warrant favorable action based upon that report, I am not at this time going to insist that that report be followed.

I call the attention of the Senate to the fact that the distinguished Senator in charge of this bill is mistaken when he says the expenditure is demanded by the Secretary of the Navy. On page 3180 of the hearings before the House Mr. STEPHENS of California, when Admiral Benson was testifying, asked:

Mr. STEPHENS. How do you consider Puget Sound Navy Yard; among the very best we have?

Admiral BENSON. I think it is a very good yard; a yard that should be developed.

Mr. STEPHENS. Do you favor this Congress appropriating $2,000,000 for fitting it for the construction of battleships?

Admiral BENSON. I do not believe I would, sir. I do not think I would advise $2,000,000 at Puget Sound for building battleships.

Mr. STEPHENS. Do you think the one yard at Mare Island sufficient to construct what should be constructed on the Pacific coast?

Admiral BENSON. Under present conditions my idea would be to establish a plant in San Francisco Bay that would be adequate for building as many battleships as we would be required to build on that coast. We have assigned *No.* 44 to Mare Island, and, as I said before, I concurred, if I did not suggest building it at Mare Island; but I do think that the time has come when we should establish a station in San Francisco Bay for the purpose of the primary naval station on the California coast.

So we see that instead of recommending what is suggested in this bill, Admiral Benson recommended aganist it, and yet the committee reports an amendment here advocating the enlargement of this particular yard amongst others. But, Mr. President, my insistence is that all these yards that are mentioned in the bill ought to have no money expended on them until a report has been made by a special committee. So Admiral Benson differs from the distinguished Senator in charge of the bill.

Again, at page 3457 of the hearings, Mr. STEPHENS of California asked this question of the Assistant Secretary of the Navy:

Mr. STEPHENS. Mr. Secretary, you are aware, no doubt, that the Senate has passed a bill appropriating $2,000,000 for the construction of ways and machine shops, etc., for battleship building at the Bremerton yards.

Mr. ROOSEVELT. Yes.

Mr. STEPHENS. Does it meet with your approval?

Mr. ROOSEVELT. Yes; but I would like to have seen something else coupled with it.

Mr. STEPHENS. What would that be?

Mr. ROOSEVELT. That is the establishment of a proper naval base—and that is at the present moment of vital necessity on the Pacific coast—in the neighborhood of San Francisco Bay.

Mr. STEPHENS. Would you establish a naval base at any place on the Pacific coast without first sending a commission to examine and report upon the advisability of and location for such a base?

Mr. ROOSEVELT. As far as Puget Sound goes, we do not need the commission.

Mr. President, I am calling attention to these facts to show that the Navy Department has not recommended these things, and common business prudence suggests that before action is taken for the expenditure of large sums of money there ought to be some examinations made, some hearings had so that the Secretary of the Navy and Congress can act intelligently and upon the basis of the facts submitted.

Secretary Daniels on this very subject at page 3644 said, in answer to a question by the chairman:

Secretary DANIELS. I think, Mr. Chairman, that the increase of the Navy and its development are going to make the Pacific Fleet more important than heretofore and that we ought to have a real study of what we will need on the Pacific. I would recommend that you incorporate in the bill a provision directing the Secretary to appoint such a board and have it investigate during the summer, so that a report can be made to Congress in December.

That report has not been made yet, and the amendment proposed by the committee with reference to the expenditure of $6,000,000 is made without any recommendation from the different naval officers who ought to be informed upon the subject.

Mr. President, if we are going to expend $6,000,000, instead of naming the yards the matter ought to be left entirely to the discretion of the Secretary of the Navy to say how many yards the money should be expended on and what particular yards ought to be utilized for the purpose of carrying out the enlarged program for naval construction that is here contemplated.

I might, Mr. President, call attention to other testimony in this connection to show that this expenditure for any particular yard has not been recommended by the Secretary of the Navy. It may be that Bremerton is the proper place, and I am not criticizing that. It is an excellent location for a yard. Whether it is the place where capital ships ought to be built or not I do not know, and there is no evidence before the committee to show whether they know or not. Whether the mouth of the Columbia River is the place or not I do not know. As a resident of the State of Oregon, and as representing in part that State, I am not going to ask the Congress of the United States to establish a navy yard there without knowing that the money for that purpose is to be expended in the interest of the whole country and for our most efficient defense against enemies, from whatsoever place they may come.

It may not or it may be the proper place. It may be, Mr. President, that Mare Island is the place where all this money should be expended; and if the evidence that might be submitted here by a committee appointed to investigate the subject was that Mare Island is the best place, I would be the last man to stand on the floor of this Chamber and say that a dollar of it ought to be spent in my State.

Senators have been talking about getting excited over this preparedness proposition. To authorize the expenditure of large sums of money without a basis upon which to expend it does look like acting with some excitement and without mature reflection, and it is for that very reason that in a matter of such vital importance to our country nothing ought to be done until we have been advised fully and by experts.

I introduced a resolution in the Senate the other day calling upon the Secretary of War for information as to conditions of defense on the Pacific coast. I was expecting an answer that I could give to the public through the instrumentality of the CONGRESSIONAL RECORD. When the report came in it was a confidential report. Why? Because that magnificent coast, Mr. President, is so absolutely poorly defended that the War Department did not want the public or, possibly, foreign governments to know how poorly we are defended there. Now, we are going to work expending money here for navy yards and shipbuilding without having the information that is necessary to authorize Congress to act with that intelligence and with that patriotism which are necessary in this emergency.

All I want, Mr. President, is that when we do authorize the construction of navy yards on the Pacific coast—and this bill provides for an investigation of conditions out there—that when we do authorize the expenditure of money on the Pacific coast the Congress of the United States and the people of the country shall know that the money is going to be expended at a place that will be best for the interest of the whole country.

The only objection I have to this provision is that under it we are to expend $6,000,000 in certain locations without having the benefit of the expert advice of the officers of the Navy who are in a position to know conditions. A month or two will not make any difference. Let us strike out that provision, and let us leave in the bill the first part which provides that an examination shall be made of the Pacific coast and the proper places selected for the establishment of a navy yard. It might be enlarged so that the investigations may be made along the Atlantic coast as well. It ought to be done. Let the officials report here by December. They can do it. They possibly have the information and data in the office down at the Navy Department. Let them make the report, and when that report is in, let us appropriate the money and expend it not for the benefit of any locality in this country, but for the benefit of the whole country to protect our shores against our enemies, whether at home or abroad.

Mr. President, I hope the motion of the Senator from Massachusetts will prevail, and that the provision under consideration will be stricken from the bill, in order that before we act we may have more information and more light, and know just exactly how and where the navy yards ought to be established and how much should be expended at each one.

I hope that that action will be taken and that the scope of the bill will be enlarged so that if necessary the investigation of the commission to be created shall extend to the Atlantic and Gulf coasts as well as to the Pacific coast.

Mr. SWANSON. I move that the motion to reconsider be laid on the table.

Mr. CHAMBERLAIN. On that I ask for the yeas and nays.

The yeas and nays were ordered.

The VICE PRESIDENT. The Secretary will call the roll.

Mr. CATRON. I should like to know what the question is that we are voting on.

The VICE PRESIDENT. The Senator from Massachusetts [Mr. WEEKS] has moved to reconsider the vote whereby the amendment on page 175 of the bill was agreed to. The motion now is to lay the motion of the Senator from Massachusetts on the table.

The Secretary proceeded to call the roll.

Mr. BECKHAM (when his name was called). I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. CATRON (when his name was called). I am paired with the Senator from Oklahoma [Mr. OWEN], but by an understanding with him, I am authorized to vote notwithstanding my pair. I vote "yea."

Mr. DILLINGHAM (when his name was called). I have a pair with the senior Senator from Maryland [Mr. SMITH], who is absent to-day, for which reason I withhold my vote.

Mr. SHERMAN (when his name was called). I have a pair with the Senator from New Jersey [Mr. MARTINE] and withhold my vote.

Mr. THOMAS (when his name was called). Has the senior Senator from North Dakota [Mr. MCCUMBER] voted?

The VICE PRESIDENT. He has not.

Mr. THOMAS. Then I withhold my vote, having a pair with that Senator. If I were at liberty to vote, I should vote "nay."

Mr. TILLMAN (when his name was called). Announcing the same pair and transfer as on the former vote, I vote "yea."

Mr. UNDERWOOD (when his name was called). I am paired with the junior Senator from Ohio [Mr. HARDING]. In his absence, I transfer that pair to the junior Senator from Arkansas [Mr. ROBINSON] and vote "yea."

Mr. VARDAMAN (when his name was called). I have a pair with the junior Senator from New York [Mr. WADSWORTH]. In his absence I withhold my vote. If permitted to vote, I should vote "nay."

Mr. WEEKS (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. I transfer that pair to the senior Senator from Idaho [Mr. BORAH] and vote "nay."

The roll call was concluded.

Mr. CHILTON. I transfer my pair with the Senator from New Mexico [Mr. FALL] to the Senator from New Jersey [Mr. HUGHES] and vote "yea."

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN], which I transfer to the senior Senator from South Dakota [Mr. STERLING] and vote "yea."

Mr. SIMMONS. I transfer my general pair with the junior Senator from Minnesota [Mr. CLAPP] to the Senator from Nebraska [Mr. HITCHCOCK] and vote "yea."

Mr. NORRIS (after having voted in the negative). I voted under a misapprehension. I desire to vote "yea."

Mr. WARREN. My colleague the Senator from Wyoming [Mr. CLARK] has been called from the Chamber. He is paired with the senior Senator from Missouri [Mr. STONE].

Mr. WEEKS. I think I noticed in the list of Senators who voted in the affirmative, as they were read, the name of the Senator from Tennessee [Mr. SHIELDS]. I did not see him in the Chamber and I understood that he was not present. I think some Senator answered when his name was called under a misapprehension.

Mr. SWANSON. Possibly I thought my name was called and I answered at the wrong time.

Mr. WEEKS. No; the Senator answered when the name of the Senator from Missouri [Mr. STONE] was called.

Mr. SWANSON. I know my name was called. I caught my name.

Mr. CURTIS. Mr. President, I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Delaware [Mr. DU PONT] with the Senator from Kentucky [Mr. BECKHAM];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON];

The Senator from West Virginia [Mr. GOFF] with the Senator from South Carolina [Mr. TILLMAN];

The Senator from Rhode Island [Mr. LIPPITT] with the Senator from Montana [Mr. WALSH];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from Vermont [Mr. PAGE] with the Senator from Oklahoma [Mr. GORE].

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED];

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE]; and

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Florida [Mr. BRYAN].

The result was announced—yeas 38, nays 16, as follows:

YEAS—38.

Ashurst	Johnson, Me.	Owen	Smith, Ga.
Bankhead	Johnson, S. Dak.	Penrose	Smith, S. C.
Broussard	Jones	Phelan	Swanson
Catron	Kern	Pittman	Taggart
Chilton	La Follette	Poindexter	Tillman
Culberson	Lee, Md.	Pomerene	Underwood
Fletcher	Lewis	Ransdell	Warren
Gallinger	Lodge	Shields	Williams
Hardwick	Martin, Va.	Simmons	
Husting	Norris	Smith, Ariz.	

NAYS—16.

Beckham	Cummins	Nelson	Sheppard
Brady	Curtis	Newlands	Smoot
Brandegee	Kenyon	Oliver	Weeks
Chamberlain	Lane	Overman	Works

NOT VOTING—41.

Borah	Gronna	Myers	Stone
Bryan	Harding	O'Gorman	Sutherland
Clapp	Hitchcock	Page	Thomas
Clark, Wyo.	Hollis	Reed	Thompson
Clarke, Ark.	Hughes	Robinson	Townsend
Colt	James	Saulsbury	Vardaman
Dillingham	Lea, Tenn.	Shafroth	Wadsworth
du Pont	Lippitt	Sherman	Walsh
Fall	McCumber	Smith, Md.	
Goff	McLean	Smith, Mich.	
Gore	Martine, N. J.	Sterling	

So the motion to lay on the table the motion to reconsider was agreed to.

Mr. SWANSON and Mr. JONES addressed the Chair.

The VICE PRESIDENT. The Senator from Virginia.

Mr. SWANSON. I have some small amendments to perfect the text of the bill, which I desire to offer. The Senator from Utah [Mr. SMOOT], however, has an amendment to an amendment, which was adopted in his absence and which I promised to call up when he returned. I now yield to him, so that he may offer his amendment.

Mr. SMOOT. Mr. President, in the amendment which was adopted by the Senate and which had been offered by the Senator having the bill in charge, the lines are not numbered, but I move to amend that amendment after the word "company" by inserting the words "or companies," and after the word "its" by inserting "or their," so that the provision, if so amended, will read:

Provided further, That authority is hereby granted to the railroad company or companies and its or their successors and assigns—

And so forth.

Mr. SWANSON. I accept that amendment.

The VICE PRESIDENT. Without objection, the vote whereby the original amendment was agreed to will be reconsidered, and the amendment to the amendment will be agreed to, and the amendment as amended agreed to.

Mr. SWANSON. There are some small amendments to correct the language of the bill, in which there have been some misprints. I desire that the amendments which I now send to the desk may be adopted.

The VICE PRESIDENT. The amendments proposed by the Senator from Virginia will be stated.

The SECRETARY. On page 148, line 17, it is proposed to strike out the figures "$35,085" and to insert "$37,585."

The VICE PRESIDENT. Without objection, the amendment is agreed to. The next amendment proposed by the Senator from Virginia will be stated.

The SECRETARY. On page 109, line 16, it is proposed to strike out the word "National" and to insert in lieu thereof the word "Naval."

The VICE PRESIDENT. Without objection, the amendment is agreed to. The next amendment proposed by the Senator from Virginia will be stated.

The SECRETARY. On page 117, line 23, it is proposed to strike out the name "United States" and to insert in lieu thereof the word "National."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. SWANSON. Mr. President, that finishes all the amendments of the committee, except the amendment on page 4, which is dependent upon the adoption by the Senate of the building program as outlined. I shall not call those amendments up this evening, but shall reserve the right to call them up early on Monday morning. I ask unanimous consent that those two amendments may go over until the Senate meets on Monday morning.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. LODGE. Mr. President, I offer an amendment to come in on page 61, after line 5, reading, "That section 1440 of the Revised Statutes of the United States shall hereafter apply only to officers on the active list." I send the amendment to the desk. It is in the House personnel bill, and I send it in that form.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 61, after line 5, it is proposed to insert:

Provided further, That section 1440 of the Revised Statutes of the United States shall hereafter apply only to officers on the active list.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. PITTMAN. Mr. President, on behalf of the Committee on Naval Affairs, I offer an amendment which has been overlooked by the chairman. The amendment is to come in at the end of line 12, on page 184.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 184, at the end of line 12, it is proposed to insert:

That each and every employee of the navy yards, gun factories, naval stations, and arsenals of the United States Government is hereby granted 30 days' leave of absence each year without forfeiture of pay during such leave: *Provided*, That it shall be lawful to allow pro rata leave only to those serving 12 consecutive months or more: *And provided further*, That in all cases the heads of divisions shall have discretion as to the time when the leave can best be allowed.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE and Mr. THOMAS addressed the Chair.

The VICE PRESIDENT. The Senator from Connecticut.

Mr. THOMAS. I wished to make an inquiry in regard to the amendment just read, but the Chair stated that it was agreed to without objection.

The VICE PRESIDENT. If the Senator from Colorado desires to address himself to the amendment, the statement of the Chair as to the amendment being agreed to will be set aside.

Mr. BRANDEGEE. Mr. President, if the Senator from Colorado desires to discuss the amendment——

The VICE PRESIDENT. The Chair so understands.

Mr. THOMAS. No; I yield the floor.

Mr. BRANDEGEE. Very well.

Mr. PITTMAN. Mr. President, will the Senator yield to allow me to inquire what disposition has been made of the amendment?

The VICE PRESIDENT. The Chair understands that the Senator from Colorado desires to discuss the amendment.

Mr. THOMAS. No, Mr. President; I wanted to have the amendment restated, as I did not fully understand it; but I have a copy of it here, which I have examined, and I will yield the floor to the Senator from Connecticut.

Mr. OLIVER. Mr. President, I should like to ask something about this amendment. Do I understand that it grants 30 days' leave of absence, with full pay, to all men employed in the navy yards and under the Navy Department?

Mr. PITTMAN. It does.

Mr. OLIVER. I ask if that is the custom with regard to other employees of the Government engaged on similar work?

Mr. PITTMAN. Mr. President, I will answer that question in a moment. A bill providing for leaves of absence for the employees enumerated in the amendment has passed the House of Representatives. There were hearings before the Committee on Naval Affairs of the House, and that committee unanimously

reported the bill favorably. It came to the Senate and was referred as an individual bill to the Committee on Naval Affairs of the Senate. The Committee on Naval Affairs has directed that that measure be reported as a committee amendment to this bill.

Now I will answer the question of the Senator from Pennsylvania. This provision simply follows the practice with regard to nearly all similar departments of the Government. Let me read from the statement:

Executive departments, not including those outside of the city of Washington, 30 days' leave of absence, 22,965 employees; Bureau of Engraving and Printing, 30 days, 4,000 employees; Government Printing Office, 30 days; Immigration Service, 30 days; Customs Service, 30 days; Isthmian Canal service, 6 weeks; navy yards, gun factories, naval stations, and arsenals, 15 days.

This is simply an effort to place these employees in exactly the same position as are the others.

Mr. OLIVER. Mr. President, I will have to ask that that amendment go over until Monday. I should like to have a little time to consider it.

The VICE PRESIDENT. Without objection, the amendment will go over.

Mr. BRANDEGEE. Now, Mr. President, I send to the desk an amendment, to come in on page 44, after line 10.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 44, after line 10, it is proposed to insert:

Provided further, That the sum of $10,000 is hereby appropriated to defray the expenses of said commission, including drafting, technical and clerical assistance in the Navy Department or elsewhere; for the taking of borings and making other tests necessary to determine the availability of any site found desirable for the location of dry docks, slips, piers, etc., and submarine and aviation bases, same to be available until expended.

Mr. BRANDEGEE. Mr. President, my reason for offering that amendment is this: The bill provides for the creation of a commission to report upon the advisability of an additional navy yard or naval station, submarine bases, and aviation bases. I happened to be in the Navy Department the other day talking about another matter with the Assistant Secretary and one of his assistants when they referred to this amendment and stated it would be impossible for the commission without some appropriation to execute the duties which this amendment imposes upon them. Of course, there will be no expense connected with the services of the members of the commission themselves, because they will probably be retired officers of the Navy; but I was told at the department that in order to decide upon the availability of a place for a slip or a dry dock or a navy yard they would have to make borings, sink test pits, and so forth, to test the foundation and determine what its character was, and so forth. I told them I would be glad to present such an amendment for the consideration of the Senate. They asked for $50,000. I have simply asked for $10,000, or so much thereof as may be necessary, and my only desire is to have it go to conference, so that if the conferees want to call upon the department for further information they can do so and agree to it or reject it in conference if the Senate sees fit to adopt it now.

Mr. SWANSON. Mr. President, the Senate has imposed additional duties upon this commission, which was first created by the House, by placing within the scope of their investigations the establishment of submarine and aviation bases, which are very important. I think the expenditure of some money is absolutely necessary. I told the Senator that I would consent to let the amendment go to conference. The amount is small, being $10,000. I will accept the amendment and will make inquiry of the department, and if the work can be done for less I will certainly try to get the amount reduced in conference. I have no objection to the amendment being adopted.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Connecticut.

The amendment was agreed to.

Mr. WEEKS. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 132, after line 4, it is proposed to insert:

For pay and other purposes the service of any professor of mathematics in the Navy, as an instructor or professor at the United States Naval Academy previous to being commissioned, shall count as service in the Navy.

Mr. WEEKS. Mr. President, that paragraph would affect two professors at the Naval Academy—Prof. T. W. Johnson and Prof. Cusachs. These officers were employed as instructors at the Naval Academy in the year 1900, and served as such until 1913, when they were commissioned in the professors' corps. At the time of their commission in 1913 they were receiving $3,000 a year.

They are the two junior lieutenants in the professors' corps, and their pay as such is $2,400 a year. Therefore, when they were commissioned their pay was reduced from $3,000 to $2,400 a year. If they were given their fogies, counting the time when they served as instructors as fogies, they would be given pay amounting to $3,120. That is to say, it would increase their pay $120 a year over what they were receiving as instructors.

It seems to me that it is only right and just that those officers should have that privilege accorded them. It happens that the two lieutenants who are immediately senior to these officers were formerly instructors and were later on commissioned as professors, and it was especially stipulated in the provision providing for those officers that their time of service as instructors should count as service in the Navy.

Mr. SWANSON. Mr. President, this is a very broad amendment intended to cover two cases. I saw these officers and friends in their behalf, and I think there was a disposition to aid these two professors if it could be done without using language as broad as this, which might cover a great many cases. As you will remember from the discussions we have had here, where we count service it gives longevity pay and it gives the privilege of retirement; and this would carry the privilege of retirement and longevity pay to these officers back prior to their commission. I do not know how many persons in the Navy it would apply to. I am opposed to having the privilege of retirement and the privilege of longevity pay fixed by putting the service of people back several years before they received their commissions; but I will accept this amendment with the understanding that I will take it to conference and examine it and see if it applies only to these two professors.

Mr. WEEKS. Mr. President, it will be perfectly satisfactory to me, in case the amendment does not cover that stipulation, if the conferees adjust it so that it will be confined to these two officers.

Mr. SWANSON. I do not think the salaries of these two officers ought to be reduced under the conditions that have been stated; but I am unwilling to have language inserted that might give an increase of salary and retirement to a great many other officers. So I have no objection to taking it to conference for consideration.

Mr. PAGE. Mr. President, I should like to ask the Senator how many officers he thinks this probably might apply to in case it were passed?

Mr. SWANSON. It is impossible to say. I am not willing for it to apply to anyone, to give him longevity pay and the right of retirement, except from the time he received his commission; but there is some merit in the contention of these two professors. Their salary has been reduced. But I could not consent to this language except with the understanding that it will go to conference to be examined and see if it applies to any others except these two professors.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. OVERMAN. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to insert, at the end of the bill, the following:

To mark the grave of Rear Admiral Charles Wilkes: To provide a suitable tablet over the remains of Rear Admiral Charles Wilkes, United States Navy, in the National Cemetery at Arlington, Va., $1,500.

Mr. OVERMAN. Mr. President, a short time ago I was visited by the commander of the Loyal Legion, who told me that when Sir Ernest Shackleton, the great explorer, came to this country he inquired for the grave of Admiral Wilkes, the great American explorer, and he could not tell him where it was. Sir Ernest Shackleton wanted to lay a wreath upon the grave of that distinguished naval officer. When that was done, the Loyal Legion took up the matter and moved his remains to Arlington.

I have here a letter which the Secretary of the Navy has written to me about this matter. I introduced, at their request, a bill appropriating $5,000 to erect a monument to his memory. That bill has been twice reported favorably by the committee; it has twice passed the Senate; but I do not ask that it be put on this bill as an amendment. I simply ask this small appropriation to put a tablet upon his grave.

The Secretary of the Navy says:

Rear Admiral Wilkes, born 1801, served in the United States Navy from 1818 until his death, in 1877. He was an associate and friend of Capt. Matthew Fontaine Maury, the hydrographer, and was the first to set up and use astronomical instruments in the United States, about 1830, and was chosen to command the exploring expedition authorized by Congress in 1836.

From 1838 to 1842 Wilkes circumnavigated the globe; discovered the Antarctic Continent, a large part of which bears his name, in Wilkes Land; located the South Magnetic Pole; surveyed and charted a new

world; and published the greatest single contribution made to geography and researches, out of which grew history of plants, races of men, comparative grammar of Polynesian dialects, and splendid volumes on geology, botany, ethnology, and philology, which have laid the foundation for all subsequent researches concerning the peoples of the Pacific Ocean.

The Secretary recommends $5,000. I have only asked for $1,500. I hope the chairman of the committee will let it go in the bill.

Mr. SWANSON. Mr. President, of course, the proper committee for that is the Committee on the Library, but I will accept the amendment for consideration in conference.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. OVERMAN. I should like to put in the RECORD a letter from the Loyal Legion, written to me in regard to this matter, so that when it comes up in conference the conferees can see the Secretary's letter, and also the letter from the commander of the Loyal Legion.

The VICE PRESIDENT. Without objection, the letters will be printed in the RECORD.

The matter referred to is as follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, July 8, 1916.

Hon. LEE S. OVERMAN,
United States Senator, United States Senate.

MY DEAR SENATOR: Mr. J. Frank Wilkes, of Charlotte, N. C., has written me that you and a committee of the Loyal Legion are working for an appropriation for the suitable marking of the grave in Arlington where lie the remains of his grandfather, the distinguished Rear Admiral Charles Wilkes, United States Navy.

Senate bill 6876, March 2, 1910, proposed a $5,000 monument in Arlington for this purpose, and the Navy Department then recommended favorable action on that bill.

Rear Admiral Wilkes, born 1801, served in the United States Navy from 1818 until his death in 1877. He was an associate and friend of Capt. Matthew Fontaine Maury, the hydrographer, and was the first to set up and use astronomical instruments in the United States, about 1830, and was chosen to command the exploring expedition authorized by Congress 1836.

From 1838 to 1842 Wilkes circumnavigated the globe; discovered the Antarctic Continent, a large part of which bears his name in Wilkes Land; located the South Magnetic Pole; surveyed and charted a new world; and published the greatest single contribution made to geography and researches, out of which grew history of plants, races of men, comparative grammar of Polynesian dialects; and splendid volumes on geology, botany, ethnology, and philology, which have laid the foundation for all subsequent researches concerning the peoples of the Pacific Ocean.

During the Civil War he commanded the West India Squadron. It is suggested that few men have contributed so much as Admiral Wilkes to the reputation of his service, and I venture the hope that his grave will be marked in a manner befitting his life, character, and achievements.

Sincerely, yours,

JOSEPHUS DANIELS,
Secretary of the Navy.

MILITARY ORDER OF THE
LOYAL LEGION OF THE UNITED STATES,
COMMANDERY OF THE DISTRICT OF COLUMBIA,
City of Washington, June 23, 1916.

To the Hon. JOSEPHUS DANIELS,
Secretary of the Navy, Washington, D. C.

SIR: When Sir Ernest Shackleton, the Antarctic explorer, visited Washington in 1910 he inquired for the place of burial of Rear Admiral Charles Wilkes, United States Navy, the most distinguished explorer and navigator of Antarctic regions. He was informed that it was in a neglected spot in the Oak Hill Cemetery, and he could not visit it or pay tribute of respect to the memory of that officer.

The District of Columbia Commandery of the Military Order of the Loyal Legion at once, upon being informed of the facts, took immediate steps to correct that discreditable condition of things. Its committee appointed for that purpose took the necessary steps to have the remains of Admiral Wilkes removed to the National Cemetery, at Arlington, Va., and had plans and estimate of cost of a suitable monument to mark the grave prepared, the same to cost not over $1,500, which plan and estimate were submitted to the then Secretary of the Navy, Mr. Meyer, who approved the same.

The committee then prepared a bill (S. 6876, 2d sess., 61st Cong.) providing for an appropriation of the $1,500 needed for the purpose—a copy of which is submitted herewith—and had the same introduced in the Senate, and it was favorably reported to and was passed by the Senate, and was sent over to the House of Representatives for action.

The House Committee on the Library reported the bill favorably, but the Congressman in charge of the bill neglected to have it called up and passed. The bill was again introduced in the Sixty-second Congress (S. No. 1774).

We are advised that, under these facts and following many precedents therefor, it is competent for the Congress to hasten action upon this measure, so approved by both Houses of Congress, by a paragraph in the Naval appropriation bill which would make that small sum immediately available.

The report of the Senate Committee (No. 684, 61st Cong., 2d sess.) herewith states succinctly and forcibly the facts, which should convince the Congress that immediate action would be greatly to the honor of the country in correcting a bit of neglect which causes unfavorable comment wherever it is known.

Asking your influence in speeding this action, we are,
Respectfully, your obedient servants,

COLBY M. CHESTER,
Rear Admiral, United States Navy, Commander.
THOMAS H. MCKEE,
Recorder.

P. S. The correspondence with the family of Admiral Wilkes urging the continuance of our efforts is herewith inclosed.

Mr. WEEKS. Mr. President, I offer an amendment on page 58, line 21, to strike out the word "five" and insert the word "eight," and on line 23 of the same page to strike out the last word in the line, "nine," and insert "six."

I assume, Mr. President, that the general scheme for the assignment of officers in the Navy to particular corps, and for the assignment and the division of those so assigned to grades in a corps, has been pretty carefully work out; but I think a mistake has been made in this instance, and for that reason I should like the attention of the committee, at least, so that it may be taken up in conference and a correction made if there is sufficient reason for it.

As I have the facts in the case of the naval constructor who stands No. 15 on the list, and who will be promoted to captain upon the fourth or fifth vacancy—both of which would occur in the same year, pursuant to the new retirement clause contained in this bill, by which the first five vacanices will occur one each in 1921, 1922, and 1924, and two in 1926, with 3½ per cent captains as above—this constructor would be promoted to a captain in the year 1926, at the age of 56 years, whereas his line classmates would be promoted to the grade of captain by 1917 or 1918. In other words, he would be about nine years behind his line classmates.

The constructors in the Navy are taken from those who graduate near the head of their classes. They are naturally among the brighter men in their classes. Therefore it seems particularly unfair that an officer in the constructors' corps should not reach the grade of captain before he is 56 and nine years after his line classmates have reached that grade.

I submit the statement to the committee, and I should like to have it taken up and figured out, and have the committee see if my facts are correct.

Mr. SWANSON. I will say to the Senator that this personnel bill was worked out most carefully; and I have had, I reckon, 25 requests to take care of special individuals in connection with changing the percentages. Before I would give my approval to the measure I requested Admiral Blue to ascertain what were the percentages for these various ranks for the last 20 years, and then to take an average of them; and there has been a fair and conservative estimate made in that way.

To change this from 5½ to 8½, as suggested by the Senator, might take care of this person; but the Senator must remember that as the commissioned officers increase—and they will increase each year—and as the enlistment increases, 8½ per cent to be fixed would be an unusually large number, and would be very uneven and unfair for the future.

Mr. WEEKS. It would be 8½ per cent for the constructors alone, of course. This does not change the number of officers assigned to any particular grade in any other corps.

Mr. SWANSON. In the construction corps there are now no rear admirals. They will have one rear admiral, however. Of the rank of captain, they now have five. One captain, on account of this condition, is promoted to rear admiral, which leaves only four captains. Now, there might be some merit in that, as the captains are reduced. They reduce one, under this provision, in the construction corps. The rank of commander, though, is increased from 5 to 10.

Mr. WEEKS. Mr. President, all I will ask in this case is that this amendment be adopted; and if it is not demonstrated that there has been a mistake made, then I do not make any contention for it.

Mr. SWANSON. I will say to the Senator that this entire matter will be in conference. The House has no provision on this specific subject; and as the number of captains is reduced from five to four on account of the promotion of one to be a rear admiral, if it can be done I will be very glad to do it; but there is no use in having an amendment. The matter can be easily fixed in conference without having an amendment adopted, because the House has no provision on this subject.

Mr. GALLINGER. But would the House increase that figure, the House not having any provision on the subject in the bill?

Mr. SWANSON. As the House has no provision on it, the entire matter is in conference.

Mr. GALLINGER. That is a very grave question. The House has no provision naming any percentage. The Senate puts in a percentage of five and one-half. Now, can the conferees increase that percentage? If not, the contest is between nothing and five and a half.

Mr. SWANSON. I have no objection to having the amendment go in for consideration in conference; but I think, upon examination, the Senator himself would not ask for that as a permanent basis.

Mr. WEEKS. I am giving the facts as they have been presented to me. As they have been presented to me it seems that a great injustice has been done, and I suspect that a mistake has been made in this particular feature.

Mr. SWANSON. I have no objection to its going to conference.

Mr. GALLINGER. Mr. President, just a word. My attention has been called to this same matter. While I am not going to say that I am satisfied that the amendment submitted by the Senator from Massachusetts ought, as a matter of fact, to be agreed to, yet I think there is a great deal of merit in it. As any rate, it seems to me that the conferees ought to give it further consideration. I hope the amendment will go in the bill.

The VICE PRESIDENT. Without objection, the vote whereby the amendment was agreed to will be reconsidered. The question now is on agreeing to the amendment submitted by the Senator from Massachusetts to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. WEEKS. Mr. President, I move to strike out on page 64, commencing at line 12 with the words "*Provided further*," all the rest of that page and the next page down to and including line 13.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. Beginning on page 64, line 12, with the words "*Provided further*," it is proposed to strike out all down to and including the word "Navy," at the end of line 13, page 65.

Mr. GALLINGER. In order to have the matter properly before the Senate, I should like to have read the words that it is proposed to strike out.

The SECRETARY. It is proposed to strike out the following words, beginning on line 12, page 64:

Provided further, That the Secretary of the Navy is hereby authorized to appoint annually in the line of the Navy for a period of 10 years following the passage of this act, in the order of merit determined by such competitive examination as he may prescribe, 30 ensigns for the performance of engineering duties only. Persons so appointed must have received a degree of mechanical or electrical engineer from a college or university of high standing or be graduates of technical schools approved by the Secretary of the Navy, must have been found physically qualified by a board of medical officers of the Navy for the performance of the duties required, and must at the time of appointment be not less than 20 nor more than 26 years of age. Such appointments shall be for a probationary period of three years, and may be revoked at any time by the Secretary of the Navy.

Such ensigns shall, upon the completion of the probationary period of three years, of which two years shall have been spent on board cruising vessels and one year pursuing a course of instruction at the Naval Academy prescribed by the Secretary of the Navy, be regularly commissioned in the grade of lieutenant of the junior grade after satisfactorily passing such examination to qualify for the general duties of the line as may be prescribed by the Secretary of the Navy, and having been recommended for promotion by the examining board and found physically qualified by a board of medical officers of the Navy.

Mr. WEEKS. Mr. President, this is the first attempt to inject a number of civilians into the line of the Navy. It has a great many objections, some of which I have summarized, and I should like to present them to the Senate. The objection is not based on these graduates as graduates, but arises from the fact that long experience has shown that better results are obtained from graduates of the Naval Academy.

In the early days of engineering in the Navy engineers came from civil life—mature men of some experience on shore. Later on the supply came from young men engaged either as artisans or as draftsmen in engine-building establishments, but this did not prove satisfactory. Experience obtained during the Civil War indicated the necessity for special training for the engineers of the low-powered ships of that period. Accordingly, in 1866, and for two or three years afterwards, a small number of graduates of a technical school were appointed assistant engineers in the Navy; and, while some very good men were obtained, it was realized that better results could be secured by educating our engineers at the Naval Academy. Accordingly, appointments of cadet engineers were begun in 1871 and continued thereafter until 1882, when a special course was given certain naval cadets during their last year at Annapolis.

The experience during the Civil War will illustrate the probable result of this experiment. Some very excellent men were taken into the naval service as engineers; but, on the whole, they were not of the highest type of engineers, and there were some men who were moderately inefficient. It did not present a homogeneous corps, as would have been the case if they were educated at the same institution.

Special education for engineer officers ceased in 1899. There followed at the same time a marked change in the character of our ships and of the instruction of midshipmen at Annapolis, until now every midshipman graduates with much greater engineering knowledge than was the case when two independent courses were pursued during the last year or two. I think Senators will recall many disagreements between the line of the Navy and the Engineer Corps, which very largely was the reason for bringing about the amalgamation of the force. Personally I never could have believed that there should be a separate Engineer Corps in the Navy, but as different attempts have been made to overcome the manifest objections to the present system the results on the whole have been fairly good.

About 10 years ago it became apparent that the engineering instruction given at Annapolis was not sufficient to produce the desired results along designing and constructing lines, and so postgraduate instruction was undertaken in the Bureau of Steam Engineering for a limited number of officers. This continued for two years, when a regular postgraduate course was established at Annapolis, and this has been so changed that officers now pursue the last year of the course at Columbia University.

The present plan is an admirable one; it takes an officer who has been in the service long enough, and who has shown an aptitude for engineering, sends him back to school with practical experience to study the broad principles of design, and returns him to the service with an equipment whose value to the Navy it would be difficult to estimate.

Taking graduates from technical schools will have the following effect:

(a) It will amount practically to the creation of another engineer corps, with all the objectionable features of the past.

(b) It will discourage young officers from pursuing engineering, because they will look upon it as the prerogative of the graduate of the technical school.

(c) It will thus indirectly deprive line officers of experience which is very necessary for them to have to become efficient commanding officers.

(d) It will have a discouraging effect on the warrant machinists in the service to see young men who know nothing about a ship or her machinery placed in positions of authority over them. They will resent it.

The entry of these young men is undesirable for the following reasons:

(e) They are unaccustomed to discipline and will enter the Navy at an age at which young men do not readily respond to discipline.

(f) They are unfamiliar with the Navy and with naval vessels, and it will take a long time to make them of much value.

(g) They lack a knowledge of marine engineering—few technical schools give any instruction in it and few are qualified to do so.

(h) They lack knowledge in handling men, which is a matter of prime importance, and which is instilled into the Annapolis man from the time he enters the Naval Academy.

(i) Experience during the Spanish War showed that the technical-school man would require a long period of training to make him of real assistance.

(j) Annapolis is now turning out 150 officers a year more than the waste. In a few years this will reach 225 to 250, and then we shall reach a condition where no vacancies exist and yet will be taking in young men from civil life. The congestion in the lower grades will be something appalling.

(k) In case of emergency, it has always been customary to send out to service at least two classes from the academy. This would have the effect of immediately putting in the service about 500 officers, all of whom would be much better prepared for the duty required of them than the technical-school men. If necessity demanded it, another class might be sent, and this class would probably do somewhat better duty than the technical man because of their familiarity with the Navy and with naval vessels, having made one practice cruise.

For all these reasons, Mr. President, it seems to me extremely undesirable to start this kind of a corps of men coming from such a source in the Navy. My judgment is that one of the weakest features of the Army has been that there are so many untrained civilians who have been taken into the military service because they can pass the prescribed examination. If the officers had been taken from the ranks, or if they had been graduates of the Military Academy, the average efficiency of the officers of the Army would be higher. This not only will give us any number of officers of less efficiency than otherwise would be the case, but it will be a real discouragement to men who enter the service in the engineering department, who become machinists, and who might become officers under the provisions of the law.

On the whole, I hope the Senate will vote to eliminate from the bill what I think is a dangerous undertaking.

Mr. SWANSON. Mr. President, there is no provision of the bill, I believe, which is more important to give us a competent and efficient Navy than this one. It provides that for 10 years the Secretary of the Navy from competitive examination can appoint 30 officers who shall be entered. They must be graduates of colleges in electricity and engineering. They must have a degree and be efficient in that respect before they enter the competitive examination. Then they must serve two years on a battleship. Then after they serve two years they must go to the academy for one year, and after they have served a year satisfactorily on a battleship and gone to the academy one year and have stood an examination satisfactorily they are commissioned as junior lieutenant of Engineers.

What is the condition of the Navy in reference to officers to-day? We have 1,978, say 2,000, officers of the line. We fix a basis of 4 per cent, which is the smallest number there can be with a degree of safety to have our Navy well officered. That would give 1,000 additional officers whom we need to-day, not

to-morrow, not two years, not three years, but to-day. We have put that in the bill. That is what most navies need. What is this proposition?

Mr. WEEKS. If the Senator will pardon me, it provides for the appointment of only 30 a year, and the Senator will recall that we have nearly 800 midshipmen at the Naval Academy and will have a thousand there within a year.

Mr. SWANSON. If the Senator will permit me, this is as many as will be needed for this purpose. We have endeavored to supply the needs of the Navy for officers. Shall we wait until all these men can graduate in four years before you can have your Navy properly manned with officers? Not all of them, but there are some of the men who graduate at the Naval Academy who resent the idea of a man from civil life entering the aviation service, the engineering service, or the electric service. They want to have this service reserved entirely for graduates of the Naval Academy. We need engineers to run battleships: That is as important as a captain. A battleship is entirely dependent upon the electrical and steam engineering. A battleship is useless unless you have an expert engineer in electricity, in steam, in coal, and in fuel. The Naval Academy graduates must usually have an experience of several years before they are thoroughly equipped in engineering in connection with the machinery of a great battleship. One of the urgent needs is to get this class of people outside who will come into the Navy. How is the best way to get them? First, we require them to be graduates of a college with the requirements needed in electricity and in engineering and to run the machinery of a great battleship. That is the first requisite. The second requisite is that you must have competitive examinations and get the best at the college. I am satisfied that if this is done you will have better men to take charge and erect the machinery of these great battleships than we have to-day.

Now, what else do we do? After they have graduated at school and taken a degree, in order to get the military spirit at the Naval Academy we will require them to go there for one year in a course marked out. After that is done they must show themselves worthy to be junior lieutenants.

In the letter read by the Senator, which he said was written to him, or rather a memorandum—that was before the Senate committee amendment was prepared and introduced and adopted by the committee. We desired to get rid of the old fight beween the Engineer Corps and the line. Many worthy naval officers objected to the provision, and so did members of the committee, until we devised a method to get rid of it. After they have graduated at college and taken a two years' course in sailing and one year's course in the Naval Academy, they are fitted in every respect to be line officers in the Navy of the junior grade. They go through as good a course for the purpose needed as is prescribed at the Naval Academy, and you get rid of the old difference that used to exist between the line and the staff.

The Senator was mistaken when he said that they enter the service as line officers, junior lieutenants. Nearly all of the objections formerly to the provision as it passed the House I have heard from naval men has been eliminated since we require them to remain in the Naval Academy for one year, and we make them line officers so as to get rid of the old fight between the Engineer Corps and the line corps. I am satisfied the best interest of the country will be subserved by pursuing that course. I believe these officers are needed. I know of no better way to get good engineers who will know all about the machinery of great battleships than the course here pursued. Then we require them to go to the Naval Academy and stand an examination, and after they have done that they are worthy to be junior lieutenants in the Navy.

Mr. WEEKS. The number of officers in the Navy is now about 2,000. The number of officers who will be required under the provisions of this act will be about 2,800. This provision which is inserted in the bill——

Mr. SWANSON. This will give in 10 years 300 officers specially educated in engineering.

Mr. WEEKS. What I want to call the Senator's attention to is that it takes 10 years to get 300 officers, who, he says, are greatly needed at this time. We have 2,000 officers. We have 800 men at the Naval Academy. With all who will be graduated within 4 years, some of them next year, we will increase the number so that within 10 years we will graduate from the Naval Academy at least 1,200 men. That will make 3,200 officers in round numbers in the Navy. Four per cent of the enlisted force of the Navy would be 2,800 officers. So in the course of four or five years we are going to have commissioned officers in the Navy up to the requirements of this law; yet the Senator is arguing that these men are necessary, and necessary at once, when it will take 10 years to produce 300.

I do not expect my voice to be heeded, but I warn the Senate that this is the first attempt to inject politics into the line of the Navy, and it is one of the most fatal steps that could be taken. We have had politics in the line of the Army, and we have had too much of it, but it has never been in the line of the Navy.

Mr. SWANSON. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Massachusetts yield to the Senator from Virginia?

Mr. WEEKS. Let me finish what I am saying.

The PRESIDING OFFICER. The Senator from Massachusetts declines to yield.

Mr. WEEKS. We have had too much in the Army, and we never have had any politics in the line of the Navy.

The Senator talks about differences between the Engineer Corps and the line of the Navy. The amalgamation was made in 1900. Every man in the Navy now is a line officer. There is no Engineer Corps per se. The engineers are detailed from the line of the Navy.

There can not be under present conditions any possible difference between the Engineer Corps and the line. Yet we are injecting by this provision in the bill a cause for difference which we will hear from in the future. I regret exceedingly that the committee has seen fit to favor something which, in my judgment, is sure to inject politics into the line of the naval service.

Mr. NELSON. Mr. President, it is hard for me to see how this could inject politics into the Navy. How can the taking of men from civil life, who are otherwise competent, into the Navy savor of politics? The argument of the Senator seems to savor of the gospel that no one can enter the Navy as an officer unless he comes from out the gates of Annapolis. It is that old exclusive spirit which pertains to the graduates of these institutions. They want nobody else to come into the service through their door and in their garb and with their equipment.

I take it that we have institutions in this country that can prepare graduates and instruct young men who will make competent engineers. They are appointed in the first place on trial. They have to be two years at sea and then supplement that with a year of instruction at the academy. In God's name, is that a dangerous matter for the Navy?

Mr. SWANSON. Mr. President, this is a very important matter. The general complaint in the Navy to-day is in regard to the matter of engineering officers. A man who is chief engineer of a battleship is as important as a captain, because, as I said before, unless you have an expert engineer the battleship can not be run well and splendidly.

We provide in the bill that after naval officers pass to the grade of lieutenant commander they can specialize and become engineers. Now, why? It is because after they pass the grade of lieutenant commander they are really eligible to be chief engineers on one of the great battleships, and after they have shown a disposition to go in that direction they specialize, so that the battleship will not be at the mercy of an engineer who is incompetent and incapable.

The object is to get men into the Navy in a way that will make competent those who have a special talent for engineering. A great many of these men have applied, possibly, for admission to the Naval Academy, but they could not get the appointment, and they went into engineering schools connected with engineering appertaining to the Navy. This is a good way to get every year, in addition to the officers needed, 10 men whose specialty, whose thought, whose ambition and ideas have been directed toward engineering.

All the officers of the Navy in these various bureaus, the Bureau of Steam Engineering and others, have told me that the greatest need of the Navy to-day is good, expert, competent engineers. It seems to me we should give heed to a recommendation when it comes from that source and we should do what would give the Government each year young men who would make splendid engineers.

Now, the Senator talks about politics.

Mr. WEEKS. May I ask the Senator a question?

Mr. SWANSON. I yield.

Mr. WEEKS. Does the Engineer in Chief of the Navy recommend this?

Mr. SWANSON. Admiral Griffin, if I mistake not, is in favor of it. I think he appeared before us and said that one of the greatest needs is engineers.

Mr. WEEKS. Yes; but did he recommend it?

Mr. SWANSON. The Secretary of the Navy, after consulting with his board or his chiefs of bureaus, strongly recommended it. I can not see how anybody can be hurt except people who want to give an absolute monopoly to the Naval Academy. They go through a college, they take a course and graduate and receive a degree of mechanical or electrical engineer, and then they must take one year's course at the Naval Academy. How can there be any politics in it when the Secretary of the Navy

under the provision of the bill would appoint them in the order in which they make their mark in the competitive examination?

The Senator left the impression that the Secretary of the Navy could appoint each year whom he pleased. The law is not drawn that way. He appoints them as a result of a competitive examination and in the order in which they stand in that examination, and those are to be graduates of colleges before they enter the examination, and from those he makes the selection.

The PRESIDING OFFICER. The question is on the adoption of the amendment proposed by the Senator from Massachusetts [Mr. WEEKS].

The amendment was rejected after a division.

Mr. POINDEXTER. Mr. President, in connection with the remarks of the Senator from Oregon [Mr. CHAMBERLAIN] a while ago about the Puget Sound Navy Yard, and the testimony of Admiral Benson on that subject, I ask leave to have printed in the RECORD a report from the Senate Committee on Naval Affairs to accompany Senate bill 4505. It is a brief report, and contains the testimony of a number of naval authorities on the question.

The PRESIDING OFFICER. Without objection, the report referred to will be printed in the RECORD.

The report referred to is as follows:

PUGET SOUND NAVY YARD.

Mr. POINDEXTER, from the Committee on Naval Affairs, submitted the following report to accompany S. 4505:

The Committee on Naval Affairs, to whom this bill (S. 4505) was referred, reports the same back to the Senate with the recommendation that it pass The report of the Secretary of the Navy to whom the bill was referred is as follows:

FEBRUARY 25, 1916.

SIR: Senate bill 4505, appropriating money to equip Puget Sound Navy Yard for battleship construction, which was referred for the views of this department, is fully concurred in. The amount specified, $2,065,000, appears to be the correct amount according to the estimates received for equipping the Puget Sound Navy Yard for the construction of a battleship.

I am of the opinion that it is very desirable to equip the Puget Sound Navy Yard for the construction of a battleship, and, should the bill pass and the appropriation become immediately available, steps will be taken to expedite the work.

Sincerely, yours, JOSEPHUS DANIELS.

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
United States Senate.

Admiral Stanford, of the United States Navy, assigned to the navy yard at Philadelphia, before the House Naval Affairs Committee January 5 and 6, 1916 (hearings before the Committee on Naval Affairs, pp. 20 and 35), testified as follows:

"Mr. CALLAWAY. Mr. Chairman, may I ask how many navy yards have we that our big ships can get into? I have been informed that we only have four—Norfolk, New York, San Francisco, and Puget Sound.

"Admiral STANFORD. We have only one thoroughly reliable and excellent deep-water station, and that is Puget Sound. There is difficulty in getting into the New York yard at times. At some times it will happen you have to lay to outside the San Francisco Harbor before entering, because of sea or fog. The Philadelphia Navy Yard is 90 miles from the Capes, and there is a portion of the river between those two points which, under certain tidal conditions, would barely pass our largest vessels. At the Norfolk yard dredging is required in the river in front of the yard, and also a widening of the channel is required.

"Mr. ROBERTS. Please continue with the controlling depth of water at the other yards.

"Admiral STANFORD. At Puget Sound the controlling depth of water from the yard to the sea is over 40 feet. The controlling width of the channel is 980 feet and the mean rise and fall of the tide is 7.8 feet.

"Mr. BUTLER. Ought we not to have two first-class naval stations on the Pacific?

"Admiral STANFORD. I think so, without question.

"Mr. BUTLER. We have one at Bremerton.

"Admiral STANFORD. Bremerton is a suitable place.

"Puget Sound Navy Yard is the only navy yard on either coast of the United States which is thoroughly adapted in its natural condition without artificial dredging for the reception of the largest battleships afloat. At the same time, being on an inland water, a protected arm of the sea, it is perfectly secure against hostile attacks. With our growing interests in the Pacific it is essential that we should be fully prepared to defend our possessions and rights in that quarter. This will be greatly facilitated by having a navy yard on that cost equipped for the construction of the largest war vessels. It is especially appropriate at this time to begin the equipment of this navy yard for that purpose in view of the fact that the Atlantic coast is already prepared in that regard, the navy yard at New York having been provided for in this respect."

The following extracts are made from recent testimony before the Committee on Naval Affairs of the House of Representatives:

"Admiral BLUE. It is an ideal yard and should be fully developed. Our largest dry dock is located there and all buildings are new and modern."

"Admiral STRAUSS. An ideal yard and well protected. With the torpedo station at Keyport, only 7 miles away, and a fully equipped plant at Bremerton, it will be a model and useful naval station. It should be fully equipped."

"Admiral TAYLOR. It is a very satisfactory yard, well located, and should be developed to its fullest capacity."

"Admiral BADGER. A very fine yard and is the only yard that vessels can go into at any time of the day, excepting, of course, in a dense fog."

"Admiral WINSLOW. If you are going to equip any of the yards for construction, this one should be so equipped. A large force of well-trained workmen there would be a great advantage in case of trouble in the Pacific. At this time it is the only place on the Pacific that our largest and deepest draft vessels could be taken into."

Mr. PHELAN. Mr. President, for the information of the Senate on the subject of an amendment offered by the Senator from Nevada [Mr. PITTMAN], I submit a communication and ask that it be inserted in the RECORD.

The PRESIDING OFFICER (Mr. POMERENE in the chair). Is there objection? The Chair hears none, and permission to do so is granted.

The communication referred to is as follows:

Hon. JAMES D. PHELAN,
United States Senate.

SIR: I have sent this letter to Hon. Samuel Gompers, James O'Connell, Secretary Daniels, Hon. BENJAMIN TILLMAN, and Hon. CHARLES CURRY:

JULY 3, 1916.

Hon. JAMES O'CONNELL,
President Machinists' Union, American Federation of Labor, Washington, D. C.

DEAR SIR: You will remember me as being Secretary of the Vallejo Chamber of Commerce in 1901, when I started the national fight for building ships in the navy yards.

I desire at this time to call your attention to a matter of the most vital importance to organized labor and a matter which brooks no delay in action.

Some time between 1898 and 1900 Congressman Mudd, of Maryland, introduced into Congress and had passed a bill giving 15 days' leave of absence to all employees of the navy yards with full pay.

When I was making the fight as the secretary of the chamber of commerce through the Vallejo Labor Council and the American Federation of Labor for the building of ships in the navy yards one of the strongest arguments the Shipbuilding Trusts had against us was the overhead charge of 15 days' leave of absence with full pay and the holidays with full pay, making 22 days' absence with full pay.

They claimed we could not build ships as cheaply with that overhead as could be built by private contractors. You fully remember the fight we had and that two ships were ordered constructed as a test, one at the Brooklyn yard and one at the Newport News.

When Congressman Mudd introduced and had passed the bill giving the leave of absence with full pay he did not do it for the good of the mechanics of the country; he did it in the interest of the shipbuilding combine, as I have expressed in all the cards and information I sent to Congress. He was a false friend to labor.

Since that time, through the fight we all made, ships have been and are being constructed in the navy yards, and done successfully.

At the present time we have bid at the Mare Island Navy Yard for the building of the dreadnaught *California* $1,100,000 less than the contractor could build the ship for, and we got the contract.

In every instance, on all work for the War Department, in the repairs of the Government transports we have had to bid against private yards to get the work; we have had to bid for the Navy Department against the private shipbuilders, and if our bid was the lowest, then we got the work; if not, then the private yards got it.

Now I desire to call your attention to a matter of vital importance to us all and to the American Federation of Labor.

In the present Congress they have passed a bill in the House giving the private ship builders 20 per cent bonus for completing the ships on contract time.

In 1895 they were given speed premiums, and I had that knocked out, through Congressman Holman, of Indiana, known as the "Bulldog of the Treasury."

Now, the shipbuilding combine are back again with a bonus proposition, and if they should get it on such a ship as the *California* it would amount to $1,600,000. What a swell profit to gouge the National Treasury out of.

Now, Congressman TALBOTT, of Maryland, has introduced into the House, and it has been passed, a bill giving the men employed at the navy yards 30 days' leave of absence with full pay; this, with the 7 days' holidays with full pay, with the half holidays on Saturdays with full pay for 3 months in the year, gives them 43 days a year with full pay.

How are we to complete the *California* at Mare Island, or the *Pennsylvania* at the Brooklyn yard with that overhead? Can we complete them within our bids? The increased pay we have to give on account of the activity in shipbuilding and the increased cost of material bars us from completing that ship within the contract price.

The greatest activity ever shown by Congress in the building of the Navy is shown in this Congress, and the shipbuilding combine are getting ready, and they are using the 30 days' leave with pay to put the navy yards in a position where they can not bid successfully against them. They have planned the greatest raid ever made on the National Treasury, and doing it by making Congress believe that they are the friends of organized labor.

With the 43 days' leave with pay figuring against the navy yards bidding and the 20 per cent bonus, they will have the sweetest pickings they have ever had.

I have been figuring as the present Congress has passed a blanket appropriation of six million to equip the Boston, Norfolk, and Bremerton yards for capital shipbuilding, we had them beat to a finish, for I figured that they could not compete against us, and all the ships in the future would be built by the navy yards.

But TALBOTT'S bill passed the House with a big majority, and I can see that we will not have the building of the ships in the future, for any intelligent man can see we can not build a ship as cheaply at the navy yards as by contract if we have 43 days with full pay overhead against us.

In 1902 the matter was taken up by the Vallejo Council, and they passed resolutions asking for 30 days' leave with pay. I called your attention to the matter, also Mr. Samuel Gompers, and the matter was ditched.

You should get busy immediately in the Senate and beat this bill, for it is not framed or is it in the interest of the workmen of the country. It will bar us from building ships at the navy yard.

I sincerely hope you will give this matter immediate attention, for you know my record. I desire to see the navy yards build the ships, for more men will be working eight hours a day, and they will get better pay and better conditions than if working for the contractors; but if the present bill passes, good-by to shipbuilding in the navy yards.

Yours, truly,

GEO. J. CAMPBELL,
Ex-Secretary Vallejo Chamber of Commerce.

Mr. OVERMAN. Mr. President, I offer an amendment, to which I call the attention of the Senator from Virginia.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 131, line 20, after the word "Navy," it is proposed to insert:

Commander George N. Hayward, retired, to be a captain on the active list, to take rank next after Capt. Lloyd H. Chandler, United States Navy.

Mr. SWANSON. I accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SWANSON. I inquire if there are other amendments to be offered by Senators? I understood the Senator from Oregon [Mr. CHAMBERLAIN] had an amendment which he desired to offer.

Mr. CHAMBERLAIN. My colleague [Mr. LANE] has one.

Mr. CUMMINS. Mr. President, is it to be understood that no amendments are to be offered after this evening?

Mr. SWANSON. No; but I should like to dispose of as many amendments as I can this afternoon before adjournment. Of course amendments are in order until the bill is passed.

Mr. CUMMINS. I shall probably have an amendment to offer on Monday morning.

Mr. SWANSON. I will inquire of the Senator from Oregon [Mr. LANE] if he has an amendment which he desires to offer at this time?

Mr. LANE. I desire to offer an amendment, but I am not ready to offer it at this time. I have been confined to my house for a day or two by illness, and did not suppose that there would be opportunity to offer the amendment before Monday. I have not a copy of it at hand.

Mr. CHAMBERLAIN. I suggest, in view of my colleague's illness for the last two days, that the matter go over until Monday.

The PRESIDING OFFICER. Is there objection?

Mr. SWANSON. The Senator from Oregon has a right to offer the amendment on Monday. I simply wanted to know if there was any other Senator who now desired to offer an amendment.

Mr. LANE. When I offer the amendment I wish to discuss it at considerable length.

Mr. SWANSON. If there is no Senator who desires to offer an amendment, I will move that the Senate take a recess.

Mr. SMOOT. I suggest to the Senator that he make a motion to adjourn.

Mr. GALLINGER. There was a tacit understanding that we should adjourn.

Mr. SMOOT. That will enable us to have a morning hour on Monday.

Mr. OVERMAN. There is a desire for a brief executive session.

EXECUTIVE SESSION.

Mr. SWANSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session, the doors were reopened.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that Mr. SUMNERS, Mr. ASWELL, and Mr. SMITH of Minnesota had been appointed managers at the conference on the part of the House on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, and for other purposes, in the place of Mr. HELM, Mr. HOUSTON, and Mr. HINDS.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 2845) authorizing the sale of the marine-hospital reservation in Cleveland, Ohio, and it was thereupon signed by the Vice President.

RIVER AND HARBOR APPROPRIATIONS.

The VICE PRESIDENT. According to law, the Vice President announces his signature to the enrolled bill H. R. 12193, an act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

THE BOTANIC GARDEN.

Mr. GALLINGER, from the Committee on the Library, to which was referred the bill (S. 6227) to increase the area of the United States Botanic Garden in the city of Washington, D. C., reported it with an amendment and submitted a report (No. 671) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES:

A bill (S. 6656) granting an increase of pension to William Dougherty (with accompanying papers); to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 6657) authorizing the appointment of Frank Russell Weeks as captain of Field Artillery, United States Army; to the Committee on Military Affairs.

By Mr. WARREN:

A bill (S. 6658) for the relief of settlers and homesteaders who have taken timber from the public domain without intention of trespass; to the Committee on Public Lands.

By Mr. POMERENE:

A bill (S. 6659) to authorize the President to reinstate Guy H. B. Smith, formerly captain, Fourth United States Infantry, in the Army; to the Committee on Military Affairs.

WITHDRAWAL OF PAPERS—MARY C. COLEMAN.

On motion of Mr. TAGGART, it was

Ordered, That the papers in the case of the bill (S. 4035, 64th Cong., 1st sess.) granting a pension to Mary C. Coleman be withdrawn from the files of the Senate, no adverse report having been made thereon.

CONSTRUCTION OF DAMS.

The VICE PRESIDENT laid before the Senate the amendment of the House to the bill (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce.

Mr. CLARKE of Arkansas. I move that the Senate disagree to the amendment and request a conference with the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Vice President appointed Mr. SHIELDS, Mr. BANKHEAD, and Mr. NELSON conferees on the part of the Senate.

LANDS AT MYTON, UTAH.

Mr. SMOOT. The bill (S. 35) to authorize the Secretary of the Interior to issue patents for certain lands to the town of Myton, Utah, was passed by the House with an amendment. The Senate disagreed to the amendment of the House and requested a conference. I have been authorized by the conferees to report back the bill to the Senate and to move that the Senate recede from its disagreement to the amendment of the House.

The VICE PRESIDENT. The Senator from Utah moves that the Senate recede from its disagreement to the amendment of the House and concur in the amendment. The Chair hears no objection, and the bill stands passed.

LANDS AT DUCHESNE, UTAH.

Mr. SMOOT. The bill (S. 36) to authorize the Secretary of the Interior to issue patent to certain lands to the town of Duchesne, Utah, was passed by the House with an amendment in which the Senate disagreed and requested a conference. I have been authorized by the conferees to report back the bill to the Senate and to move that the Senate recede from its disagreement to the amendment of the House.

The VICE PRESIDENT. Is there any objection to the motion of the Senator from Utah? The Chair hears none, and the bill stands passed.

STANDARDIZATION OF LIME BARRELS.

Mr. CLAPP submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 5425) to standardize lime barrels having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendments of the House numbered 1, 4, 5, 6, 7, 8, and 9 and agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment, as follows:

"SEC. 2. That it shall be unlawful for any person to sell or offer for sale lime in barrels for shipment from any State or Territory or the District of Columbia to any other State or Territory or the District of Columbia without first by stencil or otherwise clearly marking on one or both heads of the small

barrel the figures '180 lbs. net' and of the large barrel the figures '280 lbs. net' and on either barrel in addition the name of the manufacturer of the lime and where manufactured and, if imported, the name of the country from which it is imported."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 3, and agree to the same with an amendment as follows:

"SEC. 3. When lime is sold in interstate or foreign commerce in containers of less capacity than the standard small barrel, it shall be sold in fractional parts of said standard small barrel and the net weight of lime contained in such container shall by stencil or otherwise be clearly marked thereon, together with the name of the manufacturer thereof, and the name of the brand, if any, under which it is sold and if imported, the name of the country from which it is imported."

And the House agree to the same.

MOSES E. CLAPP,
J. H. BANKHEAD,
Managers on the part of the Senate.
WILLIAM A. ASHBROOK,
JOHN W. ABERCROMBIE,
C. F. REAVIS,
Managers on the part of the House.

The report was agreed to.

Mr. JONES subsequently said:

Mr. President, a few moments ago a conference report on the bill (S. 5425) to standardize lime barrels was adopted on motion of the Senator from Minnesota [Mr. CLAPP]. At his request I desire to say that a mistake was made. I therefore move that the Senate reconsider the vote by which the conference report was agreed to, and I ask that the Secretary be directed to request the House of Representatives to return to the Senate the message showing the agreement of the Senate to the report of the committee of conference.

The VICE PRESIDENT. Without objection, the House of Representatives will be requested to return to the Senate the conference report.

Mr. SWANSON. I move that the Senate adjourn.

The motion was agreed to; and (at 4 o'clock and 30 minutes p. m., Saturday, July 15, 1916) the Senate adjourned until Monday, July 17, 1916, at 10 o'clock a. m.

NOMINATIONS.

Executive nomination received by the Senate July 15 (legislative day of July 14), 1916.

JUDGE OF COURT OF CLAIMS.

James Hay, of Madison, Va., to be judge of the Court of Claims, vice George W. Atkinson, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 15 (legislative day of July 14), 1916.

POSTMASTERS.

CALIFORNIA.

Robert E. Walsh, Angels Camp.

IOWA.

J. J. McManus, Ossian.
Edgar F. Medary, Waukon.

KANSAS.

Robert Shouse, Ellinwood.

NORTH DAKOTA.

Henry E. Brown, Buffalo.

SOUTH CAROLINA.

Achilles W. Knight, Bamberg.

TEXAS.

Kenneth T. Biggs, Sabinal.
J. G. Lewis, Walnut Springs.
George D. Staton, Grand Saline.

VIRGINIA.

John D. Shepperson, Charlotte Court House.

WASHINGTON.

William F. Brown, Renton.
Clarence A. Morgan, Hoquiam.
Mabel Murphy, Marysville.

HOUSE OF REPRESENTATIVES.

SATURDAY, *July 15, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Eternal and ever-living God, source of all our longings, hopes, and aspirations, hold us, we beseech Thee, close to Thee, lest we, in our anxiety to succeed, forget our obligations to Thee and our fellow men and do the ignoble, the unjust, which is subversive, destructive to the higher life as we know it in Christ Jesus our Lord. For Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed joint resolution and bill of the following titles, in which the concurrence of the House of Representatives was requested:

S. J. Res. 150. Joint resolution to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal area; and

S. 5752. An act granting to the widow of Col. David Du B. Gaillard authority to place in his memory a tablet in the Memorial Amphitheater at Arlington, Va.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 11261. An act for the relief of Mary S. Corbin; and

H. R. 11262. An act for the relief of Mrs. C. D. Corbin.

The message also announced that the Senate had insisted upon its amendment to the bill (H. R. 449) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10, disagreed to by the House of Representatives; had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CHAMBERLAIN, Mr. FLETCHER, and Mr. NELSON as the conferees on the part of the Senate.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 5752. An act granting to the widow of Col. David Du B. Gaillard authority to place in his memory a tablet in the Memorial Amphitheater at Arlington, Va.; to the Committee on the Library.

S. 5424. An act to construct a bridge in San Juan County, State of New Mexico; to the Committee on Indian Affairs.

LEAVE OF ABSENCE.

By unanimous consent, Mr. COOPER of West Virginia was granted leave of absence for one week, beginning Saturday, July 15, 1916, on account of important business.

ORDER OF BUSINESS.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. We have a special privileged status bill which was under consideration yesterday in the Committee of the Whole House on the state of the Union. I think that is where it should be considered, but I notice it was referred to the House Calendar. It is a Union Calendar bill. I take it if we should now transfer it to the Union Calendar it would not interfere with our proceedings.

The SPEAKER. Not a particle.

Mr. MANN. I ask that it be transferred to the Union Calendar.

The SPEAKER. The gentleman from Illinois asks that this bill (H. R. 15842) be transferred to the Union Calendar. The Chair supposed it was there all the time. Without objection it is so ordered.

There was no objection.

CAMPAIGN CONTRIBUTIONS AND EXPENDITURES.

Mr. RUCKER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15842.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15842, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes.

Mr. LEWIS. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. LEWIS: Page 14, line 10, after the word "Senator," insert "his wife or relatives," and in line 11, page 14, after the word "shall," insert "individually or collectively"; and on page 14, line 13, after the word "Representative," insert "his wife or relatives," and after the word "shall," in the same line, insert "individually or collectively."

Mr. LEWIS. Mr. Chairman, the object of this clause is, of course, to restrain a candidate individually interested in his success from excessive expenditures of money in prosecuting his campaign. His wife has the same interest in his success. She is unrestrained by the section as it stands. His brother, his father, his son, and other relatives may have, indeed, the same interest in his success that he has. All of his relatives likewise are unrestrained by the provision of this bill as it stands, and the object of the amendment, therefore, is to restrain all persons who are under this peculiar temptation to the use of money in the conduct of elections. A provision applied to the wife and the father and the son is as much called for and would likely prove as efficacious in restraining the evils of the excessive use of money in elections as a restraint upon the candidate himself. Members of the House know that it frequently happens that a candidate himself is without special means, without those circumstances of fortune which would enable him to violate the correct rules of public conduct in this matter, when his father, his wife, or some relative, equally interested and interested in the same way, may have boundless funds. If it be desired to correct the evil of the excessive use of money under those circumstances the amendment should be adopted to include such persons as well as the candidate himself. I submit this is a very proper amendment, and I believe the chairman of the committee, in view of the object he is endeavoring to obtain by this clause, might be willing to accept it.

Mr. SANFORD. Will the gentleman yield?

Mr. LEWIS. I will.

Mr. SANFORD. Will the gentleman make a little clearer what degree of relationship he has in mind? Does the gentleman have in mind the relationship of both consanguinity and affinity, or only blood relation?

Mr. LEWIS. I think that would have to be left to the existing decisions of the courts on the subject.

Mr. SANFORD. Does not the gentleman realize the courts can not very well deal with the question unless you make it clear whether it is a matter of affinity or consanguinity?

Mr. LEWIS. The courts have already dealt with the word relative, of course, primarily in other connections, and the definition of the word "relatives" which they have laid down would be in pari materia in interpreting this clause.

Mr. SANFORD. What is the gentleman's definition of the word "relatives"?

Mr. LEWIS. I do not care now to make a definition.

Mr. SANFORD. I think the gentleman will find there is just as much trouble to find a definition from the courts for the word "relatives."

Mr. LEWIS. We all realize that the less money that is spent under these circumstances all the better, and if it be that a second cousin or a third cousin, if that be the proper characterization of relationship, were included under the prohibition of this clause, no public harm would be done.

Mr. CHIPERFIELD. Will the gentleman yield?

Mr. LEWIS. I will.

Mr. CHIPERFIELD. Is it the opinion of the gentleman that this body can lawfully provide that a man who happens to be related to a candidate can spend no money at all in his behalf? Is not that an unreasonable infringement on the right of a citizen interested in the outcome of political affairs?

Mr. LEWIS. It is my opinion that the Congress, having power to deal with this subject, if it has power at all, can prohibit the use of money entirely; can determine by whom and under what circumstances it shall be contributed or expended. The power of Congress over this subject is plenary if it has any power at all.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I do not know at times whether I have any desire to make this bill a workable bill or not, because it seems to me it has so many foolish things in it that nobody can comply with, and yet when a proposition like this comes up, which is liable to put every Member of Congress in the position of defending himself as a criminal or claimed criminal, it seems to me we ought to hesitate a moment. Here is a proposition which limits the amount of money which a candidate for Congress can expend. The gentleman proposes now to include in that limit what his wife or any relative may spend. As to the candidate himself, certain personal expenses for traveling, and so forth, are not included, but as to wife or relative, those are not exempt. So that here is a candidate for Congress who spends $2,000, with a limit of $2,500. He does not know and he can not know whether some relative has spent $500 or not. If a relative spends $500 the relative must make a report, but the candidate for Congress can not know in advance. It is impossible for him to know, and yet, not knowing, he is subject to being accused as a criminal and punished. Now, what could be more absurd than that?

Many Members of this House will expend close to the limit. Most of them will expend more than the limit, but most of them will report close to the limit. And yet if a man reports that he has expended $2,450 under the terms of this bill for legitimate expenses for his nomination and election, he may be sent to jail because John Jones, related to him, has spent over $50. He may have spent it for the very purpose of sending some relative, whom he does not like, to jail. What could be more absurd than that?

Mr. LEWIS. Mr. Chairman——

The CHAIRMAN. All debate on this amendment is exhausted.

Mr. LEWIS. I move to strike out the last word in reply to the gentleman from Illinois.

The gentleman's test about absurdity, I think, raises a very proper line of inquiry here, and while we are pursuing that line of inquiry I want to ask the House what is more absurd than putting this restraint of $2,500 on the candidate himself, while perhaps a millionaire father or a millionaire wife who may spend $250,000 or $1,000,000 are completely exonerated from any of the restraints of this act?

Mr. CHIPERFIELD. Will it annoy the gentleman if I ask a single question?

Mr. LEWIS. No.

Mr. CHIPERFIELD. Take a situation such as existed in the State of Illinois when Raymond Robbins was running for United States Senator. It is my information—and I will make it very brief—that the Joseph Fells Association spent a large amount of money in that State in his behalf. Would you prevent that by the operation of this bill?

Mr. LEWIS. I do not know enough about the circumstances to pass upon the case the gentleman submits, and I would rather not.

Mr. CHIPERFIELD. Then I will not press the inquiry.

Mr. LEWIS. Of course, any provision of law can be given imaginary applications—long-drawn applications—which may for the moment make it seem absurd; but judges and juries are not absurd in the applications of law, certainly not absurd enough to convict a candidate of a violation of this law because some relative has contributed money to his campaign when he was completely ignorant of the fact. No jury or court would be absurd enough to make such an application. Intention and knowledge are involved in the commissions of crime, and, of course, Members of the House are well acquainted with this fact. If the House wants to save this bill in this respect, at least from the obvious charge of absurdity, it needs to put on the restraints which are suggested by this amendment. Otherwise its operations will be discriminating in character and wholly inadequate to accomplish the purpose of preventing the evil intended to be prevented.

Mr. CHIPERFIELD. Mr. Chairman, I want to speak in opposition to the amendment. Yesterday I did not feel like taking any more of the time of the committee with reference to my position upon this bill, but I would like to elucidate what I have in mind a little further this morning. It was my idea then, and it still remains my idea, that the arbitrary naming of any amount, such as is named in this bill, $2,500 in the one case and $5,000 in the other case, Congressman and Senator, respectively, is not a sound basis upon which to predicate a bill.

It is to my mind unspeakable impertinence and impudence for any man to assume that the expenditure of $2,600 in the one case or $5,100 in the other case is corruption.

I can well imagine a case where an illy disposed candidate can take $100 or $500 and do more widespread corrupting of the voters of a district or a State than a man spending $5,000 or $10,000 as a candidate for Congress or for Senator, respectively. It was my idea then, and it is my idea now, that while

we will all agree, without a single exception, that corrupt practices in elections should be prohibited, they should be prohibited not by putting an arbitrary limit upon the amount of money that may be expended, but by defining the things that can not be done by a candidate or committee, and allowing no sum of money—$2,500 or $100, or any other amount—to be spent for such improper purposes.

It is idle to say that you can not define those offenses, because they can easily be defined and prohibited, and a man should not be permitted to spend any sum of money, large or small, for any improper purposes in any election. It is idle to contend that by naming $2,500 as the limit it will insure only proper expenditures. Now, what does this bill do? This bill, among other things, cuts off the sources of information of the voter. In the State of Illinois there are some 500 Republican newspapers through whose columns it would be perfectly proper for a Republican candidate to promulgate information concerning his candidacy and a Democratic candidate would have access to about an equal number of Democratic papers in the State.

Gentlemen, I inquire of you, for you to answer by your votes, what justice is there in saying as to the expense that a man puts into advertising, where he is publicly laying his claims and his issues and his platform before the people for their final decision and consideration in the quiet of their homes before the election, that any sum of money so expended can be said to be corrupt in any way?

You can not corrupt the electorate by appealing to their intelligence. You can not deny men the right to resort to the newspapers of Illinois and any other State, so that their claims may be most widely spread and published, without cutting off a part of the source of information which should enter into the judgment of the voter when he casts his vote either at the primary or the general election.

Of course, I understand that it is fashionable at this time to rail out against these things, but I remember in the city of Chicago, when a number of men who were seeking sincerely and earnestly to redeem the city of Chicago from what they called misrule, nominated a very excellent gentleman by the name of Charles Merriam for mayor.

Julius Rosenwald and other rich men in the city interested in this candidate raised a campaign fund, it is commonly stated, of over $200,000, and not a dollar of that campaign fund was used for the purpose of corrupting any voter in all the city of Chicago.

It is not the size of the campaign fund that determines the matter, but it is the use that is made of it; and, for one, I protest against that course of action that will prevent a man from using the press of the country in its advertising columns just as fully and just as extensively as he can desire.

It is his right. Nay, more, it is the right of a voter that all the sources of information that may be available for him shall be laid before him, and the man who does not squarely submit his campaign and his issues and the things that he stands for to the consideration of the people is not doing his duty. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired. All debate on this amendment is closed.

Mr. RUCKER. Does any other gentleman want to address himself to this amendment?

The CHAIRMAN. All debate on this amendment is closed.

Mr. RUCKER. I ask unanimous consent, Mr. Chairman, to proceed for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. RUCKER. Mr. Chairman, I am in sympathy with the purpose which is sought to be accomplished by this amendment.

It will not do to deal with matters of this importance by demonstrations of feeling, sometimes indulged in as to the inequity of preventing by law a man spending money to debauch his neighbor. It might just as well be understood now as at any other time, because it is a fact that the people of this country intend to see that money is not used in as large sums as it has heretofore been used in conducting campaigns, whether it is a campaign for the Presidency or for membership in this House.

It is impossible by law to provide conditions or systems which will be universally satisfactory. We can not conceive of a plan by which we could hope to limit expenditures in campaigns which would be equitable in every locality and under every condition.

This House has within recent years dealt with questions on the floor of this House in which it was made to appear that a certain relative, a father, a rich man, had notoriously violated the law of his State; not a Federal law, because at that time we had none, but the law of his State; and this House for that reason denied a man a seat in this House. Now, we are attempting to do by law what this House has heretofore done by its vote, and I see no difference whatever in putting a limitation on a member of the family from putting a limitation on the man himself.

I do not like the phraseology of this amendment. I believe, though, if the gentleman would modify his amendment so as to provide for his wife or member of the family, and not go into the broad term "or relative," it would be an improvement, because that is too broad a term. I do not know what decisions the gentleman has referred to, but my recollection of the law is that the term "relative" can be spread so as to cover almost the entire human race. It looks to me like it is too broad.

Mr. LEWIS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. RUCKER. In a moment I will. Let me say to the gentlemen opposing this amendment that I do not believe, as the gentleman from Illinois [Mr. MANN] said a few moments ago, that the expenditures by these parties without the consent of the candidate would involve him in any liability at all.

Mr. LEWIS. I accept the expression "member of his family" instead of "relative."

Mr. RUCKER. Then I move to amend by striking out "or relative" and inserting "or member of his family."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri.

The Clerk read as follows:

Strike out the words "or relative" and insert "or member of his family."

Mr. WALSH. Mr. Chairman, may we have the section read as it will read if adopted?

The CHAIRMAN. The Clerk will read the section as it will read if adopted.

Mr. CANNON. On what page is it?

The CHAIRMAN. Page 14, line 10.

Mr. RUCKER. Mr. Chairman, if I can modify the amendment with the consent of the committee, I would like to modify it so that it would read "his wife, father, mother, or member of his immediate family."

Mr. LEWIS. I accept that.

Mr. COX. Well, that would cut out a brother or sister.

Mr. FORDNEY. Surely.

Mr. COX. I do not think that would be right.

Mr. CANNON. You can not cut out "a member of his family" and put in another member who had a wife in Washington and lives in a separate house.

Mr. COX. There is a time in our lives when brothers are of the same family, and a time when they are not; but there is no time when we are not brothers. I think that amendment should be broadened to include brothers.

Mr. FARR. Why not make it include mother-in-law? [Laughter.]

The Clerk read as follows:

Amendment to the amendment: Strike out "relative" and insert "father, mother, or member of his family."

Mr. MANN. I move to amend there by inserting "or friend."

Mr. LEWIS. Oh, the gentleman is altogether too jocular for a legislative assembly.

Mr. CANNON. Why, the whole blessed thing is a joke. [Laughter.]

Mr. LLOYD. Mr. Chairman, may I ask the gentleman a question?

Mr. MANN. It is just as easy for a friend to put up money as for a brother to do it.

Mr. RUCKER. Mr. Chairman, I ask for a vote.

Mr. McKENZIE. I should like to ask the gentleman from Illinois if the words "any person" would not cover it.

The CHAIRMAN. The clerk will report the amendment offered by the gentleman from Illinois [Mr. MANN].

The Clerk read as follows:

Amend by inserting the words "or friend," so that it will read, "father, mother, or member of his family, or friend."

Mr. WALSH. May we have the section read now as it will read if this amendment is adopted?

The CHAIRMAN. If there be no objection, the Clerk will report the section as proposed to be amended.

The Clerk read as follows:

Provided, That no candidate for Senator, his wife, father, mother, or member of his family, or friend, shall individually or collectively contribute, disburse, or expend any sum in the aggregate exceeding $5,000 in any campaign for his nomination and election; and no candidate for Representative, his wife, or relative, or father, mother, or member of his family, or friend, shall disburse or expend any sum in the aggregate exceeding $2,500 in any campaign for his nomination and election.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN].

Mr. MADDEN. I move to amend the amendment——

Mr. LEWIS. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. LEWIS. The amendment of the gentleman from Illinois [Mr. MANN] is in the third degree, and violates the rule.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MANN. It is not in the third degree at all. The gentleman offers an amendment and I offer an amendment. It is in the second degree.

The CHAIRMAN. The gentleman from Missouri has offered an amendment to the amendment, which will first be disposed of.

Mr. MANN. That can be disposed of first. I offer as a substitute for both amendments the language which the Clerk has just reported.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois as a substitute for the amendment offered by the gentleman from Maryland and the amendment from the gentleman from Missouri.

The Clerk read as follows:

Substitute the word "friend" in lieu of "member of his family."

Mr. STAFFORD. That is not the substitute.

Mr. CULLOP. Mr. Chairman, I desire to offer an amendment to the substitute.

The CHAIRMAN. Let the Clerk first report the substitute.

The Clerk read as follows:

Substitute for the amendment the word "friend," so that the section will read: "that no candidate for Senator or friend shall contribute, disburse, or spend any sum in the aggregate exceeding $5,000 "——

Mr. RUCKER. May I ask the gentleman from Illinois to restate his substitute. If not, I will restate it for him.

Mr. MANN. I offered as a substitute the language which the Clerk had just reported, the section with the proposed amendments, including mine.

Mr. RUCKER. That is what I understood.

The CHAIRMAN. The Clerk will finish reading the amendment in the nature of a substitute.

The Clerk read as follows:

"in any campaign for his nomination and election; and no candidate for Representative, or his friend, shall contribute, disburse, or expend any sum in the aggregate exceeding $2,500."

Mr. WALSH. Mr. Chairman, I rise to a point of order.

Mr. CULLOP. I offer an amendment to the substitute of the gentleman from Illinois, to strike out the word "friend" and insert the words "any person for him or on his behalf."

Mr. WALSH. I rise to a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. WALSH. That the amendment as reported by the Clerk is not the amendment which is pending, offered by the gentleman from Illinois as a substitute.

Mr. MANN. Certainly not.

The CHAIRMAN. The committee will be in order. It is impossible to hear what gentlemen are saying. As the Chair understands, the gentleman from Illinois says that the Clerk has correctly reported his substitute.

Mr. MANN. Oh, no; I have not said any such thing. The Clerk has not reported it as I offered it.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. I offered an amendment to insert the word "friend." The Clerk reported the amendment pending, with my amendment inserted, to show how the section would read as amended. Then I offered the whole thing as a substitute for what was pending.

The CHAIRMAN. The amendment ordered by the gentleman from Illinois will not be in order until the committee first disposes of the amendment offered by the gentleman from Missouri [Mr. RUCKER]. This is an amendment in the third degree.

Mr. MANN. The substitute is in order, but not to be voted on now.

The CHAIRMAN. The Chair understands the gentleman's position.

Mr. CULLOP. Mr. Chairman, I desire to be recognized.

Mr. HOWARD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HOWARD. It seems that we are hopelessly at variance here about the different amendments. For my own benefit I would like to have the amendment written out just as it was intended by the gentleman from Illinois [Mr. MANN]. I do not think the Clerk can understand it. I do not think anybody else can understand these amendments. There are half a dozen of them thrown in here at one time.

Mr. CULLOP. Mr. Chairman, I think this whole situation can be cleared up, if you strike out of the several amendments offered the persons of the family of the candidate and also the amendment of the gentleman from Illinois the word "friend," and make it read "the candidate or any other person for him or his behalf." That will get at the very kernel of the proposition the purpose that you are seeking to enact into law here. Under either of these other amendments it would be mere byplay, and it would not stop the use of money in a campaign or for a candidate under this law as it stands, or if amended as has been suggested here by the other amendments offered. Unless it is amended as I have suggested, a million dollars could be expended for a candidate, and nobody would be liable; but if you will write into it the language which I have indicated here, it will put teeth in the law and cover the question that you seek to have corrected in the enactment of this law by providing that neither the candidate nor anybody for him shall expend more than $2,500, or $5,000, or whatever the sum may be fixed. But as long as you leave it as written and as proposed to be written by these other amendments, some stranger may come along and drop into the campaign contribution box $10,000 or $20,000 or $50,000 and corrupt the election, and nothing herein prohibits such procedure, but my amendment would. It puts teeth in the law and makes it mean something.

Mr. WALSH. Mr. Chairman, will the gentleman yield at that point?

Mr. CULLOP. I yield.

Mr. WALSH. Has the gentleman noticed that on page 4 of the bill the term "person" includes a committee, and would not the gentleman's amendment preclude a committee expending any money on behalf of the candidate?

Mr. CULLOP. Oh, no. I hardly think it would be so construed.

Mr. WALSH. I think it would.

Mr. CANNON. Mr. Chairman, will the gentleman yield to me?

Mr. CULLOP. In a moment. And if it does, why should any committee expend any more than that sum in behalf of a candidate for Congress? Why should not the sum be fixed; and then, when a man becomes a candidate, he knows what he has to meet—the limit of the opposition. If he has to meet a certain sum and has not the money to compete with it, he must go out upon his record and undertake to capture the nomination or the election on his merits. Now I yield to the gentleman from Illinois.

Mr. CANNON. Mr. Chairman, will the gentleman read his proposed amendment again?

Mr. CULLOP. I do not have it here as I reported it, but it is to strike out all of the several amendments that have been offered and write in the place of them "any candidate or any person for him or in his behalf."

Mr. CANNON. If a man who was full of solitary acuteness who lives in the gentleman's district or out of his district would go down and contribute $100 and have it used in his behalf and the gentleman should be elected, although he did not know the man, it would be a good way to dispose of the gentleman, and I am not sure that he could ever be disposed of in any other way.

Mr. CULLOP. Let me say to the gentleman from Illinois, I do not think such methods will be employed in any district in the United States; and further, if on the contrary, some man gets so enthusiastic for any candidate, the candidate will soon discover the liberality of his friend and have knowledge of it, and when he is informed and does not protest he becomes a party to it and should be held responsible for the conduct as much so as if it was his own.

Mr. CANNON. But the gentleman's amendment does not provide for the knowledge.

Mr. CULLOP. Oh, but he will become a party to it. Such generosity does not exist in these days.

Mr. CANNON. Well, $10 or $5 would be enough.

Mr. CULLOP. Information will get to the candidate. It will not escape him. I apprehend no danger of that kind. Mr. Chairman, if the object of this law is to be accomplished—and we hope it will—this amendment will meet the question. It is useless to leave it as it was originally proposed, because some other member of the family than the one nominated may conduct the financial part of the campaign for him and be entirely without the scope of the law; but if the amendment I propose is written into the law, we have hemmed the proposition in so that whenever anyone is growing immensely liberal in the interest of some friend or relative who is a candidate, he will come within the purview of the law and can be prosecuted under it and the penalty of the law enforced. It will then serve the purpose intended and have a genuine purifying effect in elections. It will relieve the candidate from much embarrassment which he now suffers and much that he dislikes. This amendment, if adopted, puts teeth in the law, and with its adoption the law means some-

thing. It will accomplish the purpose for which the legislation is being enacted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. RUCKER] to the amendment offered by the gentleman from Maryland [Mr. LEWIS].

Mr. KEATING. Mr. Chairman, may we have the amendment stated?

The CHAIRMAN. Without objection, the Clerk will report the Lewis amendment and the Rucker amendment to the Lewis amendment.

Mr. MANN. I object.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri to the amendment offered by the gentleman from Maryland [Mr. LEWIS].

The question was taken, and the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the Lewis amendment.

Mr. MANN. Oh, no; the question is on the Cullop amendment to my substitute.

Mr. FOSTER. But the gentleman from Maryland offered an amendment.

Mr. MANN. We have voted upon an amendment to that. The original amendment was the amendment of the gentleman from Maryland.

Mr. FOSTER. We voted on an amendment to the amendment of the gentleman from Maryland.

Mr. MANN. The original amendment was offered by the gentleman from Maryland.

Mr. FOSTER. Yes.

Mr. MANN. And the vote was upon that amendment which the gentleman from Missouri offered to the Lewis amendment. That has been voted upon. I offered a substitute for the Lewis amendment, and the gentleman from Indiana has offered an amendment to my substitute. You have to vote upon the substitute and the amendment to it before you vote on the original amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Indiana.

The Clerk read as follows:

Amendment to the substitute of Mr. MANN: "or any person for him or in his behalf."

The CHAIRMAN. The question is on the Cullop substitute.

Mr. LEWIS. Mr. Chairman, I move to strike out the last word.

Mr. MANN. I make the point of order that that amendment is not in order. It is in the third degree.

The CHAIRMAN. The Chair hardly thinks it is an amendment to the substitute.

Mr. MANN. It is offered as an amendment to the substitute.

The CHAIRMAN. The point of order is sustained.

Mr. HOWARD. Mr. Chairman, the gentleman from Indiana stated a substitute for the amendment of the gentleman from Illinois [Mr. MANN], and in stating the substitute, as stated by the gentleman from Indiana [Mr. CULLOP], he moved to strike out all of the amendments that had been offered and substitute the language quoted by the Clerk for all of the amendments, the amendment of the gentleman from Missouri, the amendment of the gentleman from Maryland, and the amendment of the gentleman from Illinois.

Mr. CULLOP. That is it; and I make the further point of order that the point of order of the gentleman from Illinois comes too late.

Mr. FARR. It has already been sustained.

The CHAIRMAN. The gentleman can offer his amendment later if the amendment offered by the gentleman from Illinois is disposed of. The question is on the amendment by way of substitute of the gentleman from Illinois [Mr. MANN].

Mr. KEATING. Mr. Chairman, a parliamentary inquiry.

Mr. MANN. Mr. Chairman, I demand the regular order.

The CHAIRMAN. The gentleman will state the point of order.

Mr. KEATING. Mr. Chairman, the parliamentary inquiry I desire to make is this. The gentleman from Illinois offers a substitute. The gentleman from Indiana offered an amendment to that substitute. The vote should come on the amendment of the gentleman from Indiana to the substitute of the gentleman from Illinois.

Mr. MANN. That is what I stated, but the Chair did not agree with me.

The CHAIRMAN. The amendment of the gentleman from Indiana is not an amendment to the substitute, but is in the nature of a substitute itself.

Mr. KEATING. No; it is an amendment to the substitute.

The CHAIRMAN. The question is on the Mann amendment.

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 33, noes 40.

So the Mann amendment was rejected.

The CHAIRMAN. The question now is on the amendment in the nature of a substitute offered by the gentleman from Indiana.

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The question now is upon the amendment as amended by the substitute of the gentleman from Indiana.

The question was taken, and the Chairman announced the noes seemed to have it.

Mr. CULLOP. Division, Mr. Chairman.

The committee divided; and there were—yeas 40, noes 40.

The CHAIRMAN. The yeas are 40 and the noes are 40, and the amendment is agreed to.

Mr. STAFFORD. Then the amendment is lost?

Mr. CULLOP. The Chairman has the right to decide it.

The CHAIRMAN. The Chair presumes the Chair has a right to vote, and he voted in favor of the amendment. [Applause.]

Mr. MAPES. Mr. Chairman, I ask for tellers on that.

The CHAIRMAN. The gentleman from Michigan demands tellers. Fifteen gentlemen have risen, not a sufficient number and tellers are refused.

Mr. RUCKER. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amendment by Mr. RUCKER: Amend by inserting at the end of line 26, page 14, the following:

"*Provided further*, That the provisions of existing law limiting the amount that may be expended by candidates for Senator and Representative in securing nomination and election shall remain in force until January 1, 1917."

Mr. RUCKER. Mr. Chairman, I believe no explanation is needed.

Mr. CANNON. I do not know what it means. Then this law does not go into effect until that time?

Mr. RUCKER. So far as the amount is concerned.

The question was taken, and the amendment was agreed to.

Mr. MANN. Mr. Chairman, I move to amend, on page 14, by striking out, beginning in line 17, after the word "candidate," the words "to meet and discharge any assessment, fee, or charge made or levied upon candidates by the laws of the State in which he resides, or."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 14, by striking out, beginning in line 17, the following: "to meet and discharge any assessment, fee, or charge levied or made upon candidates by the laws of the State in which he resides, or."

Mr. MANN. Mr. Chairman, no assessment is levied upon a candidate unless he gets some value for it. I know of no reason why everybody should not stand upon the same footing in this matter as to the expenditure, or why, if there is an assessment levied upon a candidate, he should not report it as a part of his expenses.

Mr. RUCKER. Will the gentleman yield for a question?

Mr. MANN. I yield to the gentleman.

Mr. RUCKER. I will say to the gentleman this language was put in there for this reason——

Mr. MANN. I know why it was put in there, but I am glad to have the gentleman state.

Mr. RUCKER. In some of the States there is a nominal sum levied upon a candidate before he can get his name on the ticket. In other States it is a larger sum. If the information which has come to me is true, in one State where the law requires the candidate for Senator to be nominated by popular election, and further provides that the candidate or candidates must pay all expenses of primaries, the Senator had to pay the expenses of an election all over his State in order to be nominated under the law, and it was obviously unfair to tax that up as part——

Mr. MANN. I do not see why it would be unfair at all.

Mr. RUCKER. I will say to the gentleman the costs of the primary far exceed the limit the bill provides——

Mr. MANN. That is very well; legitimate campaign expenses somewhere else exceed the limit provided in here. Those are legitimate campaign expenses. There was in this House where under this provision, in a contested-election case, it appeared that the contestee in his affidavit of expenses showed that he had expended up to $5,000, not including an assessment which he had paid to the governing committee. Well, in that case the State law did not provide for the payment to the governing committee, but the party rules did. He thought, reading this language, that his payment to the party committee under party regulation did not have to be accounted for and not to be

allowed to cost more than this sum of money. If they have some provision in a statute somewhere soaking a Member of Congress who is a candidate and allowing only wealthy people to run, we ought to break that law. I am in favor of letting the poor man run for Congress. [Applause.] I yield to the gentleman.

Mr. TOWNER. The gentleman's statement was that it was not to be accounted for. I think that what the gentleman really meant was it was not to be included in this——

Mr. MANN. Oh, it is not to be accounted for at all.

Mr. TOWNER. I think the plain language is it is not to be included in the $2,500 and $5,000 limitation.

Mr. MANN. Oh, well, the gentleman is not very careful. It does not include his stationery account, his traveling expenses, or things of that sort in the statement he files.

Mr. TOWNER. The language of the statute——

Mr. MANN. I have read the language in the bill.

Mr. TOWNER. If the gentleman has read it the gentleman does not remember it because the language is this, "shall not be regarded as an expenditure within the meaning of this section."

Mr. MANN. "And need not be shown on the statements herein required to be filed"—the language of the bill.

Mr. TOWNER. Exactly.

Mr. MANN. That means it is not to be accounted for. You do not have to show it anywhere.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN].

Mr. TOWNER. Mr. Chairman, I do not question the fact that it can not be accounted for in this particular. I only tried to correct the impression that I thought might be caused by the gentleman's statement that the object and purpose of this provision was to see that these particular expenditures should not be included in the limitation. And that, I think, is clearly shown. Of course, there should be an accounting. Everybody knows that, or else you can not determine the amount that has been expended.

Mr. MANN. Well, but these expenses are not included in the limit and do not have to be shown in the statements filed.

Mr. TOWNER. Exactly. That is what I contend.

Mr. MANN. Then they do not have to be accounted for.

Mr. TOWNER. That is very true in a sense. But it is a very different proposition when you say and only say that they are not to be accounted for. They must be accounted for in any event, but this is a provision only that they shall not be taken into account in the limitation.

Mr. MANN. Perhaps they must be paid, if that is what the gentleman means, but the candidate does not have to account for it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MANN. I ask for a division.

The committee divided, and there were—ayes 36, noes 25.

So the amendment was agreed to.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer an amendment. I move to amend, on page 14, by striking out in line 19 all after the word "resides," and striking out all of lines 20 and 21, and all of line 22, after the word——

Mr. FOSTER. Mr. Chairman, I ask that the amendment be reduced to writing.

Mr. MORGAN of Oklahoma. The gentleman who just preceded me offered an amendment on the floor.

Mr. MANN. It did not require to be reduced to writing. Mr. Chairman, I move to amend, on page 14——

The CHAIRMAN. The gentleman from Oklahoma offered an amendment.

Mr. MANN. He is preparing the amendment.

Mr. Chairman, I move to amend, on page 14, in line 15, by striking out "$2,500" and inserting "$4,000."

The CHAIRMAN. The gentleman from Illinois offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend, on page 14, in line 15, by striking out "$2,500'" and inserting "$4,000."

Mr. MANN. The present limit is $5,000.

Mr. RUCKER. Mr. Chairman, I will say that that fully meets with my personal approval. The House has heretofore voted differently.

Mr. MANN. I understand. I do not think that $4,000 is an excessive amount.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN].

Mr. STAFFORD. Mr. Chairman, I wish to be recognized. I would like to ascertain from the chairman of the committee the view of the committee as to limiting the expenditure to $2,500 for both the primary and the election. The gentleman well knows that some Members may have opposition in the primary, and, if they do, the amount available for expenditures would be $2,500; and if he does not escape opposition at the primary he would be obliged to divide up the $2,500 in expenditures for both the primary and election. Is it fair that the limit of amount should apply to either and not to both?

Mr. RUCKER. It has got to apply to both.

Mr. STAFFORD. That is what I am contending. Here is a candidate who has no opposition at the primaries. He is privileged to spend $2,500 in the election. If he has opposition in the primaries, he has to expend $2,500 for both. I contend that is not fair. In the case of a man who has opposition in a primary, he ought to be privileged to expend not only the $2,500 there but in addition $2,500 for the election.

Mr. JOHNSON of Washington. Now, take the case where two opponents appear and one opponent arranges with the second one to go into the race, and each one of them has the sum of $2,500 to expend against the sitting Member by an arrangement with themselves. They can spend $2 to the sitting Member's $1.

Mr. STAFFORD. You can see how, in a severe primary contest, he will be obliged to spend $2,500, and then he would be prevented from spending $1 in the election, and yet the election may be as severe a fight as the primary contest. You can not justify that kind of a condition by placing a limitation, in one instance, where a candidate may have the privilege of spending the full amount in the election, and when he has opposition in the primary not being privileged to have the same amount available for the election contest.

Mr. CANNON. As I understand it, in many of the States of the Union, notably, say, in the farther Southern States, there is but one contest, and that is in the primary. They go off and cool their heels after they are nominated, which is another reason, it seems to me, why the amount should be increased.

Mr. STAFFORD. Of course, if the gentleman would take the position the candidate should have $2,500 available for each, that would be consistent, because I agree that $2,500 is ample for the primary contest or the election contest; but if you are going to restrict this amount that he may expend to both the primary and election, it is hardly fair. And I appeal to the southern Representatives, who have only one contest. In the North, in some of the States, we have a primary contest as well as the election contest, and where the primary contest is sometimes just as severe as the election contest. We are seeking to place a limit on the candidate in each individual contest, and we say $2,500 is that amount. If he has a contest in the primary, he expends $2,500; if he has not, he does not spend that amount. If he has an election contest, he should be privileged to expend $2,500 in the election.

Mr. RUCKER. The amendment now pending, offered by the gentleman from Illinois, is to increase the amount from $2,500 to $4,000. As I understand the gentleman, he is opposed to that amendment?

Mr. STAFFORD. I would very much favor the striking out of the word "and" and inserting "or." There are many contests in some of the States going on for United States Senator. I have in mind the State of Vermont, where there is a very severe contest going on now for that office.

Take, for instance, the contests that are going on in some of the States for United States Senator. I have in mind a contest that is progressing now in the State of Vermont, a severe fight that is going on for the nomination for United States Senator on the Republican ticket. That candidate for United States Senator will very likely use the entire $5,000 in the contest at the primary, and he would be unable to use any money at all later on to wage his contest for election.

Now, I take it you want this law to be workable at least. You do not want to make a man a perjurer unnecessarily. You want to give him a fair allowance of expenditure wherever he conducts a fight for primary, or if he has a fight for election, or both, so that he might make expenditures for both. Therefore, when the proper times comes, I propose to move to strike out the word "and "in the two particulars and insert the word "or."

Mr. MAPES. Mr. Chairman, I am not sure that I fully understand the purport of the amendment offered by the gentleman from Indiana [Mr. CULLOP]. If his amendment is broad enough to cover the expenditures of committees, under the theory of this bill it would be very difficult for a committee to conduct a campaign. If it does not include committees and applies only to

individuals in their individual capacity, then I do not believe that this amendment to increase the amount to $4,000 ought to pass.

There has been more or less criticism of this bill by gentlemen hailing from the State of Illinois. Illinois is one of the few States which now has no corrupt-practices act, limiting the amount which candidates for Congress or for other offices can expend. I am not sure but that every State which has passed laws limiting the amount of expenditures makes the limit less than this bill. This bill provides the limitation of $2,500 for certain expenditures, but allows a candidate an unlimited expenditure for postage, stationery, printing, writing, and traveling expenses, an unlimited amount for almost everything that a man can think of that money ought to be expended for. Now, if we raise this limitation, we put it entirely beyond the limit that has been fixed by any State legislature. In my own State of Michigan we have a law which limits us for every kind of expense to 25 per cent of the first year's salary.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. MAPES. Certainly.

Mr. WALSH. Does not the gentleman think that the candidate in the State at large, representing an entire State, ought to be allowed to expend more than a district Representative?

Mr. MAPES. I think so.

Mr. TOWNER. Ought he not be allowed to expend as much as a Senator?

Mr. MAPES. I think he should be. But this applies to Members generally, and they are nominated and elected from the districts. I think the amount fixed in this bill, $2,500, in addition to the other expenditures, is a very liberal amount, and ought not to be increased.

Mr. RUCKER. Mr. Chairman, while the gentleman from Illinois [Mr. MANN] held the floor a few minutes ago I interrupted him to say that personally I thought the amount suggested by him was not excessive, and that as an individual I agreed with him. I did that, basing my statement upon the very many statements and profuse arguments made here by gentlemen who were decrying and denouncing the amount written in the bill. I did not mean by that to say that I would vote for the increase. The gentleman from Wisconsin [Mr. STAFFORD] just now disclosed another proposition that we have to contend with. Gentlemen are insisting not only that the amount shall be raised but that the amount written in the bill must be allowed to be expended both in nomination and election; and it is argued that in the Southern States a nomination is equivalent to an eelction, that there is only one contest. Yet the fact is that in some other Southern States a nomination is equivalent to an election—that is not true. It is absolutely untrue. The last fight in some of the districts of the South is the greatest fight. In some of the districts in the State I live in the nomination of either party is equivalent to an election. In other districts in that State there are two fights—one for the nomination and one for election.

I will say to gentlemen that the purpose of this bill is to stop the use of money in ways and through channels which debauch people. As just stated by the gentleman from Michigan [Mr. MAPES], this bill, if it becomes a law, like the existing law, allows Members of Congress or those who are seeking to become Members of Congress almost unlimited expense along lines going to the education of the people or directed to the judgment of men. It only seeks to put a limitation on the use of money in ways that money ought not to be used.

Mr. SANFORD. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from New York?

Mr. RUCKER. Yes; I yield.

Mr. SANFORD. The gentleman, as chairman of the committee, consented to the amendment offered by the gentleman from Indiana. I would like to ask the gentleman now if he understands that that amendment, which provides that no candidate for Senator or no person acting in his behalf shall expend more than the amount named, includes all committees, national, State, or county, or any other committee? If that is the theory of the amendment, I want to say to the gentleman that although we have cooperated with him all winter to get a corrupt-practice act, for my part I shall be compelled to abandon the bill, because I can not see how any man under that provision should dare run for Congress. If I am mistaken in my interpretation of the amendment I would like to be enlightened by the gentleman who is chairman of the committee.

Mr. RUCKER. I am sorry the gentleman has made that statement.

Mr. SANFORD. I would like to have the matter made clear. I would like to have the gentleman's construction.

Mr. RUCKER. I say it does not apply to the national committee. I would not favor that, as the gentleman knows. I do not believe it would have the effect that the gentleman seems to think it would have.

Mr. WALSH. Mr. Chairman, will the gentleman pardon an interruption there?

Mr. RUCKER. Yes.

Mr. WALSH. On page 4 the act says:

> The term "person," whenever used in this act, shall mean and include any private person, firm, copartnership, association, or committee, and the singular shall include the plural.

Mr. WALSH. There is nothing in the amendment which has been adopted that takes it out of that definition.

Mr. RUCKER. The gentleman has heard my statement. I did not believe the Cullop amendment applied to committees at all, and I would not support it if I thought it did.

Mr. SANFORD. Under the wording of this bill and under all of its definitions there is, in my judgment, no question of doubt that if more than $2,500 should be spent in the gentleman's district in his canvass, no matter who spent it or whether the gentleman knew it or not, the gentleman himself and everybody who had anything to do with the spending of it would be liable to the penalties of this bill.

Mr. RUCKER. I shall be glad to confer with the gentleman further about it, and if he convinces me that his construction is right this language will not be in the bill when it becomes a law, if I can prevent it.

Mr. STAFFORD. The gentleman voted for it. He will remember that there was a tie vote.

Mr. RUCKER. I know I voted for it. Gentlemen construe the language differently. I want to say that so far as prescribing what may be spent for nomination and election, I believe there are gentlemen here no who, if we put a limit of $10,000, would still want $10,000 to spend in the campaign for nomination and a like sum to spend in the campaign for election, which, of course, would be grossly wrong.

Mr. MANN. Mr. Chairman, I ask unanimous consent to speak for three minutes on another matter, out of order.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent to speak for three minutes, out of order. Is there objection?

There was no objection.

JAMES HAY.

Mr. MANN. Mr. Chairman, I came into the House in the Fifty-fifth Congress, and the service of the gentlemen who came into that Congress, who have remained in continuous service, is now running into its twentieth year. Quite an aggregation of gentlemen came into the Fifty-fifth Congress who have remained here. Some very brilliant men, particularly on the Democratic side of the House, are Members of that class. Occasionally we lose one of our best Members through the will of constituents at home, often to our personal regret. Occasionally we lose one of our best Members through selection by the President for some other office. I hold in my hand a little note which one of the newspaper boys sent me a few moments ago, which says:

> The President to-day nominated Representative JAMES HAY, of Virginia, a judge of the United States Court of Claims.

[Applause.]

Mr. Chairman, the gentleman from Virginia is one of the ablest Members of this House. [Applause.] He is one of the gamest fighters that ever threw his hat into any kind of a ring. He will make one of the best judges who ever sat on the bench. [Applause.] The good will of every Member of this House goes with the distinguished gentleman from Virginia. Though we shall be sorry to part with him here, though we shall regret that we do not have the opportunity to meet him personally from day to day and get the valued assistance of his counsel, he will always be warm in our hearts. [Applause.]

Mr. CLARK of Florida. Mr. Chairman, the gentleman from Illinois [Mr. MANN] has just stated a gratifying piece of news to the House, and I ask unanimous consent that the gentleman from Virginia [Mr. HAY] be allowed five minutes to address the House. I think we would all like to hear him.

The CHAIRMAN. The gentleman from Florida asks unanimous consent that the gentleman from Virginia may address the committee for five minutes. Is there objection?

There was no objection.

Mr. HAY. Mr. Chairman, I am very deeply touched by the good will and good feeling which has been displayed toward me by the Members of the House, particularly because I know of no body on earth which measures up to a higher standard of high-minded ability and good-hearted feeling than the Members of the House of Representatives. [Applause.]

The remarks of my good friend, the gentleman from Illinois [Mr. MANN], with whom I came here almost 20 years ago, are appreciated by me more than I can say; and in leaving this arena, where I have enjoyed the friendship and good will, I believe, of almost every man with whom I have served, I leave

it with great regret, and only because I feel that it is my duty to do so. I most heartily thank the gentleman from Illinois and all gentlemen in the House for their good feeling toward me. [Applause.]

PUBLICITY OF CAMPAIGN CONTRIBUTIONS.

Mr. CULLOP. Mr. Chairman, I move to strike out the last word. In reply to the gentleman from Michigan [Mr. MAPES], I desire to say that we have in Indiana a corrupt-practices act which limits the candidate for Congress to the expenditure of $25 for each 1,000 votes up to 50,000 votes and $15 per thousand votes in excess of that number, so that in that State we limit the expenditure in the ordinary district to about $1,300. Now, candidates for Congress get along very well in Indiana under that law; but the gentleman from Michigan [Mr. MAPES], opposing the amendment that I have offered, seems to take into consideration that the candidate for Congress is the only man running on the ticket at the election.

Mr. MAPES. Will the gentleman yield?

Mr. CULLOP. In one moment. There will be 25 or 30 other candidates probably on the same ticket—at least 10 or 12, anyway—all of whom are conducting their campaigns, and when all this is considered, the candidate for Congress will not be without the mutual assistance because of this fact.

Again, I want to remind the gentleman from Michigan that if he, as a candidate, is bound by this rule, his opponent is in exactly the same situation and must come under the same rule. This will tend, therefore, to reduce the extravagant expenditures made in some instances by candidates for Congress, many of them far beyond their ability to make. It will apply to all alike and work out well. Now, I will yield to the gentleman from Michigan.

Mr. MAPES. I will say to the gentleman that the language of this bill requires every committee that expends any money in attempting to influence the result of an election at which a Representative in Congress or Senator is to be elected to make a report. The amendment of the gentleman from Indiana provides that the expenditure of any money by the candidate or any person in his behalf——

Mr. CULLOP. Or for him.

Mr. MAPES. Or for him is limited to a certain amount.

Mr. CULLOP. Yes.

Mr. MAPES. The bill provides that the term "person"—

Whenever used in this act shall mean and include any private person, firm, copartnership, association, or committee, and the singular shall include the plural.

Now, it seems to me that with the gentleman's amendment and with the definition of the term "person," and with the language in this bill requiring every committee that expends any money to influence the result of an election at which a candidate for Congress is to be elected, to report, the committees and the candidate himself must all come within this limit of $2,500.

Mr. CULLOP. Well, certainly $2,500 is enough. How much do you want to pour into the corrupt pool for the purpose of influencing the electorate of a district and debauching the voters?

Mr. MAPES. Will the gentleman yield there?

Mr. CULLOP. Certainly.

Mr. MAPES. Perhaps that might be true if it applied only to the congressional district, but under the theory of this bill the State committee and the national committee all have to account, because they are expending money in attempting to influence the result of an election at which a Representative in Congress is to be elected.

Mr. CULLOP. Now, let me say to the gentleman from Michigan that the sooner we get out of politics these excessive amounts expended in elections the sooner we will get down to the deliberate judgment of the voter and get his candid judgment upon measures and candidates—the thing that is most desired in this country. The merits should be the standard and not the biggest corruption found. When men and measures are the standards for the exercise of the ballot, and not cash per vote, suffrage will perform the functions for which it was given. The people then will realize the higher standards of administration, the dawning of a better day in official life, and a healthier tone of public affairs. The corrupting influences practiced in campaigns and elections bear fruits in public service and degrade the administration of public affairs. The sooner it is eliminated the better it will be for all.

Mr. SANFORD. Will the gentleman yield?

Mr. CULLOP. Certainly.

Mr. SANFORD. I should like to call attention to page 14, where the gentleman offered his amendment. I should like to ask him if he does not think, in order to be consistent, he ought also to introduce his amendment so as to cover disbursements by the President, so that all over the United States there shall not be expended over $50,000? For the sake of consistency the amendment ought to be adopted.

Mr. CULLOP. I hope it will be adopted. It is time to stop pouring into campaign funds these excessive amounts which are wasted, used to debauch the voter and corrupt the ballot, and in the end constitute the corrupting influence of politics; because after a campaign fund is collected and expended, the contributors to that fund demand their pay in the way of legislation, of public favors, official recognition, and because of their liberal contributions have the ears of those they have helped. It is degrading, and the public welfare requires that a stop should be put to it.

THE CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN].

The question was taken, and on a division (demanded by Mr. MANN) there were 38 ayes and 37 noes.

Mr. RUCKER. Mr. Chairman, I ask for tellers.

Mr. KEATING. Pending that, Mr. Chairman, I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from Colorado makes the point that no quorum is present.

Mr. KEATING. Mr. Chairman, I will withdraw the point.

The CHAIRMAN. The gentleman from Missouri demands tellers.

The question was taken, and tellers were ordered.

The Chair appointed as tellers Mr. RUCKER and Mr. MANN.

The committee again divided, and the tellers reported that there were 42 ayes and 59 noes.

So the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 14, strike out all of the section after the word "election" in line 16.

Mr. MORGAN of Oklahoma. Mr. Chairman, the amendment which I have offered proposes to strike out the proviso of section 10, beginning after the word "election," in line 16, page 14. To understand the purpose of my amendment it is necessary to have a general idea of the purpose of this bill. This bill is H. R. 15842, introduced by Mr. RUCKER, of Missouri, the chairman of the Committee on the Election of President, Vice President, and Representatives in Congress. The bill proposes to amend the existing law relating to the publicity of contributions and expenditures made for the purpose of influencing the nomination and election of Senators and Representatives in Congress. This bill amends the existing law by including within its provisions candidates for President and Vice President of the United States. The title of the bill indicates that the existing law is to be amended by "limiting the amount that may be expended, providing for the publicity of campaign expenses, and for other purposes."

Mr. Chairman, as I have read this bill and as I have heard it explained in this debate this is not a bill which limits the expenditure of money for campaign purposes, but is a bill confined almost entirely in providing for publicity of campaign expenses. In section 10 of the bill there is a paragraph which in effect would limit the expenses of a candidate for President to $50,000; for Vice President, $25,000; for United States Senator, $5,000; and for Representative in Congress, $2,500, were it not for the proviso at the close of the paragraph. This proviso is as follows:

Provided further, That money expended by any such candidate to meet and discharge any assessment, fee, or charge made or levied upon candidates by the laws of the State in which he resides, or for his necessary personal expenses, incurred for himself alone, for travel and subsistence, stationery and postage, writing or printing (other than in newspapers), and for telegraph and telephone service shall not be regarded as an expenditure within the meaning of this section, and shall not be considered any part of the sum herein fixed as the limit of expense and need not be shown in the statement herein required to be filed.

Under this proviso there is no limit to the amount of money which a candidate may expend for travel and subsistence, for stationery and postage, for writing or printing (other than in newspapers), and for telegraph and telephone service. Neither is he required to make any report of the amount of money expended for any of the above purposes. He may, if he so desires mail a letter to every voter in his district during every day of the campaign; he may have printed and mailed to every voter in his district, monthly, weekly, or daily any amount of printed matter; he could mail to every voter expensive pictures or photographs of himself; and he could send to his voters telegrams without limit or restriction and as frequently as he desired hold unlimited conversation by local or long-distance telephone with the voters of his district. In this way it would be an easy matter for a candidate for Senator or Representative to spend $25,000, $50,000, or even more than $100,000 in influencing the

electors of the State or district, and yet, under the provisions of this bill, he would not be required even to report it. In my judgment, such a provision and such a bill does not meet the demands of the public sentiment of the country to-day.

In my judgment, the law should define for what purposes a candidate may expend money to promote his candidacy. Money expended for other purposes should be regarded illegitimate. I would permit no expenditures for illegitimate purposes and I would limit the amount that might be expended for legitimate purposes.

Mr. WALSH. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. WALSH. Does the gentleman think that postage is an illegitimate purpose in connection with a campaign?

Mr. MORGAN of Oklahoma. I do not.

Mr. WALSH. Why do you want to limit it?

Mr. MORGAN of Oklahoma. I would allow no money to be spent for illegitimate purposes, and I would limit the amount spent for legitimate purposes. I know of no reason why a candidate should be allowed unlimited use of the mail and postage during election. The gentleman from Missouri [Mr. RUCKER] says that a candidate may have unlimited use of money when he is addressing the judgment of the electorate. We know that much of the matter that goes through the mails may not be of the right kind and character, it may be misleading, it may not appeal to the reason, judgment, and conscience of the voter.

Mr. LONGWORTH. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Certainly.

Mr. LONGWORTH. The gentleman realizes that that has been the law for a good many years; that this is not new in this bill.

Mr. MORGAN of Oklahoma. I realize that, but I think now is the time to change the law. We should not have a statute which is a mere pretense, and is ineffective in accomplishing any good purpose.

Mr. FESS. Why do you use the term "illegitimate" in reference to these items? Suppose you are kept here because of the session of Congress, your primary fight is going on and you want to use the newspapers for a letter, and suppose you had 73 newspapers, as I have in my district, is that an illegitimate use of money?

Mr. MORGAN of Oklahoma. I think not.

Mr. FESS. It is required here, and you use the term "illegitimate."

Mr. MORGAN of Oklahoma. I say generally speaking.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. SMITH of Michigan. Does the gentleman think that Members of Congress should be limited in the number and amount of speeches that they send out for campaign purposes?

Mr. MORGAN of Oklahoma. I think we might limit the amount of mail that a man sends out under frank.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask unanimous consent to proceed for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MORGAN of Oklahoma. I was about to say that this bill requires us to report what we expend for newspaper advertisements, and I see no reason why you should do that if we are not required to report what we pay out for mailing printed matter to the voters.

Mr. RUCKER. Mr. Chairman, the reason for that is simply this, that if we do not require any publicity statement as to expenditures in newspapers it leaves an opening through which designing parties might, under pretense of publishing a little notice, furnish a newspaper man with a thousand dollars, which would at least tend to corrupt him.

Mr. MORGAN of Oklahoma. The gentleman misunderstands my position. As I understand, the restriction is this: You make us report what we expend for newspaper advertising, and that is included within the $2,500, but we may expend $10,000 or more for other printed matter, and we are not required to even report it.

Mr. RUCKER. Certainly.

Mr. MORGAN of Oklahoma. I do not think that is based upon sound principle or wise policy. It is just as legitimate and appropriate to speak to the public through the daily or weekly newspapers, aye, even more so, than it is to send written or printed matter through the mails.

Mr. RUCKER. The gentleman did not catch the answer clearly. The reason for it is this: Without this requirement somebody might, under the pretense of putting a card in the newspaper, give to the editor a check for a thousand dollars, when $5 would be ample pay, and if he takes that you understand that he is bought at once.

Mr. MORGAN of Oklahoma. I would class newspaper advertising as the most appropriate and legitimate method and means to reach the voters, and I think it the most effective. I believe in patronizing the editors. What a man says in the public press is open and aboveboard. The use of the press is a most honorable way to do campaigning, in my judgment. I believe we should limit the amount of money that a man may expend in securing a nomination or an election to office. Let us be fair with the public. Let us not pretend we are doing something we are not doing.

Let us not pass a bill which does not do what it purports to do. This bill, as it now stands, neither limits campaign expenditures nor requires effective publicity. Under its provisions a man may expend, as I have pointed out, $50,000, or even a much greater sum, and would not be required to report one cent of it.

Mr. RUCKER. That is, by buying postage stamps and writing letters?

Mr. MORGAN of Oklahoma. Yes. Is not that true?

Mr. RUCKER. But could that possibly be thought to corrupt anyone?

Mr. MORGAN of Oklahoma. I think the gentleman from Missouri [Mr. RUCKER] is mistaken in his conception of what is a proper law. He says the only object of this legislation is to restrict a candidate in the use of money in ways which may or might corrupt or debauch a voter. My conception is that money should not be used at all in a way that would corrupt a voter. We should strictly prohibit, with severe punishment attached, any use of money for campaign purposes which would corrupt or debauch a voter. But I believe that the excessive use of money for any purpose to influence elections will corrupt the voter. I am therefore in favor of restricting every candidate who aspires either to a National, State, or local office in the use of money to secure his nomination or election. I believe, as the gentleman from Indiana [Mr. CULLOP] expresses it, that the real object of this legislation is to restrict the use of money and the influence of money in elections. Indeed, Mr. Chairman, that is the very object of requiring the publicity of campaign expenditures. The theory is that money in excessive amount will not be used in elections if publicity is required. But we should not rely on publicity alone. We should go further. My amendment should be adopted. A candidate should be limited in the amount of his campaign expenses, and his report should cover all expenditures.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

Mr. BORLAND. Mr. Chairman, I rise to oppose the amendment of the gentleman from Oklahoma [Mr. MORGAN]. I feel a good deal of sympathy with the argument that he has advanced, that no corrupt-practices act ought to be framed upon the basis that it permits any expenditure for illegitimate purposes. I do not think we ought to recognize that there is a margin of illegitimate expenses in politics which ought to be taken into consideration. I think the gentleman is in error, however, in assuming that that is the case, and that this bill is framed upon the proposition that certain expenses are legitimate, and therefore excluded from any return necessary to be made, and that certain others not excluded are to be thereby classed as illegitimate. That is not the case. The reason for excluding some of these items is perfectly plain. For instance, the one requiring the filing fees of candidates. There is no reason why a man should be limited in his expenses because another law compels him to file $50, as it does in our State, as a filing fee.

Mr. MORGAN of Oklahoma. I do not regard a fee required by law as a part of a man's expenses at all.

Mr. BORLAND. No; and the same is true of a great many of these other items that everyone recognizes are common, normal, and legitimate, like stationery and postage and writing and printing other than in the newspapers; but it is not quite correct to say that all other items not excluded are, therefore, illegitimate items and are included in this margin of corruption fund. They are items which we can not foresee in all cases, but not necessarily illegitimate. There may be items such as those spoken of by the gentleman from Ohio [Mr. FESS] where he might want to publish a letter in a series of newspapers. He ought to be allowed to do so, and yet the gentleman from Missouri [Mr. RUCKER] is right in saying that there ought to be a limit in the amount that the man can pay the newspapers.

There ought to be a limit even upon legitimate expenses. The great point in this bill is this: That it leaves no margin at all for illegitimate expenses, and confines the pretext for legitimate expenses down to a margin so that the average poor man of

ability can run for office. That is the real theory of this bill. I do not want the criticism to be leveled at this bill that any interpretation of it provides for illegitimate expenses. I do not pretend but that some men are going to make use of it up to that point for expenses that they would not like to disclose, but the primary design of the bill is that counting all margin of legitimate expenses, those excluded and those not excluded, they shall come within a reasonable limit.

Mr. FARR. Is there any limit upon the amount of material that you can send through the post office?

Mr. BORLAND. No; but that does not stamp it as illegitimate.

Mr. FARR. I did not say it did.

Mr. BORLAND. But as the gentleman from Missouri [Mr. RUCKER] has well said, not a great deal of harm can be done in sending matter through the post office. Certainly no corruption of voters can occur in that way. A man may send out a large amount of misinformation, and I have no doubt that most candidates for Congress do. He may send out a large number of specious arguments. He may occasionally make an egregious fool of himself in a circular letter, but he is not corrupting anybody by doing it when the money is going to make up a sum that represents the running expenses of the Government that carries on the service. These are the normal expenses of sending out circulars, postage, his traveling expenses, his telephone and telegraph expenses, those expenses that no candidate can escape. That is the theory on which they are recognized by this bill. Then above that is placed a margin of other expenses that may in a particular case he can not foresee be perfectly legitimate and in a particular district may be perfectly legitimate, and which must be kept within the reasonable limits of the law.

The CHAIRMAN. The time of the gentleman has again expired. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. McKELLAR. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows.

Page 14, lines 21 and 22, after the parenthesis and after the word "printing," strike out the words "other than in newspapers," and insert "as advertisements and showing in such printed matter that it is an advertisement."

Mr. McKELLAR. Now, I have another amendment I want to go along with it.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After the word "expense," in line 25, strike out "and need not" and insert "and must."

Mr. McKELLAR. The provision of the bill on this subject as reported is as follows:

Provided further, That money expended by any such candidate for his necessary personal expenses incurred for himself alone for travel and subsistence, stationery and postage, writing or printing (other than in newspapers), and distributing letters, circulars, and posters, and for telegraph and telephone service shall not be reported as expenditures within the meaning of this section and shall not be considered any part of the same fixed herein as the limit of expenditure and need not be shown in the statement herein required to be filed.

The objects of these two amendments are (1) to put newspaper advertisements on the same basis with other printed advertisements, and (2) to require all expenditures to be reported and shown, whether they are in the excepted list or not.

Under the bill, as it has been reported, a candidate for Congress can spend an unlimited amount of money for the following matters: Personal expenses, travel and subsistence, stationery and postage, writing or printing (other than in newspapers), distributing letters, circulars, and posters, telegraph and telephone service; and none of these items are to be included in the $2,500, or $5,000 in the case of a candidate for Senator, that is permitted to be spent by the candidate and which expenditure must be reported.

Mr. Chairman, I wish, first, to discuss the question of newspaper advertising. I do not think newspaper advertising ought to be excepted. Frauds are not committed by publicity. If a candidate wants to spend money in newspaper advertising, he ought to be allowed to do it. Why should he be allowed to advertise in magazines without having to report it and not in newspapers without having to report it? It is claimed that it would give him an undue advantage over his opponent. This is not correct. Suppose his opponent owns a newspaper and devotes the greater part of it to advertising his own candidacy. This is frequently done, and it is unfair to the opposing candidate. What we ought to do is to set forth for what purposes money may be spent and put a limit on all expenditures. Let us cut out this excepted list and fix a sum which may be spent, including sums spent for these purposes.

Under the bill as reported, which in this particular is the law as it exists now, a candidate may spend $10,000 for postage, $5,000 for telephone and telegraph service, and $5,000 more for office force in distributing letters, circulars, and posters, and he does not have to report a cent of it. The only limitation put upon him is he can not advertise in newspapers without reporting it. If he advertises in a newspaper, he has to report it, and it comes out of the amount allowed. I do not see any difference between advertising by circulars and paying $5,000 therefor and advertising in a newspaper and paying $5,000 therefor. The truth is the law ought to require every cent paid out by the candidate or his campaign committee or friends to be reported and for what purposes it was spent should be stated.

Again, the object and purpose in passing this law is to secure honesty in elections and prevent the unlawful use of money in elections. If these are the purposes, let us accomplish them. I do not take any stock in the idea that corruption can be brought about by newspaper advertising. A man can not commit fraud by publishing it in a newspaper. The truth of the matter is that what we most need to provide for is publicity. I think we ought to require a full statement of every use to which campaign money is put. For instance, we should require an itemized statement of the personal expenses of a candidate incurred for himself alone; expenses for travel and subsistence; for stationery and postage; writing or printing, including newspaper and magazine printing; the expenses of headquarters; distribution of letters, circulars, and posters; and telegraph and telephone charges; and then limit the amount that can be spent by the candidate for all these purposes or for any other purposes. If you permit him to spend unlimited sums for all these purposes and then give him a general fund of $2,500, or in the case of a Senator $5,000, to be used for any unnamed purpose, you open the door to possibility of wrongdoing.

I am convinced that there should be a limit placed on the amount that a candidate might spend for these purposes named in the bill. In other words, he should be limited in the amount that he shall spend for telegraph and telephone service, for newspaper advertising and other advertising, for headquarters, for stationery and postage. I would rather vote to make the limit larger and require a publication of all than to make the limit small and leave a large number of expenditures which do not have to be reported or published. Publicity is the safest remedy against corrupt elections. I know I am right when I say that the candidate ought to be required to show in his statement filed with the Government authorities just how much he has used for all these purposes, whether such expenditures are in the excepted class or not. This will bring about the necessary publicity.

The gentleman from Missouri, my good friend Judge RUCKER, says the reason newspapers were excepted was that some candidate might buy up a newspaper. If you require him to report his purchase he will not buy much of a newspaper or many of them. Publicity is the deadliest enemy of fraud in elections. For my part I am perfectly willing to strike out the $2,500 general fund permitted in the bill, and to require all candidates to specify just what they expend and for what purposes expended. If we are going to have a general fund for unnamed purposes, a $2,500 fund in the case of a Congressman, and $5,000 in the case of a Senator, these amounts may not be unreasonable. But what I want to insist upon is that candidates report all sums expended and for whatever purposes. Publicity is what we want, and the way to get it is to require the candidates to file statements here in Washington, showing in detail what they spend for printing and advertising, for postage and stationery, for personal expenses, and for all other purposes, and you will find that it will create a very strong influence in favor of honest elections, and honest elections are what we are seeking to obtain in the passage of this bill.

Gentlemen, it seems to me that the time has arrived when if we want to uphold and maintain our American institutions we must protect the purity and honesty of the ballot box. [Applause.]

Some say that this is not an effective measure. It may not be as effective as we would like it. It may not be as effective as it should be; it is not as effective as I would like it; but it is a step in the right direction, and we are going to take it. We should do all we can to bring about honesty in elections. In elections of the Members of the House and Members of the Senate, and in all other elections, dishonest practices is one of the crying evils of the day.

I believe that the State should bear all the expenses of the elections, primary and regular, except the candidate's necessary personal expenses incurred for himself alone, and for travel and subsistence, and perhaps a limited amount, say not exceeding $1,000 incurred for postage, and for telephone and

telegraph service an amount not to exceed $500. It has gotten to be so that unless a candidate is a rich man he can not run for an office in this country. One man may be better fitted for the office, he may be a better speaker, he may be more popular; and yet, unless he has money for a campaign fund, or has wealthy friends who will put it up for him, he is precluded in many instances under our system from running for office. This ought not to be. The State should see to it not only that the elections themselves are honest and pure, but that all candidates who have a desire to be elected to office should have an equal show, whether they are rich or poor.

Mr. PLATT. Will the gentleman yield for a question?

Mr. McKELLAR. Of course.

Mr. PLATT. Does not the gentleman think the United States Government ought to pay this expense for advertising in the home newspapers, so that we may be sure they would be published?

Mr. McKELLAR. I am for it, provided that the candidates all have an equal show. I am for anything that will secure the honesty and integrity of the ballot box. I do not care how you make it or how strong you make it.

Mr. FOCHT. And to be entirely fair——

The CHAIRMAN. The time of the gentleman has expired.

Mr. McKELLAR. Mr. Chairman, may I have two minutes more?

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FOCHT. In that connection would it not also be fair to the opposing candidate, who is a Member of Congress, that the Member of Congress who is running also publish in his home papers the total amount in dollars and cents of benefits and privileges he has had in franking from the Government?

Mr. McKELLAR. I see no objection to that. I think it would be entirely proper.

Mr. Chairman, I am heartily in favor of this bill. I wish it placed greater restrictions and limitations upon the use of money in elections. I wish it provided for greater publicity. I think we ought to require all candidates to report all expenditures, regardless of their nature or kind. I think we ought to make all expenditures public. If, for instance, a candidate spends $10,000 for stationery and circulars, he ought to be required to report it to the Clerk of the House or Senate, and then the newspapers back home may publish it, if they desire. Whatever a candidate spends, for whatever purpose, whether for personal expenses or for any other purpose, should be reported here and made a public document, so that it can be published back home. This will, in my judgment, do away with the corrupt use of money in elections.

This bill, as reported, does not entirely meet my approval for the reasons I have outlined, but I am for it, whether my amendments are adopted or not, believing it to be a step in the right direction, and I hope that the Senate or conference committee will make it a more effective measure. If I were writing a bill upon this subject, I would make publicity the dominant theme which would run through the entire bill. Publicity will prevent any fraud. The two can not go hand in hand together. [Applause.]

The CHAIRMAN. The question is on the amendment of the gentleman from Tennessee [Mr. McKELLAR].

The question was taken, and the amendment was rejected.

Mr. WALSH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

Mr. McKELLAR. Mr. Chairman, was the second amendment voted on?

The CHAIRMAN. The Chair understood the gentleman to say it was read for information. Does the gentleman want it considered now?

Mr. McKELLAR. I think the second amendment should be reported. All these expenses are required to be reported. I desire to have that voted on.

The CHAIRMAN. The question is on the second amendment offered by the gentleman from Tennessee [Mr. McKELLAR].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The gentleman from Massachusetts [Mr. WALSH] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 14, line 16, after the word "election," insert:

"*Provided further*, That candidates for nomination or election as Representatives at large from any State may contribute, disburse, or expend a sum within the limit provided for candidate for Senator as provided by this section."

Mr. WALSH. Will the gentleman from Missouri [Mr. RUCKER] accept the amendment?

Mr. RUCKER. I think it ought to be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. WALSH].

The amendment was agreed to.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer an amendment in the nature of a new section to follow section 10.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk commenced the reading of the amendment.

Mr. STAFFORD. Mr. Chairman, we are not through offering amendments to section 10. I would like to offer an amendment to that section.

The CHAIRMAN. Does the gentleman from Wisconsin desire to offer an amendment to section 10?

Mr. STAFFORD. I do.

The CHAIRMAN. The gentleman will be recognized for that purpose.

Mr. STAFFORD. Strike out the first "and," in line 13, page 14, and insert "or," and also strike out the word "and," in line 15, and insert "or."

The CHAIRMAN. The gentleman from Wisconsin offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 14, line 13, at the beginning of the line, strike out the word "and" and insert the word "or." And in line 15, at the end of the line, strike out the word "and" and insert the word "or."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, the purpose of this amendment is to give candidates who have opposition at the primary as well as at the election the privilege of spending $2,500 each at both the primary and election. I consider it unfair to the man who has opposition at both primary and election to be limited to the total expenditure of $2,500 and which would put him at a disadvantage in running with a man who has no opposition on the opposition ticket at the primary election.

The purpose of this bill is to restrict the candidate to a limited expenditure of money in either the primary or election. You should not by this bill provide that the man who has opposition at the primary election should expend only $2,500 for both and allow the man who has no opposition in the primary to spend $2,500 at the election.

Many times in the northern districts, where the contests for nomination are very severe, $2,500 is no more an unreasonable amount than $2,500 is for a contested election. It does not savor of any slush fund when you restrict the amount to $2,500 that may be expended at the primary and to $2,500 that may be expended at the election. It is but carrying out the fundamental principle of this bill, only applying it to those cases where the man has opposition both at the primary and at the election. If he has no fight at the primary, he does not expend the $2,500, and the $2,500 limit will apply only to the election. But if he has opposition at the primary, then you should, in fairness to him, after he gets the nomination, permit him to have a like amount to spend for election. Otherwise you are going to put a premium on perjury, and I do not believe anyone here wants to do that, but wants to give a man who has made a hard fight for the nomination and may have had to spend $2,000 the right to spend $2,500 for election and not $500. It is his privilege and should be granted to him. Who can say that a man who has spent $2,500 for Congress is trying to buy a seat if he is privileged to spend an additional amount for his election. And there are many Members here who do not call on committees to finance their campaign. They pay their own expenses out of their own pockets. And I ask you to meet that condition by allowing the candidate who has opposition at the primary to have the same amount available to spend at the election.

Mr. KEATING. Mr. Chairman, I hope the amendment of the gentleman from Wisconsin will not be adopted.

Mr. LONGWORTH. It will not be.

Mr. KEATING. On the assurance of the distinguished gentleman from Ohio that it will not be, I will not make a speech.

Mr. STAFFORD. I wish the gentleman from Ohio had not made that assurance.

The CHAIRMAN. The question is on the amendment of the gentleman from Wisconsin [Mr. STAFFORD].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. STAFFORD. Division, Mr. Chairman.

The committee divided; and there were—ayes 9, noes 41.

So the amendment was rejected.

Mr. MORGAN of Oklahoma. I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Amendment offered by Mr. MORGAN of Oklahoma: Add as a new section—section 10—the following:

"That it shall be unlawful for any individual or person to contribute money or other thing of value exceeding in value $5,000 in connection with any election at which electors for President and Vice President of the United States or a Representative in the Congress of the United States are to be voted for."

Mr. MORGAN of Oklahoma. Mr. Chairman, the object of the amendment which I propose is to make effective the ideas which I expressed in part in discussing my former amendment. The amendment proposes to add a new section to the bill which would prohibit any person from contributing more than $5,000 to influence the result of any election in which candidates for presidential electors or candidates for Senators and Representatives in Congress are voted for. I have restricted the amount to $5,000. This may be too high or too low. I am not particular as to the amount just so the amount is reasonably restricted. I believe it is not only just and right, but that it is eminently wise to place a reasonable limitation and restriction upon the power of men of great wealth to influence national elections, national legislation, and national administration. There is nothing in this bill which in any way restricts the amount of money which one man may give to secure the nomination or the election to the Presidency or Vice Presidency of the United States or to membership in the Senate or House of Representatives of the United States. There should be a limit in this respect.

Gentlemen, you will recall the investigation that was conducted in 1912 by the Senate Committee on Privileges and Elections relative to the amount of money that was expended in previous campaigns in the nomination and election of candidates for President and Vice President. Without intending any criticism upon any political party or upon any individual in connection therewith, it is true that the revelation made in that investigation was regarded in the nature of a public scandal. As one having the good of my country at heart, I hope that never again in this country will single individuals contribute such immense sums of money to secure the nomination and election of any candidate for the Presidency of the United States. It is not my purpose to assail wealth or to attack men who possess great wealth. This is not involved in this discussion. We do know that in recent years men in this country have acquired immense wealth—wealth which in amount is beyond the grasp and comprehension of the human mind. Such men can contribute $100,000, $500,000, or $1,000,000 without feeling it. I do not believe it is a wise policy to permit men, through the use of their money, to multiply by a thousandfold their power and influence in politics. In politics dollar signs are danger signals. If it be wise, as this bill proposes, to restrict candidates in the use of money, it is also wise to restrict their friends and supporters in the use of money.

Let me point you to an illustration of an ideal way in which a great party selected a candidate for President. I refer to the nomination which occurred at Chicago during the month of June. The Republican Party, in its national convention, this year nominated a man for President who had not himself spent any money to secure his nomination and for whom nobody else had expended money to secure his nomination. [Applause on the Republican side.] That fact will give the Republican candidate prestige before the American people. It will give him standing and position with the voters of the country that no other candidate for President has had in recent years. [Applause on the Republican side.] And I predict that this man so nominated—Charles Evans Hughes—will be elected President of the United States. [Applause on the Republican side.]

Mr. CANNON. Mr. Chairman, I want to say a word about this bill and about the existing law. Congress hitherto has not undertaken to provide an election at which a President or Senators or Members of Congress shall be chosen, as it has the power to do, so that elections are now held under State laws.

Now, I suppose there is not a State anywhere in the United States that has not election laws, that has not severe penalties for bribery. If there is a public sentiment that will punish, that is the proper place for prosecution. If there is not a public sentiment that will punish, we have come to a condition in the country where there is a debauched public sentiment. There ought to be, really, under the State law enough of law-abiding people to punish for bribery and like offenses. An election for a Senator or Member of Congress is not the main thing. Why, there are members of the legislature, there are governors and State officers, there are county officers to be chosen who are of great importance locally to the elector who votes; on the average, more important than the election of national officials, the presidential electors on the one hand or Members or Senators on the other.

Still, about all you could say about this bill from my standpoint is, to an honest man, he will not commit perjury, whatever the provisions of your bill may be [applause]; and if he is a dishonest man and seeks to evade the law, he can find wherein he can evade it, whatever it may be in God's chancery, without violating the law so that he can be placed in the penitentiary or convicted. So that it puts the honest man at the mercy of the dishonest man. The whole thing, in my judgment, is simply undiluted demagogy. [Applause on the Republican side.]

The CHAIRMAN. All debate on this amendment is exhausted. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

Mr. LEWIS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Maryland moves to strike out the last word.

Mr. LEWIS. Mr. Chairman, I regret that the gentleman from Oklahoma [Mr. MORGAN], who offered this amendment, felt compelled in a measure to sophisticate its support by the reference to a candidate with which he concluded his remarks. It is obvious to the people and to the House that remarks of that character might as well have been directed to the Democratic candidate——

Mr. MORGAN of Oklahoma. It might be said of the Democratic candidate——

Mr. LEWIS. Who probably spent not a cent to secure his nomination; and I am afraid the gentleman may have injured a very meritorious cause by an obviously partial and partisan conclusion to his address.

Mr. KING. The gentleman included President Wilson in his eulogy.

Mr. LEWIS. I am glad he included the President of the United States.

Now, Mr. Chairman, in regard to the statement just made by the gentleman from Illinois [Mr. CANNON], if the gentleman's reasoning is sound, then all the corrupt-practice laws of all the States themselves, related to human nature as they are and as this law will be, are placed upon the wrong reasoning and based upon misapprehension of human affairs. I do not take that view of this matter. I believe that the strongest tendency among all human being, good and bad, is to obey the law. There are exceptions, and there always have been exceptions; otherwise no law would be required.

I believe, in addition to that, there will be a disposition to respect a Federal law on this subject, even a stronger disposition than is manifested toward the statutes of a State. The people of the country do have, whether they should have or not, more fear of national statutes than they do of the mandates of the State alone, and we therefore have the right to feel that this statute will secure a degree of obedience in the future which the statutes of a State may not have succeeded in obtaining in the past.

On the point as to the amount of money which any individual shall be permitted to contribute, should any individual be permitted to contribute more than $5,000? I rest the argument for that amendment on that question. If any man thinks that an individual should be permitted to contribute more than $5,000, then the burden of proof is upon him. I am in favor of this amendment and shall so vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

Mr. STAFFORD. I ask unanimous consent that the amendment be reported again.

The CHAIRMAN. The Clerk will report the amendment again.

The amendment was again read.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question being taken, on a division (demanded by Mr. MORGAN of Oklahoma) there were—ayes 19, noes 36.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask for tellers.

Tellers were refused, four Members, not a sufficient number, rising to second the demand.

Accordingly the amendment was rejected.

Mr. WALSH. Mr. Chairman, I move to strike out lines 1 to 12, inclusive, on page 13.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WALSH: Page 13, strike out lines 1 to 12, inclusive.

Mr. WALSH. Mr. Chairman, this provision requires a candidate, in addition to filing the many statements already required, to send a statement to the clerk of the United States district court of the judicial district in which the candidate

resides. That applies to Senators and Members of the House; candidates for President and Vice President are excused. It seems to me that is an unnecessary provision and that if any Member of the House disobeys this law or violates its provisions his opponent or the Clerk of the House will see to it that due publicity is given such infraction of law, and that the district attorney for the district will be duly notified in ample time, so that the machinery of the law shall be put into operation to punish the culprit. But it seems to me idle to require that a candidate shall send word to the clerk of the district court by filing a statement of his expenses. You are practically saying to the candidate that he shall send word to the clerk of the district court that he probably has violated the law in running his campaign for this office; but in any event he wants the evidence duplicated and filed ready for disposal.

The gentleman from Missouri [Mr. BORLAND] made a few observations with reference to the purity of elections, following the line of argument made by the gentleman from Indiana [Mr. CULLOP], and I congratulate those two distinguished Democrats that they, with their vivid imaginations, are able to say here on the floor of the House that if a man spends $2,500 he is clothed with purity and honesty, but if he spends one dollar more than that he is committing a crime and is a crook, and that there is so much virtue and righteousness in the sum of $2,500 when expended by a candidate for this branch of the Congress. The gentleman from Missouri [Mr. BORLAND] spoke of misinformation being sent through the mails to constituents during a campaign. Oh, yes, Mr. Chairman; and a fair share of it is sent under a Member's frank.

I want to extend my congratulations also to the distinguished gentleman from Tennessee [Mr. MCKELLAR], who is soon to depart from this body and take his seat in the upper branch, that he stands here as the apostle of purity of the ballot. Time was when the voters from some sections of States not far removed from his vicinity were very familiar with impurity of elections and violations of election laws as applied to Members of Congress and also to State officers. You can not legislate honesty into a human being, and I submit that if you leave this law in the condition in which it is to-day it will be much harder for a poor man to conduct a campaign or become elected a Member of this House. You are practically saying, "You have got to have $2,500 in order to be a candidate for Congress." I trust that this idle, useless provision of the law appearing in the first 12 lines of page 13 will be stricken from the bill.

Let us assume that a candidate for nomination or election can run an honest campaign and that he may have a few friends—one or two at least—who desire his election and will help him honestly and from worthy motives.

If the arguments of some of the gentlemen who have spoken on this bill were followed to their logical conclusion the only proper law that could be enacted would be to prevent a single dollar being expended by the candidate or a political committee.

Mr. RUCKER. I hope this paragraph will not be stricken from the bill. It is not useless or idle. It is a very essential feature of the bill providing for publicity, and I hope it will be left in the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. WALSH].

The amendment was rejected.

Mr. ANDERSON. Mr. Chairman, I offer an amendment as a new section following section 10.

The CHAIRMAN. The gentleman from Minnesota offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON: Page 14, following section 10, insert the following as a new section:

"No disbursements may be lawfully made except for the following purposes, to wit:

"First. For the traveling expenses and expenses of subsistence of the candidate and of the members of political committees and their bona fide officers and assistants.

"Second. The payment of fees or charges for placing the name of the candidate upon the ballot.

"Third. The hire of clerks and stenographers and the cost of clerical and stenographic work and of addressing, preparing, and mailing campaign literature.

"Fourth. Telegraph and telephone tolls, postage, freight, and express charges.

"Fifth. Printing and stationery.

"Sixth. Procuring and formulating lists of voters.

"Seventh. Headquarters or office rent.

"Eighth. Newspaper and other advertising.

"Ninth. Renting of halls or providing places for public meetings and all expenses of advertising and other expenses usually incident to holding such meetings.

"Tenth. For payment of speakers and musicians at public meetings and their necessary traveling expenses."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. ANDERSON].

The amendment was rejected.

Mr. ANDERSON. Mr. Chairman, I offer a further amendment as a separate section.

The CHAIRMAN. The gentleman from Minnesota offers an amendment which the clerk will report.

The Clerk read as follows:

Amendment by Mr. ANDERSON: Insert the following as a new section following section 10:

"Any person who, otherwise than in compliance with the provisions of this act shall hire or employ or offer to hire or employ, or shall reward or give to any person anything of value for his services, or for loss of time or for reimbursement for his expenses in consideration of such person directly or indirectly working or electioneering, except for making public addresses, for or against any candidates or candidate, or who rewards or offers to reward any person for his vote or influence, or the promise of his vote or influence, for or against any candidate for the office of President, Vice President, or Senator of the United States, or Member of the House of Representatives, shall be deemed guilty of a felony, and upon conviction shall be punished by imprisonment in the penitentiary for a term of not less than 1 or more than 10 years."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. ANDERSON].

The amendment was rejected.

The Clerk read as follows:

SEC. 12. That the statements required by section 10 of this act to be made by candidates for Senator or Representative, before nomination and before election, respectively, shall include the full name and post-office address, if known, of each opponent for nomination or election, as the case may be, together with the name or number of the Federal judicial district in which such opponent resides. If any person named in any such statement as a candidate for nomination or election to the office of Senator or Representative shall fail, neglect, or refuse to file any statement therein required, it shall be the duty of the Secretary of the Senate or the Clerk of the House of Representatives, as the case may be, within 30 days after such statement or statements should have been filed, to certify the fact that such candidate has failed to comply with the provisions of section 10 herein to the district attorney of the United States for the Federal judicial district in which said candidate resides, and upon receiving such certificate the district attorney shall immediately ascertain the facts as to those candidates certified to be delinquent and institute prosecutions against all who have violated this act.

Mr. MANN. Mr. Chairman, I move to strike out, on page 16, lines 5 to 8, inclusive.

The CHAIRMAN. The gentleman from Illinois offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 16, strike out all of lines 5 to 8, inclusive.

Mr. MANN. Mr. Chairman, the rest of the section provides that the facts shall be certified to the district attorney. The provision which I have offered moves to strike out the requirement that the district attorney, upon receiving this certificate, shall institute prosecutions against all who have violated this act.

In the first place, the district attorney can not institute prosecutions. All he can do is to lay the matter before the grand jury, and it is the duty of the grand jury to do that. That is not a prosecution until the grand jury reports the indictment. I do not think it ought to be required that if some one innocently failed to comply with this law, perhaps through illness, perhaps through accident, perhaps through lack of knowledge, that he ought to be indicted in every case or that he ought to be prosecuted—whatever that may mean. If the facts are certified to the district attorney, it is his duty to take cognizance of the facts, and if there is any case for prosecution to bring it. It is enough to certify the facts to the district attorney.

Mr. RUCKER. Mr. Chairman, with a part of what the gentleman from Illinois has said I concur, and with a part of what he has said I do not concur. I do not believe that any man after this law has been on the statute books for a while ought to be exempt from penalty because he does not know what the law is, because of ignorance of law. That is not the law in my State, and I do not think it is in the gentleman's State or any State in the Union.

Mr. MANN. Oh, theoretically, that is not true anywhere.

Mr. RUCKER. It is not true anywhere.

Mr. MANN. But no Member of this House can tell the first time what this law means.

Mr. RUCKER. I realize that district attorneys have well-defined duties which they ought to perform, but I thought it would not do any hurt to put this provision in here.

Mr. KING. Is it not the duty of the district attorney to look after violations of law without specific instructions? It looks like a reflection on the district attorney.

Mr. RUCKER. We did not mean any reflection upon attorneys of the United States, as the gentleman knows. I am not particular about the provision remaining in.

Mr. JOHNSON of Washington. What is the penalty for a man failing to file this information?

Mr. RUCKER. The penalty is shown in the section, and is not more than $10,000 or imprisonment not exceeding one year.

Mr. JOHNSON of Washington. Suppose in a district there are 15 candidates and a large number file at the last moment, but 4 or 5 do not send in such a certificate. The district attorney would be obliged to indict them all.

Mr. RUCKER. Not all; those people who complied with the law would not be subject to prosecution.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 13. That the Secretary of the Senate and the Clerk of the House shall, on or before the 15th day of January next after each general election, and after each special election for Senator or Representative, report to the Senate and House, respectively, the name of each candidate for nomination or election to any office referred to in section 10 herein who has filed statements as required by this act, giving the place of residence of each candidate for Senator or Representative who has filed and the congressional district or State, as the case may be, in which he was such candidate. Said report shall recite the total amount of campaign expenses disbursed or expended by any candidate referred to in section 10 herein, or by anyone for him, as shown by such statements; also the name of each candidate for nomination or election to any office therein mentioned, as shown by the files of his office or otherwise ascertained by him, whether nominated or elected or not, who has failed, neglected, or refused to file any or all of the statements required by this act, and in case of a candidate for Senator or Representative said report shall give his place of residence and the congressional district or State, as the case may be, in which he was such candidate, as shown by said files or otherwise ascertained by him; also a like summary of the reports of committees as defined in this act. The reports required by this section shall be printed as public documents.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment as a new section.

The Clerk read as follows:

Insert as a new section after line 8, page 17, the following:

"That it shall be unlawful for any individual or person to contribute money or other thing of value exceeding in value $10,000 in connection with any primary or general election at which electors for President and Vice President of the United States or a Representative in the Congress of the United States are to be voted for.

Mr. MORGAN of Oklahoma. Mr. Chairman, this is the same amendment I heretofore offered, except I have changed the maximum from $5,000 to $10,000. I was very much pleased with the remarks of the gentleman from Maryland [Mr. LEWIS]. I was pleased to see so many Democrats vote for my amendment. It has been the doctrine of the Democratic Party to restrict the amount of money which an individual might contribute in an election.

In the Democratic platform of 1908 I find these words:

We pledge the Democratic Party to the enactment of a law prohibiting any corporation from contributing to a campaign fund, and any individual from contributing any amount above a reasonable maximum, and providing for the publication before election of all such contributions above a reasonable maximum.

Now, in the Democratic platform for 1912 I find this declaration:

We pledge the Democratic Party to the enactment of a law prohibiting any corporation from contributing to a campaign fund and any individual from contributing any amount above a reasonable maximum.

I have glanced over the platform for 1916 of the Democratic Party, and I do not observe that declaration. Now, then, my Democratic friends, twice in succession your party has declared in favor of limiting the amount of funds that an individual may contribute to an election. You came into power in the campaign of 1912 with that language in your platform. You say a reasonable maximum amount. I proposed in my first amendment $5,000 as the maximum one person could contribute, but the majority of you did not vote for my amendment, and I have given you another chance. The amendment I now propose fixes the maximum at $10,000. You must vote to pass this amendment or go back on the solemn pledge that you made in your two platforms.

Mr. KEATING. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Certainly.

Mr. KEATING. Will the gentleman guarantee that the Members on his side of the aisle will vote for his amendment?

Mr. MORGAN of Oklahoma. I will guarantee that some of them will vote for it.

Mr. BRUMBAUGH. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. BRUMBAUGH. I was going to suggest to the gentleman that he try and convert an equal number on that side and his amendment will carry.

Mr. MORGAN of Oklahoma. I do not find any specific declaration in the platform of the Republican Party on this point. I do find two specific declarations of your party. I know and you know that the American people trusted the Government to you and you came before the people with those two declarations in your platform, and now I say you have to keep your platform pledges. Here are two pledges that can not be misconstrued in any way as to what it said. I will presume that you made them in good faith and you should keep them in good faith; and I hope, as I fixed the limit at $10,000, you will send out word to the country that you have agreed to my amendment and redeemed one solemn, specific pledge that you made to the American people. If you do, the people will give you credit and approve your action, and I hope the Republicans on this side will join in and let us say to the American people that the time has come when a man with unlimited means shall not with his money multiply his influence in elections a thousandfold. Vote for this amendment and please the American people.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken; and on a division (demanded by Mr. MORGAN of Oklahoma) there were—ayes 22, noes 35.

So the amendment was rejected.

The Clerk read as follows:

SEC. 17. That every person who shall willfully violate any of the provisions of this act shall, upon conviction, be fined not more than $10,000 or imprisoned not more than one year, or both.

No candidate for Senator or Representative found by the House in which he claims membership to be a party to a violation of this act shall receive or retain the office to which he was declared elected.

Mr. MANN. Mr. Chairman, I move to strike out, on page 18, lines 3 to 6, inclusive.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 18, by striking out lines 3 to 6, inclusive, being the language:

"No candidate for Senator or Representative found by the House in which he claims membership to be a party to a violation of this act shall receive or retain the office to which he was declared elected."

Mr. MANN. Mr. Chairman, this language provides in substance that any candidate for Senator or Representative who has violated this act shall not receive or retain the office to which he was declared elected. Just how you could determine that he should not receive the office I do not know.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. MANN. Just one moment. Of course, the provision is plainly unconstitutional, as far as that is concerned. The Constitution provides:

Each House shall be the judge of the elections, returns, and qualifications of its own Members.

I would be perfectly willing to adopt a policy providing that where a man has willfully violated this act, and that is determined, he shall be excluded from Congress, but under the language of the bill it is provided that he shall not receive the office.

We receive our certificates of election, and we come here on the first day of the first session to be sworn in. It will not have been decided by that time whether a man has violated the law; but supposing I should rise on the floor of the House and charge that all of the Members from the Southern States have violated this law, would you have them stand aside? Nobody knows. We would never organize Congress if such a ruling would be held, and it is not held; it does not amount to anything until Congress has acted on the case, and then the House must be the judge itself under the Constitution whether it will declare that somebody else was elected or declare the seat vacant. I now yield to the gentleman from Missouri.

Mr. RUCKER. Mr. Chairman, in the report which accompanies the bill the committee expressly stated that we retain this provision in the bill simply because we found it in the Senate bill, and that we refrain from expressing any opinion as to its constitutionality. The fact is that no member of the committee believed it was constitutional.

Mr. MANN. The gentleman means that this matter was inserted in the Senate?

Mr. RUCKER. Yes.

Mr. MANN. Of course no one has ever accused the Senate of knowing what the Constitution is.

Mr. RUCKER. I want to say to the gentleman that the committee of the House left the language which we found in the Senate bill for the simple purpose of taking the sense of the House upon it.

Mr. MANN. I think it would better go out, and if the Senate puts it in it can go to conference.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

Mr. DAVIS of Texas. Mr. Chairman, I move to strike out the last word. I just want to be heard and put myself on record in this matter. During both the years that the platform declared for a maximum limit on campaign contributions I campaigned 12 or 15 States. I cheerfully supported that declaration in the

platform and I voted in this bill for the limit of $5,000, believing it was a proper limit, and I voted for the limit of $10,000, believing that was a proper limit—a second choice—and yet we stand here as a House of Representatives and prohibit a candidate from expending more than $2,500 for his own expense and on his own account in a campaign and then allow his wife's brother and his daddy-in-law, who has half a million, to spend a hundred thousand dollars secretly, somewhere, in support of a party or candidate and not compel him to report it. I want myself recorded as having supported a proper limit, in proportion, as the platform directed. I think we have made ourselves absolutely ridiculous as a legislative body in ignoring a platform of that sort and voting down these very proper and necessary limitations. I want a law with virtue and power to prevent organized plutocracy from sluicing out funds to sway and debauch elections.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

The Clerk concluded the reading of the bill.

Mr. RUCKER. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15842, relating to publicity of campaign contributions, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. RUCKER. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? [After a pause.] If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. MANN. Mr. Speaker, I move to recommit the bill to the Committee on the Election of President, Vice President, and Representatives in Congress.

The SPEAKER. The question is on the motion of the gentleman from Illinois to recommit the bill to the Committee on the Election of President, Vice President, and Representatives in Congress.

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 46, noes 58.

So the motion was rejected.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

On motion of Mr. RUCKER, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. MORGAN of Oklahoma. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon this bill.

Mr. RUCKER. Mr. Chairman, pending that, I ask unanimous consent that all Members who desire to do so may have leave to extend their remarks in the RECORD upon the bill.

Mr. MANN. I shall object to that.

The SPEAKER. The gentleman from Illinois objects. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection and it was so ordered.

Mr. McKELLAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, the gentleman spoke of his desire to preserve the purity of elections. Does the gentleman intend to extend his remarks by including the amount of how much it cost to distribute his brilliant speeches and public documents? The gentleman said that he wanted it all put in

Mr. McKELLAR. I have accounted for what it cost me——

Mr. MANN. Oh, no; the gentleman has not accounted for the public documents he distributed at public expense.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

ENROLLED BILLS SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 6057. An act to amend section 14 of the reclamation extension act approved August 13, 1914;

H. R. 11262. An act for the relief of Mrs. C. D. Corbin; and

H. R. 11261. An act for the relief of Mary S. Corbin.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 12193. An act making appropriations for the construction, repair, and preservation of certain public work on rivers and harbors, and for other purposes.

INTERSTATE AND FOREIGN COMMERCE.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for the present consideration of Senate joint resolution No. 60. If that is granted, I shall ask that it be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Georgia asks unanimous consent for the present consideration of the Senate joint resolution, which the Clerk will report by title.

The Clerk read as follows:

Senate joint resolution (S. J. Res. 60) creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that it be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the joint resolution be considered in the House as in the Committee of the Whole House on the state of the Union. Is there objection?

ORDER OF BUSINESS.

Mr. MANN. As I understand, consent to consider this bill having been given, so that it will come up this afternoon and probably be disposed of, what is the intention then of the leader of the majority in reference to the work in the House for the future?

Mr. ADAMSON. I yield to the gentleman from North Carolina [Mr. KITCHIN].

Mr. KITCHIN. I will say to the gentleman from Illinois and to the House that upon the disposition of this resolution the legislative program of the administration so far as the House is concerned will have been completed. I would like to have unanimous consent that after Monday—let the unanimous-consent business go ahead Monday—that the House will take up nothing else but, of course, the conference reports, except by unanimous consent, and if we can get that then we can adjourn over three days at a time, waiting on the Senate.

Mr. MANN. I will say to the gentleman that while I would be glad to see that arrangement made, I do not think it is practicable. But I think this is, that we can have an understanding that if there is a contest which goes to the point of consideration or disposition of Senate amendments or conference reports, or something of that sort, we will endeavor to give Members who are absent notice sufficient so that they can come back. Of course we can not say we will not consider anything except by unanimous consent, because we have got to dispose of appropriation bills and Senate amendments, or some other things.

Mr. KITCHIN. Except these bills that come from the Senate and conference reports. I mean no original legislation in the House.

Mr. MANN. What I want to get at is, if Members go home or go away from Washington, with the assurance that they will be fairly well taken care of, you can not do any business without a quorum, without notifying them to come back. The majority would want to reserve the right to do that.

Mr. LLOYD. There is one conference report it seems to me that ought to be provided for before the gentleman's agreement is entered into.

Mr. MANN. All conference reports will be provided for.

Mr. LLOYD. What I mean is, it is a very important matter, and it is agreed upon, and there ought to be a quorum here when

we consider it. I have reference to the Post Office appropriation bill, which was agreed upon yesterday.

Mr. MANN. If there is going to be a conflict or fight over it in the House, we would have to send word out, anyhow. That is what I want to get at.

Mr. KITCHIN. When will that be ready to be taken up in the House?

Mr. LLOYD. The chairman of the conference committee——

Mr. KITCHIN. Would that be ready Tuesday?

Mr. LLOYD. The gentleman is not on the floor, so I can not answer.

Mr. KITCHIN. What does the gentleman think about it?

Mr. LLOYD. I think it would be ready Tuesday, and I think it ought to be disposed of Tuesday, and I think we ought to have a quorum here when the bill is considered.

Mr. MANN. Here is the situation, and the gentleman from Missouri [Mr. LLOYD] understands it is a practical proposition: There may be a quorum in town to-day, but I doubt it. A large number of Members have gone away with the understanding, even now, that we would send notice if anything was to come up where there was to be a contest. The majority, in order to protect itself, must be in a position to give that kind of a notice.

Mr. LLOYD. On this particular matter, the Post Office bill, personally I am very anxious to agree to the conference report.

Mr. KITCHIN. Would the conference report go to the Senate first or come here?

Mr. LLOYD. To the Senate first.

Mr. KITCHIN. Then, of course, we can not tell whether we can agree upon it Tuesday or Wednesday.

Mr. GARNER. Why not have a mutual understanding that if there is a contest to come up in any case that there be three days' notice given to the absent Members?

Mr. MANN. If a contest develops that we notify the absent Members.

Mr. GARNER. You can use the words "contest develops," but if there is no quorum we will protect them and protect the absentees by adjourning three days and give them a chance to come back.

Mr. JOHNSON of Washington. Would that include the Pacific coast Members?

Mr. GARNER. Yes; or the Texas Members.

Mr. MANN. That will protect the Pacific coast Members. They would come back in air machines. They are always up in the air.

Mr. KITCHIN. Let us have an understanding, if there is any contest, that we give three days' notice. If there is any contest, we will give the minority leader three days' notice.

Mr. MANN. In other words, gentlemen may leave the city of Washington subject to call?

Mr. KITCHIN. Subject to call of three days, after Monday.

Mr. MANN. Now, Monday is unanimous-consent day.

Mr. KITCHIN. Monday is unanimous-consent or suspension day.

Mr. MONDELL. Mr. Speaker, do I understand the leader of the majority to say that he does not expect to bring up any legislation hereafter, for the present at least, under suspension of the rules?

Mr. KITCHIN. Monday will be unanimous-consent day.

Mr. MONDELL. Will there be some suspension of the rules on that day?

Mr. KITCHIN. I suspect so. They can do it under the rules.

Mr. ADAMSON. But if there is a contest develops on any question Monday——

Mr. MANN. Let gentlemen understand who have special bills now that there is not much chance to pass them during the rest of the present session of Congress.

Mr. KITCHIN. As to new legislation or bills now, you can not pass them except in two ways, by suspension of the rules and by unanimous consent, for the reason that you can not reach them on the calendar or in any way unless you bring in a special rule, and we are not going to bring in a special rule.

Mr. ADAMSON. What I was suggesting to the gentleman from North Carolina was this, in answer to the gentleman from Wyoming [Mr. MONDELL], if on Monday a contest develops the agreement you just made applies to that also?

Mr. KITCHIN. I said in my statement Monday would be unanimous-consent day, and that takes care of itself.

Mr. ADAMSON. That ought to be understood.

Mr. KITCHIN. We do not dispense with Monday.

Mr. NOLAN. I wish to say that I expect to get recognition on Monday to suspend the rules to pass the minimum-wage bill.

Mr. KITCHIN. I understand that. Therefore I did not include Monday in my understanding.

The SPEAKER. Is there objection to the request of the gentleman from Georgia [Mr. ADAMSON]?

Mr. MONDELL. Reserving the right to object, Mr. Speaker——

The SPEAKER. The Chair hears none.

Mr. MONDELL. Mr. Speaker, reserving the right to object, the gentleman from North Carolina [Mr. KITCHIN] does not expect to attempt to make provision for the passage of any legislation after Monday, except for bills as they come over from the Senate?

Mr. KITCHIN. Conference reports, unless——

Mr. MONDELL. I would say to the gentleman that there are a number of bills on the calendar that are very important to Members from the West. Now, all those men have to remain here. They do not get the benefit of these intermissions.

Mr. KITCHIN. Let me say to the gentleman——

Mr. MONDELL. Just a moment. We are expected to stay here; we are compelled to stay here, as a matter of fact. We will remain here, and yet we are notified that so far as concerns our legislation, which has not had consideration, although the bills have been on the calendar for many months, we are to remain here marking time, with no opportunity to secure consideration of our legislation except by unanimous consent.

Mr. KITCHIN. You will have the same opportunity that you would have anyway, unless you get a special rule, because you can not reach one of those bills to save your life except on Calendar Wednesday. If there is any contest on any other proposition, the minority leader there will be given three days' notice.

Mr. MONDELL. There will be some contest.

Mr. KITCHIN. Then he will be given three days' notice to take them up.

Mr. MONDELL. What I want to know is if the gentleman from North Carolina, who is responsible for legislation, has in mind the giving of any opportunity to consider this legislation?

Mr. KITCHIN. You will have the same opportunity any time we meet. You will have it by unanimous consent. You will have it on the Unanimous Consent Calendar. You will have opportunity for those things, of course.

Mr. GARNER. In the last seven days of the session the gentleman will have opportunity.

Mr. KITCHEN. I do not know as to that.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

Mr. COOPER of Wisconsin. Mr. Speaker, I ask to have the propositions pending before the House restated.

The SPEAKER. The proposition is to have this bill considered in the House as in Committee of the Whole.

Mr. COOPER of Wisconsin. Mr. Speaker, I was under a misapprehension. I was in the library when I heard this statement made by the gentleman from North Carolina.

Mr. KITCHIN. The gentleman would have understood it as well if he had stayed in the library. We have been mixing it up. [Laughter.]

The SPEAKER. The gentleman from North Carolina and the gentleman from Illinois [Mr. MANN] broke in with the gentleman from Georgia and had a confabulation for some time. [Laughter.]

Mr. ADAMSON. They did not have to break in in order to get in.

The SPEAKER. Is there objection?

Mr. COOPER of Wisconsin. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from North Carolina what it was he said?

Mr. KITCHIN. The Lord only knows. [Laughter.]

Mr. MANN. Does not the gentleman know what the governor of North Carolina said to the governor of South Carolina? [Laughter.]

Mr. COOPER of Wisconsin. Mr. Speaker, may I make a parliamentary inquiry?

The SPEAKER. Yes. Let the gentleman state it.

Mr. COOPER of Wisconsin. Has there been anything like a contest agreement made as to the conduct of business before the House?

The SPEAKER. Yes; that three days' notice will be given of a contested bill by the gentleman from North Carolina and the gentleman from Illinois.

Mr. COOPER of Wisconsin. Mr. Speaker, I ask unanimous consent that I may have two minutes on that proposition.

The SPEAKER. Does the gentleman object to getting this other proposition out of the way first? The Chair may forget it himself otherwise. [Laughter.]

Mr. COOPER of Wisconsin. I do not.

The SPEAKER. Is there objection to considering this bill in the House as in Committee of the Whole?

There was no objection.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. Mr. Speaker, I wish to direct the attention of the House to what is involved in the proposition made, as I am informed by the gentleman from North Carolina [Mr. KITCHIN], and tacitly agreed to. He said that as to unimportant legislation there would be no objection; that most things would go through. Presumably there will be few Members on the floor.

But in this connection there is a fact which gentlemen should not forget; that the most important proposition before the House of Representations in 25 years is likely to be contained in the conference report yet to be written and submitted on the water-power bill.

Mr. ADAMSON. The gentleman need not have any apprehension about that. He will be fully heard before that is ever done.

Mr. COOPER of Wisconsin. That is not what I mean. My views are not of paramount importance. But, in my judgment, the proposed water-power legislation more vitally concerns the people of the United States than has any other bill considered by the House in a generation.

The water powers of the country ought to be developed, but they should be developed only under safeguards that will thoroughly protect the public. And unless that conference report shall contain provisions properly to safeguard the interests of the people there will result such a monopolization of power, and consequently of control over the industries of a Nation, as the world has never known. No well-informed person can doubt this. No one can read the messages of Presidents vetoing previous water-power bills; no one can read the alleged arguments put forth by men who want these water powers turned over to them without anything like proper control on the part of the Government; no one can read all these and not be impressed by the vast importance of the conference report yet to be brought in.

Mr. ADAMSON. The gentleman need not have any apprehension.

Mr. COOPER of Wisconsin. I am directing attention to the way in which we legislate.

Mr. ADAMSON. Mr. Speaker, will the gentleman yield?

Mr. COOPER of Wisconsin. I have no time to yield now. Many weeks ago the Post Office appropriation bill passed the House and went to the Senate. It has been in conference for a long time. The newspapers have from time to time informed us that the conferees were struggling over important propositions—propositions vitally important to a proper administration of the Post Office Department. But the conference report on that bill also has been held up until midsummer, when Members are anxious to leave Washington to take part in the campaign.

The water-power bill was reported to the House on the 21st of March, but not brought up for consideration until a few days ago, in the intense heat of mid-July, and then during the debate we were two or three times quietly informed that, after all, the bill which is expected to become the future law will be written in conference.

Gentlemen talk about there being only unimportant legislation to come up, and they promise that should important measures be brought in we shall have three days' notice. But who can go to his distant home and come back here again? Only a rich man can afford the expense.

Mr. KITCHIN. We are not telling Members to go home; but we do not want to sit here three days doing nothing in this House, waiting on the Senate.

Mr. COOPER of Wisconsin. I wish to protest against this method of holding up proposed legislation until midsummer and then, when a long-delayed bill is brought up, calmly informing the House that the conference report is to embody the provisions of the law to be placed on the statute books.

Mr. SHERLEY. If the gentleman will yield I will relieve his mind by saying that that conference report is not coming in at this session.

Mr. COOPER of Wisconsin. Will it not come in at this session?

Mr. SHERLEY. It will not.

Mr. COOPER of Wisconsin. Which conference report is that?

Mr. SHERLEY. On the water-power bill.

Mr. ADAMSON. I think I can administer a sedative to the gentleman——

Mr. COOPER of Wisconsin. The gentleman from Kentucky [Mr. SHERLEY] has just assured the House that the conference report on the water-power bill will not come in at this session. Is that so, I ask the chairman of the House conferees?

Mr. ADAMSON. What is the gentleman's question?

The SPEAKER. The time of the gentleman from Wisconsin has expired.

Mr. COOPER of Wisconsin. I ask one minute more, in order to ask the gentleman from Georgia a question.

Mr. ADAMSON. What is the question?

Mr. COOPER of Wisconsin. The gentleman from Kentucky [Mr. SHERLEY] has just said that the conference report on the water-power bill will not come in at this session. Is that so?

Mr. ADAMSON. Mr. Speaker, I have been trying for the last five minutes to get the gentleman from Wisconsin to yield. I want to ask him a question myself.

Mr. COOPER of Wisconsin. I ask the chairman if the statement of the gentleman from Kentucky [Mr. SHERLEY] is true?

Mr. ADAMSON. I have been trying for five minutes to administer a sedative to the gentleman.

The SPEAKER. The time of the gentleman from Wisconsin has expired. The gentleman from Georgia, who has charge of this joint resolution, is recognized.

Mr. ADAMSON. If the gentleman will allow me——

Mr. COOPER of Wisconsin. Mr. Speaker, I ask for one minute more for the purpose of hearing the answer to my question.

Mr. ADAMSON. I will answer in my own time, if the gentleman will allow me.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent for one minute more. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. I ask the gentleman from Georgia if the statement just made to the House by the distinguished gentleman from Kentucky [Mr. SHERLEY] that there will be no conference report presented by the conferees on the water-power bill at this session is correct?

Mr. ADAMSON. I do not know whether the Senate is ready to yield on the points which the House insists upon or not. If the Senate yields, there will be a conference report. Otherwise there will not.

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] is recognized.

Mr. MANN. Let the joint resolution be read.

Mr. ADAMSON. I want to hear the joint resolution read before I speak.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had disagreed to the amendments of the House to the bill (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce, had asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SHIELDS, Mr. BANKHEAD, and Mr. NELSON as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 5425) to standardize lime barrels.

WATER POWER.

Mr. ADAMSON. I am not in a hurry to take up that conference, Mr. Speaker, but I ask unanimous consent to print that bill in parallel columns, showing the two bills.

Mr. MANN. What bill?

Mr. ADAMSON. The bill that has just come in from the Senate—the water-power bill (S. 3331).

The SPEAKER. The gentleman asks to have the water-power bill printed in parallel columns to show the difference between the House and Senate provisions. Is there objection?

Mr. MANN. What is the object of that now?

Mr. ADAMSON. The subject has come up here all of a sudden. The gentleman asked the other day to have that done. I thought we had agreed to it then.

Mr. MANN. If we had had it during the consideration of the bill, it would have been of some use.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

INTERSTATE AND FOREIGN COMMERCE.

Mr. ADAMSON. Mr. Speaker, we were about to have the joint resolution reported by the Clerk.

The SPEAKER. The Clerk will report the joint resolution.

The Clerk read Senate joint resolution 60, creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to

interstate and foreign commerce and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee, as follows:

Resolved, etc., That the Interstate Commerce Committee of the Senate and the Committee of the House of Representatives on Interstate and Foreign Commerce, through a joint subcommittee to consist of five Senators and five Representatives, who shall be selected by said committees, respectively, be, and they hereby are, appointed to investigate the subject of the Government control and regulation of interstate and foreign transportation, the efficiency of the existing system in protecting the rights of shippers and carriers and in promoting the public interest, the incorporation of control of the incorporation of carriers, and all proposed changes in the organization of the Interstate Commerce Commission and the act to regulate commerce, also the subject of Government ownership of all public utilities, such as telegraph, telephone, express companies, and railroads engaged in interstate and foreign commerce and report as to the wisdom or feasibility of Government ownership of such utilities and as to the comparative worth and efficiency of Government regulation and control as compared with Government ownership and operation, with authority to sit during the recess of Congress and with power to summon witnesses, to appoint necessary experts, clerks, and stenographers, and to do whatever is necessary for a full and comprehensive examination and study of the subject and report to Congress as expeditiously as may be; that the sum of $24,000, or so much thereof as is necessary to carry out the purposes of this resolution and to pay the necessary expenses of the subcommittee and its members, is hereby appropriated out of any money in the Treasury not otherwise appropriated. Said appropriation shall be immediately available and shall be paid out on the audit and order of the chairman or acting chairman of said subcommittee, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of such subcommittee.

Mr. ADAMSON. Mr. Speaker, I am ready for a vote.

Mr. KITCHIN. Mr. Speaker, I want to ask the gentleman if, in his opinion, the object of this resolution or any part of it is finally to deprive the States of any of their rights over intrastate traffic or other intracommon-carrier matters which the States have been exercising heretofore.

Mr. ADAMSON. Mr. Speaker, I am not the author of this resolution, but in so far as in me lies I expect to be the finisher of it if that turns out to be the purpose.

Mr. MANN. Will the gentleman yield? As long as the matter has been introduced, was not that the reason given by the proponents of the resolutions in the hearings before the committee of which the gentleman is the chairman?

Mr. ADAMSON. I will say to the gentleman that the carriers think there ought to be some changes which would improve the conditions under which they work and the treatment they receive, and they have made that showing before the committee; but as I understand it, this joint committee will hear both sides of the question, and I doubt if the purpose of centralization or nationalization in its complete extent will ever be realized as a result of the investigation.

Mr. MANN. If the gentleman will yield—I do not want to take the floor in my own right—if I could beat this resolution I would do so, but I realize that it is the intention of the majority to put it through.

Mr. GARNER. This is not a partisan measure.

Mr. MANN. Oh, the President has said that this resolution should be passed. What is the use of quarreling with me about this?

Mr. GARNER. This is the first time I have heard that it is a partisan measure.

Mr. MANN. It is.

Mr. KITCHIN. I want to say to the gentleman that if I thought that that was the object of it, or that the passage of this resolution would effect anything of the kind that has been suggested, I would oppose it myself.

Mr. MANN. The trouble is that the gentleman will not think that way in view of the fact that the President has indicated that he wants it passed. Everybody who knows anything about the resolution knows that it was gotten up by attorneys for the railroad companies for the express purpose of having hearings to demonstrate that State control over railroads should be abolished, that control over railroads should be in the Interstate Commerce Commission; and the attorneys for the railroads not only have succeeded in getting this resolution in shape where it has passed one body and is going to pass another, but they succeeded in getting a plank in the Republican platform in Chicago in 1916. The resolution is intended to carry out what both parties are pledged to do, which I think is improper.

Mr. ADAMSON. Mr. Speaker, the purpose, so far as our committee understood it, was the investigation in order to know the truth of these matters. The Republican convention placed in their platform a demand that blindly and without investigation they would go to the full limit of nationalization. We believe that it is absolutely necessary that an investigation should be had in order to show the truth and let the country know whether that demand is wise. We are not afraid of the truth, and we will have members on that committee who will stand by the truth.

Mr. DUPRÉ. Will the gentleman yield?

Mr. ADAMSON. Certainly.

Mr. DUPRÉ. I want to ask the gentleman this question: Is the investigation of water transportation contemplated?

Mr. ADAMSON. I think it says "carriers," and water carriers make joint routes with the railroad carriers.

Mr. HUDDLESTON. Will the gentleman yield?

Mr. ADAMSON. I will.

Mr. HUDDLESTON. Has this resolution any relation to the dispute between the railroads and the employees in regard to the eight-hour day?

Mr. ADAMSON. Not a particle.

Mr. HUDDLESTON. Is any action to be taken with reference to it?

Mr. ADAMSON. The resolution relates to the method of regulating transportation, corporations that do a transportation business.

Mr. HUDDLESTON. Has the gentleman's committee any resolution before it in relation to the dispute between the railroads and the employees on that matter?

Mr. ADAMSON. Four months ago when the clouds gathered above the horizon the Republican leader and I investigated to see whether there would be any strike. I will not say where we went, but we were assured by the representatives of the employees that there would be no walkout and they did not mean to stop the wheels, and the Interstate Commerce Commission did not favor any investigation, and I concluded that no action was necessary and dropped the subject.

Mr. MANN. I hope the gentleman will not put me into that agreement.

Mr. ADAMSON. I did not mean to say that the gentleman agreed to that, but there is a resolution in the Senate proposing to investigate the subject of wages, but it is entirely disconnected with this resolution. This resolution has no such purpose or scope.

Mr. GREEN of Iowa. Mr. Speaker, I move to amend by striking out lines 1 and 2, on page 1.

The SPEAKER. The Clerk will report the amendment.

The CLERK. Mr. GREEN of Iowa moves to strike out the resolving clause.

Mr. GREEN of Iowa. Mr. Speaker, this measure is the most comprehensive bill that has ever been introduced for sending a lot of valuable legislation to the legislative graveyard. It is intended to put off, as it seems to me, or at least the result will be to put off some very important and necessary legislation until long after January 1, 1917. I am entirely opposed to the bill, and while I have not had any conference with the distinguished gentleman from Georgia [Mr. ADAMSON], I have my doubts whether he is very much in favor of it. I am unable to see what purpose can be accomplished except to put off measures described on page 2 of the resolution from being considered by the House. Consider for a moment what these are. They are "the Government control and regulation of interstate and foreign transportation." That will not be considered until after the committee reports. "The efficiency of the existing system in protecting the rights of shippers and carriers, and in promoting the public interest"; "the incorporation or control of carriers." That will not be considered until after the 1st of January, 1917, and then it will take a long time to get any legislation started. All proposed changes in the interstate-commerce law ought not to go over until after January 1, 1917. The subject of Government ownership of all public utilities, such as telegraphs, wireless, telephone, express companies, and railroads engaged in interstate and foreign commerce is to be postponed. Probably a large number of members would like to have that postponed until after January 1, 1917, and considerably later. As far as I am concerned I would not.

There is the further subject of the comparative worth and efficiency of Government regulation and control, as compared with Government ownership and operation. All these measures concerning which we probably would have received some important bills from the Committee on Interstate and Foreign Commerce, which would be submitted to the House and brought up for consideration, will be postponed if this resolution passes.

Mr. Speaker, I do not believe that the people want all subjects disposed of in this kind of a way. The practical effect will be to take them from the consideration of the committee until after January, 1917, which would mean that it would be a year or two later than that before new bills could be reported from the committee; in other words, two to five years before we would get any legislation on this subject. I think that that is the real purpose at the bottom of this resolution when it originated in another Chamber.

Mr. CRAMTON. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. CRAMTON. Does the gentleman consider that in a period of less than six months this commission can make an investigation of these matters that will amount to anything or that will furnish any information to Congress?

Mr. GREEN of Iowa. I do not think it could. I do not think the commission could accomplish anything in that time.

Mr. BARKLEY. Will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. BARKLEY. Does the gentleman think that if the resolution was not passed or considered that any legislation could be adopted between now and the second Monday in January?

Mr. GREEN of Iowa. There ought to be, or at least to get legislation originated.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield further?

Mr. GREEN of Iowa. Yes.

Mr. CRAMTON. It being impossible for this commission to accomplish anything in that time, is it not quite probable that the commission being organized and not ready to report on the 1st of January, we will then be called upon for a continuance of six months or a year or two years, during which there could be no legislation on these subjects?

Mr. GREEN of Iowa. Yes; that is also likely, but that is the object and purpose of the resolution as I view it.

The SPEAKER. The question is on the amendment of the gentleman from Iowa—to strike out the resolving clause.

The question was taken, and the amendment was rejected.

The SPEAKER. The question now is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. ESCH. Mr. Speaker, I move to amend by inserting, after the word "wireless," in line 11, page 2, the word "cable."

Mr. ADAMSON. Mr. Speaker, I have no objection to that.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 11, after the word "wireless," insert the word "cable."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question now is on the third reading of the Senate joint resolution.

The question was taken, and on a division (demanded by Mr. ADAMSON) there were—ayes 39, noes 18.

The Senate joint resolution was read a third time.

The SPEAKER. The question now is on the passage of the joint resolution.

The question was taken, and the Senate joint resolution was passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

EXCHANGE OF CERTAIN LANDS IN PITTSBURGH.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent that Senate joint resolution 150, to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal value be laid before the House.

Mr. MANN. Has a similar House resolution been reported?

Mr. FOSTER. Yes; there is a similar House joint resolution on the calendar.

The SPEAKER. The gentleman from Illinois asks unanimous consent that Senate joint resolution 150 be laid before the House for consideration at this time. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Senate joint resolution 150.

Resolved, etc., That the Secretary of the Treasury be, and he is hereby, authorized to accept from the city of Pittsburgh, State of Pennsylvania, that certain lot or parcel of land bounded and described as follows:

Beginning at a point on the line dividing the properties owned by the city of Pittsburgh and the United States of America, occupied by the Bureau of Mines, at a point north 76° 45′ west 42.8 feet from the southeast corner of the said property of the United States of America; thence south 15° 24′ 55″ west 18.44 feet to a point; thence north 74° 36′ 55″ west 457.06 feet to a point; thence south 15° 28′ 45″ west 37.087 feet to a point; thence north 74° 36′ 55″ west 449.66 feet to a point; thence north 15° 28′ 45″ east 21.727 feet to a point on the said line dividing the properties of the city of Pittsburgh and the United States of America; thence south 76° 45′ east 907.39 feet to the place of beginning, containing 18,000 square feet, more or less, for the use of the Bureau of Mines of the Department of the Interior, and to transfer to the city of Pittsburgh in exchange therefor that certain lot or parcel of land now constituting a part of the grounds of the Bureau of Mines of the Department of the Interior bounded and described as follows:

Beginning at a point on the line dividing the properties owned by the city of Pittsburgh and the United States of America, occupied by the Bureau of Mines, at a point north 76° 45′ west 42.8 feet from the southeast corner of said property of the United States of America; thence north 15° 24′ 55″ east 347.8 feet to a point on the dividing line between the properties of the United States of America and the Carnegie Institute of Technology, a Pennsylvania corporation; thence along said dividing line south 50° 41′ 15″ east 47.18 feet to a point; thence along the line dividing the property of the United States of America from the property of the said Carnegie Institute of Technology and the city of Pittsburgh south 15° 28′ 45″ west 327.08 feet to a point; thence north 76° 45′ west 42.8 feet to the place of beginning; together with that part of a circular tract lying west of the above-described tract of land and included within an arc struck with a radius of 51 feet from a point 5 feet east of a point on the westerly line 257 feet from the southwest corner of the above-described tract; said lot or parcel of ground comprising 18,000 square feet, more or less.

The SPEAKER. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. FOSTER, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

By unanimous consent, House joint resolution 256, of similar intent, was laid on the table.

EXTENSION OF REMARKS.

Mr. VINSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of rural credits.

The SPEAKER. Is there objection?

There was no objection.

Mr. CULLOP. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein a letter from the President of the United States to Mr. Edward N. Hurley, of the Federal Trade Commission.

The SPEAKER. Is there objection?

There was no objection.

The letter referred to is as follows:

THE WHITE HOUSE,
Washington, May 12, 1916.

MY DEAR MR. HURLEY: Your Boston speech is before me, in which you outline some of the work which the Federal Trade Commission is doing for the business men of the country. I wish to commend your efforts generally, and in particular your endeavor to assist the small manufacturer and merchant to better his condition by helping him to improve his cost accounting and bookkeeping methods.

This is a step in the right direction and one of the main fundamentals of any successful business. It is most important to the future success of a business man that he should know what his goods actually cost to manufacture and to sell. If he has these facts, they will enable him to present a modern balance sheet to his bank, and as a result he will be better able to obtain credit with which to expand and develop his business.

Your suggestion that trade associations, associations of retail and wholesale merchants, commercial clubs, boards of trade, manufacturers' associations, credit associations, and other similar organizations should be encouraged in every feasible way by the Government seems to me a very wise one. To furnish them with data and comprehensive information in order that they may more easily accomplish the result that they are organized for is a proper and useful Government function. These associations, when organized for the purpose of improving conditions in their particular industry, such as unifying cost-accounting and bookkeeping methods, standardizing products and processes of manufacture, should meet with the approval of every man interested in the business progress of the country.

Too much emphasis can not be placed on your suggestion that materials, methods, and products in industry should be standardized upon the basis of specifications drawn up in friendly cooperation with engineering societies, industrial experts, and trade associations. Further standardization in our industries will not only reduce the cost of production, but assure the producer better materials and more efficient workmanship, and to the consuming public the manifest benefit resulting from not having to pay for a wide and increasing variety of products and materials. Judicious standardization also means a greater return on a given investment. Capital now tied up because of inefficient methods will be released and can be used effectively elsewhere.

If we are to be an important factor in a world's markets, we must be more thorough and efficient in production. The encouragement of trade associations and standardization, and the installing of better cost-accounting methods in our business concerns will go a long way toward accomplishing this end.

It is my hope that, in addition to the other work which the Federal Trade Commission is doing, it will ascertain the facts regarding conditions in our various industries. If it finds that an industry is not healthy, it should, after carefully considering the facts, in cooperation with the parties interested, suggest a practical and helpful remedy. In this way many of our difficult business problems might be solved.

I am very anxious to see you continue to cooperate with the business men of the country along the lines upon which you are working.

Cordially and sincerely, yours,

WOODROW WILSON.

Hon. EDWARD N. HURLEY,
Federal Trade Commission.

Mr. OLIVER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein a statement recently issued by my colleague, the gentleman from Georgia, Mr. HOWARD, with comments thereon.

The SPEAKER. Is there objection?

Mr. MANN. Is that a newspaper statement?

Mr. OLIVER. No; it is just a statement that the gentleman has issued personally. I do not know that it has been published in the newspapers.

The SPEAKER. Is there objection?

There was no objection.

Mr. SCHALL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the shipping bill, and the armor-plate factory provision of the naval bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD with reference to an investigation of the Pere Marquette Railroad Co. by the Interstate Commerce Commission.

The SPEAKER. Is there objection?

There was no objection.

Mr. FESS. Mr. Speaker, on behalf of the gentleman from New Jersey [Mr. CAPSTICK], who is ill at his home with bronchial pneumonia, I ask unanimous consent that he may be permitted to extend his remarks in the RECORD on a resolution that he introduced on the subject of facilitating correspondence by soldiers at the front.

The SPEAKER. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 44 minutes p. m.) the House adjourned until Monday, July 17, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Treasury, transmitting an estimate of deficiency in the sum of $200, submitted by the Commission of Fine Arts for expenses of the commission for the fiscal year ending June 30, 1916 (H. Doc. No. 1289), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 16681) to promote the safety of employees and travelers on railroads by requiring common carriers engaged in interstate commerce by railroad to afford a safe clearance between structures located on their roadways and locomotives and cars passing over their lines, to require such common carriers to equip their passenger cars with cinder deflectors, and for other purposes, reported the same with amendment, accompanied by a report (No. 979), which said bill and report were referred to the House Calendar.

Mr. HADLEY, from the Committee on the Merchant Marine and the Fisheries, to which was referred the bill (H. R. 16647) to authorize the changing of the name of the steamship *Aroline*, reported the same without amendment, accompanied by a report (No. 980), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. WISE, from the Committee on Military Affairs, to which was referred the bill (S. 1378) to amend the military record of John P. Fitzgerald, reported the same without amendment, accompanied by a report (No. 977), which said bill and report were referred to the Private Calendar.

Mr. FIELDS, from the Committee on Military Affairs, to which was referred the bill (S. 6279) for the relief of William Harold Kehoe, reported the same without amendment, accompanied by a report (No. 978), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. CASEY: A bill (H. R. 17019) to provide an industrial alcohol commission, under the general direction of the Secretary of Agriculture, devoted to aiding in developing denatured-alcohol production in farm distilleries, and its use for light, heat, and power, and other industrial purposes; to the Committee on Agriculture.

By Mr. REILLY: A bill (H. R. 17020) making an appropriation for the benefit of the Aviation Corps of the Department of War, and repealing the provisions of certain acts relating to the acquisition of a site and the erection of a public building at Ripon, Wis.; to the Committee on Military Affairs.

By Mr. WINSLOW: A bill (H. R. 17021) for the acquisition of a site for a public building at Westboro, Mass.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 17022) for the acquisition of a site for a public building at Whitinsville, in the township of Northbridge, Mass.; to the Committee on Public Buildings and Grounds.

By Mr. TAGUE: Resolution (H. Res. 306) directing the Secretary of Agriculture to cooperate with steamship companies to prevent dumping carcasses into the ocean near the shore; to the Committee on the Merchant Marine and Fisheries.

By Mr. JAMES: Resolution (H. Res. 307) directing the Secretary of State to negotiate a treaty to define status of American citizens who were formerly subjects of Italy; to the Committee on Foreign Affairs.

By Mr. CAPSTICK: Concurrent resolution (H. Con. Res. 48) to facilitate and encourage correspondence between the Volunteer soldiers, their families, and business associates; to the Committee on the Post Office and Post Roads.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 17023) granting an increase of pension to Henry N. Hamilton; to the Committee on Invalid Pensions.

By Mr. DUPRÉ: A bill (H. R. 17024) for the relief of the L. Grunewald Co. (Inc.); to the Committee on Claims.

By Mr. FAIRCHILD: A bill (H. R. 17025) granting an increase of pension to William A. Bush; to the Committee on Invalid Pensions.

By Mr. HAYES: A bill (H. R. 17026) for the relief of Francenia H. Dale; to the Committee on Claims.

By Mr. KETTNER: A bill (H. R. 17027) for the relief of James Y. Whitsitt; to the Committee on Military Affairs.

Also, a bill (H. R. 17028) granting a pension to Sarah E. Thacker; to the Committee on Invalid Pensions.

By Mr. LESHER: A bill (H. R. 17029) granting an increase of pension to Andrew S. Larish; to the Committee on Invalid Pensions.

By Mr. PRICE: A bill (H. R. 17030) granting an increase of pension to Rebecca A. Le Compte; to the Committee on Pensions.

Also, a bill (H. R. 17031) granting an increase of pension to Eliza E. Earickson; to the Committee on Pensions.

By Mr. RAMSEYER: A bill (H. R. 17032) granting an increase of pension to John W. Carr; to the Committee on Invalid Pensions.

By Mr. REILLY: A bill (H. R. 17033) granting an increase of pension to Emil Priebe; to the Committee on Invalid Pensions.

By Mr. STEPHENS of Nebraska: A bill (H. R. 17034) granting an increase of pension to Eugene B. Justice; to the Committee on Pensions.

By Mr. STERLING: A bill (H. R. 17035) granting an increase of pension to Alexander Kightlinger; to the Committee on Invalid Pensions.

By Mr. SULLOWAY: A bill (H. R. 17036) granting an increase of pension to Eugene B. Eastman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17037) granting an increase of pension to John C. Stevens; to the Committee on Invalid Pensions.

By Mr. SWIFT: A bill (H. R. 17038) for the relief of Louis S. Barrett; to the Committee on Claims.

By Mr. WALSH: A bill (H. R. 17039) granting a pension to Charles H. Williams; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALE of New York: Petition of National Society for the Promotion of Industrial Education, favoring passage of the Smith-Hughes vocational education bill, House bill 11250; to the Committee on Education.

Also, petitions of Martha E. Colburn, of Dover, and Clara Selfe, of Wellesley, Mass., favoring woman-suffrage amendment; to the Committee on the Judiciary.

Also, petition of executive committee of the United States penitentiary employees, Leavenworth, Kans., favoring passage of the Nolan bill; to the Committee on Labor.

By Mr. DILL: Petition of Mr. T. J. Watkins and other residents of Spokane, Wash., protesting against the passage of House bill 652; to the Committee on the District of Columbia.

Also, petition of Mr. T. J. Watkins and other residents of Oakville, Wash., protesting against the passage of House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

Also, petition of the Frances Willard Woman's Christian Temperance Union, urging the establishment of a Federal motion-picture commission for the efficient and economical censorship of motion-picture films so far as the jurisdiction of the Federal Government, of the District of Columbia and the Territories, and interstate commerce permits; to the Committee on Education.

Also, petition of Mr. H. G. Schnasse and other residents of Spokane, Wash., protesting against the passage of House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

By Mr. EAGAN: Petition of American Forestry Association, relative to Senate amendment to the Agricultural appropriation bill; to the Committee on Agriculture.

Also, petition of Chicago Liquor Dealers' Protective Association, relative to tax on land values; to the Committee on Ways and Means.

By Mr. FLYNN: Petition of executive committee, United States penitentiary employees, Leavenworth, Kans., favoring passage of the Nolan bill; to the Committee on Labor.

By Mr. LINTHICUM: Memorial of the Calvert Mortgage Co., Baltimore, Md., favoring passage of Senate bill 5673, relative to taxes paid under excise-tax act; to the Committee on Ways and Means.

By Mr. LONDON: Petition of executive committee of United States penitentiary employees, Leavenworth, Kans., urging the adoption of the Nolan minimum-wage bill; to the Committee on Labor.

Also, telegram of National Lodge of Machinists at New York Navy Yard urging the adoption of the Nolan minimum-wage bill and declaring that "it is the belief of organized labor throughout the country that this bill will give a necessary relief to the underpaid men and women who are working at rates of pay established in some instances 50 years ago"; to the Committee on Labor.

Also, telegram from joint meeting of railroad brotherhoods, at Salida, Colo., July 14, 1916, "denouncing the action of the Denver Post through their telegram to Senator WARREN, of Wyoming, in assuming the right to voice the sentiments of the citizens of Colorado and the entire West upon the demands made by the railroad transportation employees in trying to secure the eight-hour day and time and a half for overtime," and opposing any legislation which would make this issue subject to compulsory arbitration; to the Committee on Interstate and Foreign Commerce.

Also, petition of National Society for the Promotion of Industrial Education, urging the passage of the Smith-Hughes vocational education bill, as indorsed by the National Educational Association, the American Federation of Labor, the Farmers' Educational and Cooperative Union, and the National Grange; to the Committee on Education.

By Mr. RANDALL: Petition of Echo Park Methodist Episcopal Church, Los Angeles, Cal., favoring national prohibition; to the Committee on the Judiciary.

By Mr. SANFORD: Papers to accompany House bill 16907, granting an increase of pension to Martin Lockwood; to the Committee on Invalid Pensions.

SENATE.

MONDAY, *July 17, 1916.*

The Senate met at 10 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, the light of Thy Word falls full upon the path of human life. Thou art the Father of our spirits and Thy light giveth light unto men. Thou art the guardian of our rights. Thou art the center and source of our inspirations and our hopes. We come into the consciousness of sonship with Thee through our willing submission to Thy will and our cooperation with Thee in the divine plan of life.

We pray that this day we may work in such full harmony with Thy plan for us that we may abide in the blessed consciousness of our relation to Thee as Thy sons, and that we may have before us the ever-alluring prospect of inheriting our future destiny and our glory from Thee, who art our Father in heaven. To this end do Thou guide and bless us to-day. For Christ's sake. Amen.

THE JOURNAL.

On request of Mr. GALLINGER, and by unanimous consent, the reading of the Journal of the proceedings of the legislative day, Friday, July 14, 1916, was dispensed with and the Journal was approved.

CALLING OF THE ROLL.

Mr. GALLINGER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Husting	Overman	Taggart
Bankhead	Johnson, Me.	Page	Thomas
Brandegee	Johnson, S. Dak.	Ransdell	Thompson
Bryan	Jones	Sheppard	Townsend
Chamberlain	Kenyon	Sherman	Walsh
Clapp	Kern	Simmons	Warren
Culberson	Lodge	Smith, S. C.	Williams
Dillingham	McCumber	Smoot	Works
Gallinger	Martin, Va.	Sterling	
Harding	Martine, N. J.	Sutherland	
Hardwick	Norris	Swanson	

The VICE PRESIDENT. Forty-one Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of the absent Senators, and Mr. LANE, Mr. SHAFROTH, and Mr. WEEKS answered to their names when called.

The VICE PRESIDENT. Forty-four Senators have answered to the roll call. There is not a quorum present.

Mr. KERN. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will carry out the instructions of the Senate.

Mr. MARTINE of New Jersey. I was requested to announce that the Senator from West Virginia [Mr. CHILTON] is detained from the Chamber on official business.

Mr. LA FOLLETTE, Mr. CURTIS, Mr. STONE, and Mr. HITCHCOCK entered the Chamber and answered to their names.

The VICE PRESIDENT. Forty-eight Senators have answered to the roll call. There is a quorum present.

Mr. KERN. I move that further proceedings under the call be vacated.

The motion was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (S. J. Res. 150) to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal area.

The message also announced that the House had passed the joint resolution (S. J. Res. 60) creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed a bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes, in which it requested the concurrence of the Senate.

The message also communicated to the Senate the intelligence of the death of Hon. HUNTER HOLMES MOSS, late a Representative from the State of West Virginia, and transmitted resolutions of the House thereon.

PETITIONS AND MEMORIALS.

Mr. WEEKS presented a petition of the Old Schoolboys' Association, of Boston, Mass., praying for a thorough and expeditious examination of the condition of the Army and Navy, which was ordered to lie on the table.

Mr. PHELAN presented a memorial of the Board of Supervisors of Alameda County, Cal., remonstrating against an inheritance tax, which was referred to the Committee on Finance.

He also presented a petition of Local Union No. 220, Cooks and Waiters' Union, of Eureka, Cal., praying for the enactment of

legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

Mr. NELSON presented telegrams in the nature of memorials from sundry citizens of Minneapolis, Minn., and Chicago, Ill., remonstrating against a tax on theaters, which were referred to the Committee on Finance.

He also presented a telegram in the nature of a memorial from the Gamble Robinson Co., of Minneapolis, Minn., remonstrating against the stamp tax and tax on commission merchants, which was referred to the Committee on Finance.

REPORTS OF COMMITTEES

Mr. BRYAN, from the Committee on Claims, to which was referred the bill (H. R. 2208) for the relief of James L. Yokum, asked to be discharged from its further consideration and that it be referred to the Committee on Post Offices and Post Roads, which was agreed to.

Mr. BRYAN, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

H. R. 8630. An act for the relief of the Farmer's State Bank of Eureka, Woodford County, Ill. (Rept. No. 677);

H. R. 8141. An act for the relief of the dependent widow of Patrick Curran, civilian employee of the Government, who was killed while in the discharge of his duties at the United States naval magazine at Iona Island, N. Y. (Rept. No. 678);

H. R. 14528. An act for the relief of W. W. Finn (Rept. No. 679);

H. R. 10641. An act for the relief of Fred Henderson (Rept. No. 680);

H. R. 5453. An act for the relief of the State Board of Harbor Commissioners of the State of California (Rept. No. 681);

H. R. 10643. An act for the relief of Theodore Bagge (Rept. No. 682); and

H. R. 1777. An act for the relief of Frank J. Deutsch (Rept. No. 683).

Mr. BRYAN. I am directed by the Committee on Claims, to which was referred the bill (H. R. 9898) for the relief of John E. Jones, to report it adversely, and I submit a report (No. 684) thereon.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. BRYAN. I am directed by the Committee on Claims, to which was referred the bill (H. R. 1373) for the relief of W. W. Wall, to report it adversely, and I submit a report (No. 685) thereon.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. BRYAN. I am directed by the Committee on Claims, to which was referred the bill (H. R. 2638) for the relief of Austin G. Tainter, to report it adversely, and I submit a report (No. 686) thereon.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. THOMAS, from the Committee on Public Lands, to which was referred the bill (S. 6013) to confirm the entry of John Dowd, reported it with an amendment and submitted a report (No. 687) thereon.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (S. 6430) directing the reexamination of the accounts of the late Peter G. S. Ten Broeck, asked to be discharged from its further consideration and that it be referred to the Committee on Claims, which was agreed to.

He also, from the same committee, to which was referred the bill (S. 6650) to provide for preserving the list of the Commissary General of prisoners of war, or record of deaths of prisoners of war, 1861 to 1865, in the office of The Adjutant General, United States Army, Washington, D. C., and printing the same as a public document, asked to be discharged from its further consideration and that it be referred to the Committee on Printing, which was agreed to.

Mr. LANE, from the Committee on Claims, to which was referred the bill (H. R. 11984) for the relief of William E. Heffner, reported it without amendment and submitted a report (No. 676) thereon.

He also, from the same committee, to which was referred the bill (S. 1548) for the relief of Emmett W. Entriken, reported it without amendment and submitted a report (No. 675) thereon.

He also, from the Committee on Fisheries, to which was referred the bill (S. 4970) to establish a fish hatchery in the State of Delaware, reported it with amendments and submitted a report (No. 674) thereon.

He also, from the same committee, to which was referred the bill (S. 4811) to establish a fish-cultural station at some point in the State of Louisiana, reported it without amendment and submitted a report (No. 673) thereon.

CONNERS BROS.

Mr. BRYAN, from the Committee on Claims, reported the following resolution (S. Res. 232):

Resolved, That the bill (S. 5656) entitled "A bill for the relief of Milton C. Conners and George G. Conners, doing business under the firm name of Conners Bros., now pending in the Senate, together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; and the said court shall proceed with the same in accordance with the provisions of such act and report to the Senate in accordance therewith.

BERKSHIRE TROUT HATCHERY, MASSACHUSETTS.

Mr. LANE. I report back from the Committee on Fisheries the joint resolution (S. J. Res. 128) authorizing the acceptance of the gift of the Berkshire Trout Hatchery, Berkshire County, Mass., and I submit a report (No. 672) thereon.

Mr. LODGE. Mr. President, I ask unanimous consent for the present consideration of the joint resolution. I think there will be no objection to it.

I desire first, however, to ask the Senator from Oregon a question. I understand that a House joint resolution relating to the same subject has passed the House and is now before the Committee on Fisheries.

Mr. LANE. The House joint resolution has come over and is before the committee.

Mr. LODGE. May not the House joint resolution be substituted for the Senate joint resolution which the Senator has just reported, so the matter can be disposed of? I wish the Senator would report the House joint resolution, as the Senate joint resolution is precisely similar to it.

Mr. LANE. I am willing to do so, if I may, at this time.

Mr. LODGE. If the Senator will do so, the matter can then be disposed of.

Mr. LANE. I will gladly do so, if it be a proper method of procedure at this time.

Mr. LODGE. Certainly. As the joint resolution passed the House it is precisely the same as the Senate joint resolution.

Mr. LANE. Then I report from the Committee on Fisheries the joint resolution (H. J. Res. 218) authorizing the acceptance of the gift of the Berkshire Trout Hatchery, Berkshire County, Mass., and I ask that it may be substituted for the Senate joint resolution which I have just reported.

Mr. LODGE. I move to substitute the House joint resolution, which is to precisely the same effect, for the Senate joint resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the United States of America hereby accepts from Mrs. Mary E. Scully, as a memorial to her husband, title to the lands known and to be known as the Berkshire Trout Hatchery, located in Berkshire County, Mass., together with the buildings, ponds, and other improvements located thereon and the water and other rights pertaining thereto, and the Secretary of Commerce is hereby authorized to receive from Mrs. Mary E. Scully a deed for the said property. The title to said property is accepted upon the terms and conditions prescribed by the donor, namely, that it shall be used by the United States Bureau of Fisheries, Department of Commerce, as a fish hatchery and for experimental work in fish culture.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The VICE PRESIDENT. In the absence of objection, Senate joint resolution 128 on the same subject will be postponed indefinitely.

BILLS AND JOINT RESOLUTIONS INTRODUCED.

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TAGGART:

A bill (S. 6660) granting an increase of pension to Ferdinand Davis;

A bill (S. 6661) granting an increase of pension to Francis Gibson (with accompanying papers); and

A bill (S. 6662) granting an increase of pension to William Allfgree (with accompanying papers); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 6663) granting an increase of pension to John Cooper (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 6664) granting a pension to Samuel Breitigan (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 6665) granting a pension to Arthur Rose (with accompanying papers); to the Committee on Pensions.

By Mr. SUTHERLAND:

A joint resolution (S. J. Res. 152) providing that the Congress of the United States shall participate in the celebration of the "golden wedding" of the first transcontinental lines of railway in the United States; to the Committee on Industrial Expositions.

By Mr. SMITH of South Carolina (by request):

A joint resolution (S. J. Res. 153) directing the Secretary of the Treasury to acquire by purchase the estate known as Monticello, in the State of Virginia, including the former home of Thomas Jefferson and lands surrounding the same, being about 700 acres, said property being located in Albemarle County, Va.; to the Committee on Public Buildings and Grounds.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. OLIVER submitted an amendment providing that the Federal Trade Commission be directed annually, upon request of the Secretary of the Navy, to investigate and inventory the armor-plate plants of the United States, etc., intended to be proposed by him to the naval appropriation bill (H. R. 15947), which was ordered to lie on the table and be printed.

Mr. SUTHERLAND submitted an amendment proposing to appropriate $300,000 to enable the commission created by section 22 of the public-buildings act approved March 4, 1913, to continue proceedings toward the acquisition of lands required for a connecting parkway between Potomac Park, the Zoological Park, and Rock Creek Park, etc., intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was ordered to lie on the table and be printed.

THE REVENUE.

Mr. LODGE submitted two amendments intended to be proposed by him to the bill (H. R. 16763) to increase the revenue, and for other purposes, which were referred to the Committee on Finance and ordered to be printed.

THE LIGHTHOUSE SERVICE.

Mr. PHELAN submitted an amendment intended to be proposed by him to the bill (S. 21) to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

DONATION OF CANNON.

Mr. NELSON submitted an amendment intended to be proposed by him to the bill (S. 6625) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls, which was ordered to lie on the table and be printed.

TARGET PRACTICE IN THE NAVY.

Mr. LODGE submitted the following resolution (S. Res. 231), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Navy be, and he is hereby, directed, if not incompatible with the public interest, to send to the Senate a statement of the scores made by the Atlantic battleship fleet in division practice and battle practice in 1916.

PRICE OF PRINT PAPER.

Mr. PENROSE submitted the following resolution (S. Res. 233), which was referred to the Committee on Interstate Commerce:

Whereas on April 24, 1916, Senate resolution 177 was agreed to requesting the Trade Commission "to inquire into the increase of the price of print paper during the last year and ascertain whether or not the newspapers of the United States are being subjected to unfair practices in the sale of print paper; and

Whereas no report has as yet been made to the Senate by the Trade Commission in compliance with this request; and

Whereas much complaint continues to be made concerning the increase of the price of print paper during the last year: Therefore be it

Resolved, That the Trade Commission is hereby requested to inform the Senate as to the progress made in its investigation of this subject and whether any preliminary data are ready for submission to the Senate relative to the complaint referred to.

FEDERAL FARM-LOAN ACT (S. DOC. NO. 500).

Mr. FLETCHER. Mr. President, I have here a statement regarding the Federal farm-loan act by Mr. Flannagan, the very capable and efficient secretary of the Joint Committee on Rural Credits, with marginal notes and index explaining the act. I ask unanimous consent that it be printed as a public document. There is a great demand for an explanation and statement regarding the Federal farm-loan act.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

AMENDMENT OF THE RULES.

Mr. LA FOLLETTE. Mr. President, I send to the desk a notice which I intend to propose to the rules of the Senate, and which I ask to have read.

The VICE PRESIDENT. The notice will be read.

The SECRETARY. The Senator from Wisconsin gives notice that—

On Tuesday, July 18, or as soon thereafter as possible, I shall move to suspend that provision of paragraph 3 of Senate Rule XVI prohibiting any amendment proposing general legislation to any general appropriation bill for the purpose of offering the following amendment to the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, by inserting, after line 13, page 172, a new paragraph as follows:

"*Provided*, That no battleship, battle cruiser, scout cruiser, torpedo-boat destroyer, or submarine herein appropriated for shall be employed in any manner to coerce or compel the collection of any pecuniary claim of any kind or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership or corporation of the United States against the Government of Mexico or of any Central or South American Government."

ROBERT M. LA FOLLETTE.

The VICE PRESIDENT. The notice will lie over one day under the rule.

Morning business is closed.

SIR ROGER CASEMENT.

Mr. MARTINE of New Jersey. Mr. President, I respectfully ask for a report from the Committee on Foreign Relations on the resolution introduced by me regarding Sir Roger Casement, which resolution I submitted some 10 days ago.

The VICE PRESIDENT. The Chair does not know any way in which the Senator can compel a committee to report. The Senator may make a motion to discharge the committee from the further consideration of the resolution.

Mr. MARTINE of New Jersey. Then, Mr. President, I move that the Committee on Foreign Relations be discharged from the further consideration of the resolution (S. Res. 223) to request the President to ask a stay of execution of Sir Roger Casement, now under sentence of death by the British Government.

Mr. GALLINGER. Mr. President, under the rules that motion will have to go over for a day. Notice of one day will have to be given.

The VICE PRESIDENT. The Senator may ask unanimous consent for the consideration of the resolution.

Mr. MARTINE of New Jersey. I respectfully ask unanimous consent that the Committee on Foreign Relations may be relieved from the further consideration of the resolution.

Let me say, Mr. President, in urging that request, that I feel—in fact, I know—that the committee does not intend to act on the resolution. This is no secret, as the chairman of the Committee on Foreign Relations stated to me one day—I think, on Wednesday last—that that committee would take no action on the resolution and would not make a report thereon. I was astonished at the statement, but the chairman declared the committee would make no report. That seems to me to be manifestly wrong, and to be placing the Senate of the United States in a position that is not enviable. I feel that this great body can not afford to stifle a measure of this character. Hence I am prompted to make the motion which I have made.

The Vice President has stated that it is necessary that I shall have unanimous consent in order that the Committee on Foreign Relations may be relieved of the consideration of the resolution. I realize that it would perhaps be impossible to secure such consent; but when I remember that to-day the trial of the appeal of Sir Roger Casement, who is condemned to death in England, will come up, it seems to me infinitely fitting that a motion of this kind should be made.

Mr. President, my heart is in this matter very deeply. In connection therewith I desire to say that at or about the close of our Civil War, when men's passions were fired and public feeling ran high, a detachment of troops of the Union Army captured Jefferson Davis, President of the fallen Confederacy. Almost every newspaper, magazine, and periodical of the North of that day fairly teemed with articles and expressions, in which many public men joined, crying out, "Hang the traitor." "Hang the conspirator." "Hang the murderer of our sons and brothers." "Hang the old woman." This latter cry came from the charge that he had been captured wearing a woman's shawl as a disguise. But, Mr. President, thank God! wiser counsels and more humane thoughts prevailed, and Jefferson Davis was not hanged.

Mr. President, at that very time almost every great newspaper and periodical in Great Britain inveighed against such a course, insisting that "it would be to turn back the wheels of civilization and human progress."

Their pleadings had the effect of arousing public sentiment to a sense of justice and humanity, and the life of Jefferson Davis was spared.

Mr. President, if it was then the judgment of the English people that such action would have been "repugnant to human civilization and humah progress," what will the world say to-day, after 50 years of advanced intelligence, religion, culture, and humanitarian thought, if Roger Casement shall be hanged?

Mr. President, let the proud sons of Great Britain ponder before taking this step.

I ask no drastic step at the hands of the Senate. I ask no arms, no money, no men, only the simplest, kindliest thing in the world, namely, that the President may use his kindly offices to try to stop the execution of Sir Roger Casement.

Mr. President, as it was with Robert Emmet, so it was with Casement—his condemnation was assured before he was arraigned.

Mr. President, I feel that this great Republic, the pride and admiration of the world, should sound a clear and clarion cry to stay the execution of the sentence of death upon Sir Roger Casement. Civilization stands aghast at the thought. The world has moved. To carry out this sentence is to turn backward the advance of human progress. What would the world have said if, after our late Civil War, the United States Government had proposed and carried out the thought of hanging on the gallows Robert E. Lee, Robert Toombs, Judah P. Benjamin, and others?

Why, Mr. President, the 50 years that have elapsed since that unhappy strife would not have effaced the hate and vengeance that to this day would fill the very air with curses. But a wiser, more humane policy has brought to this country love, friendship, and loyalty.

Mr. President, my resolution but asks the kindly intercession of the President to stay this judicial murder. Will not the great Senate of the United States raise its voice to ask a halt against this unholy and inhuman proceeding?

An anonymous letter to me says that I was "moved by a woman's tears." Yes, Mr. President; I was. A day or two ago a woman came to me, clad in somber garb. She was a stranger, who, suffused with tears, and, in a voice choked with sobs, told me she was the sister of Sir Roger Casement. I listened to her sad story. Yes, Mr. President; my heart was touched. Yes; I was moved by a woman's tears, and I am proud of it, and I would be ashamed of a man who would not be so moved.

Mr. President, in urging my resolution necessarily I am not pressing the cause of Ireland's freedom, though I believe in it; but rather I am pleading the cause of justice and the promptings of humanity. Senators, my brothers, will you not aid to stay the execution of this brutal and unholy sentence?

Mr. President, the Manchester Guardian, of England, makes a direct plea for clemency for Sir Roger. It says:

His crimes are free from taint of sordidness and meanness. The death penalty will do nothing to kill such dreams as his. Rather, it will give them life.

Mr. President, I feel that this body should have entered a protest in the cases of the poor men who were braced up against a wall in Dublin and shot as dogs in a kennel; but that slaughter was perpetrated so rapidly that there was no opportunity for the people and the Senate of the United States to express themselves. I ask, in God's name, have not Great Britain and the world had enough of bloodletting? Must more of human gore be shed to satisfy this Moloch of war?

I trust, Mr. President, that unanimous consent may be given to discharge the Committee on Foreign Relations from the further consideration of the resolution to which I have referred.

The VICE PRESIDENT. The Senator from New Jersey moves that the Committee on Foreign Relations be discharged from the further consideration of Senate resolution 223. Is there objection to the present consideration of the motion?

Mr. STONE. I ask that it go over under the rule.

The VICE PRESIDENT. The resolution will go over under the rule.

Mr. MARTINE of New Jersey. Now, Mr. President, may I ask the chairman of the Committee on Foreign Relations, if by parliamentary method the resolution can be stifled and stayed, whether he would consider a resolution in the following words:

Resolved, That the President be requested to advise our ambassador to Great Britain to use his kindly offices unofficially to ask for the commutation of the sentence of death passed upon Sir Roger Casement.

I should like to ask the Senator as to his feelings on a resolution of that character.

Mr. STONE. Mr. President, I have been out of the city for four or five days. I returned this morning, and came into the Senate when the motion of the distinguished Senator was made. Under the circumstances, I should like to have it go over.

Mr. MARTINE of New Jersey. Does the Senator refer to the last resolution which I have indicated?

Mr. STONE. I wish the whole matter to go over until to-morrow morning.

Mr. MARTINE of New Jersey. Well, Mr. President, I must bow, of course, to the rules of this body; but I say earnestly it is a wrong on the part of the United States Senate to refuse to take action; it is a crime against justice and humanity. I might expect, and mayhap tolerate, opposition from some other source, but I can not understand the position of a great, wise man, a leader of the great Democratic Party of the people, in opposing a resolution which simply asks the President to request our Ambassador to Great Britain to use his kindly offices unofficially. I ask not to tie you; I only ask an expression of this liberty-loving and peaceful people.

Mr. STONE. Mr. President, I hope the matter will go over under the rule. I ask that it take that course.

Mr. MARTINE of New Jersey. Very well.

The VICE PRESIDENT. The matter goes over under the rule.

POST-OFFICE APPROPRIATIONS—CONFERENCE REPORT (S. DOC. NO. 499).

Mr. BANKHEAD. I submit a report of the conferees on the Post Office appropriation bill, which I ask may be printed.

The VICE PRESIDENT. Without objection, it will be so ordered.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 43, 55, and 64.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 25, 27, 28, 30, 31, 32, 34, 36, 37, 38, 40, 42, 44, 47, 49, 50, 51, 52, 53, 56, 57, 58, 59, 60, and 61, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: Page 5, after line 4 in lieu of the matter inserted by the said amendment, insert the following: "That the Postmaster General shall not approve or continue any rule or regulation which terminates the employment of any employee by reason of absence on account of illness for a period of less than one year, and that any postal employee who has entered the military service of the United States or who shall hereafter enter it shall, upon being honorably discharged therefrom, be permitted to resume the position in the Postal Department which he left to enter such military service"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: Page 5, after line 4, at the end of the amendment of the Senate, following the amount "$6,000" insert the following: "and the employment of such officer hereafter is authorized"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: Page 12, restore the matter stricken out by said amendment; amend to read as follows: "For compensation to printers, mechanics and skilled laborers, 22, at $1,200 each, 4 at $1,100 each; 3 at $1,000 each and 28 at $900 each; in all, $59,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: On page 13, line 16, strike out all of the amendment after the amount "$130,000"; and the Senate agree to the same.

That the House recede from its agreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: Page 29, line 19, in line 3 of the amendment, strike out all after the word "annum"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: Page 16, line 5, in line 4 of said amendment, strike out "June 30" and insert in lieu thereof the words "March 4"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: Page 16, after line 16, at the end

of said amendment, after the word "sixteen," insert the following: "And that section 10 of the said act be amended by inserting after the first word of said section, 'That,' the words 'section 198 of the'"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: Page 17, line 24, in lieu of the matter inserted by the said amendment, insert the following: "*Provided*, That hereafter every railroad company carrying the mails shall carry on any train it operates and without extra charge therefor the persons in charge of the mails and when on duty and traveling to and from duty, and all duly accredited agents and officers of the Post Office Department and the Railway Mail Service and post-office inspectors, while traveling on official business, upon the exhibition of their credentials: *Provided further*, That no part of this appropriation shall be paid for carrying the mail over the bridge across the Mississippi River at St. Louis, Mo., other than upon a mileage basis: *But provided further*, That the Postmaster General may, in his discretion, pay within the present law a fair and reasonable price for the special transfer and terminal service at the Union Station at East St. Louis, Ill., and at the Union Station at St. Louis, Mo., including the use, lighting, and heating of the mail building, and transfer service at St. Louis, Mo., provided the amount so paid shall not exceed $35,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: Page 19, line 8, in lieu of the matter inserted by the said amendment, insert the following: "*Provided further*, That railway postal clerks shall be credited with full time when deadheading under orders of the department"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment as follows: On page 26, line 16, restore the amount proposed by the House, and on page 26 of the bill, in line 14, after the word "purchase," insert the word "rental"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 46, and agre to the same with an amendment as follows: On page 27, line 26, in lieu of the matter stricken out and inserted by said amendment, insert the following:

"That rural mail delivery shall be extended so as to serve, as nearly as practicable, the entire rural population of the United States.

"Hereafter all rural mail delivery routes shall be divided into two classes to be known as—

"Standard horse-drawn vehicle routes, which shall be 24 miles in length, and

"Standard motor-vehicle routes, which shall be 50 miles in length, and shall only be established hereafter when a majority of the proposed patrons who are heads of families residing upon such proposed routes shall by written petition ask the Post Office Department to establish the same.

"Nothing herein contained shall be construed to prohibit the establishment of horse-drawn vehicle routes of less length than the standard of 24 miles: *Provided*, That if in the discretion of the Postmaster General, in order to render more complete service, it should be necessary to do so the Postmaster General is hereby authorized to increase the length of routes not to exceed 50 per cent above the standards herein prescribed, and in such cases the compensation of the carrier on such horse-drawn vehicle routes shall be increased above the maximum pay heretofore fixed by law for rural carriers at the rate of $24 per annum for each mile of said routes in excess of 30 miles, and any major fraction of a mile shall be counted as a mile: *Provided further*, That carriers in rural mail-delivery service shall furnish and maintain at their own expense all necessary vehicle equipment for prompt handling of the mail: *And provided further*, That nothing herein shall be construed, and no order shall be issued, to prevent the use of motor vehicles on horse-drawn vehicle routes: *Provided further*, The Postmaster General in his discretion may require all carriers to furnish sufficient equipment to properly handle postal business on their routes: *And provided further*, That the Postmaster General may, in his discretion, allow and pay additional compensation to rural letter carriers who are required to carry pouch mail to intermediate post offices, or for intersecting loop routes, in all cases where it appears that the carriage of such pouches increases the expense of the equipment required by the carrier or materially increases the amount of labor performed by him, such compensation not to exceed the sum of $12 per annum for each mile such carrier is required to carry such pouch or pouches.

"The Postmaster General is hereby authorized and directed to reorganize and readjust existing Rural Mail Delivery Service where necessary to conform to the standards herein prescribed: *Provided further*, That in making appointments of rural carriers for service on new routes, which may be created by the reorganization herein ordered, preference shall be given to carriers who were formerly employed in Rural Delivery Service and who were separated therefrom on or after June 30, 1915, by reason of any previous reorganization of the service and without charges against them: *And provided further*, That the Postmaster General is authorized and directed to pay, out of the appropriations already made and still available and unexpended for Rural Free Delivery Service for the fiscal year ending June 30, 1915, to all letter carriers in the Rural Free Delivery Service during the fiscal year ending June 30, 1915, their executors or administrators, the difference between what they received for their said services and the amount that would have been paid to them in accordance with the proviso contained in joint resolution making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1916, approved March 4, 1915: *Provided*, That no part of the money paid under this provision shall be paid to any agent or attorney, directly or indirectly, for any alleged services in connection with this appropriation."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: Page 28, line 7, strike out all of the amendment after the amount "$250,000"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: On page 31, line 19, in lieu of the matter inserted by said amendment insert the following: "But no publication shall be sent by freight if such method of transportation results in unfair discrimination: *Provided*, That whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is unfairly discriminated against, he may apply to the Post Office Department for an opportunity to be heard; that upon such application being duly filed in writing, the owner of such publication shall have opportunity for a full and fair hearing before said department, and pending final determination no change shall be made in the method of transportation of such publication as ordered by the department. The testimony in any such hearing or proceedings shall be reduced to writing and filed in the Post Office Department prior to entering an order upon such hearing. That upon such hearing if the Post Office Department decides adversely to the contention of the publisher, such publisher shall have the right, within the period of 20 days after the date of the order of the Post Office Department made upon such hearing, to appeal to the United States Court of Appeals of the District of Columbia for a review of such order by said court of appeals, by filing in the court a written petition praying that the order of the Post Office Department be set aside. A copy of such petition shall be forthwith served upon the Post Office Department and thereupon the said department forthwith shall certify and file in the court a transcript of the record and testimony. Upon the filing of such transcript the court shall have jurisdiction to affirm, set aside, or modify the order of the department. The jurisdiction of the Circuit Court of Appeals of the District of Columbia to affirm, set aside, or modify such orders of the Post Office Department shall be exclusive. Such proceedings in the Circuit Court of Appeals of the District of Columbia shall be given precedence over other cases pending therein and shall be in every way expedited"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: On page 36, line 6, in lieu of the matter stricken out and inserted by the amendment of the Senate, insert the following:

"SEC. 16. That the Postmaster General is authorized and directed to readjust the compensation to be paid to railroad companies from and after the 30th day of June, 1916, or as soon thereafter as may be practicable, for the transportation and handling of the mails and furnishing facilities and services in connection therewith upon the conditions and at the rates hereinafter provided.

"The Postmaster General may state railroad mail routes and authorize mail service thereon of the following four classes, namely: Full railway post-office car service, apartment railway post-office car service, storage-car service, and closed-pouch service.

"Full railway post-office car mail service shall be service by cars 40 feet or more in length, constructed, fitted up, and main-

tained for the distribution of mails on trains. The authorizations of full railway post-office cars shall be for standard-sized cars 60 feet in length, inside measurement, except as hereinafter provided.

"Apartment railway post-office car mail service shall be service by apartments less than 40 feet in length in cars constructed, fitted up, and maintained for the distribution of mails on trains. Two standard sizes of apartment railway post-office cars may be authorized and paid for, namely, apartments 15 feet and 30 feet in length, inside measurement, except as hereinafter provided.

"Storage-car mail service shall be service by cars used for the storage and carriage of mails in transit other than by full and apartment railway post-office cars. The authorizations for storage cars shall be for cars 60 feet in length, inside measurement, except as hereinafter provided: *Provided*, That storage space in units of 3 feet, 7 feet, 15 feet, and 30 feet, both sides of car, may be authorized in baggage cars at not exceeding pro rata of the rates hereinafter named for 60-foot storage cars.

"Service by full and apartment railway post-office cars and storage cars shall include the carriage therein of all mail matter, equipment, and supplies for the mail service and the employees of the Postal Service or Post Office Department, as shall be directed by the Postmaster General to be so carried.

"Closed-pouch mail service shall be the transportation and handling by railroad employees of mails on trains on which full or apartment railway post-office cars are not authorized, except as hereinbefore provided. The authorizations for closed-pouch service shall be for units of 7 feet and 3 feet in length, both sides of car.

"The rates of payment for the services authorized in accordance with this section shall be as follows, namely:

"For full railway post-office car mail service at not exceeding 21 cents for each mile of service by a 60-foot car.

"In addition thereto he may allow not exceeding $4.25 as a combined initial and terminal rate for each one-way trip of a 60-foot car.

"For apartment railway post-office car mail service at not exceeding 11 cents for each mile of service by a 30-foot apartment car and 6 cents for each mile of service by a 15-foot apartment car.

"In addition thereto he may allow not exceeding $2.75 as a combined initial and terminal rate for each one-way trip of a 30-foot apartment car and $2 as a combined initial and terminal rate for each one-way trip of a 15-foot apartment car.

"For storage-car mail service at not exceeding 21 cents for each mile of service by a 60-foot car.

"In addition thereto he may allow not exceeding $4.25 as a combined initial and terminal rate for each one-way trip of a 60-foot car.

"Where authorizations are made for cars of the standard lengths of 60, 30, and 15 feet, as provided by this section, and the railroad company is unable to furnish such cars of the length authorized, but furnishes cars of lesser length than those authorized, but which are determined by the department to be sufficient for the service, the Postmaster General may accept the same and pay only for the actual space furnished and used, the compensation to be not exceeding pro rata of that provided by this section for the standard length so authorized: *Provided*, That the Postmaster General may accept cars and apartments of greater length than those of the standard requested, but no compensation shall be allowed for such excess lengths.

"For closed pouch service, at not exceeding 1½ cents for each mile of service when a 3-foot unit is authorized, and 3 cents for each mile of service when a 7-foot unit is authorized.

"In addition thereto he may allow not exceeding 25 cents as the combined initial and terminal rate for each one-way trip of a 3-foot unit of service and 50 cents as a combined initial and terminal rate for each one-way trip of a 7-foot unit of service.

"Railroad companies whose railroads were constructed in whole or in part by a land grant made by Congress, on the condition that the mails should be transported over their roads at such price as Congress should by law direct, shall receive only 80 per cent of the compensation otherwise authorized by this section.

"The initial and terminal rates provided for herein shall cover expenses of loading and unloading mails, switching, lighting, heating, cleaning mail cars, and all other expenses incidental to station service and required by the Postmaster General in connection with the mails that are not included in the car-mile rate. The allowance for full railway post-office cars, apartment railway post-office cars, and storage cars may be varied in accordance with the approximate difference in their respective cost of construction and maintenance.

"In computing the car miles of the full railway post-office cars and apartment railway post-office cars, the maximum space authorized in either direction of a round-trip car run shall be regarded as the space to be computed in both directions, unless otherwise mutually agreed upon.

"In computing the car miles of storage cars, the maximum space authorized in either direction of a round-trip car run shall be regarded as the space to be computed in both directions, unless the car be used by the company in the return movement, or otherwise mutually agreed upon.

"New service and additional service may be authorized at not exceeding the rates herein provided, and service may be reduced or discontinued with pro rata reductions in pay, as the needs of the Postal Service may require: *Provided*, That no additional pay shall be allowed for additional service unless specifically authorized by the Postmaster General.

"The Postmaster General is authorized to make special contracts with the railroad companies for the transportation of the mails where in his judgment the conditions warrant the application of higher rates than those herein specified, and make report to Congress of all cases where such special contracts are made and the terms and reasons therefor.

"All cars or parts of cars used for the Railway Mail Service shall be of such construction, style, length, and character, and furnished in such manner as shall be required by the Postmaster General, and shall be constructed, fitted up, maintained, heated, lighted, and cleaned by and at the expense of the railroad companies. No pay shall be allowed for service by any railway post-office car which is not sound in material and construction and which is not equipped with sanitary drinking-water containers and toilet facilities, nor unless such car is regularly and thoroughly cleaned. No pay shall be allowed for service by any wooden full railway post-office car unless constructed substantially in accordance with the most approved plans and specifications of the Post Office Department for such type of cars, nor for service by any wooden full railway post-office car run in any train between adjoining steel cars, or between the engine and a steel car adjoining. After the 1st of July, 1917, the Postmaster General shall not approve or allow to be used, or pay for service by, any full railway post-office car not constructed of steel or steel underframe or equally indestructible material; and all full railway post-office cars accepted for this service and contracted for by the railroad companies hereafter shall be constructed of steel. Until July 1, 1917, in cases of emergency and in cases where the necessities of the service require it, the Postmaster General may provide for service by full railway post-office cars of other than steel or steel underframe construction, and fix therefor such rate of compensation within the maximum herein provided as shall give consideration to the inferior character of construction, and the railroad companies shall furnish service by such cars at such rates so fixed.

"Service over property owned or controlled by another company or a terminal company shall be considered service of the railroad company using such property and not that of the other or terminal company: *Provided*, That service over land-grant roads shall be paid for as herein provided.

"Railroad companies carrying the mails shall furnish all necessary facilities for caring for and handling them while in their custody. They shall furnish all cars or parts of cars used in the transportation and distribution of the mails, except as herein otherwise provided, and place them in stations before the departure of trains at such times and when required to do so. They shall provide station space and rooms for handling, storing, and transfer of mails in transit, including the separation thereof, by packages for connecting lines, and such distribution of registered mail in transit as may be necessary, and for offices for the employees of the Railway Mail Service engaged in such station work when required by the Postmaster General, in which mail from station boxes may be distributed if it does not require additional space.

"If any railroad company carrying the mails shall fail or refuse to provide cars or apartments in cars for distribution purposes when required by the Postmaster General, or shall fail or refuse to construct, fit up, maintain, heat, light, and clean such cars and provide such appliances for use in case of accident as may be required by the Postmaster General, it shall be fined such reasonable sum as may, in the discretion of the Postmaster General, be deemed proper.

"The Postmaster General shall in all cases decide upon what trains and in what manner the mails shall be conveyed. Every railroad company carrying the mails shall carry on any train it operates, and with due speed, all mailable matter, equipment, and supplies directed to be carried thereon. If any such railroad company shall fail or refuse to transport the mails, equip-

ment, and supplies when required by the Postmaster General on any train or trains it operates, such company shall be fined such reasonable amount as may, in the discretion of the Postmaster General, be deemed proper.

"The Postmaster General may make deductions from the pay of railroad companies carrying the mails under the provisions of this section for reduction in service or infrequency of service where, in his judgment, the importance of the facilities withdrawn or reduced requires it, and impose fines upon them for delinquencies. He may deduct the price of the value of the service in cases where it is not performed, and not exceeding three times its value if the failure be occasioned by the fault of the railroad company.

"The provisions of this section shall apply to service operated by railroad companies partly by railroad and partly by steamboats.

"The provisions of this section respecting the rates of compensation shall not apply to mails conveyed under special arrangement in freight trains, for which rates not exceeding the usual and just freight rates may be paid, in accordance with the classifications and tariffs approved by the Interstate Commerce Commission.

"Railroad companies carrying the mails shall submit under oath, when and in such form as may be required by the Postmaster General, evidence as to the performance of service.

"The Postmaster General shall, from time to time, request information from the Interstate Commerce Commission as to the revenue received by railroad companies from express companies for services rendered in the transportation of express matter, and may, in his discretion, arrange for the transportation of mail matter other than of the first class at rates not exceeding those so ascertained and reported to him, and it shall be the duty of the railroad companies to carry such mail matter at such rates fixed by the Postmaster General.

"The Postmaster General is authorized, in his discretion, to petition the Interstate Commerce Commission for the determination of a postal carload or less-than-carload rate for transportation of mail matter of the fourth class and periodicals, and may provide for and authorize such transportation, when practicable, at such rates, and it shall be the duty of the railroad companies to provide and perform such service at such rates and on the conditions prescribed by the Postmaster General.

"The Postmaster General may, in his discretion, distinguish between the several classes of mail matter, and provide for less frequent dispatches of mail matter of the third and fourth classes and periodicals when lower rates for transportation or other economies may be secured thereby without material detriment to the service.

"The Postmaster General is authorized to return to the mails, when practicable for the utilization of car space paid for and not needed for the mails, postal cards, stamped envelopes, newspaper wrappers, empty mail bags, furniture, equipment, and other supplies for the Postal Service.

"The Postmaster General, in cases of emergency between October 1 and April 1 of any year, may hereafter return to the mails empty mail bags and other equipment theretofore withdrawn therefrom as required by law, and, where such return requires additional authorization of car space under the provisions of this section, to pay for the transportation thereof as provided for herein out of the appropriation for inland transportation by railroad routes.

"The Postmaster General may have the weights of mail taken on railroad mail routes, and computations of the average loads of the several classes of cars and other computations for statistical and administrative purposes made at such times as he may elect, and pay the expense thereof out of the appropriation for inland transportation by railroad routes.

"Pending the decision of the Interstate Commerce Commission, as hereinafter provided for, the existing method and rates of railway mail pay shall remain in effect, except on such routes or systems as the Postmaster General shall select, and to the extent he may find it practicable and necessary to place upon the space system of pay in the manner and at the rates provided in this section, with the consent and approval of the Interstate Commerce Commission, in order to properly present to the Interstate Commerce Commission the matters hereinafter referred thereto: *Provided*, That if the final decision of the Interstate Commerce Commission shall be adverse to the space system, and if the rates established by it under whatever method or system is adopted shall be greater or less than the rates under this section, the Postmaster General shall readjust the compensation of the carriers on such selected routes and systems in accordance therewith, from the dates on which the rates named in this section became effective.

"All railway common carriers are hereby required to transport such mail matter as may be offered for transportation by the United States in the manner, under the conditions, and with the service prescribed by the Postmaster General and shall be entitled to receive fair and reasonable compensation for such transportation and for the service connected therewith.

"The Interstate Commerce Commission is hereby empowered and directed as soon as practicable to fix and determine from time to time the fair and reasonable rates and compensation for the transportation of such mail matter by railway common carriers and the service connected therewith, prescribing the method or methods by weight, or space, or both, or otherwise, for ascertaining such rate or compensation, and to publish the same, and orders so made and published shall continue in force until changed by the commission after due notice and hearing.

"In fixing and determining the fair and reasonable rates for such service the commission shall consider the relation existing between the railroads as public-service corporations and the Government, and the nature of such service as distinguished, if there be a distinction, from the ordinary transportation business of the railroads.

"The procedure for the ascertainment of said rates and compensation shall be as follows:

"Within three months from and after the approval of this act, or as soon thereafter as may be practicable, the Postmaster General shall file with the commission a statement showing the transportation required of all railway common carriers, including the number, equipment, size, and construction of the cars necessary for the transaction of the business; the character and speed of the trains which are to carry the various kinds of mail; the service, both terminal and en route, which the carriers are to render; and all other information which may be material to the inquiry, but such other information may be filed at any time in the discretion of the commission.

"The Postmaster General is authorized to employ such clerical and other assistance as shall be necessary to carry out the provisions of this section, and to rent quarters in Washington, D. C., if necessary, for the clerical force engaged thereon, and to pay for the same out of the appropriation for inland transportation by railroad routes. The Postmaster General shall file with the commission a comprehensive plan for the transportation of the mails on said railways and shall embody therein what he believes to be the reasonable rate or compensation the said railway carriers should receive. Thereupon the commission shall give notice of not less than 30 days to each carrier so required to transport mail and render service, and upon a day to be fixed by the commission, not later than 30 days after the expiration of the notice herein required, each of said carriers shall make answer and the commission shall proceed with the hearing as now provided by law for other hearings between carriers and shippers or associations.

"All the provisions of the law for taking testimony, securing evidence, penalties, and procedure are hereby made applicable.

"For the purpose of determining and fixing rates or compensation hereunder the commission is authorized to make such classification of carriers as may be just and reasonable and, where just and equitable, fix general rates applicable to all carriers in the same classification.

"Pending such hearings, and the final determination of the question, if the Interstate Commerce Commission shall determine that it is necessary or advisable, in order to carry out the provisions of this section (a), to have additional and more frequent weighing of the mails for statistical purposes, the Postmaster General, upon request of the commission, shall provide therefor in the manner now prescribed by law, but such weighing need not be for more than 30 days.

"At the conclusion of the hearing the commission shall establish by order a fair, reasonable rate or compensation to be received, at such stated times as may be named in the order, for the transportation of mail matter and the service connected therewith, and during the continuance of the order the Postmaster General shall pay the carrier from the appropriation herein made such rate or compensation.

"Either the Postmaster General of any such carrier may at any time after the lapse of six months from the entry of the order assailed apply for a reexamination, and thereupon substantially similar proceedings shall be had with respect to the rate or rates for service covered by said application, provided said carrier or carriers have an interest therein.

"For the purposes of this section the Interstate Commerce Commission is hereby vested with all the powers which it is now authorized by law to exercise in the investigation and ascertainment of the justness and reasonableness of freight, passenger, and express rates to be paid by private shippers.

"The Interstate Commerce Commission shall allow to railroad companies whose railroads were constructed in whole or in part by a land grant made by Congress on condition that the mails should be transported over their roads at such price as Congress should by law direct only 80 per cent of the compensation paid other railroads for transporting the mails and all services by the railroads in connection therewith.

"The existing law for the determination of mail pay, except as herein modified, shall continue in effect until the Interstate Commerce Commission under the provisions hereof fixes the fair, reasonable rate or compensation for such transportation and service.

"That the appropriations for inland transportation by railroad routes and for railway post-office car service for the fiscal year ending June 30, 1917, are hereby made available for the purposes of this section.

"That it shall be unlawful for any railroad company to refuse to perform mail service at the rates or methods of compensation provided by law when required by the Postmaster General so to do, and for such offense shall be fined $1,000. Each day of refusal shall constitute a separate offense."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment as follows: Page 48, line 15, in line 16 of the amendment strike out all of the balance of the amendment after the word "Commission," and in lieu thereof insert the following: "after thorough and independent consideration by that body in such manner as it may determine"; and the Senate agree to the same.

J. H. BANKHEAD,
T. W. HARDWICK,
CHAS. E. TOWNSEND,
Managers on the part of the Senate.
JOHN A. MOON,
D. E. FINLEY,
H. STEENERSON,
Managers on the part of the House.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had, on July 17, 1916, approved and signed the following act:

S. 2986. An act to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes.

LAWS OF PORTO RICO (H. DOC. NO. 1291).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Pacific Islands and Porto Rico:

To the Senate and House of Representatives:

As required by section 19 of the act of Congress approved April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," I transmit herewith a copy of the Journal of the Executive Council of Porto Rico for the second session of the eighth legislative assembly, beginning February 14 and ending April 13, 1916.

WOODROW WILSON.

THE WHITE HOUSE, *July 17, 1916.*

INTERSTATE AND FOREIGN COMMERCE.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 60) creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee, which were, on page 2, line 6, after "telegraph," to insert "wireless, cable"; on page 2, line 13, after "witnesses," to insert "to administer oaths, and to require the various departments, commissions, and other Government agencies of the United States to furnish such information and render such assistance as may in the judgment of the joint subcommittee be deemed desirable"; on page 2, line 16, to strike out "as expeditiously as may be," and insert in lieu thereof "on or before the second Monday in January, 1917."

Mr. NEWLANDS. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

HOUSE BILL REFERRED.

H. R. 15842. An act to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes, was read twice by its title and referred to the Committee on Privileges and Elections.

ORDER OF BUSINESS.

Mr. SMOOT. I ask unanimous consent that the Senate proceed to the consideration of unobjected bills on the calendar under Rule VIII.

The VICE PRESIDENT. Is there any objection?

Mr. OWEN. Mr. President, I think there will be a convenient opportunity afforded later in the afternoon to take care of unobjected bills on the calendar.

Mr. SMOOT. No; there will not.

Mr. OWEN. But I will not be able to agree to that proposal this morning.

Mr. SMOOT. Then, Mr. President, I move that the Senate proceed to the consideration of unobjected bills on the calendar under Rule VIII.

Mr. OWEN. I raise the parliamentary point that the Senator had not the floor after he asked that question.

The VICE PRESIDENT. The Chair is of the opinion that under Rule VIII there is not any necessity for a motion. Unless some Senator moves to take up specifically a bill under Rule VIII, the calendar of unobjected bills is now in order.

Mr. OWEN. I move, as a substitute for the motion of the Senator from Utah, that the Senate proceed to the consideration of House bill 13391, the amendment to the Federal reserve act.

Mr. SMOOT. Mr. President, a motion can not be made to substitute another bill.

The VICE PRESIDENT. It must be perfectly apparent to the Senate that under Rule VIII the calendar is now in order for unobjected bills, and it does not require any motion.

Mr. SMOOT. That is, the calendar is in order, Mr. President; but I think what the Senate desires, on both sides of the Chamber, is that bills shall be taken up to which there is no objection, and acted upon and the calendar cleared. There is no doubt but that the Senator can bring his bill up by motion, or any other bill on the calendar, if the Senate desires to consider it, as soon as the other bills are out of the way.

The other day it was understood that we were to have at least two morning hours a week. The first morning hour that the Senate had, the whole time was taken up in considering the bill that the Senator from Oklahoma now wants to consider again. I think, in justice to all the balance of the Senators who have bills on the calendar in which they are deeply interested and to which there is no objection, that the time ought to be given to those bills this morning.

Mr. OWEN. Mr. President, I ask unanimous consent, in lieu of the suggestion made by the Senator from Utah, that from 5 to half past 6 the Senate act on unobjected bills.

Mr. SWANSON. I object to that Mr. President.

Mr. OWEN. Then, I make the same request for to-morrow afternoon.

Mr. SWANSON. I can not consent to anything that would displace the consideration of the naval appropriation bill.

Mr. OWEN. After 5 o'clock it is difficult to keep a quorum here, and I call the attention of the Senator from Virginia to that fact. It is very difficult to keep a quorum between 5 and half past 6, and on the unobjected bills there will be no difficulty of that sort.

Mr. GALLINGER. I ask for the regular order.

Mr. SMOOT. My motion was in order, to proceed to the consideration of unobjected bills.

Mr. SMITH of Georgia. Mr. President, I am in sympathy with the desire to call the calendar for unobjected-to cases, but I do not think that can be done by motion. You can not start the call of the calendar and stop the right, after it starts, to move to take up any bill on the calendar. The Senator from Utah, I am sure, agrees with me about that. We can really only call the calendar for unobjected-to cases by unanimous consent. When we start the call of the calendar, except under unanimous consent, any Senator has the right to move to take up some other case.

I make this point of order, not because I object to the call of the calendar, but because I do not wish to see any rule established that such a motion can be made.

The VICE PRESIDENT. Every once in a while the present occupant of the chair tries to cut a Gordian knot by paying no attention to the rules of the Senate. The question now before the Senate is simply whether it will proceed with the calendar for the consideration of unobjected bills, or whether the motion of the Senator from Oklahoma shall prevail. If the Senate wants to proceed with the unobjected bills, there is no trouble in doing so by voting down the motion of the Senator from Oklahoma. If it does not, it can agree to that motion.

Mr. SMOOT. Mr. President, just a moment, in answer to the Senator from Georgia. I was of the opinion that under the rules that motion could not be made until it was held by the Vice President that a motion of that kind could be made. There is a record of it, and I thought I had it here in my desk, but I have not. I can get it, however, in a very few moments.

Mr. GALLINGER. Mr. President, before the motion of the Senator from Oklahoma is put, if that is in order now, I will ask the Senator from Oklahoma to repeat his request that we give from 5 to half past 6 to the consideration of unobjected cases.

Mr. OWEN. I requested unanimous consent that from 5 to half past 6 we might take unobjected bills, because at that time it is so difficult to keep a quorum on the naval bill.

Mr. SWANSON. I have objected to that, and I will object to any arrangement that interferes with the progress that ought to be made on the naval appropriation bill.

Mr. SMOOT. Then I will ask the Senator from Oklahoma to withdraw his objection, and let us consider the unobjected bills now.

Mr. OWEN. My request is withdrawn by the objection of the Senator from Virginia, because I could only ask unanimous consent. I withdraw it, however.

Mr. SMOOT. No; I mean the Senator's objection to my request for the consideration of unobjected bills on the calendar.

Mr. OWEN. Mr. President, I was right in the midst of the disposition of this matter when I was interrupted. It will take only a short time to dispose of it. It is a very important matter—a matter affecting the operation of the Federal reserve act.

Mr. SMOOT. I will say to the Senator that there are a good many other bills on the calendar that are very important, and perhaps we will reach the bill to which the Senator refers today. I do not know that there is any objection at all to it.

Mr. OWEN. I think we can dispose of the bill in half an hour. There are just some verbal amendments to be added to the act. The matter is practically an agreed report. I do not know of any objection to it.

Mr. SMOOT. Well, let the Senate decide what they want to do.

The VICE PRESIDENT. Rule VIII is perfectly plain:

> At the conclusion of the morning business for each day, unless upon motion the Senate shall at any time otherwise order, the Senate will proceed to the consideration of the Calendar of Bills and Resolutions, and continue such consideration until 2 o'clock, and bills and resolutions that are not objected to shall be taken up in their order, and each Senator shall be entitled to speak once and for five minutes only upon any question.

There is not a question of doubt about the rule, and the motion that is in order is the motion of the Senator from Oklahoma to proceed to the consideration of the bill indicated by him. If the Senate does not want to take up that bill, all it has to do is to vote down the motion. [Putting the question.] The Chair is in doubt.

Mr. HITCHCOCK. I suggest the absence of a quorum.

Mr. SMOOT. Oh, let us not take up the time of the Senate in that way.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Harding	Norris	Sterling
Bankhead	Hardwick	Oliver	Stone
Brandegee	Hitchcock	Overman	Sutherland
Catron	Hughes	Owen	Swanson
Chamberlain	Husting	Page	Thomas
Clapp	Johnson, Me.	Phelan	Thompson
Clark, Wyo.	Jones	Pomerene	Townsend
Clarke, Ark.	Kenyon	Ransdell	Vardaman
Culberson	La Follette	Shafroth	Walsh
Cummins	Lane	Sheppard	Warren
Curtis	Lodge	Simmons	Weeks
Dillingham	McCumber	Smith, Ariz.	Williams
Fletcher	Martin, Va.	Smith, Ga.	Works
Gallinger	Martine, N. J.	Smith, S. C.	
Gronna	Nelson	Smoot	

Mr. VARDAMAN. I wish to announce that the junior Senator from Tennessee [Mr. SHIELDS] is unavoidably absent on important business of the Senate. I desire this announcement to stand for the day.

Mr. SMITH of Georgia. I desire to state that both the Senators from Indiana [Mr. KERN and Mr. TAGGART] have been called to one of the departments on an important matter of public business.

Mr. MARTINE of New Jersey. I have been requested to announce that the senior Senator from West Virginia [Mr. CHILTON] is absent on official business and is paired with the senior Senator from New Mexico [Mr. FALL].

Mr. SHEPPARD. I wish to state that the junior Senator from New Hampshire [Mr. HOLLIS] is absent on official business.

The VICE PRESIDENT. Fifty-eight Senators have answered to the roll call. There is a quorum present.

AMENDMENT OF FEDERAL RESERVE ACT.

Mr. GRONNA. Mr. President, I wish to state briefly that I am a member of the Committee on Banking and Currency. I have not had an opportunity of giving the time I should have given to the bill which the Senator from Oklahoma desires to take up. I wish to state that the bankers of my State are protesting against certain provisions of the bill. They are opposed to a system of branch banks, and I believe the bill ought to be amended. Undoubtedly it will require a great deal of time. It ought to be fully discussed.

Mr. OWEN. Mr. President, I will say to the Senator from North Dakota that the objection he has in mind will be fully met by the insertion, in line 4 of page 19, after the word "district," of the words:

> Or in any State whose statutes do not specifically authorize branches for banks having State charters.

Mr. GALLINGER. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from New Hampshire will state it.

Mr. GALLINGER. Is the bill before the Senate now?

The VICE PRESIDENT. It is not.

Mr. GALLINGER. The motion is not debatable.

The VICE PRESIDENT. It is not debatable. The question is on the motion of the Senator from Oklahoma that the Senate proceed to the consideration of House bill 13391, to amend an act approved December 23, 1913, known as the Federal reserve act, by adding a new section. [Putting the question.] The Chair is in doubt.

Mr. OWEN. I call for a division.

The VICE PRESIDENT. Those in favor of the motion will please rise. [A pause.] Those opposed will rise. [A pause.] The vote is a tie—26 to 26.

Mr. HITCHCOCK. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. HARDING (when his name was called). On account of the absence of the junior Senator from Alabama [Mr. UNDERWOOD], with whom I am paired, I withhold my vote.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "yea."

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). I wish to announce the absence of my colleague [Mr. SMITH of Michigan]. He is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand for all votes to-day.

Mr. VARDAMAN (when his name was called). I have a pair with the Senator from New York [Mr. WADSWORTH], but it relates only to the naval bill. I vote "yea."

Mr. WALSH (when his name was called). I transfer my pair with the Senator from Rhode Island [Mr. LIPPITT] to the Senator from Illinois [Mr. LEWIS] and vote "yea."

Mr. WEEKS (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. In his absence I withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my general pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Tennessee [Mr. SHIELDS] and vote "yea."

The roll call was concluded.

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS]; and

The Senator from New York [Mr. WADSWORTH] with the Senator from New Hampshire [Mr. HOLLIS].

Mr. DILLINGHAM (after having voted in the negative). I observe that the senior Senator from Maryland [Mr. SMITH]

has not voted. Having a general pair with that Senator, I withdraw my vote.

Mr. GALLINGER. I am paired with the senior Senator from New York [Mr. O'GORMAN], who is absent. I transfer my pair to the senior Senator from Idaho [Mr. BORAH] and vote "nay."

Mr. BECKHAM. I transfer my pair with the senior Senator from Delaware [Mr. DU PONT] to the Senator from Oklahoma [Mr. GORE] and vote "yea."

Mr. SUTHERLAND (after having voted in the negative). I inquire whether the Senator from Arkansas [Mr. CLARKE] has voted?

The VICE PRESIDENT. He has not.

Mr. SUTHERLAND. I have a pair with that Senator, and I withdraw my vote.

The result was announced—yeas 32, nays 26, as follows:

YEAS—32.

Ashurst	Johnson, Me.	Pittman	Stone
Beckham	Johnson, S. Dak.	Pomerene	Swanson
Broussard	Lane	Ransdell	Thomas
Chamberlain	Martin, Va.	Shafroth	Thompson
Culberson	Martine, N. J.	Sheppard	Tillman
Hitchcock	Overman	Simmons	Vardaman
Hughes	Owen	Smith, Ga.	Walsh
Husting	Phelan	Smith, S. C.	Williams

NAYS—26.

Brady	Fletcher	McCumber	Smoot
Brandegee	Gallinger	Norris	Sterling
Catron	Hardwick	Oliver	Townsend
Clapp	Jones	Page	Warren
Clark, Wyo.	Kenyon	Poindexter	Works
Cummins	La Follette	Sherman	
Curtis	Lodge	Smith, Ariz.	

NOT VOTING—37.

Bankhead	Gore	McLean	Smith, Md.
Borah	Gronna	Myers	Smith, Mich.
Bryan	Harding	Nelson	Sutherland
Chilton	Hollis	Newlands	Taggart
Clarke, Ark.	James	O'Gorman	Underwood
Colt	Kern	Penrose	Wadsworth
Dillingham	Lea, Tenn.	Reed	Weeks
du Pont	Lee, Md.	Robinson	
Fall	Lewis	Saulsbury	
Goff	Lippitt	Shields	

So the motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13391) to amend the act approved December 23, 1913, known as the Federal reserve act, by adding a new section.

Mr. OWEN. Mr. President, I move to amend, on page 19, after line 4, by inserting certain words. I call the attention of the Senator from North Dakota to it. I move to insert the words: "or in any State whose statutes do not specifically authorize branches for banks having State charters," so that the language would read:

Provided, That no such branch shall be established outside of its State or of its Federal reserve district, or in any State whose statutes do not specifically authorize branches for banks having State charters.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

Mr. SUTHERLAND. Mr. President, a parliamentary inquiry. Has the bill been read?

The VICE PRESIDENT. It was before the Senate an hour and a half the other day. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. In the amendment of the committee, page 19, line 4, after the word "district" and the comma, insert "or in any State whose statutes do not specifically authorize branches for banks having State charters."

Mr. WEEKS. I wish to inquire if section 25 is considered as one paragraph or two, whether down to the word "located" on page 18, line 20, is one paragraph?

Mr. OWEN. The proper division of the amendment should be in paragraph, although the Senate has not declared a fixed purpose with regard to it. I will move, Mr. President, that this matter be considered section by section, dealing with the different sections as paragraphs.

Mr. WEEKS. The reason why I make the inquiry is because I am opposed to all that comes after line 21, on page 18. I think the amendment offered by the Senator from Oklahoma applies with propriety to the part that comes before as well as the part that comes after, and that these branches should be limited to the State or territory where the State laws permit that form of banking.

Mr. OWEN. That is the express purpose of it.

Mr. WEEKS. I am opposed to that part of the paragraph which comes after line 21, page 18. In other words, I am not in favor of branch banks in the counties or in the territory outside of the municipality where the bank is chartered.

Mr. OWEN. I ask unanimous consent that these amendments shall be considered section by section, so that any objection to any individual section may be expressed and the sentiment of the Senate taken with regard to it. That will open the way for the objection of the Senator without embarrassing other parts of the bill.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. OWEN. In section 25a, page 18, line 13, I move to strike out the words "national banking association" and to insert in lieu "member bank."

The amendment to the amendment was agreed to.

Mr. OWEN. In line 21 I move the same amendment, striking out "national banking association" and inserting "member bank."

The amendment to the amendment was agreed to.

Mr. OWEN. On page 19, in the same section, line 9, after the word "independent," I move to insert "national banking," so as to read:

If it were organized as an independent national banking association.

The amendment to the amendment was agreed to.

Mr. OWEN. In the same section, in line 9, I move to strike out the words "required of the parent bank itself by that section" and insert in lieu thereof "fixed by that section as a minimum capitalization for a national banking association located in the same place as the parent bank."

The amendment to the amendment was agreed to.

Mr. OWEN. On page 8 of the proposed amendment, after line 2, I move to insert an amendment desired by the Senator from Minnesota [Mr. NELSON]. I call the attention of the Senator from Minnesota to this proposal, a proposal which has been reported upon favorably by the Comptroller of the Currency, giving certain limited rights of agency to national banks, as follows:

That in addition to the powers now vested by law in national banking associations organized under the laws of the United States any such association located and doing business in any place the population of which does not exceed 5,000 inhabitants, as shown by the last preceding decennial census, may, under such rules and regulations as may be prescribed by the Comptroller of the Currency, act as the agent for any fire, life, or other insurance company authorized by the authorities of the State in which said bank is located to do business in said State, by soliciting and selling insurance and collecting premiums on policies issued by such company; and may receive for services so rendered such fees or commissions as may be agreed upon between the said association and the insurance company for which it may act as agent; and may also act as the broker or agent for others in making or procuring loans on real estate located within 100 miles of the place in which said bank may be located, receiving for such services a reasonable fee or commission: *Provided, however*, That no such bank shall in any case guarantee either the principal or interest of any such loans or assume or guarantee the payment of any premium on insurance policies issued through its agency by its principal: *And provided further*, That the bank shall not guarantee the truth of any statement made by an assured in filing his application for insurance.

The comptroller recommended in any place where the population does not exceed 3,000 inhabitants. I am willing to insert 5,000, as desired by the Senator from Minnesota. The matter is unimportant either way, I think.

The amendment to the amendment was agreed to.

Mr. OWEN. On page 9, after line 2, I move to insert:

That section 14 of the said Federal reserve act be amended by adding after the last word of paragraph (e) the following words:

"And with the consent of the Federal Reserve Board to open and maintain banking accounts for such foreign correspondents or agencies."

Some question arose as to the rights of the Federal reserve bank to open these accounts which were reciprocal, and the Federal Reserve Board recommended that the language of the law be made free from any obscurity.

Mr. BRANDEGEE. In every other instance in the bill where the section of the Federal reserve act is amended the entire section as it would read if amended is quoted.

Mr. OWEN. There are only a few additional lines added at the end of the section. It was not necessary to insert the whole section.

Mr. BRANDEGEE. Very well.

Mr. GALLINGER. Let the amendment be read from the desk.

The VICE PRESIDENT. It will be read.

The SECRETARY. On page 9 of the committee amendment, after line 2, insert:

That section 14 of the said Federal reserve act be amended by adding after the last word of paragraph (e) the following words:

"And with the consent of the Federal Reserve Board to open and maintain banking accounts for such foreign correspondents or agencies."

The amendment to the amendment was agreed to.

Mr. OWEN. On page 3, after line 15, I move to insert the following:

Add to section 11 a clause, as follows:

"(m) Upon the affirmative vote of not less than five of its members the Federal Reserve Board shall have power from time to time by

general ruling covering all districts alike to permit member banks to carry in the Federal reserve banks of their respective districts any portion of their reserves now required by section 19 of this act to be held in their own vaults."

Mr. BRANDEGEE. Mr. President, it is impossible for any Senator, especially one not a member of the Banking and Currency Committee and a Senator who has not the original reserve act before him, to have the slightest conception of what these very important amendments are to accomplish or wherein they change existing law. From the amendment just read it would seem to me as it is phrased any portion of it might be construed to be the whole of it; certainly it would be 99 per cent of it.

Mr. OWEN. The purpose is, I will explain to the Senator, to permit banks, with the unanimous consent of the Federad Reserve Board—that is, five out of its members—to hold any part of their reserves that they see fit in the Federal reserve banks. Take some of the big banks in New York City, they would like to have the liberty of putting a larger amount of their reserves in the Federal reserve banks.

Mr. BRANDEGEE. I know, and my comment on that language is that any part of it would include anything less than the whole.

Mr. OWEN. It does.

Mr. BRANDEGEE. I am not able to form any opinion, of course, about the merit of the amendment. I simply make this observation in passing. I do not think that this is at all the way in which a very important measure should be passed by the Senate in the morning hour with these amendments which are proposed on the floor and heard for the first time, not considered by the committee, and with no explanation. The Senate is voting on the bill whatever the chairman of the committee proposes. It may be all exceedingly wise legislation, but the Senate is doing it without any real conception of what all the changes are going to mean in the Federal reserve act after the bill is passed.

Mr. WEEKS. Mr. President——

Mr. OWEN. I yield to the Senator.

Mr. WEEKS. I wish to suggest to the chairman of the committee that amendments which have not been considered by the committee should not be presented. Here is an important matter pending before the Senate. I am personally in favor of the passage of this bill and I am going to take the time of the Senate to explain my reasons for favoring its passage, but the Senator is now offering amendments which have not been considered by the committee. The one which he has just offered I recognize as being right in language, but it does seem to me this legislation is of such importance that Senators are justified in objecting to the consideration of amendments which have not been considered by the committee.

Mr. OWEN. I have no objection to the Senate disregarding this particular amendment. It is true it came by report from the Federal Reserve Board after the committee had reported the bill, but it is a perfectly plain, simple proposal to permit these banks to put a larger part of their reserves with the reserve banks if they should so desire upon a vote of five of the members of the Federal Reserve Board. If any Senator, however, objects to the amendment, I am willing to have it laid aside.

Mr. GRONNA. Mr. President——

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from North Dakota?

Mr. OWEN. I yield to the Senator.

Mr. GRONNA. Would the Senator from Oklahoma be willing to have his bill printed after the amendments which he suggests have been adopted and let us consider them to-morrow morning?

Mr. OWEN. Certainly. I should be glad to have that done.

Now, Mr. President, I ask for action upon the amendment which I have submitted.

Mr. TOWNSEND. To which amendment does the Senator from Oklahoma refer?

Mr. OWEN. I refer to the last amendment proposed to section 11 by adding paragraph M.

Mr. TOWNSEND. Where does that come in? I do not think I understand the Senator's statement as to what point it is to come in.

Mr. OWEN. I desire that the amendment be inserted on page 3, after line 15.

Mr. TOWNSEND. Lines 13, 14, and 15, on page 3 of the bill, I think, refer simply to an amendment of section 13.

Mr. OWEN. I am going to suggest certain amendments immediately to that section, so as to make the language perfectly clear, and then let the amendments and the bill be printed and lie over. I shall not ask the Senate to act on the matter this morning, after suggesting the amendments so that any Senator will have an opportunity of examining the amendments which have been proposed and of understanding the reasons for them.

The VICE PRESIDENT. The amendment will be agreed to, without objection.

Mr. BRANDEGEE. Will the Senator from Oklahoma again state that amendment?

Mr. OWEN. The amendment was to have paragraph M added to section 11 of the bill; and I intend to move, in line 13, certain verbal changes, so as to make the language harmonious; but I am only able to take one step at a time.

Mr. SMOOT. Mr. President, if the Senator from Oklahoma is going to ask that the bill be recommitteed to the committee——

Mr. OWEN. I am not going to ask that it be recommitted to the committee.

Mr. SMOOT. I understood that the request of the Senator from North Dakota [Mr. GRONNA] to be that the bill be recommitted.

Mr. OWEN. No.

Mr. SMOOT. Then I misunderstood the Senator from North Dakota.

Mr. OWEN. My request was simply that the bill be printed for the information of the Senate, then to let it go over until we can act upon it without any condition being placed upon it, and without any suggested idea that it is not understood.

Mr. SMOOT. Then if any changes are to be made in any of the amendments, the amendments must be reconsidered on to-morrow or whenever the bill may hereafter be taken up?

Mr. OWEN. The amendments will be laid before the Senate in the same order, and any single point on an amendment will be open to amendment by any Senator who desires to amend it.

Mr. BRANDEGEE. I wish to make a suggestion to the Senator from Oklahoma. Inasmuch as he has stated that one of the amendments which he has proposed is going to be followed by another, I suggest that the Senator state both amendments now, so that we may see what the effect of both amendments will be before we agree to one amendment.

Mr. OWEN. Mr. President, I move, coincidently with the amendment I have suggested, in line 13, page 3, that the words "section 13 of" be stricken out, and that, in line 15, the words "to read" be stricken out, so as to read:

That the act approved December 23, 1913, known as the Federal reserve act, be amended as follows.

The VICE PRESIDENT. The amendment is agreed to, without objection.

Mr. OWEN. Then I desire to follow that insertion as to section 11 by the words "amend section 13 to read as follows," which makes the language harmonious.

The VICE PRESIDENT. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. Before the words "any Federal reserve bank," in line 16, page 3, it is proposed to insert the words "Amend section 13 to read as follows."

Mr. BRANDEGEE. I think that should read:

That section 13 be amended to read as follows.

Mr. OWEN. I accept that suggestion, and ask that it be amended so as to read:

That section 13 be amended to read as follows.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. OWEN. On page 9 I move to strike out, in line 4, the words "act approved December 23, 1913, known as," and to insert, after "the," the word "said," so as to read:

That section 16, paragraphs 2, 3, 4, 5, 6, and 7 of the said Federal reserve act be amended and reenacted so as to read as follows."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. WEEKS. Mr. President, do I understand that all of these amendments are to be printed for the information of the Senate and taken up for consideration the next time the bill comes before the Senate?

Mr. OWEN. Yes.

Mr. WEEKS. I have several times heard the Vice President put an amendment to a vote.

Mr. OWEN. These amendments are only to perfect the committee amendment. After the committee amendment shall have been perfected the amendments will themselves be subject to suggested amendments, I take it, from the floor. Would that not be the correct parliamentary position, Mr. President?

The VICE PRESIDENT. The Chair does not think there is any doubt about that.

Mr. OWEN. I am only perfecting the committee amendment so that the matter may then be acted upon by the Senate. If the Senator from Massachusetts then wishes to offer an amendment to the amendment as proposed by the committee, he will be at liberty to offer it.

Mr. CLARK of Wyoming. But the amendments themselves, if action is had upon them, would have to be reconsidered for that purpose, would they not?

Mr. OWEN. If any Senator asks that an amendment be reconsidered, I shall certainly agree to the request.

Mr. CLARK of Wyoming. But the parliamentary situation is what I desire to get at.

Mr. OWEN. What the Senator from Wyoming states is true; but I say I shall readily agree to any request for the reconsideration of an amendment.

Mr. CLARK of Wyoming. But it would require a formal reconsideration of the vote whereby the amendment was agreed to.

Mr. OWEN. Mr. President, that perfects the amendments to the amendment, except an amendment to correct a verbal error. On page 10, line 12, where the word "reserves" is plural, it should be singular. I move in that line to strike out the word "reserves" and to insert in lieu thereof the word "reserve."

The amendment was agreed to.

Mr. BRANDEGEE. Has the Senator from Oklahoma now finished with his proposed amendments for this morning?

Mr. OWEN. Yes; I have.

Mr. BRANDEGEE. I did not want to interrupt the Senator at all, but before the bill is laid aside to be printed, I desire myself to make one or two suggestions. I will do so now, if I do not interrupt the Senator.

Mr. OWEN. I was going to ask that the bill be printed and lie over.

Mr. BRANDEGEE. I will agree to that, if the Senator will withhold the request until I have made a few suggestions, which he will have an opportunity to agree to or disagree to. They are verbal changes.

Mr. OWEN. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. I wish to make a further suggestion to the Senator. For instance, take page 3, where the first committee amendment appears. Beginning with line 16, I notice that each one of the committee amendments printed in italics bears quotation marks at the beginning and end of each amendment. Inasmuch as this bill provides that certain sections of the Federal reserve act are to be amended "to read as follows," does the Senator think the amended sections ought to be left in quotation marks, so that they will appear in that way in the Federal reserve act?

Mr. OWEN. I will say to the Senator that in the report of the committee those quotation marks were used, but I do not think they should be used; in fact, I think they should be omitted.

Mr. BRANDEGEE. Then I suggest that in the reprint to be made of the bill the quotation marks be omitted.

Mr. OWEN. I accept that amendment.

Mr. BRANDEGEE. Then the law will be in proper form in case the bill is passed.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE. Now, Mr. President, I suggest, on page 8, line 11, that the word "And," the first word in the line, beginning a new sentence, should be stricken out and the word "Such" should be substituted in its place.

Mr. OWEN. That would be better English. I agree to that.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE. On page 9 there is a word which differs entirely from the language used in connection with other sections of the Federal reserve act which are amended. I call attention to line 6, on page 9, where it is said "the Federal reserve act be amended and reenacted so as to read as follows:"

Mr. OWEN. The words "and reenacted" may go out with propriety.

Mr. BRANDEGEE. I think they should be stricken out.

The SECRETARY. On page 9, line 6, after the word "amended," it is proposed to strike out the words "and reenacted."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE. On page 14, lines 1, 2, and 3, read:

That section 24 of the act approved December 23, 1913, known as the Federal reserve act, be amended so as to read as follows.

Should not the words "Section 24" precede the beginning of line 5, so as to have those words a part of the section?

Mr. OWEN. That should be done.

The SECRETARY. On page 14, line 5, before the word "Any," it is proposed to insert the words "SEC. 24."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE. Now, should not the subhead in line 4 be stricken out?

Mr. OWEN. The subhead should be stricken out.

The SECRETARY. On page 14, line 4, it is proposed to strike out the subhead "Loans on farm lands and other real estate."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE. On page 17, line 4, I notice there is a provision reading as follows:

If at any time the Federal Reserve Board shall ascertain that the regulations prescribed by it are not being complied with, said board shall be authorized and shall have power to institute an investigation of the matter—

And so forth.

I think it would be an improvement to say "said board is hereby authorized and empowered."

Mr. OWEN. That would be better English.

The SECRETARY. On page 17, line 6, after the word "board," it is proposed to strike out the words "shall be" and insert the word "is"; and in line 7, after the word "and," to strike out "shall have power" and insert "empowered," so as to read:

If at any time the Federal Reserve Board shall ascertain that the regulations prescribed by it are not being complied with, said board is authorized and empowered to institute an investigation of the matter.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. BRANDEGEE. In line 21, I think the idea intended to be conveyed would be more effectually expressed if it said "profit or loss accrued," instead of "accruing at each branch."

Mr. OWEN. I think either word would suffice; but I have no objection to the amendment.

Mr. BRANDEGEE. I think "accruing" contemplates a continuing process, while "accrued" contemplates a completed one.

The SECRETARY. On page 17, line 21, after the word "loss," it is proposed to strike out "accruing" and to insert "accrued."

Mr. OWEN. I accept that amendment.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. HITCHCOCK. Mr. President——

Mr. OWEN. I yield to the Senator.

Mr. HITCHCOCK. Mr. President, I can not permit to go unchallenged the extraordinary statement made here on Friday by the Senator from Kansas [Mr. CURTIS] in condemnation of the Federal reserve act; nor can I permit to pass without notice his equally erroneous statement concerning the Vreeland-Aldrich Act. For the first time, so far as I know, a Republican of responsibility has ventured to attack the Federal reserve act, which may be termed the great constructive business—saving and commerce—promoting act of this administration.

Recently a Republican national convention met in Chicago, not only for the purpose of proclaiming Republican principles and Republican purposes, but also, evidently, for the purpose of pointing out weaknesses in the Democratic armor and condemning Democratic mistakes. That representative Republican convention did not venture to say one word in criticism of the Federal reserve act, which has done so much to mobilize the great banking resources of the United States, to protect the business world, and to establish upon a firm basis American credit.

Mr. President, how did it happen that this great Republican convention did not dare even to mention the Federal reserve act, which has revolutionized American banking and credit? It is an act which has commanded the attention of the world, and which may well be pointed to as the greatest achievement of President Wilson's administration. Why did the Republican convention ignore it? Mr. President, it was evidently for the reason that an attack upon that act would have been an affront to the intelligence of the American people and would have injured the Republican Party, rather than aided it. And so the Republican convention was silent. But the Senator from Kansas, more venturesome than his party, puts into the RECORD here some of the most reckless and unwarranted statements concerning this Federal Reserve System.

Mr. President, in the first place, the Senator from Kansas declares that the Vreeland-Aldrich Act—yes, he says the "Republican" Vreeland-Aldrich Act—of 1908 was used by this administration to save the country from panic. He is mistaken. The Republican Vreeland-Aldrich Act of 1908 was never used.

Mr. SMITH of Georgia. It could not have been used.

Mr. HITCHCOCK. Of course it could not have been used. From the date it was enacted it was an obsolete law, an unworkable law. It was unworkable because it provided a rate of interest or a rate of tax on emergency currency so high that no bank could avail itself of it without practically confessing bankruptcy. It was unworkable because it provided for currency associations which the banks themselves would not accept and operate under. It was unworkable because it did not permit national banks as individual borrowers to avail

themselves of its provisions, unless they had a bond-secured note issue already outstanding equal to 40 per cent of their capital; and we know that most of the larger banks of the country have never had and never will have any such amount of currency outstanding. Thus the big banks of the country could not get currency. So, Mr. President, I say that the Republican Vreeland-Aldrich Act of 1908, rather than having been used by this administration to protect the country from a panic, was never used from the time it was enacted. It was not used until the Democratic Congress had amended it twice, and then it was no longer what Senator CURTIS calls the Republican Vreeland-Aldrich Act.

The first amendment appears as a part of the Federal reserve act itself, which was enacted in December, 1913. That amendment reduced the rate of interest on emergency currency, so that, instead of paying 7 per cent for a 90-day emergency note, a bank could be able to procure it for 3 per cent.

Mr. CURTIS. Mr. President——

Mr. HITCHCOCK. It reduced the rate of interest on long-time emergency notes so that a bank, instead of attempting to pay the impossible rate of interest of 10 per cent on currency to loan to its customers, could secure it for 6 per cent.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER (Mr. BECKHAM in the chair). Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. HITCHCOCK. I yield.

Mr. CURTIS. Does not the Senator know that the Secretary of the Treasury says in his report of December 1, 1913, that the offer to issue $500,000,000 under the Aldrich-Vreeland Act prevented a panic, and that no request was made for the money because it was not needed, but as soon as the offer was made to issue it confidence was restored?

Mr. HITCHCOCK. I heard the Senator make that statement.

Mr. CURTIS. I read that statement from the report of the Secretary of the Treasury.

Mr. HITCHCOCK. Yes; and when was that statement made by the Secretary of the Treasury?

Mr. CURTIS. In December, 1913.

Mr. HITCHCOCK. That was after the Vreeland-Aldrich Act had already been amended so as to make it workable. He could not have made that statement before it has been so changed, it would not have been workable; his offer could not have been accepted by the banks, because they could not have availed themselves of the law in its original form.

Mr. SMOOT and Mr. WEEKS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. HITCHCOCK. I do.

Mr. SMOOT. The Senator knows there was no occasion to use the currency before that time. There was nothing in the business of this country that would justify the banks in calling for it. But if there had been a panic, the rate of interest that was provided for in the Vreeland-Aldrich Act in the first place would not have prevented the use of that currency throughout the United States. I take it for granted that the Senator is sufficiently familiar with the business of this country to know that the rates that were provided in that bill would not have prevented its use if a panic had occurred; but no panic occurred, and no occasion for its use arose.

Mr. HITCHCOCK. I am very much interested to hear the views of the Senator from Utah, but the fact was that until the Vreeland-Aldrich Act was amended it was not accepted by the bankers. We know that the Treasury authorities of the United States urged the banks of the country to form currency associations, and that for two or three years after it passed there was only one currency association formed in the United States, and there never was a Vreeland-Aldrich currency association formed and put into successful operation.

Mr. WEEKS. Mr. President——

Mr. HITCHCOCK. There never was a currency association that brought any relief to the country. The only feature of the Vreeland-Aldrich Act which was ever workable at all was that feature which provided for the issue of emergency notes direct to the individual bank; and that feature was only made workable and acceptable to the banks when the interest rate was reduced to 3 per cent on 90-day currency.

Even then the Vreeland-Aldrich Act was not available to most of the banks in the big cities, because it denied the use of emergency currency to banks which did not have a bond-secured currency equal to 40 per cent of their capital. Many of the banks of the big cities and hundreds of those throughout the country did not have any such amount of bond-secured currency. Therefore it was necessary to amend the Vreeland-Aldrich Act again and allow emergency currency to banks whether they had bond-secured currency or not. The Vreeland-Aldrich Act had limited the amount of emergency currency to $500,000,000. This limit was now repealed. The Vreeland-Aldrich Act had limited the amount for any single bank to 100 per cent of its capital and surplus. This was now raised to 125 per cent, and the Vreeland-Aldrich Act, by these extensive changes, some of them made in December, 1913, when the Federal reserve act was passed, and the rest of them made in August, 1914, just after the outbreak of the war, was radically changed and placed in operation.

So I repeat that the old Republican Vreeland-Aldrich Act, referred to by the Senator from Kansas, was never placed in operation; it could not have been placed in operation, and by general confession it was a dead letter until the time it was amended by the Democratic Congress in the Federal reserve act.

Mr. SMOOT. Mr. President, the Senator must admit, however, that after the Vreeland-Aldrich bill had been amended as he has referred to here that act itself would never have been made use of by the banks of this country unless occasion arose to use it, and that could only happen in case of a threatened panic, which did happen at the beginning of the European war. Ordinarily no commercial bank in this country would pay 3 to 6 per cent for money. The Senator knows banks could not afford to do it; and therefore, as far as the Vreeland-Aldrich Act was concerned, it was intended and was an emergency measure pure and simple.

Mr. HITCHCOCK. Mr. President, I can not submit to anything but a question, because there are only a few minutes remaining.

Mr. WEEKS. Mr. President——

Mr. HITCHCOCK. But if, as the Senator from Utah says, no bank in the country could afford to pay 3 per cent for money, how ridiculous for the Republican Congress to have written into the Vreeland-Aldrich Act a condition that the banks could not get emergency currency for their customers except by paying at the rate of 7 per cent for 90 days and at the annual rate of 10 per cent for six months. How ridiculous to hold that offer out to them, if, as the Senator from Utah says, they could not afford to pay even 3 per cent for money.

Mr. SMOOT. I stated in ordinary times, but if there was a panic on they could pay 5 per cent, or they could pay 6 per cent, or they could pay 10 per cent, if it would save them from failure.

Mr. HITCHCOCK. It was the purpose of the Democratic administration not to have "a panic on." In that respect the Democratic administration was different from previous Republican administrations. The Vreeland-Aldrich Act was intended to attempt to remedy a panic after it had arrived. The purpose of the Democratic legislation has been to prevent a panic, and that has been achieved. It is fair to say that the Democratic Congress did the wise thing when, at the time it enacted the Federal reserve act for the permanent good of the country, it also provided for such amendments of the Vreeland-Aldrich Act as would make it workable, and then extended its existence over a number of months to June 30, 1915, pending the time that the new Federal Reserve System should be placed in operation.

Mr. WEEKS, Mr. CURTIS, and Mr. NORRIS addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Massachusetts?

Mr. HITCHCOCK. I do, very briefly, as I want to finish in a few minutes.

Mr. WEEKS. I do not wish to take the Senator's time, but I am astonished that so intelligent a student of banking matters as is the speaker should make such statements. I will hazard the opinion that he can not find a responsible banker in the United States who will state, over his signature, that any change was made in the Aldrich-Vreeland Act by the legislation to which the Senator is referring which had anything to do with putting it into operation.

Mr. HITCHCOCK. I am amazed at that statement from the Senator from Massachusetts.

Mr. WEEKS. Well, I make the statement, and I challenge the Senator to disprove it.

Mr. HITCHCOCK. The Senator from Massachusetts was a Member of this body, as I was, and he was a member of the committee, as I was; and he knows that ingrafted upon the Federal reserve act were provisions made by this Democratic Congress, and, I think, voted for by the Senator from Massachusetts himself, which made possible the operation of the Vreeland-Aldrich Act——

Mr. CURTIS and Mr. WEEKS addressed the Chair.

Mr. HITCHCOCK. And that that same act was again amended, four days after the war in Europe broke out, so that the banks of the country availed themselves of it to the extent of $382,000,000 in emergency currency——

Mr. NORRIS and Mr. WEEKS addressed the Chair.

Mr. HITCHCOCK. And by that means a panic was prevented.

Mr. WEEKS. There were changes made in the Aldrich-Vreeland Act in the Federal reserve bill; but that they had any influence in putting that act into operation I deny, and I repeat that the Senator can not find a responsible banker in the United States who will say that they did have. The fact is, as the Senator from Utah [Mr. SMOOT] has stated, that there never had been, during the life of the Aldrich-Vreeland Act, any occasion to put it into operation. The rates that were prescribed in the original bill were made to conform to the average and ordinary rates that were paid for taking out clearing-house certificates. They were taken out, without regard to the rates, when it was necessary to do it; and if there had been occasion——

Mr. HITCHCOCK. Mr. President, I must ask to have the floor. I have only a few moments remaining.

Mr. WEEKS. I beg the Senator's pardon.

Mr. HITCHCOCK. And now I want——

Mr. CURTIS and Mr. NORRIS addressed the Chair.

Mr. HITCHCOCK. I decline to yield, because I have only a few moments.

Now, Mr. President, permit me to come, for the remaining moments of my time, to the Federal reserve act, which has been thus recklessly attacked by the Senator from Kansas. He states in his speech that the cost of maintaining the Federal reserve banks and the Federal Reserve System is paid by the Government of the United States. If he has read the bill, he certainly can not think such a thing to be the fact. Whatever cost there is of maintaining the Federal Reserve System falls upon the banks that are parts of the system, not upon the Government of the United States, not upon the taxpayers of the United States. If these reserve banks temporarily work at a loss, the loss falls upon the 7,500 national banks of the United States which make up the system; and they have been compensated a thousand times over for any such cost of this system. Why, Mr. President, this system has brought into one firm organization 7,500 banks of the United States that formerly stood each alone. It has mobilized their great capital, their huge deposits, and their vast resources into one great system under the control of the Federal Reserve Board. The result has been that a vast sum of money has been released from the idle reserves of 7,500 banks for the use of the people of the United States. Interest rates all over the United States have been stabilized and lowered, yet bank dividends have been increased by reason of the great growth of deposits. There are in deposits over two thousand million dollars to-day in the national banks of this system more than there were at the time the Federal reserve act was passed, and loans have increased in equal proportion, but at lower rates.

Mr. President, what has become of the annual cry that formerly went up under Republican administrations of the difficulty of moving the crops? Gone, and gone forever. The crops are now moved as regularly and as simply by the operations of this act as if there were no money required for the purpose. In the great crisis of the war the Federal Reserve System, hardly ready to be placed in operation, and in its very infancy, grappled with the great problems which confronted the country, and within a few moments was able to bring order and confidence to the business world in the United States.

Under the protection of the Federal Reserve System the United States alone, of all the countries on the Western Hemisphere, has enjoyed an unparalleled prosperity. There has been a stability of business, an abundance of credit, and a confidence among bankers never known before in the history of wars.

Mr. SUTHERLAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. HITCHCOCK. For a question.

Mr. SUTHERLAND. Just a question. Does the Senator from Nebraska think that the Federal reserve act has been responsible for the increased deposits in the banks and the lowering of the rates of interest?

Mr. HITCHCOCK. I have no doubt of it in the world; no doubt of it in the world.

Mr. SUTHERLAND. Then——

Mr. HITCHCOCK. For the first time in history the great resources of the United States have been mobilized. For the first time in the history of America credit has been stabilized. For the first time in the history of the United States it has been taken out of the power of a few great financial interests to bring about periodic panics and periodic stringencies.

Mr. SUTHERLAND. Let me ask the Senator——

Mr. HITCHCOCK. Now, whenever the need for additional credit or currency comes we have in this reservoir of the Federal Reserve System hundreds of millions of gold and thousands of millions of available credit. We have on hand now under a single control $400,000,000 in gold and several times that amount of loanable credit.

Mr. SUTHERLAND. Now, may I ask the Senator a further question there? Does the Senator from Nebraska think that the tremendous flood of money that has come to this country from European countries engaged in war has had nothing to do with increasing the amount of money which we have on hand, and the consequent decrease in the rates of interest?

Mr. HITCHCOCK. Oh, Mr. President, I have no doubt that that has had its influence; but that flood of money would not have come, our manufacturing interests could not have been financed, our banks might have been entirely unable to grapple with the situation, if it had not been for this system. Even now this country would be unable to reach out to get the great foreign trade which is to be changed in its course after this war if it were not for a system which unites in one organization all of the banks of the country that formerly stood separate rivals to each other. And, Mr. President, it must be remembered that during this same time the United States has shown its wonderful powers by buying thousands of millions of its own securities from stricken Europe, and that was only possible by the operations of this national system, uniting thousands of banks.

Mr. President, Republicans here, as a campaign measure, may smile and make speeches for campaign purposes; but the financial writers and statesmen of every country in the world have acknowledged the excellence of this system which has been established in the United States. There is not any other neutral country in the world that shows the degree of prosperity which has been developed in the United States during this war under this administration.

Mr. President, I doubt whether my Republican friends will care to prolong this discussion of the Federal Reserve System to any great length. It would be a poor campaign policy for them. The fact is that the Federal reserve act received in this body at least 7 Republican votes; it received in the House of Representatives 35 Republican votes, 6 Progressive votes, and 1 Independent vote; and if the Senator from Kansas had the temerity to offer here a bill to repeal the Federal reserve act, I doubt whether it would receive any vote except his own.

Mr. CURTIS. Mr. President——

Mr. HITCHCOCK. The Federal reserve act is like some other acts of this administration. It has received so many Republican votes in its passage, and has been so vindicated by experience, that a great national convention of Republicans assembled in Chicago has not had the temerity to attack it. It has been vindicated by experience and accepted as a great evidence of the fact that the Democratic Party is possessed of constructive statesmanship—a matter which our Republican friends in the past have delighted to question.

Mr. President, I believe if we could make a list here of Republican Senators and of Republican Members of the House of Representatives who have at different times voted for Democratic measures like the Federal reserve act, the rural-credits bill, the Federal Trade Commission bill, the Clayton antitrust bill, and other acts of this administration, the list of Republicans would be so long that there would be a very small minority still holding out against these great measures.

It is true, Mr. President, that the Republican convention recently assembled made a criticism of the rural-credits bill recently passed by this Congress, criticized it and condemned it; yet how many of you Republican Senators on the other side opposed it on its final passage? Only five, and three of you were members of the resolutions committee of the Republican convention.

Mr. President, not only the Democrats of the country, not only the independent voters of the country believe that these great acts, led and headed by the Federal reserve act, have come as permanent reforms in this country, but there is a large section of the Republican Party ordinarily voting the Republican ticket which will reject such attacks as have been made by the Senator from Kansas on the Federal reserve act. Those voters proclaim it good, because they know that it has had a beneficent influence upon the business of the United States.

Mr. CURTIS. Mr. President——

Mr. SUTHERLAND. Let me ask the Senator a question before he takes his seat.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Kansas?

Mr. HITCHCOCK. I do.

Mr. CURTIS. I do not ask the Senator to yield to me. I want to take the floor in my own right.

Mr. HITCHCOCK. I am through.

Mr. SUTHERLAND. Will the Senator from Kansas permit me to ask the Senator from Nebraska a question before he begins his remarks?

Mr. CURTIS. I will yield to the Senator from Utah for his question.

Mr. SUTHERLAND. The Senator from Nebraska has eulogized the Federal reserve act without qualification. The majority of Republicans have not been opposed to the principle of the Federal reserve act. It was a Republican principle, advocated by Republicans before the Democratic Party came into power. But the Republicans upon this floor criticized some of the provisions of the Federal reserve act; and I ask the Senator from Nebraska whether he can call to mind now any Republican upon this side who criticized certain features of that legislation any more vigorously than did the Senator from Nebraska himself?

Mr. HITCHCOCK. Mr. President, I criticized the bill in the making and helped to amend it, but when it reached the perfection that it did reach I voted for it with enthusiasm, and I have defended it consistently as the most remarkable piece of constructive legislation of recent years.

Mr. SUTHERLAND. Mr. President, the Senator concealed his enthusiasm from those sitting about him. Did the Senator vote with enthusiasm for the provision of the bill which called for 12 reserve banks instead of 4?

Mr. HITCHCOCK. The Senator knows very well that I advocated four reserve banks, but the Senator knows also that my chief fight was for certain provisions which concerned my constituents in the West. I insisted upon agricultural paper, including the notes of stock feeders and stock raisers, being recognized as paper suitable for rediscount even though it ran four, five, and six months, and as being just as much self-liquidating paper as the paper of the manufacturer or the merchant in the East and entitled to just as much consideration by the Federal reserve banks. I was successful in getting that amendment accepted. I urged also that national banks should be given the right to lend a certain amount of money upon farm lands, and upon that also I was successful and the provision was ingrafted in the bill. I urged also the incorporation of a provision for the guaranty of bank deposits, and the Senate also accepted that amendment, though it was later rejected by the House. It was after these amendments had been accepted which were vital to my constituents and under these conditions that I voted for the bill and have been glad that I had a share in its making.

Mr. CURTIS. Mr. President, I am a little surprised that the Senator from Nebraska should say that the reserve act was amended by the Democratic administration before the report to which I called attention was published. My statement to the Senate was that the report of the Secretary of the Treasury, Mr. McAdoo, to which I referred, was issued December 1, 1913.

The PRESIDING OFFICER. The hour of 12 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. CURTIS. The truth is—and I want to call the Senator's attention to it, and I do not want him to forget it in the future—the act to which he refers was not amended until August 4, 1914.

Mr. HITCHCOCK. The Senator is entirely mistaken.

Mr. SMITH of Georgia. The act was amended——

Mr. CURTIS. I can only yield for a question.

Mr. HITCHCOCK. The Senator is wrong in his statement.

Mr. CURTIS. I will print the separate amendment as a part of my remarks. I hold it in my hand.

The act referred to is as follows:

[Public, No. 163, 63d Cong.]

An act (S. 6192) to amend section 27 of an act approved December 23, 1913, and known as the Federal reserve act.

Be it enacted, etc., That section 27 of the act approved December 23, 1913, known as the Federal reserve act, is hereby amended and reenacted to read as follows:

"SEC. 27. The provisions of the act of May 30, 1908, authorizing national currency associations, the issue of additional national-bank circulation, and creating a National Monetary Commission, which expires by limitation under the terms of such act on the 30th day of June, 1914, are hereby extended to June 30, 1915, and sections 5153, 5172, 5191, and 5214 of the Revised Statutes of the United States, which were amended by the act of May 30, 1908, are hereby reenacted to read as such sections read prior to May 30, 1908, subject to such amendments or modifications as are prescribed in this act: *Provided, however*, That section 9 of the act first referred to in this section is hereby amended so as to change the tax rates fixed in said act by making the portion applicable thereto read as follows.

"National banking associations having circulating notes secured otherwise than by bonds of the United States shall pay for the first three months a tax at the rate of 3 per cent per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterwards an additional tax rate of one-half of 1 per cent per annum for each month until a tax of 6 per cent per annum is reached, and thereafter such tax of 6 per cent per annum upon the average amount of such notes: *Provided further*, That whenever in his judgment he may deem it desirable the Secretary of the Treasury shall have power to suspend the limitations imposed by section 1 and section 3 of the act referred to in this section, which prescribe that such additional circulation secured otherwise than by bonds of the United States shall be issued only to national banks having circulating notes outstanding secured by the deposit of bonds of the United States to an amount not less than 40 per cent of the capital stock of such banks, and to suspend also the conditions and limitations of section 5 of said act except that no bank shall be permitted to issue circulating notes in excess of 125 per cent of its unimpaired capital and surplus. He shall require each bank and currency association to maintain on deposit in the Treasury of the United States a sum in gold sufficient in his judgment for the redemption of such notes, but in no event less than 5 per cent. He may permit national banks, during the period for which such provisions are suspended, to issue additional circulation under the terms and conditions of the act referred to as herein amended: *Provided further*, That the Secretary of the Treasury, in his discretion, is further authorized to extend the benefits of this act to all qualified State banks and trust companies which have joined the Federal Reserve System or which may contract to join within 15 days after the passage of this act."

Approved, August 4, 1914.

Mr. HITCHCOCK. Will the Senator yield to me?

Mr. CURTIS. Yes.

Mr. HITCHCOCK. Does the Senator dispute the fact that the Federal reserve act which was passed December, 1913, and which was reported in October or November previous, amended the Vreeland-Aldrich Act?

Mr. CURTIS. I say the Vreeland-Aldrich Act was amended in August, 1914, but also——

Mr. SMITH of Georgia. It was not amended until that time?

Mr. HITCHCOCK. It had been previously amended.

Mr. CURTIS. When?

Mr. HITCHCOCK. By positive act.

Mr. CURTIS. In December, 1913, so as to extend its operation until June 30, 1915, and as to the rate of interest.

Mr. HITCHCOCK. That was not all. There was an additional amendment.

Mr. CURTIS. I want to call the Senator's attention to this report. This report was issued December 1, 1913. It is the report of the Secretary of the Treasury, and it says:

$500,000,000 EMERGENCY CURRENCY ANNOUNCEMENT.

A special session of Congress convened on April 7, 1913, and immediately began to consider the important questions of tariff and currency reform. The vast economic changes involved in these two important questions had the natural effect of causing in many quarters apprehension as to the possible effects of the anticipated legislation. A feeling of unrest began to pervade business circles. This was accentuated by a certain propaganda of pessimism which, whether designedly or not, produced a condition of extreme nervousness and tension. In the early part of June this assumed a serious aspect. Complaints began to reach the department from many parts of the country that credits were being restricted, and that it was increasingly difficult to secure funds for the normal needs of legitimate business. To what extent these reports were justified there was no exact means of ascertaining, but the general conditions indicated a more or less acute state of affairs. In order to relieve anxiety and to let the business interests of the country understand that there was no occasion for unreasonable restriction of credits, and to destroy apprehension based upon unjustifiable fears, and to assure the country that the means were at hand to cope successfully with any situation that might arise, the Secretary announced that there was actually on hand in the Treasury and ready for immediate delivery to any and every bank complying with the requirements of the law, $500,000,000 in new national-bank note currency, which the Secretary said he would not hesitate to issue under the provisions of the Aldrich-Vreeland Act of May 30, 1908, to banks making application therefor in accordance with the terms of that act. The relief occasioned by this announcement was instantaneous. Confidence of the banks in their ability to meet the demands of their customers was largely restored and the unfavorable symptoms promptly disappeared. So completely effective was this action that none of the $500,000,000 of currency was applied for by the banks.

That was issued before the Democratic majority amended the act of 1908 in any respect.

If the Senator read the speech I made the other day——

Mr. NORRIS. Will the Senator state what report that is?

Mr. CURTIS. It is the report of the Secretary of the Treasury of December, 1913.

Mr. GALLINGER. Secretary McAdoo's report.

Mr. CURTIS. Secretary McAdoo's, the Democratic Secretary of the Treasury.

If the Senator read my speech with any view of criticism, he should have the fairness to say that when the question was asked me by the Senator from Colorado, if I favored repealing the Federal reserve act, I said no, but that I would materially amend the act. If it is so successful, why should you gentlemen on the other side want to materially amend it? Since it was written on the statute book you have amended it four times, and you are now asking for the fifth amendment. If it was so perfect, so workable, why so many amendments?

Mr. HITCHCOCK. Mr. President——

Mr. CURTIS. I would amend the act so as to make it less cumbersome. The Senator says it is not expensive to this country, yet the report of the Secretary of the Treasury giving the

expenses of putting it in operation and its maintenance to December 31, 1915, was quoted by me and put in the RECORD, and it shows that it has been quite expensive. It is not only expensive to the Government, but it is expensive to the banks. You have taken money from the banks and have it lying idle, and they are receiving no dividends and no interest. Every national banker in this country will tell you how expensive it is to his bank.

More than that, as was stated by the Senator from Massachusetts, when the original bill was being considered in 1913 about 75 per cent of the act was Republican. That part of it is good. The 25 per cent that is Democratic seems to be bad. You on the other side will keep on amending it until you get rid of the objectional features and if you do not finish it when the Senate becomes Republican after the 4th of next March and the House becomes Republican, the Republicans will amend it so that it will be workable and less expensive to the people of this country.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Nebraska?

Mr. CURTIS. Certainly.

Mr. HITCHCOCK. The Senator seems to be disturbed because the Federal reserve act has been amended and is likely to be amended again. Will he turn his mind for a moment to the great Republican constructive measure known as the national banking act, and tell the Senate how many times it was amended before it became satisfactory?

Mr. CURTIS. In its lifetime it was amended a good many times, but that act was passed during the war period. The Federal reserve act was not passed until after the National Monetary Commission, composed of both Republicans and Democrats alike, had worked more than four years upon it and had it in an almost perfect condition. The Senator knows that as well as I do.

Mr. HITCHCOCK. Will the Senator say the national banking act was amended less than 20 times?

Mr. CURTIS. It lasted 55 years. You have amended this act four times in two years and are now asking to amend it again.

Mr. HITCHCOCK. So the amendment of this act by the administration which enacted it is simply toward its perfection in the light of experience. The Senator will not object to that?

Mr. CURTIS. It shows that the matter which was put in by your side was not properly digested or considered.

Mr. HITCHCOCK. That is true of the banking act. It is true of any legislation.

Mr. CURTIS. The Senator from Kansas is not objecting to amending the act. I want to see it amended. I want to see it made workable. I want to see it made less expensive not only to the people of the country but to the bankers. I want to see it amended so it will give relief. That is what I said to the Senator from Colorado. I would favor putting back on the statute books the act of 1908, the Aldrich-Vreeland Act, under which money could be furnished to move crops as it was furnished before the act of December, 1913, was put upon the statute books.

Mr. SMITH of Georgia. Mr. President, it is now lacking only a few days of two years since the beginning of the European war, but we must all still remember the feeling of financial suspense which spread over the country the last of July and first of August, 1914. It was known that large quantities of American securities had been dumped upon the markets in New York City. There had not been time to put the new reserve banking system into operation. The people all over the country were needing money and wished enlargement of credits.

It was feared that the big banks in the large cities, instead of enlarging credits, would call upon the smaller banks throughout the country for settlements; that instead of broadened credits a curtailment of credits would take place. With this once begun, the big banks calling upon the smaller banks for settlements, the smaller banks would have been compelled to call on their creditors for settlements, and so all down the line liquidation would have been the rule.

With the depression incident to the European disturbances temporarily affecting adversely all parts of the country, liquidation would have meant forced settlements and forced sales, and a national panic would have followed.

I do not believe this country ever faced a more dangerous financial condition than that of August 1, 1914. The panic was averted, due to the wise financial legislation passed during the present administration. The Senator from Kansas is mistaken when he asserts that to the Aldrich-Vreeland Act is due the credit for the manner in which this country withstood the financial pressure of the summer and fall of 1914. There never was a bank note issued for circulation under the Aldrich-Vreeland Act until after amendments were made to it in December, 1913.

Mr. CURTIS. Mr. President——

Mr. SMITH of Georgia. I decline to yield at present.

The first real life was put into that act by legislation adopted in December, 1913, strengthened, as it was, by the legislation of August, 1914. The Aldrich-Vreeland Act was passed in 1908. The act expired by limitation under its own provisions on the 30th day of June, 1914. It authorized national banks to make an increase of currency through the issue of their own notes for circulation under certain restrictions. Those restrictions were so severe that no bank had ever availed itself of the act to issue any notes. They were so severe that no bank could issue notes under it without practically conceding great financial distress, damaging to the standing of the bank availing itself of the act.

Let me take up, first, the tax feature of the act. A national bank issuing its own notes for circulation under this act was required to deposit an amount equal to 5 per cent of the notes so issued in gold with the Treasurer of the United States and to maintain such a deposit for redemption of its notes. The bank, therefore, only obtained an increase of circulation of 95 per cent of the notes which it issued, 5 per cent of its circulation having been curtailed by the gold deposit. The act then required the bank so issuing these notes to pay 5 per cent per annum on the average amount of such notes in circulation for the first month of the circulation, and added 1 per cent more for the second month, 1 per cent more for the third month, 1 per cent more for the fourth month, 1 per cent more for the fifth month, and thereafter a continuing tax at the rate of 10 per cent per annum. So that the tax which the bank paid on its own notes put in circulation was to be 5 per cent per annum for the first month, 6 per cent per annum for the second month, 7 per cent per annum for the third month, 8 per cent per annum for the fourth month, 9 per cent per annum for the fifth month, 10 per cent per annum for the sixth month, and 10 per cent per annum thereafter, while the actual increase of the circulation which the bank obtained was only 95 per cent of the notes issued.

The security required from the bank to be deposited with the Treasurer to permit this note issue was of such a character that it could only be furnished by a few of the large banks of the country, and the average national bank was excluded entirely from the privilege of the issue, and the big banks, to make the issue of their notes, were compelled to pay the enormous charges I have described. All the national banks were limited in their rate of interest to 8 per cent, and under this tax placed upon the big banks the currency could not have gotten out to the smaller banks, much less to the public generally.

The Senator from Massachusetts desires to know the name of any bank that would only have utilized the act in consequence of the amendments passed in 1913 and 1914. I will state to him that an organization was made in my section under the Aldrich-Vreeland Act prior to the fall of 1913, but that no currency was ever issued, and my attention was called by members of the organization to the heavy interest charges and to the difficulties of issue surrounding the Aldrich-Vreeland Act and to the necessity for changes in the act to make it available.

Mr. WEEKS. Will the Senator yield to me?

Mr. SMITH of Georgia. Yes.

Mr. WEEKS. I will make the same general statement to the Senator from Georgia that I did to the Senator from Nebraska, that he can not find a responsible banker in the United States who will say, over his own signature, that the change made in the law to which the Senator is referring had anything to do with the issuing of circulation when the stress came. In other words, it would have been issued as readily under the old provision of the law as under the new.

Mr. SMITH of Georgia. And I reply I have no doubt hundreds of them can be found who will make it. No such written statements have been before suggested, so I can not furnish them at this instant.

Mr. WEEKS. Of course not.

Mr. SMITH of Georgia. But I am sure they can be obtained.

Mr. WEEKS. I hope the Senator will take occasion to find it.

Mr. SMITH of Georgia. I may do it to gratify the curiosity of the Senator from Massachusetts, but any sane man studying the subject can see it is unnecessary to gratify his curiosity to know the truth. Let us see what change has been made in the tax levied by the Aldrich-Vreeland Act. I invite the Senator to furnish statements from banks that issued notes under the amended act that they would have issued their notes and paid the 10 per cent tax.

Now, let us see how the Aldrich-Vreeland Act was changed in December, 1913. I am quite familiar with it, as I offered the amendment in the Democratic caucus; it was approved by

the caucus, reported to the Senate by the Banking and Currency Committee, and unanimously adopted by the Senate. There was not a Republican vote against the modification. Let me state the modification.

The amount of the taxes was reduced so as to make it a tax at which a bank could afford to issue notes for circulation. It was reduced so for the first three months the tax was at the rate of 3 per cent per annum upon the average amount of notes put in circulation under the act, increasing at the rate of one-half per cent per annum for each month until the tax of 6 per cent per annum was reached, and thereafter under no circumstances made over 6 per cent.

Under the Aldrich-Vreeland Act the tax was 7 per cent during the third month. Under the amendment it was only 3 per cent. Under the Aldrich-Vreeland Act the tax was 9 per cent the fifth month. Under the amendment it was 4 per cent the fifth month. So it will be seen that the amendment placed the rate of the tax at a figure which made it possible for a bank to issue the notes and put them in circulation, while under the Aldrich-Vreeland Act the rate was so high that it was impossible for a bank to issue the notes and put them in circulation.

The restrictions also of the Aldrich-Vreeland Act as to the amount of the issue and the character of the security excluded the large majority of the banks from utilizing the act.

Mr. WEEKS. Is the Senator willing to be interrupted?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Massachusetts?

Mr. SMITH of Georgia. Yes.

Mr. WEEKS. I call the Senator's attention to the fact that sometimes during troublous times in this country national banks have had issued to them clearing-house certificates that bore from 6 to 7.3 per cent. They were willing to pay that rate of interest for the accommodation that was given them. The Aldrich-Vreeland rates were made somewhat lower than the average of clearing-house certificates for that reason and because there never has been an instance in the history of our emergencies when those clearing-house certificates have not been retired substantially within four months.

Mr. SMITH of Georgia. They never paid that tax to the Government. It was a contribution among themselves as a general security.

Mr. WEEKS. What difference does it make who paid it, as long as they paid it?

Mr. SMITH of Georgia. It was paid back to them on the final close of the transaction.

Mr. WEEKS. Not at all.

Mr. SMITH of Georgia. They never paid back anything.

Mr. WEEKS. The Senator from Georgia is entirely mistaken.

Mr. SMITH of Georgia. The Senator from Georgia is entirely informed about it as to some clearing-house associations.

Mr. WEEKS. The Senator may be as to one, but he is entirely misinformed as to every other one. I say they did pay those rates of interest and they never received the money back.

Mr. SMITH of Georgia. Who finally got the money?

Mr. WEEKS. The bank that loaned the money kept it.

Mr. SMITH of Georgia. Then the banks of the clearing house to which the Senator refers charged these high rates of interest to those borrowing the clearing-house certificates which they issued. The banks did not pay it to anybody. There was no tax on their clearing-house certificates. The public generally bore the immediate burden of these high charges, and the banks deemed it necessary to make the charge to justify the issue as their profit on the transaction. If the Government had placed a charge of from 5 to 10 per cent on the issue, how could the banks have afforded to issue the notes and use them?

Let me again call attention to the reduction of the tax made in the act of December, 1913. Instead of 5 per cent per annum for the first month, 6 per cent per annum for the second month, and 7 per cent per annum for the third month, the uniform rate for the three months under the amendment was 3 per cent per annum. This was a rate which the banks could afford to pay and put their notes in circulation, while the rate of the Aldrich-Vreeland Act was prohibitory.

Mr. President, not only was the change in the rate one which made the opportunity for the issue of notes for currency by the national banks practical, and relieved the notes from a charge that one might believe was intended to prevent their issue, but the character of the security required for the issue of the notes and the amounts of issue each bank was permitted to make were so changed as to facilitate the issue of the notes and make the measure practical.

In connection with the reduction of the rate of interest the life of the Aldrich-Vreeland Act was extended 12 months. Immediately after the beginning of the war, on August 4, 1914, an additional bill was passed broadly liberalizing the security required from each bank and the volume of the issue by each bank. Before this last amendment the banks of the city of New York were practically in a state of panic. For several days before August 4 they were declining to renew notes, and practically suspending credits to their customers all over the United States. The banks of New York and the big cities did this not to create trouble but because they dreaded a situation that threatened them and believed it necessary as a matter of precaution.

The national banking laws contained no sufficient opportunity for enlarging the currency, even after the reduction of the tax by the act of December, 1913. The securities required from the banks to make the increased note issue for circulation, and the limitation of the quantity of these notes that could be issued, left the banks with no proper facility for enlarging the currency to meet the great emergency which confronted the country.

On August 4, 1914, the amendment to the Aldrich-Vreeland Act was passed permitting largely increased volume of bank notes and broadening the securities which the bank must furnish, and giving the Secretary of the Treasury quite a discretion in passing upon those securities. The assurances of the Secretary of the Treasury to the bankers of New York that he would facilitate their effort to meet the crisis which confronted the country if they would liberally issue their bank notes under the law, vitalized by the amendments to which I have referred, changed the situation in New York City and in other financial centers from one of panic into one of buoyancy. Nearly $500,000,000 of bank notes were promptly put in circulation. Instead of curtailing credits the big banks broadened credits, and the liquidation which threatened the country with panic and ruin was averted by the wise legislation passed in a Democratic administration and through Democratic leadership.

But it was not the old Aldrich-Vreeland Act which saved the country. It was the life put into the corpse by the legislation passed in December, 1913, and since that time which met the emergency and averted disaster.

Now, I am never prone to make a partisan speech. I do not like to do it. I like to see Senators on both sides of the aisle side by side, without reference to party, all the time striving without any effort for party advantage just to serve the whole people. I would about as willingly join with a Senator on that side to help do something that I thought would serve all the people as to help a Senator on this side of the Senate. Occasionally we are obliged to draw the line and stand by our party associates. It is a fact, however, that the country was saved from perhaps the most serious financial disturbance that ever threatened by the wise legislation of December, 1913, and of August, 1914.

Mr. NELSON. Will the Senator allow me to make a suggestion?

Mr. SMITH of Georgia. Yes.

Mr. NELSON. While it may be true that that law had some sentimental effect, yet I think there were other causes and actions that operated to stay the panic which threatened at that time. Among other things I refer the Senator, and he will recall it, to the fact that during the early part of the war there was a large dumping of foreign securities sent to New York to be sold on the stock exchange, that it was depleting the gold supply in the country, and a great threat arose from that conduct. What did the banks do? What did the New York Stock Exchange do. The stock exchange was closed for a long period—I do not recall the time—and even the cotton exchange was closed. I think those things combined had as much to do as anything else with allaying the panic.

Mr. SMITH of Georgia. Mr. President, undoubtedly one of the elements that threatened us with the panic in the last of July and in August, 1914, was the dumping of our securities held abroad upon the American market. I understand that several hundred million reached New York in the early part of August, and it became necessary to care for them. It was the fact that the bankers felt that threat hanging over them which contributed to bring almost a condition of panic about August 1, 1914.

There were many elements of danger. Unquestionably it was wise to stop operations on the New York Stock Exchange, but even with the stoppage of the exchange the use of the note issue for currency by the National Government was essential to stay the threatened panic. Most of the Senators on the other side joined us in passing the bill of August 4, liberalizing the issue of bank notes.

We had already passed a bill cutting down the rate of tax. We together passed a bill to liberalize the issue in amounts and character of securities.

Mr. WEEKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Massachusetts?

Mr. SMITH of Georgia. Yes.

Mr. WEEKS. Does the Senator from Georgia think that any Senator at that time could have afforded to have voted against a financial measure which tended to give relief, whether he belonged to the dominant party or not?

Mr. SMITH of Georgia. Mr. President, I answer no; and I go further and say that no Senator belonging to either party at any time ought to be willing to vote against a measure that will probably be beneficial to the country no matter from which party it comes. I do not believe in the doctrine of playing politics in legislation. I think the majority of the questions that confront us are really national, and that party politics should have little to do with them. Nothing pleases me more than to see the lines broken in behalf of measures that I think are really beneficial to the people of the country——

Mr. WEEKS. I think, Mr. President, the Senator would recognize the fact that many times during this administration the minority in this Chamber have been placed in a position where they must either refuse to support the Government in time of need or they must act in a partisan way. They have thrown away partisanship in all those instances, and I think we should have credit for it.

Mr. SMITH of Georgia. I have said all I desire to say, Mr. President. I simply insist that it is true that with one of the most dangerous panics threatening this country that ever confronted it the danger has been met, the machinery to relieve the stress has been provided, and it came largely from legislation passed in December, 1913, and in August, 1914, and any charge that Democrats can not meet a great crisis is without foundation.

We can congratulate the people of the country that no such financial crisis as that of the summer of 1914, after the European war began, can come upon us hereafter, for the banking and currency bill passed in December, 1913, is now in full and successful operation. By its safe and wise provisions opportunity is given for an enlargement of the currency in case of emergency, while at the same time the restrictions thrown round such enlargement prevent inflation and secure safety.

I believe it to be the greatest financial legislation ever passed in the history of this Nation, and while it stands to the credit of the present Democratic administration, in the White House and in Congress, its value to the people of the country rises above party, and I value it more on that account than I do for party reasons.

Mr. SHAFROTH. Mr. President, I desire to give notice that on Wednesday, at the close of the morning business, I will address the Senate on prosperity and the Federal reserve act.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. THOMAS. Mr. President, the amendment to the naval bill which I understand to be before the Senate is that relating to the so-called naval program, and to that amendment I wish to address myself for a few moments.

Mr. President, I am conscious of the fact that to oppose the program provided by the Senate amendment will not only be unavailing, but that it is also unpopular, if, indeed, it is not unpatriotic; yet at this time, and in view of the developments of the past 24 months and the effect of those developments upon the public mind, it is my belief that any vote cast against the bill as reported from the committee should be based upon some substantial reason—substantial, at least, to the man who casts it, if not convincing to those who are burdened with the necessity of listening to its expression.

I say it will be unavailing, Mr. President, because this so-called program has been worked up through a great many years. It has been inspired and enlarged and developed by a systematic appeal to public sentiment through the press, from the platform, through the medium of conventions, and by all the other modern processes, which have been multiplied for reaching the imagination and inspiring the fears and apprehensions, rather than the reasoning faculties, of the public.

The committee, Mr. President, has responded to this organized campaign, which found its ultimately successful stimulus in the developments and events of the great war now raging in Europe. That war, Mr. President, has given to those who believe in what some are pleased to call an "adequate Navy" and others an "incomparable Navy" the menace of an unseen but positive danger, and that has been preached so persistently that it perhaps may be fairly said half of the people believe it. The imagination has outlined it, and the picture has found material expression, not only through constant iteration and reiteration, but through illustrations and moving pictures, which have been utilized to make it more material and vivid, and it has been emphasized by the German crisis with which we were confronted within the last 60 days.

Consequently, Mr. President, when this bill came from the other House it embodied a naval program requiring the expenditure of a greater sum of money than was ever before appropriated for the purpose by any nation in history in times of peace. The House of Representatives, after a long series of hearings, after a full consideration of the needs of the Navy from every possible standpoint, and very soon after the great naval battle between the German and the British fleets off Jutland, determined to recommend a program unusually large, requiring an enormous amount of money for its purposes, and yet it provoked expressions of disappointment in many directions because of its alleged inadequacy.

Mr. President, that program provided for the construction of 72 ships, including capital ships, consisting of 5 battle cruisers, and carried with it an immediately available appropriation of somewhere in the neighborhood of $270,000,000. I do not know whether the program enacted in the other House and sent to the Senate would have been possible except for the effect upon public sentiment of the result of the battle off Jutland; but whatever may be the fact in that regard, it is a fact that the House presented the Senate with a naval program having no parallel in peace times in any country on earth. Great Britain has the greatest navy in the world; necessarily its annual appropriations have been greater than those of any other country; but not until the beginning of this war did Great Britain at any time in its history make an appropriation of $270,000,000 for naval purposes. The House of Representatives broke the record, Mr. President, both in the amount of the appropriation and in the number of ships to be constructed; and yet that enormous appropriation, that tremendous program, carrying with it the necessary expenditure of hundreds of millions of dollars of the people's money, has been denounced in many places and has been subject to criticism here because, forsooth, it has failed to meet a so-called great national emergency. And the Senate committee has rejected it because too small. It recommends a program for 157 ships, 66 of which are to be constructed at once.

Mr. President, I should, all things considered, remain silent if I did not vote for the program which has been so carefully thought out, so cautiously constructed, and so thoroughly considered by the House committee, which has given six or seven long months to hearings and to a determination of what its duty in the premises should be, but when to that have been added the stupendous increases of the Senate Committee on Naval Affairs, after the most careful consideration of the matter and of all the reasons which have thus far been advanced in support of it, I find myself unable to vote for its final passage.

Mr. President, we have heard much—and I have had occasion to refer to it heretofore—in season and out of season during the past 18 or 20 months, and from many sources, upon the subject of preparedness—a word as indefinite and as illusory as any in the English lexicon; a word which has a definite meaning and a different one in the mind of every individual discussing it; a word which extended to the Army and the Navy of the United States may embrace the addition of 1 per cent or of 1,000 per cent, and each included in its all-embracing proportions. So indefinite, indeed, it is, Mr. President, that many have sought to either modify or enlarge it according to the different point of view by the word "adequate," thus, Mr. President, adding to its vagueness and uncertainty.

What preparation is, what it is to be, is the subject of as many opinions as there are men and women in the United States; and those opinions run the gamut from practically nothing at all to a policy which, if adopted, would make this not only the greatest military and naval nation in the world, but for a long and historic policy inseparable from free institutions would substitute militarism pure and simple.

We have in America, Mr. President, many unconscious militarists, unconscious through their fears, through their interests, through their opinions, through their information; and, I am sorry to say, largely through their lack of it. In this connection I will read an editorial from the Saturday Evening Post in its issue of July 8 last, prompted by the passage of this bill in the other House. The article, though very short, covers the subject completely.

UNCONSCIOUS MILITARISTS.

The Navy bill, as it passed the House, appropriated $270,000,000, which is considerably more, to the best of our knowledge, than any other nation ever appropriated for a navy in time of peace—20 per cent more, for instance, than Great Britain appropriated in the fiscal year 1913–14.

Yet this provision for sea defense, we read, is miserably inadequate. Whether the appropriation was judiciously directed is immaterial for present purposes, because if it had provided more battleships and fewer cruisers it would still have painfully disappointed those who have become infected from Europe with exactly the same truculent, suspicious, invidious patriotism that caused the great war. They want a far bigger navy and conscription. Most of them, no doubt, are honest in saying they do not want militarism—being too excited to perceive the obvious fact that a huge navy and conscription are militarism.

You can readily see how it works. The extreme propaganda for preparedness consists in shouting to Uncle Sam that he is being insulted and browbeaten and is going to get licked; Germany is about to bombard New York; Japan is ready to land in California; he will be slapped in the face, have his goods stolen, and his throat cut. It consists, in fine, in inculcating a raw-sore spirit of truculent suspicion of his neighbors. Get that thoroughly inculcated and war follows as a matter of course.

Take your peaceably inclined man; tell him day by day that his neighbors are circulating insults and threats; that they are going to thrash him and sack his house. When you have nettled him to the point where he goes out looking for insults he will be quite sure to find one.

Mr. President, I heartily agree with the sentiment expressed in this short editorial. We are, and every advocate of this enormous naval program must be, a conscious or an unconscious militarist, because, although not so intended, it involves a complete transformation of the attitude of this country with regard to its Navy. The program outlined, while nominally confined to the period of three years, is a program upon which we will have entered indefinitely, which will be terminated either in another great war, in which we shall be a participant, or after the Nation is face to face with general bankruptcy.

Mr. President, it is contended that we need a Navy second to that of any other nation in the world for defensive purposes. Why we need one that is second only, if the argument in favor of this increase is sound, I am unable to see. If we need a Navy for our adequate protection so large as to be second to that of any other nation in the world, we are still defenseless as against that nation whose navy is larger than ours. If we are in danger of foreign invasion, what man can so correctly read the future as to exempt this Nation from a possible conflict with the mistress of the seas?

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. THOMAS. I yield for a question.

Mr. NORRIS. In furtherance of the Senator's suggestion that if there is still one navy larger than ours we are in the same danger we are in now, I want to ask the Senator, even though we have a larger Navy than any other nation, are we not still in a possible danger from a combination of nations? So that the only full relief, on the theory of protecting ourselves against every possible attack, would be that we must have a larger Navy than all the other nations of the world combined.

Mr. THOMAS. Mr. President, I thank the Senator for his suggestion, because every reason which is advanced and every apprehension that has been expressed as a justification for this naval program inevitably and necessarily leads to the inference suggested by the question of the Senator from Nebraska. I concede that if it can be demonstrated that we have no fear of Great Britain, that the currents of our trade and our international politics will never cross her's, we may be perfectly safe in providing a Navy sufficient to meet that of any other country; but, Mr. President, what is there to prevent a combination of the smaller-navy nations against this great Republic? Inasmuch as this is not only possible, but probable in these days of great international alliances, I am still unable to grasp that system of reasoning which would confine us in our operations to a second place among the navies of the world; and, Mr. President, it can only be reconciled, I think, to but one situation, which is that the nation against which such enormous preparation must be made is Germany, which is said to have the second navy in the world, although two of our very expert and competent admirals as late as December, 1914, testified that ours was the second navy in the world.

It may be, Mr. President, that Germany is the natural antagonist of the United States; I neither affirm nor deny it; but the fact lurking in the mind of nearly every one who insists that our preparedness program is satisfied only with a Navy second in the navies of the world, that the nation which is now said to be second is the antagonist we apprehend. Mr. President, Germany is a great military nation. It is an aggressive nation. It has the greatest army in the world, and before the outbreak of the war its battleships were multiplying more rapidly than were those of any other nation except England. It has sometimes cast its eyes longingly upon the Western Hemisphere, and on one or two occasions there have been differences between that country and ours which, were the destinies of this country in the hands of some one of these war-like citizens now beating the air for militarism, might easily have precipitated a conflict; but, assuming that that is so, Mr. President, does any one imagine that Germany will keep quiet and permit us to occupy the second position for which we strive without making an effort to still maintain it? Does not that mean a race in naval construction between the United States and Germany the success of which will depend not upon the dangers apprehended, but upon the length of the respective purses of the two nations; and does not that mean, Mr. President, that when one shows signs of exhaustion, the condition which naval construction has reached will inevitably produce the thing we apprehend and bring about that conflict which it is now declared can only be postponed by this system of adequate defense? No man who knows anything of the German people, no man, Mr. President, who has kept in touch with the events of the European war, can for a moment question the fact that if she can Germany will maintain her place as the possessor of the second greatest fleet and maintain it if she can do so in spite of our efforts to wrest the coveted prize from her possession.

It can not be Japan, Mr. President, that we fear. We hear now, and have heard for a good many years, a great deal about threatened trouble with Japan. I think war with Japan—trouble with Japan—has been a great, if not the greatest, asset of the advocates of preparedness during the last 15 or 20 years. Trouble with Japan is a matter of chronic apprehension. I read this morning that the Japanese were colonizing in Mexico, coming over in large numbers, notwithstanding the unsettled condition of that country, and doubtless for the purpose of inspiring some feeling of distrust among our people. Of course this is fiction. But, Mr. President, what is the Japanese naval strength? A very intelligent Japanese, Mr. K. K. Kawakani, in the North American Review of May, under the heading, "Shall America prepare against Japan?" draws a very interesting parallel between our own and the Japanese Navy. I read from page 677 of that magazine. He says:

Let us, then, study the existing naval strength of Japan as well as the program which she has adopted for the construction of additional warships. At present Japan's fighting fleet consists of 6 dreadnaughts (total tonnage, 191,500), including 2 now under construction; 4 battle cruisers (total tonnage, 82,500); 13 battleships of the old style (total tonnage, 193,666); 4 armored cruisers (total tonnage, 56,700); 50 destroyers (total tonnage, 36,118); and 17 submarines. All in all, Japan's fighting craft aggregate 560,484 tons.

As against this strength, the American Navy, as it stands to-day, consists of 19 dreadnaughts (total tonnage, 506,636), 23 battleships (total tonnage, 314,906), 10 armored cruisers (total tonnage, 140,080), 62 destroyers (total tonnage, 73,097), 51 submarines, and 22 colliers (total tonnage, 236,401). This makes a grand total of 1,271,120 tons; i. e., 710,636 tons more than the Japanese fleet.

In other words, we are more than 100 per cent stronger upon the sea to-day than are the Japanese.

Now, I ask consent to insert in the RECORD, without reading, the remainder of the page from which I have read and the next four pages of this article, which graphically portrays the relative and future naval strength of the two countries.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Even a cursory survey of the above figures convinces us that the Mikado's fighting fleet is far inferior to the American. But when we scrutinize more carefully the character and equipment of the ships on both sides the discrepancy becomes all the more obvious. In the first place, the American dreadnaughts are much larger than the Japanese. Of the American fleet the seven largest dreadnaughts have each a displacement of 32,500 tons, while the four largest Japanese dreadnaughts are of a displacement of 30,600 tons each. Again, as against six American dreadnaughts of 27,500 tons each, Japan has only four battle cruisers of the same size. The remaining two Japanese battleships displace 20,800 tons each, whereas the United States has two dreadnaughts of 27,243 tons each, two of 21,825 tons each, two of 20,000 tons each, and two of 16,000 tons each. In modern naval warfare the dreadnaught is the cornerstone of a fighting fleet. In spite of the increasing efficiency of the submarine, this theory has not been altered. Not only in point of numbers but also in the size of each vessel the American fleet of dreadnaughts is far superior to the Japanese.

I am fully aware that the tonnage of a warship is not the only or even the most important criterion of efficiency. Much of the fighting power of a man-of-war depends upon the kind of guns with which she is armed. How does the American Navy stand in this respect?

Of the nineteen dreadnaughts of the American Navy, five are equipped with twelve 14-inch guns, four with ten 14-inch guns, two with twelve 12-inch guns, four with ten 12-inch guns, and two with eight 12-inch guns. The remaining two dreadnaughts which are now under construction and which are not yet named will probably be of the type of the *California* and will be equipped with twelve 14-inch guns. On the Japanese side there is not a single dreadnaught equipped with so many as twelve 14-inch guns. To go into details, four of the six Japanese dreadnaughts have only ten 14-inch guns, while two are equipped with twelve 12-inch guns. The Japanese battle cruisers, four in all, have each only eight 14-inch guns.

It is obvious that the fighting power of a navy can not be estimated by the number of the ships of which it is composed. Much depends upon the number and the kind of guns with which each vessel is equipped. In point of numbers the American dreadnaughts are almost twice as powerful as the Japanese dreadnaughts and battle cruisers combined, but when the power of the guns on both sides is taken into consideration the American dreadnaughts are nearly three times as powerful as the Japanese.

Let us turn our attention to the battleships of the predreadnaught period. I have said that Japan has 13 of such ships, aggregating 193,666 tons, as against America's 23, with a total displacement of 314,906 tons. In the face of these figures the superiority of the American fleet of battleships can not be disputed. Yet when it is known that only 2 of 13 Japanese battleships are fit to stand on the first line of battle, as against 6 of the American fleet, the inferiority of the Japanese Navy becomes the more apparent.

On the American side there are 62 destroyers and on the Japanese side 50. Here the discrepancy is not, prima facie, very great. But we must remember, what is more vital, that the majority of American destroyers are seagoing, having a displacement greater than 800 tons each, while the Mikado's Navy has only 6 destroyers above 800 tons. Thus 62 American destroyers have a total displacement of 73,097 tons, which is more than twice the total tonnage of 50 destroyers of Japan.

As most of the Japanese destroyers are for the purpose of coast defense, so are the Japanese submarines, of which there are only 17, as against America's 51. While the Japanese submarines are mostly not seagoing, the majority of the American submarines are of a large type, and therefore seagoing.

Last, but not least, we must remember that the American Navy has 22 colliers, aggregating 236,401 tons, while Japan has none. In a naval expedition to distant waters the collier is as important as the fighting craft, for without fuel no warship can move. The Japanese Navy, being intended to protect Japanese and Chinese waters and not to send expeditions to distant lands, has made no such elaborate provision for supplying its warships with fuel as has been made by the British, German, and American Navies. In case of emergency the Japanese Navy requisitions merchant ships, which are, of course, decidedly unsatisfactory as colliers.

So much for the existing naval strength of Japan as compared with that of the United States. We have seen how insignificant the Japanese fleet is beside the American. And yet this is the fleet which has constantly been held up by scaremongers and demagogues as the force which the Mikado will some day send across the Pacific to attack the fair coast of California.

But the Japanese, we are told, are feverishly engaged in building new warships. Are they not secretly smarting under the slight which America has meted out to them and scheming to settle old scores at the point of the bayonet?

Japan has never been "feverishly" engaged in building warships. Has it ever occurred to the average American that as early as 1907 the American Navy was twice as powerful as the Japanese? In the two years that followed America launched six dreadnaughts, while Japan launched only three. The result was that by 1910 the United States had a fleet of warships three times as powerful as the Mikado's, and this ratio has been maintained ever since.

It is significant that while alarmists are raising hysterical cries about the alleged rapid expansion of the Japanese navy, Japan's naval critics are deeply deploring the utterly "unprepared" condition of their country. As an instance of their lamentation I quote the following passage from a series of 10 articles written by the naval expert of the Jiji-Shimpo, assuredly the most reliable newspaper in Japan:

"It is regrettable that while other powers have each been pursuing a definite naval policy our navy should be permitted to drift, with no preconceived plan. The United States adopted, as early as October 19, 1903, the principle which is in reality the foundation of the stupendous naval program formulated by Secretary Daniels. According to the program of 1903 the United States was to build 34 dreadnaughts in 17 years.

"Turning to Europe, we see that Germany adopted a naval-repletion program in 1907, Russia in 1911, France in 1912, Italy in 1910, and Austria in 1912. In the meantime we were lagging hopelessly behind these powers. When at last we awakened to our own sluggishness and decided upon a program last year it was only on a ridiculously small scale."

In these two paragraphs is expressed the universal feeling of uneasiness which the Japanese entertain over what they consider the aggressive naval policies of Europe and America. Let us study Japan's new naval program, which the Jiji-Shimpo's naval expert tells us is "on a ridiculously small scale," and compare it with the great program proposed by Secretary Daniels.

The Japanese program, adopted last September by the national defense council, calls for the construction in the five years from 1917 to 1921 of 4 dreadnaughts, 6 cruisers, 10 destroyers, and 9 submarines. For the execution of this program Japan is to expend $85,000,000 in five yearly installments.

Beside this modest program the American program looks prodigious. It calls for the building of 10 battleships, 6 battle cruisers, 10 scout cruisers, 50 destroyers, 15 seagoing submarines, 85 coast submarines, 4 gunboats, 1 hospital ship, 2 ammunition ships, 2 fuel-oil ships, and 1 repair ship. This requires an expenditure of $422,964,087 in the five years from 1917 to 1921. This enormous expenditure is for new ships alone. In addition to it $48,518,127 is to be expended for the completion of the dreadnaughts for which work has already been begun. Nor is that all, for the plan provides for an appropriation of $6,000,000 for naval aviation and $25,000,000 for reserve ammunitions. All told, the five-year program entails an expenditure of $502,482,214.

Assuming that this stupendous plan were adopted, let us picture the relative strength of the Japanese and American Navies at the end of 1921, when their respective programs will have been carried out. Leaving out of consideration minor ships, such as gunboats, hospital ships, ammunition and repair ships, with which Japan is ill supplied, the relative position of the two navies by 1921 will be as follows:

	America.	Japan.
Dreadnaughts	27	8
Battle cruisers	6	4
Battleships	25	15
Cruisers	20	10
Destroyers	112	60
Submarines	151	27
Colliers	24	.....

Mr. THOMAS. The article recites the naval programs, so called, the building programs of the two nations, their relative gun strength, the amount of appropriations up to date, the resources of the two countries, and then draws as to 1921 the foregoing conclusions, if both these programs are continued to that time:

Yet, Mr. President, there are those of us who tremble with apprehension when awake and whose sleep is disturbed by hideous nightmares of Japan, and particularly of the Japanese fleet and that magnificent army of hers, which is to be transported, without reference to the difficulties attendant upon such a huge task, to California some time after midnight and before daybreak in the very near future. No; it can not be Japan, Mr. President, which demands from us this enormous expenditure and this huge program of construction. If it is necessary, let us by all means pursue it; but if it is unnecessary, I think that we should pause before involving this country in such an enormous expenditure. What is that expenditure? To begin with, Mr. President, this bill authorizes appropriations for the building program alone of over $110,000,000. The total expenditures under the bill involve the enormous sum of $319,000,000. In its report the committee says:

> The total cost of the whole program of 156 vessels, which excludes the submarine to have the Neff system of propulsion, is estimated at $588,180,576, leaving to be appropriated $477,454,416. Other authorizations in this bill for objects other than new ships will require future appropriations of $10,737,611, making the total of appropriations to be made in future years for authorizations in this bill $488,192,027.

In other words, Mr. President, in addition to the appropriations here made are authorizations contained in this bill which require an additional positive expenditure of about $500,000,000.

Now, Mr. President, when this bill is enacted we will immediately perceive that our theoretical adversaries are alarmed at our attitude and have increased their naval programs, so that next year ours must again be increased to meet theirs, and in the course of four or five years we will be expending not $300,000,000 but $600,000,000 or $700,000,000 every year in order to keep our place in this race for preparedness and for adequate defense, as it is called.

The Army bill, soon to be taken up, and now upon the calendar, makes current appropriations of $329,000,000; and our military bill has made authorizations, which mean that there also are to be expenditures, which, added to these, necessarily make the total estimate very much in excess of a thousand millions of dollars.

In these days, and especially in the Congress, where millions are appropriated with as much nonchalance as a millionaire exhibits when he spends 25 cents for a Havana cigar, the imagination has become somewhat dulled as to the extent and significance of a billion dollars. For the purpose of giving a practical illustration of what is meant, let me say that if a man, endowed with immortality at the beginning of the Christian era, had been given $500,000, and had received thereafter $500,000 every succeeding year, he would in this year of our Lord 1916 have but $958,000,000. He would have to live 84 years, until the year A. D. 2000—a period of more than two generations from this time—before his total accumulations would amount to one thousand millions. But we here, under the spur of a hysteria artificially created and crystallizing into an act of legislation, are about to authorize and afterwards appropriate this enormous amount of money, because, forsooth, preparedness makes it necessary, and adequate defense makes it absolutely and immediately essential. And this enormous sum is but the beginning of our expenditures.

I can not, Mr. President, lend my support to such a policy. I might say in passing, although I did not intend to allude to it, that if this scheme of naval preparedness is so essential and should be carried to the point of making us the equal of Great Britain, the same line of logic makes it necessary that we should have an Army equal to the army of the strongest of all the military powers of the earth—a situation that is just as sure to transform our institutions as that time is to pass.

The other day we appropriated in a very few minutes $45,000,000 for coast fortifications, notwithstanding the fact that Gen. Weaver, before the House and Senate Military Affairs Committees, declared with emphasis and without qualification that this country had the finest system of coast fortifications in the world, and all that was necessary to make them effective was an increase of the number and personnel of the Coast Guard. Forty-five millions is a very small sum compared to this program, and yet it is a sum which in itself is of stupendous proportions.

Mr. President, we are considering a revenue bill in connection with this program; and inasmuch as I am a member of the committee which has that bill in charge, and have received hundreds of telegraphic and written and personal protests against its various provisions, I have regretted extremely that that bill was not reported before these preparedness bills, because, Mr. President, there is scarcely an item in our revenue bill, forming the basis of our proposed increase of revenue to meet these stupendous expenditures, that is not resisted by those upon whom it falls, and in nine cases out of ten it falls upon some extreme advocate of preparedness. Now, preparedness comes high.

Mr. SMITH of Georgia. Does not the Senator think it is wise for those who are so anxious for these expenditures to bear the burden?

Mr. THOMAS. I think those who are so anxious for this expenditure, and whose property interests are the basis of their apprehension, or whose business craves Government contracts, should bear as great a proportion of this added expenditure as is consistent with our ideas and notions of equity and justice; and yet we know they will not do it whenever and wherever it is possible for them to shift the burden and pass it on.

If I were a high protectionist, I think I might be for this bill. The people have been paying indirect taxes so long that they have become accustomed to it; and of course the increased expenditure naturally suggests two things: One, a return to the good old days of protection, when a man was robbed unconsciously, and therefore cared nothing about it; and the other a bond issue, which is being advocated as a very fair means of meeting a part of this burden. "Pass it on," in other words, "to posterity. Let our children, and our children's children, and their children, be responsible for and bear the burden of our present extravagance." No, Mr. President, let us put it in the shape of direct taxation upon all of the property of the United States as far as possible, because the man who pays taxes directly is very apt to be concerned about the manner in which the money is expended, and the man who has to pay taxes directly is very apt to be heard from when the bill for that purpose is pending; and we are hearing from them everywhere. I do not blame them. I do not like to pay taxes any more than anybody else, and the wit of man has never yet devised a popular tax. But I think that when the people of the United States are face to face with what they have to encounter in the shape of increased taxation, they may revise their attitude concerning the necessity of an enormously expensive system of preparation, and particularly when they discover that this is only the beginning not only of our increase in armament but of our increase of taxes. The two are progressive.

We have boasted in this country that we were the most moderately taxed people in the world, and boasted truly. Mr. President, all that is changing. The Congresses of the United States for the last 20 years, whether Democratic or Republican, have wasted the people's money, and are continuing to do so, upon many so-called projects and schemes which are not only inequitable but which we have no power to provide money for; and we are going to continue to do it as long as the people demand it. Now, added to our extravagance comes this additional burden, and in a sense I am thankful for it, because I believe it will bring the people face to face with a realizing sense of two things: First, the necessity of returning to the old economic practices of other days. Second, the folly of wasting these hundreds of millions upon schemes of preparation which, by the time they shall have been effectuated, will become obsolete through the process of chemical and engineering science.

Mr. BRANDEGEE. Mr. President, will the Senator yield?

Mr. THOMAS. I yield.

Mr. BRANDEGEE. On the same theory, would the Senator be in favor of reducing the exemption contained in the income-tax provision?

Mr. THOMAS. I have always been in favor of it, Mr. President. I think it should go down to a thousand dollars, at least.

Mr. BRANDEGEE. So as to make everybody feel some responsibility as to expenditures?

Mr. THOMAS. Certainly; certainly. I think that ought to be done. I do not believe it will be done. I do not believe this body has the political courage to do it. It ought to be done, however. It ought to be done as a matter of justice, because every man who pays a little something directly to the Government contributes his proportion, as he ought to, since he receives protection from it.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. THOMAS. I do.

Mr. HITCHCOCK. I am sure the Senator concedes the fact that those people with small incomes already contribute to the expenses of the Government a share disproportionately large to those of large incomes, because they are consuming the necessaries of life, which are already increased in cost by our tariff and internal-revenue taxes.

Mr. THOMAS. That is true, Mr. President.

Mr. HITCHCOCK. And that there are, therefore, two reasons why the exemption should exist: First, because those of small incomes are contributing a disproportionately large share when they pay their tariff and internal-revenue taxes; second, because those of small incomes do not derive from the Government of the United States a benefit equal to those of very large incomes who are enjoying a prosperous business under the national administration.

Mr. THOMAS. Oh, Mr. President, I think the tax ought to be graduated. There is a great deal of force in what the Senator says, and yet we ought to have an income tax that makes an exemption much lower than the one which we have now, accompanied, of course, by a lower normal tax. That it is equitable and right to do so and that it is inequitable to make exemptions to the extent to which they are now made seems to me to be difficult of denial.

Mr. President, I have just referred to the probable obsolete character of much of this program by the time it is completed. I am no naval expert. I do not pretend to be.

What I do not know about naval affairs would fill a great many more volumes than what I do know about it. But I have tried, Mr. President, to observe and act upon the views of gentlemen who do know, and who are justified, therefore, in expressing an opinion upon the subject. I read the House hearings, or a great many of them, and I was impressed very strongly with the arguments which were there presented in favor of the battle cruiser in preference to the battleship, in view of the developments of naval warfare during the last 10 or 12 years, and also of the fact that of these vessels we have up to the present time none whatever.

I happen to enjoy the friendship of Admiral Peary, whose views upon this and kindred subjects are entitled, in my judgment, to the greatest consideration; and in this connection I ask leave to introduce in the RECORD, without reading them, two articles by Admiral Peary upon this subject, appearing in the New York Times. I do not subscribe to all of the views of the admiral, but I think what he has to say in support of the battle cruiser as the successor in naval development of the battleship is at least sufficiently cogent to address itself to the consideration of the Senate.

The PRESIDING OFFICER. In the absence of objection, permission is granted.

The matter referred to is as follows:

[From the New York Times.]

BATTLE CRUISERS THE BEST NAVAL TYPE FOR US—REAR ADMIRAL PEARY TELLS WHY THIS IS SO AND ADVOCATES IMMEDIATE BUILDING OF A SQUADRON OF THEM.

(By Rear Admiral Robert E. Peary, United States Navy.)

WASHINGTON, D. C., *April 30, 1916.*

To the EDITOR OF THE NEW YORK TIMES:

I appreciate the compliment of the editorial "Building a Navy" in the Times of Saturday. Referring to your figures of $360,000,000 as the cost of three weeks of the present European war to Great Britain alone, it has been stated at various times, apparently on good authority, that the daily cost of the war to Great Britain is $22,000,000 to $24,000,000, and I have not seen these figures contradicted or questioned. Senator STONE, chairman of the Senate Committee on Foreign Relations, who is conservative and perhaps better informed than anyone else in this country, said in an address in Philadelphia last night that the daily cost was over $25,000,000.

It was on such figures that my statement was based, and three weeks at that rate means, in round numbers, $500,000,000. Rear Admiral Taylor, Chief of the Bureau of Construction, recently gave before Congress the estimate of $20,435,531 for a 35-knot battle cruiser. According to these figures, the equivalent of each day of present war cost to Great Britain would give us a battle cruiser, with her attendant destroyers, submarines, and seaplanes.

If we can build a 35-knot battle cruiser—and Admiral Taylor said he had plans for such cruisers in his bureau—let us build them. If we can build them in three or perhaps two and a half years—and it has been so stated to Congress by responsible parties—let us build them at once; and if the facilities of the country permit building 16 of them simultaneously—and this has been so stated on the floor of Congress within the last two months—it will be a safe policy to build 16. We are more likely to need the fullest strength of our Navy in 2 or 3 years from now than in 5 or 10 years, and sixteen 35-knot battle cruisers will go far toward rendering us immune from attack.

Such an addition to our Navy would put it in absolutely unquestioned second place, and might, from the great preponderance of this superior type, make it nearly or quite equal to the navy of any other power.

If the sum of $500,000,000 will permit us to build 20 instead of 16 of these ships, with their attendant destroyers, etc., let us do it. They are the ships for this country.

Just as the Russo-Japanese War rang down the curtain on the battleship with primary, secondary, and tertiary batteries, and brought in the all-big-gun ships, so this war is ringing down the curtain on the battle-

ship of 22 and 24 knots and bringing in the swift battle cruiser of 30 knots and over. There is little or no doubt but that these new ships are now the first line of the British Navy. They certainly are the pride and dependence of that navy.

Whether it is in a great machine shop or in military power, the introduction of a new and superior tool or method which gives greater results in less time makes previous tools and methods obsolete. And superiority in the machine shop or in military power results automatically from numerical superiority in the new and controlling tool or method. The battle cruiser is such a new and superior tool.

The great lesson of the European war has been the value of speed—speed in concentrating troops, speed in transporting guns, speed in ammunition, speed in ships. The startling development of the submarine and torpedo has given much greater proportionate value to speed in capital ships as a means of safety against these deadly weapons.

Efficiency as a fighting machine and safety against submarine attack are on the side of the 35-knot battle cruiser as compared with a 22-knot battleship (the speed of the *Pennsylvania*). In nine out of ten cases a battle cruiser which can deliver her guns where they can get busy in two-thirds the time that a battleship can do it will exercise a much greater influence on the final result. The battle cruiser is the type for this country. And it is entirely possible that if we have a sufficient number of battle cruisers, submarines, and aeroplanes the slow and ponderous battleship will become negligible.

A year ago in the hearings before the House Naval Committee the majority testimony was in favor of the battleships. This year, of 10 officers of high rank who testified before the same committee, all advocated battle cruisers, and 7 of them advocated battle cruisers to the exclusion of battleships. The Navy Department and the General Board are advocating them. I venture to think that after another year of war the majority testimony before the same committee next winter will be in line with what I have jus suggested—that battle cruisers, submarines, and aeroplanes will give the ideal defense for the United States.

For every purpose except, perhaps, that of stolidly accepting attack, the battle crusier is superior to the battleship (always granting it greatly superior speed), and there are dozens of commanders and captains in our Navy who, in command of a 35-knot battle cruiser carrying 16-inch guns, would gladly try conclusions with any battleship afloat to-day, and win nine times out of ten. As to moral effect, unless I misunderstand officers and men of our Navy, the feel under their feet of one of these ships driving at 40 miles an hour to meet an enemy with guns capable of engaging that enemy at 15 miles, the thought that the Nation had given them the best there was afloat and expected from them all there was in them, would make a man and a half of everyone on board from captain in command to the youngest stoker.

As to the country, those who recall the trepidation along our coast from the time Cervera's fleet left Spain until it was located in the West Indies can understand what the feeling of security would be with a fleet of these superb fighters at Hampton Roads, able to reach any point between Halifax and Havana in 24 hours, or meet and engage an enemy 300 miles east of Bermuda in the same time.

Could I afford the amount personally, or should I find the money in the street and be unable to locate the owner, I would offer a prize to-morrow of $1,000 in gold eagles for the best paper on "The battle cruiser, the best naval type for the United States," open the competition to anyone in the country, and ask the Times to appoint judges to determine awards. I believe it is the most vital question affecting the United States Navy to-day.

[From the New York Times.]

BATTLE CRUISERS BEST NAVAL TYPE FOR US—REAR ADMIRAL PEARY SHOWS HOW IMMEDIATE CONSTRUCTION OF TWO FLEETS OF EIGHT EACH WOULD SAFEGUARD BOTH OUR COASTS.

(By Rear Admiral Robert E. Peary, chairman of the National Aerial Coast Patrol Commission.)

WASHINGTON, *May 21, 1916.*

To the EDITOR OF THE NEW YORK TIMES:

The decision of the House Naval Committee in favor of the battle cruiser type of capital ship exclusively and the reported vote of 13 to 8 in favor of this decision indicates that the overwhelming weight of testimony for battle cruisers in the various hearings before the committee made a strong impression.

It is assumed that these battle cruisers will have the speed of 35 knots indicated in recent testimony before the Naval Committee, with a displacement of 35,000 to 36,000 tons, and will be armed with 16-inch guns. A ship of this speed and armament can cover nearly 1,000 miles between noon and noon, and in a single broadside can throw 8 tons of explosive shells more than 20 miles.

Of this type of superior fighting machines Great Britain and Germany possess almost a monopoly. The United States has none. The present battle cruiser strength of the navies of various foreign powers, so far as is known, is as follows:

Great Britain, 10, with 6 building; Germany, 9; Japan, 4, with 4 more said to be authorized; Russia, 4 now being built. The greatest tonnage of any of these is 32,000 (Russia). The highest speed is 33 knots (Great Britain). The heaviest guns are 15-inch (Great Britain and Germany). These statements are taken from the report of the General Board, May 2, 1916.

Following are recommendations in regard to battle cruisers from various official sources:

The Secretary of the Navy recommends 7 or 10 in five years.

The General Board, in its report of May 2, 1916, to put our Navy in second place in three years, recommends 10.

Rear Admiral Benson, Chief of Naval Operations, recommends 10 in five years.

Rear Admiral Knight, president of the War College, recommends nine.

Rear Admiral Fiske recommends nine.

Rear Admiral Winslow recommends eight or nine.

Capt. Sims recommends eight or nine.

Capt. McKean recommends 12, "to make our present number of battleships of the utmost efficiency." (Hearings before House Naval Committee.)

I have suggested 16 in three years, in two fleets of 8 each in the Atlantic and in the Pacific. It will be very desirable if the number of battle cruisers proposed by the House Naval Committee can be increased to 8.

Press reports credit the administration with a desire to have the committee program increased, and Secretary Daniels is quoted as saying: "The need for these swift, huge, heavily gunned ships is so pressing when we consider the other great navies of the world, that I had far rather see the number suggested increased than diminished."

Eight battle cruisers will provide a symmetrical fleet of the most powerful fighting ships known to the world to-day—a fleet that can be divided into two balanced squadrons of four ships each. Thus for the first time our Navy would have a swift, powerful, and homogeneous first-line fleet. The result would be:

A fleet in which every unit, be it ship, squadron, or the entire fleet as a single entity, would have the same speed.

A fleet in which the same shells would fit every gun on every ship.

A fleet in which officers or crew, or both, if suddenly transferred from one ship to another, even in the midst of a battle, would be instantly at home, having under them a duplicate of the machine they had just lost and would not lose an hour of fighting efficiency. A fleet in which the admiral in command, feeling his flagship, would feel the entire fleet.

The president of one of the greatest steel and shipbuilding companies in the country stated recently before Congress, presumably with full knowledge and responsibility for his statement, that his company was ready to take four of these battle cruisers and complete them in three years, or possibly in two and one-half years, from receipt of plans. This would leave but four to be constructed in navy yards or other private shipyards.

With such a fleet on the Atlantic coast, say at Hampton Roads, with ample fleet aeronautical accessories, including no less than 50 hydro-aeroplanes, and supplemented by an adequate aerial coast-defense system, as advocated by the National Aerial Coast Patrol Commission—which we should also have within three years—we would feel measurably secure.

A fleet of eight of these battle cruisers at Hampton Roads could protect the entire Atlantic coast.

In 24 hours it could reach any point between Halifax and Habana or meet an enemy 300 miles east of Bermuda in the same time.

If divided into two squadrons of four ships it could cover the Gulf of St. Lawrence, the Straits of Florida, and the Windward and Mona Passages in 24 hours.

In 48 hours it could be off the Panama Canal.

The naval appropriation for next year should provide for another fleet of eight battle cruisers for the Pacific coast. If stationed at San Francisco, this fleet could guard our entire Pacific coast. In 24 hours it could meet an enemy 1,000 miles off San Francisco. If divided into two squadrons of four cruisers—and each of these squadrons would be more powerful than anything of the kind in any foreign navy to-day—the entrance to Puget Sound and to the Gulf of Lower California could both be covered in 24 hours.

With two such fleets in commission, and both coasts protected in addition by a sufficient aerial coast-defense system, we might feel that our sea fences were in fairly good shape.

The United States is to-day the wealthiest nation in the world. We have a more extensive available coast line than any other country. We are the only two-ocean naval power in the world. We are the only nation in the world that has deliberately made the first article of its international creed—the Monroe doctrine—a clear-cut claim to a sphere of influence covering an entire hemisphere.

We are the only one of the premier world powers not now engaged in a struggle in which force, expressed in terms which the lowest intelligence can understand, is the principal thing that counts. We may be drawn in at any time. We are not ready.

No other nation has such imperative reasons for a swift, powerful, and far-reaching navy as has the United States. The first requisite of such a navy is a homogeneous fleet of the fastest and heaviest armed ships afloat. Eight 35-knot battle cruisers mounting 16-inch guns will constitute such a fleet. If we are not to begin at once to put our Navy in second place within three years, then these eight battle cruisers will be the next best thing.

I venture, however, the unqualified statement that a fleet of sixteen 35-knot battle cruisers carrying 16-inch guns, with their proper accessories of destroyers, submarines, and an ample equipment of sea planes, will put our Navy in second place more quickly, more effectively, more cheaply than any other addition we can make to it, and that these ships will be more adapted to our needs than any other type.

Here is an opportunity for us to be a step in advance rather than several steps in the rear.

PEARY,
Chairman National Aerial Coast Patrol Commission.

Mr. OVERMAN. Mr. President, did the Senator read the Washington Post this morning?

Mr. THOMAS. I was coming to that. I noticed, Mr. President, that Admiral Knight, in the Washington Post of this morning, said he is still unconvinced of any error or fallacy in his original position, although he does stand for both the battleship and the battle cruiser.

A good many vessels were destroyed at the recent battle off Jutland. A number of battle cruisers, the first time they appeared in any great force in a naval battle, were sunk. The same was true of battleships.

I have heard it stated that Jutland has demonstrated that the battleship was still the backbone of every fleet. That may be true. Certainly it would not be becoming in me to say that it is not true. But I was impressed by one fact in that battle that has not been prominently noticed, and that is that the 11-inch guns of the German vessels did as much, if not more, execution than the 14-inch guns of the British vessels. I have seen photographs of the effect of those shots upon the ironclads. They convinced me that the wit of man has never been able, and never will be able, to devise an armor that will float which can stand the impact of an 11-inch gun. I think it would be just as cogent for me to insist that because the 11-inch gun proved perhaps to be more than the equal of the 14-inch gun, therefore we should abandon our 14 and 15 inch guns and go back to the old 11-inch type. That would be illogical; it would

certainly be unreasonable and foolish for a novice to do so; and yet it is one of the facts established by that most notable conflict, the real lessons of which I do not believe we are at present able to draw with any certainty.

Mr. President, I am not favorable to this program for still another reason. It pays too much attention to craft floating upon the surface of the water and not enough to those which go underneath it and above it. I think this war has demonstrated two things, perhaps beyond peradventure—two things that are so evident that it only requires careful observation to see and be convinced. One is that the submarine is the coming destroyer of the sea. So is the airship, which is a courier as well, and that adequate protection for a country which does not propose to carry on an offensive warfare can be made by confining the bulk of its expenditure and operations to undersea craft and to aircraft far more effectually than by repeating and adding to these enormous leviathans of our already very large fleet.

Mr. President, while the submarine was not particularly in evidence in the battle off Jutland, if we compare the number of war vessels that have been sunk or disabled by the submarine since the beginning of this war with the number which have been destroyed in that single battle of the sea during this war, the result, in my judgment, will be most startling; and if to that we add the destruction inflicted by raids that have been made upon the British Isles by aircraft and the advantages the aircraft has given both in conveying information and in aiding both the offensive and the defensive, we should be far more liberal in our appropriations here for the construction and the equipment of that sort of sea defense than we have been.

I hold in my hand, Mr. President, a clipping from a newspaper giving some extracts from a debate in the House of Commons on this subject of aircraft which, I think, occurred some two or three months ago. The purpose of it—reading from the article—is to give—

some idea of how death and destruction, fear, rage, and bitterness of spirit have driven home to England the vital importance of air power. Equally instructive material could be presented from Germany, from France, from Italy, from Russia, but the British material is more convenient and accessible. Mr. Balfour, in the House of Commons, said:

"It would avail nothing to England to have control of the sea unless it had also control of the air."

Mr. President, that is one of the most pregnant sentences which ever fell from the lips of man, coming as it does from a great modern English statesman, quickened with a sense of his responsibility and alive to the lessons of this great war. I will repeat it:

"It would avail nothing to England to have control of the sea unless it had also control of the air."

Lord Montagu, of Beaulieu, in the House of Lords, March 9, said:

"At the present time the air service is merely auxiliary to the fighting forces of the navy and army. I can see a time coming when the air service will be more important than the army and navy. We must get into the habit of looking at the air service not as an auxiliary to the army and navy but as a great service which is an establishment of itself, and to which we shall have to look in future years for the defense of this country. * * * The advantages of our insularity are rapidly disappearing. Upon the efficiency of the air service much will depend. Let it not be said with shame of our generation that we did not trouble to guard in the air what our forefathers won on the sea."

Lord Beresford said:

"The new air warfare is going to be of so tremendous a character that it may supersede the army and navy. Anyway, we should be ahead in the air, the same as we are on the water."

And I pause to suggest that while we are trying to get ahead on the sea the chances are that by the time we succeed England will be ahead in the air, and perhaps Germany or France, or all of them, and then our vast scheme of naval program goes for nothing. We must wipe it out and begin all over again—

On the 22d of March, in the British House of Commons, the following statements were made in the course of debate:

"For dealing with this very pressing question of the air there should be sittings every day, and if necessary all day, until some solution is found for our third-class position as an air power. Our national pride has suffered a blow which it will take us many years and much labor to recover from. Our very national existence in the next 20 years will lie in the ocean of the air. Within the next 5 or 10 years we may live to see the sky darkened by aeroplanes. The idea of a country owning 500 aeroplanes will be looked upon as a humorous event of the past. * * * The supremacy of the air lies ready to any Government which has sufficient initiative to see to it."

At a meeting called by the United Ward's Club of the City of London on March 28 a resolution was moved "that the meeting considers the most effective means of protection against air raids would be by the creation and maintenance of an efficient air fleet in addition to and independent of the existing naval and military requirements."

At this meeting Mr. Pemberton-Billing, a member of the House of Commons, said:

"What we want to bring about is something grander than the air defense of London. We want to demand of the Government that the money, brains, ability, and resources we possess shall be employed, and that we shall gain as soon as possible and maintain forever the supremacy of the air."

And then he goes on to say that they should have a fleet which would darken the skies.

Lord Montagu of Beaulieu, guest of the Liberal war committee, at a luncheon at the House of Commons March 22, said among other things:

"He had come to speak to a serious and well-informed body on the need of concentrating special attention and effort on aviation. He was pleading for a more energetic policy in regard to all forms of air craft. * * * The struggle for supremacy in the air was only just beginning and would not stop when peace came. * * * Compared with the cost of dreadnaughts, field guns, and armies in the field, the cost of even a huge aerial fleet would be small. What was wanted now in our statesmen and in our nation was more power of imagination. They could neither win nor hold an empire merely by 'safe' policies. 'Safe' men were all very well for times of peace. But time came when they might be dangerous. What they wanted now was new men with new ideas. Problems of the air were all new. There were no precedents to bear in mind, no files to refer to, no historical works to consult. The new service would need leaders who had ideals, foresight, imagination, and scientific training. These leaders must always have a clear vision of future possibilities, most of which were probabilities."

To give an idea of what is being done in Great Britain in the way of air service, I was told by a well-informed gentleman the other day that membership of the aircraft service of Great Britain was greater in number than our entire naval force, officers and men; and that in France the aircraft service was greater in numbers than the American Army as it existed prior to the enactment of the bill of last May. They are doing something in this line not only necessary because of the tremendous exigencies of the war, but as recognizing the fact that it is not the craft which float on the sea but those which people the air and go under the surface which will determine not only the freedom of the seas but the destinies of nations in the sea warfare of the future. And yet, while we provide for a reasonably numerous fleet of submarines, we give to the air service less than $4,000,000 out of $319,000,000, when its proper development, in my judgment, would do away with the necessity for one-half of this naval program if it were properly developed; and I will cheerfully vote for any reasonable appropriation for this purpose.

I have not the time, and I would not take it if I did, to elaborate this idea any further. Suffice it to say that one of my objections to this huge naval program is that it is unbalanced. The Senator from Massachusetts [Mr. LODGE] the other day declared—and he was right about it—that what we ought to have is a well-proportioned Navy, which we have not had up to the present time. There can be no well-proportioned Navy, in my judgment, in which the air arm is not at least equal to, if not greater in efficiency than, the fleet that floats upon the surface, and certainly in the number of our craft if not in the number of men that are required to man them.

Why, suppose a war should occur to-morrow and one of these huge armies, which in the imaginations of many are concrete things, should endeavor to make a landing upon our Atlantic shore. We have a Navy which has cost us about three and a half billions of dollars, and which we are told is worthless. Assuming that that is so, what else have we to meet this invasion? We have not enough aircraft to detect its presence, to say nothing about the importance of conveying information if they did.

But in this bill, which provides for battleships and battle cruisers galore, we have seen fit to devote less than four millions for the development of a new arm of service so tremendous and so potent that the great, perhaps the greatest living, British statesman declares that the nation which controls that service controls the sea.

Mr. President, that is another reason why I think this increase of program should not be voted at this time, and I see no reason why it should be regarded as an emergency bill. A great many have declared, and I think the senior Senator from Mississippi [Mr. WILLIAMS] said a few days ago, that we would need this Navy more earnestly and urgently within the next four or five years than at any other period, and probably within the next three years; by which I assume he meant that the European war would probably end in some manner within that period, and that as a result of its ending we would be confronted with problems and conditions that would require an enormous naval force properly to confront them and protect the Nation's welfare and safety. If he is right, of course his conclusion is irresistible, and we should build ships as fast as possible and man them faster than we build them, if such a thing could be. It seems to me that this apprehension of a cataclysm menacing the immediate future of this country, and resulting, not because of but concomitant with the ending of the war, has no substantial basis in fact.

Here is the world's spectacle. All the mighty nations of European civilization are battling with each other to the death. They have been so battling for practically two years. The destruction of property and of human life is so appalling that the imagination of man can not begin to grasp it. The extension of credit has resulted in the creation of a huge debt soon to become $100,000,000,000 in the aggregate, commanding $5,000,000,000

per annum for interest charges only, and placing upon their generations to come a financial burden which they must either avoid or under which they will sooner or later disappear; a countless army of cripples, legions of widows and of orphans, men and women sick and tired unto death of this perpetual and horrible slaughter.

How it is possible for the mind of man to conceive that nations so situated will, upon the conclusion of peace, spring to arms and invade a powerful foe 3,000 miles across the seas with a force sufficiently strong to make it necessary that we should immediately have the second navy in the world to protect ourselves I am unable to imagine.

I know it is said, Mr. President, that nations are never so formidable as when they have just emerged from conflict, and that is true. If we consider only the fighting capacity of the survivors, there is no question but that the seasoned veterans of this mighty conflict would be better equipped to meet any foe, however powerful, than any other nation could furnish. But do they still want to fight? Do their wives or their children want them to renew the struggle elsewhere? Is there any glory in it? Is there any need for it?

Some say they are coming for the purpose of wiping out their huge obligations through the pillage and plunder of the cities of our Atlantic coast; in other words, our very riches will attract them, and that of itself will be sufficient cause for our invasion. Oh, Mr. President, that is assigned as a reason why we should abandon our national policy and enter upon this unbelievable program of naval expenditure!

I know the bill will pass, and I am painfully conscious of the fact, Mr. President, that the majority of public opinion will at least seem to approve it, because men now are not reasoning creatures when war is mentioned. We have been in the presence as spectators of this awful tragedy so long that we have become imbued with the same spirit which animates the combatants, and it is easy to assume that inasmuch as this war came so suddenly and with so little warning we will be confronted with a similar condition and be overwhelmed if we are not prepared to meet it.

If I thought so, Mr. President, I would of course be willing to vote for the expenditure of every dollar of the Treasury if needed to safeguard our property and our households, but believing that the extraordinary conditions of the time when the imagination yields so easily and so readily to the hysteria of the moment have conjured up a mere specter of imminent danger, I am unable to cast my vote for this naval program. I would vote for that recommended by the House, large as it is, if the committee would be satisfied with its action, not because I deem it essential now or hereafter, but because it is well to satisfy to some degree the public demand, however unfounded it may be.

Mr. VARDAMAN. Mr. President, I realize that what I am about to say regarding the question at issue before the Senate will not influence the vote of a single Member of this body. One "might preach to the storm or reason with despair" to some effect, but I am quite sure that the minds of the Senators are made up, the conclusions reached, and they are only waiting for the opportunity to register their conclusions. But I should be altogether untrue to myself, unfaithful to those whom I have the honor to represent in part in this Chamber, and disloyal to all the American people, were I to refrain from expressing my utter and unconditional disapproval of this bill. I am unable upon any theory consistent with my sense of obligation to my constituents and my adherence to the principles of free government to lend my approval of the bill with its contents and the policy which it inaugurates.

The measure is unprecedented in the magnitude of the appropriation which it carries, the scope of its provisions, and the undemocratic—I might say, un-American—spirit of its purposes. It marks a turning point in the life of this Republic and opens up the way which has led the republics of the past into the pitfalls of imperialism. If the fighting material provided for in this bill were needed to defend this Republic from invasion or to uphold the rights of American citizens in other parts of the earth, I should not utter one word of protest against it. On the contrary, it should have my heartiest approval.

Mr. President, I yield to no man in my devotion to my country and my willingness to make any sacrifice necessary for the defense of the Nation's flag. And in my own proper person in that regard I but poorly body forth the heroic qualities which glorify the characters of the brave men and pure women for whom I have the privilege in this presence to speak. The advocates of this bill who would undertake to put the odium of disloyalty to the Government upon those of us who withhold our approval of this measure will find in the end that the unwisdom and questionable patriotism of their own course will not be corrected or minimized by a manifest injustice to some one else.

The most enthusiastic and radical advocate of "preparedness" who has any respect whatever for the sanctity of the truth will not claim that we really need such a Navy, either for defense or offense, as is provided for in this bill, at this time. Really, the prospects of this country becoming involved in war with any foreign nation is more remote to-day than at any time during the last half century. We are threatened with no foes from without, we are happily at peace with all the world, and the nations with which we would be more likely than all others to have trouble are less able to wage war against us to-day and less inclined, I believe, to provoke war with us in the future than ever before in the history of this Government. And yet, in the face of these facts, facts that are admitted by the leaders of American thought and contradicted nowhere by anyone whose opinion is worthy of consideration, this Congress proposes to appropriate money with which to provide for the building of 157 ships of war which will cost in the neighborhood of $400,000,000, imposing an average tax of at least $25 per family on the people of the United States, regardless of the poverty of the masses.

This item of taxation, added to that which is already borne by the toilers of this country to pay the expenses of wars that have been fought and to get ready for the possible wars in the future, will amount to something like $50 for every head of a family in the United States. That tax, added to other taxes for the support of the National Government, the State, county, and municipal taxes, will amount almost to confiscation in the course of time, because the tax will increase as the years go by if the influences which now control the Nation—dominate the Executive and the Congress, shall be perpetuated. And for what purpose? Mr. President, what influences demand the enactment of this law at this time? What harm would result from the postponement for three or four years of the building program provided for in this bill? There are already contracts let for the building of battleships which will not be completed for three years. I am advised that the unexecuted contracts for the Navy amount to something like $120,000,000. O, Mr. President, is it not time that Members of the American Senate should pause and consider what all of this means to the toilers of this Republic? It would not be out of place for me to suggest to the Senate that there are hundreds of thousands of families in the rural districts of the United States whose impecunious condition is such that the small amount of $50 will determine the question as to whether or not their children shall have proper clothing and shoes in the wintertime to wear to school.

The learned Senator from Massachusetts [Mr LODGE] a day or two ago on the floor of this Chamber referred to the fact that some of the instruments of naval warfare had been in the course of construction for the last five or six years—since 1908, I believe. Now, the delay in the construction was not due to the fact that it required that much time for the building, but rather because the officers in charge of the matter did not think it at all necessary to hurry the completion. Certainly the Chief Executive of the Nation, the Secretary of the Navy, and the naval officers would not have tolerated this delay in the building of ships already authorized if there had been any possible danger of immediate war with any foreign country. To intimate that these officers charged with the responsibility of their great places would be guilty of such a dereliction of duty would be an impeachment which I would not make. That our Navy is big enough and strong enough to take care of American interests and meet successfully any demand made upon it, the most radical advocate of preparedness will not deny. There is abundant evidence from the lips and pens of the highest naval authorities in America to establish that fact. Our Navy is greater than Germany's, much stronger than France's, nearly twice as large as Japan's. There is no doubt, I repeat, about the superiority of our Navy. Can it be possible, then, that this haste is due to the fact that the advocates of this nefarious policy—this unfortunate scheme—understand that this law must be enacted now while the public mind is inflamed, public judgment distorted by the manufactured sentiment which has fired the war spirit, or it will not be enacted at all? Is it the purpose of the preparedness patriots to weld the collar of imperialism around the necks of American freemen while the iron is hot? Must we commit the American people to this un-American policy before cool and deliberate judgment assumes her normal sway?

Must the course of the ship of state that has floated so steadily, guided by reason and truth, justice and altruism, for the past 100 years, now be turned from her splendid course by the storm of passion, the undercurrents of greed and cupidity and consuming desire for gain, into the maelstrom of military despotism? God forbid! It is time, Mr President, that the American Congress should take counsel of its higher wisdom and consider the interests of the American people, a large part

of the products of whose toil this policy of "preparedness" will absorb. Think of the burdens that will be piled upon the aching stoop of the men and women whose labor feeds and clothes the world. Think of the opportunities that this expensive policy will deny the boys and girls of America living, and those yet to come. Think of the influence that this one act is going to have upon the nations of the earth.

It is pregnant with the suggestions of conflict. It breathes the breath of imperialism and inculcates by example the lessons of war. It is fuel to the flames that burn in the hearts of the people and which consume the nobler and gentler qualities of the soul. It is altogether contrary to the genius of American institutions and involves a repudiation of American ideals. We should consider how it will postpone the coming of that glorious day when the umpirage of reason shall rule the world rather than the force of the bloodstained sword. We should think of all these things before taking this unfortunate step. For when the step shall be once taken it will be difficult to retrace it. Now, to say that world peace is a Utopian dream and to discard with a sneer the suggestion that an international court may be organized by the nations of the earth, to which all international differences shall be submitted, and the rule of reason rather than the arbitrament of the sword shall settle these questions, will be very foolish on our part; and, in fact, the suggestion is condemned by the very terms of this bill itself.

Let us see what the bill provides. I read:

Upon the conclusion of the war in Europe, or as soon thereafter as it may be done, the President of the United States is authorized to invite all the great Governments of the world to send representatives to a conference which shall be charged with the duty of suggesting an organization, court of arbitration, or other body, to which disputed questions between nations shall be referred for adjudication and peaceful settlement, and to consider the question of disarmament and submit their recommendation to their respective Governments for approval. The President is hereby authorized to appoint nine citizens of the United States, who, in his judgment, shall be qualified for such duty, to be representatives of the United States in such a conference. The President shall fix the compensation of said representatives and such secretaries and other employees as may be needed. Two hundred thousand dollars, or so much thereof as may be necessary, is hereby appropriated and set aside and placed at the disposal of the President to carry into effect the provisions of this paragraph.

If at any time before the appropriations authorized by this act shall have been contracted for there shall have been established, with the cooperation of the United States of America, an international tribunal or *tribunals competent* to secure peaceful determinations of all international disputes, and which shall render unnecessary the maintenance of competitive armaments, then and in that case such naval expenditures as may be inconsistent with the engagements made in the establishment of such tribunal or tribunals may be suspended, when so ordered by the President of the United States.

Mr. President, what does that mean? Did the authors of that provision in this bill think that this peace court could be created and accomplish the purpose of its creation? Or do you think it is a mere insincere sop thrown to the despised pacifists of America? Can it be possible that it is intended to deceive the people—a kind of anesthetic administered to the American voters while they are subjected to the painful ordeal of being robbed of their blood-bought rights as freemen and plundered of their earnings for the beneficiaries of militarism? Is it conceivable that this provision is placed in this bill for partisan political purposes? No, Mr. President; I am not going to impute such discreditable motives to the authors of this provision. I believe the men who wrote it were sincere in what they did and cherished the hope that the plan outlined might reach effective consummation. Mr. President, I am a devout believer in the ultimate triumph of righteousness. I hold that—

Out of the twilight of the past
We move to a diviner light;
For nothing that is wrong can last;
Nothing's immortal but the right.

I believe that if the doctrine taught by the Prince of Peace shall be given a fair trial by the nations of the earth in their intercourse with each other, the same beneficial results will follow that universally come to the individual citizen who makes that doctrine the rule and guide of his conduct in private life. Genuine Christianity has never been given a fair trial in international matters. Then why not have the United States, so advantageously situated at this moment, lead off in this superb, this glorious experiment of international government by the Golden Rule? It would be a unique distinction—the embracing of an opportunity which seldom comes to a great nation to serve all mankind.

The ordeal may be painful through which the man will be forced to pass in order to come into his own, but the day is not far distant, in my judgment, when the nations of the earth are going to be controlled by the good judgment, the sense of prudence, and self-preservation of the individual citizen. "The common sense of most will be the supreme law of the land." It has been suggested that the Republics and democracies of ancient times have decayed and been swept from the earth because of their failure to prepare for defense by the organization of great armies and navies. Nothing could be further from the facts of history. Governments and civilizations of the past that arose to eminence by the inspiration of the genius of free institutions have perished from the earth because of the moral decadence of the individual citizen—the fatal fault has invariably been in the individual man. But there is one vital, cardinal truth which history teaches us and which I would impress upon the American people and have them teach it to their children until it becomes an instinct of the race. It is this: Free institutions can not live long when they are upheld and the flag of the nation defended by a hired professional army. The present war which is being waged in Europe is a disgrace to the world's civilization, making their pretended faith in the Prince of Peace a bloody lie, was brought about without consulting with the men who bear the brunt of the conflict, and who pay the enormous expense in blood and treasure. But the day of reckoning and readjustment will come; a just God still reigns, and righteousness and truth will prevail. In the situation it seems to me that I can see the possible fulfillment of the dream of the inspired English bard who more than half a century ago was able to stand within the shadow of the night and, looking beyond it, saw the dawn of a brighter and a better day—

For I dipt into the future, far as human eye could see,
Saw the Vision of the world, and all the wonder that would be;
Saw the heavens fill with commerce, argosies of magic sails,
Pilots of the purple twilight, dropping down with costly bales;
Heard the heavens fill with shouting, and there rained a ghastly dew
From the nations' airy navies grappling in the central blue;
Far along the world-wide whisper of the south wind rushing warm,
With the standards of the peoples plunging thro' the thunder storm.

Mr. President, in that glorious vision the poet saw with the eye of prophecy that which we see to-day with the physical eye—distance annihilated, the telegraph and the telephone, the wireless telegraphy, the airship and the steamship, the railroads and all the modern means of rapid transportation, transforming the world into one great neighborhood. Close contact, looking deep into the eyes of each other, and recognizing the kinship of every soul, their pulses meeting in the cordial handshake, filling the heart with brotherly love and driving out of their souls the old enemy of hate. Cooperation taking the place of competition, selfishness giving away to altruism, and men taught the great lesson that the way to grow rich and strong and wise and useful is to do something for somebody else. And then—

Till the war-drum throbb'd no longer and the battle flags were furl'd
In the parliament of man, the federation of the world.
There the common sense of most shall hold a fretful realm in awe,
And the kindly earth shall slumber, lapt in universal law.

Now is the time for America to act and help to bring about the fulfillment of this glorious dream. Mr. President, I believe it is possible for the nations of the earth to do the very rational, humane, and proper thing of creating such a court to which all differences may be submitted and all disagreements composed without resorting to the brutal methods now employed by the European powers.

And I believe that an effort should be made to organize this court before any of the extraordinary expenditures are made which are provided for in this bill. Why build the battleships, construct the shipyards, and incur other expenses, when we all cherish the hope that an international agreement may be effected which will render unnecessary this tremendous outlay? It is the duty of the United States Government to exhaust every means within its reach, employ every proper method to bring about the organization of an international court of arbitration. And, as I said a moment ago, do it before embarking upon the untried, un-American, and undemocratic course which this bill outlines. This bill violates the sacred traditions of the Democratic Party. It is an affront to the teachings of Thomas Jefferson, is at variance with the time-honored policy of the Government since its organization. It gives the lie to the Sermon on the Mount and makes the decalogue but a concatenation of meaningless words. And all for what? What influences call for it? Not a threat of invasion by a foreign foe—no internal dissensions which threaten our peace at home—no necessity under God's sun, that I can see, but on the contrary, the horizon of our future is without one speck of war cloud to mar the wide expanse of its peaceful blue. Less danger, in fact, of war than this country has enjoyed for the last 50 years. Of course, no one really considers seriously the little fiasco with Mexico. Now, who demands this legislation? Nobody except the profit sharers of such a policy, and the politicians who imagine that the brutal passion of war has so benumbed the Christian instincts and beclouded the judgment of civilized peoples that the voters can be misled or used for partisan political purposes.

The United States Government, Mr. President, notwithstanding what the advocates of "preparedness" have said, and the

slanderers of the American Navy may suggest, has the greatest Navy to-day in the world, except Great Britain. This Nation is better equipped to defend its right on land—it is better equipped in men and material resources to defend the American flag both on land and sea than ever before in its history. That statement can not be successfully contradicted. And, in addition to that, I want to repeat, there is less danger of foreign or domestic war than this country has enjoyed since 1865. Mr. President, the American people are wont to denounce the selfish and ambitious rulers of Europe, and charge them with responsibility for the cruel war being waged over there to-day. I join with them in that criticism. It is a war brought about by the ambitious, designing criminal few, to be fought and suffered by the exploited many. The men and women who are suffering and sacrificing in this war were not consulted about it at all. And yet, in utter disregard of that terrible example, the Congress of the United States is pursuing the same course, doing the same thing, that the rulers of Europe did prior to and leading up to that fearful conflict. Getting ready for war when no war is threatened. Taking the money that ought to go for the support, maintenance, and education of the children of the toiling masses and investing it in gunboats, cannons, and other forms of armaments that will never be needed—that is, if the men responsible for the official affairs of this Nation shall do their duty. We propose to build battleships that are not needed. We propose to organize armies that are not needed. We are martialing the forces of war, not for the purpose of defense but for the purpose which organized and martialed physical forces in the forms of armies and navies are always used by ambitious rulers. It seems to me that this Congress has lost its discretion—"judgment thou art fled to brutish beasts and men have lost their reason"—under the influence of an abnormal pernicious sentiment. Old and tested moorings are broken, and in the midst of breakers the ship of state is to be turned over to the commercial pirates. I can not understand it.

I have listened in vain for one word for peace to be spoken—one note of peace to be sounded by this administration. No organized official effort has been put forth by this Government in the interest of peace. The President, in his admirable address to Congress on the 8th of December, 1914, declared a purpose and outlined a policy which, if pursued, would have given this Republic a position of moral altitude which would have commanded the admiration of the peoples of the earth and won the gratitude of every rational Christian man and woman in the world. Mr. President, I am going to ask permission to insert here in my remarks an extract from that wonderful address. I regard it as the crowning effort of a great brain, glorified with the rare fragrance of a heart imbued, at the time, with genuine love for humanity.

I beg to be permitted to employ the President's words as the better expression of my own views on this momentous issue.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

"It is not expenditure, but extravagance that we should fear being criticized for; not paying for the legitimate enterprises and undertakings of a great Government, whose people command what it should do, but adding what will benefit only a few or pouring money out for what need not have been undertaken at all or might have been postponed or better and more economically conceived and carried out. The Nation is not niggardly; it is very generous. It will chide us only if we forget for whom we pay money out and whose money it is we pay. These are large and general standards, but they are not very difficult of application to particular cases.

"The other topic I shall take leave to mention goes deeper into the principles of our national life and policy. It is the subject of national defense.

"It can not be discussed without first answering some very searching questions. It is said in some quarters that we are not prepared for war. What is meant by being prepared? Is it meant that we are not ready upon brief notice to put a nation in the field—a nation of men trained to arms? Of course we are not ready to do that; and we shall never be in time of peace, so long as we retain our present political principles and institutions. And what is it that it is suggested we should be prepared to do? To defend ourselves against attack? We have always found means to do that, and shall find them whenever it is necessary, without calling our people away from their necessary tasks to render compulsory military service in times of peace.

"Allow me to speak with great plainness and directness upon this great matter and to avow my convictions with deep earnestness. I have tried to know what America is, what her people think, what they are, what they most cherish and hold dear. I hope that some of their finer passions are in my own heart—some of the great conceptions and desires which gave birth to this Government and which have made the voice of this people a voice of peace and hope and liberty among the peoples of the world—and that, speaking my own thoughts, I shall, at least in part, speak theirs also, however faintly and inadequately, upon this vital matter.

"We are at peace with all the world. No one who speaks counsel based on fact or drawn from a just and candid interpretation of realities can say that there is reason to fear that from any quarter our independence or the integrity of our territory is threatened. Dread of the power of any other nation we are incapable of. We are not jealous of rivalry in the fields of commerce or of any other peaceful achievement. We mean to live our own lives as we will, but we mean also to let live. We are, indeed, a true friend to all the nations of the world, because we threaten none, covet the possessions of none, desire the overthrow of none. Our friendship can be accepted and is accepted without reservation, because it is offered in a spirit and for a purpose which no one need ever question or suspect. Therein lies our greatness. We are the champions of peace and of concord. And we should be very jealous of this distinction which we have sought to earn. Just now we should be particularly jealous of it, because it is our dearest present hope that this character and reputation may presently, in God's providence, bring us an opportunity such as has seldom been vouchsafed any nation, the opportunity to counsel and obtain peace in the world and reconciliation and a healing settlement of many a matter that has cooled and interrupted the friendship of nations. This is the time above all others when we should wish and resolve to keep our strength by self-possession, our influence by preserving our ancient principles of action.

"From the first we have had a clear and settled policy with regard to military establishments. We never have had, and while we retain our present principles and ideals we never shall have, a large standing army. If asked, Are you ready to defend yourselves? we reply, Most assuredly, to the utmost; and yet we shall not turn America into a military camp. We will not ask our young men to spend the best years of their lives making soldiers of themselves. There is another sort of energy in us. It will know how to declare itself and make itself effective should occasion arise. And especially when half the world is on fire we shall be careful to make our moral insurance against the spread of the conflagration very definite and certain and adequate indeed.

"Let us remind ourselves, therefore, of the only thing we can do or will do. We must depend in every time of national peril, in the future as in the past, not upon a standing army, nor yet upon a reserve army, but upon a citizenry trained and accustomed to arms. It will be right enough, right American policy, based upon our accustomed principles and practices, to provide a system by which every citizen who will volunteer for the training may be made familiar with the use of modern arms, the rudiments of drill and maneuver, and the maintenance and sanitation of camps. We should encourage such training and make it a means of discipline which our young men will learn to value. It is right that we should provide it not only, but that we should make it as attractive as possible, and so induce our young men to undergo it at such times as they can command a little freedom and can seek the physical development they need, for mere health's sake, if for nothing more. Every means by which such things can be stimulated is legitimate, and such a method smacks of true American ideas. It is right, too, that the National Guard of the States should be developed and strengthened by every means which is not inconsistent with our obligations to our own people or with the established policy of our Government. And this, also, not because the time or occasion specially calls for such measures, but because it should be our constant policy to make these provisions for our national peace and safety.

"More than this carries with it a reversal of the whole history and character of our polity. More than this, proposed at this time, permit me to say, would mean merely that we had lost our self-possession, that we had been thrown off our balance by a war with which we have nothing to do, whose causes can not touch us, whose very existence affords us opportunities of friendship and disinterested service which should make us ashamed of any thought of hostility or fearful preparation for trouble. This is assuredly the opportunity for which a people and a Government like ours were raised up, the opportunity not only to speak but actually to embody and exemplify the counsels of peace and amity and the lasting concord which is based on justice and fair and generous dealing.

"A powerful Navy we have always regarded as our proper and natural means of defense; and it has always been of defense that we have thought, never of aggression or of conquest.

But who shall tell us now what sort of navy to build? We shall take leave to be strong upon the seas in the future, as in the past, and there will be no thought of offense or of provocation in that. Our ships are our natural bulwarks. When will the experts tell us just what kind we should construct, and when will they be right for 10 years together, if the relative efficiency of craft of different kinds and uses continues to change as we have seen it change under our very eyes in these last few months?

"But I turn away from the subject. It is not new. There is no new need to discuss it. We shall not alter our attitude toward it because some amongst us are nervous and excited. We shall easily and sensibly agree upon a policy of defense. The question has not changed its aspects because the times are not normal. Our policy will not be for an occasion. It will be conceived as a permanent and settled thing, which we will pursue at all seasons, without haste and after a fashion perfectly consistent with the peace of the world, the abiding friendship of States, and the unhampered freedom of all with whom we deal. Let there be no misconception. The country has been misinformed. We have not been negligent of national defense. We are not unmindful of the great responsibility resting upon us. We shall learn and profit by the lesson of every experience and every new circumstance; and what is needed will be adequately done.

"I close, as I began, by reminding you of the great tasks and duties of peace which challenge our best powers and invite us to build what will last, the tasks to which we can address ourselves now and at all times with free-hearted zest and with all the finest gifts of constructive wisdom we possess. To develop our life and our resources; to supply our own people, and the people of the world as their need arises, from the abundant plenty of our fields and our marts of trade; to enrich the commerce of our own States and of the world with the products of our mines, our farms, and our factories, with the creations of our thought and the fruits of our character—this is what will hold our attention and our enthusiasm steadily, now and in the years to come, as we strive to show in our life as a Nation what liberty and the inspirations of an emancipated spirit may do for men and for societies, for individuals, for States, and for mankind."

Mr. VARDAMAN. But for some reason which has not been given to the public the President changed his course. He descended from the high place he assumed in that incomparable speech and permitted himself to get on the level with the advocates of brute force—the disciples of "preparedness" for pelf and the hungry hoard of profit makers, who would coin the blood and tears of the toiling millions of this country that dividends might be increased. Mr. President, a sense of disappointment sank into my soul that words can not express when the President of the United States threw away that great opportunity to serve humanity and to lead the world to higher and better and nobler things. As I said in the beginning, I presume the die is cast. The order has gone forth. The Congress has made up its mind. I am prepared to believe that the worst is to be done. Any effort to bring about a change in the determination of this Congress would be as idle as to attempt to resist the rushing forces of Niagara with the floating mists that hover over its roaring vortex. O God!

> When shall all men's good
> By each man's rule, and universal peace
> Lie like a shaft of light across the land
> And like a lane of beams athwart the sea?

Mr. WORKS. Mr. President, I understand perfectly that in the present excited, hysterical, and perverted condition of the public mind one who opposes this program of enlarging and expanding the Navy is going to make himself unpopular. I know that my views on this important subject run counter to those of other Senators just as conscientious as I am, and who believe in all sincerity that this proposed legislation is wise and necessary. As the bill is bound to pass and become a law I wish I might agree with them. I listened with interest and no little apprehension to the speech of the junior Senator from Virginia [Mr. SWANSON] in opening the debate on the bill. I say with apprehension because I look upon it as one of the most unfortunate and dangerous, I had almost said unpatriotic, speeches ever delivered in the United States Senate. It was full of dire predictions of misfortune and dangers to the country. It is calculated to instill into the minds of the American people a false sense of the impotency of this great, free, peace-loving Nation to protect itself except by force. It will arouse in their minds feelings of fear, apprehension, and distrust of their own Government that may never be allayed and which may bring upon us worse disasters than those he predicts. It minimizes the power of peaceful methods of settling international disputes and exalts in the minds of the people the methods of force and warfare. I am sorry that such sentiments should have fallen from the lips of a United States Senator who, because of his exalted official position, speaks with authority.

Mr. President, this is a critical time in the history of this Nation. No more important question, none of greater significance, none fraught with greater or more dangerous consequences to the country, has ever confronted us. We are now definitely entering upon the broad highway that leads to militarism, the domination of the military over the civil authorities. We are proposing to change the fundamental policies of the Government in a matter affecting, as no other policy could, the peace, happiness, and prosperity of this great and beneficent country. Heretofore it has been our fixed and unaltered policy to exalt peaceful means above force in the settlement of disputes and the maintenance of peace with other nations and within our own borders; now we propose to elevate force above honor and probity and peaceful methods. Up to this time the people of this country have been taught to believe that our greatest protection was justice and fair dealing with other nations as with other men, and willingness to arbitrate and settle disputes with other nations as we would settle with our neighbor by going to a court provided by law. Now, by the speech of the Senator from Virginia, if he is believed, and the passage of this bill, if that misfortune shall come upon the country, there is instilled into the minds of the American people the deadly poison of unbelief in peaceful means of maintaining peace and reliance upon a great army and navy. It is not so much the building up of a great navy or the unnecessary and wasteful expenditure of hundreds of millions of dollars for that purpose that I deplore. It is the dangerous and unpatriotic thought which lies behind it that is most alarming. It is the fact that we are taking a false step that will change the minds of the American people from thoughts of peace and reliance upon peaceful means as the one sure preservative of peace, with its consequent manifold blessings of prosperity and happiness and contentment, to thoughts of force, with reliance upon a powerful army and navy as a preventive of war.

We have severely criticized other nations for doing with much greater reason just what we are proposing to do now. Sheltered in belief behind the protection of a great army and navy, imbued with the feeling of distrust of all other nations, distrustful even of our own Nation which can no longer protect itself except by force of arms, this Nation can no longer be great except in money and military power and her people can never be happy or contented.

We, as a nation, are about to step down from the exalted position we have held as an advocate of universal peace among nations and the settlement of disputes without resort to war, and descend to the level of the nations who kill and slay and maintain great standing armies as the only means of protection. What a spectacle we are about to present to a civilized and enlightened world! What an example to be set by a nation that has heretofore boasted of its free institutions and plumed itself on its advocacy of peace! By this one act of legislation we surrender all pretensions of superiority over other nations in this respect and admit that we can not protect our own people except by war. What a travesty on free and enlightened government! What a libel on humanity! What a terrible arraignment of the times in which we live and of our own Nation and its people!

Mr. President, why should we do this dreadful thing now? There is no reason in the interest of the people. We are in no danger of war. There is less reason to fear it now than at any time in half a century. By this large armament we are exciting the fear and apprehension of our own people and the hatred and malice of other nations. Filled with fear and armed for the conflict we are inviting war. There is nothing more dangerous than the man filled with fear and armed with a loaded revolver. Nations are made up of men, and a nation afraid and possessed of a great army and navy is dangerous only in greater degree.

Mr. President, this is not a political question. If this great wrong to the people of this country is consummated, the two great political parties now struggling for control of the Government will be equally responsible. It may seem to be popular now, but unless the people of the country have become reconciled to militarism, which God forbid, the men in this body who are instrumental in passing this bill will live to see their error and regret the course they are now taking. But, sir, that will not entirely heal the injury they are about to inflict upon the country. The marks of this day's work may never be wholly removed and the Nation restored to the high position it occupied before the wrong was committed.

Mr. President, I enter my solemn protest against it. I know that what I have said here will have but little effect. It will not prevent the passage of the bill. It may arouse some of the

people of this country who have been misled by designing people to a realization of the enormity of the sentiments that have been aroused in favor of preparedness for war and the injury that has been done them by the passage of the bill.

At all events I shall have the consolation of having done what seems to me to be an imperative duty at a time of great peril to the country.

Mr. BORAH. Mr. President, this is a program which I presume no one wants, but it is a program which some of us believe to be necessary. All would be glad if the expense could in safety be avoided. Some of us believe we can not in safety do so. Those of us who believe in a strong Navy are quite as much in favor of peace as our colleagues, for whom we have the highest regard, who are opposed to it. We believe that conditions are such as to require some action on the part of Congress, and that action has taken the form which we now find in this bill. It is not just as I would like to see it, but I must not permit the lesser to control the greater.

The Senator from California [Mr. WORKS], speaking upon what he considered a grave and delicate situation, expressed my views with reference to a very important feature of our foreign affairs. He is of the opinion, and others are of the opinion, that this matter may be, and possibly it will be, settled without any difficulty. I sincerely hope that may be true. But the thought occurred to me at the time he was speaking, and it has occurred to me since, suppose it were not settled in accordance with our views or as we feel it should be settled, what would we do? Would we submit to the views of a foreign power with reference to those matters which we deem to be vital to the existence of our Government and to the preservation of our civilization? We would not, and it is cheaper and wiser to settle grave questions in the atmosphere of security. The premier of Japan a short time ago said that the only way that diplomacy could become effective was when it was backed up by sufficient force. When he thus spoke he was not, I take it, making a threat but uttering a most practical precept of international action. I would not like to sit down with the masterful men of that great nation to deal with matters of vital concern and have them feel that there was no force behind our diplomacy. I am too anxious to retain their respect.

Mr. President, a great deal has been said since this debate started months ago to the effect that we have no enemy in sight and may therefore be at ease. Senators have also indulged in the intellectual pastime of analyzing the financial and industrial conditions of other nations, comparing those conditions in that respect with ours and deducing from it all security against aggression from any source. We are said to be friendly with all powers or if not friendly secure nevertheless in the fact so conclusively demonstrated that all the great powers now in conflict will escape from this fearful carnage broken in spirit and in purpose and anxious for years of resuscitation and rebuilding. It is something of a task, at least it has usually been found much beyond the ken of mortal man heretofore, to foresee all the causes of war. It has generally been considered beyond the capacity of the most trained statesmen to divine the sinister and often wholly fortuitous influences which bring even friendly nations into conflict often within a fortnight. It is something of a risk to permit security to life and property to rest upon the ability of men to search out in advance the consciences and to run out and reveal the plans and purposes of other nations. It seems to me much wiser to follow the more prudent and better tested policy of the wisest of men. It was Washington who said:

> If we desire to avoid insult we must be able to repel it. If we desire to secure peace it must be known that we are at all times prepared for war.

I perfectly agree with those who reject the theory that any particular nation is planning an attack upon the United States. But I reject the other theory also which seems in the minds of many to follow as a matter of logic that because there is no specific purpose to that end anywhere observable, therefore there is no danger and hence no necessity for preparing to meet danger. You had just as well tell me to take the policemen off the streets of Washington because no one is able to unravel to a definite and specific conclusion the mysterious workings of the criminal mind and advise in advance when it will act. I do not know and no one can know very much concerning the specific plans and purposes of other nations. I do not need to know them in order to act wisely concerning the interests of this Government and for the protection of our countrymen. I do know that steam and electricity have made us neighbors to all the world; that among these neighbors are powerful and ambitious nations reaching for trade, searching for points of commercial advantage, determined upon commercial supremacy. I know furthermore that one of two things is true: That as a people we will either become a dominant and world factor in this race for commercial supremacy or we will be sheared of our prestige, our power, and even our dominance unto humiliation. We must either go forward finding an outlet for our trade, a market for our goods, and thereby a living wage for our workingmen, insuring efficiency and prosperity at home, or we must be content to be shut in and circumscribed, to see our markets glutted, labor underpaid and discontented, internal dissension and dissatisfaction, and other things of which I do not care to prophesy. If we are to play the part which we should play and which we are entitled to play, shall we hope to do so without the ability or the means by which to protect our own and without that preparation which shall insure respect to the flag and a due regard for our rights? There may come a time when the policemen may be dispensed with in safety to the community, when the vices of men will make war no longer upon the peace and good order of society, but that time is not yet. There may come a time when nations shall be satisfied with their market, their commerce, and their territory, but that time is not yet.

Washington advised us that—

> The great rule of conduct for us in regard to foreign nations is in extending our commercial relations to have with them as little political connection as possible.

I trust we shall always adhere to that rule; it is a policy the foresight and wisdom of which time has fully justified. But while we are, I assume, to remain aloof from European politics, we can not forego our rightful, indeed, our necessary place in the world's commercial affairs. Neither can we expect, nor do we desire, that Europe or the Orient shall have no part in the commercial affairs of the Western Continent. Exchange and trade between nations are as essential and inevitable in the twentieth century as was barter between neighbors in the seventeenth. New York and London and Liverpool and Berlin and Vienna are as close neighbors in the field of trade now as were New York and Philadelphia when Washington issued his farewell address. In politics let us in so far as we may have our own theories of government, our own standards of right and wrong, our own civilization. But in commerce there must always be that close grip of power with power which may give rise any day to grave misunderstandings. Then there is that other fateful, sinister question to which the able Senator from California [Mr. WORKS] referred effectively in his speech a few days ago, of the intermingling of races and nationalities. We all know that more than once of late this question has caused our Nation, "the asylum of the oppressed," to make inquiry of a certain proud and sensitive nation of its further purposes and plans in this particular. Fortunately and much to the gratification of both parties that difficulty has been obviated for the present. But he is a complacent soul, indeed, who does not scent danger in this close rub of irreconcilable nationalities. Here, in these commercial and racial conflicts, lie the causes of modern contention, and here, too, are the warning signals to a reflecting people to prepare against the day when even some race riot shall ignite the embers of race prejudice and race hatred, passions which sometimes sleep but never die and before which arbitration tribunals and peace treaties disappear like stubble in the flame.

All kinds of causes for this war have been assigned. The ambition of a powerful personality, the most striking European figure since Napoleon; the assassination of the representative of a royal family, who ventured into unfriendly territory; and finally the invasion of Belgium have each and all been given their place as culminating incidents to the bringing on of this conflict. But at bottom and in its primary causes it is a commercial war. Desire for commercial supremacy was the underlying influence which brought into conflict the forces of the central and allied powers. We will not gather from this crisis the lesson which we are under every obligation to learn if we fail to give consideration to that fact. Here were two great people, the German and the English people, each rich in the traditions of ancient valor, and in each of which lived and dwelt eternally the genius for empire. One of them the most efficient, the most thoroughly organized industrial unit in the world, sending its trade into every port and its merchants into every clime; the other the possessor or dominating influence of over one-fifth of the inhabitable globe. There had to be the curtailment of commercial ambition and of territory, or there had to be conflict, and now there may be both. Henry Clay once said:

> The greatest want of civilized society is a market for the sale and exchange of the surplus produce of the labor of its members.

When we look over this great war and its causes I am almost compelled to agree with him. The assassin's aim might have hastened it on, the invasion of Belgium was no doubt a concluding incident and served well to gild other reasons with the halo of humanity. But the originating causes of the conflict lay back, far back, of those things, deep buried in the history, the tradi-

tions, the ambitions, and the wide-spreading influence of the two most dominant social and moral forces which have yet appeared in European history. Socially, governmentally, commercially they were at war long before the manifesto of war was issued. With both, with each, it seems there were two alternatives and no third, world dominion or ruin, and all these things moved forward to the final clash at a time when the citizens of the respective countries were upon the friendliest terms and at a time when the expressions of friendship between the respective Governments were weekly and even daily incidents. I know there are those who will disagree with me and seek to place this conflict upon higher ground. But I challenge those who think so to go back and study the business and commercial literature of these two nations for 10 years prior to the conflict.

Let us then exclude all specific plans of attack, all specific purposes of invasion, and look out upon broader fields. Do we not see nations, aggressive for room and hungry for markets and restless for power, some of which nations contrast with ours in their standards of civilization and conceptions of government in a more marked degree than the contrast which denotes the two leading warring nations of Europe? And seeing these things, shall we be misled by the solemn, meaningless language of diplomacy, with which time and cunning have so often sought to lull into security the public mind? Do we not see a world every part of which the genius of man has brought into close touch with every other part? Do we not see the spirit of nationality, the strenuous, persistent, inscrutable spirit of nationality, everywhere dominant? Seeing these things, and knowing well that it is our task to insure protection and security to all, shall we fail to do our full duty? I do not support programs of preparedness because of some supposed specific enmity nor because of some supposed contingency, not in fear or perturbation, but because I can not conceive of a great nation, with thousands of miles of seacoast and millions of property at the water's edge and an ever-widening influence in commerce, entering upon the future with safety to the Government or to the people without full preparation. I find no better statement of the principle upon which all programs should be built than that announced by that thoroughgoing American, Andrew Jackson:

> It is unquestionably our true interest to cultivate the most friendly understanding with every nation and to avoid by every honorable means the calamities of war. And we shall best attain this object by frankness and sincerity in our foreign intercourse by the prompt and faithful execution of treaties and by justice and impartiality in our conduct to all. But no nation, however desirous of peace, can hope to escape occasional collisions with other powers, and the sauest dictates of policy require that we should place ourselves in a condition to assert our rights if a resort to force should ever become necessary. * * * We shall more certainly preserve peace when it is well understood that we are prepared for war.

Mr. President, militarism has always aroused the fears of free governments, and justly so. Large standing armies have been regarded by them with distrust, and justly so. A body of men organized and set aside and dedicated to military pursuits has been looked upon with disfavor. The result has been that republics have been the least prepared of all governments in the hour of actual peril. In seeking to escape militarism they have suffered incalculably when attacked because unprepared to repel the attack. Unwilling to accept that form of preparedness which ordinarily accompanies absolute governments, we have not as yet worked out or adopted that form which harmonizes with free institutions except possibly in the instance of Switzerland. We have democratized government but have not democratized preparedness.

It would seem self-evident and axiomatic that a self-governing people should be a self-protecting people, that a man who has a right to vote should have the obligation to defend the right to vote.

When it is a well understood and thoroughly accepted principle of democracy that universal service is the obligation which accompanies suffrage, that every man who enjoys the privileges and blessings of free government must prepare himself to defend those privileges and protect those blessings, we shall have found the only true basis of preparedness for a peace-loving and self-respecting, self-protecting republic. When we come thoroughly to understand that every man should fit himself for the duties and obligations of military service and shall understand that these duties and obligations are the complements of citizenship, we shall avoid, on the one hand, the expense and burdens of large standing armies, and on the other the even greater dangers of weakness and unpreparedness in the hour of peril. Democracy should have its own form of preparedness, for it is vain to suppose that even the most peaceful of nations may not be called upon to defend its rights and its honor.

But of all forms of preparedness that of a strong Navy appeals to me most. With a powerful Navy we do not need a large standing Army. It seems, too, that a strong Navy, considing our situation, would not only be safer and more effective in case of war but more calculated to insure peace. I repeat, therefore, what I said in this debate some time ago that I look upon the Navy not only as the first line of the defense but in a large measure as the last line of defense.

It is of the utmost importance in this matter that we be not misled by names or by appearances. We are not seekers of aggression or of controversy, but we have a magnificent heritage; we have much to safeguard and to defend. Any reasonable rule for the protection of such a heritage must necessarily be within the compass and bounds of reason and of wisdom.

We have heard during the last few months, Mr. President, very much concerning the evils of militarism, with all of which I am in accord. We have had recounted to us on other rostrums, and in other places particularly, the evils which flow from such lives as those of Philip, of Alexander, of Cæsar, of Charlemagne, of Cromwell, and of Napoleon, and the enmity of these great men and their principles to civil institutions, and to the peace and the comfort of the human family, with all of which we are all inclined to agree.

But, Mr. President, there is another side to this question. There is a part of the story which no reflecting man can overlook, and that is the evil, the misery, which have come to the human race by reason of the fact that the great, free governments of the earth have almost invariably found themselves unprepared in the hour of attack or of aggression. If we will but pause, sir, and study the history of free institutions and free governments we shall find more to have perished by reason of the failure to prepare and to be ready to meet agression than have perished by reason of militarism from within. The saddest story in the baffling history of the race is that in which well-meaning free governments have loitered and procrastinated in the face of danger, or in which they have in their complacency and ease refused to listen to the warning voice of wisdom.

Of course, Mr. President, I shall not in this heat and haste undertake to recount the experiences of republics in this respect, but I should like to glance at some of those experiences. I should like to recall in briefest time to my friends who believe in free institutions, as we all do, who are known to be sincere and no less patriotic, that other men have also stood in the Halls of Congress and in the parliaments of other nations and have pleaded for peace and for disarmament; and I beg them to remember the evil consequences which followed the adoption of their policy.

When Demosthenes entered public life in Greece he found three evils undermining and sapping the life of his great country. First, the venality or corruption in public life; second, the lack of civic spirit among the masses; and, third, the utter unpreparedness of Athens either in army or navy to meet those who were, to his mind, manifestly aggressors. He devoted his entire life to these great subjects, and it is startlingly interesting even at this hour to see the applicability, the pertinency, of the argument of Demosthenes to his people for preparedness. He plead with the people of Athens to give him a navy; he plead with them to give him an army, not for conquest but for defense. But they saw no enemy in sight; they could not believe that Philip was intending to oppress Greece, and they replied to him it is a burden which we are not willing to assume until there shall be sufficient evidence of the necessity for it. I will read a paragraph from the Fourth Philippic delivered by Demosthenes, not that I would weary my colleagues with ancient history, but because I can in this way best apply certain great principles of reasonable conduct to the affairs of national life and because I believe that conditions in this respect have not very much changed. Human nature was largely then what it is now, and the things which actuated and moved men then will actuate and move men now:

> You, Athenians, have never made the necessary disposition in your affairs or armed yourselves in time, but have ever been led by events. Then when it proves too late to act you lay down your arms. If another incident alarms you, your preparations are once more resumed in general tumult and confusion. But this is not the way to obtain success. * * * When Philip was preparing, you, instead of doing the like and making counter preparations, remained listless, and if anyone spoke a word of warning shouted him down. When you receive news that any place is lost or besieged, then you listen and prepare. But the time to have heard and consulted was when you decline to listen, and the time to act and employ your preparation is now when you are hearing me. Such being your habits, you are the only people who adopt this singular course. Other nations deliberate before action. You deliberate after action.

Even then they had learned to "wait" on events, to look for "physical demonstration" of war; they had passed under the soothing spell of procrastination and tremendously they suffered for it.

In the First Philippic he said:

Yet is there time, O Athenians; yet is there time. Cease to hire your armies, cease to fill your ranks with the offscourings of a planet. Go yourselves and stand in the ranks; and then, dying, you shall die greatly and with a glory that shall surpass the glories of the past, or, victorious, you shall gain a victory that shall exceed all your victories in the past.

But they gave no heed. They were not interested in the advice, and we all know the result. The statesman pleaded in vain. The people turned from matters of public concern and went about their games and their private pursuits. Those who were then the aggressors easily took possession, and the civilization of Athens perished. In the language of Edward Everett, though spoken to a different argument, "Greece pleads with us by the convulsed lips of her poisoned, dying Demosthenes."

Not dissimilar in many respects is the story of Venice, the most advanced of free governments of that era. She was warned that Turkey was planning an attack or an invasion of the Island of Crete and, her wisest advisers believed, an attack upon her entire possessions. But when warned Turkey assured her that she was friendly, and Venice, seeing no enemy in sight, delayed. The Venetian ambassador, Sorance, at the court of Constantinople, warned the Venetian Senate of the impending peril and entreated the senate to prepare. A contemporary student, analyzing the conditions which seemed to be undermining Venice, said:

The Venetian Senate is in time of danger liable to steer a middle course, which is the worst course of all. If two different policies are proposed, one brave and daring and the other timorous and cowardly, the Venetians are apt to follow a policy which is partly brave and partly cowardly, without inquiring whether it is wise, whether it will avert danger.

The result of this unconcern, of this delay, is soon recorded. The fortress of St. Theodore was taken, Cyprus was later invaded, and other portions of her territory continued to be seized, until finally the sovereigns, united into the League of Cambray, invaded and took control of the entire Venetian possessions. I can not believe that these lessons and these instances are wholly uninstructive. I can not believe that we live in an age or in a time when human nature is wholly different or the laws of the survival of the fittest are wholly changed.

Let me intrude upon your patience with one other illustration before I go to more modern instances. William the Silent, when struggling against the tyranny of Spain, using his little principality of Orange, fitted out a few privateers. As the Staatholder of the Netherlands, he set about to construct a great navy, and he did so. This policy was maintained by his immediate successors, and while it was maintained the Netherlands ruled the sea, had colonies in every part of the world, dominated and directed the world's trade, and was the most wealthy, contented, and prosperous power in Europe. I may not trespass upon your patience by reading, as I had intended to do, some excerpts from the fascinating history of Motley, but if you will turn to the concluding chapter of Motley's Netherlands you will read as magnificent a story of true greatness as anywhere to be found. He tells us there were no beggars in the land; that labor was well paid and contented; that prosperity was universal; that while Netherlands' ships sailed every sea and carried cargoes and commodities to every market, while her colonies dotted every part of the earth, there was also the most unquestioned contentment among the people at home. But this policy in 1650 was changed. The whole theory of government which had theretofore prevailed was abandoned. The navy was neglected. The commerce of the Netherlands was soon driven off the sea, depression and stagnation prevailed at home. Her colonies were taken over by other powers, her dominancy of the sea passed to England, and the Netherlands ceased to be a controlling factor in the affairs of men.

Mr. President, in 1812 we had our second conflict with Great Britain. That war was another instance illustrating the disposition of republican governments, of free institutions, to lag in the preparation for danger. We owe as much for our success and for the final triumph of our arms in 1812 to the French as we did for our success in 1776 to the same great nation. When we reflect upon the disasters which followed one upon another of our army, the fact that our Capitol was in the hands of the enemy and burned, the reason is apparent when we remember that with the breaking out of the War of 1812 we had just 6,744 men in our army to defend the most magnificent heritage ever left to free men! But, fortunately for us, the conditions across the water served well our cause. In July, 1812, Napoleon started upon his march for Moscow.

In September, 1812, the Russians burned Moscow and fled. Then began the retreat of Napoleon, which was really the end of his career; for, as said by Ingersoll, "the infantry of the snow and the cavalry of the wild blast" accomplished what the combined armies of Europe could not accomplish. Driven back upon Paris, the nations upon which he had placed his domination arose against him; his forces became demoralized; then followed Dresden and Leipsic and Fontainebleau and Elba and the escape, the recapture of an empire, and then Waterloo. During these days, in which we were relying on our little Army and our little but brilliant Navy, all the resources, all the energy, all the financial power, and all the fighting power of England were engaged in her death grip with the plans and ambitions of the greatest captain of modern warfare. What would have been the result in this country had England been permitted to turn toward this shore and upon our 6,744 men and our little Navy and our State militia the embattled hosts of Trafalgar and the conquering armies of Waterloo?

Weakness is indeed a source of war. I am in favor of a great navy, sir, of a strong navy, not because I believe less than my brothers in peace, but because I believe it is an assurance of peace, and I know, if peace can not be had, it is essential to our safety. I would rather pay a few dollars for safety, for insurance, than thousands in misery and in sacrifice. I would rather advertise to the nations of the earth that, peace loving as we are, we realize the responsibilities of a great free people and propose to defend our rights than to invite aggression by indifference to and a disregard of our rights. I would rather in the days of peace act in foresight and wisdom than when war comes act in confusion and with infinite sacrifice.

But perhaps the most remarkable incident I can bring to your attention finds its record in the recorded events which took place only a few months before the great war. In 1900 Lord Salisbury made a notable address to the English people. He outlined the dangers which were confronting the English people by reason of the constant commercial growth and aggrandizement of Germany.

He advised his people that that was the hour in which to prepare; that, according to his view as a reader of public events, the time must shortly come when those two nations could not remain on such friendly terms. But time passed on and his word passed unheeded. Lord Roberts also entered into this field and plead with the English people to prepare against the day which he foretold with remarkable accuracy; but his words passed unheeded. The men engaged in the politics of England seemed unwilling to meet the situation and deal openly and candidly with these unpalatable truths. They adopted the policy "wait and see," and they waited and they have been permitted to see.

I want to read now a paragraph or two from a book which was written about two years before this conflict began. The learned author, a student of history, holding his chair then in one of the great educational institutions of England, after giving most thorough study to the history and the ambitions of these two nations, advised his people to prepare for the time when they would meet in deadly conflict. This is from Prof. Cramb's book entitled "Germany and England":

Germany will never sincerely cease arming. If England builds on the dream of Germany acquiescent, she is destined to a bloody and terrible awakening.

We all recall the asseverations of friendship passing between these powers at this time. We recall with what complacency statesmen surveyed the future and how they calmed the fears which alarmists would arouse and stilled the questionings which radicals, so called, would excite. It was about this time, or even later, that well-meaning men in this country advised us that the world would never again see a great war. Yet the volcanic heat was so near the surface that it almost burned the feet of the inhabitants.

And here let me say, with regard to Germany, that of all England's enemies she is by far the greatest; and by "greatest" I mean not merely magnitude, not her millions of soldiers, her millions of inhabitants; I mean grandeur of soul. She is the greatest and most heroic enemy—if she *is* our enemy—

Which no one at that time in England believed—

that England, in the thousand years of her history, has ever confronted.

Mr. President, this has something of the coolness of tone and the authenticity of statement of the old Hebrew prophets. It is to-day found in verity upon a hundred battle fields and it is recorded in almost every family Bible in England. She was not only the greatest, the most powerful enemy of England, but she was the enemy of England; that is to say, the interests and the ambitions of these two peoples were heading for a fearful conflict. And to-day England is gathering her strength for the first time, after months and months of preparation and discipline, to meet the situation against which she was advised and warned long before the conflict came. What would she not have given many times in these last months to have acted sooner?

I read another paragraph from page 104:

And here a law, obvious, universal, and inevitable in its application, discloses itself. It concerns the struggle for power. Amongst free, independent nations weakness means war, and the empire which is not prepared to defend itself by forces proportionate to the magnitude of that empire must fall.

What historian in this Chamber, looking back over the records of history, will dispute that fact? How often has it been legibly written for the instruction of us all! Weakness means aggression; weakness means war; and in proportion to the magnificent estate which you hold you must prepare to reckon with that rule.

Again, at page 130:

There the question lies, and it is a difficult question—more difficult for a German than for an Englishman. To talk about "friendly rivalry" is no answer. I never can understand what meaning that kind of talk has—"friendly rivalry," "generous emulation," and the image of racers on a race course. Even if such a thing were possible or thinkable among nations—and there is no example in history of any such "friendly rivalry," of any such "generous emulation"—but even if it were possible, what is to be the state of mind of a young and ardent German at the present day who feels within his nation very nearly an unlimited power, and who sees only one great adversary, one great obstacle, between him and the realization of the world ideal of his race? There are tens of thousands of such young Germans. What are you or I to think of them if they sit still and fold their hands in "friendly rivalry," in "generous emulation" of England, a power which is described to them by their leaders and thinkers as already tottering to its grave. What other spirit is to arise within them than the spirit which I have indicated in these lectures?

I have lived amongst Germans and know something of the temper of Germany's manhood and of her youth. I have read much in her history and in her literature. I have been impressed, as with the motion of tides and of great rivers, by the majesty of that movement by which, from the days of the Saxon and the Hohenstaufen Emperors, through centuries of feudal anarchy and disintegration made still more disintegrated by the convulsive forces of the fiercest religious strife, she has attained to her position to-day; and with the best will in the world I can see no issue to the present collision of ideals but a tragic issue. England, indeed, desires peace; England, indeed, it is certain, will never make war upon Germany; but how is the youth of Germany, the youth of that nation, great in arts as in war, to acquiesce in the world predominance of England? With what thoughts are they to read the history and the literature of their country? If, from love of peace or dread of war, Germany submits, it would seem as if her great soldiers had fought in vain, as if the long roll of her battles had passed like an empty sound, as if the Great Elector and Frederick, Stein, and Scharnhorst and Bismarck had schemed in vain, as if her thinkers had thought their thoughts and her poets had dreamed their dreams not less in vain. But if, on the other hand, Germany has not declined from her ancient valor the issue is certain, and a speedy issue. "It is war."

At the time this book was written, as I have said, there were the friendliest relations, apparently, between these two powers. But the student of history, the vigilant and remorseless dissector of passing events, realized that the contention between them was that of commercial supremacy, that the conflict was inevitable, and he advised his countrymen to that effect in language which now sounds as if it had been spoken not before the war but after the war, so veritable seems it all.

We can not ignore the situation that confronts us to-day. Let us put aside all this idea of any particular nation planning an attack upon the United States. Let us dispense with the theory that there is anywhere lurking an intention to specifically intrude upon us. I am willing to concede all these things. But can we ignore the growth of nations, the growth of nationalism, the intense spirit of nationality, the growth and the commercial ambitions of nations? If not, can we ignore the iron rule of history that weakness means war?

Mr. President, we are told in this debate that we are at peace, and that there is less danger of war now than at any time during the last 50 years. Yes; we are at peace; we have not sought war, and we do not propose to seek war. But look about us. We have had some 200 of our citizens drowned at sea and from 500 to a thousand assassinated and murdered on land. We have had millions of property seized at sea and billions of property destroyed on land. We have seen the open door, supposedly well guarded by our treaties and by our honor, closed in the Orient, and we now watch the process while the door which has been closed is being bolted. No; we have not offended, but we have suffered incalculable loss in honor and in property. Weakness is an invitation to aggression, weakness is an invitation to war. As a people and as a Nation, we can not escape our responsibility.

Mr. President, there is little room after all for the play of selfishness, for the successful practice of complacency in a true democracy. Every hour is burdened with its obligations and every deed worthy to be recorded involves some sacrifice for our fellows. "The Lord said unto Cain, where is Abel, thy brother, and he said I know not; am I my brother's keeper?" I am my brother's keeper. It may sometimes mean sacrifice, nevertheless, in government and in morals, I am my brother's keeper. Upon that principle this Republic was organized. That obligation was built and mortised into every portion of the structure of government under which more than a century and a quarter ago we started to work out our salvation as a people. What symmetry, what strength, what commanding power it has given to that government all men know. Take it away, abandon it, and the whole splendid fabric, crumbling, falls. Without it the traditions we have so long cherished and consulted become false and misleading and the great charter under which we have lived and strengthened becomes a solemn and stately falsehood. Without it the achievements of American history lose their inspiration and the great names in our story grow dim and meaningless. Without it all is purposeless and the law of life is that of selfishness and brute force. You can no more give it up, abandon it, and remain a Republic, a united and civilized community, than you can blot religion from the thoughts of men and escape the degradation of brutes. It is a part, an inherent, a vital part, of our national purposes and ideals, and the ideals of a nation are not to be sacrificed because timid and complacent souls fail to grasp the great truth of history that men must sometimes suffer and martyrdom sometimes obtain that civilization may not perish. In the midst of this tremendous war which threatens to engulf the whole world in moral anarchy and challenges the logic of 19 centuries of Christian civilization, let us not lose our way, as we are apt to do, by compromising, by shirking our responsibility, by seeking to escape through the bypaths and side arches of expediency or policy. Let us take the highway of honor and right, the broad, open way of justice and courage over which our fathers trod, even in the hour of adversity, and never leave it. Let us declare once and for all as a national policy that we will shirk not at all from the responsibility of guarding and protecting our own, whether by land or by sea. Let us declare that while we love peace and covet the respect and friendship of all nations, that even these blessings are not to be purchased at the price of the dignity and the security of American citizens. And so declaring and so believing these things, let us make ready as a great people to meet the obligations which rest upon us as a Government and as a Nation.

Mr. LEWIS. Mr. President, I am moved to address the Senate at this moment because of expressions set forth by the eminent Senator from Idaho [Mr. BORAH]. I have not always been able to agree with him. Our personal association has been entwined through 20 years, since the youth of life's manhood, in the West. Our combats in the forum of the law and that of politics did not begin here. For his patriotism I have ever held regard, and to his ability I have ever found it agreeable to pay testimonial. To-day we are in accord as to the object sought. Our reasons for action toward a common end may vary.

Mr. President, when I listened to the Senator who comes from the great West, I could not but contemplate for a moment how much the land from whence he comes needs the education of his splendid teaching; how little, sir, the land from whence I come—the Middle West—and the State that I now have the honor to serve realize the real conditions of danger which surround this Republic. Here we can confess how the public representatives are scoffed for every utterance they give in behalf of preparation for dangers threatening their country. How they are scorned and condemned for every undertaking they enter upon for the military defense of their Nation. Let us remember how they are held up as unworthy of credit when they sound the alarm, and charged as having purposes ulterior and serving designs ignoble and debasing.

Sir, let it be now understood—as from me, at least, one Member of this distinguished body—that the only way you will ever get the American people to give their support to measures essential to the military defense of this Republic is to let them know what are the real dangers which surround this country. The only way you will ever bring the citizenship of America to give support to officials who seek to serve in providing defense, because of the lights they have, is to stop this policy of disguise, this practice of masking the real situation that the Republic is in, and tell frankly and freely to your countrymen the exact situation of the Republic. Go speak it to all—to the humblest plowman that balances his curved blade through the rolling furrow, as well as to the learned professor who writes treatises in the quiet cloister of the scholar, such as was read to-day by my eminent friend from Idaho. With them all let us be frank, and speak to them of the things that we feel justify the tax which we are now on the eve of laying upon them.

Rest assured, Mr. President, you can never get people to indorse a levy upon their property, accept a tax upon their wealth, approve the taking of their earnings, until you shall present to them evidences which justify the act. It is not sufficient that we shall be content to appeal to men by the abstract thing called patriotism.

You may address a man as a patriot, and he may feel that he is one; but most men who raise a voice against anything that is a change from what was, call themselves patriots. There are those who justify opposition to anything affecting their personal interest as patriotism. Thus it was that Robert Walpole said:

Patriots? I can make a dozen of them in an hour by merely denying their wishes.

Therefore, Mr. President, that we may appeal to the real patriotism of our people it is necessary to let them see what are the things that shall bring that patriotism into an obedience to the legislative demand such as is expressed in this naval bill. I am a member of the committee which prepared this bill. I know the burdens it carries. I ask the able statesman from Idaho what reasons will he give to Idaho, which trusts him, for presenting to this body his support of this measure, carrying millions upon millions of money, to be gotten by taxation? Shall it be sufficient that you shall say to them: "Behold, in ancient days there were those who cried for protection, but were mocked, and I therefore call upon you to beware?" Shall we say to them, in the language of the ancient law, "Remove not the ancient landmarks that thy fathers have set"—these were the rocks of defense? They will cry out in reply: "For what purpose do you ask us still to steer to these landmarks and also ask us to chart new seas? Why do you put upon America a change of the course of a century? She was ever for peace, not war; she was for the plow, not the spear. Why do you reverse her attitude fixed in history and establish in the morning of the twentieth century in this, the first free Republic of the earth, the fortresses of militarism on land and the fleet of iron-sheathed engines of death on water?"

Shall it be sufficient to reply, saying "Because we have the power"? Shall it serve to say it is because of patriotism you have that we enter upon the undertaking? No. There must come more feasible reason for these things or we will defeat the undertaking.

Mr. President, I charge this distinguished body that it will not avail that you only pass this bill. And to you, the chairman of the Military Committee, Mr. CHAMBERLAIN, I say, nor that we pass your bill and send them both to the country, if the country will not believe in their necessity and justify their object. There will arise revolt from those who are affected by them, and for want of reasons that justify they will rise up at the next election to protest against these measures, and there will stand here in our place in this body and in the House of Representatives, new men pledged to defeat these measures, to repeal them for the mere reason that nothing had been shown to justify them, and everything from their conviction against "militarism," to condemn them.

What avail will it be to us to pass a bill wherein we establish the splendid equipment of a navy such as is prescribed in this measure or that of an army as is provided in the Army bill if the very next body to be elected at this coming election shall receive instructions from the constituencies to dissent and protest against the measures and repeal them? They will have hardly started on their course until they have ended.

Then confusion would follow and a season of defenselessness would result. The Senator from Idaho read from two speeches of Demosthenes, protesting against his country refusing to prepare against invasion. May I invite attention to another speech of that distinguished orator? Not only did Demosthenes remind his people that there had been no preparation against the anticipated advance from Philip, but likewise told them of the reasons why they trooped to the cities from the farms, crying out their resentment against the Government in power. Said he, upon the first threat of invasion, that—

You are unlearned as to the danger it means. You will not know because there are those in your midst who will not speak bravely. You are being soothed to confidence in yourselves because of the cowardice of your masters—

He continued:

That you will not follow my advice is because those in power who counsel you wrong against your country.

For this it is recalled he was held to be an enemy of the State. This quotation was brought against him when he was on trial to prove that he was an enemy of the State; the record of that speech was produced as an evidence that he should be exiled from the community, and by a vote of the shells to be ostracized and sent forth as one who was polluting the Athenians with creeds of enmity to men.

How true, may I say to the able Senators about me, that such season of condemnation is duplicated the very hour around us. Mr. President, now when a man rises in public life to speak of the evils threatening his country as he sees them approaching from afar, there are those who attack him as an alarmist, others impugn the motive of his undertaking, and he becomes the subject of the scorn of those who busy themselves with that form of assault that they may hold his utterances up to the contempt of the intelligent.

Then, sir, I admonish this distinguished body that as long as you leave your record where you have it this day, with nothing before your country but the mere declaration for $850,000,000 in toto, all to be taxed from the people for an increase in army, to reconstruct anew an enlarged navy, establish fortifications on your coasts, equip the National Guard and convert it into a Federal standing army, and yet give to your countrymen no reason for the departure that they can adopt and none they can understand, there is no security that the policy we write will remain; there is no assurance that if it is not justified by the believed dangers it will be continued. We do a fruitless task; we perform a useless act. Then, sir, let us be frank to ourselves, and to our country let us be true.

What are the dangers? Sir, the same evils which had wrought destruction upon Governments before ours was founded will be found, sir, to exercise the same influences upon ours. Human beings have not been changed. Mankind is still the product of his creation. He is but of the human kind since he began to dot the earth under the blossoming influence of the sun. "That which was yesterday will be to-day—and all the tomorrows of man are as the yesterdays of his fathers." The motives that inspired him, the hatreds that embittered him, the influences that controlled him in the days long past, of which we speak as the Dark Ages, the hour of unrecorded antiquity; these are the same as those which invest and control him this hour. He is but a man.

Mr. President, the conditions of this hour, as I behold them, more completely repeat the theater of action as portrayed in ancient times than at any time which history has recorded, so far as my memory can revive. All the Old World is at war. Twelve nations and five dependent lands are in battle, each for life of self or death of the other. Senators, do you reflect that this great strife in Europe has forced into conflict more men in one year than were engaged in all the wars combined in all the years from the time of William the Conqueror to Waterloo; more than all the men and forces that were engaged in the world wars from the time of Yorktown, where Cornwallis surrendered to Washington, to Appomattox, where Lee yielded to Grant?

Will it be then contended that it is unusual for a Government like our own, founded in peace, christened in justice, to have hoped that the creed of Christianity—peace on earth, good will to men—by which it lives, would survive? With the world at peace for generations, with no such startling spectacle which now blears the sight to have awakened their fear and aroused their suspicion, naturally the people of such government would feel that that which had continued for so long among men would continue and would persist for their children.

But, sir, the change came. Why? Mr. President, in this body of intelligent and able men, shall it be given out to our countrymen that we feel that the conflict in Europe has been inspired by the spirit of patriotism? Was there any great moral law as the mainspring for that encounter? No. Was there any policy of the ancient Bible to be enforced? Was there a crusader who was leading to the Holy Land or summoning his sanctified followers to rescue some holy grail? Truth responds, No; not one of such.

With great respect to the people who are guiding that conflict on every side of it, we are compelled here to certify that there is no evidence of any motive which moved it as would call for any liberty-preserving patriot to cry "Well done," nor to give praise in the name of One who loved freedom for man and dedicated His life to justice for people. To all of them shall we not say, "Ye come red with splashed blood to filch gold"?

Mr. President, at periods on earth the world seems to swing upon its material axes and turn anew in an opposite course from that which before it seemed to have moved. But, sir, investigation will always disclose that there are reason for the revolution. The reasons for the past are the reasons of the present. The selfish pursuit of man for aggrandizement of self, the enlargement of his sphere, the multiplication of his riches, the increase of his own importance by his increased power, and the demand for supremacy are the things which man seeks for himself or his country. For these at stated times man fights, and with him falls or rises anew his country.

Mr. President, history recalls that at the battle of Arbela, when the master of the Greeks, Alexander, met Darius leading the Persians it was a contest then, sir, whether the men of Darius and the force under Alexander would settle forever whether the world should move eastward or westward. At the close of the contest the Persians were defeated. The

Greeks became then the directors of the new movement of the Old World. From the Byzantine Empire down, sir, to the country of the Gauls all seemed suddenly to pass from longer being recognized as governmental influences in the destinies of men. From that time on to a certain period in history designated as the Reformation the great East ceased in the world to be the dominating power. Persia passed to ancient history, Egypt into scriptural adage, Greece into classic glory, and then the material world moved under new guidance—it was commerce! England became established on trade, France revived anew under Charlemagne the mistress of arts, Germany under the Ger-men (war-men) assumed their existence for the first time as civilized peoples of commerce from what they were previously called by their foes—barbarians.

Then the New World was new founded upon the basis of commercial prowess maintained by martial power. Neither constitution of government as we know it now nor freedom for man as we feel it now was known to those who were engaged in that conflict. The supremacy of their commercial power, the aggrandizement of their private riches, the multiplication of their national possessions—these were the dominant and inspiring impulses which moved them forward. By this spirit of gain, enrichment, advance in material power they survived to their destiny.

Mr. President, how stands America to-day? We are reminded that Napoleon told his countrymen that the world would either be republican or Cossack. In my judgment, Senators, viewing through the glass of history and noting now the march of new events, I am compelled to say that I behold my America for the future either to be all American or Asiatic. I can not accept the thought that America can be part Asiatic without recognizing at the very moment that the influence once ingrafted will grow until the whole American system is infused with the disease of that which makes certain oriental systems so obnoxious to American civilization.

Let us reflect upon the theory upon which we are moving. Let us see what are the troubles in America and why the chairman of the Naval Committee, the eminent Senator from South Carolina [Mr. TILLMAN], the distinguished chairman of the Military Committee, the Senator from Oregon [Mr. CHAMBERLAIN], are justified, with the splendid following behind them, in presenting these bills carrying this innovation of power to enforce peace for our free Republic.

It is true that the able Senator from Idaho says all forms of militarism have received condemnation from those who either realized the danger or those who fancied ills flowing from such possibility. Henry Clay denounced Andrew Jackson on the floor of the Senate. Jackson was endeavoring then to prepare to avoid the repetition of the very evil of 1812 and 1814 to which the able Senator alluded. Gen. Grant, when seeking to revive this Republic to a consciousness of military weakness and to reestablish itself upon American lines of national defense, was condemned by Charles Sumner on the floor of the United States Senate as lacking both in wisdom and in patriotism. Benton, of Missouri, occupying his splendid place on the floor of the Senate, turned his maledictions against two of the powerful Senators who then came from the South because he believed that they were then giving support to the theory of an unnecessary Army and the unjustified expansion of the Navy. Sirs, ever we are the creatures of our fears and the victims of our dreams. Self-satisfaction and opposition to change of status is "the stuff that dreams are made on." Benton of the West, Sumner of the East, in their opposition struck the very pulse and artery of the complaint which beats against us in this hour. Senators, it is necessary that you justify the expense and prove the necessity for your adventure into this field of "preparation." If you can not justify before your countrymen, the party that put the measures into law will be repudiated, and the men who voted it will be put out of public life. All because of want of information—because of ignorance of the truth of the situation our country stands in before the world.

Then, sir, let me be bold enough to say we began creating difficulties when we began to advance in competition with the world. When this Nation advanced toward the Orient she was compelled there to collide with nations which had remained stationary and with others which were moving in from Europe to govern and control, and which we had dealt with as alone entitled to that sphere, particularly since we had denied them this.

Remember, sir, that when we went to the Philippine Islands and established ourselves in government—whatever the reason we need not now discuss—it was impossible then to avoid Asia demanding the reciprocity of coming into America when America had gone into Asia. We contemplate at this moment—1898—contemporaneous with our occupying the Philippines, America had moved into the main Orient, and we had engaged with a European banking syndicate to participate, together with certain English interests, in the construction of railroads in China from Canton to Hankow. This was explained to be for the benefit of interests which were "to the welfare of the Orient." Naturally we awakened from these oriental people their opposition, and when we declined to let their people come into our country upon equal terms with our own and engage in land investments we augmented the opposition and intensified the hostility.

Yet we never would speak frankly to our people of the facts nor tell them what these complications meant. We never would explain to them that no nation that ever lived ever endured the indignity of having its people humiliated by being discriminated against without resenting it, whenever powerful enough to do so. Sir, it was the case of Egypt, familiar to scholars about me, when she penalized the Hebrews by imprisonment into slavery, remembering the days the Israellte spurned the Egyptian from his land as "the Ethiop." It was the final vengeance upon the Greeks which Rome eventually put into execution by absorbing Greece in revenge of the day when the Greek asserted himself as superior and slurred the Roman as a slave, forbidding him entrance save by back gates and denied him "citizenship."

Who shall now ignore that Germany in this hour is still recalling when the Angles, which we speak of as England, referred to her people as barbarians and as unworthy of the association of mankind? Year by year they have groaned under what they felt was the increasing insult to the descendants, and have increased their power to where they now resent the long-aged affronts—as the "ancient grudge they bear." At this very hour Belgium, the Marne, and Verdun speak the German resentment in the experience of that which history has recorded to every nation spurned. How true it is with nations, as with men that—

> Time at last sets all things even—
> If we do but watch the hour,
> There never yet was human power
> Which could evade, if unforgiven,
> The patient search and vigil long
> Of him who treasures up a wrong.

Sir, shall we take the course that nations have taken to their downfall and make no preparation to oppose the results that have ever followed such experiments? Has American judgment flown to brutish beasts? Have American men lost their reason?

Sir, when America went into the world to assert her dominance—to establish her supremacy—then America began her course toward her new destiny of conflicts. This we did in the hour of that weakness which the Senator well described means war. Sir, no nation with a grievance against another will fail to be on the outlook for the hour when it can wreak vengeance for the wrong, as well as to justify itself in power in the land where it resides.

Then, Mr. President, came the hour of the demand of America for commercial advantage. We moved out farther when in the possession of the Philippines, and demanded such recognition under the Japanese that they were compelled to ask in return favors and privileges—concessions, I may say—on the part of America. These as asked could not be yielded because of the peculiar interests of our American people. We there, in denial of Japan's demands, had again multiplied grievances with the Orient. Japan in these requests for equality in America spoke also for China. Senators, then came the hour when the Orient realized that there must be some commanding power within that continent. Japan saw her opportunity, her natural hour. Japan had her war with China. China had gone down in the conflict. Japan had been forced to relinquish the fruits of her victory under the pressure of France, Russia, and Germany, Germany as the controlling influence. That Japan would long carry within her memory the wrong that she felt Germany had done her is but natural, and her opposition to Germany later was the natural course of Governments. Sir, in the meantime Japan grew and expanded, she increased her navy, she enlarged her army, she moved out to Korea, she took Sakhalien: she possessed herself of Formosa; and she then became the possessor of territory large enough to allow her people to expand to the limit she felt necessary. Japan fascinated civilization with the evidence of her power and originality. She is the just pride of every historian and to be praised as a marvel of achievement.

Then came the demand upon America for the privilege of coming over into our land as we had gone into the Orient. This claim was pending when, as you will recall, sir, came her conflict with Russia. Russia had been moving down toward Manchuria. Japan realized that as Russia moved farther and possessed part of China, she would be in the sphere of middle Asia, the land of the Mongols. That she would be in possession of the heart of Asia. Japan felt herself unable to stand against

that invasion and defend herself against the advance unless she struck early.

Russia, with her millions upon millions, would move farther and farther east, fulfilling the prophecy of Napoleon, making the country all Cossack. Japan turned essentially to defend herself against the advance and prepared to meet the invaders. The result of that conflict is familiar to you all. The United States stepped in, and in some form of interposition prohibited Japan from enjoying the full fruits of her victory, as it likewise defeated the hopes of Russia and forced the treaty of Portsmouth. We left both nations, therefore, our enemy; we left both nations our foe. We then ruptured the treaty we had with Russia, and we left her in a position where she was held up before the world as humiliated by the United States. She likewise carries her grievance against us anew as she had carried it before and holds it now.

Mr. President, let us be perfectly open with our countrymen, and call to their attention that when Japan had made her treaty and alliance with England and with France and with Russia to aid them in the present conflict against Germany, and drove Germany out of the Orient, the real purpose of Japan was to begin the policy of the creation of an Orient for the orientals. England will be called on to go. She knows it. She yields to Japan's treaty demands now, as a makeshift for time. Will anyone here fancy that Japan will not likewise see the necessity of enforcing against America the same rule she has enforced against Germany, and this at the very first available moment and for the grievances which she feels she has endured at the hands of us, who have visited upon her what she esteems to be a humiliating discrimination against her citizens?

Has she not added grievance in the resolution we passed in this Senate as late as July, 1913, prohibiting a Japanese commercial house ownership in Magdalena Bay in Mexico? This under our Monroe doctrine.

Mr. President, if the hour shall come when Japan, feeling her weight and power sufficient to resent the wrongs which she feels we have done her by coming into the Orient while we prevent her from coming into the Occident, and should seize the Philippine Islands of America lying at her door, she would but execute the very policy we carried out against Spain, when in our conflict with her we did not go to Barcelona or Cadiz, but we seized the Cubas at our door and told Spain to come and get them. Will we fancy Japan less wise than ourselves or less preserving of its interest as we preserved ours? Then, sir, if we without a navy of such prodigious strength that it could defend us against the hour of humiliation, how would America be able to go to the Philippine Islands and rescue them from the invader and wrest them from those who had invested them? How could we protect Hawaii or Guam from the same power once it had undertaken the course of its natural resentment? Sir, we must prepare to reap where we have sowed. We can not retreat from a just advance necessary to the welfare of our country merely because it threatens inconvenience, nor can we surrender our rights in the world because the enforcement may bring dangers to us. Our course is forward—for America, for humanity.

Sirs, when the world war has come to a close the European nations will seek footing in South America—South America desiring the immigration—and the aid will concede land and spheres of territory to these different lands of the Old World. America must object under her Monroe doctrine and prevent this invasion by Europe of the Western Hemisphere. Let it be now understood that the Monroe doctrine is no stronger than our power to enforce it. We can only execute it against the navies of Europe by an American Navy prepared to execute the will of the American people.

Now, sir, will any man who sits in the Senate venture for a moment to assume that Japan in any hour of conflict with the United States—for her own cause and that of China—will not call upon her European allies, reminding England, France, and Russia that as she was faithful to these in the hour of their travail with Germany she demands England, France, and Russia shall come to her aid in any conflict against the United States? What other course could these countries take but to comply, or Japan and China combined would drive England and France out of the Orient at once, as she did Germany? While any of the European allies in any conflict with us over the Monroe doctrine would call upon their Asiatic allies, Japan and Russia. Sir, I tendered a resolution a few days ago having for its object the investigation by this Government of the extent to which the new compact between Russia and Japan went, looking to the exclusion of the United States and to establishing a monopoly on the part of these two Governments of all the privileges of the Orient. Mr. President, since then there has come expressions from certain officials professing to represent these Governments, setting forth that this particular treaty between Japan and Russia in nowise differs from that which was negotiated between Japan and England, that it was "a mere repetition of the clauses contained in the treaties of 1907." This morning's papers bring to you the statement of the representative of the Russian Government, while yesterday morning's papers brought to you that of the Japanese.

Senators, did you notice, as a matter of history, that in the very week when the treaty or the trade arrangement between France and England was consummated looking to creating a territorial trade monopoly zone of their own for Europe that in that very same week their allies, Japan and Russia, likewise consummated a similar arrangement in the zone of Asia within exactly three days' time? Yet they are on opposite sides of the world. How this discloses an understanding as to the future disposition of the United States all will admit.

But now I invite you, Senators, to notice that in article 2 of the Anglo-Japanese treaty the words are "that these nations shall come to the aid of each other whenever any special interest of either is assailed." I invite your attention, Senators, to the fact that previously the words used in the treaties were "general welfare" or "common interests." What is the meaning of these new clauses, heretofore without definition in parliamentary and traditional diplomacy, by which the expression is "*special interests*"?

Then, why this navy, why that army, if it be not to protect ourselves when the "special interests" of Asia will mean that Asia shall dominate to the injury of America and that the "special interests" shall be the preserving to itself of the oriental sphere for trade privileges as a special interest and for the enjoyment by oriental citizens in all the world—especially in America—of equal citizenship with American citizens? Naturally we must confess that the "special interest" shall be its interest in having its people recognized in America as they are in England, in France, and in Russia, with the right to come and go at will and at pleasure. What "special interest" is that of Russia? It is that Russia shall enjoy the trade of the Orient, dividing in China the privileges to be enjoyed by Japan, omitting America when necessary. Then, Senators, if America shall ask that the arrangement made in 1899 by the United States, through the State Department of this Government, looking to the maintenance or the continuance of the policy toward America as had previously existed between England and the Orient—giving America equal opportunities of trade and commerce in Asia—we must be prepared to back up the demand for just rights by the only way modern nations now recognize.

Sir, America must be of the world, and of the commerce of the world, and demand that the United States shall send its cotton goods to China, build railroads in the Orient, send its manufactured goods to Asia. If the reply to your demand shall come back to you that it is neither within your right nor your privilege, what shall be your course? Do you feel that the United States can, under these particular treaties and their very language, surrender? Shall we become a humiliating spectacle before the world? Shall America behold Germany growing powerful by virtue of her splendid science and efficiency, notwithstanding the awful strain of the unparalleled war, and England grow rich and affluent both in the field of trade, where America by virtue of her superiority, had she the opportunity, would long have excelled? Shall she behold France in Cochin China and throughout the Orient rise to that eminence which her industries and science would justify, while all America, through the trade treaties of specific exclusion shall be eliminated? Then, if you are not to be eliminated, how shall you be preserved?

Senators, it may not sit well upon our constituents to hear from us that without the advance of trade there is no advance of liberty; that without the growth of commerce there is no growth of freedom; but these are established governmental truths. Mr. President, no government can be stifled within its own bounds without withering. No government can be pent up within narrow confines without dying.

Sir, for a while we were a new Republic, with a widening waste of land to the west that has been a sufficient market house for all our products for a hundred years. This will not in future suffice, when, with the growing millions of our Republic, the filling up of the land with homes, we are moving out in our superiority to give to our Nation her "place in the sun," to give to our people their privileges before the world. We can only do that by presenting to those who would prevent us an exhibition of power sufficient to compel our rights. If our opponents shall observe that we are lacking in the same instru-

mentalities by which they enforce their demands, they will take such absence as the evidence of weakness upon our part, and prepare, as they have been prepared, to assail us where we are defenseless. Finding us powerless, they will leave us helpless; our fate will be to bemoan the day of our humiliation before the world, as we will shame our children before men.

Mr. President, we need not fear the prophesied evils of a military establishment. This can never be a military nation. Let no man indulge that specter to present us as a frightening aspect to the young generation. This Nation grows by the ballot. It lives upon the popular will. The inherent right to undo to-day that which was done yesterday is the assured protection on the part of every American against the action of any ruler. There neither can be the militarism of Napoleon, on the one hand, nor the imperialism of Cæsar on the other in America.

The very provisions of guardianship surrounding this Republic give to the citizen the power which no citizen had in those governments which were converted to militarism and by that to the destruction of liberty.

It is because of that security of a free government in the hands of free men, who exercise a free ballot, that there is that security against militarism which has frightened and looked ominous to those who should have been more reflective as to the conditions surrounding their Republic—the dangers encompassing her. Sirs, America seeks not a European militarism, but an American protection; not an Army and Navy for assault or aggression in foreign lands but one sufficient to defend us against assault and aggression upon our land.

Sir, one truth must be expressed, and to my eminent friend, the able Senator from Idaho [Mr. BORAH], I voice it, as I do here in the presence of the Senate—why not tell it to our countrymen—that America has not one friend in all the nations of the world. If to-morrow she should become involved in conflict, there is not one nation on the earth from which she could feel the right nor could enjoy the hope of aid and assistance. She stands alone from every point of view, an island now between seas and a people surrounded by their opponents. We have severed all friendly union to preserve our point of right. Shall we now go unarmed, conscious that there lurks in every field of commerce, in every highway of civilization, enemies who would not only assault the Republic, but leave its children without liberty or hope? Their feeling against the Republic of America has been incited, first in jealousy, then in envy, now in hatred, and shall we disguise from our countrymen the truth? This is the state of the Republic. Heaven grant that soon in renewed peace and concord we can reestablish ourselves with the world in friendship and brotherhood.

Sirs, therefore to-day to our fellow Americans we point out to them the dangers, we give them the reasons why we are imposing upon them a burden of military debt the like of which the Republic never knew and the like of which the fathers of the Republic prayed to their God should never be established in these United States. If these prayers are all to be unheeded, if past theories are all to fade, if these hopes are all to die, then let us go to our countrymen with the reasons we have for the new course of their country. They will justify us. If they will not, then we should be repudiated, for no public representative of this country has a right, in defiance of its citizenship, to place any theory of government or any power upon a nation contrary to the will of its people. Yet, rest assured, Senators, you will never get your countrymen to indorse this program either of military or naval advancement until you speak the truth, telling them of your dangers. Here it is we let them know that we, too, are surrounded with conditions which at any hour may break upon us in this universal storm that thunders about our head and lights our skies with the fires of desolation.

Tell them the truth, let them know how stands the Republic of America, that we may move forward, because we must. That we move eastward because it is our right, and that we can not endure to have it said that we shall be pent up and pinned down by those who are our rivals and to be denied equal opportunities in the world. Tell our countrymen that we are this day preparing for America to assert the right of the American in any land where he is at peace and within his rights. That this day we are becoming armed to assail no man or country, but to maintain the honor of the American country in any zone in the world where it shall be wrongfully assailed.

By this example, by this lesson, we will protect ourselves. We will need no further object lesson. The example will suffice because of the undertaking made necessary by the conditions of the Republic. On the Atlantic, on the Pacific, from the north or the south, threat may come, sir, aggregated from all in one, and make show of conflict against the Republic. When it comes all will behold we are prepared. We will feel within ourselves that we have become prepared. Women and children will sleep in peace. Men will feel secure. Patriots will recognize that their country is again put upon a level with every country in the world, in power, for the maintenance of right, the enjoyment of justice. The nobility and grandeur of our just Republic will stand out as an example to all the earth, reminding them that we stand for justice to all, but for all rights to ourselves, willing to give all rights due to others, but ready to maintain our rights against all others for ourselves. The sword of justice by the side of the Book of Christ in this our America shall stand as the emblem of our country, reminding the world that we seek to oppress none, we seek freedom to all, but we will endure wrong from none, nor oppression from any. That it is justice to man and liberty to nations for which America was sent to earth and which, under the guidance of God, she will perpetuate through the ages to come. Sir, to every demand asking reason of our new course our reply is, This is America.

Mr. GALLINGER. Mr. President, I am in favor of the bill in its essential particulars, and will follow the committee in its recommendations. I believe in having our country prepared for all possible emergencies. But in voting for this bill, and in voting for the Army bill, I do not do so because I believe that the doleful picture that has just been painted—that every nation of the earth is our enemy—is correct. I do not believe our country has done anything that would warrant a statement of that kind. I believe that to-day as in the past, and I believe in the future, we will have friends, if we deserve them, among the nations of the earth; and I believe that we do deserve them now, as in the past.

Therefore, Mr. President, in voting for this bill I vote for it believing that we ought to have a strong and efficient Navy—a Navy that in time of peace will be an assurance against war; a Navy that in time of war will enable us to meet any attack from any country on the face of the earth. But I want to repeat that I do not vote for it because I believe war between the United States and any other country in the world is imminent to-day. I do not vote for it because I believe that we either deserve or have incurred the hostility of every other great nation in the world, as the Senator from Illinois says that we have.

Mr. KENYON. Mr. President, I feel that in voting on this bill I am parting company with a good many friends, and perhaps am not voting the majority sentiment of my State, and so I take a moment or two to place in the RECORD my reasons for my vote.

The sentiment of my State, I think, is very much divided on this question of preparedness. I do not mean by that that any part of our people are in favor of "peace at any price," but many of them do fear that any large measure of preparedness is a trend toward militarism and a tendency in our national life that may eventually destroy the position of the Republic as a leader in directing the thought of the world toward an era of universal peace.

Iowa people are a thinking people. They do not easily lose their heads on a proposition, and are not readily stampeded. They are not lacking in patriotism, nor do they count the cost in money or life if real danger ever threatens the Republic. Iowa has the lowest per cent of illiteracy of any State in the Union, and it is claimed sent to the Civil War more soldiers in proportion to its population than any other State.

Many of the farmers, as they visit one another over the line fence, have been asking each other a good many questions during the last few months. A question-asking citizenship is always a safe citizenship. They have been inquiring:

Who is going to attack us?

Why should any nation attack us?

What have we done to provoke any of the nations of the world?

Do the people of other nations enjoy war?

Do they like to be killed, and do those who remain enjoy paying for having their relatives and friends killed?

Why do we not have a better Navy?

How does it happen that, having spent more for our Navy than many other nations, we do not have so large a Navy as some nations spending less?

Why do we have so many navy yards and Army posts?

If we have spent more than other nations having better navies how do we know the money spent for a new Navy will give us a much better one?

Just how much of the agitation for preparedness comes from munition makers?

Who is to pay for this preparedness?

How is it all to be paid for?

If there was no profit in war, would there be so much agitation?

All of which questions seem worthy of consideration.

A great many of the people of my State believe in a large measure of preparedness. I think the calm, deliberate judgment is in favor of reasonably adequate preparedness—for common-sense preparation. They are not carried away by the alarming predictions that we are soon to be the theater of a great war. On the other hand, they are not so foolish as to close their eyes, in view of world conditions, to the fact that we may be in war.

I believe it is the duty of a Senator of the United States, however, to vote for what he believes is best for the entire Nation, even though it might not be the sentiment of his State. We are all for peace, but we know peace does not exist in the world. Few people believe in peace at any price. Every person hopes that a day of universal peace will come, "when swords shall be beaten into plowshares, and spears into pruning hooks." But that day is not here, and is not in the immediate future.

For four months a battle has gone on at Verdun, the most horrible in the history of the world. The picture comes to us as a picture of "hell-fire on black cloth." The world is not the same and will never be again. We must realize that we can not bury our heads in the sand and be an ostrich nation.

It is foolish for us to say we can not be invaded, for we have recently been invaded by bandits from Mexico and American people killed in their own houses. No red-blooded American is willing to permit such things to go on. We can not sit by, content with prosperity, and not be willing to make some sacrifice to have a country and maintain a government.

The President on his western trip told the people of dangers confronting us. While we should not be governed entirely by what the President says, his word certainly is persuasive. He is our President, actuated by patriotism just as much as we are. We have no right to disregard what he says—he is in a better position to know than anyone else.

Kings and rulers sometimes want war. The people do not want war, except to avenge a national insult or to preserve some great right. People are dying on European battlefields because of the whims of rulers. No rulers are being shot at the front, but remain safely in the rear, with the exception of King Albert of Belgium. I wish, where kings and emperors and czars go to war upon a mere whim or pretext, they were compelled themselves to be on the firing line in the front rank of the first battle, and war would not be quite so popular.

Adequate preparedness, as I view it, is in the nature of national insurance. A strong navy is our best insurance. We do not need a large standing army, because in time of trouble our Nation eventually must be protected by the Volunteers, and it will be. Most men who are wise out of an abundance of caution carry life insurance, accident insurance, and fire insurance upon their property. They do not carry so much of it that they find it difficult to meet the necessities of life, but prudent people, and especially where they have others dependent upon them, set aside some part of their income for life insurance. They do not desire to have the insurance paid. And so it is with national preparedness. An efficient navy that never had to fire a shot would be ideal. With the great seacoast that this Nation has to protect it must have a strong navy. I have always believed in an adequate navy for our country. The stronger the navy, the less need for a large army.

There is another phase of preparedness that goes even deeper than armies and navies and forts and armor-plate factories and nitric-acid plants, and that is a belief among the people that their Government stands for justice at home as well as abroad.

The man with a hungry family, finding difficulty in obtaining work, who believes that legislation is being passed to benefit the few—in other words, believes that injustice dwells in this Nation—will not be a good soldier.

Robert Ingersoll once said that "no one ever went to war in defense of a boarding house." Men will go to war in defense of home—in defense of principle.

A home-owning nation is always patriotic. That nation is the best prepared in which every man, woman, and child receives justice. Plant in a people the thought that the few in their country are becoming excessively rich and the many are becoming exceedingly poor, that those comprising the Government are responsible therefor, and you will find preparedness becomes a difficult proposition and enlistments will be few.

We have passed a rural-credits bill to help the farmers secure loans on long time. That is good legislation. We ought to devise some system of credit by which men who desire to secure homes could receive long-time loans at small rates of interest.

There is no lack of patriotism in the Republic. There is too much partisan politics. Partisan politics is injurious to patriotism. It is the curse of this country. Too many men believe in the shibboleth, "My party, right or wrong."

There is plenty of patriotism in either party. The aisle is not the division in this Chamber on the question of patriotism. We find on this side men who went out at the call of their country and were willing to give their lives under the Stars and Stripes; on the other side, with the same heroic love of home, went out men sacrificing everything for the Stars and Bars. In the Spanish War we found the sons of the men who wore the blue and the sons of the men who wore the gray fighting side by side for the same flag, the same country, and the same purpose.

There has been a revival of patriotism in this country, and it is well. There is love for the flag. It sometimes seems as if we did not pay enough attention to developing that respect and affection for it in the young that should characterize our people.

In our State a former member of our legislature, Hon. George Schee, set about to place the flag on the country schoolhouse. He has carried on that campaign with great earnestness, and it is a most inspiring sight in going through the country to see the flag floating on the country schoolhouses. The Stars and Stripes should be on every schoolhouse, city or country, and on all public buildings. It should be in the halls of Congress; in this Chamber behind the Vice President's chair; it should float on the steeples of our churches; should be in our court rooms over the judges' desks. We can not have too much of the flag. Patriotism in a man's soul is dead when he does not feel a thrill at the sight of the flag. No true lover of that flag can be an undesirable citizen.

We have heard a great deal in this debate about protecting the wealth of our country; that other nations coveted it. Our wealth is not the main thing to protect in this country. This is a land of ideals, of freedom, independence, liberty, opportunity, that no other nation possesses. It is our duty as legislators of to-day to so build that in the future the ideals of America will be protected against any force that may seek to destroy them. The protection of those ideals is more important than the protection of our wealth.

I desire to vote for a navy that is strong enough to accomplish all these purposes. My judgment is that the Senate committee has gone somewhat too far; that a plan not so elaborate would be sufficient. I agree with the Senator from California in his statement, that a certain hysteria has developed in this country on this question. There have been great preparedness parades in all our cities that, so far as I have been able to observe, never wind up at the recruiting station.

I should prefer, however, if I err, to err on the side of a navy too strong than one too weak; the former error can be corrected, the latter perhaps not. I want a navy strong enough so that we may not have to beg from other nations for our rights; that we may not have to plead with other nations to keep off our shores and respect our civilization. I do not want this Government to become in any way a bulldozing nation. It never will. I want it so just that for no act of itself will a navy ever be required, but I want the Navy so strong that every foreign nation will recognize its power to protect the right; that the high purposes, ideals, opportunities of the people of this Nation may never be destroyed or impaired.

Everyone who loves peace must realize that it may affect our standing as an exponent of peace to be engaged in building a great navy. That has been the serious question with me, because I think it will affect such standing. The world will find, however, that we are still devoted to peace; that this Nation will ever be found ready to unite with other nations of the world in disarmament and some plan for perpetual peace. We can not live in the ethereal region of theory and have our heads too far in the clouds so that our feet do not touch the earth. If we were the only nation in the world we might, but we must realize the practical, hard-headed situation.

It would be best for the world if all the navies of all nations could be taken far out into the ocean and sunk, but it would be utterly foolish for one nation to set such an example while the other nations were increasing their armament. It is my hope and prayer that when this war in Europe is over the people of these nations, after they have overthrown their kings and czars and emperors and have established great governments of the people, will unite with the liberty-loving, peace-loving Republic of the west in a complete plan of disarmament and some well-regulated scheme for international peace.

We as a Congress are charged with the duty to help put our Nation in such condition that the mission and purpose of our flag for the future shall not be misunderstood, either at home or abroad, and the fulfillment of that purpose made possible. That purpose will never injure mankind.

The history of this Nation, the sacrifices of its men and women in war and in peace, the high ideals of those who formed here a new Government, have made its flag in the past, as it must in the future, float as a symbol of a nation where every faith has found a shelter, every wrong a redress, and every right a protection.

I shall vote, if opportunity presents, for some reduction in the number of war vessels proposed by the committee. I feel we would be amply protected if we reduced by a few, at least, the number provided for in this bill. However, if that can not be accomplished, I shall support the bill, not believing myself justified under world conditions as they exist to-day, and in view of the statements that have been made by the President of the United States as to our condition and our national perils, in voting against the entire bill.

Mr. WEEKS. Mr. President, nations, like individuals, are frequently brought face to face with conditions which necessitate their taking an account of stock. The European war has brought us face to face with our own individual preparation. As a result people have learned that we have a small, efficient Army, probably entirely too small for any reasonable purpose, and that we have a larger and very efficient Navy, but that in both respects we have fallen behind other nations in the development of this means of defense.

There is a difference of opinion, and a very radical difference of opinion, about the size of the Army which we should maintain. There is some, but very much less, difference of opinion about the size of the Navy which the country requires. I think it is pretty nearly universally the opinion of our people that we should have a navy entirely commensurate with our probable or possible needs. The Naval Committee in framing this bill have recognized that conclusion, and they have followed the judgment and advice of the General Board of the Navy, the technical advisers of Congress on the subject.

I am not entirely in sympathy with some of the provisions of the bill, but I am in sympathy with the building program which has been presented to us, and I want to submit to the Senate some practical reasons for my sympathy and approval of the program which we are now considering.

In considering the question of military and naval preparedness, we must not fail to note the fact that we have recently celebrated the one hundredth anniversary of the restoration of peaceful relations with Great Britain, and that during the past century we have maintained with the people of Canada not only peace in form but in spirit as well. Business relations between the two countries have been most intimate. For many years emigration from Canada to the United States has been very large, and in recent years many citizens of our country have crossed the line and have become citizens of Canada. We have the same general forms of government and methods of procedure, and therefore it is fair to assume that if the wishes of the people of either country were observed, as would necessarily be the case, there could be no breach in the relations which now exist.

To the south we are in contact with a turbulent population which, from a military standpoint, however, is not of sufficient importance to materially affect our military requirements or to in any way influence our naval development; so in treating with Mexico, while there may be occasions like the present, when uncertainty resulting from disorders will prevail, these conditions will not cause any great uneasiness and need not affect, except temporarily, the development of our military establishment.

These being the conditions to the north and south, our only real fear of serious entanglements comes from the east and west. It has been frequently stated by both the thinking and unthinking that the Atlantic and Pacific Oceans are our best international friends. That was true in former days, when the means of transportation were slow and infrequent; but with the development of transportation facilities and the use of such modern implements of warfare as the flying machine, the submarine, the battle cruiser, and the destroyer, the oceans which separate us from European and Asiatic shores can not give us the same feeling of security which obtained in the early days of the Republic.

A nation's naval policy must depend on its requirements. If other nations did not maintain navies, it would be unnecessary and foolish for us to do so. If the nations with which we are likely to be brought in contact maintain extravagantly large forces, it is necessary for us to follow their example. While there is very nearly a universal feeling that the Navy is for defense and is the first line of defense, its great value as such a weapon must always rest on the knowledge that its units can be moved from point to point and be available not only in defending our outlying possessions, as well as our own coast, but, at the same time, be used as an offensive weapon.

The two questions which we should decide before appropriating for new construction are: Is the Navy which we have or which is contemplated in the plan submitted by the Secretary of the Navy adequate for our needs and will it, when completed, be a symmetrical and efficient force? The question of what is an adequate Navy for us is not one to be determined by our naval experts; it is one for the administration and Congress to outline. Many important international and far-reaching matters have a bearing on the course to be taken. For instance, are we going to abandon the Philippines? If so, it will materially modify our naval program. If the Philippines are abandoned, are we at the same time to abandon our interests in the Samoan Islands, in Guam, in the Midway Islands, or are those islands to be our outer Pacific coast line? Their abandonment would modify a naval program. Are we to make the defenses at Pearl Harbor and the Hawaiian Islands impregnable, providing a base from which the Pacific coast, including Alaska and the Panama Canal, may be adequately protected? An expedition of a single ship or any considerable number of ships directed against the Pacific coast might possibly slip through and make a desultory attack, but the result would not be serious if our Pearl Harbor base is protected and our fleet in condition to engage in active operations in the rear of the attacking fleet. Are we to establish a similar base in the Atlantic primarily for the protection of the Atlantic end of the Panama Canal and from which we can protect the coasts of the Southern States? Both of these questions should be given consideration by Congress.

There is another question which is of the first importance in this connection. In order to promote our defense and insure the impossibility of lessening the advantages resulting from the thousands of miles of ocean which separate us from possible enemies, the Monroe doctrine was promulgated nearly 100 years ago, since which time it has been in somewhat varied degrees the established policy of this country—I say "in somewhat varied degrees" because it seems to me that there may be a legitimate variety of opinions as to the limitations of its application. For example, the activities of the present administration, which has been insistent for the extension of our relations with South America, seem to indicate that the original purpose of this policy is not the governing one in the minds of some of those who are now in control of our Government. My own judgment is that the Monroe doctrine was orginally intended to aid in and provide for our defense; that it was to prevent the landing and establishment of depots and bases on American soil from which operations could be more advantageously conducted against the United States; that it did not originally relate to or have any particular bearing on the protection of South and Central American countries, and that in the instances where the doctrine has been applied we have acted because of the necessity to provide for our own protection rather than to protect other countries.

It now seems to be the prevailing idea that this policy, if my impression is correct, is to be extended to cover other relations with Central and South American countries. Even an arrangement of offense as well as defense is being discussed, and we are likely, if this view of the doctrine is to prevail, to find ourselves materially involved in the affairs of some country with which we have not close relations, and in the final analysis our coast line would be extended to cover every mile of coast on both the Atlantic and Pacific from Patagonia to the Canadian line. My own impression is that the original purposes of the Monroe doctrine should be continued as far as it applies to those Central and South American countries in the immediate neighborhood of the United States or our dependencies, but it might well be modified, and perhaps abandoned, in so far as it applies to those South American countries which are removed from our sphere of action.

One of the distinct disadvantages which may be charged against our naval policy is that we have never had a homogeneous naval construction or building plan. In recent years the battleship has been the one important element in our provisions for defense, but we have not taken it as a unit and provided other facilities to make the battleship as useful as it might be if we had provided every supplemental vessel the service might require. Years ago we should have made provision in connection with our construction policy so that when a battleship was added to our Naval Establishment we provided at the same time the men to man it, or at least provided for a reserve force in case of need. At the same time there should have been supplied the number of auxiliaries of every character which might be required to make up a homogeneous fleet. Whatever naval policy we establish, this criticism could be easily avoided, and while there will be differences of opinion as to the number of smaller craft necessary for a unit of battleships, yet, in a general way, such opinions may be coordinated and a reasonable basis established which would give us a sufficient fleet of auxiliaries for our general needs.

If we are to build a navy—as the President has once expressed himself as being desirable and as the General Board recom-

mends—equal to the strongest navy maintained by any single power, we are entering upon a very ambitious and expensive policy, because our construction and maintenance is very much greater than are those of European nations. There are properly only two courses for us to follow—either provide ourselves with a navy sufficient to defeat the naval forces of our probable enemies or entirely abandon our Naval Establishment, and thereby save money, which we are literally throwing away if we maintain an insufficient force, one which will bring us nothing but defeat and humiliation in war. Moreover, in order to guarantee success it is desirable to have a larger navy than our possible competitor. If the Navy is of equal size to that of a possible enemy, the outcome is going to depend on the character of the personnel and, to some degree, on accidents; and certainly two navies of equal size and of equal qualities in every respect will necessarily carry on a contest for a long time, resulting in the destruction of a vast amount of merchant shipping and other valuable property, so large an amount, in fact, that such a loss would probably demonstrate the folly of not having added sufficiently to our Naval Establishment to make us stronger than our possible enemy. On the other hand, to maintain a navy smaller or having less power than that of a probable antagonist is not only useless but is literally worse than useless. Such a fleet can neither attack nor successfully defend, and, in the final analysis, would not only mean the destruction of the fleet but loss of our men and bitter humiliation to our people.

Necessarily all phases of the question must be taken into account in determining the kind of ships we are to build, and in the construction of each class of ships consideration must be given to the weight of armor, weight of machinery, the space it will occupy, as well as the weight of broadside. Unfortunately we have been building battleships which, while excellent in themselves, are not of a class to compete successfully with the up-to-date ships of other nations; that is to say, the policy of other countries has been not so much to increase armor or weight of broadside as to increase range of guns and the speed of the ship.

What do we need in order to put our Navy in a relatively strong position? The following table includes the recommendations of the General Board and the President's program for the next five years:

	General Board's program, July report.	President's program.				
Year to be authorized	1916	1916	1917	1918	1919	1920
Battleships	4	2	2	2	2	2
Battle cruisers	4	2		1	2	1
Scout cruisers	6	3	1	2	2	2
Destroyers	23	15	10	5	10	10
Fleet submarines	7	3	4	2	2	2
Coast submarines	30	25	15	15	15	15
Gunboats	6	2	1			1
Hospital ships	1	1				
Ammunition ships	1				1	1
Fuel-oil ships	4		1		1	
Repair ships	1					1
Destroyer tenders	1					
Fleet submarine tenders	2					
Supply ships	1					
Transports	1					

Unfortunately we have never been willing to take the recommendations of our General Board as a basis for a building program. Of course, such a board makes its recommendations without any regard to our available financial resources. It is the business of the President, the Secretary of the Navy, and, finally, the duty of Congress to determine how much money shall be spent for this purpose. But it can not be charged against the General Board that it has failed in its recommendations to point out how our fleet could be kept apportioned and as strong as any foreign fleet not superior to ours a dozen years ago, for in 1903 it prepared a building program covering a period of 15 years. If this program had been followed, we should now have a Navy of such size and character that we would have no concern about the possibilities of a conflict with any foreign power, as far as that arm of the service is concerned.

It is true that some Secretaries have approved the recommendations of the board, but, generally speaking, they have been modified by the administration and always by congressional action. It would be interesting to go over the votes in Congress during the last dozen years and see in how many cases those who are to-day most vigorous in asking for suitable national defense have failed to sustain the reports prepared by our technical officers, men competent to look ahead and determine what our real requirements were likely to be. Last July, when the General Board made its report, the present administration, instead of disclosing the recommendations of the board, called upon it for another report, limiting it to an expenditure of $100,000,000 instead of $265,000,000, and insisting that it recommend a construction program based on the smaller amount of money.

It goes without saying that neither the President, the Secretary of the Navy, nor Congress has the technical knowledge to criticize the recommendations of the General Board. Only in looking at the question from a financial position can they in any way justify a modification of the recommendations of the board.

Let us turn to the construction recommended by the General Board in its 1903 report, outlining a building program for 15 years, the recommendations by the Secretaries of the Navy, and the authorizations made by Congresses, so that we may place the responsibility for the condition of the Navy to-day. In order to do so I have put these recommendations in parallel columns:

Construction recommended and authorized since 1903.
[Reprinted from Report of Secretary of the Navy, 1915.]

Recommended by the General Board.	Recommended by the Secretary of the Navy.	Authorized by Congress.
1903.	(Secretary Moody.)	(Act of 1904.)
	2 hospital ships	
2 battleships	1 battleship [1]	1 battleship.
1 armored cruiser	1 armored cruiser [1]	2 armored cruisers.
3 protected cruisers	3 protected cruisers [1]	
4 scout cruisers	2 to 4 scout cruisers [1]	3 scout cruisers.
	2 submarines	4 submarines.
2 fuel ships	2 fuel ships [1]	2 fuel ships.
3 destroyers		
1904.	(Secretary Morton.)	(Act of 1905.)
3 battleships	3 battleships [2]	2 battleships.
6 destroyers	6 destroyers (if practicable) [2]	
5 scout cruisers		
6 torpedo boats		
2 fuel ships		
1 gunboat		
2 river gunboats		
2 Philippine gunboats		
$850,000 for submarines		
3 battleships	2 battleships	1 battleship.
1 gunboat	1 gunboat	
2 river gunboats	2 river gunboats	
3 scout cruisers	2 scout cruisers	
4 destroyers	4 destroyers	3 destroyers.
4 submarines	2 submarines	8 submarines.
4 torpedo boats		
2 small gunboats		
1906.	(Secretary Bonaparte.)	(Act of 1907.)
2 battleships	1 battleship, and, with hesitation, 2.	1 battleship.
1 gunboat	2 gunboats	
2 river gunboats	3 river gunboats	
4 destroyers	4 destroyers	2 destroyers.
2 fuel ships	2 fuel ships	
4 ships' torpedo boats	4 ships' torpedo boats	
2 scout cruisers		
2 small gunboats		
1 ammunition ship		
1907.	(Secretary Metcalf.)	(Act of 1908.)
4 battleships	4 battleships	2 battleships.
4 scout cruisers	4 scout cruisers	
10 destroyers	10 destroyers	10 destroyers.
4 submarines	4 submarines	8 submarines.
2 fuel ships	4 fuel ships	2 fuel ships.
1 ammunition ship	1 ammunition ship	
1 repair ship	1 repair ship	
2 mine-laying ships (conversion of 2 cruisers now on list).	2 mine-laying ships (conversion of 2 cruisers now on list).	
4 ships' mortar torpedo boats.		
		Purchase of 3 new fuel ships.
1908.	(Secretary Metcalf.)	(Act of 1909.)
4 battleships	4 battleships	2 battleships.
4 scout cruisers	4 scout cruisers	
10 destroyers	10 destroyers	5 destroyers.
4 submarines	4 submarines	4 submarines.
3 fuel ships	3 fuel ships	1 fuel ship.
1 ammunition ship	1 ammunition ship	
1 repair ship	1 repair ship	
2 mine-laying ships (conversion of 2 cruisers now on list.)	2 mine-laying ships (conversion of 2 cruisers now on list.)	
		1 destroyer whose vitals are located below the water line.

[1] Recommended in his hearings before the House Naval Committee. Not in his annual report.

[2] Recommended in his hearings before the House Naval Committee. No specific recommendation in his annual report.

Construction recommended and authorized since 1903—Continued.

Recommended by the General Board.	Recommended by the Secretary of the Navy.	Authorized by Congress.
1909.	(Secretary Meyer.)	(Act of 1910.)
4 battleships	2 battleships	2 battleships.
1 repair ship	1 repair ship	
		2 fuel ships.
		4 submarines.
10 destroyers		6 destroyers.
4 scout cruisers		
1 ammunition ship		
1 fuel ship (oil tank)		
1910.	(Secretary Meyer.)	(Act of 1911.)
4 battleships	2 battleships	2 battleships.
1 gunboat	1 gunboat	1 gunboat.
2 river gunboats	1 river gunboat	1 river gunboat.
	2 submarines	4 submarines.
4 fuel ships	1 fuel ship	2 fuel ships.
2 tugs	2 tugs	2 tugs.
3 submarine tenders	1 submarine tender	1 submarine tender.
16 destroyers		8 destroyers.
1 repair ship		
4 scout cruisers		
2 destroyer tenders		
1 mine layer		
2 transports		
1 hospital ship		
1911.	(Secretary Meyer.)	(Act of 1912.)
4 battleships	2 battleships	1 battleship.
4 fuel ships	2 fuel ships	2 fuel ships.
16 destroyers		6 destroyers.
2 destroyer tenders		1 destroyer tender.
5 submarines		8 submarines.
2 submarine tenders		1 submarine tender.
1 repair ship		
4 scout cruisers		
1 ammunition ship		
1 mine layer		
2 transports		
1912.	(Secretary Meyer.)	(Act of 1913.)
4 battleships	3 battleships	1 battleship.
2 battle cruisers	2 battle cruisers	
2 gunboats	2 gunboats	
16 destroyers	16 destroyers	6 destroyers.
6 submarines	6 submarines	4 submarines.
	1 fuel ship (conditionally)	
1 ammunition ship	1 ammunition ship	
2 transports	2 transports	1 transport.
2 tugs	2 tugs	
1 submarine tender	1 submarine tender	
1 destroyer tender	1 destroyer tender	
1 supply ship	1 supply ship	1 supply ship.
1 submarine testing dock	1 submarine testing dock	
1913.	(Secretary Daniels.)	(Act of 1914.)
4 battleships	3 battleships	3 battleships.
16 destroyers	8 destroyers	6 destroyers.
8 submarines	3 submarines	8 or more submarines.
1 destroyer tender		1 submarine testing dock.
1 submarine tender		
2 fuel ships (oilers)		
2 gunboats		
1 transport		
1 supply ship		
1 hospital ship		
1914.	(Secretary Daniels.)	(Act of 1915.)
4 battleships	2 battleships	2 battleships.
16 destroyers	6 destroyers	6 destroyers.
3 fleet submarines	8 submarines or more, 1 to be of seagoing type and 7 or more of coast-defense type.	2 seagoing submarines. 16 coast-defense submarines.
4 scouts		
4 gunboats	1 gunboat	
2 oil-fuel ships	1 oiler	1 oil-fuel ship.
1 destroyer tender		
1 submarine tender		
1 Navy transport		
1 hospital ship		
1 supply ship

[1] Total for years 1903–1907.
[2] Total for years 1904–1907.
[3] Total for years 1906–1907.
[4] Total for years 1905–1908.

It will be seen, for example, that for this period the General Board recommended the building of 42 battleships; the Secretaries of the Navy recommended the construction of 29, and Congress provided for the building of 20, including 2 battleships to take the place of 2 ships sold to the Greek Navy; so that we have actually provided for building less than one-half of the battleships recommended by the General Board. During the time referred to the General Board recommended the building of 40 scout cruisers, the Secretaries of the Navy recommended the construction of 14, while Congress provided for the building of 3. The General Board recommended the construction of 124 destroyers, the Secretaries reduced this to 50, and Congress provided for the construction of 53. Only in the case of battle cruisers and submarines does the recommendation of the General Board for this period seem to be insufficient; but it must be remembered that in 1903 the possibilities of the effective use of the submarine were very much in dispute and the battle cruiser was not being constructed by other nations. Undoubtedly, a 15-year building program prepared in 1908 or 1913 would have made very different provisions for both of these requirements. A careful study, however, of the recommenda-

tions made in 1903—and they could have been modified from time to time, dependent on what other nations were doing—demonstrates the fact that if the General Board's program had been followed there would have been no reason for criticism or fear at this time that we are not fully prepared to protect ourselves.

Within the period to which I have referred, or for the 10 years from 1904 to 1913, inclusive, the United States has authorized:

Battleships	15
Battle cruisers	None.
Scout cruisers	3
Destroyers	46
Vessels in all	64

England during the same time has authorized:

Battleships	34
Battle cruisers	10
Scout cruisers	41
Destroyers	167

Germany during the same time authorized:

Battleships	24
Battle cruisers	7
Scout cruisers	22
Destroyers	120

Japan during the same time authorized:

Battleships	10
Battle cruisers	6
Scout cruisers	4
Destroyers	43

France during the same time authorized:

Battleships	22
Battle cruisers	None.
Scout cruisers	6
Destroyers	46

Italy during the same time authorized:

Battleships	16
Battle cruisers	None.
Scout cruisers	4
Destroyers	37

Russia during the same time authorized:

Battleships	3
Battle cruisers	8
Scout cruisers	6
Destroyers	104

Carefully considering the authorizations for each country and the class of ships constructed, it must be admitted that with the single exception of Russia the United States has made less effective provision for the future than any of these first-class sea-power nations. Even in the case of Russia, which has constructed twice as many destroyers, twice as many scout cruisers, and eight of the all-important battle cruisers, it is doubtful if she has not done more for real naval development than has our country.

These construction programs of the different nations are emphasized by what has taken place during the four years preceding the present war; and how inadequately we have been providing for our needs, although we have known what other nations were undertaking, for during that period—that is, from 1909 to 1913, inclusive—we authorized the construction of but 8 ships capable of taking their place in a battle line, while England authorized 29, Germany 18, France 16, and Japan 9. Even in the case of Japan the preparation, in my judgment, has been more effective than ours, because Japan authorized during this time five battle cruisers and we had not authorized a single one.

The two most important elements which must be recognized in considering the effectiveness of a fighting ship are range and speed. While the naval actions which have taken place since the beginning of the European war are not conclusive, they tend to confirm the accuracy of this statement, for in every such action the result has largely been due to these two elements. From the broad standpoint, excelling in these conditions has enabled England to retain substantially complete control of the sea. Therefore both range and speed should be given most careful consideration in the authorizations for naval construction to be made by Congress this year.

Our fastest dreadnaughts have a speed of 21½ knots, while the English, for example, have dreadnaughts which make nearly 4 knots greater speed. Now, if the English ship at the same time carried guns of greater range, it will at once be seen how impotent would be the ships of heavier broadside which we have constructed. This example leads to the conclusion that it is not as necessary to carry out our own ideas as to the desirability of any particular type of ship as it is to build similar but somewhat more effective vessels than do our probable antagonists, so that we may be able to compete successfully with them in every kind of naval warfare. We must, therefore, consider our fleet not only as a defensive but an offensive weapon. Quite likely, if it were to be used entirely for defense, our fleet would answer the purposes for which it was constructed, but it can not be considered satisfactory from any other standpoint.

Let me briefly refer to the three important actions which have taken place between ships of similar classes since the beginning of the European war. The first one was fought off the coast of Chile between English and German men-of-war of similar classes. The English fleet included the *Good Hope*, a 14,000-ton, 12 years old, 23-knot ship, armed with two 9.2-inch and sixteen 6-inch guns; the *Monmouth*, having substantially the same speed and carrying fourteen 6-inch guns; the *Otranto*, an armed liner, with comparatively little resisting power; the battleship *Canopus*, 16 years old, carrying four 12-inch guns, but not having a greater speed than 18 knots; and the small fast cruiser *Glasgow*, incapable of taking its place in the battle line. The German fleet consisted of the battle cruisers *Gneisenau* and *Scharnhorst*, each armed with sixteen 8.2-inch guns, and the light cruisers *Leipzig* and *Nurnberg*, carrying batteries of about the same quality as the battery of the *Glasgow*. The *Scharnhorst* and the *Gneisenau* had a speed of about 24 knots; in other words, they were at least 1 knot faster than the *Good Hope* and *Monmouth*, and, with with the exception of the two 9.2-inch guns on the *Good Hope*, their batteries had a greater range than those of the English ships.

It is true that the battery of the *Canopus*, with its four 12-inch guns, would have been effective in deciding the action if the ship had had greater speed; in fact, with the same speed as that of the German ships she would have been a most important factor in the fight. Her greatest possible speed, however, was more than 5 knots an hour less than that of the Germans, and she was therefore unable to take an active part in the contest. The Germans having a greater speed and range were able to fight the British on their own terms, the result being that they very quickly destroyed the entire British fleet, with the exception of the *Glasgow*, which was able to escape in the darkness.

This same German fleet, six weeks later, fell in with another British squadron, which had been sent to the waters in which the Germans were operating for the specific purpose of destroying the German ships. In selecting vessels for this purpose, the British Admiralty adopted the only sane course; that is, they selected ships that had greater range and speed than the German ships. These were the battle cruisers *Invincible*—and the *Invincible*, by the way, was one of the battle cruisers lost in the last battle—and *Inflexible*, which carried 12-inch guns, as against the German 8.2-inch guns, and had a speed of at least 2 knots an hour greater than the Germans. In this case conditions were exactly reversed—the English ships made the fight on their own terms, and the result was foreclosed as soon as the contest commenced.

In the third contest, which took place in the North Sea, the German fleet, consisting of battle cruisers and destroyers, was returning to its home port from a raid when it fell in with a British squadron made up of similar vessels, and the result was not dissimilar, as far as it went, to those in the cases I have cited. The German fleet consisted of the battle cruisers *Moltke*, *Derflinger*, *Seydlitz*, *Von der Tann*, and *Blücher*. With the exception of the latter, these ships had a speed of 28 knots, so that if they had been brought into contact with the *Invincible* and *Inflexible*, the British ships which had been sent to the southern Pacific, they would have easily overcome them; but in this instance they fell in with the British cruisers *Lion*, *Tiger*, and the *Queen Mary*, battle cruisers of the latest and fastest type, somewhat larger than the Germans, with an average of about 1½ knots greater speed and heavier batteries in about the same proportion.

The German were armed with 11-inch guns and the British battle cruisers with 13½-inch guns, so that in every respect the British had superior ships to their rivals and they were immeasurably superior to the *Blücher*, which was 2 knots slower than the other ships in the German squadron. Both fleets were steaming in column, the *Blücher* being the last in the German line. As each British ship passed it at a distance beyond the range of the *Blücher's* guns a destructive fire was maintained and continued as the other ships of the German fleet were overhauled.

By the time the three British battle cruisers had dealt with the *Blücher* she was completely crippled and was promptly sunk by a destroyer; in fact, it is probable that the final result of this contest would have been like the others had not the German commander used his destroyers and submarines in a manner which caused more or less delay to the British ships, and at a most inopportune time a chance shot destroyed a feed tank on the *Lion*, the leading British ship, rendering that vessel incapable of further action. If the British fleet had not been accompanied by a considerable number of destroyers to protect it

under such circumstances, the *Lion* would have soon fallen a prey to the German destroyers or submarines as had the *Blücher* to the British torpedo. Therefore, while the gun power of the *Lion* had not been damaged, her speed effectiveness was destroyed, and it was necessary to tow her into port. This accident and the delays caused by it enabled the German fleet to escape; this incident indicates the possibilities which may result in any sea fight; that is, a chance shot disabling some intricate part of a fighting machine. The confusion caused by this accident, and the disparity in force of the remaining ships, undoubtedly saved the whole German squadron.

Briefly told, this describes the three important naval actions which took place before the great action of June 2, which can not at this time be discussed in detail, and it would seem to be conclusive evidence of the necessity of our constructing battle cruisers. If we had become engaged in a war with Germany, which has vessels of the type of the *Moltke*, with a speed at least 7 knots greater than our fastest battleships, not only would she be able to run away from our ships of similar type, but she would have speed enough to overhaul and power enough to destroy any cruiser in our Navy. The result would be that Germany would very soon control the sea and practically tie up all of our merchant ships; and the same result would follow in case we became involved with any nation which had constructed battle cruisers.

England has always been the most enterprising developer of a navy. She has equipped herself not only with battleships and battle cruisers, but with first-class destroyers and submarines, and in so doing has kept ahead of the navies of the rest of the world. Having a large number of destroyers and submarines, she has been able to furnish a complete screen for her large ships, enabling them to keep at sea at all times and, in addition, to provide ample protection for her transports and a large part of her commerce. If she had had a greater number of ships of the destroyer class she would not only have been able to protect her battle fleet and transports, but all of her commerce, in which case there would not have resulted, as has been the case from time to time, the destruction of any English merchant ships.

The figures are not at hand to show what this loss amounts to, but hardly a day passes that we do not read of the sinking of one or more English merchant ships; so it is perfectly apparent that if there had been provided before the war a sufficient number of destroyers this destruction of merchantmen would have been impossible. It is for this reason that the English have been making the contention with which we are familiar—of the right to arm merchantmen in order that they may protect themselves.

If her merchant ships were armed, had sufficient speed, and used ordinary precautions, there should be no possibility of German submarines doing the damage with which we are familiar. As a matter of fact, most of the ships which have been torpedoed were slow; and, generally speaking, it has only been in cases where the enemy submarines have happened to be in the path of ships that have enabled them with their limited speed to destroy merchant vessels of considerably greater speed. For example, it would seem from the evidence at hand that if reasonable prudence had been used in the case of the *Lusitania* that ship might easily have escaped the submarine which attacked her. It will be recalled that she was following her usual course, and instead of running at a high rate of speed, with her ports closed, her boats swung out, and everything ready for a possible attack, she followed exactly the contrary course, running at a very moderate rate of speed, following her usual course, her boats stored, and her ports wide open, as if she were starting on her voyage in a smooth sea in time of peace.

This whole question should be an object lesson to us in the plans which we are to make in providing for the construction of small, fast cruisers and destroyers. If we are to have an effective Navy—that is, sufficiently effective to protect our battle fleets, our transports, and our commerce—we must have a number of small, swift vessels quite as large in proportion to our battle fleet as there are now in the English Navy.

One can not speak of the present personnel of the Navy, to which I shall refer briefly, except in superlative terms. The operations of the plucking board has resulted in retaining in the higher grades of the active service none but competent men, and the training we are giving our young officers at the Naval Academy has not been materially lessened in its efficiency or in its results. The method of appointment to the Naval Academy has been materially modified; but, to my mind, it makes very little difference what the source of appointment is provided the standard of the entrance examinations, physically and mentally, is maintained. Our Military and Naval Academies have been great and effective molding schools, and there should be no possibility of lowering the standard.

The personnel before the mast in the Navy was never composed of as good material as at present. During the last 30 years, since the establishment of our training ships and training schools and the extension of the fields for recruiting into the agricultural sections of the country, practically precluding the enlistment of those who are not citizens of the United States or those who have not declared their intention of becoming citizens, there has resulted an increase in the character and effectiveness of our seamen in a most marked degree. The old man-of-war's man of the type prevailing 30 years ago was a strong and interesting character, but only a portion of a ship's company was made up of this class. It usually included many untrained landsmen and, in addition, a rough, ungovernable, and intemperate element very different from anything that can now be found in the naval service.

Our officers and men are drawn from the same general source of supply, and if we had enough of them we might look forward with complacency to the result of any conflict in which their personality was to be of material influence, because, I think, no other nation in the world can equal the quality of our seafaring men. But we have not enough of them; the Navy Department reports indicate that we need 20,000 additional men to man the ships now available for service, and there is no place to get these men except from the seven or eight thousand naval militiamen. These militiamen, taken as a whole, compare favorably with the members of the National Guard of the several States, but they are not superior to the best organizations of the land forces of the National Guard, and under the best conditions are only fair reserve men.

We have not been able to develop a real naval reserve in this country, and I see no prospect that it can be done within a reasonable time. Therefore, if we are going to make available our men of war, it is necessary to increase the number of seamen belonging to the Regular Establishment. We have already increased the number of possible officers by providing for more appointments to the Naval Academy. It would be the height of folly, in my judgment, to build additional ships without at the same time providing a complement for them. Indeed, that should be a part of the program which should be followed whenever we build a battleship or battle cruiser. Not only the men but the auxiliary ships required to make it a perfect unit should be furnished at the same time, or provided so that they will be available as soon as the ship is ready for commission. Therefore, even including the naval militiamen, and assuming that they are suitable for any service, when we take into account this year's building program, it seems to me that we should provide in the naval bill for at least 20,000 additional seamen.

The following table shows the number of officers and men in the naval service in 1891 and each five-year period since that time:

	Officers.	Men.
1891	1,483	8,250
1896	1,459	9,000
1901	1,702	18,825
1906	2,278	32,163
1911	2,883	47,612
1915	3,403	52,561

The number of officers in this 24-year period has increased two and a half times, the number of men six and a half times, the appropriations for the Navy six times, while the tonnage of our fleet has increased ten times. It will be noticed that there has not been an increase in the number of officers at all comparable with the number of men. There will be required substantially 4,000 men to man the *Pennsylvania*, *Arizona*, *Nevada*, and the *Oklahoma*, now completed or nearing completion. Therefore, if we were short 20,000 men at the beginning of the year it will require 24,000 men to man all of our ships. The Naval Militia should be used to fill the vacancies caused by casualties; so my contention that at least 20,000 are required, it seems to me, has been practically met by the recommendations made by the committee, and, generally speaking, it seems to me that this report carrying a very large amount of money for the upbuilding of our fleet and providing additional men, as it does, is simply filling up the deficiencies of the past few years. We probably will never have to make a similar provision again, but I think, on the whole, that this is the most homogeneous arrangement for the construction of a fleet and the preparation of officers and crews to man the fleet that we have ever had, and I personally want to congratulate the com-

mittee on having had the good judgment to follow the advice of the General Board in this respect in giving us an adequate Navy and an adequate number of men.

Mr. WORKS. Mr. President, in the little that I have already said in opposition to this bill I have intended only to express, in a very brief way, my objections to it, and the reasons why I think it is an unfortunate and dangerous piece of legislation. Since then I have listened with a great deal of interest and pleasure to the very eloquent address in support of the bill by the Senator from Idaho [Mr. BORAH]. From the Senator's point of view his support of the bill is logical, forceful, and convincing; but his point of view is not mine.

I am not opposing this bill because of the large expenditure of money that results from it alone. I am not considering so much the effect it will have upon our relations with foreign countries. My concern is as to its effect upon our own people and our own country. I do not believe in disarmament as applied to our own country under present world conditions. I am a lover of peace, but no more so than the Senator from Idaho and the other Senators who have addressed the Senate in support of the bill. We differ as to the best means of preserving the peace and as to the effect of this kind of legislation upon our own affairs.

At this very time, Mr. President, the military authorities of the Federal Government are resisting the civil authorities of the Senator's own State and putting at defiance the decisions of its courts.

It has been only a few months since the eloquent voice of the Senator from Idaho rang out in this Chamber against the usurpation of military power and the suppression of the civil authority in one of the States of this Union. We are now proposing to build up a great military power in this country which may or may not result in a military oligarchy that will control the affairs of the country and place the civil authorities in subordination to its power. That is what I am afraid of. That is my principal reason for opposing the passage of the bill.

The Republic of Mexico has as liberal a constitution and one that is as much intended and calculated to preserve the liberties of its people as our own, but Mexico and her people came under the power of the military. The civil authority has lost all power. The constitution of Mexico has meant nothing to its people for the past five years and longer; and that unfortunate country to-day is—and has been for five years—in a state of revolution and anarchy. The people are being robbed and murdered, the civil authorities are put at defiance, and there is in fact no government in that country upon which the people can rely for the protection of their lives and their liberties.

I know it is said that nothing of that kind can befall this country, that there is no danger of this country falling under such influences. But, sir, human nature is very much the same the world over, and we know enough now of the arrogance of the military in our own country to know that if the opportunity should offer they may become just as arrogant as the military powers of other countries, if they become great and strong enough.

Mr. President, I have not been opposed to the gradual increase of our Navy. I have never opposed such measures. I recognize the fact that it is necessary for us to have a Navy of reasonable size for our protection. But why should we now, at one bound, place ourselves in the position of one of the great military powers of the world? Is there any danger confronting us that makes it necessary that we should take this step now and at once?

It is the effect that this sort of legislation is going to have upon the thoughts of the people that concerns me more than anything else. We are beginning already to rely upon the military power of the country and not the civil power. We are teaching the people, by this kind of legislation, that they can not depend upon the civil authorities for their protection, but that they must be protected by armed force. This is militarism, plain and simple. If it be true, we are no longer a free and independent Republic governed and protected by constituted civil authority.

Mr. President, I do not believe it. I see no indication at the present time that can justify any such enormous increase of the Navy as we are now proposing to make. I think it bad policy. I think it is an expenditure of a large sum of money that is absolutely unnecessary, and a waste of the public funds. It is placing upon the people a burden that will be continued for years to come; because as we start in now we are going to pursue that road from this time on. There will be no going back to the conditions that have existed heretofore. It is perfectly idle, in that view of the situation, to appeal to ancient history or the eloquence of Demosthenes to justify the passing of this kind of legislation.

Of course, if it were necessary to establish and maintain a large navy in order to protect the country from aggression on the part of any foreign nation or nations, then the people would be perfectly willing that this money should be expended in that way. So would I. But I want to see some reason for it, and I want to see some indication of danger that justifies this sudden and enormous increase of the naval power of the country at such an expense to the Government.

Now, sir, I did not expect to discuss this question further, and I should not have done so except for the position taken by the Senator from Idaho, particularly, and by other Senators. The Senator certainly has not understood my opposition to the bill. I think, perhaps, he has not understood the opposition of other Senators to legislation of this kind. It is not, with me, a question of money alone. It is not a question of our relations with foreign countries. It is a simple question of the effect of such legislation upon our own country, and the probable effect it will have upon our own free institutions.

Mr. NORRIS. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 173, after line 6, it is proposed to insert the following words:

Provided further, That the construction of the battleships and battle cruisers herein appropriated for shall not be commenced until the President has made an effort to secure an agreement for the establishment of a permanent international court of arbitration as herein provided. At the conclusion of the war in Europe the President of the United States is hereby authorized and directed to propose to the belligerent nations that the United States Government desires to join in the treaty of peace to the extent of providing—

For the establishment of a permanent international court of arbitration;

For the limitation of armaments; and

For the establishment and maintenance of an international navy to enforce the decrees of such court. If such treaty is agreed upon as a result of such negotiations with the belligerent nations or with the leading nations now engaged in war, then the appropriation herein made for said battleships and battle cruisers shall lapse, and the same shall not be constructed.

And provided further, That in negotiating such treaty the President is hereby authorized to provide for the turning over of such part or parts of our present Navy to constitute our contribution to such international navy as may be agreed upon in such treaty.

Mr. NORRIS. Mr. President, at the beginning of the debate on this bill I addressed the Senate at some length and expressed my views on the question involved in the increase of the Navy, and I do not desire at this time to repeat what I then said. I am offering this amendment, however, on the theory, and I think I am justified in the belief, that those who favor international arbitration for the settlement of international disputes will be willing to support it.

There is already in the bill as it came from the House, and I believe included in one of the committee amendments, a provision that at the close of the European war the President shall suggest to the nations of the world that a treaty of general arbitration be agreed upon. The difference with the proposition now offered, in the shape of the amendment that the Secretary has just read, is that the building of the 16 battleships and battle cruisers provided for in this bill shall not be commenced until the close of the war and until the President has had an opportunity to negotiate with the belligerent nations in regard to the establishment of an international court of arbitration and the limitation of armament; and if those negotiations are successful and such a treaty is agreed upon, then the 16 capital ships provided for in this bill shall not be built, but the appropriation for them shall thereupon lapse.

It seems to me that if we are in earnest in our belief, as we all have the hope, that sometime there may be an international court of arbitration to settle the disputes between nations, and if we want to do our part toward bringing about such a condition, then we ought to couple with this appropriation the suggestion contained in the amendment. We have here an appropriation bill that appropriates more money for the building of a navy than was ever included in any appropriation in time of peace by any nation of the world; and yet we are doing that on the one hand, at a time when we are professing our desire for international arbitration and international peace, and on the other hand in the fact of a war going on between all the other leading nations of the world that may, before it ends, absolutely annihilate practically every navy of the world except ours. No man knows but that at the close of this war we will already, without building another ship, have the largest navy in the world. Such a condition is not only possible, but it is very probable.

It seems to me, therefore, that we ought to say, as we would if we adopted this amendment, that as we believe in international peace and in the establishment of an international court by agreement between the leading nations of the world, we will stay our hand in the construction of these monsters of destruc-

tion to give to the other nations an opportunity to meet us on that fair ground.

Mr. President, I spoke somewhat the other day, and it has been mentioned several times since by other Senators, of the great propaganda that has been going on for a year or two in this country—in fact, ever since the beginning of the European war—having for its object the building up of a public sentiment in favor of a big navy. While in one of the eloquent addresses that was made to the Senate to-day—joined in by another Senator, as I remember, in this debate—they said that they would discount all this talk about our being in danger at the close of the war from any of the belligerent nations, yet it must be remembered that that is the scarecrow that has been used in every newspaper and in every magazine, from every rostrum and from many pulpits, to make the people of the United States believe that at the close of this war we would be in danger of absolute annihilation by some one or more of the powers now engaged in the war. That is the one thing more than any other that has been held up before the American people as a scare to induce them to ask Congress to appropriate money in sums unheard of and undreamed of previous to this Congress for the building up of an enormous navy.

I want to call attention first to a resolution—and I am not finding fault with this and several other resolutions that I am going to refer to—introduced by the Senator from Missouri [Mr. STONE], in which he asked the State Department, or the President through the State Department, to inform Congress what had been done over in Paris at a meeting of the allies' representatives there having for its purpose, as the newspapers generally announced, the reaching of some agreement between the allied powers, as to how they could conduct the war and how they could recuperate after the war from its damages.

At the time the Senator made his remarks in this body the report of the President had not come in. He was followed by the Senator from Massachusetts [Mr. LODGE], who in a very able speech carrying out the same idea with the Senator from Missouri rather conveyed the impression that in that meeting of those representatives over there in Paris there was some agreement that had a vital effect upon the interests of our country. In fact, that was the object of the resolution as I take it.

Now, I do not find fault with what the Senator from Missouri said on that occasion, nor with what the Senator from Massachusetts said. I do not agree with what the Senator from Massachusetts said about the preparedness that he discussed, but I have no criticism to make. The point I want to make is that those two speeches made in reference to that meeting in Paris excited in all the newspapers of the United States comment, always to the effect that these statesmen saw something in that meeting that meant dire and injurious results to the United States Government.

After they had spoken the message from the President brought in the report, and I think any Senator or any citizen who will read the official report from our State Department showing what took place in Paris, what the agreement was, must reach the conclusion that they did nothing there, that they entered into no agreement there that we have any reason or right to find fault with. From their standpoint what they did there was perfectly proper. There was no menace anywhere to the United States in anything that they did or agreed upon. The nearest they came to it was in one of the clauses of the agreement in which they agreed to assist each other after the close of the war to recuperate their lost forces and to build up their business in order that they might develop the resources of the various countries and to put those countries on their feet. We ought not to object to that. It is something that we have been trying to do ourselves with South America ever since the days of Secretary Blaine. Nobody found fault with it across the ocean when we tried to build up trade with those countries. They were interested in it; if we took away the trade from them, it meant a benefit to us and an injury to them; but it was legitimate, it was proper; and so this agreement was proper and legitimate.

Yet, Mr. President, what do we find? I want to quote first, briefly, from what the Senator from Missouri said:

> Primarily it appears to be the chief mutual purpose of these allied nations to wage a commercial war against Germany after Germany has been defeated on the field of physical combat. As to that there has been no attempt to disguise their purpose; but, as I have gone along reading the various discussions which have come under my notice, I am impressed with the apprehension that there may be, and probably is, a purpose having a larger reach.

Now, there is a suspicion. Every newspaper jumped at that sentence, every newspapers heralded it in great head lines, and although on the same day the President reported what the facts were, and no man can take offense at the facts, those facts received no notice from the newspapers of our country; and the idea now of 99 per cent of our citizenship is that there was something rotten over there in that conference, it having something in view that will injure us. The Senator from Missouri said:

> There is talk of an international understanding between them that the allied powers, after the war, would work with each other and for themselves as against not only Germany but the balance of the world. There is much talk of fiscal and economical policies looking to that end, the underlying purpose being to aid each other in recouping and rehabilitating themselves.

I submit that is a worthy object, and no man ought to criticize it. The Senator says further:

> I am impressed with the notion of a purpose and tendency toward a close and somewhat exclusive commercial and industrial union of that character.

Now, if they had approached an industrial union we might not like it; I mean to say, even though it might injure our trade, it is a right they have. We have a treaty with Cuba, for instance, giving her some preferential rights under our tariff laws, and she gives us some preferential rights. We have other similar reciprocal agreements. Now, the Senator from Massachusetts said:

> I am very deeply convinced of the necessity of such preparation on the physical side as to make the application of force and violence to the United States as remote as possible.

He was speaking of the question of preparedness, the building of a big navy:

> I wish such preparation had been begun long ago. It is not too late even now, although much precious time has been lost, and we ought to make every possible preparation for our own defense, both by sea and by land. I believe that we are about to make suitable preparation by sea.

Referring to the naval bill:

> We must have such an armament for defense as will secure our own peace; as will be sufficient to make it apparent to all the world that we are not to be attacked with impunity by anybody, either on our Pacific or our Atlantic coast. Into this question of physical defense and preparation I do not care to enter further at this moment.

He said further, referring to our industries:

> We must try to put them in such a condition so that they can stand behind the people and the Government, be able to meet any test, and make the world clearly understand, as we must make them understand in the matter of armaments, that we can not be invaded, either physically or economically, with impunity.

Now, after these speeches were made there came the report of the President. That ought to satisfy everybody, I think, on a fair reading of the agreement. No attempt is made to cover it up. Our ambassadors sent it here verbatim, together with the signatures of the representatives of the various allied powers. When that was given publicity the same day, within an hour after these speeches were made, it ought to have quieted every fear that any citizen possibly could have had in regard to there being something in the way of a bad omen against our country or our people. But what was done? The next morning there were glaring headlines from a leading daily:

> United States faces trade war. STONE and LODGE so tell Senate in pleas for preparedness. Congress expected to act.

Then follows a report of their speeches carrying out to the people the idea, and it is left there now, that in that agreement over there there was a menace to America, and therefore if we want to protect ourselves we must build up a large Navy and do it now.

Mr. President, all the leading daily papers of the United States have reports similar to that from which I have quoted the headlines. In no place did they give to their readers, except perhaps in a way in which you would have to study the fine print and find it perhaps at the bottom of the article, one sentence in which it was stated that the President had communicated to the Senate that day a copy of the agreement.

At this point, Mr. President, I wish to incorporate as a part of my remarks the entire agreement. It is not very long.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

[Translation.]

ECONOMIC CONFERENCE OF THE ALLIED GOVERNMENTS.

The representatives of the allied Governments have met in Paris, Mr. Clementel, minister of commerce, presiding, on the 14th, 15th, 16th, and 17th of June, 1916, for the purpose of fulfilling the mandate which was confided to them by the conference of Paris on March 28, 1916, to put into practice their solidarity of views and interests and to propose to their respective Governments suitable measures for realizing this solidarity.

They perceive that the central powers of Europe, after having imposed upon them their military struggle, in spite of all their efforts to avoid the conflict, are preparing to-day, in concert with their allies, a struggle in the economic domain which will not only survive the reestablishment of peace but, at that very moment, will assume all its amplitude and all its intensity.

They can not in consequence conceal from themselves that the agreement which is being prepared for this purpose amongst their enemies has for its evident object the establishment of their domination over the production and the markets of the whole world and to impose upon the other countries an inacceptable hegemony.

In the face of such a grave danger the representatives of the allied Governments consider that it is their duty, on the grounds of necessary and legitimate defense, to take and realize from now onward all the measures requisite on the one hand to secure for themselves and the whole of the markets of neutral countries full economic independence and respect for sound commercial practice and on the other to facilitate the organization on a permanent basis of this economic alliance. For this purpose the representatives of the allied Governments have decided to submit for the approval of their Governments the following resolutions:

(A) MEASURES FOR WAR PERIOD.

I.

Laws and regulations prohibiting trading with the enemy shall be brought into accord; for this purpose:

(*a*) The allies will prohibit their own subjects and citizens and all persons residing in their territories from carrying on any trade with the inhabitants of enemy countries of whatever nationality, or with enemy subjects, wherever resident, persons, firms, and companies whose business is controlled wholly or partially by enemy subjects or subject to enemy influence, whose names will be included in a special list.

(*b*) The allies will also prohibit importation into their territories of all goods originating or coming from enemy countries.

(*c*) The allies will further devise means of establishing a system of enabling contracts entered into with enemy subjects and injurious to national interests to be canceled unconditionally.

II.

Business undertakings owned or operated by enemy subjects in the territories of the allies are all to be sequestrated or placed under control. Measures will be taken for the purpose of winding up some of these undertakings and realizing the assets, the proceeds of such realizations remaining sequestrated or under control. In addition, by export prohibitions which are necessitated by the internal situation of each of the allied countries, the allies will complete the measures already taken for the restriction of enemy supplies both in the mother countries and the dominions, colonies, and protectorates—

(1) By unifying lists of contraband and export prohibition, particularly by prohibiting the export of all commodities declared absolute or conditional contraband.

(2) By making the grant of licenses to export to neutral countries from which export to the enemy territories might take place conditional upon the existence in such countries of control organizations approved by the allies, or, in the absence of such organizations, upon special guaranties, such as the limitation of the quantities to be exported, and supervision by allied consular officers, etc. * * *

(B) TRANSITORY MEASURES FOR THE PERIOD OF THE COMMERCIAL, INDUSTRIAL, AGRICULTURAL, AND MARITIME RECONSTRUCTION OF THE ALLIED COUNTRIES.

I.

The allies declare their common determination to insure the reestablishment of the countries suffering from acts of destruction, spoliation, and unjust requisition, and they decide to join in devising means to secure the restoration to those countries, as a prior claim, of their raw materials, industrial, agricultural plant, and stock, and mercantile fleet, or to assist them to requip themselves in these respects.

II.

Whereas the war has put an end to all treaties of commerce between the allies and enemy powers, and it is of essential importance that during the period of economic reconstruction the liberty of none of the allies should be hampered by any claim put forward by enemy powers to most-favored nation treatment, the allies agree that the benefit of this treatment will not be granted to those powers during a number of years to be fixed by mutual agreement among themselves.

During this number of years the allies undertake to assure each other, so far as possible, compensatory outlets for trade in case consequences detrimental to their commerce should result from the application of the undertaking referred to in the preceding clause.

III.

The allies declare themselves agreed to conserve for the allied countries, before all others, their natural resources during the whole period of the commercial, industrial, agricultural, and maritime reconstruction, and for this purpose they undertake to establish special arrangements to facilitate the interchange of these resources.

IV.

In order to defend their commerce and industry and their agriculture and navigation against economic aggression, resulting from dumping or any other mode of unfair competition, the allies decide to fix by agreement a period of time during which commerce with the enemy powers will be submitted to special treatment, and goods originating from their countries will be subjected either to prohibitions or to a special régime of an effective character. The allies will determine by agreement through diplomatic channels the special conditions to be imposed during the above-mentioned period on the ships of enemy powers.

V.

The allies will devise measures to be taken jointly and severally for preventing enemy subjects from exercising in their territories certain industries or professions which concern national defense or economic independence.

(C) PERMANENT MEASURES OF MUTUAL ASSISTANCE AND COLLABORATION AMONG THE ALLIES.

I.

The allies decide to take the necessary steps without delay to render themselves independent of enemy countries in so far as regards raw materials and manufactured articles essential to the normal development of their economic activities. These measures will be directed to assuring the independence of the allies, not only so far as concerns sources of supply, but also as regards their financial, commercial, and maritime organization. The allies will adopt such measures as seem to them most suitable for the carrying out of this resolution according to the nature of the commodities and having regard to the principles which govern their economic policy. They may, for example, have recourse to either enterprises subsidized and directed or controlled by the Governments themselves or to the grant of financial assistance for the encouragement of scientific and technical research and the development of national industries and resources, or to customs duties or prohibitions of a temporary or permanent character, or to a combination of these different methods.

Whatever may be the methods adopted, the object aimed at by the allies is to increase the production within their territories as a whole to a sufficient extent to enable them to maintain and develop their economic position and independence in relation to enemy countries.

II.

In order to permit the interchange of their products, the allies undertake to adopt measures facilitating mutual trade relations, both by the establishment of direct and rapid land and sea transport services at low rates, and by the extension and improvement of postal, telegraphic, and other communications.

III.

The allies undertake to convene a meeting of technical delegates to draw up measures for the assimilation, so far as may be possible, of their laws governing patents, indications of origin and trade-marks. In regard to patents, trade-marks, literary and artistic copyright, which come into existence during the war in enemy countries, the allies will adopt, so far as possible, an identical procedure to be applied as soon as hostilities cease. This procedure will be elaborated by the technical delegates of the allies.

(D)

Whereas for the purpose of their common defense against the enemy, the allied powers have agreed to adopt a common economic policy on the lines laid down in the resolutions which have been passed, and whereas it is recognized that the effectiveness of this policy depends absolutely upon these resolutions being put into operation forthwith, the representatives of the allied Governments undertake to recommend that their respective Governments shall take, without delay, all the measures, whether temporary or permanent, requisite to giving full and complete effect to this policy forthwith, and to communicate to each other the decisions arrived at to attain the object.

PARIS, *June 17, 1916.*

Mr. NORRIS. That is the thing I find fault with. I know men disagree honestly as to what we should do in the building of a navy, but the public sentiment that has been built up has been built up under false colors. This great propaganda that has gone over the country has emphasized every idea of suspicion that there was a menace against the Government of the United States coming out of the war in Europe.

What do we find? We find another resolution introduced asking the Secretary of State to make a report as to all the facts in regard to an agreement that the newspapers had been talking about between Russia and Japan. We have had all kinds of dire calamities prophesied from newspaper sources from that agreement. We find still another resolution introduced calling on the President to get the agreement made between Germany, Austria, and their allies as to what they are going to do—as to whether it means a menace to us. The fact that there has been such a meeting and such an agreement is heralded all over the country, and the idea conveyed in every instance where I have been able to see it published is that there is a menace in it for the Government of the United States.

As this paper said, the Senators mentioned called upon the Senate to build a big navy as an answer to that agreement. Yet, Mr. President, when we trace it down, it is made out of whole cloth; there is not anything to it.

What is the condition, Mr. President, over in Europe? What is the condition of our own country in regard to a navy that will necessarily demand such expedition? It has been urged from the very beginning of this session of Congress, by various newspapers and magazines all over the United States, that Congress ought to provide for the building of a big navy, and do it early. I have read criticisms in newspapers because the naval bill was not the first appropriation bill put through Congress, citing the fact that over in Europe, where the war is going on, there was going to come out suspicion against this Government at its close; that the war is liable to cease at any time, and that this Government would be at once involved.

Would we run any risk if we wait a while before we build our big navy? If we are bound to get into this race and build the biggest navy in the world, would we run a risk if we would wait until to-morrow before we commence?

Mr. President, there are many lessons to be learned out of the present war, lessons that we do not know about now. The program provided in this bill was originally a five years' program when it came from the Cabinet and from the General Board and from the President. There was a general belief when the bill was in the House that we needed battle cruisers. There was a good deal of talk about the fact that we did not have any; that the war was demonstrating, as far as it had gone, that the swift ship with the big gun was what we wanted, and therefore we had to sacrifice armor to get speed. Therefore we wanted battle cruisers. So they provided for the building of, I believe, six large battle cruisers. But before the bill got to the Senate there had been a naval battle fought in Europe and the program was changed. It was found that we needed battleships as well. It was found that while the battle cruiser was useful it was not the only pebble on the beach. We

had to change the program almost overnight. This program, which three months ago it was to take five years to complete, is now carried down to three years.

Mr. President, it only illustrates that you can not take a program and carry it out and be logical. It depends on things that may happen to-morrow about which we know nothing to-day. This bill illustrates it. Do we know now since that naval battle just exactly what we will learn later, and ought we not to know all we can about the war before we commence to construct this immense navy? Here is a letter from Rear Admiral Knight, just printed in this morning's paper:

Replies to Daniels's query—

Is the headline.

Declares Jellicoe's fast ships held foe until grand fleet arrived.

I will not read all of it. I only want to read enough to show that even now the experts do not know what the lessons are that we can learn from that battle; it is too early.

In my opinion—

Wrote the admiral to the Secretary—

neither Admiral Jellicoe's report nor any other source of information at present available affords a basis for definite judgment as to the actual results of the battle.

The most significant fact thus far established is that three British battle cruisers were sunk. It is not clear by what ships of the enemy fleet they were sunk, nor to how heavy a fire they were subjected, nor is it known whether they were destroyed by gunfire alone or by the explosion of their magazines.

Going to show, it seems to me, a good reason why, even though we were not trying to get any agreement for peace, we ought to wait before we embark upon this remarkable program of military expansion until we can get the lessons of the present war. Wait, Mr. President, until perhaps another battle. Mayhap it has taken place to-day between these navies or two other navies, that one has utterly obliterated the other navy off the face of the earth, and we would have no occasion to build battleships to contest against fleets that are on the bottom of the ocean.

Another thing, Mr. President, tending to show that anything which happens, innocent though it may be, is exaggerated, it seems to be a part of this propaganda relating to some great danger, the same paper from which I read a portion of the letter of the admiral, contains another announcement in glaring headlines, as follows:

More Japanese arrive. Mexican reports say colonies are being organized in force. Enter on the Pacific coast.

Those are the headlines. What for? To convey the idea to the people that Japan is about to capture us from the Pacific side of the country. When you read the article you find that there were 35 Japanese in this force of invasion.

Reports received in Washington through official channels—

It does not say the reports are official, but "through official channels." They have been tipped off by some official in the department.

Reports received in Washington through official channels yesterday show that Japanese are colonizing in Mexico in force. One official report said that 35 Japanese in one party had landed in Mexico at a west-coast port. Others have arrived in smaller parties at ports widely scattered on the coast. While Americans were coming out the Japanese were going in, officials said yesterday. It was apparent that officials looked on this colonization movement with some concern, especially since the recent official report—

Remember, it says "official report"—

showing Japanese partly responsible for the attack on the American troops at Carrizal gave evidence of hostility toward Americans among Japanese in Mexico.

Mr. President, have any of us before heard that Japan was to blame for some of Villa's bandits attacking or some of Carranza's bandits attacking the American forces in Mexico? Yet that is the idea that has gone out to the people. While the newspaper writer does not say that it is official—and, of course, it is not—he uses an innuendo, indicating that he had got it from official sources; and it may be that he did; I do not know—and that over in the Capital at Washington, among the officials of the Government, they are trembling in their boots for fear those 35 Japanese will come up through Mexico and conquer our country.

Mr. President, the other day, when the Military Establishment bill was before the Senate, some one who is now in the Hall came to me and said: "Do you notice those Japanese up there in the gallery?" I said I had not seen them; but he pointed out three men in the gallery who looked like Japanese. He said: They are in relays, and if you watch them you will see that when they go out more will come in. They are listening to this debate on the military bill." He was really worked up about it. I do not know but there may be some Japanese in the gallery now; perhaps there is a German there, and it may be that he will take back to the Kaiser what is said here. Some Englishman may wire it to-night to King George, of England, or even the powers in Turkey may be informed as to what we are doing here. However, is it necessary, Mr. President, to send spies to sit in the gallery of the Senate? Those people can read; the CONGRESSIONAL RECORD is accessible.

What I have stated only illustrates that ever since this propaganda has been going on in the eastern part of the country the people have been scared by the picture of the Kaiser, and over on the Pacific coast they drive the children off the street after dark by crying, "The Japs are coming." These things will go to the other countries and even result in legislation in this country and other countries originating out of nothing.

Mr. President, the nations of Europe—and this takes in all of the European nations—now fighting are all disappointed. They all now know that their preparedness has been a failure. One Senator very eloquently said to-day that weakness brings war, and yet it is true that the strong nations of the world are to-day at war. It is said that preparedness preserves peace, and yet the two nations of all the world that have made the greatest preparedness on the sea and on the land are fighting each other to-day.

The cause of the European war, or one of its causes, was this eternal preparation for war, which has been going on for 50 years. Now we are going to get excited because some friendly nations, much as we may regret it, are killing each other and practically bankrupting all of the nations but ours, for fear that the cripples and the widows and the orphans that are left are going in some way to construct a raft, after the fleets are destroyed, and come across the Atlantic Ocean and capture the United States!

Why, Mr. President, one of the greatest—and he is one of the greatest—writers of the country, connected with one of the greatest publications, perhaps the one which has the largest circulation of any in the United States, has written a good many articles about preparedness. I saw him not long ago and asked him if he really believed all he wrote. He said, "I am excited; I am worked up about it. There is only one thing now to keep us from being conquered by Germany, and that is the English fleet. We are protected now by the English fleet." I had read an article which he had just previously written, in which he outlined how Germany with 250,000 men could come over here and capture this country overnight. It is true that our experts—Maj. Gen. Miles and others—stated that we have the best coast defenses known to man. Just before I took the floor we had a Senator, who himself once belonged to the Navy, telling us that the personnel of the American Navy was the best in the world; and yet the people of the country have been led to believe that our Navy is worthless and that we have no coast defenses. Gen. Miles said he thought there ought to be more coast defenses, but that those which we had were up to date and the best which were in existence anywhere on earth, in his judgment.

Mr. President, I do not believe there is any danger of an attack from Japan, from Germany, or from any other foreign country. I think we ought to have a navy and an army well equipped and of reasonable size, but I can not agree with the widespread contention that we ought to enter into a military race with the balance of the world, the object being to get the largest army and the biggest navy in existence.

Right here, Mr. President, I desire to say that some of the people who believe in this program say that we do not want the biggest navy, but that we want the second largest navy; that we want to be second only to England. It has been stated in this debate on this floor that we have no fear of war with England because of Canada; and yet the same men who say we shall never have war with England because Canada adjoins us for 4,000 miles along our border line will protest and go into hysterics if a couple of Japanese on a rowboat should land anywhere along the coast of Mexico. If England will not go to war with us because she has territory adjoining us, why would it not be a good idea, in order to preserve peace, to give the Kaiser a little strip of territory somewhere in our country in order that we might have peace with him, or to give Japan a few acres, and then say the danger is past? But, Mr. President, as was said so eloquently by the Senator from Idaho [Mr. BORAH] to-day, the nations that are at war now were at peace just a few weeks before they got into war. How, then, do we know that it will not be England with whom we shall be engaged in war. If we follow the history of the last year or two, we shall realize that we are just as likely to have war with England as with any other country. If that be true, then, why should we not have a bigger navy than has England? How do we know that England, France, Russia, and Japan will not combine against us as they combined against Germany?

If that be true, then why should we not say that we must have a navy and an army bigger than the combined armies and navies of all these countries? That, it seems to me, would be the only logical course.

Our Navy, as well as the navies of other nations, must depend somewhat as to its size upon the size of other navies. If other countries of the world build immense navies, we must, to a certain extent, increase ours. If we start on the proposed program with a view of getting the largest navy in the world it will incite the other nations, and it will be a race that will be ended only when taxation exhausts the people. Those engaged in the manufacture of armor plate, munitions of war, and other things necessary for the support of the Navy and Army would make immense fortunes, as they have already done. The balance of the people would get poorer and poorer with the increased taxation, until the country would become bankrupt, or we would have, in the course of years, a class of aristocracy and another class of citizens who would be practically slaves. All the property would be held by a few, and in the end it would mean revolution.

At the present time the balance of the world is fighting. The nations will exhaust themselves both in men and in money. At the close of this war in most of the leading nations the population will be composed of women and cripples—the nations' paupers, bowed down with debt and overcome with sorrow. In this condition it seems to me perfectly foolish to think that they will undertake to make war upon us. They will be less prepared for it at the close of the war than they have been at any time within the last hundred years.

Mr. President, the people of Europe now engaged in this titanic struggle will be so sick of war that if a ruler of any European country should undertake to make war upon America, provided America minded her own business and remained neutral, there would be a revolution in that country.

Mr. CLAPP. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Minnesota?

Mr. NORRIS. I yield to the Senator.

Mr. CLAPP. I should like to ask the Senator if he does not think that there are very likely to be some upheavals after the war, regardless of the suggestion he has just made?

Mr. NORRIS. If the war keeps on much longer, there will probably be some upheavals before the war is closed.

Mr. CLAPP. I think not.

Mr. NORRIS. I think there will be if the war continues long enough.

Mr. CLAPP. If the Senator will pardon me, so long as a nation is at war, and the people of that nation are made to believe that it is fighting a battle for its existence, it will stand anything. It is after the pressure and the strain of the contest pass that the trouble comes.

Mr. NORRIS. Oh, yes; they are all patriotic, but Mr President, when the people of Germany and the people of England and the people of France begin to realize that between the people themselves in those nationalities there is no hatred, there is no enmity, there is nothing but friendship, and that it is only the rulers who have brought on the war, they will have a vastly different feeling. The German farmer and the French farmer, tilling the soil with only an imaginary line between their farms, were friends and they will begin to realize after a while, if this war does not cease, that they have been brought into this struggle without reason, without justice, and with neither one of them having any wrong to be righted by the cruelties of war, and then there will be revolution.

The idea of Germany landing two hundred or two hundred and fifty thousand men on our shores and capturing our country at the close of this war does not seem to me to be reasonable or even sensible. I know that a great many wise men, honest men, patriotic men, think that this is not only possible, but that it is extremely probable. A great many men think it is a certainty. In the first place, Germany will not think of such a thing, and, in the next place, if she did, it would be utterly futile and idiotic to undertake it. She could no more land her soldiers on our soil and capture our country than England was able to capture the Dardanelles with the greatest navy that the world has ever known and with a fleet of transports many times greater than Germany ever has had or would have at the close of this war. In the first place, there would be no reason why Germany should want to do this. In the next place, she will be bankrupt when the war is over, the majority of her best soldiers will be dead, and the balance of them will be mostly cripples. She will be taxed to death and sick of war. If such a thing were possible or had ever been desired by the German people, they would have done it long ago, before this war began. Although England has a navy several times larger than Germany and although she is allied in the war with France, another nation that has a large navy, their combined efforts have not been able in the present war to drop a single shell from a naval vessel upon German soil. With her great navy England was unable to take the Dardanelles, a country that was but poorly fortified and manned by guns that are out of date. She has not been able to properly blockade a single German port. This has not been on account of Germany's navy. She has not been able to approach the ports because of mines that have been put in the waters since the beginning of hostilities, or within a few days or weeks prior to their actual commencement. We must remember, too, that England's base of supplies is but a few miles away from the German ports. Think how Germany would be handicapped with her base of supplies on one side of the Atlantic while undertaking to conquer a country like ours, on the other side of the ocean. She could not land a single man; she could not take a single port. Germany knows it. She would not undertake even if she had the desire. I am saying all this on the theory that Germany wants to do this. I do not believe she does. When this war is over she will be as anxious for peace as we are. If she had this in mind, she would have done it before the beginning of this war, when she was in much better shape than she is now or will be at its close.

It seems to me that it is equally foolish to think of Japan conquering this country. Her base of supplies will be more than 4,000 miles away from our Pacific coast. Japan has a population of about one-half of what we have. The whole area of Japan is less than that of California, and a large part of her area is not susceptible of cultivation. The wealth of Japan is about half of the wealth of the State of New York alone. The national debt of Japan is greater than the national debt of the United States, and her wealth is less than one-twelfth of the wealth of the United States. The taxes in Japan are much heavier than they are here, brought about on account of her war with Russia and the present war. The two principal products of export of Japan are tea and silk. The United States takes the most of her tea and the larger part of her silk. A war between this country and Japan would mean that Japan's best customer would be at once cut off. We could get along without tea and without silk, but Japan would be bankrupt if she could not sell her tea and silk. It would be perfectly foolish for Japan to go to war with America in her present financial condition, and thus cut off her greatest and best source of revenue, without material injury to us. The United States has a larger Navy than Japan.

In order to transport her troops to America, Japan would have to bring them across 4,000 miles of water in transports. A liberal estimate would be that she could bring 1,000 men on a transport. Each transport would have to be guarded by a naval vessel. She has neither the transports nor the naval vessels for such a purpose. It would not do to come across this large expanse of water with transports unguarded and unprotected. A navy inferior to hers could prevent her from doing this, because one shot would sink a transport. Her war vessels could not carry enough coal to make a round voyage, and a single hostile vessel could prevent new supplies from being sent.

The idea of war with Japan is usually given publicity just before we are to pass the naval appropriation bill. Prophecies have been made ever since I have been in Congress that in the very next year we would be at war with Japan. Quotations are made from Japanese often to sustain this theory, and yet, if you will trace it down, you will find that such sentiments do not represent the Japanese people. The great majority of the Japanese people do not want war with us any more than the majority of our people want war with them. The wiser heads in Japan, in addition to this, know that the war with us would mean disaster if Japan were the aggressor. I am basing all I say upon the theory that no one here wants to make war upon Japan. If our plan was to go across the ocean and attack Japan, then I concede that we ought to increase our Army and Navy manyfold. But if we want to remain at peace, all we have to do is to keep quiet, deal fairly with our neighbors, and discount this war talk that is given wide circulation by men who have already made millions and want to make millions more at the expense of the common citizen.

This talk about war with Japan originates mainly with men who either do not understand the situation or who are anxious to have the United States embark on the enormous expenditure of building up a huge Navy and establishing a large Army. There are, of course, many honest men who favor such a course and who are agitated on the subject. If you will analyze it you will find that the present campaign that has been made throughout the United States in favor of a big Navy and a large Army originates to a great extent with men and institutions that would make money by such a course. Why is it that when the balance of the world is prostrate, struggling in pools of human blood, bowed down with the burden of taxation, starving and suffering for food, we should all at once become excited for

fear, notwithstanding this condition, they would make an attack upon us? If we fear, as some people do, that when these nations that are now fighting each other exhaust themselves they will immediately combine and unite in an attack upon us, how do we explain the fact that they did not do this before the war and before exhaustion?

When the bloody conflict in Europe is over, as everybody knows that in time it must be, we should be in a position to take an important part for the benefit of humanity in the settlement of the controversy. We will not be in shape to do this if it is known that we ourselves are aspiring to be the greatest military Nation in the world. We can not extend one hand in fellowship while the other, behind our back, is filled with munitions of human destruction. Humanity is much the same the world over, and I can not help but believe that the people of all nations at the close of this war are going to be unanimously in favor of a world permanent peace. My own idea is that when the war ceases and it becomes necessary for a treaty of peace to be made the United States will be in condition, if we keep our own skirts clear, to suggest to all other nations of the world that the treaty of peace should be signed by us as well as the warring nations, and should provide for the limitations of armaments, for the limitation of navies, and perhaps for an international navy to do police duty. We will have a world's peace just as soon as the nations of the earth do not have such an overabundant supply of guns, ammunition, war vessels, and other elements of human destruction. A treaty of peace that would turn the navies of the world into scrap iron and provide for a few vessels that should be international in their service, for the purpose of doing police duty, will bring about a never-ending peace. Is it not possible, indeed is it not probable, that this much-desired condition can be brought about at the close of the present gigantic struggle? Is it not worth while that the United States, for the benefit of humanity, should make an honest attempt to bring about this condition? We can not do it if we ourselves are engaged in a mad rush to have the biggest Army and the largest Navy of the world.

So many people who favor the enlargement of our Army and Navy neglect to take into consideration the fact that such a program means an enormous increase of taxation. Congress levied last session the so-called war tax, and has extended the same law this session. This provision for increased taxation would have been necessary even if there had been no war, because we were gradually running behind before the war began, and had been for about a year. If we undertake the so-called preparedness program, no man can now tell how high the taxes are bound to go. This race for supremacy in military affairs we must remember is one that can be engaged in by others as well as ourselves. It is absolutely impossible to say now that we will begin a program that will land us on the top in a certain number of years. We can not engage in this enormous military expansion plan without exciting the military men of all other nations. It is perfectly foolish to think that the other nations of the world are going to remain idle and permit us to build up this Army and Navy without entering into the race. And when we say now that the plan can be carried out by certain appropriations in a certain number of years in the future, we do not take into consideration the fact that when the other nations enlarge their military programs we will have to again increase ours. The result will be that instead of increasing taxation, as has been estimated, we would have to increase in the years that are to come the estimates in an enormous ratio. Instead of the expenditure being one or two billions, we must count that in this race which it is proposed we should enter the expenditure would be many, many billions. Instead of ten or twelve dreadnaughts, we would have to build hundreds of dreadnaughts. Instead of hundreds of other ships, we would have to build thousands of other ships. Instead of thousands of additional sailors, we would have to have millions of additional men to man these vessels. Instead of an army of four or five hundred thousand, as is proposed, we would have to have an army of four or five million. There would be absolutely no stopping place. It would mean a race to destruction, to exhaustion, to poverty for the great masses of the people. It would be an exhaustion similar to the exhaustion of actual warfare, with the only difference that in one case it would be long drawn out, while in the other it would be quick and decisive.

How can we raise this money? I fear that the President's preparedness plan is to go through. He has always succeeded in controlling his party and, while there is rebellion in some quarters, he will get recruits sufficient to make up the loss from the Republican Party. If the plan does go through and we come to the question of raising the revenue to carry it out, I am in favor of producing this additional revenue from two sources—first, by increasing the income tax on large incomes; and, second, by a progressive inheritance tax, that will tax bequests in a progressive way, beginning with a nominal tax and running up to a tax of 50 or 60 per cent where the bequest runs up into the millions.

Mr. CLAPP. Mr. President, will the Senator pardon a question?

Mr. NORRIS. Yes.

Mr. CLAPP. Does the Senator for one moment dream that the force behind this propaganda would then turn around and permit the burden of taxation to be placed upon themselves?

Mr. NORRIS. Probably not.

Mr. CLAPP. A more iridescent dream was never indulged in than that the Senator is now indulging.

Mr. NORRIS. But, Mr. President, there are evidences right now that that very system of taxation will eventually be brought about if this program is carried out to its extreme and to its logical conclusion. There have been, from the beginning of history, instances galore everywhere showing that men who crowd the people into a program of this kind do not realize that they are fastening chains about their own necks. The proposition of taxing the ordinary person out of existence and out of a living, until his children go cold and unfed and naked, means that there will come a time when they will not stand it longer; and the men who bring it about will be the sufferers, with everybody else, when that time comes.

Mr. CLAPP. Mr. President, will the Senator pardon another interruption?

Mr. NORRIS. Yes.

Mr. CLAPP. There is abundant reason why that human force that is either back of war which is unjust and unfair, or which imposes unjust burdens, should feel secure from the burden so imposed; because in all history, universally, the men who are responsible for the war are not the ones who are called upon to bear the burden, either on the field of battle or in the realm of taxation.

Mr. GALLINGER. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. GALLINGER. I observe that the Senator is going to raise the enormous revenue that will be required by increasing the income tax upon those who have large incomes and through a progressive inheritance tax. I will ask the Senator if he is not in favor of revising our tariff laws so that the foreigner will contribute somewhat?

Mr. NORRIS. Yes; I am.

Mr. GALLINGER. I am very glad the Senator adds that to his list.

Now, Mr. President, one other remark, if the Senator will permit me. The Senator speaks of the purpose of making our Navy the greatest navy of the world. I do not think anyone has ever made that suggestion, except that the President of the United States on a certain occasion, in a moment of mental aberration, as I think, did make that suggestion; but those of us who have some interest in the Navy of the United States have never dreamed that we would even reach, much less excel, the naval armament of Great Britain.

Mr. NORRIS. Mr. President, I tried to show a while ago that the men who believe in the second largest navy, in order to be consistent, ought to believe in the largest navy; that there is just as much reason to think we would get into war with England as with Germany or with Japan or with France. As was said to-day by the Senator from Idaho [Mr. BORAH], two weeks before this war in Europe began these nations were friendly. Almost in the twinkling of an eye old friends became enemies; and that is a common thing among men when they go into the military business.

When your neighbor arms himself with a shotgun and somebody tells you he has bought it because he is watching you, you buy a shotgun. The next day somebody tells you he has bought a revolver, and you buy one. He probably tells him, after you have bought yours, that you have bought it, and then he buys a gatling gun. When you find that out from the same source, you arm yourself a little further. You get some dynamite. You go to investigating making shells and all kinds of infernal machines; and this same busybody tells your neighbor, every time that is done, what you are doing, and he does something more.

That is what France did; that is what Germany did; and that going on between two men means after a while that they are going to fight, and each one of them is doing this for self-defense. Why, Mr. President, every time Germany took a step in building up her army, every time Great Britain or any other country built a new battleship, it was always for peace and defense; never for aggression.

Mr. GALLINGER. Mr. President, if the Senator will permit me, the Senator very wisely observed a few moments ago that there was not any danger of the United States being involved

in a war with Japan, because Japan would have to cross the Pacific Ocean to attack us, and she would be at so great a disadvantage that she would have no chance whatever of conquering the United States. Now, to a very large extent that applies to Great Britain. Great Britain has to cross the Atlantic, and while Great Britain is approaching our shores we have our submarines, our mines, our aeroplanes, our coast defenses, and our Navy; and we have Canada on the north of us, which Great Britain would be considerably anxious about. I really think there is quite as little danger of a war with Great Britain as there is of a war with Japan, and I do not believe there is danger of war with any nation on the face of the earth.

Mr. NORRIS. I agree with the Senator on that. Mr. President, we have a treaty with England by which both nations agree not to put battleships on the Great Lakes. We have 4,000 miles of boundary line, only an imaginary line, with not a soldier, not a fort, anywhere. It has been there for years and years and years, with no danger of war. If England should commence to build battleships on Lake Erie, then we would have to do likewise; and if we built a fort along the line, she would build one on the other side of the line, and when we got armed to the teeth we would commence to fight. It is natural. These armaments lead to war; and these two neighbors that I was describing, buying their revolvers and their shotguns and their dynamite and their bomb-throwing machines, would eventually get to shooting across the line fence, and somebody would get killed.

Now, who are our neighbors? Why, our neighbors are cripples. We will find at the close of this war that the neighbor we are arming against is in the hospital. He is bankrupt, as the Senator says. He has lost all his property; he has a mortgage on his home and the mortgagee has commenced foreclosure. He has lost one leg at the knee and the other at the hip. One arm is cut off at the elbow and the other one at the wrist. He has had one eye shot out, and he has a cataract on the other one. One of his lungs is gone, and he has tuberculosis in the other one. He has cancer of the stomach. He is "all in"; he is all gone; and yet we are going to go into the greatest military-expansion program and appropriate more money to defend ourselves against him than was ever appropriated in any one bill in the history of civilization in time of peace.

In many cases this program I have been speaking of will make billionaires of present millionaires. Men engaged in the manufacture of arms and ammunition and other equipments of war will get rich at an enormous rate, while the poor will get poorer. We can not place the wealth of the country in the hands of a fewer number of people without increasing to a very large extent the number in the poorer classes. Carry this out to its logical conclusion and this same Army will be expected to be used in the protection of the property that is thus congregated and amalgamated in the hands of a comparative few. If those who are already rich are to be made richer by this scheme, then it seems to me that they should at least bear the chief burden of the expense.

Railroad rates have already been boosted, both in the East and in the West, this on the plea that the railroads were poor and were not making any money, and in the face of the fact that the cost of living is gradually going up every day. And now we have the condition where railroads are refusing to take certain classes of freight because they have so much to do they can not handle the business. In the main, the same class of people who are now crying aloud in apparent distress for the expenditure of money in the building up of an Army and Navy were the ones who in the same way, through the same newspapers, built up a sentiment in favor of increased railroad rates, yet they say nothing now of a reduction of rates, when it is admitted that the railroads are doing such a large business that they are absolutely swamped. The same President who used his influence and the influence of his office to bring about the increase in railroad rates is urging the preparedness program. The program means that the cost of living must go higher and higher and that, therefore, the income of the poor man will be insufficient often to keep soul and body together. This false cry in favor of militarism, if carried to its logical conclusion, means suffering in the end for the common people. Europe is being bankrupted by war, and if we continue in this pace we will be bankrupt in times of peace getting ready for war. This propaganda in America will increase the wealth of those already rich, and to the same extent, through the increased cost of living, decrease the wealth of the countless poor. If we would take out of this propaganda the interested ones, the ones who are in it for the dollars and cents, if we would rise to a higher plane of morality and consider the welfare not only of our people but of humanity, we could not help, it seems to me, to realize that we are already treading on dangerous ground. The man who has an income of several hundred thousand dollars and from that up to several millions of dollars is not affected in any appreciable degree by the increased cost of living, but the man who has an income that is already stretched to support himself and family, to clothe and feed his wife and children, can not stand much more of an increase without becoming a pauper.

In a general way, the poor man has to have about as much food and clothing as a rich man. It takes just as much to satisfy the stomach of a pauper as it does the stomach of a millionaire. It takes just as much clothing to protect the little child of the laborer as it does the child who lives in luxury and never knows want. In addition to this, the poor man, as a rule, has several children to the rich man's one. There must be a reckoning somewhere some day, and the wealth and military spirit are leading at a pace and a rate that will bring down upon their own heads the destruction of government and law. We ought to take heed; we ought to take warning; we ought to realize that this race can not always be kept up without ruin.

I am not one who believes in a policy of peace at any price. I do not think, however, that the present time is one when we should embark upon an increase in the Army and Navy. This war will teach us many lessons, and if at its close a treaty is not made that will in a reasonable degree at least insure the peace of the world, then we should take advantage of the lessons that the war has taught in the way of armor, guns, and ammunition, in future additions to our Army and Navy. With perhaps one exception, there has been during the present war no general engagement by the navies of the belligerents. We have learned some lessons, it is true, but there are many more that we will learn and understand when the war is over. It is undoubtedly true that we can build fighting ships, make guns and ammunition of a better quality when the lessons of this war are thoroughly learned, than we can make with the information that we have now. Already there has been an improvement in submarines that has put all submarines that were in existence at the beginning of the war out of date. The same may be true in regard to the guns and to shells and other munitions of war. Why should we not wait and see what all the lessons of the war really are, and then if we desire to increase our Navy or our Army, take advantage of these lessons and build a Navy and recruit an Army that will be in every respect modern and up to date?

Mr. President, I have offered the amendment that is now pending, having in view first the belief that it proposes a condition that all men are in favor of if it could be brought about. I know that many men honestly think it is a dream; that it is idle, and that it can not be brought about, simply because it never has been brought about. It is a step every man knows, every man believes, and every man will admit which is in the right direction. If we can take that step, if we make an honest effort, assuming that we do not succeed and that it results in failure, we all know that the lesson to the world in the willingness of America to hold back her program of building these naval vessels will be an influence for good upon the world. It will place us on a higher pedestal with the other nations of the world.

Even though we think it can not succeed we have no reason not to try it unless we will lose by the delay, and I think I have shown and it has been shown over and over again that there is no possibility of loss by delay. There is no danger of war with crippled and ruined nations, and besides by a delay we will get the benefit of doing what we may decide upon at its close in the most modern and the most scientific way known to mankind.

Why not, then, wait? Why not hold off this part of the building program until the lessons of the war are taught? If we had no other motive than just to get the best Navy possible, it seems to me we ought to do it. There is only one excuse for not doing it, and that is the fear that in the meantime somebody will attack us.

But, Mr. President, there is a possibility of accomplishing something toward international peace if we take this course and hold back this building program until the war is over. I do not believe any man doubts that all of the nations of the world are anxious for peace now. They have all gone into the war with the belief that they were going to accomplish something that they found after they went in they could not accomplish. They realize now that it means destruction. Even if the war ceased to-day it would be a hundred years before they could recuperate. There is no indication of its stopping now. It is practically now a war of exhaustion, and when it is over, crippled and bowed down with overtaxation, they are going to demand that their rulers shall not be again guilty of going into a useless and worthless war.

Mr. President, while there are various causes and various reasons that may be given for the war, in my judgment I think all history demonstrates, and the present condition of the

nations demonstrates, that they got into this war because it was a natural result of the military program of the rulers in Europe. They led their people to believe that such a program in every case was necessary to defend themselves. The people had no idea that the people of the adjoining nation hated them, but they were led to believe that they had to arm themselves, that they had to drill, that they had to tax themselves, that they had to make big guns, that they had to make ammunition, and that they had to build big battleships and expend millions and millions of money in order to defend themselves against the neighbor on the other side of the line, and the ruler over in the other country instilled the same kind of a sentiment in his people.

These people know now that they were deceived. They were also led to believe that it would be easy to conquer any other nation in the world, or, in some instances, all the world combined. They know now that that is not true, and never has been true and never will be true; they know now that they are meeting foes in every case who are worthy of their steel, prepared like they were, some prepared along one line and some along another, but prepared in every case for defense, and prepared for peace in such a way that the logical and only result means war. And, Mr. President, if we go on, if we build the battleships outlined in this program and then find that in a year or two we shall have to double the program, it will not be long until we will be in war. Expanding military and naval power leads to it; there is no other outlet, because every battleship that we build will be considered a menace by every other nation in the world, just as we consider their battleships a menace to our peace, our prosperity, and our happiness. So when we do for peace what they do for peace, which in every case means war or preparation for war, war will come and there will be no escape from it.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Nebraska.

Mr. SWANSON. Mr. President, the amendment of the Senator from Nebraska would be absolutely fatal to this bill. It would mean that all construction would be stopped for an indefinite period. Furthermore, this bill, on page 181, makes splendid provision for a peace conference. It directs the President, as soon as the European war has terminated, to invite the nations of the earth to a conference, authorizes him to appoint nine eminent citizens to attend such a conference, in an effort to secure an agreement for disarmament, and also a tribunal to settle difficulties international in character. It also authorizes the President when peace is made, when disarmament occurs, and when conditions arise which shall render unnecessary the maintenance of competitive armaments, not to enter upon the construction of the building program provided in this bill. I think that is ample; and I move to lay the amendment of the Senator from Nebraska on the table.

Mr. NORRIS. Mr. President, I hope the Senator will not do that. There is no attempt here to cause delay. I do not object, if no Senator desires to speak upon it, to voting on the amendment at once; but I should like a roll call on it, and I do not think the Senator ought to take that course in respect to this amendment. Let us vote on it on its merits.

Mr. SWANSON. Mr. President, the only way in which cloture, even in a modified form, can be applied in the Senate is to move to lay on the table. We have spent all day on this bill.

Mr. NORRIS. But we have not spent all day on this amendment.

Mr. SWANSON. We have made very slow progress. I think it is understood by all that when a Senator moves to lay an amendment on the table he is opposed to the amendment, and the sense of the Senate in regard to the amendment can be tested by a vote on the motion to lay on the table as well as by a direct vote on the amendment itself.

The VICE PRESIDENT. The Senator from Virginia moves to lay on the table the amendment proposed by the Senator from Nebraska.

Mr. NORRIS. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CATRON (when his name was called). I am paired with the Senator from Oklahoma [Mr. OWEN], who is absent. If I were privileged to vote, I should vote "yea."

Mr. CLAPP (when his name was called). Owing to the absence of the senior Senator from North Carolina [Mr. SIMMONS], with whom I have a general pair, and not knowing how he would vote, if present, I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator I withhold my vote.

Mr. THOMAS (when his name was called). I inquire if the senior Senator from North Dakota [Mr. MCCUMBER] has voted?

The VICE PRESIDENT. He has not.

Mr. THOMAS. I withhold my vote, having a pair with that Senator.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "yea."

Mr. VARDAMAN (when his name was called). I have a general pair with the Senator from New York [Mr. WADSWORTH]. In his absence I withhold my vote. If I were permitted to vote, I should vote "nay."

While on my feet I desire to announce the absence on official business of the junior Senator from Kentucky [Mr. BECKHAM]. He is paired with the senior Senator from Delaware [Mr. DU PONT].

Mr. WALSH (when his name was called). I transfer my pair with the Senator from Rhode Island [Mr. LIPPITT] to the Senator from Arkansas [Mr. ROBINSON] and vote "yea."

I further desire to announce that my colleague [Mr. MYERS] is absent on account of continued illness.

The roll call was concluded.

Mr. CURTIS (after having voted in the negative). I transfer my pair with the junior Senator from Georgia [Mr. HARDWICK] to the Senator from Vermont [Mr. PAGE] and let my vote stand.

Mr. CATRON. I transfer my pair with the Senator from Oklahoma [Mr. OWEN] to the Senator from Idaho [Mr. BRADY] and vote "yea."

Mr. THOMAS. I transfer my pair with the Senator from North Dakota [Mr. MCCUMBER] to the Senator from Oklahoma [Mr. GORE] and vote "yea."

Mr. MARTINE of New Jersey. I desire to announce that the Senator from West Virginia [Mr. CHILTON] is absent on public business, and that he is paired with the Senator from New Mexico [Mr. FALL].

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from Michigan [Mr. SMITH] with the Senator from Missouri [Mr. REED];

The Senator from New Hampshire [Mr. GALLINGER] with the Senator from New York [Mr. O'GORMAN];

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD]; and

The Senator from Massachusetts [Mr. WEEKS] with the Senator from Kentucky [Mr. JAMES].

The result was announced—yeas 33, nays 11, as follows:

YEAS—33.

Broussard	Lee, Md.	Pittman	Swanson
Catron	Lodge	Poindexter	Taggart
Clark, Wyo.	Martin, Va.	Pomerene	Thomas
Fletcher	Martine, N. J.	Ransdell	Tillman
Hollis	Nelson	Sheppard	Townsend
Johnson, Me.	Oliver	Sherman	Walsh
Johnson, S. Dak.	Overman	Smith, Ariz.	Warren
Jones	Penrose	Smith, Ga.	Williams
Kern	Phelan	Smoot	

NAYS—11.

Brandegee.	Curtis	Kenyon	Norris
Chamberlain	Gronna	La Follette	Sterling
Cummins	Hitchcock	Lane	

NOT VOTING—49.

Ashurst	Fall	McLean	Smith, S. C.
Bankhead	Gallinger	Myers	Smith, Mich.
Beckham	Goff	Newlands	Stone
Borah	Gore	O'Gorman	Sutherland
Brady	Harding	Owen	Thompson
Bryan	Hardwick	Page	Underwood
Chilton	Hughes	Reed	Vardaman
Clapp	Husting	Robinson	Wadsworth
Clarke, Ark.	James	Saulsbury	Weeks
Colt	Lea, Tenn.	Shafroth	Works
Culberson	Lewis	Shields	
Dillingham	Lippitt	Simmons	
du Pont	McCumber	Smith, Md.	

The VICE PRESIDENT. On the motion to lay on the table the yeas are 33 and the nays are 11——

Mr. CLAPP. Mr. President, before the announcement is made, I understand that where a Senator is paired he may be counted as present. I desire to be counted as present.

The VICE PRESIDENT. The Chair is counting the Senator from Minnesota [Mr. CLAPP], the Senator from Wyoming [Mr.

CLARK], and the Senator from Mississippi [Mr. VARDAMAN] as present and not voting; but that does not make a quorum.

Mr. SWANSON. What was the vote?

The VICE PRESIDENT. Thirty-three yeas and 11 nays and 3 Senators present and not voting.

Mr. CLARK of Wyoming. Mr. President, while I am counted as present and not voting because of the pair, I desire to be recorded, if I can at this point, as transferring my pair to the Senator from Idaho [Mr. BORAH] and voting "yea."

The VICE PRESIDENT. Is there any objection? The Chair hears none, and by unanimous consent that will be done.

Mr. SMITH of Georgia. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia ask unanimous consent to vote?

Mr. SMITH of Georgia. I do. I did not know it was too late.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will call the name of the Senator from Georgia.

The Secretary called the name of Mr. SMITH of Georgia, and he voted "yea."

The VICE PRESIDENT. Now the vote is 35 yeas and 11 nays, which makes 46, and, with Senators CLAPP and VARDAMAN present and not voting, that makes a quorum. The motion to lay on the table is agreed to.

EXECUTIVE SESSION.

Mr. SWANSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 4 minutes spent in executive session the doors were reopened.

DEATH OF REPRESENTATIVE MOSS, OF WEST VIRGINIA.

The VICE PRESIDENT. The Chair lays before the Senate resolutions of the House of Representatives on the death of the late Representative Moss, of West Virginia, which will be read.

The Secretary read the resolutions, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. HUNTER HOLMES MOSS, a Representative from the State of West Virginia.

Resolved, That a committee of 10 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House is authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions, and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the House do now adjourn.

In accordance with the provisions of the foregoing resolutions, the Speaker appointed as the committee on the part of the House Mr. SUTHERLAND, Mr. LITTLEPAGE, Mr. NEELY, Mr. COOPER of West Virginia, Mr. BOWERS, Mr. WEBB, Mr. RUCKER, Mr. CHIPERFIELD, Mr. PARK, and Mr. MOONEY.

Mr. KERN. Mr. President, I send to the desk the following resolutions and ask that they be read.

The resolutions (S. Res. 234) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Hon. HUNTER HOLMES MOSS, jr., late a Representative from the State of West Virginia.

Resolved, That a committee of six members of the Senate be appointed to join with the committee of the House of Representatives to take order for superintending the funeral of the deceased.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives.

The VICE PRESIDENT. The Chair announces as a committee on the part of the Senate to attend the funeral of Hon. HUNTER HOLMES MOSS, jr., late a Representative from the State of West Virginia, Mr. CHILTON, Mr. GOFF, Mr. BRYAN, Mr. OLIVER, Mr. STERLING, and Mr. HUSTING.

Mr. KERN. Mr. President, as a further mark of respect to the memory of the deceased, I move that the Senate take a recess until to-morrow morning at 10 o'clock.

The motion was unanimously agreed to; and (at 6 o'clock and 30 minutes p. m., Monday, July 17, 1916) the Senate took a recess until to-morrow, Tuesday, July 18, 1916, at 10 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 17, 1916.

MEMBER OF BOARD OF CHARITIES.

David J. Kaufman, of the District of Columbia, to be a member of the Board of Charities of the District of Columbia for a term of three years.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

Maj. Harold L. Jackson, Infantry, unassigned, an additional number in his grade, to be lieutenant colonel from July 1, 1916, the date on which he would have been promoted to fill a vacancy in that grade in his arm had he not been retired from active service, and to be an additional number in that grade.

First Lieut. Charles S. Caffery, Fifth Infantry, to be captain from July 1, 1916, vice Capt. William F. Creary, Sixteenth Infantry, promoted.

First Lieut. Fred A. Cook, Nineteenth Infantry, to be captain from July 1, 1916, vice Capt. John H. Hughes, Third Infantry, promoted.

Second Lieut. George D. Murphey, Tenth Infantry, to be first lieutenant from July 1, 1916, to fill an original vacancy.

NOTE.—The above-named officers were nominated to the Senate on July 10, 1916, for said promotions under names Charles F. Caffery, Fred A. Cooke, and George D. Murphy, respectively, which nominations are hereby withdrawn.

CONFIRMATION.

Executive nomination confirmed by the Senate July 17, 1916.

JUDGE OF THE COURT OF CLAIMS.

James Hay to be judge of the Court of Claims.

HOUSE OF REPRESENTATIVES.

MONDAY, *July 17, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou great and holy One, whom we worship as the Father of all souls, purge us in Thine own way from inordinate desires, encourage every pure thought and earnest aspiration which makes for the betterment of the home, society, Government, and religious attainments, that we may trust and fear not, hope and despair not, pray and doubt not, that we may indeed be citizens of the kingdom of heaven, ever inspired by the forward look. The angel of death has visited this representative body and taken away from us a Member who made for himself an enviable record in all that pertains to the high calling of its membership. We mourn his untimely going and our hearts go out in sympathy to the bereaved wife and fatherless children. May his memory live to the inspiration of all, and may we all trust in the blessed promises of Him who said, "I am the resurrection and the life." Amen.

The Journal of the proceedings of Saturday, July 15, was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the amendments of the House to bills of the following titles:

S. 35. An act to authorize the Secretary of the Interior to issue patents for certain lands to the town of Myton, Utah; and

S. 36. An act to authorize the Secretary of the Interior to issue patents to certain lands to the town of Duchesne, Utah.

The message also announced that the Senate had passed the following resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the message showing agreement to conference report on the bill (S. 5425) to standardize lime barrels.

RELIEF FOR ARMENIANS.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to take up Senate concurrent resolution No. 12, asking the President to designate a day on which citizens of this country may give expression to their sympathy by contributing to the funds now being raised for the relief of the Armenians in the belligerent countries.

Mr. MANN. Mr. Speaker, I ask for the regular order. I understand a conference report is to be presented, and then I wish to make an announcement.

The SPEAKER. The gentleman from Illinois objects.

Mr. FLOOD. Would the gentleman from Illinois [Mr. MANN] withhold his objection for just a minute or two until the gentleman from Massachusetts [Mr. WINSLOW] can make a statement in relation to this matter?

Mr. MANN. Not this morning.

EXTENSION OF REMARKS.

Mr. LANGLEY. Mr. Speaker, I desire to ask unanimous consent to extend my remarks in the RECORD on the subject of pensions.

The SPEAKER. Is there objection?

There was no objection.

THE LATE REPRESENTITIVE MOSS, OF WEST VIRGINIA.

Mr. MANN. Mr. Speaker, it is my sad and painful duty to announce to the House the death of one of its distinguished Members, HUNTER HOLMES MOSS, of the fourth congressional district of West Virginia, who passed to the world beyond on Saturday last. At some subsequent day the House will be asked to set apart a time at which Members can pay their tribute to the life, character, and distinguished services of this faithful representative of the people, and at present I ask for the consideration of the resolutions which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolutions.

The Clerk read as follows:

House resolution 308.

Resolved, That the House has heard with profound sorrow of the death of Hon. HUNTER HOLMES MOSS, a Representative from the State of West Virginia.

Resolved, That a committee of 10 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House is authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The resolutions were unanimously agreed to, and the Speaker appointed as the committee on the part of the House Mr. SUTHERLAND, Mr. LITTLEPAGE, Mr. NEELY, Mr. COOPER of West Virginia, Mr. BOWERS, Mr. WEBB, Mr. RUCKER, Mr. CHIPERFIELD, Mr. PARK, and Mr. MOONEY.

The SPEAKER. The Clerk will report the other resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect the House do now adjourn.

Mr. HUGHES. Mr. Speaker, before that motion is put, I wish to ask unanimous consent that next Monday may be substituted for to-day for unanimous consent. I sincerely hope——

Mr. MANN. It is not debatable.

The SPEAKER. The gentleman from Georgia asks unanimous consent that next Monday be substituted for to-day for business on the Unanimous Consent Calendar and suspension of the rules, and so forth. Is there objection?

Mr. MANN. I think the matter can be arranged later. For the present, I object.

The SPEAKER. The gentleman objects.

The question is on the adoption of the resolution.

The resolution was agreed to; accordingly (at 12 o'clock and 10 minutes p. m.) the House adjourned until to-morrow, Tuesday, July 18, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Treasury requesting withdrawal of estimates of deficiencies in appropriations, submitted May 8, 1916, contained in House Document No. 1091 (H. Doc. No. 1290), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. CLARK of Florida, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 17052) to increase the limit of cost of certain public buildings; to authorize enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of certain public buildings; to authorize the purchase of sites for certain public buildings; to abolish the Office of Supervising Architect of the Treasury and to create and organize in the Treasury Department a Bureau of Public Buildings and to define its duties, powers, and jurisdiction; to create and establish the office of commissioner of public buildings; to fix the salary and prescribe the duties and powers of said commissioner of public buildings; to create a board of estimates and prescribe its duties and powers; to provide for the standardization of certain classes of public buildings, and for other purposes, reported the same without amendment, accompanied by a report (No. 983), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. HAY, from the Committee on Military Affairs, to which was referred the joint resolution (H. J. Res. 265) authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point Mr. J. Ricardo de Borja, a citizen of Ecquador, reported the same without amendment, accompanied by a report (No. 982), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. ADAMSON: A bill (H. R. 17040) providing for certain privileges and recognition of employees of the Panama Canal and the Panama Railroad, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CARY: A bill (H. R. 17046) transferring the Bureau of Biological Survey to the Department of Justice; to the Committee on Agriculture.

Also, a bill (H. R. 17047) directing the Secretary of Agriculture to make certain changes in the regulations closing the season of spring shooting; to the Committee on Agriculture.

By Mr. LEWIS: A bill (H. R. 17048) to increase the limit of cost and provide for the reconstruction of the Federal building at Hagerstown, Md.; to the Committee on Public Buildings and Grounds.

By Mr. CLARK of Florida [from the Committee on Public Buildings and Grounds]: A bill (H. R. 17052) to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of certain public buildings; to authorize the purchase of sites for certain public buildings; to abolish the Office of Supervising Architect of the Treasury and to create and organize in the Treasury Department a bureau of public buildings and define its duties, powers, and jurisdiction; to create and establish the office of commissioner of public buildings; to fix the salary and prescribe the duties and powers of the said commissioner of public buildings; to create a board of estimates and prescribe its duties and powers; to provide for the standardization of certain classes of public buildings, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. BENNET: Resolution (H. Res. 309) to investigate Ellis Island; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 17041) granting an increase of pension to George L. Wells; to the Committee on Invalid Pensions.

By Mr. CARLIN: A bill (H. R. 17042) for the relief of M. F. Snider; to the Committee on Claims.

By Mr. COADY: A bill (H. R. 17043) granting an increase of pension to Louis Irons; to the Committee on Invalid Pensions.

By Mr. HAYDEN: A bill (H. R. 17044) granting a pension to Mike Burns; to the Committee on Pensions.

By Mr. JOHNSON of South Dakota: A bill (H. R. 17045) granting an increase of pension to James Cooper; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: A bill (H. R. 17049) granting an increase of pension to Josiah Dock; to the Committee on Invalid Pensions.

By Mr. RICKETTS: A bill (H. R. 17050) granting an increase of pension to Lucius Keplar; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17051) granting an increase of pension to James Henry James; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALE of New York: Memorial of the fiftieth annual encampment of the Department of New York, Grand Army of the Republic, favoring monthly pension checks; to the Committee on Invalid Pensions.

Also, memorial of Canarsis Yacht Club, relative to conservation of the harbor at Great Kills, Staten Island; to the Committee on Rivers and Harbors.

Also, petitions of Clara Snell Wolfe, of San Diego, Cal., and women voters of Navajo County, Ariz., favoring woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. HAYDEN: Petition of the Home and Foreign Missionary Society of Benson, Ariz., by its secretary pro tempore, Mrs. H. P. Merrill, favoring prohibition in Porto Rico; to the Committee on the Judiciary.

Also, petition of Mrs. M. T. Poston and 13 other residents of Phoenix and Casa Grande, Ariz., opposing the passage of House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

Also, petition of Mrs. C. E. Phillips and 13 other residents of Miami, Ariz., opposing the passage of House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

By Mr. HOLLINGSWORTH: Paper to accompany House bill 17049, for pension of Josiah Dock; to the Committee on Invalid Pensions.

SENATE.

TUESDAY, *July 18, 1916.*

(Legislative day of Monday, July 17, 1916.)

The Senate reassembled at 10 o'clock a. m., on the expiration of the recess.

NAVAL APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Overman	Sterling
Beckham	Husting	Page	Stone
Brandegee	James	Penrose	Sutherland
Broussard	Johnson, S. Dak.	Pittman	Swanson
Bryan	Jones	Ransdell	Thomas
Catron	La Follette	Reed	Thompson
Chamberlain	Lane	Shafroth	Tillman
Clapp	Lodge	Sheppard	Townsend
Culberson	McCumber	Sherman	Vardaman
Cummins	Martin, Va.	Simmons	Walsh
Dillingham	Martine, N. J.	Smith, Ga.	Williams
Gallinger	Nelson	Smith, S. C.	Works
Hardwick	Norris	Smoot	

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. A quorum is present.

Mr. LANE. Mr. President, I offer the following amendment——

Mr. SWANSON. I should like first to dispose of the committee amendments. There is a committee amendment not disposed of on page 167.

Mr. LANE. I withhold my amendment for the present.

The VICE PRESIDENT. The amendment of the committee will be stated.

The SECRETARY. On page 167 the committee propose to strike out the item relative to an increase of the Navy as provided by the House and to insert the matter beginning at the top of page 170.

Mr. WORKS. Mr. President, I offer the following amendment to the proposed amendment of the committee.

The VICE PRESIDENT. The amendment to the amendment will be read.

The SECRETARY. In the amendment of the committee on page 170, at the end of line 11, insert a colon and the following proviso:

Provided, That when constructed, not less than three of said battleships, except in case of imperative necessity requiring their presence elsewhere, shall be made a part of the Pacific Coast Fleet and kept and maintained on that coast, and in case there be a lesser number than 10 of said ships at one time, not less than one-third thereof shall be kept on the Pacific coast.

Mr. WORKS. Mr. President, the paragraph of the amendment of the committee to which this amendment is offered provides for 10 first-class battleships. The amendment provides that four of those ships shall be kept and maintained on the Pacific coast as a part of the Pacific Fleet.

The people of the Pacific coast feel that in past years they have been neglected so far as the Navy Department is concerned, and that a reasonable number of the ships we now have in the Navy have not been kept on the western side of the country.

It is my purpose, if this amendment is adopted, to offer a number of amendments following this one and modifying the different paragraphs providing for different kinds and sizes of ships in order to create on the Pacific coast a separate fleet as a part of the Navy.

The Senator from Massachusetts [Mr. LODGE], who is advocating the passage of this bill, has very well said to the Senate that there should be two separate fleets on account of the distance between the two coasts and the difficulty of connecting one with the other. Of course, it is said that since the Panama Canal has been constructed there is less reason for it than there was before, but even now it is a difficult matter. It takes a long time to send a ship of war from the Atlantic to the Pacific, and there is no reason why there should not be maintained a reasonable number on the western coast under existing conditions.

In fact, Mr. President, just at the present moment there is greater reason why a fleet should be maintained on the Pacific coast than there is on the Atlantic. We have some complications with the Japanese Government which, as I have said before, I think we will be able to settle by peaceful means, but we may not be able to do that. There is greater reason for supposing that we may have difficulty with Japan than with any other nation in the world at the present time. There is no reason whatever for believing that we shall have any difficulty or any cause of war as between us and the European nations. It seems to me under those circumstances there is reasonable ground for the passage of the amendment which I now offer.

In order to show what the conditions are respecting the present distribution of the naval forces, I desire to read some extracts from the testimony of Admiral Winslow in the hearing before the House Committee on Naval Affairs in which he undertakes to detail just what ships are maintained on the Pacific coast and what their conditions are. He says:

Mr. STEPHENS. You have one armored cruiser in your active fleet; how many are there in the reserve fleet?

Admiral WINSLOW. They have four in the same class as the *San Diego*, and then there is the *Charleston*, the *Milwaukee*, and the *St. Louis*, which are smaller ships.

Mr. STEPHENS. They are cruisers, though, are they not?

Admiral WINSLOW. They are cruisers; they have some armor; they are large cruisers, but have no turret guns.

Mr. STEPHENS. You have one armored cruiser in commission and five armored cruisers in reserve; is that right?

Admiral WINSLOW. Yes.

Mr. STEPHENS. How many cruisers have you in active commission?

Admiral WINSLOW. Six; that is, including gunboats.

Mr. STEPHENS. But the gunboat is not a cruiser, is it?

Admiral WINSLOW. She is doing the work on the Mexican coast.

Mr. STEPHENS. You are making a gunboat do the work of a cruiser?

Admiral WINSLOW. No; but she is doing the work better than a cruiser could do it. She is in a harbor where there is shoal water, and a larger cruiser could not get in there.

Mr. STEPHENS. Have you one gunboat or two?

Admiral WINSLOW. One is in the navy yard, and one is doing the work down there.

Mr. STEPHENS. One gunboat that is really serviceable?

Admiral WINSLOW. They take turns down there.

Mr. STEPHENS. How many cruisers have you in reserve, Admiral?

Admiral WINSLOW. Armored cruisers?

Mr. STEPHENS. Five, you said, of armored cruisers?

Admiral WINSLOW. Yes; five armored cruisers, and three protected cruisers.

Mr. STEPHENS. How many destroyers have you in your fleet?

Admiral WINSLOW. Five.

Mr. STEPHENS. And how many in the reserve fleet

Admiral WINSLOW. Four.

* * * * * * *

Mr. STEPHENS. Admiral, with the fleet that you have named to this committee, do you think the Pacific coast proper is adequately prepared for defense?

Admiral WINSLOW. No, certainly not; I do not think that there is any pretense that it is, with that fleet.

Mr. STEPHENS. Admiral, is the American Navy prepared to-day to fight an enemy that would be at all likely to attack this country on the Pacific Ocean?

Admiral WINSLOW. You mean, the whole Navy?

Mr. STEPHENS. Yes, sir; in its present condition and position.

Admiral WINSLOW. When you come to talk about the present position and all that, you are going into strategy, and if you want me to talk about that, you had better talk behind closed doors, because I do not think it ought to be given out.

Mr. STEPHENS. If I ask any questions to which you think you should not give an answer, I hope you will withhold your information until later.

Admiral WINSLOW. No. If you want me to say whether we have sufficient fleet out on the Pacific, we have not any fleet on the Pacific; we do not pretend to have; nothing but that one armored cruiser, but if we had more men, I suppose we would commission the other armored cruisers, but so far as we have, our force is all in the Atlantic. That is known as a matter of statistics. Anybody can get the names of the ships we have out there, and what we have here, but what we would do in the event of war in the Pacific, or war in the Atlantic, involves strategy, which should not be given out.

The admiral continues further to disclose the conditions as they exist on the Pacific coast. I am not going to take up the time of the Senate in reading all he says on that subject, but I shall ask to insert as an appendix to my remarks some of the additional testimony given by him on that occasion. However, I desire to read just this small portion of it in conclusion:

Mr. STEPHENS. If you were to approach an enemy with the fleet that you have, how many enemy battleships do you think it would take to conquer the fleet that you have, supposing the personnel of both fleets fighting as best they knew how?

Admiral WINSLOW. Bar luck, one good battleship ought to be stronger than all we have got.

Mr. STEPHENS. One good battleship is more than a match for the fleet that is now on the Pacific coast?

Admiral WINSLOW. Yes; if she had certain conditions. If she had speed, so she could choose her own distance, she could get out of range of our guns and then we could not hurt her at all. But if we had thick weather or reasonably misty weather, so we could close in on her, we could do her considerable damage with our guns.

Mr. President, that shows the conditions that exist in the distribution of the naval forces that we have at the present time. We have every reason to believe that just about such a disposition will be made of this increased navy. In order to insure the reasonable and proper protection of the Pacific coast I have offered this amendment, and, if it is adopted, I shall offer others for the purpose of making it obligatory upon the Navy Department, under ordinary conditions and circumstances, to maintain a reasonable portion of the ships which we have on the Pacific coast.

It has been suggested that the President is the Commander in Chief of the Navy and the Army, and that perhaps Congress would not have the right to determine where these ships should be placed; but, Mr. President, we have not yet reached a point in the history of this country where the military power is superior to the civil or legislative department of the Government. The Congress of the United States provides for the Navy, it provides for the ships and for their maintenance, and it has an undoubted right, in my estimation, to determine under ordinary circumstances where these ships shall be placed.

Of course, the President of the United States is in immediate command of the forces, both military and naval, and Congress would not assume to interfere with the distribution of the ships in specific cases; but, certainly, it is not going beyond the powers of the Congress of the United States to say that in times of peace and in the absence of extraordinary conditions a part of the Navy shall be maintained at one place and a part of it at another place. For that reason and in justice to the conditions that obtain on the Pacific coast I have offered this amendment.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Ohio?

Mr. WORKS. I yield to the Senator.

Mr. POMERENE. Of course, there can be no doubt about the right of Congress to determine where these vessels shall be located; but what reason has the Senator to think that Congress, rather than the administrative branch of the Government, can ascertain the places where these ships should be located?

Mr. WORKS. Mr. President, as I have said, in specific cases, of course, the discretion ought to be left to the Navy Department to determine where the ships shall be sent on occasions; but there is no reason, it seems to me, why there should not be a general provision relating to this subject as to the division of the fleet and for the creation of two fleets instead of one. I think it is only a reasonable thing for Congress to do under the circumstances. We are now proposing to create what I regard as an enormously large Navy, and, as conditions exist in this country, there is no reason why it should not be divided into two fleets. For that reason I hope this amendment will prevail.

APPENDIX.

Mr. STEPHENS. Admiral, you are commander in chief of the Pacific Fleet, I believe?

Admiral WINSLOW. Yes.

Mr. STEPHENS. Will you tell the committee, please, how much of the Pacific Ocean your fleet is supposed to cover?

Admiral WINSLOW. I do not know exactly where we run against the Asiatic Fleet, but in latitude I think we go from the North Pole to the South Pole.

Mr. STEPHENS. Then your fleet is supposed to cover the Pacific coast from and including Alaska to the Panama Canal?

Admiral WINSLOW. Oh, yes; and South America, too.

Mr. STEPHENS. And you go beyond the Hawaiian Islands?

Admiral WINSLOW. Yes.

Mr. STEPHENS. Then, Admiral, the Pacific Fleet covers, or is meant to cover, as much territory, anyway, as the Atlantic Fleet does?

Admiral WINSLOW. As much coast line?

Mr. STEPHENS. As much coast line and as much general surface of the earth.

Admiral WINSLOW. Yes; about the same thing.

Mr. STEPHENS. Will you give us, please, Admiral, the component parts of your fleet?

Admiral WINSLOW. Give you the component parts?

Mr. STEPHENS. Yes.

Admiral WINSLOW. The *San Diego* is the only armored cruiser which is in commission at the present time—in full commission. Then there is a gunboat, the *Annapolis;* a transport, the *Buffalo;* several small cruisers, the *Chattanooga*, the *Cleveland*, the *Denver*, the *New Orleans*, the *Raleigh*, the *Yorktown*, the supply ship *Glacier;* two colliers, the *Nanshen* and the *Nero*. Two mother ships, the *Iris* and *Alert*. Those are all the ships.

Mr. STEPHENS. Just complete the statement as to the destroyers and submarines.

Admiral WINSLOW. The destroyers *Perry, Paul Jones, Preble, Stewart*, and the *Whipple;* that is all.

Mr. STEPHENS. And submarines?

Admiral WINSLOW. That is all of the destroyers in active commission. There are five destroyers in active commission, and submarines—I have three of the H class and four of the K class. Then, the ships in reserve are not under my command.

Mr. STEPHENS. Did you give only ships in active commission?

Admiral WINSLOW. That is all.

Mr. STEPHENS. The reserves are under some one else?

Admiral WINSLOW. They are under the commander in chief of the Pacific Reserve Fleet.

The CHAIRMAN. Have you a list of those?

Admiral WINSLOW. Yes.

The CHAIRMAN. Will you put those down there—the ships that are in reserve?

Mr. STEPHENS. The admiral can insert that.

The CHAIRMAN. Yes; let him insert that.

Admiral WINSLOW. *Colorado, Maryland, Pittsburgh, South Dakota, West Virginia, Charleston, Milwaukee, St. Louis, Oregon*, and *Albany*.

Mr. STEPHENS. Admiral Winslow, your flagship is the *San Diego?*

Admiral WINSLOW. The *San Diego*.

Mr. STEPHENS. Did you say a moment ago that the *San Diego* is a capital ship?

Admiral WINSLOW. Yes; she is a capital ship.

Mr. STEPHENS. Large or small caps?

Admiral WINSLOW. She would be a small-capital ship. I used it in a military sense—the words "capital ship"—that is, she is one of the large ships; she is comparatively large; she is 14,000 tons displacement—something like that.

* * * * * * *

Mr. STEPHENS. You have one armored cruiser in your active fleet; how many are there in the reserve fleet?

Admiral WINSLOW. They have four in the same class as the *San Diego*, and then there is the *Charleston*, the *Milwaukee*, and the *St. Louis*, which are smaller ships.

Mr. STEPHENS. They are cruisers, though, are they not?

Admiral WINSLOW. They are cruisers; they have some armor; they are large cruisers, but have no turret guns.

Mr. STEPHENS. You have one armored cruiser in commission and five armored cruisers in reserve; is that right?

Admiral WINSLOW. Yes.

Mr. STEPHENS. How many cruisers have you in active commission?

Admiral WINSLOW. Six; that is, including gunboats.

Mr. STEPHENS. But the gunboat is not a cruiser, is it?

Admiral WINSLOW. She is doing the work on the Mexican coast.

Mr. STEPHENS. You are making a gunboat do the work of a cruiser?

Admiral WINSLOW. No; but she is doing the work better than a cruiser could do it. She is in a harbor where there is shoal water, and a larger cruiser could not get in there.

Mr. STEPHENS. Have you one gunboat or two?

Admiral WINSLOW. One is in the navy yard, and one is doing the work down there.

Mr. STEPHENS. One gunboat that is really serviceable?

Admiral WINSLOW. They take turns down there.

Mr. STEPHENS. How many cruisers have you in reserve, Admiral?

Admiral WINSLOW. Armored cruisers?

Mr. STEPHENS. Five, you said, of armored cruisers?

Admiral WINSLOW. Yes; five armored cruisers, and three protected cruisers.

Mr. STEPHENS. How many destroyers have you in your fleet?

Admiral WINSLOW. Five.

Mr. STEPHENS. And how many in the reserve fleet?

Admiral WINSLOW. Four.

Mr. STEPHENS. How many submarines in the active fleet?

Admiral WINSLOW. Seven; three H boats and four K boats.

Mr. STEPHENS. How many in the reserve fleet?

Admiral WINSLOW. I think three F boats.

Mr. STEPHENS. And battleships?

Admiral WINSLOW. I have not any.

Mr. STEPHENS. You have not any at all in active commission?

Admiral WINSLOW. No.

Mr. STEPHENS. Nor are there any in reserve?

Admiral WINSLOW. The *Oregon* is out there, but she does not belong to me.

Mr. STEPHENS. Is she in reserve?

Admiral WINSLOW. She is assigned to the Naval Militia.

Mr. STEPHENS. And located at——

Admiral WINSLOW (interposing). She is up in San Francisco at the present time. I think she left San Diego a short time ago and went to San Francisco, and she is probably there still.

Mr. STEPHENS. Of the seven submarines in active service, where are they located?

Admiral WINSLOW. There are three of them at San Pedro, or were there when I left there, and the K boats are at Honolulu.

Mr. STEPHENS. Honolulu is how far from the Pacific coast proper?

Admiral WINSLOW. I have forgotten the exact distance. I think it is about 2,000 miles, is it not?

Mr. STEPHENS. Between twenty-one and twenty-two hundred miles.

Admiral WINSLOW. Something like that.

Mr. STEPHENS. Admiral, with this fleet which you have named, you are supposed to take general care of the territory you have outlined, are you not?

Admiral WINSLOW. Just now I am taking care of the west coast of Mexico. I do not understand that there is anything else out there that needs taking care of.

Mr. STEPHENS. But if there were anything, or if anything developed anywhere on the Pacific coast, it would be your duty to look out for it, would it not, with your vessels?

Admiral WINSLOW. Yes.

Mr. STEPHENS. Admiral, with the fleet that you have named to this committee, do you think the Pacific coast proper is adequately prepared for defense?

Admiral WINSLOW. No, certainly not; I do not think that there is any pretense that it is, with that fleet.

Mr. STEPHENS. Admiral, is the American Navy prepared to-day to fight an enemy that would be at all likely to attack this country on the Pacific Ocean?

Admiral WINSLOW. You mean the whole Navy?

Mr. STEPHENS. Yes, sir; in its present condition and position.

Admiral WINSLOW. When you come to talk about the present position and all that, you are going into strategy, and if you want me to talk about that you had better talk behind closed doors, because I do not think it ought to be given out.

Mr. STEPHENS. If I ask any questions to which you think you should not give an answer, I hope you will withhold your information until later.

Admiral WINSLOW. No. If you want me to say whether we have sufficient fleet out on the Pacific, we have not any fleet on the Pacific; we do not pretend to have; nothing but that one armored cruiser, but if we had more men, I suppose we would commission the other ar-

mored cruisers, but so far as we have, our force is all in the Atlantic. That is known as a matter of statistics. Anybody can get the names of the ships we have out there, and what we have here, but what we would do in the event of war in the Pacific, or war in the Atlantic, involves strategy, which should not be given out.

* * * * * * *

Mr. STEPHENS. Admiral, how long has it been since the *Milwaukee* was in active commission?

Admiral WINSLOW. I do not think she has been in active commission for a long time.

Mr. STEPHENS. Seven, or 8, or 10 years?

Admiral WINSLOW. I should think several years.

Mr. STEPHENS. Has she fired any guns at all in that time, that you know of?

Admiral WINSLOW. I doubt it very much.

Mr. STEPHENS. Are there not a number of the cruisers and armored cruisers now in reserve that have not fired their guns for a good many years?

Admiral WINSLOW. I dare say—the protected cruisers. The *Maryland* was about to have target practice, and she was put out of commission just about a week before the time for firing, so she did not fire. She was put in reserve. I do not know when she had fired before that.

Mr. STEPHENS. Would you like to send such vessels to sea, without having experimented with their guns first? Would you feel it a safe thing to do?

Admiral WINSLOW. Their guns are not different from any other mechanism. You lay a ship up for a long time, and when you start her out you will find about everything wrong; you will find her piping leaking, joints leaking, and unless you work things up to approximately their maximum capacity from time to time, they will not work up to their maximum capacity when you want them.

Mr. STEPHENS. Then ships do deteriorate, and very rapidly when they are in reserve?

Admiral WINSLOW. Oh, they undoubtedly deteriorate when in reserve.

Mr. STEPHENS. And they become inoperative?

Admiral WINSLOW. Undoubtedly, unless they can be taken out frequently and driven at full speed and their turrets and gun mechanism and everything else worked just as it would be in action.

Mr. STEPHENS. Admiral, what would you think the difference would be in the value of a ship as a fighting ship before going into reserve, and five years after, when she would come out?

Admiral WINSLOW. You are going to keep her in reserve five years on a stretch?

Mr. STEPHENS. Yes; that has been done with some of the boats on the Pacific, as I understand—cruisers and armored cruisers now in reserve.

Admiral WINSLOW. She would not be fit to go into action until she had had considerable tuning up, and very likely she would have to go back to a navy yard; and then it would require considerable time to develop her personnel. That has been our experience with the Atlantic Fleet. I have seen ship after ship come out that way and join the fleet, and in a short time they had to go back to the navy yard.

Mr. STEPHENS. What would you consider her percentage of value when she went out, compared with when she went in?

Admiral WINSLOW. As to when she went into reserve?

Mr. STEPHENS. Yes.

Admiral WINSLOW. If she had to go back to the navy yard, she would not have any percentage of value. She would not be any use to the fleet at all; but she might have a value for driving at low speed, but it would be very unlikely that she could go up to her speed, and her men would be untrained.

Mr. STEPHENS. Supposing, Admiral, the armored cruisers now in reserve in Pacific waters had been there for five years, what would you estimate their percentage of value to be as compared with their value when they went into reserve? How much do they deteriorate, ordinarily?

Admiral WINSLOW. I do not know that it could be expressed mathematically. You would find them all different; you would find some that would have more to be done to them than others. You would not be justified in running them at full speed, because you would take too much chance of killing men. You would have to work them up to their efficiency gradually, and train the men.

Mr. STEPHENS. You would not equip a vessel that had been in reserve for some years with men and supplies, and send her out to fight unless you had to, would you?

Admiral WINSLOW. I would, if I had to, of course.

Mr. STEPHENS. I say, unless you had to.

Admiral WINSLOW. But the chances are she would not get very far. She might, if she had been very well cared for, but the chances are that some of her steam piping or water pipes would go to pieces if you put them under pressure; the gaskets and all those things dry out. She might not have seriously deteriorated, understand; but those little things mean as much as anything else when you come to use them. Aboard our ships we always work our turrets and our gun mechanisms at very frequent intervals, and that is the only way that we can know they will work.

The CHAIRMAN. That is what you keep the crew on them for, is it not?

Admiral WINSLOW. Yes; but still they can not take her to sea and run her. There is a great difference between 50 pounds of steam and 250 pounds.

The CHAIRMAN. But ships in reserve are occasionally taken out for trial practice on short trips, are they not?

Admiral WINSLOW. Not very much, and not under very high pressure.

Mr. STEPHENS. What is the condition of the destroyers on the Pacific coast?

Admiral WINSLOW. I think they are all being overhauled now for the time being. They are about to go up for their annual overhauling. They are not in bad condition. They are old boats, and their speed is cut down, but they are in good seaworthy condition; I mean with this temporary overhauling.

Mr. STEPHENS. How long would it take to make them fit to fight?

Admiral WINSLOW. There were five of them fit to fight not very long ago. We were having practice with their torpedoes and guns.

Mr. STEPHENS. They are being repaired now, are they not?

Admiral WINSLOW. They are only being repaired now, because it is better to repair those five just at this time, when they can be spared; but they were running up to their speed and firing their torpedoes not more than about two weeks ago perhaps.

Mr. STEPHENS. Are there any of them that it would take considerable time to repair?

Admiral WINSLOW. I do not think so, as I recall it.

Mr. STEPHENS. Do you know the condition of those in reserve?

Admiral WINSLOW. They have all been down in San Diego and have been firing torpedoes and their guns very recently.

Mr. STEPHENS. Do you consider them all in fairly good condition?

Admiral WINSLOW. Yes; I think they are all in fairly good condition for old boats, mind you; but they do not speed up to the new boats.

Mr. STEPHENS. Admiral, you have no vessels that are new, have you?

Admiral WINSLOW. No; we have nothing new.

Mr. STEPHENS. On the Pacific coast now?

Admiral WINSLOW. No.

Mr. STEPHENS. Everything that you have there is practically obsolete, is it not?

Admiral WINSLOW. You would not call those destroyers entirely obsolete. They have a military value.

Mr. STEPHENS. I did not say "entirely obsolete." I said "practically obsolete."

Admiral WINSLOW. The ships were not good ships originally, but they could still do approximately any fighting that they have ever done before if we put them in order. They have low-powered guns, and are not very fast ships.

Mr. STEPHENS. What are the largest guns you have aboard?

Admiral WINSLOW. Eight-inch guns.

Mr. STEPHENS. Eight-inch guns?

Admiral WINSLOW. The largest on the *Charleston* class is 6-inch.

Mr. STEPHENS. How many 8-inch guns have you in the Pacific Fleet, do you remember?

Admiral WINSLOW. Each one of those ships has two turrets, with two guns in a turret. The *San Diego*, for instance, has four 8-inch guns.

Mr. STEPHENS. If you were to approach an enemy with the fleet that you have, how many enemy battleships do you think it would take to conquer the fleet that you have, supposing the personnel of both fleets fighting as best they knew how?

Admiral WINSLOW. Bar luck, one good battleship ought to be stronger than all we have got.

Mr. STEPHENS. One good battleship is more than a match for the fleet that is now on the Pacific coast?

Admiral WINSLOW. Yes; if she had certain conditions. If she had speed, so she could choose her own distance, she could get out of range of our guns, and then we could not hurt her at all. But if we had thick weather or reasonably misty weather, so we could close in on her, we could do her considerable damage with our guns.

* * * * * * *

Mr. STEPHENS. Admiral Winslow, you made a statement yesterday regarding the shortage of personnel in the Pacific Fleet?

Admiral WINSLOW. As regards the reserve fleet.

Mr. STEPHENS. The reserve fleet only?

Admiral WINSLOW. Yes, sir. I made the statement that the active fleet was practically up to its complement.

Mr. STEPHENS. The reserve fleet is short how many?

Admiral WINSLOW. I suppose to put the whole reserve fleet in commission, all the vessels out there, would take something like 5,000 men. In all probability under no condition would you put in all the ships, all kinds of ships.

Mr. BROWNING. Do you keep on the reserve fleet 40 per cent of the complement on the Pacific, the same as on the Atlantic?

Admiral WINSLOW. No; I think it is less than that.

Mr. BROWNING. Less than 40 per cent of the complement?

Admiral WINSLOW. Yes, sir. I have the exact figures, but I did not bring them down. I can insert them in the record.

The CHAIRMAN. Please do so.

Admiral WINSLOW. There are on board the *Colorado*, 229; *Milwaukee*, 220; *Maryland*, 403; *St. Louis*, 200; *Pittsburgh*, 74; *Oregon*, 220; *South Dakota*, 332; *Albany*, 109; *West Virginia*, 20; *Charleston*, 202.

Mr. STEPHENS. Do the men on the reserve fleet get any sea practice or gunnery practice?

Admiral WINSLOW. Yes, sir; they get sea practice sometimes. For instance, the *Milwaukee* is now the flagship of the commander in chief of the Pacific. She was not long ago up to San Francisco and then she went down to San Diego.

Mr. STEPHENS. Then the men on the *Milwaukee* have had some sea practice?

Admiral WINSLOW. Yes; and other ships go to sea once in a while for short distances, and there is an effort to drill them as much as they can, but they do not have gunnery practice, because you can not have gunnery practice with a reduced crew like that.

Mr. STEPHENS. The men in the reserve fleet, while in reserve, really never get any gunnery practice?

Admiral WINSLOW. I do not think they ever do, except on the destroyers. The reserve destroyers have practice. They are not required to have the same gunnery practice that the other ships have, but one of them did have practice this year with their small guns and they have their torpedo practice, but the larger ships do not.

Mr. SWANSON and Mr. BRANDEGEE addressed the Chair.

The VICE PRESIDENT. The Senator from Virginia.

Mr. SWANSON. Mr. President, I hope this amendment will not carry. I think it is certainly contrary to the spirit, if not to the letter, of the Constitution, which makes the President the Commander in Chief of the Army and the Navy. For us to attempt to direct where the Navy shall be placed, it seems to me, would be to deprive the Commander in Chief of his power. Moreover, we must remember that war comes so suddenly now that it is decidedly like a thunderclap out of a clear sky. Should war come in three or four days or in a week, as the last great war came and as war now invariably comes, the existence of a law that a certain part of our fleet shall be on the Pacific coast would create an embarrassment to the Navy Department which Congress should not create.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from California?

Mr. SWANSON. Yes.

Mr. WORKS. Does the Senator from Virginia think there would be any greater danger if that provision should be made

by Congress than would be the case if the same disposition of the ships were made by the Navy Department that is now made?

Mr. SWANSON. If the Navy Department is apprised of the situation and the Government through diplomatic sources is aware of troubles, they would be much better informed than Congress could possibly be of the possibilities of danger and the location of any possible antagonist. For Congress to enact legislation directing where the Army shall be and where the fleet shall be, when it is usual to hold a fleet together, unless it be an immense fleet, it seems to me would be a serious mistake, especially now when, as I have said, war comes, not after prolonged negotiations, but comes suddenly like a thunderclap out of a clear sky.

I move to lay the amendment on the table.

Mr. JONES. Mr. President——

Mr. SWANSON. If the Senator from Washington desires to address the Senate, I will withhold my motion for a few moments.

Mr. JONES. I do not think the Senator from Virginia ought to dispose of the matter by laying it on the table. I think the amendment proposed by the Senator from California should be adopted.

Mr. President, for a good many years we on the Pacific coast have felt that we have not been treated exactly right in the distribution of the fleet. We have been told from time to time that when we got a certain number of battleships, they would then be divided into two fleets; that one fleet would be stationed on the Pacific coast and the other on the Atlantic coast. My recollection now is that under the program which was adopted by Congress quite a good many years ago, it was planned to have within a certain period of time 16 battleships, with auxiliary vessels, and that fleet would be divided into two fleets—8 battleships being the battleship unit of one fleet, and 8 battleships being the battleship unit of the other fleet; and that then it would be very proper to place one of them on the Pacific coast and one on the Atlantic coast; and that until we got such a fleet, so that it could be divided in that way, it was not wise to make that division.

Now, as I understand, we shall have many more than that number of battleships when this program is carried out. While the administration—no matter what administration is in power—might feel disposed to do what this amendment requires, it seems to me that, in view of the action in the past, there ought to be a legislative declaration with reference to the matter.

The Senator from Virginia [Mr. SWANSON] says that war comes like a thunderclap out of a clear sky. That may be true in some cases; but I do not believe that any very serious force could attack us within a day or two without our knowing something about its coming.

Mr. WORKS. Even if that be so, would not that be an argument in favor of the amendment which I have offered?

Mr. JONES. Certainly; a thunderclap might come on the Pacific coast.

Mr. WORKS. Suppose war should suddenly come on the Pacific coast, we would have no navy there practically.

Mr. JONES. None at all. While I agree with the Senator from California, and, in my judgment, no country contemplates attacking us, there are those who think that our greatest danger of war is not on the Atlantic coast but on the Pacific coast.

Mr. President, there is another phase of this question which appeals to me. If we are to have trouble anywhere, we may have it on the Pacific coast. We have a great ocean over there, a great coast line, a great territory, and also our island possessions are in that ocean. Even though we may not need the fleet there now for war purposes, we ought to have a fleet there in time of peace, in order to maintain and to train an efficient force of laborers and workmen at the different navy yards and at private yards in the country, so that in case trouble should occur we would be able to take care of our fleet when we got it there.

Suppose that trouble should occur now, and that we should require a great fleet on the Pacific coast, we would be handicapped to take care of that fleet in case of any trouble or injury that might come to it. We should be lacking in skilled workmen, in efficient yards and machinery, and all that sort of thing. So it seems to me it is essential to maintain a part of our fleet on the Pacific Ocean in order that we may have prepared and trained in time of peace an efficient force of workmen and of laboring men who could take care of any damages that might occur to our ships in time of peace or war. That is a very important matter. It seems to me that it is almost as important as it is to have our battleships.

If we are not able to take care of our ships properly when they are injured or damaged, we certainly would be very greatly handicapped in case of trouble. Our ships might suddenly become useless and remain so because of a lack of means to repair them.

We ought to have more dry docks on the Pacific coast, as well, I think, as on the other coast, and I am going to say just a word or two upon that subject. There is only one dock at a navy yard of the United States on the Pacific coast that could take care of the largest battleships which we have already authorized, and that is the dry dock at Bremerton. There is not a dock on the Pacific coast that can accommodate any of the capital ships authorized by this bill. Now, what will be done with those ships when they are built? We would be almost compelled unless something is done toward fitting out our yards on the Pacific coast so that they can take care of them, to keep them on the Atlantic coast in peace or in war; such a condition is not only undesirable but it is actually dangerous. My recollection now is that the dock being constructed at Pearl Harbor in the Hawaiian Islands would be large enough to accommodate these ships, but no other dock there can do that; and it seems to me that is one matter that ought to be taken into very serious account in connection with the passage of this measure. It is just as important to have facilities to repair battleships as it is to have the battleships themselves.

Mr. CLAPP. Mr. President, will the Senator pardon an inquiry or two?

Mr. JONES. Certainly.

Mr. CLAPP. Does not the Senator recognize as genuine the claim of those who advocate this extraordinary increase in the Navy that it is primarily for defensive and not for offensive purposes?

Mr. JONES. Yes; I suppose so.

Mr. CLAPP. Well, admitting that to be the case, would it not be the part of good judgment and reason to so distribute the Navy that it could serve as a defensive weapon of this country?

Mr. JONES. Certainly.

Mr. CLAPP. The amendment proposed by the Senator from California recognizes the ultimate authority of the President as Commander in Chief of the Army and Navy to distribute the ships of the Navy, notwithstanding this amendment, wherever in his judgment it is deemed best. This amendment, then, is simply a suggestion on the part of Congress that, if the claim that the Navy is being built for defensive purposes is genuine, it should be distributed in the judgment of Congress, subject to the ultimate judgment of the President, for defensive purposes. Is not that correct?

Mr. JONES. That is true.

Mr. CLAPP. Now, I will ask the Senator if it is not a fact that the friends and advocates of this extraordinary naval program, when they are driven to admit, in view of our relations with England and the proximity of Canada, that we are not contemplating and do not recognize the possibility of war with England; when they are driven to admit that the graveyards of Europe, which are being more and more filled every day, are not a menace to us, finally fall back upon the possibility of danger on the Pacific coast because of some purpose or possible policy of Japan? Is not that true?

Mr. JONES. That is the only possible suggestion that could be made under the supposition suggested by the Senator.

Mr. CLAPP. And yet those who advocate the proposition of enlarging the Navy for defensive purposes and accept the suggestion that the only possible danger is on the Pacific coast, present opposition to the suggestion that the Congress declare, so far as it can, its purpose to provide that the Pacific coast shall be properly defended.

Mr. JONES. Yes; they apparently want to keep our ships just as far away from danger as possible, and not only make it not an offensive fleet, but a sort of runaway fleet. That is about the logic of it, at any rate.

I was just coming to the suggestion which the Senator makes with reference to this amendment. The amendment does not hamper the President at all; it does not restrict his powers at all; it simply embodies the opinion of Congress as to what it believes the policy should be with reference to the distribution of the ships of the Navy in time of peace under ordinary conditions. In cases of trouble or danger or war it does not suggest even any curtailment of his power or authority.

The Senator from Virginia suggests that the diplomatic officers and the President know about many dangers that Congress would not know about. Well, this amendment would not take away any of their knowledge; they would have the same information; and under this amendment whenever the President should deem it wise, whether as a war move or otherwise, to have all the battleship fleet on one coast or the other, he could so order.

As I understand, it is simply an expression of the judgment of Congress that in ordinary times, in times of peace, when the

fleet is simply being used to perform maneuvers and as a fleet must be used outside of war, it should be distributed on the two oceans along the two coasts. I can see no possible objection to it myself, but I can see many advantages that would come to us by reason of such action in time of danger and of trouble. I hope the Senate will adopt this amendment as an expression of the views of the Senate as to what ought to be done with the fleet in time of peace as a real preparation for the time of danger and to show the people of both coasts that the navy we are creating is a navy for the benefit of all the people in peace and for the protection of all the people in danger or war.

Mr. BRANDEGEE. Mr. President, I am gratified that the Senator from Virginia [Mr. SWANSON] did not press his motion to lay the amendment upon the table, not that I am in favor of the amendment any more than I was in favor of the amendment offered by the Senator from Nebraska [Mr. NORRIS] yesterday—which I thought would entirely destroy the effect of this bill in connection with increasing our naval strength—but I do think when a Senator proposes an amendment and the Senator from Virginia arises and opposes it, it does not follow that all debate ought to end on the amendment. I think sometimes a Senator is entitled to have a vote on an amendment, and I do not think there is any such rush about getting this bill through to-day or to-morrow as to warrant the arbitrary method of laying upon the table every amendment that is offered to the bill which is not approved by the committee. I am willing to take my chances, and I think the country can take its chances, in relying upon the judgment of the Senate not to put on bad amendments or amendments that would cripple the provisions of the bill.

As to this amendment, Mr. President, irrespective of whether Congress has decided to order the fleet about regardless of the department and of the Commander in Chief, I have no doubt Congress could provide that there should be a Pacific Fleet; but, Mr. President, irrespective of that, it seems to me it would be exceedingly unwise for Congress to say, in view of the limited knowledge it now has upon this question, that one-third of all the vessels provided for by the Senate amendment should at all times, except in case of imperative emergency, be stationed and maintained upon the Pacific coast and attached to the Pacific Fleet.

I think questions like that ought to be determined by the judgment of the department and the President of the United States, in view of what is most advantageous for the entire country at the time to have its vessels doing.

This amendment provides for not to exceed 10 first-class battleships, four of which are to be constructed immediately. Suppose four battleships are constructed. I assume that would constitute a cruising squadron, a unit. Now, to say that one and one-third of these battleships, or two of them if the number could not be divided evenly into thirds, should always be stationed upon the Pacific coast, it seems to me might defeat the very purpose of the amendment in strengthening the Navy. They must cruise; they must go through their evolutions; they must have their target practice, and it may not always be convenient for them to have it on the Pacific coast or on the Atlantic coast. That might not be, under the language of the amendment, an imperative emergency. But why should Congress, except on the broadest lines—such as the establishment, if they think it wise, of a Pacific Fleet—take it upon themselves in this informal way to provide just what proportions of certain particular ships authorized should always be maintained in a particular place? The units of the Navy must be exceedingly mobile. They must be sent around the world, perhaps, in practice cruises; and even in ordinary evolutions they should be at the disposal of the Navy Department and the President.

The Senator from California says that the naval officer from whose testimony he read—I have forgotten his name now—stated that there was no Pacific Fleet; and yet this amendment provides that one-third of these vessels shall be attached to the Pacific Fleet. I do not know, technically, whether there is a Pacific Fleet in law or not.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from California?

Mr. BRANDEGEE. I yield to the Senator.

Mr. WORKS. Admiral Winslow, who testified upon that subject, when he said they had no fleet on the Pacific coast meant that they had nothing that could be called a fleet. He is really the commander of the Pacific Fleet, or was at that time. I think there has been a change made since. But there is nominally a Pacific Fleet, in command of one of the rear admirals of the Navy.

Mr. BRANDEGEE. I assume, if there be such a thing, that it is merely a name given it by the department. I do not know, however, about that.

Mr. WORKS. It is no more a name given by the department than in the case of the Atlantic Fleet.

Mr. BRANDEGEE. I assume that is true also. I did not suppose Congress had legislated so that the Atlantic Fleet and the Pacific Fleet were statutory fleets; but I do not know.

Mr. WORKS. Congress has not legislated on this subject at all, as I understand. Fleets are constituted by the order of the Navy Department, I presume.

Mr. BRANDEGEE. I hope that is true, and I hope it will remain true for the present. I think if the Pacific coast should be in danger, as the Senator from Virginia has well said, probably the President and the Department of State and the Navy Department would have as quick knowledge of that fact as the Senate or Congress; and I think of all things the fleet ought to be subject to the orders of the department and of the President, absolutely untrammeled by a restriction in an appropriation bill that would forever tie up three of these particular ships, and might make them perfectly ineffective to act with the balance of the Navy and to train with them.

Mr. LODGE. Mr. President, no one can believe more profoundly than I do in the necessity of two fleets, one on the Atlantic and one on the Pacific coast; but two fleets are a very different thing from a divided fleet.

The Republican Party, in its recent declaration at Chicago, said:

> We must have a Navy strong and so well proportioned and equipped, so thoroughly ready and prepared, that no enemy can gain command of the sea and effect a landing in force on either our western or eastern coast.

That means two fleets; and to that we must come, as I pointed out when I first spoke when the bill was taken up. But we must prepare for the two fleets. We ought to prepare on the western coast, as the Senator from Washington said, with additional dry docks. Docks are necessary there, and yards. We ought to have dry docks there and yards capable of taking care of a fleet. But when you command by statute the division of an existing fleet you enter on very perilous ground, as it seems to me.

The President is the Commander in Chief of the Navy, as he is of the Army. That is, by the Constitution he has the power to direct the movements of the Navy in time of war, in time of emergency, and in time of peace; and he does that, of course, with the advice of his naval advisers, the men best able to direct the movements of the fleet. To divide the Atlantic Fleet at this moment would simply give us an inefficient defense on both coasts, and we ought at the present time to have the fleet so that it can be moved to any point of danger.

I wish to see the Navy built up so that a permanent fleet can be very soon established, as it will be established, by the Commander in Chief, on the Pacific coast—a powerful fleet. When England, as she did for many years, had a fleet in the Mediterranean she had also the Channel Fleet, which was the immediate protection of Great Britain; but she never divided the Channel Fleet and sent part of it to the Mediterranean. She maintained two fleets.

That is what we must come to here, and our policy must be directed to that end. But I do think it is running a great risk, and certainly is in contradiction of the purposes of the Constitution, to undertake to tie the hands of the Commander in Chief by statute. It would be a very awkward thing indeed if some sudden emergency arose, and, owing to statutes passed by Congress, the President was unable to move troops or move ships to a threatened point.

It is not that I am not in sympathy with what the Senator from California and the Senator from Oregon urge. I am in profound sympathy with both; but I think we must reach it by another way, and I think we ought to address ourselves to that policy comprehensively. But I should be sorry to see this amendment adopted at the present time, for I think it would tie the hands of the Executive in a way which ought never to be done.

Mr. PITTMAN. Mr. President, I should like to ask the Senator from Massachusetts the distinction between two fleets and one large fleet. I heard the Senator speak of two fleets, and I did not grasp the meaning of two fleets.

Mr. LODGE. I mean by that two independent fleets; that it should not be the policy, having only one fleet sufficient for one coast, to divide it up so that it would be insufficient for both coasts.

Mr. PITTMAN. If there were two fleets the command would be just the same—that is, with regard to the President—as if they had one fleet?

Mr. LODGE. Absolutely; absolutely.

Mr. PITTMAN. Then the necessity might be just as great to combine the two fleets in one ocean as it is now to retain one fleet in one ocean.

Mr. LODGE. It might be necessary to combine the two fleets; but my idea is two independent, sufficient fleets for defense on either coast. Meantime, I think it is a fundamental proposition in naval warfare to keep your great fighting fleet together and not scatter it. We could do more for the defense of the Pacific coast—supposing that we had not established two fleets, as we ought—with a single fleet, which could, by going the other way, menace an enemy in the East, and force him to keep his ships at home, than by having a feeble fleet on the Pacific which would not be sufficient to hold back the enemy's attack.

Mr. WORKS. Mr. President, will the Senator permit me to direct a question to the Senator from Massachusetts?

Mr. PITTMAN. Certainly.

Mr. WORKS. I should like to ask the Senator from Massachusetts whether he regards this bill as providing a sufficient navy to defend both the Pacific and the Atlantic coasts?

Mr. LODGE. I think, if the program of the three years is fully carried out, it will.

Mr. WORKS. I do not quite understand why the Senator from Massachusetts should object to an amendment that proposes to maintain a reasonable portion of that fleet on the Pacific coast, where the defense is supposed to be needed.

Mr. LODGE. I do not, Mr. President. I do not object to it, but I think that is something that ought to be left with the Commander in Chief and his naval advisers. I think it is extremely dangerous for Congress to undertake to say that there shall be certain forces kept at one place and certain other forces kept at another place, so that the President finds himself fettered when the hour of emergency comes.

Suppose we had a statute providing that a certain number of men should be kept in all the defenses of the great ports, at Boston, at New York, at Norfolk, and San Francisco. It might become imperative, as indeed it has become imperative, to move those troops to another point. A statute binds so hard; and in case of danger and emergency one essential thing is that the commanders in charge of either the military or the naval forces should be free to do quickly and at once what the situation demands.

Mr. PITTMAN. Mr. President, as I gather the distinction between two fleets and one fleet, it is that you have a part of the fleet on the Pacific and part of the fleet on the Atlantic coast; it is called two fleets. The supreme command of the two fleets is the same as the supreme command of one fleet. The Senator from Massachusetts is in favor of two fleets. That is, he is in favor of dividing our battleships and battle cruisers between the two oceans whenever it can be divided without reducing below what he thinks is proper the strength of the fleet on the Atlantic Ocean. Now, his view of the matter is that there should be a preference given in the protection of the Atlantic coast over the Pacific coast; in other words, that if our fleet is only sufficiently large to protect the Atlantic, then we should not have any fleet on the Pacific until it is increased so that the surplus can be added to the Pacific. Under the amendment we would be dividing the present fleet, and we would have two fleets, one on the Atlantic and one on the Pacific. It seems to me that we should have an adequate fleet on both oceans; and if this bill does not provide for an adequate fleet on both oceans, then, so far as I am concerned, it has not met with my idea on the subject.

Mr. LODGE. I may not have made the distinction which was very clear in my own mind clear to the Senator. That is that there is a great difference between two independent fleets, each sufficient for its purpose, and one sufficient fleet on one coast which we divide arbitrarily. I think we ought to have the two independent fleets. Until that time comes I think it is sound naval policy to keep the fleet together, whether it is in the Pacific or in the Atlantic. The great defense of the country is the powerful fighting fleet in being. My hope is that we shall have two independent fleets which would operate and be sufficient without any regard one to the other.

Mr. PITTMAN. I think I understand the Senator. When he says two independent fleets, he means independent only as to their disposition; not as to their command.

Mr. LODGE. Oh, no. The ultimate command of all fleets must be in the President's hands, of course.

Mr. PITTMAN. Yes; I understand that.

Mr. LODGE. I did not mean that.

Mr. PITTMAN. The term "two fleets" simply means the disposition or division of the fleet into two parts.

Mr. LODGE. But I do not want to compel the Commander in Chief to divide the fleet until he and his naval advisers feel that it is safe to have two separate fleets.

Mr. PITTMAN. The situation as it develops now is, apparently, that this bill does not provide for two fleets. It is not adequate for two fleets. Not being adequate for two fleets, we will have only one fleet upon the Atlantic and no fleet upon the Pacific. If that is the case, then it certainly occurs to me that Congress has not made adequate provision, because I believe it is admitted that there is just as great, if not greater, need for naval protection on the Pacific as on the Atlantic. And yet, under the discussion of the matter now, where we are not able to have two fleets—which means that we will only have one concentrated fleet, and that concentrated fleet will be on the Atlantic—the Pacific will remain in the condition in which it is now; that is, without any fleet. Admiral Winslow's testimony is clear on that subject; that is, that we have no fleet on the Pacific; that one first-class battleship would be more than a match for all of the vessels we have on the Pacific coast; and yet, under the argument of the Senator from Massachusetts, we are not prepared, even with this increased Navy, to spare any of these ships as a Pacific fleet. They might make trips over there and back, but as a fleet for the Pacific they can not be spared.

I am just simply stating that if that is the position we are in, then I regret that we have not made more adequate provision, or at least have not started a more adequate program, so that the Pacific might be protected.

Now, just a word as to this amendment. I would not support any amendment that would arbitrarily make a disposition of battleships. It is apparent to anyone that an arbitrary disposition of troops or battleships would destroy the very power of strategy; but I do not take it that this amendment does that. If anyone could show that it does, I certainly would not be for it. It simply states that until all of those battleships are necessary on the Atlantic, or somewhere else, one-third of them shall be kept on the Pacific.

The term "imperative necessity" does not mean any more than "necessity." I do not take it that the word "imperative" adds any strength to the word "necessity." It simply means that one-third of these battleships shall constitute the Pacific Fleet, to stay there, not always, but until the President of the United States thinks it is necessary for them to be placed somewhere else. Now, if it amounts to anything on earth more than an expression of this body that we believe that some fleet should be on the Pacific, then I do not understand what it means; and I am not willing to stand here—not because I live in the western part of the country—but I would not be willing to see any part of our coast absolutely ignored, without any battleship protection whatever, and all of it concentrated on another coast.

Mr. PHELAN. Mr. President, as I take it this amendment leaves it entirely discretionary in time of great emergency with the President of the United States to move a Pacific fleet, if it is established, to the Atlantic waters or the Atlantic Fleet to the Pacific waters. I desire to submit that there is, first, a very great necessity for a fleet in the Pacific, and, secondly, that there is an equally great necessity for an expression on the part of Congress as to the desirability of establishing a fleet on the Pacific.

The Panama Canal is supposed to have multiplied the usefulness of the fleet. We know from competent authority that the Panama Canal is subject to interruption either by accident or design. In times of peace it is a useful connection between the Pacific and the Atlantic, so far as naval operations are concerned. In time of necessity it will fail us, because the vigilant enemy will strike at our most vulnerable part—that costly waterway.

We have established possessions in the Pacific. I believe it is the sentiment of the country now, perhaps, to maintain our flag on our island possessions, no matter how remote or whoever may dissent from that view. Hawaii is a strategic point which we can not surrender, and already there is a vast preponderance of foreign population. Ninety thousand Japanese, whose birth rate last year was 15,000, people that island under the American flag. Only by reason of that flag might it be called an American possession at all because of the vast population of a foreign people. But recently Count Okuma, the prime minister of Japan, spoke with the greatest solicitude for the people of Japan living in that island and on the Pacific coast, asserting the right of his country under all circumstances to protect and to guard them.

What is meant by that? Merely the assertion of a right to strike at any time, on a moment's notice, just as this power struck, at Port Arthur without notice, in case, in its judgment, there was sufficient reason or provocation. Without notice! What does that signify? That if we have our great fleet, described by the Senator from Massachusetts, in Atlantic waters and the Panama Canal is the only means by which it can be moved speedily from the Atlantic to the Pacific, and if that nation in the

Pacific should see fit without notice to strike at America, of what avail would be this fleet, this great fleet, which we are building to-day, for which we are appropriating vast sums of money?

No question has been raised of this kind until now, and now only because we have in contemplation the greater fleet, which enables us in a measure to divide it. The Atlantic Fleet would be of little avail in case of trouble on the Pacific. Unless there was adequate force in the Pacific, any movement of the enemy would, in a military and naval view, meet with immediate success.

Now, certainly that is warning enough. But you will say, as many complacent gentlemen say, that there is no danger of that great power, young and vigorous, taking up arms against the older and more populous country. It is the history of the world that young nations come into their being and attain their greatness during that formative period. I have no doubt that Japan will be one of the great powers in the Pacific some day; and if the greatest, it will be when the United States fails to realize the importance of protecting itself. The poet Virgil says "the wolf cares not how many the sheep are." We are here safe and prosperous, enjoying the abundance of nature, and reck little of the dangers of its interruption. But we are growing all the time a more attractive spoil.

The whole purpose of the preparedness campaign was to awaken the people to the necessity of arming themselves; and now that this Congress has wisely done so, or is about to do so, you hang all your arms in the scabbard on the Atlantic coast, when I tell you that the more imminent danger is on the Pacific coast, and you can not get your arms there fast enough to meet the unexpected attack.

It is reported Japan has made a treaty with Russia to control the Far East. Japan has an addiance with England, offensive and defensive. England has vast possessions north of us. Esquimalt is capable of being made a second Gibraltar. A book was written by a competent authority called the "Valor of Ignorance" not long ago, which shows very clearly, at which many people smiled incredulously, that Japan could land upon our coast, which is undefended at many vital points, and invade our country. There are 55,000 able-bodied veterans of Japanese wars living in California. So we would be in the humiliating position of having to meet a frontal attack on the sea and a rear attack from the land. Our troops, few as they are, are on our border. Our Pacific Ocean is to-day undefended. As Admiral Winslow says, one enemy warship could rout this so-called fleet. So there can be no question at all in my mind, familiar with the situation, as I am, living upon the coast, of the danger that confronts us, and, secondly, of the necessity of having our defenses there, not here.

Now, why should Congress express itself? For this reason: I say Japan is a power, a power that is asserting itself, a power that has to be counted with. We all have the greatest respect for the fighting qualities of those men, devoted to their country in a superstitious way, willing to give up their lives without a thought of the sacrifice or the hope of reward, except that they shall enjoy the favor of their ancestors. They are a people fanatical, and yet so clever and skilled that we can not say that they are not in warlike respect equal perhaps to the men sprung from the higher civilization on the American continent; for very often civilization enervates instead of strengthening when we regard men as merely fighting machines.

Here is that power. Congress is asked to express itself in this simple way, that when the fleet is established one third shall, except in cases of extraordinary necessity, be made a Pacific fleet. There is no question at all but that the President could move this fleet from one place to another—it is so provided—but Congress declares, solemnly declares, that a Pacific fleet should be established.

There is the necessity for it in this, that the United States is under an extraordinary, if not unaccountable, subserviency to-day to the power of Japan. We are told it is a very proud and sensitive nation and we must deal with all questions arising between the two countries in a manner quite unlike the manner of diplomacy with which we treat other and even greater nations.

There is, and everyone knows it, a disposition upon the part of the Government at Washington now and at all times to palter and to trade and to negotiate and to enter into extraordinary agreements unknown to international law or to diplomacy in order that these people may be placated.

When the California school question arose, I think in 1908, where the State of California, acting within its undoubted right, having full jurisdiction over the subject, undertook, as the men from the South will better understand, to segregate the Japanese schoolboy from the little white girl, the President of the United States declared that he would use the full power of the Army and Navy of the United States to coerce the sovereign State of California in case she dared to act within her clear and admitted constitutional right, and by the thunders of his denunciation he routed the California Legislature and it adjourned without day.

That was a trifling incident, and yet at the same time behind the roar of the lion there was the strong power of the beast himself. And yet we dared not assert it. But it is an open secret extraordinary preparations were made by the Government at that time to safeguard our interests. It was the calm word and the big stick. "The calm word" was a harsh utterance addressed to California, but meant to be heard by Japan in dulcet tones. The "big stick" was the preparation which was made then to defend our interests; and the entire fleet, so important in Atlantic waters, was sent where? The White Squadron was sent around the Horn to the Pacific, and lest it be thought in any way a menace it was called an excursion, a naval outing, a demonstration by the White Squadron.

Mr. CLAPP. Mr. President, to correct what might go out to the country as a false impression, I desire to remind the Senator from California that our Navy was so great and is so great that when that fleet was in oriental waters—I have the data in my office compiled by the Navy Department—we could have mobilized on the Atlantic coast in a few hours almost the equivalent of that great fleet sent to oriental waters. I do not suggest this as in opposition to the Senator's argument, for I am in hearty accord with his position; but the country, I think, has come to think that our Navy is so insignificant that our entire Navy, practically, was in that great fleet, when the fact is that our Navy was so vast that we could have mobilized almost the equivalent in a few hours on the Atlantic coast.

I took occasion to get the figures from the Navy Department that I might make a statement like this if the occasion ever arose.

Mr. PHELAN. I am very pleased to learn that. It does not affect the fact that a great fleet was sent around in a pacific way really to demonstrate our power and possibility to thwart any attempt on the part of another country to interfere in our domestic affairs; and that country has quite a disposition to interfere in our domestic affairs, witness the alien land law incident of recent years. The Count Okuma, premier of Japan, in a published statement only a few months ago said he looked for his people to this "Pacific outlet." As the people of Europe in the early days looked to this country as an outlet, and were welcomed because they were seeking freedom and establishing a nation dedicating themselves to those great institutions which have since grown under the aegis of the white race, so the brown man of Asia now looks to America as a Pacific outlet, as a land of opportunity. And the only answer we can consistently make to them is the answer made by the senior Senator from California [Mr. WORKS] the other day, that they are not assimilable, that the amalgamation of the white and the brown race is unthinkable, and the necessity of preserving the race is only second to the political necessity of keeping up the standards of the population of a democracy upon whose shoulders this whole structure rests. If you deteriorate our population you destroy our republican form of government.

I will not go into the question of oriental immigration, but I am simply driving home the point that we have shown a remarkable subserviency to the Island Empire; and now in a report before the Senate from the Immigration Committee we have another exception in favor of these proud and sensitive people.

If, let me conclude, the President of the United States without any direction from Congress sends a part of this great fleet that we are constructing to the Pacific it will be regarded as a menace, it will be regarded as an unfriendly act, and in the light of the acts of the Executives in the past, now and heretofore, we know that they would, as diplomatic gentlemen, doubtless serving according to their lights the best interests of the common country, hesitate to send a fleet out there except in a case of imperative necessity. But when the imperative necessity comes we will have no fleet there to meet the imperative necessity. The imperative necessity will be known in Washington when the guns are belching forth their fire upon the Pacific.

I am speaking with the utmost calmness. No one can dispute this in the light of past history. There is the case of Port Arthur and all the other cases. I will not enumerate them. There are so many in Europe where nations, sometimes called civilized, have entered into solemn agreements not to do certain things, not to invade neutral territory, and to respect the rights of neutrals have wantonly without apology set aside their own solemn declarations.

We can not expect anything better from Japan, which is just emerging from the shell of barbarism. We can not expect any more from Japan than from the countries speaking proudly for

an ancient civilization. I think in the matter of international morals the Japanese—because they are more frank—are superior to many of the nations of Europe. They tell us what they want and what they propose to do.

If Congress adopts this amendment and says there shall be a fleet in the Pacific, it relieves the Executive of embarrassment. He need not be subservient any longer under diplomatic pressure to this great power in the Pacific. He can say it is a direction of Congress. Indeed it will be known throughout the world that it is an act of Congress, and therefore the movement of the fleet will not excite either resentment or suspicion.

I know the Senator from Massachusetts fully believes in the necessity of two fleets. He understands our problems. The only thing he fears is that there will be a divided authority. The authority rests only in the Commander in Chief of the Army and Navy of the United States under this amendment. There can be no question of that.

It is much better now to make our declaration on the eve of the construction of this proposed navy than at any other time. I think it will reconcile the people of this country to the policy which we are enunciating, and it will further enable them to realize that this country has its possessions in the Atlantic and in the Pacific, and that there is no reason whatever why at least a third of the fleet should not be permanently located on the Pacific coast. If needed in the Atlantic, it can be so ordered by the Executive; but during these long days of trial, when we do not know between one hour and another, growing out of the assertion of our rights, when we shall be assailed, it is of the highest importance strategically to have a fleet where we are vulnerable and where our rights are being asserted. I submit in all earnestness to the Senator in charge of the bill the importance of allowing the Senate to vote on this amendment, and to withdraw his motion that it be laid on the table.

Mr. POMERENE. Mr. President, perhaps I am not familiar with conditions on the Pacific coast. I confess I have not been in entire sympathy with those who are constantly expecting trouble from the Island Empire; but if I felt about this proposition as do some of those who have spoken upon the subject. I should find fault with the amendment proposed by the senior Senator from California [Mr. WORKS] because it did not require two-thirds or three-fourths of the fleet to be mobilized on the Pacific coast.

Mr. President, I do not believe that there is a Member of this body to whom the eastern coast is more sacred than is the western coast, or to whom the western coast is more sacred than is the eastern coast; and I do not believe we have ever had a man in the presidential chair who did not feel that his duty as an Executive should be directed as well to the protection of the Pacific coast as it should be directed toward the protection of the Atlantic coast. I do not believe that we have had a man in that chair who would not have mobilized the entire fleet on the Pacific coast at the moment he thought there was any danger there; and, on the other hand, I do not believe we have ever had a man in that chair who would not have taken every vessel from the Pacific coast if he had thought it was needed on the Atlantic coast.

It seems to me that the only effect of the amendment which has been proposed by the senior Senator from California would be to tie the hands of the President, so that he could not act with the same freedom that he would if there was nothing in any way to control or to direct his actions. I can only see in this amendment an element of danger to the Pacific slope, assuming that we are in danger from the Island Empire.

Let us see how it would operate in its effect upon the world at large. Bear in mind that the Senators from California are anticipating danger from the Japanese Empire. They think it is a continuing danger—I do not believe it is—but they think so. Assume, for the sake of argument, that that position is correct, that we should adopt this amendment, and that for some reason or other the President, in his wisdom, with the information he might have, would deem it good policy to mobilize the entire fleet in the Atlantic Ocean; would it not be an invitation to the Japanese Empire to make an assault upon the Pacific slope at that particular time? If this amendment is to become a part of the law, would they not at once conclude that in the judgment of the Chief Executive there was an emergency which required the mobilization of the entire fleet in the Atlantic Ocean; and would it not then be regarded as an opportune time for the Japanese Empire to attack the Pacific slope?

Mr. President, it seems to me that wisdom would require that the movement of the fleet be left entirely to the Commander in Chief of the Navy. I can not help but feel that it would be a very great mistake, in the least, to attempt at this particular time to say that any portion of the fleet should be located anywhere in either of the oceans. Let us leave that to the wisdom of the man who is made the Commander in Chief of the Army and the Navy by our Constitution. I am sure Senators do not lack faith in the present Chief Executive, nor will they lack faith in any other Chief Executive we may have. Certainly, the President can act with better judgment when the crucial times comes than we, sitting as a Congress, can anticipate the future and its needs. I hope the amendment will be defeated.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from California [Mr. WORKS].

Mr. WORKS. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. PHELAN. Mr. President, a parliamentary inquiry. What is the question upon which we are about to vote?

The VICE PRESIDENT. The question is on the amendment offered by the Senator from California [Mr. WORKS].

Mr. PHELAN. On the amendment direct?

The VICE PRESIDENT. On the amendment direct.

The Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator, I withhold my vote.

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). I wish to announce the absence of my colleague [Mr. SMITH of Michigan] and his pair with the junior Senator from Missouri [Mr. REED]. This announcement may stand for the day.

The roll call was concluded.

Mr. REED (after having voted in the negative). I voted without knowing that the Senator from Michigan [Mr. SMITH], with whom I am paired in his absence, had not returned to the Chamber. I therefore transfer my pair with the Senator from Michigan to the Senator from Arkansas [Mr. ROBINSON] and allow my vote to stand.

Mr. JOHNSON of Maine. I inquire if the junior Senator from North Dakota [Mr. GRONNA] has voted?

The VICE PRESIDENT. He has not.

Mr. JOHNSON of Maine. I have a general pair with that Senator, which I transfer to the Senator from Oklahoma [Mr. GORE], and vote "nay."

Mr. OVERMAN. I wish to announce that I have a general pair with the junior Senator from Wyoming [Mr. WARREN]. By arrangement with the Senator from New Hampshire [Mr. GALLINGER] I transfer that pair to the Senator from New York [Mr. O'GORMAN] and vote "nay."

Mr. TILLMAN. I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "nay."

Mr. BECKHAM. I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. GALLINGER. In view of the transfer suggested by the Senator from North Carolina [Mr. OVERMAN], I am at liberty to vote, and vote "nay."

Mr. DILLINGHAM. I inquire if the senior Senator from Maryland [Mr. SMITH] has voted?

The VICE PRESIDENT. He has not.

Mr. DILLINGHAM. Then I withhold by vote, having a pair with that Senator.

Mr. HARDING (after having votel in the negative). On account of the absence of the junior Senator from Alabama [Mr. UNDERWOOD], with whom I have a general pair, I withdraw my vote.

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON]; and

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS].

The result was announced—yeas 18, nays 48, as follows:

YEAS—18.

Ashurst	Johnson, S. Dak.	Phelan	Sutherland
Chamberlain	Jones	Pittman	Vardaman
Clapp	La Follette	Poindexter	Works
Cummins	Lane	Smith, Ariz.	
James	Oliver	Smoot	

NAYS—48.

Bankhead	Hardwick	Overman	Sterling
Beckham	Hollis	Owen	Stone
Brandegee	Hughes	Page	Swanson
Broussard	Husting	Penrose	Taggart
Bryan	Johnson, Me.	Pomerene	Thomas
Catron	Lippitt	Ransdell	Thompson
Clark, Wyo.	Lodge	Reed	Tillman
Clarke, Ark.	McCumber	Shafroth	Townsend
Culberson	Martin, Va.	Sheppard	Wadsworth
Curtis	Martine, N. J.	Sherman	Walsh
Fletcher	Nelson	Simmons	Weeks
Gallinger	Norris	Smith, S. C.	Williams

NOT VOTING—29.

Borah	Gore	Lewis	Smith, Ga.
Brady	Gronna	McLean	Smith, Md.
Chilton	Harding	Myers	Smith, Mich.
Colt	Hitchcock	Newlands	Underwood
Dillingham	Kenyon	O'Gorman	Warren
du Pont	Kern	Robinson	
Fall	Lea, Tenn.	Saulsbury	
Goff	Lee, Md.	Shields	

So the amendment of Mr. WORKS was rejected.

Mr. TAGGART. Mr. President, I found in my office yesterday morning a booklet from the Bethlehem Steel Co. In looking through it I was reminded of the many advertisements which I have seen in various newspapers of the United States, and particularly since I have been in Washington, in which this company calls attention to the armor-plate factory proposed to be erected by the Government in the naval appropriation bill, also their offer to the Government.

Beginning on page 60 of the booklet, to which I have referred, the following statements are made by Mr. E. G. Grace, president of the Bethlehem Steel Co., to the House Committee on Naval Affairs:

The Senate has passed the bill to construct a Government armor plant at a cost of $11,000,000. If the House should pass this bill, it will mean that as soon as the new plant is constructed the twenty-odd million dollars now invested in privately-owned plants will have been rendered practically valueless, for existing plants have ample capacity to meet all the needs of the Government.

The question, however, should not be determined merely with reference to the interests of private manufacturers. It should be decided with reference to the interests of the people as a whole, and especially with supreme regard for adequate national defense.

* * * * * * *

We will manufacture one-third, or such additional quantity as may be awarded to us of the armor plate required for the contemplated five-year naval program, estimated at approximately 120,000 tons, at a price of $395 for side armor, as compared with the price of $425 now obtained.

The proposed price is lower than has been paid by the Government for more than 10 years.

If the foregoing price is not satisfactory, we will agree to permit any well-known firm of chartered public accountants to inventory our plant and make careful estimates of the cost of manufacture. With that data in hand we will meet with the Secretary of the Navy and agree to manufacture armor at a price which will be entirely satisfactory to him as being quite as low as the price at which the Government could possibly maufacture armor on its own account, after taking into account all proper charges.

* * * * * * *

We are to-day selling armor to the United States Government at a price lower than ony other large naval power in the world is paying, even when the Government has itself embarked in the business. Not only is that true, but the specifications in the United States are much more rigid and the wages paid are very much higher than those prevailing in any foreign country.

* * * * * * *

Steel prices are continually going up, and they are to-day much higher than has been the case for many years. In spite of that, we offer to build armor at a lower price than the United States Government has paid for 29 years, and we agree to accept this lower price for the next five years.

We also call attention to the fact that though since the war began we have been able to get in Europe almost any price we chose to ask for ordnance, we have during that period made no addition whatever to the selling price to the United States Government of any of the ordnance products which we manufacture.

Further in a letter addressed by Mr. Grace to the Senator from South Carolina [Mr. TILLMAN] under date of June 19, 1916, the following statements are made:

As part of the naval appropriation bill as it comes to the Senate from the House of Representatives, is a provision to construct a Government armor plant at a cost of $11,000,000. This provision is in substance identical with the separate bill passed by the Senate for the same purpose, the Senate bill itself not having been acted upon by the House. The proposition thus comes before the Senate as part of a new bill.

I desire to present to your committee a proposition from my company which had not been made when the Senate previously acted on this matter, and which, I venture to hope, may warrant further consideration by the Senate.

The Bethlehem Steel Co. will agree, for such period as the Government may designate as fully protecting the public interest, to manufacture armor plate for the Government of the United States at actual cost of operation plus such charges for overhead expenses, interest, and depreciation as the Federal Trade Commission may determine to be fair.

* * * * * * *

The Bureau of Ordnance, reporting to the Navy Department, June 28, 1913, stated that without allowing anything for interest on investment the probable manufacturing cost of armor produced in a Government plant would be as follows:

Output per annum.	Capacity of plant and cost per ton.		
	20,000 tons.	10,000 tons.	5,000 tons.
20,000 tons	$279	$349	$400
10,000 tons	.....	314	394
5,000 tons	.....	.....	354

The bureau estimated that if interest on investment were to be added, the sum of $49 per ton should be added to the foregoing charges on a plant of 10,000 tons capacity.

Our plant has 12,000 tons capacity, and the average annual amount since 1887 which we have been asked to supply to the Government has been only 3,280 tons, or a little over 25 per cent of capacity. The average cost to the Government for the armor so supplied has been $432.62 per ton.

* * * * * * *

Such are the economies that we can effect in the manufacture of armor in connection with our other products that under present conditions we can manufacture for the Government cheaper than the Government can possibly do so for itself.

Our company has no inclination to make capital out of the military necessities of the United States. In the event of war or threatened war, all the facilities we have for any purpose are at the disposal of the United States Government upon its own terms. That means not only our armor plant; it includes our commercial plant, and our ordnance-making facilities. We have urged no program of preparedness; we desire only to be able to serve the Government as we may be called upon.

Our armor plant was built at the request of the Government of the United States. That request has, by the implicit action of successive Secretaries of the Navy, been frequently renewed.

The Government has acted upon the theory that it was desirable to maintain a reserve armor-making capacity not alone for the ordinary but also for the unexpected requirements of the Government.

* * * * * * *

If your committee desires further information, I shall be very glad to appear before you and give you all details in my power. We only ask that you give us a fair chance before you take steps to cripple our industry.

Mr. President, I know very little about this subject except what I have read, as the armor-plant bill was discussed and passed before I became a Member of this body. I note in the naval bill on page 24 that $11,000,000 have been appropriated for this plant. If any private corporation is willing to furnish the Government its material at a price as cheap or cheaper than the Government can supply itself, and with the declaration that in case of trouble or war its plant would be at the Government's disposal, it seems to me, with the trouble that the Ways and Means Committee and the Appropriations Committee have had in raising money to meet the unexpected and extraordinary expenses, that if these statements are true it is too bad to spend this $11,000,000 for that purpose. I will ask the Senator from Virginia if he can give me some information in regard to the proposition.

Mr. SWANSON. I did not hear the Senator. With reference to what provision of the bill is he asking?

Mr. TAGGART. With regard to the question of building an armor plant for the manufacture of ship armor. Can the Government build such a plant and manufacture the armor as cheaply or cheaper than the proposition made by the Bethlehem Steel Co.?

Mr. SWANSON. The Government have estimated, I think—we had this matter up here for three weeks, and discussed it—that they could build armor cheaper by a great deal than the prices they have been paying. As to what prices the Bethlehem Co. will accept in order to induce us not to construct an armor plant I am unable to say.

Mr. TAGGART. In their proposition, I understand, they offer to put it at the Government's own price, to be determined by accredited experts and Federal Trade Commissioners.

Mr. SWANSON. That amendment will come up later.

Mr. TAGGART. Understand, Mr. President, I am for the preparedness plan fully and heartily; but if we could save $11,000,000 on this proposition, and obtain the same results as though the Government owned a plant, I would be in favor of doing it. When the Army bill was up, and it came to the question of the nitrate plant, I was not in favor of the Government going into the manufacture of those munitions; but when I found that we had to go to South America to get the material, and if trouble should come that we would be deprived of that source of supply, I was then in favor of that plant. I am in favor now of this plant, if the Government can make armor cheaper than the steel corporation; but I should like to know if we have information as to what basis the Government is figuring on, and whether it can make it as cheaply or cheaper than the private plant.

The questions I ask are purely a matter of business, and I am anxious to know the answer. Can the Government make armor as cheap as it can buy it from outside parties?

Mr. SWANSON. The Government has never claimed that it could make it, except to a limited extent, cheaper than the Bethlehem Co. The Bethlehem Co. insists that it can not. The Government insists that it can make it cheaper than it has ever been able to get it from these companies, and that it will be a great saving of money for the Government to have this plant.

Mr. TAGGART. I should think that before that section was agreed to it should be investigated pretty thoroughly to find out whether it is possible that sum of money could be saved.

Mr. OLIVER. Mr. President——

The PRESIDING OFFICER (Mr. ASHURST in the chair). Does the Senator from Indiana yield to the Senator from Pennsylvania?

Mr. TAGGART. I do.

Mr. OLIVER. I will say to the Senator from Indiana that it is my intention, when the committee amendments have been acted on, to offer an amendment striking out this provision for the erection of an armor plant; and I think when the time comes I can convince the Senator from Indiana, and ought to be able to convince all other Senators, of the extreme unwisdom of such a movement at present.

Mr. PENROSE. Mr. President, the document to which the Senator from Indiana has referred, and which was circulated to-day, is, in my opinion, a very valuable one. I take it for granted that the Senate is already recorded upon this question and that the armor-plant provision will remain in the naval appropriation bill. But, for the information of future Congresses, I will ask unanimous consent to have this document printed as a public document. I do not want action taken on it now. I ask that it be referred to the Committee on Printing, so that they may consider whether or not it is wise to have it printed. It is full of very carefully compiled information, and as this constitutes a very radical departure on the part of our Government, I think it well worthy of being embodied in a permanent form.

I therefore make the request, and ask that the document be referred to the Committee on Printing.

Mr. REED. Mr. President, I object.

Mr. PENROSE. I do not know whether the Senator's objection is well taken or not. I conferred with the chairman of the Committee on Naval Affairs regarding this matter, and he said he would be very glad to have it printed. Certainly there can be no objection to the dissemination of information, particularly when the request is made by the defeated party.

Mr. REED. I have not any doubt that it would be very desirable on the part of this concern to have its brief and argument printed at the expense of the Government and distributed under the franking privilege. I am not sure that I understand the Senator's request. Do I understand that he asks unanimous consent that it may be printed as a public document, provided the Committee on Printing should give its O. K.?

Mr. PENROSE. Yes, sir.

Mr. REED. I object. If the Bethlehem Steel Co. wants to print its defense or its argument, let it do it out of some of the profits it has made charging the Government prices for 29 years which it now says it is ready to cut to a very large degree, although it also says that the cost of manufacture to-day is greater than it ever has been in the history of the country—a plain, bald confession that it has been despoiling and robbing this Government for the past 29 years.

Mr. PENROSE. Mr. President, of course I can reserve the right to read this as part of my remarks.

Mr. REED. Unquestionably, Mr. President, the Senator can read it. So can a man read the advertising literature of any company; but I hardly think the Senator from Pennsylvania would impose that upon the Senate; and if so, we may have to have a night session to accommodate the Senator.

Mr. PENROSE. Mr. President, I am the best judge of the propriety of the matters that I choose to bring before this body. This is not an advertisement in any way. It is a discussion of a public question; and I intend to bring up this request at a little later hour, when the armor-plate matter comes properly before the Senate. I will withdraw it for the present.

Mr. SWANSON. I ask for a vote on the amendment.

The PRESIDING OFFICER. The question is on the committee amendment.

Mr. LA FOLLETTE. Mr. President, I have an amendment to offer. I do not know whether it can be offered at this time or not.

Mr. SWANSON. It will be in order after this amendment is adopted. When we get through with this amendment and one more——

Mr. LA FOLLETTE. Let me inquire of the chairman just what amendment is pending. Is it the paragraph with regard to the building of battleships?

Mr. SWANSON. Yes; to substitute the Senate program of building for the House program of building.

Mr. LA FOLLETTE. As my amendment comes at a later place in the bill, I will withhold it for the present.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. CLAPP. Mr. President, before that amendment is agreed to, I want to say just a word or two.

I am one of those who believe in what is called adequate preparedness; but in preparing to meet a condition I consider what the condition to be prepared against is. The House passed a bill calculated to remedy fatal defects in our naval program, including auxiliaries, submarines, and so forth. Under some influence, which I will not now discuss, we found ourselves with a Navy that was top-heavy, with great, heavily armored battleships, and very deficient in certain lines of auxiliaries. When the great fleet was sent around the world some years ago—a fleet that was the astonishment of the world—figures which I obtained from the Navy Department showed that while that great fleet was in oriental waters, almost the equivalent of that fleet could have been assembled upon the Atlantic coast.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Connecticut?

Mr. CLAPP. With pleasure.

Mr. BRANDEGEE. The Senator made that statement once before this morning. I did not want to interrupt him at that time, but I want to ask him about that. Does the Senator mean that a fleet of naval vessels could have been assembled here that would have been the equivalent in fighting efficiency, caliber of guns, and range of that which cruised around the world?

Mr. CLAPP. I have carefully avoided using the word "equivalent." I say that we could have almost assembled the equal of that fleet.

Mr. BRANDEGEE. The equal in what respect?

Mr. CLAPP. In fighting efficiency. It would astonish Senators, and it astonished me when I got the information at that time. But the point I was making was that with that vast fighting force we had to hire the carrying of the great bulk of the coal necessary for that voyage. In other words, while we were top-heavy with great battleships, among the things we lacked were freighters, or what are ordinarily called colliers.

For some years the senior Senator from Iowa has championed a proposition to build a number of first-class colliers, so that if ever we did need them as auxiliaries to the Navy they would be ours to command—not to beg, confiscate, or contract for—and that in the interim they might be used in developing trade, especially along those lines where private enterprise had not felt itself warranted in projecting itself. Such a course would strengthen the Navy and go far toward solving the merchant-marine problem.

The House, recognizing the inequality which I have suggested, very wisely prepared a bill seeking to strengthen the Navy at its weak points but not adding any of these great, heavily armored battleships. When we get that bill into the Senate we find that the Senate has repeated the very mistake that has been made during the previous years; and we have before us a plan involving three hundred and fifteen million eight hundred and twenty-six thousand and odd dollars, an increase of 45 per cent over the House bill, and an increase of $166,000,000, or more than one-half, over the naval bill of the Sixty-third Congress, and this unusual increase is due largely to the proposition contained in the Senate bill for 10 additional great battleships. The Sixty-third Congress left our Navy with five battleships authorized, if I remember correctly—four additional ones and one to take the place of two that had become somewhat obsolete, and that we were able to dispose of to the Greek Government.

In asking what preparedness should be, we must, of course, consider what we have to prepare against.

In November of 1914, in the presence of some three or four thousand farmers assembled in the capital of my State, I discussed this question and took the position then that while we should always have a strong and adequate Navy and should gradually develop our Navy to keep pace with our growth, yet there could be no necessity for extraordinary and unusual expenditures, just as the great nations of Europe were wasting themselves, their men, resources, and credit. The experience of the time since then has strengthened, in my judgment, that position; and if there was ever a time in the history of our country when we could well await developments in the extraordinary building up of and additions to our Navy it is to-day.

It is not my province to discuss the cause of the European war, except, perhaps, to say that in the moving cause of that war we may learn one great lesson. That the cupidity of Russia is the force behind that war, it seems to me, can not be successfully challenged. In the diplomacy of Russia a century is nothing, and she has long looked forward to the time when she could have a southern outlet; and, with that instinct born of growth and conquest, she looks longingly upon western Europe. Superior to every other nation in her diplomacy, somehow she has induced other nations, which some day will be menaced by Russian growth, to join in the attempted destruction of the one great barrier between Russian domination of Europe and Europe itself.

When this war in Europe is over, Europe will present a pitiful appeal to the sympathy of the world—her millions of fighting men in their graves, her resources exhausted, her national credit at a low ebb; and yet we are told that that condition, which means almost the ruin of Europe, is the occasion for our doubling this year the naval appropriations, as against those for the fiscal year 1916.

Now, I recognize the delicacy of discussing international questions in the open forum, and yet we can not avoid a certain discussion of this question. Let us look around us and see where this supposed necessity lies. Surely it does not lie in the possibility of war with England, for if it does then the Administration and Congress are guilty of a want of preparation that is almost criminal on our part, with 4,000 miles of unguarded boundary between the possessions of England and our own country, with lakes upon which fleets may float and yet not a battleship on those lakes, bound on the contrary by an agreement with England to refrain from fortifying the boundary or building a navy upon those lakes. Why, indeed, is that? Because every American knows, as every Englishman knows, that there never can be war with England and the United States. If there is even the most remote possibility of ever having a war with England then we are guilty of criminal negligence in not preparing to meet that condition, but we all realize that such possibility does not exist.

War with England would be a deplorable thing. War with any country would be deplorable, but war with England might result in one thing. I believe it would result absolutely in the annexation of New York City to the United States. So we might find some consolation in the misfortunes of that war.

But, Mr. President, I repeat, no man in this country dreams of war with England, and in our military and naval preparations we ignore the possibility of war with England, because we do not reckon her fleet as one of the fleets that we must meet in naval preparation, and we allow those 4,000 miles of boundary to go unfortified and unguarded. Again, I want to say I believe in the wisdom of it because of the utter impossibility of this Nation engaging in war with England.

The same conditions that make war with England impossible make impossible war with any nation to which England sustains a relation where she is under obligation to take part in war as a part of that relation. So in our recognition of the relations of England we not only find the impossibility of war with England, but the impossibility of war with any nation that must depend upon an alliance with England as a part of a war program with it. So we eliminate from the necessity England and any ally which depends upon England to take part in her wars.

We then have continental Europe left. Continental Europe to-day is exhausting herself, as I have shown, and when this war is over, when the people of those foreign nations no longer feel that sense of defense which comes to a nation in actual war, even the credit of those nations will sink lower than it has already sunk. The fact is that a people harassed with war, believing themselves battling for national life, will take the bonds and securities of their country, but when that inspiration ceases those bonds and securities have got to sink lower even than now. Already they have come to this country to negotiate loans to carry on the war.

Mr. President, I do not want to seem facetious, but as boys we were afraid of graveyards; we were afraid to enter a graveyard at nighttime and in the dark. Strange it is that as grown men we will still fear the graveyard of Europe. Into those awful graveyards are pouring the life blood, the fighting blood, of Europe to-day. Already millions of lives are entombed and millions more are doomed to follow. Over those stricken countries there stalks the grim shadow of coming want and trouble. Aye, more than that, when the inspiration which comes from a sense of defense is gone there may stalk something not a phantom, but the uprising of a people demanding that no longer shall the whim of sovereigns consign millions to their graves and cover a land with ruined homes, with widows and orphans.

A few weeks ago I saw a picture in a newspaper. It was about the time when Mr. Bryan, it was said, was going to Europe to talk peace. The picture represented Mr. Bryan embarking upon a steamer with his grip in his hand, and on the other side were 12 men with crowns on their heads holding up their hands in holy horror and exclaiming, "We will quit fighting if you will only stay away." It was intended as a satire upon Mr. Bryan.

Oh, the lesson that was contained in that picture. By what authority did 12 men, because they happened to wear crowns, possess the power of saying peace or war shall be the fate of Europe? When this war is over the chances are that there will be revolutions, not bloody revolutions, but political revolutions, in Europe that will change and take from 12 men the power to command a force that results in plunging millions to their graves and covering the land with desolation and sadness. It will take Europe long years to recover from this war; long before that time the battleship authorized by the Senate bill will become outclassed and to some extent obsolete.

Finally, when those who advocate these extraordinary increases are driven from the possibility of war with England and made to see that the graves of Europe will not give up their dead to cross the Atlantic and battle with us they are driven to the last recourse, and that is the suggestion of danger in the Orient and the possibility of war with Japan is pictured.

Mr. President, it is true that Japan has shown a wonderful alertness, a wonderful bravery, and a wonderful patriotism. Attacking Russia upon her outlying possessions, connected with the harbor and empire only by two streaks of rust, striking that great giant when it was in a stupor and a slumber, she inflicted much injury upon Russia.

But by the token of that power which grows from an empire that discards the liability of over-sea territory and confines her expansion to a common center, the time will come when Russia will be as absolutely intrenched in Korea and Manchuria as she is to-day in the Crimea. Driven twice out of the Crimea, Crimea is now a part of her Empire. With no outlying possession as liability, a nation growing from a common center is like a rubber ball, you may indent such a nation, but when the force is removed the nation springs out to its common circumference again. No man can say whether in the future state we can look down on this world or not, but if we can some day we will see that great power expanding, and some day the nations who to-day are leagued in the attempted destruction of the barrier between Russia and European expansion will if successful regret the part they took in breaking down that barrier.

But, Mr. President, coming back to Japan, what occasion can there be for war with Japan? It is a strange thing that to-day the only country on this earth that is talking about war with the United States is the United States itself. The only nation on earth that is even dreaming or conjuring war with us is ourselves.

Is it any wonder that Japan should grow somewhat proud when day after day in this great land of ours, with our triumphs of the past, with our patriotism of to-day, with our limitless resources, we are depicting the conquest of America by the Island Empire? Is it not enough to make an American's blood boil when he hears on every hand this portrayal of the conquest of this great land, with her historic achievements reaching from Bunker Hill down to this hour, when our resources are so limitless that during the last two years at any time we could have stopped the war in Europe by simply withholding the supplies for war. And still we are told on every hand that we are menaced by the Empire of the East. It is no wonder if the people of that island may some day come to think that they are of more consequence in war and in military affairs than they themselves may have dreamed.

We are the natural allies of Japan. We opened the ports of Japan. We should ever be the friend of Japan. Of all the problems that surround that growing Empire of the Orient, the least probable, the most remote that any Japanese statesman could think of would be the conquest of this great Republic, crossing the sea 4,000 miles to reach our shores.

Notwithstanding the absolute impossibility of that, we are still told that we must go on with this vast program. I do not challenge the sincerity of men, but I do challenge, Mr. President, the wisdom of the men who favor this expansion upon the theory that Japan is our possible menace, and then when they are asked that the preparation we are making here should be placed where it may be a defense against Japan they overwhelmingly vote down the proposition. What shall be said of the judgment that has developed this Senate proposition declaring the necessity for this bill, basing it upon the danger of war with Japan, and then turning around and leaving that great Pacific coast defenseless, so far as the Navy at present or proposed is concerned?

Mr. President, I am going to deal with one phase of this question, and I know I will not only be criticized for it but I will be severely condemned and denounced for it, and that is the force outside of Congress that is back of this war propaganda. Ever since I have been in the Senate, every year when the naval bill loomed up there was talk of war. It is easy, as a rule, I think, to see where the propaganda emanated; but never before was there the organized propaganda that has been organized in favor of unusual and extraordinary preparation

at this time. That propaganda—I know by the positive evidence of a man whom I have known for years—was instigated by the men who profit in this so-called preparedness.

Why the sudden development of these great dreadnaughts when the House in its wisdom had seen that the Navy was already top-heavy with dreadnaughts? Why this sudden expansion and program except to serve the interests of those who will gain by this exploitation of the people? I am not criticizing Members of the Senate in that. Most of those who favor this wonderful expansion live where perhaps they can conjure up danger in the graveyards of Europe.

This propaganda started a year ago last summer. A man visited the capital city of my State to organize the Defense League—a lawyer who had lived there formerly and who had gone to New York. Only a few weeks ago he was in my office, and we were discussing the success of the propaganda he had been working upon at the hands of the interests that lie behind it.

Mr. President, the vital question to my mind is whether the American Government, representing the American people, shall be supreme or whether great forces that have grown up under this Government shall dominate the policy and the purpose of the Government.

It is always easy to adopt some catchword. I was thinking the other day of the experience of Paul when he went to Ephesus. He was preaching there against idols, and the makers of idols gathered a mob around him, and they exclaimed, "Great is Diana of the Ephesians!" That was a wonderful argument; as absolutely wanting in logic as a pumpkin is in spirituality. Yet it caught the crowd. It is always some catchword. So the propaganda for this extraordinary military and naval preparation has taken the word "preparedness." Of course it appeals to every citizen. There is no loyal American who does not want his country to be prepared. And yet it is a term so elastic that it may mean anything from what is represented by the calm, judicial action of the House in framing this bill to the extraordinary and unwarranted claims of some who insist that we shall have a Navy greater than that of any other nation on earth.

Back of this cry of preparedness is that sinister force that fattens and thrives upon this unusual and extraordinary and unwarranted appropriation, and, as in the history of every country, that is the element that will suffer least of all by this expenditure, which would engender the spirit of a bully that finally would get us into war with some country. They never will go to war.

The men who raise the cry here are safe and secure, and yet that cry appeals to the brave, loyal hearts of the boys of the Nation and they are the ones who will pay the penalty, the ones who will make the sacrifice.

So, too, in taxes.

In closing these suggestions I want to make an appeal to my Democratic brethren in the Senate. You to-day boast in your platform and on this floor of the initiative of Democracy as evidenced in the great policies that you have developed in the recent administration. You have grappled as Democrats never before grappled with the great problem of recognizing that the Government is created to advance the moral and material interests of the people, and throwing off the thraldom of strict construction that so long bound the Democratic Party you have advanced upon new and broader grounds and to-day recognize that the Constitution was made for the American people instead of the American people being made for the Constitution. Under that new and enlarged recognition you have developed some great policies.

A few weeks ago we had before us the river and harbor bill, calculated to develop the possibilities of inland navigation as well as to deepen the great harbors upon our seaboard. Yet there was a hue and cry raised that $40,000,000 were being expended for this purpose. However, here to-day it is proposed without a quiver to spend $315,000,000 to develop a Navy in a time of profound peace, and when the great powers of the earth are slowly but surely exhausting themselves of men, resources, and credit. On this must come a bill for taxation, and when the people face that bill, what will they say? Every morning our desks are covered with telegrams, "Do not tax this," "Do not tax that." When the American people come to pay that tax, when they come to realize that back of all this cry of preparedness was the sinister hand of privilege preying upon the spirit of patriotism, somebody will be held responsible by the American people, and it may be, too, that they ought to be held so responsible, because, Mr. President, men occupying the position of Representatives and Senators should not allow themselves to be influenced by considerations or should not allow themselves to be played upon or deceived by this sinister force. This force has haunted this country for generations. When it organized the National Defense League it had grown so bold that the men engaged in making munitions did not shield themselves in secrecy, but came out as leading members of that organization.

Well did the great Dolliver once say upon this floor that that spirit had grown so bold that its hand seemed to have lost its cunning, a spirit that has no regard of patriotism, little thought of patriotism. Yet that spirit is disguising itself behind the holy name of patriotism, and is carrying us off our feet in this extravagant, unwarranted, and unjustifiable expenditure. It is not only a waste of money.

The Senator from Virginia [Mr. SWANSON] in opening the debate on the bill well said that this bill was vital and important, that if we made a mistake we could not retrace it. If we make a mistake in squandering, we never can retrace it. If we make a mistake in economy and it proves a mistake we can retrace it. Every battleship that we have kept out of these naval appropriation bills in the last 10 years experience has shown was a positive gain to the United States, because experience has shown that there was no necessity for additional battleships.

So we are now face to face with this proposition. I can hardly hope that the proposed proposition to reject the Senate committee amendment which makes the increase and restore the House provision can prevail. I can hope, however, that perhaps in conference the men who represent the House will stand firm, and I certainly hope they will stand firm if by any chance this Senate provision is retained in the bill.

Whether I shall vote for the bill or not will depend upon some development in the bill later. The bill up to this time contains a provision for the establishment of a plant to make armor plate. An effort will probably be made to strike that out and if that is successful then the last justification to my mind will have gone for voting for the bill. Yet I regard the putting of that provision in the bill as something of a sop, because accompanying the proposition to build the armor plant, which will take years to accomplish, we will have already committed ourselves to the armor-plate industry of the country in this extraordinary plan that involves this vast addition of great heavily armed battleships.

Mr. McCUMBER. Mr. President, I shall take only a few minutes. I wish to discuss the general proposition and to some little extent the program for 10 battleships.

That we are taking a great step in our naval program no one can deny. That the step is uncertain and in some respects unwise probably is equally true. We are advancing from a past of parsimonious and insufficient legislation to a future of reckless and spasmodic expenditure. In our past programs there has been no proper coordination of the several parts of a great naval fighting machine, and this bill, though liberal to a degree of extravagance, gives no assurance of a Navy best adapted to new conditions of warfare.

We look in vain through the report of the Naval Committees to find the foundation scheme for the structure of our mightier Navy. We listen to the opening arguments in vain for the reasons which justify the expenditure along particular lines of construction. There is no consensus of views of the two Houses of Congress or the two committees of the respective Houses that have had this important piece of legislation under consideration. Both found their action on the premises that our very national life depends upon a huge expenditure of money for the construction of a mighty Navy, but neither agrees in any respect on the important question of how the money shall be expended.

The ordinary reader would naturally expect that if our country is in great and imminent danger these august committees and those having the responsibility of the initiation of needed legislation would have some common understanding as to where the danger is liable to come from, where we would be liable to be assailed, and what means should be taken to meet the imminent danger. The only idea which the reader would gather from the committees having the matter under consideration would seem to be that we need $500,000,000 worth of additional naval power, and it matters little along what lines the expenditure is made. Certainly one can not but be amazed to find that after having continued a program for years which required two battleships annually that the House committee and the House, in this period of great danger, have voted to discontinue the construction of battleships altogether, while the program of the Senate committee is that our national life depends upon a program which shall call for 10 additional battleships.

There certainly is wide difference between the House committee view that we need no more battleships and the Senate committee view that we need 10 more, 4 to be begun as soon as practicable. With this divergence between House and Senate view upon a question involving our national life and safety, I

think the country has a right to know what facts governed the House of Representatives in putting through a naval appropriation bill with no battleships, and an equal right to know what reasons actuated the Senate committee in so ignoring the House view. I sought to secure some enlightenment the other day in a question which I propounded to the Senator from Massachusetts concerning the reasons which governed the House, or were assumed to govern it, in altogether abandoning the construction of battleships. If the information which I received meant anything, it meant that the House had no view whatever, or, if it had, it had failed to express it. The beautifully phrased argument of the Senator from Virginia [Mr. SWANSON], reiterating the claim often made that the control of the seas is essential to victory in any great war, that the god of battle always smiles propitiously on the nation with the greatest navy, fails, however, to assist us in arriving at the principal question—how that supremacy is to be attained. I assume that 10 battleships of the dreadnaught type, when completed, armored, and ready for service, will cost us at least $180,000,000. The House does not think we need to spend one dollar of this; the Senate thinks we need to spend all of it. The House, so far as I know, has failed to give us any reason why we should construct no more battleships, and the Senate, with equal reticence, has failed to show why we should have 10.

In these days of bureaucracy, I suppose the Senate committee was governed by the advice given by the Naval Board or War College. I do not know whether the Naval Board changed its view after the bill had passed the House or whether the House in a paroxysm of independence used its own judgment in the matter. I do know that the Navy War College, through Rear Admiral Knight, now comes forward and says, in substance, that the Senate provision for the immediate construction of four battleships is all wrong. He says:

If the number of capital ships to be appropriated for this year is 4, I recommend that all be battle cruisers. If the number is 6, I recommend 4 battle cruisers and 2 dreadnaughts. If the number is 8, I recommend 4 battle cruisers and 4 dreadnaughts. If the number is 10, I recommend 6 battle cruisers and 4 dreadnaughts.

Anyway, if we are to have only 4, he recommends that those 4 shall be battle cruisers and not dreadnaughts, as is provided by the committee; in other words, Mr. President, the expert testimony says that this money which the Senate proposes to spend for 4 out of 10 battleships provided for had better be spent for cruisers.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Connecticut?

Mr. McCUMBER. Certainly.

Mr. BRANDEGEE. In order that I may understand this matter, I desire to ask, Does the Senator from North Dakota understand that this bill provides for no battle cruisers at all?

Mr. McCUMBER. No; I do not. I understand that it provides for battle cruisers, and then, in addition, it provides for 10 battleships, 4 of which are to be constructed immediately; and Admiral Knight recommends, if I understand his suggestion, that those 4 ships had better be 4 additional battle cruisers than 4 battleships.

Mr. BRANDEGEE. Now, just a moment. Does not the bill provide for four first-class battleships of the dreadnaught type and for four battle cruisers, thereby exactly complying with the recommendation of Admiral Knight?

Mr. McCUMBER. No; the bill provides for 6 battle cruisers and 10 battleships.

Mr. BRANDEGEE. The chairman of the committee——

Mr. McCUMBER. Admiral Knight's recommendations were made only one day ago, and that was after the Senate committee had provided for four additional battleships, while the House of Representatives had provided for none.

Mr. BRANDEGEE. Irrespective of when the provision was adopted in the bill or when Admiral Knight spoke, the fact is that they coincide exactly now, is it not?

Mr. McCUMBER. No; the fact is, as I understand, that Admiral Knight proposes that the money which is now provided for the four battleships had better be provided for extra battle cruisers rather than for four extra battleships.

Mr. BRANDEGEE. The Senator from North Dakota had better read the previous part of his speech over again—just the last few lines—for I distinctly understood him to say that Admiral Knight said that, if the proposition was whether we should have dreadnaught battleships or whether we should have battle cruisers, he would prefer cruisers, but if we could have both he would prefer both.

Mr. McCUMBER. No one would question for a single moment that if we could have four first-class battleships we would be that much stronger. Admiral Knight naturally wishes for additional strength in both cruisers and battleships.

Mr. BRANDEGEE. That is not the question.

Mr. McCUMBER. Admiral Knight does not claim that we do not need that many battleships; but he says if we are to expend only a certain amount of money, we should expend that portion which we are now providing for four battleships, as I understand his statement, for battle cruisers.

Mr. BRANDEGEE. The Senator's remarks, if they have any force at all, and if I understood them correctly, were to the effect that he was criticizing this bill because it did not conform to the recommendations of Admiral Knight. In my opinion it exactly conforms to his recommendations.

Mr. McCUMBER. Well, possibly the Senator from Connecticut had better wait to see what my criticism is. I am simply reading the statement made by Admiral Knight as to what his recommendations would be, and they were made some time after the bill had been reported to the Senate. I would hardly have thought, if he had intended to conform his ideas entirely to this bill, that he would have made a recommendation at this time and said that he had changed his mind since the battle off Jutland had demonstrated certain things, because these provisions had all been adopted by the Senate committee, as I am informed, before that battle had been fought.

Mr. SWANSON. Mr. President, if the Senator will permit me, Admiral Knight, who is president of the War College, was asked his opinion in the event a certain building policy were pursued what type of ships should be constructed, to which he replied:

If the number of capital ships to be provided for this year is eight, I recommend four battle cruisers and four dreadnaughts.

The number of capital ships provided for in the pending bill is eight, and it provides for the construction of four battle cruisers and four battleships, as recommended by Admiral Knight and as recommended by the General Board, precisely carrying out the recommendations of Admiral Knight made to the Secretary of the Navy in regard to a building program.

The Admiral further said:

If the number of capital ships to be provided for this year is four, I recommend that they all be battle cruisers.

And I think we would all concur in that, because we have no ships of that class. Here is the statement of Admiral Knight. I will hand it to the Senator if he so desires.

Mr. McCUMBER. I have the report here.

Mr. SWANSON. If the Senator will read the bill, he will see that it conforms to the suggestions of Admiral Knight.

Mr. McCUMBER. The House provided for no battleships, while the Senate provides for 10 battleships, 4 to be begun as soon as practicable.

Mr. SWANSON. And appropriated for this year.

Mr. McCUMBER. Yes. Now, note the very first statement of Admiral Knight:

If the number of capital ships to be appropriated for this year is four, I recommend that all be battle cruisers.

Mr. SWANSON. I think that is right, and I concur in that.

Mr. McCUMBER. Well, the number that the committee recommends for this year is four, is it not?

Mr. SWANSON. Not capital ships. We recommend eight capital ships, consisting of four battle cruisers and four battleships. That is in accordance with the recommendation of Admiral Knight, who said if eight capital ships were authorized, four should be battle cruisers and four should be battleships.

Mr. CUMMINS. Mr. President, does the Senator from Virginia say that we appropriate in this bill for eight capital ships this year?

Mr. SWANSON. This year.

Mr. CUMMINS. How much will eight capital ships cost?

Mr. SWANSON. Each battleship is to cost $11,500,000 and each battle cruiser $16,500,000.

Mr. CUMMINS. As I understand, that does not cover the total cost; it may include machinery, but it does not include armor and armament.

Mr. SWANSON. They may cost four or five or six million dollars more. I have here the estimates, which I can give to the Senator, which state exactly what the cost will be.

Mr. CUMMINS. I think the Senator is in error when he says this bill appropriates for eight battleships this year.

Mr. BRANDEGEE. If the Senator will permit me, the Senator from Virginia does not mean that we appropriate the entire amount for the complete construction and equipment of the ships, but only such part of the money as would be required during the next fiscal year.

Mr. SWANSON. We authorize the Navy Department to contract at once for eight capital ships.

Mr. CUMMINS. Mr. President, the authority is to contract for all at once; but the appropriation, as I gather it, will not

half pay for eight first-class ships, possibly for not more than one-fourth of that number.

Mr. SWANSON. We simply make the appropriation as the money may be needed; we do not appropriate three or four years ahead.

Mr. McCUMBER. The particular point I wished to bring to the attention of the Senate is the greater value which Admiral Knight accords to the cruisers in case we are limited in our expenditure, a value which I think this war has clearly demonstrated.

However, Mr. President, I wish to get at the source of this advice and determine its real value as expert advice. I confess we lose some of our confidence in naval expert advice when we find it admitted that it never occurred to our naval experts before a certain sea battle that a cruiser could be used to engage a battleship until such battleship could be engaged by one of its own class.

Rear Admiral Knight calls attention to the Battle of Jutland and the claim made by Admiral Jellicoe that "they were seeking to hold the enemy fleet until Admiral Jellicoe could come up with the dreadnaughts." I do not know whether that is a correct version of the Battle of Jutland or whether the British fleet, thinking it had only to deal with cruisers of its own class, suddenly found itself trapped and battling at short range against superdreadnaughts. Even the advising admiral does not know whether the cruisers were destroyed by mines, torpedoes, or opposing battleships. This new use for battle cruisers seems to have dawned on our experts only after this Battle of Jutland. The surprise to the average thinking man is that the War College never thought of this use of the cruiser until it was demonstrated in this battle. And this one incident, this new discovery, is of such great weight and importance that it overthrows all past calculations. I am sorry to learn, Mr. President, that this new use of the cruiser has been ascertained, or, rather, I may say that I regret exceedingly that some other and better and less expensive way in life and property could not be found to engage the greater sea monster and notify its enemy of its proximity than to send down to the bottom of the sea an indefinite number of cruisers, with their thousands of brave men, just to bait the battleship until the arrival of its equally powerful enemy.

I shall hope that the War College may be able to conceive of some less costly method of engaging the enemy until it can be met with warcraft of its own class. However, if I understand the view of Admiral Knight fully, it is that these cruisers should not have engaged the battleships at such close range; and as this seems most reasonable, I am more inclined to the view that Admiral Beatty, commanding the British squadron of cruisers, did not purposely bring his lighter vessels into such close contact with the enemy dreadnaughts, but that he was misled by the fog and was not aware that back of the line of cruisers was hidden the dreadnaughts of the enemy.

I think, Mr. President, we are misleading the country in the expression we are continuously using in reference to our naval program. We are always referring to it as a program of defense. We, of course, are not deceiving ourselves. We know it is a program intended for efficient war power. There can be no such thing as a merely defensive naval warfare. Navies battle on the broad seas within a domain common to the world. They strike wherever the blow will be most effective. That blow is generally most effective when aimed at the commerce of the opposing nation. We all know that no nation on the face of the earth would be foolhardy enough to attempt a real invasion of the United States proper. I doubt very much if any of them would be foolhardy enough to attempt even the bombardment of our great cities, defended, as they are, by coast batteries and, as they will be, by mines and submarines.

Any war that we may ever have with any great nation will be fought out on the ocean. It will be a war for the destruction of the commerce of the two nations engaged. Our Navy is not intended merely to defend our own commerce; it is equally intended to destroy the commerce of our enemy. With land batteries equipped with guns of the greatest caliber and power, with mines and submarines, we ought easily to be in a position to defend our coast against the extremely remote chance of assault. But so long as we hold the Philippine Islands, the Hawaiian Islands, or Porto Rico; so long as we must guard the Panama Canal, we shall need a navy equal in fighting power to that of any country with which we would be liable to have war. We shall need sufficient battleships to convoy our troop ships to these localities, these vulnerable points, which we have inherited with our expansion.

I have not seen in this war anything to justify the assertion so constantly made that the dreadnaught must continue to be the backbone of our naval prowess. It may be admitted that the dreadnaught can stand greater punishment from the enemy guns at a given range than can the cruisers. I think, however, that that remains to be demonstrated. Certainly the predreadnaught type have not been conspicuous in their ability to keep afloat in the Dardanelles campaign, nor the superdreadnaught to withstand submarine, mine, or torpedo. The only vessels that really have accomplished anything in this war, outside of submarines, have been the swift cruisers with long-range and powerful guns, and my own judgment is that for a given amount of money we can accomplish more effective work in the construction of a greater number of fast cruisers. Whatever may be the view of Admiral Knight, with reference to the number of battleships, I agree at least with what I believe to be his view, that we are comparatively short of battle cruisers.

The immediate question, it seems to me, in naval warfare is, What character of war vessel can inflict the greatest injury to the enemy? When you strike at the commerce of a nation you strike at the life of that nation. This is at least true of most great nations. There is no country in the world, as I have suggested many times before, that can meet us on equal conditions on the sea, even though their armaments might be equal. We could withdraw all of our commerce from the outside world without any great suffering. We can produce all the clothing, all the food, all the guns, all the ammunition, all the steel, all the copper, and all the other materials necessary to equip, arm, and maintain an army of 15,000,000 men and keep them continuously in the field, and we can, in addition to that, furnish all the material for the necessities and comforts and even luxuries of our people without going outside of the boundaries of the United States. No other great nation can do this. So the destruction of our commerce, while it might be a great injury to us, could not seriously affect our national life.

Other nations must live on their commerce. Great Britain could not continue six months if the channels of trade were impeded and her food and clothing supply cut off. If, therefore, we should wish to strike at the heart of our adversary, we can do it more effectively with our commerce destroyers, the swift cruisers, which, escaping the slower battleships, could deal death and destruction to the merchant marine of our enemy.

I shall support any amendment to cut down the battleships and increase the cruisers. I shall vote for the bill even though it may not conform to my own views. Whether rightfully or wrongly, the press of the country has created a spirit of apprehension of danger to this country, and the people are in that state of mind that they are willing to shoulder the burden for increased naval power. My hope, however, is that, instead of increasing to such a great extent the number of superdreadnaughts, which have not proven very effective in this war, we shall expend the money for the more effective weapon of warfare, namely, the battle cruiser.

There is one provision in this bill, however, which I deem far more valuable than all the others, and if that provision would challenge the earnst endeavor of this country, if it would bring into play a diplomatic effort as strong, as persistent, and unrelenting as that used in the construction of these implements of death provided in this bill, we should not need to ever complete this program. I refer to the provision for inviting the nations of the world to disarm. The time is not far distant when this most horrible exemplification of brute force as a means of settling international difficulties will have demonstrated its inefficiency as a mode of settlement as well as its criminality. When the accounting has been had, the books balanced, and the slaughter and devastation laid bare to the world, the people will be in the proper mental state to comprehend the necessity for national arbitration, and if, at the end of this colossal war, any nation still survive which refuses to accede to a world demand for an international code fixing the rights, duties, and obligations of every great nation of the earth and providing for a great international tribunal to decide every question of difference, then all other nations should unite to force the recalcitrant country into submission, as the people of a community unite to capture and chain a madman with murderous mania.

Mr. President, while I am as certain as I am that the sun will rise to-morrow that the time will come—and, in the life of nations, will come soon—when all of the great nations will unite in a great international compact for the preservation of the peace of the world, I am well aware that that time has not yet arrived, and that just so long as other nations are armed to the teeth, just so long as they settle their differences by the arbitrament of arms, just that long must we be prepared to back our arguments at the cannon's mouth; but, Mr. President, that does not mean that we need to go into any wild extravagance in our expenditures for naval efficiency and for national preparation.

We do not need a Navy greater than that of Great Britain; we do need a Navy that is sufficient in power to enable us to defend all of our outlying possessions against any other naval power; but what we need more than anything else to-day is a merchant marine, and that which will go with a merchant marine, the necessary equipment to support and attend the great Navy which we are providing to-day. I hope the day may soon come when we shall have such a merchant marine. We can never have an efficiently coordinated Naval Establishment without it. I can not but believe, Mr. President, that, measured by its effectiveness, we are building up a Navy with a disproportionate number of dreadnaughts; that we are surrendering grim utility for the more showy appearances.

Mr. JONES. Mr. President, I shall not vote for this bill through fear. No matter what other people may think of us, there is no nation that seeks a quarrel with us. This has been clearly shown by recent events.

If I had my way I would change this bill in some essential features. I would provide for more of the largest dry docks at our navy yards, in order to have ample facilities to care for our ships when built. I would build fewer capital ships and more swift scout cruisers, destroyers, and many more submarines, and offer more liberal inducements for the development of the efficiency of the submarine. I am not a naval expert, and I know that the naval experts are for the large ships. There are reasons for their views, but they will admit their error by and by. If any ship has shown its effectiveness and deadly power in this war it is the submarine. When the war is over its toll of warships and merchant vessels will be greater than that of any other class, and there will be many that it has sunk for which credit will not be given. I can not have my way now, but it will not be long until battleships will go and our bulwark by sea will be the submarine, which never becomes obsolete until actually put upon the scrap heap.

A strong navy and just and reasonable demands are an absolute guaranty for us against attack. We may well diminish the cost of our military force on land by the increase on the sea. We should build our Navy with no nation in view but the United States. If it should have rank as compared with other navies, there is more reason for its being first than second.

On May 15, 1902, the naval appropriation bill was under consideration in the House of Representatives, of which I then had the honor to be a Member. That bill carried a liberal program for the development of the Navy and its navy yards. During the consideration of the measure I said (p. 5499 of the RECORD):

> Mr. Chairman, I am in full accord with the policy of this committee. I believe in building up the Naval Establishment of this country, especially the navy yards and the Navy itself. The country is in favor of this policy, and any advance will be hailed with delight throughout the Nation. We want a strong and powerful Navy. In my judgment, and in this I speak for myself alone, we should have a Navy the equal, if not the superior, of any nation on earth, England not excepted. Our position in the world's affairs to-day demands this. * * * The greatest conservator of peace is to be prepared for war. * * * We must not invite attack by our weakness. We have possessions that are most inviting to other nations. They would be the first and probably the only object of attack in case of war, and however much some may desire to get rid of these possessions, there are none who would not resist to the last any attempt of another nation to take them by force. We may wish to give them up, but we will not have them taken from us. To guarantee our own security, to be sure of solving these problems in our own way and in our own time, we should be in a position on the sea that none will dare attack. It will be money well spent if we do nothing more than place our flag in every port of the world, even though it may be on a warship on a peaceful mission. Every ship flying the Stars and Stripes in a foreign port is an agent for and a promoter of American commerce, civilization, and government. It carries at its masthead the insignia of that virile civilization that has sprung up in the Westland, the product of all that is best and strongest in the Old World; and in the waving folds of its red, white, and blue the poor, oppressed, and liberty loving of every race and clime see a beckoning hand inviting them from poverty to plenty, from distress to happiness, from tyranny to freedom, from despotic to representative government.

Those words were spoken from conviction and not from fear. Those views I have largely held ever since and I now hold them. I want a strong Navy to insure peaceful respect for our just rights and not to enforce unjust demands. I want a strong Navy to win regard, not to arouse fear. I want a strong Navy to elevate our people, not to humiliate others. I want a strong Navy as an integral part of the Nation and symbolical of its power, insuring honor and esteem from peoples and peace with all the world.

Mr. STERLING. Mr. President, I desire to say just a few words, partly in explanation of my vote last evening on the motion to table the amendment of the Senator from Nebraska [Mr. NORRIS]. I do not desire it to be understood that my vote against the motion to table was an expression of my belief in the merits of the amendment of the Senator from Nebraska; but the Senator from Nebraska was the only one who had spoken on that important amendment. The hour was late. It was then within a few minutes of the time of the recess. I did not know but that others might desire to speak on the amendment, and I thought it no more than fair that the matter should go over until this morning, when opportunity would be had, if it was desired by anyone, to speak on the amendment, and that a vote could be then had upon the amendment directly.

But, Mr. President, so far as the vote on the amendment reflected the opinions of Senators, I have no complaint to make. I am of the same opinion as indicated by that vote. The amendment, had it been adopted, would have largely nullified this bill, with the principal features of which I agree. It would indeed be a very happy consummation if, as contemplated by the amendment, this great Government could, at the close of the war in Europe, be a party to the treaty which would settle the terms of peace to the extent at least of providing for a limitation of armament; to the extent of providing for an international court of arbitration and an international navy that should have for its work the enforcement of the decrees of that court; that would be a consummation devoutly to be wished; but in the meanwhile, and under the terms of that amendment, there will be the uncertainties of the war—first, the uncertainty whether it shall last three months, six months, nine months, or whether we shall measure the duration of the war in years; whether the length of time we are precluded from starting on the battleship and cruiser building program until the war is over. There is the further uncertainty that our proposal to be made parties to the treaty of peace for these purposes would be welcomed or accepted. We would have no right to intervene, no cause of protest if not admitted. And so, Mr. President, under present conditions I think we must view propositions like these as quite impracticable.

I am in favor of the main features of this bill. I profess no expert knowledge in naval affairs or as to the comparative merits of a dreadnaught and a battle cruiser as a fighting machine. I must depend for my information and for my guidance in that respect upon the Navy Board and upon the testimony of the experts who have gone into and understand the subject, and who in turn appear to have learned some lessons from the recent great naval battle in the North Sea; lessons which very properly, as it seems to me, have changed expert opinion and brought it to realize the necessity for more battleships. Hence the reason for four battleships of the dreadnaught type, to be built as soon as practicable under the terms of this bill.

Mr. President, when I think of the vast extent of our coast line on the east, on the Pacific, and, too, on the south; when I think of our great national resources, our population, and our foreign commerce as it is and as it is to be, of our island possessions, and last, of the possible exigency of war, I can not help but think that the Navy provided for by this bill is not greater than should be expected of us nor more than commensurate with our needs as a great world power.

I have noted, Mr. President, something of the growth of public opinion in regard to preparedness as it relates to both the Army and Navy. I remember how it was in the far interior and in my own State at the beginning of this session of Congress, and how I received protest after protest against any great program of preparedness, and many protests against any further preparedness whatever by way of additions to either the Army or Navy strength and equipment. But as time has gone on, as the people have been educated and witnessed the object lessons furnished by Mexico and conditions on the border, as they have come to see that an attack on either coast would be an attack upon our whole country, affecting its integrity and in its entirety, they have become more and more in favor of preparedness; and I hear no complaint now as against what might at one time have been termed the extravagance of the pending bill; what a few months ago would have seemed excessive is now deemed reasonable.

One thing has been brought about by the discussion everywhere in regard to the need of preparedness as it pertains to both Army and Navy; I think it is worth a great deal to the Nation, and that is a new spirit, I may say, of patriotism and of national unity. They are saying now, "Let us be prepared, not for adventure, not for aggression, not for exploitation, but prepared in order that America, American rights, and American citizens everywhere may be respected and protected."

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Secretary will state the next amendment passed over.

The SECRETARY. The next committee amendment passed over is the amendment which proposes to insert, beginning after line 22, on page 4, the following:

For the purpose of expediting the transaction of the necessary departmental business in connection with the construction of new vessels herein and heretofore authorized and the increases in personnel, the Secretary of the Navy is authorized to employ, in accordance with the provisions of the civil service act of January 16, 1883 (22 Stats. at L., p. 403), during the fiscal year ending June 30, 1917, such civilian civil-service employees in addition to those authorized in the legislative, executive, and judicial appropriation act approved May 10, 1916, as may be necessary to carry on the work of the Navy Department and its various bureaus and offices, and the sum of $250,000 is hereby appropriated for the pay of such additional employees, the total of such expenditures not to exceed for: Office of the Secretary, $10,000; Office of Chief of Naval Operations, $5,000; Office of Solicitor, $4,000; Office of Judge Advocate General, $6,000; Bureau of Navigation, including one chief of division, at $2,250, $18,000; Office of Naval Intelligence, $5,000; Bureau of Steam Engineering, $31,000; Bureau of Construction and Repair, $41,000; Bureau of Ordnance, $10,000; Bureau of Supplies and Accounts, $30,000; Bureau of Medicine and Surgery, $10,000; Bureau of Yards and Docks, $75,000; and Office of Naval Militia, $5,000: *Provided*, That a report shall be submitted to Congress at the beginning of its next regular session showing in detail the number of persons so employed, their duties, and the compensation paid to each: *And provided further*, That the sum of $25,000 is hereby appropriated for the purchase of such stationery, drawing materials, and furniture as may be required by the various bureaus and offices of the Navy Department to carry out the duties imposed upon them.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. The next amendment passed over is the amendment on page 184, offered by the junior Senator from Nevada [Mr. PITTMAN], to insert after line 12 the following:

That each and every employee of the navy yards, gun factories, naval stations, and arsenals of the United States Government is hereby granted 30 days' leave of absence each year, without forfeiture of pay during such leave: *Provided*, That it shall be lawful to allow pro rata leave only to those serving 12 consecutive months or more: *And provided further*, That in all cases the heads of divisions shall have discretion as to the time when the leave can best be allowed.

Mr. BRANDEGEE. Mr. President, at whose suggestion did that amendment go over the other day?

The PRESIDING OFFICER. The amendment was offered by the junior Senator from Nevada [Mr. PITTMAN], and it went over on the suggestion of the Senator from Pennsylvania [Mr. OLIVER].

Mr. SWANSON. That amendment was offered by a member of the Naval Affairs Committee, and the committee had consented that it should be offered as a committee amendment.

Mr. LODGE. It is the last committee amendment.

Mr. BRANDEGEE. I understand that.

Mr. LODGE. If we put it over, we hold back individual amendments.

Mr. BRANDEGEE. I understand that; but I understood the Chair to state, in answer to my inquiry, that the Senator from Pennsylvania had asked that it go over the other day when it came up.

Mr. LODGE. Yes; I know he did. I think it ought to go over until he is present.

Mr. BRANDEGEE. That is all I was going to suggest. I can get him here in two or three minutes.

Mr. LODGE. I ask that it be passed over for the moment.

The PRESIDING OFFICER. The amendment will be passed over for the present.

Mr. SUTHERLAND. Mr. Pesident, pending that, I should like to offer an amendment which I do not think will be opposed by the committee. On page 109 of the bill, at the end of line 23, I move to insert the matter which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 109, line 23, after the word "department" and before the comma, it is proposed to insert:

Nor shall he suffer demotion or loss of position during or at the termination of any naval or military service when ordered upon special or active duty of any kind.

Mr. SWANSON. I will accept that amendment. I think it ought to be included.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LANE. Mr. President, is it in order to offer individual amendments at this time?

The PRESIDING OFFICER. Yes.

Mr. LANE. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 44, after line 10, following an amendment heretofore agreed to, it is proposed to insert:

Provided further, That the Secretary of the Navy is authorized to secure a suitable site on the Columbia River, Oreg., as near to the entrance as may be deemed advisable, for the construction of a submarine and torpedo-boat base; and for this purpose the sum of $500,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated.

Mr. SWANSON. Mr. President, I will consent to have that go into conference for consideration.

The PRESIDING OFFICER. Without objection, the vote whereby the committee amendment was agreed to will be reconsidered. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. STERLING. Mr. President, during the discussion of the bill last evening the Senator from Virginia called attention to the provision in regard to a court of arbitration, found on page 181 of the bill, lines 17 and 18. I send to the desk an amendment which I desire to offer at that point.

The PRESIDING OFFICER. The Senator from South Dakota proposes an amendment, which the Secretary will state.

The SECRETARY. On page 181 it is proposed to strike out all after the word "of," in line 17, down to and including the word "body," in line 18, being the following words: "suggesting an organization, court of arbitration, or other body," and to insert "formulating a plan for a court of arbitration or other tribunal," so that, if amended, it will read:

To a conference which shall be charged with the duty of formulating a plan for a court of arbitration or other tribunal to which disputed questions between nations shall be referred.

Mr. SWANSON. I have no objection to that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Chair is informed that this concludes the committee amendments.

Mr. SWANSON. I understand the Senator from Iowa [Mr. CUMMINS] has an amendment which he desires to offer.

Mr. STERLING. Mr. President, I want to call attention to the second paragraph, on page 183 of this bill. It is the paragraph which prohibits the purchase of any ship material "from any persons, firms, or corporations who have combined or conspired to monopolize the interstate or foreign commerce or trade of the United States," and so forth.

It seems to me that this language will bear the construction that if ever at any time in the past any individual, firm, or corporation had entered into a combination to monopolize interstate or foreign commerce that individual, firm, or corporation could not now sell its product to the United States Government, although it might offer to sell it at a greatly reduced price, or even at half price, and therefore save to the Government a vast sum of money.

Mr. SWANSON. Mr. President, if the Senator will permit me, that language has been in the bill for years and years.

Mr. STERLING. I will say to the Senator from Virginia that I have been so informed. The Senator from Massachusetts [Mr. LODGE] so informed me yesterday. But I can see no reason for that language. I would be the last one to suggest the striking out of the language for the benefit of any of these special interests. My motion to strike it out will be in what I deem to be the interest of the Government.

Why, suppose 10 years ago a great corporation engaged in the manufacture of this material had been guilty of a combination or a conspiracy to monopolize, and yet during the last 10 years it had been perfectly free from anything of that kind, and nothing of the sort could be charged against it. Still the Government would be precluded from making a purchase of structural steel, armor plate, or other material used in the construction of ships from that company, although it could be done, as I say, at a greatly reduced price, much less than would have to be paid if bought elsewhere.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Connecticut?

Mr. STERLING. I yield to the Senator.

Mr. BRANDEGEE. I assume the Senator is going to make a suggestion as to how it could be changed.

Mr. STERLING. I am going to make a motion. My motion is to amend by striking out, beginning with line 16, on page 183, down to the word "no" in line 23, allowing the word "no," then, to be the beginning of a new sentence.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from South Dakota.

Mr. SWANSON. Mr. President, I hope that amendment will not be agreed to. This language has been in the bill for years and years, and no trouble has arisen. It is useless for us to attempt to put too many limitations on the department. This language, as I say, has been in the bill for years and years, and

no trouble has arisen on account of it, and it has been put in the bill in the interest of the Government.

Mr. STERLING. Will not the Senator from Virginia agree with me that the language will bear the construction I suggested a moment ago? If so, the Government could not purchase of any such corporation.

Mr. SWANSON (reading)—

But this limitation shall in no case apply to any existing contract.

Mr. STERLING. Not to any existing contract, I admit; but the Government will be forbidden to make any new contract with any such corporation.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Connecticut?

Mr. STERLING. I yield to the Senator.

Mr. BRANDEGEE. I entirely agree with the Senator from South Dakota that under a literal construction of that language it would prohibit the purchase of any material from any concern which had ever been in a combination for the restraint of trade. I think if it is the intention to forbid purchases from concerns which are now in combination or conspiracy, it could be easily changed; and I think it would be quite as effective, unless it is intended to taboo everybody that ever was in any such combination years ago, if in line 19 the language, instead of being "or corporations who have combined or conspired to monopolize," should be changed to read "or corporations which are in combinations or conspiracies to monopolize."

Mr. SWANSON. I will accept that.

Mr. BRANDEGEE. That would make it apply to the present time.

Mr. STERLING. In the event this motion to strike out should not prevail, I had intended to offer the following as a substitute. It is very much like that suggested by the Senator from Connecticut. After the word "who," in line 19, strike out "have combined or conspired" and substitute the following: "who are parties to any existing combination or conspiracy to monopolize."

Mr. SWANSON. I regard that language as better, and I accept that.

The PRESIDING OFFICER. The question is on the amendment of the Senator from South Dakota.

The amendment was agreed to.

Mr. PITTMAN. Mr. President, I desire to call up an amendment which I offered on Saturday and which went over.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 184, after line 12, it is proposed to insert:

That each and every employee of the navy yards, gun factories, naval stations, and arsenals of the United States Government is hereby granted 30 days' leave of absence each year, without forfeiture of pay during such leave: *Provided*, That it shall be lawful to allow pro rata leave only to those serving 12 consecutive months or more: *And provided further*, That in all cases the heads of divisions shall have discretion as to the time when the leave can best be allowed.

Mr. PITTMAN. Mr. President, I desire to place that amendment at the end of line 21, page 174, instead of at the heretofore-named point. I think the chairman of the committee will see that it is more appropriate at that point. If there is no objection, I will ask that the position of the amendment be changed as I have indicated.

The object of this amendment, Mr. President, is to grant to one of the departments working under the Government the same conditions of labor that have heretofore been granted to nearly all of the rest of them. There may be reasonable ground for argument as to the length of time that shall be allotted for vacations to employees, but there should be no ground for argument that all men engaged in a similar character of strenuous and continuous physical labor should be treated alike. If 30 days' vacation is deemed necessary to the health and to the efficiency of men of a class, then it should extend to all of them. If 15 days is considered sufficient, then it should extend to all in the same character of service.

In other words, there is an apparent discrimination here against some of the laborers under our Government; and I do not believe any of us here desire to permit an actual discrimination against any class of Government employees. If some of them are getting too much, that is a subject of argument; but I take it that at the present moment this body has not the time to go into a general debate as to the exact number of days of vacation in a year that are essential to the health and efficiency of laboring men, and that the only question we will determine now is the question of a discrimination.

I will also state that I believe every Senator here is satisfied that men who do hard, continuous physical labor must have a certain amount of rest during the year; that that rest is essential, not only to their health but to their efficiency. I know that it has been my experience, not only in the employment of labor but in actual physical labor, which I engaged in for two years continuously, that if an employee can not look forward to some time when he will have a vacation or rest he is seeking that rest all the time. He gets into a state of discouragement. He gets into a hopeless condition, and he believes that all he can do is to loaf on the job. That leads to inefficiency, and it is inhuman.

I take it that there are none of us but agree that there should be a certain period allotted wherein these men will have an opportunity to recuperate. Now, let us take the position of our Government. These men are essential to the Government work. We can not afford to lose them, and yet every year there is a time when all of these men are not needed, and they must be laid off. This amendment provides that they may be laid off at such times as the Government decides. It is really not interfering at all with the work. Now, then, you come down to the question of additional cost.

I know it is contended that if you give these men more vacation on pay than the private institutions of a similar character do, the Government can not compete. The Government is not competing, mind you, in the cost of manufacturing material, but in the cost of obtaining it. When the profit to the private manufacturer is added it amounts to more than this may enhance the cost of manufacture by the Government. It has always been customary for us to compare the cost to the Government with the cost to the private manufacturer, when, as far as the Government is concerned, the profit of the private manufacturer is added to the cost to the private manufacturer when the Government purchases from such private manufacturer. There is no question that this will not drive the Government out of business.

There is another phase of this question, and that is this: We are endeavoring to get the very best men we can for our Government work. The private factories of the same kind are making the same effort. In the testimony before the Naval Affairs Committee upon the armor-plate bill, Mr. Grace and other gentlemen constantly testified that in their opinion the Government would find great difficulty in finding men to run the armor-plate factory, because they themselves were reaching out everywhere and getting the very best men that could be obtained and paying them the very highest wages. Not only that, but these private institutions are constantly going into the cooperative system with their employees. They are allowing the men to participate in the profits in addition to their salaries. That is another inducement.

If we want the very best men for the Government, we have to hold out inducements to them. There can be no question about that. We come down to just this simple proposition—that men are more efficient when they are given sufficient time in which to recuperate. Men are more ambitious in their work when the Government gives them a reasonable time to recuperate.

But you say: "Why allow these men to recuperate on pay?" Because they can not recuperate in any other way. That is the only answer. Why, if a man under wages is dragged down by a family under existing conditions, it is impossible for him to quit his position for 30 days and not receive any pay during that time. If we want those men to recuperate, and we do want them to recuperate, we have to pay them during that period of vacation. You come right back to the same proposition.

Look at the men under the Government who are given 30 days' leave of absence with pay. In the executive departments there are 22,965 men getting 30 days' leave with pay. In the Bureau of Engraving and Printing there are 4,000 men getting 30 days' leave of absence with pay; in the Government Printing Office there are 3,625 men who are getting 30 days' leave of absence with full pay; in the Immigration Service there are 1,658 men getting leave of absence of 30 days with full pay; in the Customs Service 6,443 men are getting leave of absence with full pay; in the Isthmian Canal Service there are 6,000 men who are getting 30 days' leave of absence with pay.

Then when you come to these men working in the navy yards, gun factories, naval stations, and arsenals, where we find the very hardest character of physical work, work that requires continuous attention, work which requires a high type of mechanic, we give them only 15 days. I ask you in all fairness is that discrimination right? Should they not have exactly the same number of days of leave of absence as those who are now getting 30 days?

If the whole system is wrong, then open it up for consideration, but if there is any question about it, do not discriminate. Let us take up the other question as to what is the reasonable

time at some other date and consider them, and at this time place these men on an equal basis with all the other employees of the Government.

Mr. OLIVER. Mr. President, no private employer of labor in the country could maintain himself if he gave to every man in his employ 30 days' leave of absence with full pay unless the same policy were adopted by all. The fact that at different times certain classes of employees have succeeded in obtaining this privilege is no argument in its favor. I do not believe in extending it. I think two weeks leave of absence each year with full pay is right; I will vote for it for any class of employees, but beyond that I do not think that either the Government or private employers should be compelled to go.

I understand that this amendment is the same as a bill which has been passed by the House and is now before a committee of the Senate. When it comes before the Senate for action let it be passed in the usual way. I do not think that it ought to be embodied in a general appropriation bill for which we will all be expected to vote when the time comes for final action upon it.

I therefore, Mr. President, feel constrained to make a point of order against the amendment, that it is general legislation on an appropriation bill.

Mr. PITTMAN. Mr. President, before the Chair rules on the point of order I want to discuss the point of order briefly.

Mr. OLIVER. I presume that under the rule the point of order is not debatable unless the President himself requests it. Am I correct?

The PRESIDING OFFICER. The temporary occupant of the Chair would like to hear the Senator and the chairman of the committee for a moment.

Mr. OLIVER. Then I withdraw it.

Mr. PITTMAN. I take it the point of order is based on the ground that it is general legislation. It was held by the President of the Senate a few days ago that if the House incorporated general legislation in an appropriation bill and it came to the Senate, then the Senate, as far as that general legislation was concerned, might amend it and amplify it as they saw fit. In other words, general legislation having come from the other House, a body over which we have no control, it would not necessarily have to stand or be stricken out but it might be amended to conform to the wishes of this body. I think that was established the other day.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Utah?

Mr. PITTMAN. I do.

Mr. SMOOT. I think the Senator broadens the decision of the Chair. As I remember the decision of the Chair, it was that if the House had put into this appropriation bill legislation affecting existing legislation an amendment on that particular subject offered in the Senate would be in order, but I do not think the Chair ruled that if the House placed general legislation in an appropriation bill then general legislation could be put upon it in the Senate.

Mr. PITTMAN. The matter under discussion at that time was the Dental Corps, which the House had not legislated on at all.

Mr. SMOOT. Yes; the House had legislated on that branch of the Navy, and because they had legislated on the Marine Corps, of which the Dental Corps is a part, the Chair held that the House legislating upon that particular subject the Senate had a right to add to or take from it.

Mr. PITTMAN. Yes; the House legislated on medical officers. The Senate construed dental officers to be medical officers, and therefore that the enlargement of the subject by the Senate was permissible, the House having initiated it.

Now, then, the principle was enunciated by the Senator from California [Mr. WORKS] most clearly. He stated that when an appropriation bill came from the House we could not be bound by the terms of that bill because it contained general legislation; that we had no control over the rules of the House, and no power to prevent the introducing into appropriation bills subjects of general legislation, although such procedure would not be permitted in the Senate; and that the subject having been opened up by the House, this body was then at liberty, by proper amendment, not only to strike it out or adopt it, but to change it in any particular that would meet its approval. I take it that that is the reason on which this whole question is based. It is a question of reasoning. It is up to the President of the Senate to determine whether or not this amendment is simply following along the lines of legislation that is already in the bill as it came from the House.

Mr. OLIVER. I should like to ask the Senator if he will read the provision in the House bill that connects up this amendment?

Mr. PITTMAN. I will see if I can find it for the Senator. But we are getting the principle down first, and that is as to whether or not this amendment is simply an enlargement or a modification of legislation that comes from the House. If it is, then it is not subject to a point of order. It is within the discretion, first, of the Chair to determine whether or not this amendment is enlarging or modifying the legislation that comes from the House, and, second, it is within the discretion of this body.

Now, let us see what we find on page 174, where this amendment comes in. Commencing at line 6, this power granted to the Secretary of the Navy over the hours of labor of certain employees is in the following language:

> To provide for the speedy construction of the vessels herein authorized and for the additional cost incident thereto, including the employment of more than one shift of labor per day, overtime work, and the speedy delivery of material, the Secretary of the Navy, in his discretion, is hereby authorized to increase the total cost of each of said vessels, including armor and armament, not to exceed 20 per cent thereof if any of said vessels be constructed in Government navy yards; and if any of said vessels or the armor or armament for same be constructed by private contract, the Secretary of the Navy, in his discretion, is hereby authorized to prescribe in the contracts for same provisions for the payment of premiums over and above the contract price, not to exceed 20 per cent thereof, for the most expeditious delivery of same, and further provisions for penalties for delays and failure to complete within the contract time.

What does that legislation mean? The Secretary is given control over those employees. He is authorized to employ them overtime. He is authorized to employ more than one shift. In other words, he is authorized to do what he considers best for the expedition of this work. We may agree with the House that the Secretary be allowed to work these men overtime, but at the same time we can say to him, "You shall give them at least 30 days' leave of absence once in a year." Why not? We are authorizing him to work them overtime, and we authorize him in the same provision to give them a vacation. It is dealing with the number of hours of work rendered; it is dealing with overtime; it is dealing with extra shifts of work; it is dealing with the handling of these same employees—and I contend, when it is authorized by the House to work them overtime and to work extra shifts, we have a right in the same connection to say that you must also give them 30 days' vacation. The very reason of it must follow. We have no right to say that he may work these men overtime in extra shifts and in the same voice hold that we can not say to him, "You shall give these men a reasonable vacation."

I contend that the amendment is simply an enlargement in one sense and in another a restriction upon the authority given in that paragraph by the House; in other words, that he can work these men overtime in an extra shift, but that they must have 30 days' vacation in a year with pay, just the same as the employees in other departments.

Mr. SMOOT. Mr. President, I am interested in maintaining the rules of the Senate. If the position taken by the Senator from Nevada be a correct one, we might just as well repeal Rule XVI. The bill would be complete without the amendment of the Senator from Nevada. If the amendment is not adopted it will not affect any program of reorganization as outlined in the bill.

In the case of the amendment against which the point of order was raised the other day, if the point of order had been sustained against the amendment and it had gone out of the bill, then the reorganization would not have been complete. But if this amendment is not adopted it will not in any way interfere with the program of reorganization as outlined in the bill.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from North Dakota?

Mr. SMOOT. In just a moment I will be through. The law provides for leave of absence in every department of the Government. If that leave of absence is changed from the present law it is certainly new legislation, and if this amendment is adopted it is placing new legislation upon an appropriation bill without a question of doubt in my mind.

I am not speaking as to the wisdom of the amendment, but I am speaking only as to the rules of the Senate. It is a violation of Rule XVI.

Mr. GRONNA. I wish to ask the Senator from Utah a question. Might not the amendment offered by the Senator from Nevada affect the very men on whom the ruling was made the other day, namely, this Dental Corps—that the men employed in the Dental Corps should be given 30 days' leave of absence?

Mr. SMOOT. No, Mr. President; not in any way. It could have no effect whatever upon the number who would be employed in the Dental Corps; it could have no effect upon their salary; it could have no effect upon the proposed organization within the corps or affect the complete organization as out-

lined in the bill. The only way the corps could be affected would be to offer the amendment to the Dental Corps section to grant them an additional leave of absence.

Mr. GRONNA. May I ask the Senator from Utah another question? To whom would this 30 days' leave of absence be allowed under the amendment offered by the Senator from Nevada?

Mr. SMOOT. To the employees in arsenals, navy yards, and so forth.

Mr. GRONNA. For that reason it would directly affect the amendment we had under consideration the other day.

Mr. SMOOT. No; the amendment which was adopted the other day affected the Dental Corps only and was complete in itself. This amendment would have the effect of changing existing law by increasing the number of days of leave of absence granted to the employees in the arsenals and navy yards. That is all there is to it.

Mr. GRONNA. According to the ruling of the Chair on that particular day, I believe the Senator from Nevada is right. I believe we have as much right to accept the amendment offered by him as we had to accept the amendment that was under discussion the other day. I wish to read the ruling of the Chair on that occasion:

The VICE PRESIDENT. Notwithstanding the rule of the Senate to the effect that general legislation may not be attached to an appropriation bill, still when the House of Representatives opens the door and proceeds to enter upon a field of general legislation which has to do with a subject of this character the Chair is going to rule, but of course, the Senate can reverse the ruling of the Chair, that the House having opened the door the Senate of the United States can walk in through the door and pursue the field.

Mr. SMOOT. That is correct.

Mr. GRONNA. This amendment, then, is simply pursuing that particular field.

Mr. SMOOT. The field that is to be pursued under this amendment is to increase the leave of absence for certain employees of the Government, and the House did not legislate upon that subject directly or indirectly.

Mr. GRONNA. It affects every employee in the Navy Department.

Mr. SMOOT. The House has not inserted in the bill one word about increased leave of absence, and that is the subject before the Senate at this time. What the Chair has to rule upon is whether the amendment offered by the Senator from Nevada is general legislation, and if it is changing existing law it is general legislation upon an appropriation bill.

Mr. OLIVER. I should like to hear the amendment read.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. On page 174, after the amendment heretofore agreed to, after line 21, insert the following:

That each and every employee of the navy yards, gun factories, naval stations, and arsenals of the United States Government is hereby granted 30 days leave of absence each year, without forfeiture of pay during such leave: *Provided*, That it shall be lawful to allow pro rata leave only to those serving 12 consecutive months or more: *And provided further*, That in all cases the heads of divisions shall have discretion as to the time when the leave can best be allowed.

Mr. PITTMAN. Mr. President, the other day the question before the Senate when this ruling was made by the Vice President which has just been read was on an amendment first introduced in this body in behalf of the members of the Dental Corps. It changed the law with regard to the Dental Corps. It absolutely changed the law affecting dentists. There was a provision in the bill for doctors as it came from the House, there was a provision in the bill for a Hospital Corps as it came from the House, but not for dentists, and the Senator therefore introduced this amendment.

I will read only a line or two, but it will give the Chair the object of the amendment.

NAVAL DENTAL CORPS.

That the President of the United States is hereby authorized to appoint and commission, by and with the advice and consent of the Senate, dental surgeons in the Navy at the rate of one for each 1,000 of the authorized enlisted strength of the Navy and Marine Corps, who shall constitute the Naval Dental Corps, and shall be a part of the Medical Department of the Navy. Original appointments to the Naval Dental Corps shall be probationary for a period of two years and may be revoked at any time during the probationary period by the President: *Provided*, That the rank of such officers of the same date of appointment among themselves at the end of said probationary period shall be determined by the recommendations of an examining board appointed by the Secretary of the Navy.

Now, it goes on for two pages enacting entirely a new law with regard to these dentists that was never taken up in the House at all.

Now, then, the very skillful Senator from Utah, this wonderful parliamentarian, was the other day maintaining a stand, I believe, if my memory serves me right, just the opposite from what he is now taking. He was contending, as I recollect it, that because the House had permitted general legislation with regard to medical officers, it opened the door for a consideration of the whole subject by this body.

Mr. SMOOT. The Senator is mistaken in that. I could not have made that statement. I did not speak upon the question.

Mr. PITTMAN. General legislation, we are to understand, with regard to dentists, when the House mentions nothing in regard to dentists at all, is permissible. General legislation with regard to labor is not permissible. When you are discussing a new law for the benefit of dentists, then they believe in having the door opened to the whole subject because the House has legislated on doctors. When there is a bill passed by the House which grants to the Secretary of the Navy the authority to work employees in this Government overtime, to work them extra shifts, to get all of the work he can out of them for the purpose of expediting work in these factories, and to pay them more for it if necessary, they say it is not germane; that having given absolute control over these men for the purpose of working them overtime, it is not germane to say in the same voice, "Yes; but you shall also give them rest some time." It is far more germane than was the amendment the other day upon which the ruling was made.

But I do not care what the Senator from Utah gave as his construction of this ruling. The Vice President has given his construction of it, and it has been read by the Senator from North Dakota [Mr. GRONNA].

The construction is plain that when the House opens the door of general legislation this body is not restricted in going on with it to its legitimate end and to its satisfaction. That is the only thing; that is what the Vice President said, and there was no appeal taken, and it became the ruling of this body. The House opened the door for new legislation with regard to doctors and the Hospital Corps. That body having opened the door with regard to doctors and the medical men, we are going on and extending it to all other character of men who may be engaged in any branch that might be called medical, and, therefore, we take in dentists. That is what the Vice President said—the House opened the door—and I say the House has opened the door to this form of general legislation by attempting to legislate upon the hours of labor of these men, by attempting to legislate upon overtime work, by attempting to legislate upon extra shifts. The whole subject is dealing with the work of these employees. That is all it amounts to. The House has seen fit to deal with the labor of these employees, and having seen fit to deal with their labor and with their wages, it is now perfectly germane and right that this body should go further and should say, yes, if you are going to work these men overtime and in extra shifts, then you shall give them the vacation that other men get.

Mr. GALLINGER. Can the Senator tell me whether the existing law provides for the employment of more than one shift and overtime work? Has the Senator examined that?

Mr. PITTMAN. No; I am not interested whether it does or not.

Mr. GALLINGER. Well, I am.

Mr. PITTMAN. The Senator probably knows——

Mr. GALLINGER. I ask the Senator if he can answer my question.

Mr. PITTMAN. The Senator probably knows what he is interested in; I think the eight-hour law prohibits it.

Mr. GALLINGER. Mr. President, I have only a word to say. There have been some most extraordinary departures from the old-time rulings of this body. I am not going to criticize them, believing that in due time they will be corrected, but I want to say that this amendment is most extraordinary, and is clearly general legislation. The text of the bill as it came from the House provides as follows:

To provide for the speedy construction of the vessels herein authorized and for the additional cost incident thereto, including the employment of more than one shift of labor per day, overtime work, and the speedy delivery of material, the Secretary of the Navy in his discretion is hereby authorized to increase the total cost of each of said vessels.

I assume that the proposed increase in the total cost of vessels is to provide for payment for overtime work and has nothing whatever to do with the question of granting leaves of absence. The two subjects are absolutely dissociated and as far apart as it is possible for language to make it.

Whatever the ruling of the Vice President may have been on another occasion—which I did not hear, not having been in the Chamber—I confess that, to my mind, it would be an extremely dangerous precedent for this body to establish if it should hold that because a bill coming from the House of Representatives has a provision in reference to the construction of vessels covering the employment of labor therefore we could extend it to grant privileges that the other House had not taken into

consideration at all. To my mind the question is so clear that I feel quite sure as to what the ruling of the Chair ought to be. In thus insisting that the rules of the Senate shall be carefully guarded I do not commit myself on the general proposition as to whether the leaves of absence of these men should be extended, provided the change shall be made on a bill reported from a committee after due consideration.

Mr. PITTMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Nevada?

Mr. GALLINGER. Yes.

Mr. PITTMAN. Did the amendment adopted on page 49 of the bill the other day in reference to the Naval Dental Corps change the existing law?

Mr. GALLINGER. As I have remarked, I was not present when that matter was discussed.

Mr. PITTMAN. I mean—and the Senator is familiar with the amendment, and knows as to the Dental Corps——

Mr. GALLINGER. Yes; I am very familiar with that.

Mr. PITTMAN. That question being decided in that way, did it change the law existing prior to that time?

Mr. GALLINGER. I presume it did, but I was not present when the point of order was discussed, but even if it did change existing law, I do not see what relationship it has to this question.

Mr. OLIVER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Pennsylvania suggests the absence of a quorum.

Mr. PITTMAN. Mr. President, I object. I had the floor, and the Senator from Pennsylvania did not ask the Chair for the floor. I did not yield.

The PRESIDING OFFICER. The Senator from New Hampshire [Mr. GALLINGER] has the floor.

Mr. OLIVER. I was under the impression that the Senator from Nevada [Mr. PITTMAN] had yielded the floor.

Mr. PITTMAN. I had yielded the floor to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire has the floor.

Mr. OLIVER. If the Senator from New Hampshire has the floor, then, with his permission, I suggest the absence of a quorum.

Mr. GALLINGER. I yield to the Senator for that purpose.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Husting	Owen	Smoot
Broussard	James	Page	Sterling
Bryan	Johnson, Me.	Penrose	Stone
Catron	Johnson, S. Dak.	Phelan	Sutherland
Chamberlain	Jones	Pittman	Swanson
Clapp	Kern	Poindexter	Taggart
Clark, Wyo.	La Follette	Ransdell	Thomas
Culberson	Lane	Reed	Thompson
Cummins	Lee, Md.	Shafroth	Tillman
Curtis	Lodge	Sheppard	Townsend
Gallinger	McCumber	Sherman	Underwood
Gronna	Martine, N. J.	Simmons	Vardaman
Harding	Nelson	Smith, Ariz.	Wadsworth
Hitchcock	Norris	Smith, Ga.	Walsh
Hollis	Oliver	Smith, Md.	Williams
Hughes	Overman	Smith, S. C.	

The PRESIDING OFFICER. Sixty-three Senators having responded to their names, a quorum of the Senate is present. The Senator from Nevada.

Mr. PITTMAN. Mr. President, for the benefit of Senators who have just come into the Chamber, I desire to restate the proposition. I have offered an amendment, on page 174, in line 21, proposing to grant the employees of the navy yards and gun shops 30 days' leave of absence, the same as is granted in the other departments of the Government, the names of which I have read.

The Senator from Pennsylvania [Mr. OLIVER] makes the point of order that my amendment is general legislation on an appropriation bill. The Senator from Nevada contends that, under the ruling of the Chair made a few days ago on the Naval Dental Corps matter, the question has been decided adverse to the point of order. On page 49 of the bill will be found an amendment reported to the Senate entitled "Naval Dental Corps." There was no legislation in the bill as received from the House of Representatives with regard to the Dental Corps. The amendment with regard to the Naval Dental Corps changed the existing law; it established a new law with regard to the Dental Corps and a point of order was made against it, which was argued most strenuously in this body on the ground that it was new legislation and on the ground that it changed existing law. Both of those objections were true. It did change existing law; it was new legislation; but those who stood for the amendment said, "Yes; but the other House has legislated with regard to the Medical Corps and with regard to the Hospital Corps, and this is a part of the whole general subject." Then the Vice President, in ruling, said that the House having opened the door by general legislation, this body might continue it on to perfection. For the benefit of those present I now ask the Secretary to read the ruling of the Chair upon the Naval Dental Corps provision.

The PRESIDING OFFICER. The Secretary will read as requested.

The SECRETARY. Reading from the CONGRESSIONAL RECORD of Saturday, July 15, 1916, page 11087:

> The VICE PRESIDENT. Notwithstanding the rule of the Senate to the effect that general legislation may not be attached to an appropriation bill, still when the House of Representatives opens the door and proceeds to enter upon a field of general legislation which has to do with a subject of this character, the Chair is going to rule, but of course the Senate can reverse the ruling of the Chair, that the House having opened the door the Senate of the United States can walk in through the door and pursue the field.

Mr. PITTMAN. Now, following that ruling, the door was opened; and because, forsooth, the House had legislated with regard to doctors, this body legislated with regard to dentists. That is the whole thing.

I have offered an amendment on page 147 with regard to the hours of labor of laborers in the navy yards and other Government works, with regard to the number of days that they shall work in a year. The question now is, Is that germane—whether the subject of labor and the hours of labor of these men have been opened up in the other House, and whether the door is, therefore, open in this body? That is the only question. Now, let me read what the House has provided. They authorize the Secretary of the Navy to do this:

> To provide for the speedy construction of the vessels herein authorized—

And what else?—

> and for the additional cost incident thereto, including—

Now, mark this—

> the employment of more than one shift of labor per day, overtime work, and the speedy delivery of material.

The "overtime work" of these men is certainly dealing with labor in those institutions; and I say that my amendment deals with the number of days that these men can be compelled to work in a year. If this bill deals with overtime and with extra shifts, is it not dealing with the hours of labor in those institutions? Is it not dealing with the condition of labor in those institutions? Therefore is not an amendment which says you can not work these men over 11 months out of 12 in keeping with it? Does not this amendment limit the number of hours that these men may be worked in these shops in 12 months? Does not the provision of the other House grant permission to work them overtime? The House grants permission to work them overtime, and we say: "Yes, you may work them overtime, but there is a limit beyond which you shall not work them; there are 30 days in the year during which you shall not work them."

Mr. SMITH of Georgia. Mr. President, will the Senator allow me to ask him a question?

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Georgia?

Mr. PITTMAN. With pleasure.

Mr. SMITH of Georgia. Can the Senator tell us whether this is a grant of power to work overtime? Did these men not previously work overtime? Did they not work in shifts before? Is not this really simply a provision with regard to what the vessels were to cost? A certain sum being fixed as to the cost of the vessels, the additional provision is made that the cost may be 20 per cent more if they resort to what they already had a right to do—work overtime—or resort to what they already had the right to do—work two shifts; that is, if extra work had to be done to finish the construction of the vessels, then the cost might be increased. It is a question of fact as to existing legislation, as to which I thought possibly the Senator from Nevada could inform us.

Mr. PITTMAN. Senators have all done me too much honor in thinking that I was familiar with all these subjects.

Mr. SMITH of Georgia. My impression is that the men could work overtime before; that they could work two shifts before; and that this is simply a provision allowing an increase of the charge, and not adding anything at all to the way in which the men are to be worked.

Mr. PITTMAN. I imagine that the Senator might advise me with regard to those subjects, if he has any information about them, rather than to have my advice upon the subject.

Mr. SMITH of Georgia. I thought the Senator might know, and I am not certain in regard to the matter.

Mr. PITTMAN. I have taken it for granted, however, that the other body, the House of Representatives, having the able Committee on Naval Affairs which it has, would not have placed in the bill a useless provision. I take it that when they authorized the Secretary of the Navy to work these men overtime, and to work them in extra shifts, it must mean something.

Mr. SMITH of Georgia. If the Senator will permit me, I desire to ask if that is what the bill does? Is it not an authorization to pay more money if the Secretary has to resort to overtime and has to resort to two shifts, rather than an authority to have two shifts and to work overtime?

Mr. PITTMAN. That is not the language.

Mr. CLAPP. Mr. President, will the Senator pardon an interruption?

Mr. PITTMAN. Just a moment. The language authorizes the Secretary of the Navy to employ more than one shift of labor per day, to require overtime work; and, having done that, it furnishes him with the money to pay for it.

Mr. SMITH of Georgia. That is not the language.

Mr. PITTMAN. I have read the language.

Mr. SMITH of Georgia. I will ask the Senator to repeat it.

Mr. PITTMAN. Very well. It reads:

To provide for the speedy construction of the vessels herein authorized—

The "speedy construction"! Now, how is the speedy construction to be obtained? By labor.

Mr. SMITH of Georgia. Read on.

Mr. PITTMAN. That is the object of this provision—to provide for speedy construction. Now, let us see how that speedy construction is going to be accomplished—

To provide for the speedy construction of the vessels herein authorized and for the additional cost incident thereto—

Incident to what? To speedy construction. Very well. Let me read a little further—

including—

What?—

including the employment of more than one shift of labor per day—

That is the way they are going to secure speedy construction—

overtime work, and the speedy delivery of material.

There are two ways in which that provision is going to speed up the work. One of them is through labor and the other is through the delivery of material. The House has proposed in its bill that the employees may be worked overtime to accomplish speedy construction, and it has also provided for extra shifts to accomplish that speedy construction.

The whole object of that section is what? The whole object of the section is to get up speed; that is all. The object of that section is to expedite work on these ships, as it says. It is a good purpose. It provides for an emergency; it provides that these men may be worked overtime; it provides that they may be worked extra shifts; that is all right. In the nature of things I am opposed to working men overtime; I am opposed to working them in extra shifts; but when an emergency exists, men should be worked overtime and in extra shifts the same as in the case of war. That is what this provision is for. The whole country is faced with an emergency, and we are going to meet that emergency by saying that in the building of these battleships these men may be worked overtime.

I tell you that such legislation, under ordinary circumstances, is contrary to the policy of this Government; it is absolutely in conflict with the eight-hour law; and yet it is reasonable under the circumstances. While we have said that men shall not be worked more than eight hours, the House has recognized that an emergency exists in the building of these battleships, and it has said that the eight-hour law shall not bind the Secretary of the Navy when it becomes necessary to expedite this work; that he may work these men more than eight hours; that he may work them overtime; that he may work them in extra shifts. That is what it says; that is exactly what the House meant, and it has done that.

The bill comes to the Senate in that form, and, under the ruling of the Vice President, the House has opened the door for legislation on that subject, and we are not compelled either to turn it entirely down or to adopt it as it exists.

While this body has no control over the legislation in the other body, when that legislation is placed before us we have a right to re-form it according to our own ideas; and I say that this subject is treated of in the House bill. The House proposed in effect to set aside the eight-hour law in certain emergencies, so that these men can work overtime and in extra shifts, and we come back with an amendment and say, "Very well, with one restriction—there shall be 30 days in the year when these men shall not be worked." That is all there is to this whole thing. I contend the amendment is absolutely germane, far more germane than was the amendment the other day in regard to the Dental Corps to the provisions of the bill which the House had incorporated with regard to doctors.

Mr. LA FOLLETTE rose.

Mr. OLIVER. Mr. President——

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. PITTMAN. I yield to the Senator from Wisconsin [Mr. LA FOLLETTE], who, I think, was on his feet first.

The PRESIDING OFFICER. The Senator from Nevada has the floor. The Chair begs pardon of the Senator from Pennsylvania. The Chair thought the Senator from Nevada had surrendered the floor.

Mr. PITTMAN. I regret that my course is misunderstood, Mr. President.

Mr. LA FOLLETTE. Mr. President, I merely want to ask the Senator——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Wisconsin?

Mr. PITTMAN. I do.

Mr. LA FOLLETTE. I merely want to ask the Senator from Nevada a question. If I understand, the argument of the Senator from Nevada is that the House has changed the status of these men who are employed by the Government and has changed existing law with respect to the hours of service they can be required to perform upon a Government contract?

Mr. PITTMAN. I so interpret it.

Mr. LA FOLLETTE. And the amendment of the Senator from Nevada simply puts a limitation upon this modification of existing law which has been made by the House?

Mr. PITTMAN. That is all I construe it to mean.

Mr. LA FOLLETTE. It seems to me that the amendment comes clearly within the ruling made by the Chair the other day. Here is an amendment of existing law. It affects the time of service of these wage earners employed by the Government, and in order that there shall not be unlimited control given to those in authority over them to require overtime work the Senator from Nevada has proposed to put a limitation upon it.

Mr. PITTMAN. Exactly.

Mr. LA FOLLETTE. It seems to me that it is clearly within the rule.

Mr. OLIVER. Mr. President——

Mr. SMITH of Georgia. Mr. President, this matter really turns upon but one question——

The PRESIDING OFFICER. The Chair thinks the Senator from Pennsylvania rose first.

Mr. OLIVER. Mr. President, I was recognized once before; I claim the floor, and think I am entitled to it.

The PRESIDING OFFICER. The Senator from Pennsylvania has the floor.

Mr. OLIVER. Mr. President, as I understand the ruling of the Vice President in connection with the amendment relating to the Naval Dental Corps, it was to the effect that while general legislation upon an appropriation bill is repugnant to the rules of the Senate and an amendment of that kind would be decided out of order, still, if the House once enters upon the domain of general legislation the Senate can then, in a matter that is germane, add to or take from that by way of amendment, even though what is proposed is in the nature of general legislation.

If this amendment offered by the Senator from Nevada, therefore, could be tied to anything that the House has sent over here, notwithstanding the fact that it is conceded to be general legislation, under that ruling it would be admissible; but, unfortunately, the Senator from Nevada is attempting to attach a piece of general legislation to a provision that is not general legislation at all. Let me read the part of the House bill to which he attaches his amendment and contends that it is germane. It immediately follows the part of the bill which provides for the increase in the Navy. This is the language of the House bill, and it has not been added to in any way by the Senate. I should like to call the attention of the Senator from Nevada to this, because I think even he will be impressed by it:

To provide for the speedy construction of the vessels herein authorized—

Only of the vessels herein authorized—

and for the additional cost incident thereto, including the employment of more than one shift of labor per day, overtime work, and the speedy delivery of material, the Secretary of the Navy in his discretion is hereby authorized to increase the total cost of each of said vessels, including armor and armament, not to exceed 20 per cent thereof if

any of said vessels be constructed in Government navy yards; and if any of said vessels or the armor or armament for same be constructed by private contract—

It then goes on and provides that the Secretary of the Navy is authorized to offer bonuses; but the whole paragraph applies only to the vessels authorized in this particular appropriation bill, and consequently it is not general legislation in any sense. This provision would be admissible as a Senate amendment to any appropriation bill, even if the House had not acted upon it at all. The Senator from Nevada therefore is attempting to put a piece of general legislation upon something which is simply a limitation or an enlargement, if you may call it so, of the powers of the Secretary of the Navy, relating only to a certain number of ships which are provided for in this particular bill. The authority given to the Secretary of the Navy, if any is given in this section, dies with the construction of these ships. The legislation provided for in the amendment of the Senator from Nevada will unless repealed last for all time.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from Connecticut?

Mr. OLIVER. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, in reading the paragraph just read by the Senator from Pennsylvania, it seems to me that the substantive provision of that paragraph, after specifying for what purposes the authority is to be conferred, simply authorizes the Secretary of the Navy to increase the total cost of the vessels.

Mr. OLIVER. That is all. It has nothing whatever to do with anything that is proposed in the amendment of the Senator from Nevada; but the point which I wish to emphasize is, that this paragraph on page 174 is a short-lived authority given to the Secretary of the Navy, while the amendment of the Senator from Nevada proposes a general provision of law to be placed upon the statute books, and to last until repealed. Therefore it does not come within the ruling of Vice President MARSHALL, given the other day.

Mr. President, I should dislike very much to see the door thrown wider open in these cases, and I trust that nothing of the kind will be done in this particular instance.

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from North Dakota?

Mr. OLIVER. I yield.

Mr. GRONNA. May I ask the Senator from Pennsylvania if this does not affect the personnel of the Navy?

Mr. OLIVER. Not at all. The words "personnel of the Navy," as I understand, refer to the officers and enlisted men of the Navy through all the different corps, staff, line, and so on. The workingmen in the navy yards, gun factories, and arsenals do not belong to the Navy; they may come to-day and go to-morrow. The provision does not affect the personnel of the Navy at all.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. The Senator from Georgia.

Mr. SMITH of Georgia. Turning to the former acts upon this subject, I find that they do not contain the language contained in this bill. I find that they do not contain provision for overtime work. I find also, turning to the Senate print of this bill as it came from the House, that these provisions are treated as new legislation by the House, and the question that was occupying my mind is thereby settled. I think this legislation was new legislation on the part of the House, and therefore that the amendment of the Senator from Nevada is in order.

Mr. SMOOT. Mr. President, if the amendment offered by the Senator from Nevada is not general legislation upon an appropriation bill then the House can change one salary, and that would open the door for any Senator to offer an amendment changing the salary of every Government employee and every statutory salary.

That can not possibly be, Mr. President, and that was not what was intended by Rule XVI. If a point of order does not lie against the amendment there might just as well be no Rule XVI, and hereafter legislation of every character can be put upon appropriation bills.

The PRESIDING OFFICER (Mr. ASHURST). The Chair is ready to rule.

The Chair has listened to the very able arguments, and is of opinion that in view of the precedent set by the Vice President and the Senate on the 15th of this month, and considering that the House of Representatives has provided as to how many shifts may be worked, also for a working during overtime, and having proposed to change the general law and stated that a "shift" may work "overtime," the Senate is at liberty to amend such provision.

The Chair therefore overrules the point of order.

Mr. OLIVER. Mr. President, rather than have a ruling of this sort made I would have been willing to withdraw my point of order. I had supposed that the Chair would at least leave it to the Senate to decide. But rather than have this ruling stand as a precedent I feel constrained to appeal from the decision of the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania enters an appeal from the decision of the Chair. The question is, Shall the ruling of the Chair stand as the judgment of the Senate?

Mr. CLAPP and Mr. LA FOLLETTE called for the yeas and nays, and they were ordered.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

The PRESIDING OFFICER (when Mr. ASHURST'S name was called). The present occupant of the chair asks to be excused from voting.

Mr. SMITH of Georgia (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. LODGE], but as I understand he has the same view of this question that I have I will vote. I vote "yea."

Mr. TILLMAN (when his name was called). Announcing the same transfer of my pair as before, I vote "yea."

Mr. WALSH (when his name was called). I inquire if the senior Senator from Rhode Island [Mr. LIPPITT] has voted?

The VICE PRESIDENT. He has not.

Mr. WALSH. I have a pair with that Senator. I transfer that pair to the junior Senator from Oklahoma [Mr. GORE] and will vote. I vote "nay."

The roll call was concluded.

Mr. REED. I transfer my pair with the senior Senator from Michigan [Mr. SMITH] to the junior Senator from Arkansas [Mr. ROBINSON] and will vote. I vote "yea."

Mr. JAMES. I desire to inquire if the junior Senator from Massachusetts [Mr. WEEKS] has voted?

The VICE PRESIDENT. He has not.

Mr. JAMES. I have a pair with that Senator. I transfer that pair to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. BECKHAM. I am paired with the senior Senator from Delaware [Mr. DU PONT], and therefore withhold my vote.

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN]. He is absent from the Chamber, and for that reason I withhold my vote.

Mr. CURTIS. I am paired with the junior Senator from Georgia [Mr. HARDWICK], and therefore withhold my vote.

Mr. MARTINE of New Jersey. I desire to announce that the senior Senator from West Virginia [Mr. CHILTON] is detained on public business. He is paired with the senior Senator from New Mexico [Mr. FALL].

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from West Virginia [Mr. GOFF] with the Senator from South Carolina [Mr. TILLMAN];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS]; and

The Senator from Maryland [Mr. SMITH] with the Senator from Missouri [Mr. REED].

The result was announced—yeas 45, nays 17, as follows:

YEAS—45.

Borah	Johnson, Me.	Pittman	Stone
Broussard	Kenyon	Poindexter	Swanson
Chamberlain	La Follette	Ransdell	Taggart
Clapp	Lane	Reed	Thompson
Culberson	Lee, Md.	Shafroth	Tillman
Cummins	Lewis	Sheppard	Underwood
Fletcher	McCumber	Sherman	Vardaman
Gronna	Martin, Va.	Simmons	Williams
Hollis	Martine, N. J.	Smith, Ariz.	Works
Hughes	Norris	Smith, Ga.	
Husting	Owen	Smith, Md.	
James	Phelan	Smith, S. C.	

NAYS—17.

Brandegee	Jones	Penrose	Walsh
Bryan	Nelson	Smoot	Warren
Catron	Oliver	Sterling	
Dillingham	Overman	Thomas	
Harding	Page	Wadsworth	

NOT VOTING—33.

Ashurst	du Pont	Lea, Tenn.	Saulsbury
Bankhead	Fall	Lippitt	Shields
Beckham	Gallinger	Lodge	Smith, Mich.
Brady	Goff	McLean	Sutherland
Chilton	Gore	Myers	Townsend
Clark, Wyo.	Hardwick	Newlands	Weeks
Clarke, Ark.	Hitchcock	O'Gorman	
Colt	Johnson, S. Dak.	Pomerene	
Curtis	Kern	Robinson	

So the ruling of the Chair was sustained.

Mr. PHELAN. Mr. President, I desire to make a parliamentary inquiry.

It has been stated here that this amendment came from the Naval Affairs Committee as a committee amendment. I understand that the subcommittee of the Naval Affairs Committee considered and rejected it, and that the amendment was polled out. When I was solicited for my name I refused to give it. I desire to know if this amendment has the status of a committee amendment, and, failing in that status, what is its position before the Senate?

The VICE PRESIDENT. The only status of a committee amendment in the Senate of the United States, under the order that was made, is that it has precedence over other amendments. It does not make the slightest difference whether the committee presented it or anybody else presented it; it has been held in order by the Senate.

Mr. PHELAN. What is the right of an individual member of a committee in protesting against the polling out of an amendment to which he was not a party?

The VICE PRESIDENT. He has a right to vote against the amendment.

Mr. PHELAN. That is his only right?

The VICE PRESIDENT. That is all the Chair knows of.

Mr. PHELAN. Mr. President, this is an extraordinary condition. I was in receipt the other day of a letter which is very brief, and which traverses the whole ground so far as an objection may be legitimately made to the adoption of this amendment. I ask that the Secretary may read it.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

JULY 3, 1916.

Hon. JAMES O'CONNELL,
President Machinists' Union, American Federation of Labor, Washington, D. C.

DEAR SIR: You will remember me as being secretary of the Vallejo Chamber of Commerce in 1901, when I started the national fight for building ships in the navy yards.

I desire at this time to call your attention to a matter of the most vital importance to organized labor and a matter which brooks no delay in action.

Some time between 1898 and 1900 Congressman Mudd, of Maryland, introduced into Congress and had passed a bill giving 15 days' leave of absence to all employees of the navy yards with full pay.

When I was making the fight as the secretary of the chamber of commerce through the Vallejo Labor Council and the American Federation of Labor for the building of ships in the navy yards one of the strongest arguments the shipbuilding trusts had against us was the overhead charge of 15 days' leave of absence with full pay and the holidays with full pay, making 22 days' absence with full pay.

They claimed we could not build ships as cheaply with that overhead as could be built by private contractors. You fully remember the fight we had and that two ships were ordered constructed as a test, one at the Brooklyn yard and one at the Newport News.

When Congressman Mudd introduced and had passed the bill giving leave of absence with full pay he did not do it for the good of the mechanics of the country; he did it in the interest of the shipbuilding combine, as I have expressed in all the cards and information I sent to Congress. He was a false friend to labor.

Since that time, through the fight we all made, ships have been and are being constructed in the navy yards, and done successfully.

At the present time we have bid at the Mare Island Navy Yard for the building of the dreadnaught *California* $1,100,000 less than the contractor could build the ship for, and we got the contract.

In every instance, on all work for the War Department in the repairs of the Government transports, we have had to bid against private yards to get the work. We have had to bid for the Navy Department against the private shipbuilders, and if our bid was the lowest, then we got the work; if not, then the private yards got it.

Now, I desire to call your attention to a matter of vital importance to us all and to the American Federation of Labor.

In the present Congress they have passed a bill in the House giving the private shipbuilders 20 per cent bonus for completing the ships on contract time.

In 1895 they were given speed premiums, and I had that knocked out through Congressman Holman, of Indiana, known as the "Watchdog of the Treasury."

Now, the shipbuilding combine are back again with a bonus proposition, and if they should get it on such a ship as the *California* it would amount to $1,600,000. What a swell profit to gouge the National Treasury out of.

Now, Congressman TALBOTT, of Maryland, has introduced into the House, and it has been passed, a bill giving the men employed at the navy yards 30 days' leave of absence with full pay. This, with the seven days' holidays with full pay, with the half holidays on Saturdays with full pay for three months in the year, gives them 43 days a year with full pay.

How are we to complete the *California* at Mare Island or the *Pennsylvania* at the Brooklyn yard with that overhead? Can we complete them within our bids. The increased pay we have to give on account of the activity in shipbuilding and the increased cost of material bar us from completing those ships within the contract price.

The greatest activity ever shown by Congress in the building of the Navy is shown in this Congress, and the shipbuilding combine are getting ready, and they are using the 30 days' leave with pay to put the navy yards in a position where they can not bid successfully against them.

They have planned the greatest raid ever made on the National Treasury, and doing it by making Congress believe that they are the friends of organized labor.

With the 43 days' leave with pay figuring against the navy-yard bidding and the 20 per cent bonus, they will have the sweetest pickings they have ever had.

I have been figuring as the present Congress has passed a blanket appropriation of six million to equip the Boston, Norfolk and Bremerton yards for capital-ship building, we had them beat to a finish, for I figured that they could not compete against us, and all the ships in the future would be built by the navy yards.

But TALBOTT's bill passed the House with a big majority, and I can see that we will not have the building of the ships in the future, for any intelligent man can see we can not build a ship as cheaply at the navy yards as by contract if we have a 43 days with full pay overhead against us.

In 1902 the matter was taken up by the Vallejo Council, and they passed resolutions asking for 30 days' leave with pay. I called your attention to the matter, also Mr. Samuel Gompers, and the matter was ditched.

You should get busy immediately in the Senate and beat this bill, for it is not framed, nor is it in the interest of the workmen of the country. It will bar us from building ships at the navy yard.

I sincerely hope you will give this matter immediate attention, for you know my record. I desire to see the navy yards build the ships, for more men will be working eight hours a day and they will get better pay and better conditions than if working for the contractors; but if the present bill passes, good-by to shipbuilding in the navy yards.

Yours, truly,

GEO. J. CAMPBELL,
Ex-Secretary Vallejo Chamber of Commerce.

Mr. PHELAN. Mr. President, I say that I received that letter. It was indorsed and addressed to me, and at the same time the writer said that he had sent copies of it to the chairman of the Committee on Naval Affairs of this body, to Samuel Gompers, the head of the American Federation of Labor, and to the Secretary of the Navy.

I think it raises a very important question.

My sympathies are wholly with the amelioration of the condition of the laborer. I believe that in granting 15 days' leave of absence with full pay no great violence was done to the ability of this Government to construct vessels in the navy yards in competition with private shipyards, although the private yards worked their men 10 hours and subsequently 9 hours a day; and, as I understand, now they are required on their work for the Government to work their men but 8 hours a day. But the private yards grant no leave on full pay to their men at all, and, as is shown by that correspondence, the men employed in the navy yards, if this provision is adopted, will have 43 days a year on full pay as vacation, in addition, of course to the Sundays. In this letter it is claimed by the writer—who seems to be a friend of labor on easy terms with all these gentlemen who represent organized labor—that that overhead expense will seriously interfere with if not prohibit the construction in the navy yards of the ships, for instance, on our naval program and, what is equally important, the ships which shall be provided by the new shipping bill; because I asked one of the officials the other day where our ships are to be built under the authority of the shipping act when it is passed, and he said: "If we can not have them built in the private yards, we will build them in the navy yards, which admit of indefinite expansion."

The employment by the Government with 15 days' leave on full pay, eight hours of labor firmly established—I believe the other yards seek to evade it; certainly I know they do in private contracts—the assurance of pay by a concern which is certainly solvent—the United States Government—and the interest of the public in their welfare, make it exceedingly desirable for these men to retain their positions and make it important for us, with our responsibility, to see that they do not lose the opportunity of employment. But if by creating this overwhelming overhead expense, in competition—which is the practice and usage of the Navy to have bids and estimates submitted before deciding where this work shall go—the navy yards lose the construction of these vessels, it is, of course, a matter of small consequence to the Government employees whether they have 15 days more or less, because that proposition involves their very employment itself.

Mr. PITTMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Nevada?

Mr. PHELAN. I yield.

Mr. PITTMAN. Does not the Senator know that by enactment we can have all of our ships built at the navy yards if there is capacity for them, irrespective of competition?

Mr. PHELAN. I will assume it is true, if the Senator states it.

Mr. PITTMAN. Does the Senator know that we have by enactment provided that half of the ships shall be built in the navy yards and half of them in private yards, or approximately that?

Mr. PHELAN. Is it provided in this law?

Mr. PITTMAN. It has been provided heretofore.

Mr. PHELAN. I am referring to this law.

Mr. PITTMAN. Under the law has not the Secretary of the Navy the right to have these ships constructed where he sees fit?

Mr. PHELAN. I understand that the Secretary of the Navy has the right to have them constructed where he sees fit; but it is the practice of the department to give them out where there is the lowest charge imposed, to be determined by estimates from the navy yards and by bids from private contractors. I suppose it is exceedingly desirable, if there is anybody to speak for the Public Treasury, that competition be invited, because it is the only way to hold down the cost of things. We know the necessity of it in our private business, and why should we not apply the rules of private business to public business?

Mr. PITTMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from California further yield to the Senator from Nevada?

Mr. PHELAN. I do.

Mr. PITTMAN. As a representative of the United States Government and having control of navy yards in which we can build naval ships, would the Senator from California be in favor of meeting the competition with private yards by conforming to the conditions in private yards if the conditions in the private yards were intolerable?

Mr. PHELAN. I understand the Senator to ask, If the conditions in private yards were intolerable, would the competition with such yards be encouraged by the United States Government?

Mr. PITTMAN. Yes; would the Senator encourage it?

Mr. PHELAN. Or would I, personally? As I understand, the conditions in the private yards are not intolerable. That is a very strong word. Under our own laws the private yards give the men eight hours a day on Government contracts. It is toward that eight hours that all the labor movement of the past tended, and now it has been achieved. The private yards do not give vacations on full pay or on any pay, so far as I am advised.

Mr. PITTMAN. Does the Senator favor that?

Mr. PHELAN. No; I have already stated that I think it is reasonable to grant 15 days, as provided now by law, for vacations.

Mr. PITTMAN. Does not that interfere with our competition to that extent?

Mr. PHELAN. It interferes just to that extent.

Mr. PITTMAN. Then which interest is the Senator going to look after?

Mr. PHELAN. There is no proposition before this body to take away the 15 days; but there is a proposition to add to that handicap, under which the Government now labors in its contractual relations with others, an additional 15 days, which I am told by the department amounts to $1,500,000 a year on the basis of the present employment in the yards. That is the handicap—a million and a half a year—which this bill seeks to impose further upon the United States.

To continue this thought for a moment, I desire to say that the Government is laboring under that disadvantage of 15 days. It is a handicap, and yet I do not believe anybody would recall it. But I state, because I have it on the authority of the Navy Department and of the record, that it costs more to-day to construct ships in the navy yards than it costs to construct them in the private yards; and there can be no other reason, in all probability, than that these 15 days are allowed and enjoyed.

Mr. PITTMAN. Mr. President, I should like to know where the Senator gets his authority for the statement that it costs more to build in the navy yards than it does in the private yards?

Mr. PHELAN. I have on my desk here the statistical tables which were elicited in the House investigation in 1913, and, not satisfied with that, I have sent to the department and received this answer, dated July 13, 1916:

NAVY DEPARTMENT,
BUREAU OF CONSTRUCTION AND REPAIR,
Washington, July 13, 1916.

Subject: Comparison of cost of vessels built in navy yards and in private shipyards.

MY DEAR SENATOR: Complying with telephone request from your office at noon to-day, I inclose herewith a tabular statement showing a comparison between navy yard and private construction for vessels completed to date and subsequent to the date of the statement on page 4132 of the CONGRESSIONAL RECORD for February 26, 1913.

It would seem that the latest comparison for battleship construction affords some justification for the statement that navy-yard costs are greater than contract costs. Last December there was widely circulated a statement from the Boston Herald attacking navy-yard construction and costs. The House Naval Committee requested me to comment on this. (See p. 824 of the testimony this year before the House Committee on Naval Affairs.) You will find my comments on pages 867 to 871, inclusive, of the same document. In this connection I may invite your attention to the statement on page 869, about halfway down, to the table at the bottom of page 871, and to the very good showing made—

Good showing made—

by the Mare Island Navy Yard in connection with the construction of the two shallow-draft gunboats, *Monocacy* and *Palos*, where the costs were not only below the original estimates but very much below the only private bid received for the construction of one of these vessels.

Very respectfully,

D. W. TAYLOR,
Chief Constructor, United States Navy,
Chief of Bureau.

Hon. JAMES D. PHELAN,
United States Senate.

Mr. PITTMAN. Did he state that it was below the price bid by private parties?

Mr. PHELAN. The cost was not only below the original estimate of the navy yard but below the only private bid received for the construction of one of these vessels.

Mr. PITTMAN. That was at the Government navy yard, was it not?

Mr. PHELAN. At the Government navy yard. I read the letter as I received it. The only exception of higher cost in the navy yards apparently is made in favor of the Mare Island Navy Yard as having constructed in the one instance just quoted, the *Monocacy* and the *Palos*, vessels at a cost lower than their own estimate and lower than the only private bid that was received.

But as a general proposition it must be admitted that, as the Senators from Massachusetts [Mr. WEEKS and Mr. LODGE] the other day stated, the Government cost is about 10 per cent more than the cost for construction in private yards. I will assume that it is about that. The department concedes that it costs more, and it is because the conditions of employment are better at the Government yards. I am pleading for the preservation of those conditions. By overburdening the overhead charges in such a way as to destroy our ability as a Government in its own yards to construct its own ships we will find that the employment of the men will be lost to them and the conditions of labor in private yards will become worse.

The Government holds up the standards of labor. Do not drive a willing horse to death—do not kill the goose that lays the golden eggs.

The Government has set an excellent standard, and if there is any way by which by force of example the conditions of labor will be benefited in private yards it certainly should have had some influence by this time. The hours of labor have been greatly improved. What I fear is that those men in whom I am deeply interested—the men in the yards and arsenals, and particularly the men who work in the navy yard of California at Mare Island, whose interests I have always served and whom I have indeed gladly befriended—by the enactment in a thoughtless manner without deliberation of a measure of this kind, will ultimately lose their employment, and that the private contractors ultimately will destroy the principle of public ownership and operation and throw us back on conditions, as in the past, unfavorable to labor. There is another feature of this bill, which gives 20 per cent bonus for speeding up. This may mean $2,000,000 on one ship and give the private contractor the whip hand. Should we not go slow and deliberate? Socrates is my friend, Plato is my friend, but Truth is more my friend. I am willing to serve these men, but I want to know, and I am entitled to know, in a deliberative body if it is true that by giving 15 days more time with full pay it will so burden the Government as a handicap that it can not do its work in its own yards in competition with private plants.

There has been no discussion in the committee, as I explained to the Senate; there has been no discussion upon the floor. It is exceedingly unfortunate that this is a political year, and anything which bears the name of labor is lifted beyond the region of honest and fair discussion. I called the attention of Samuel Gompers to this. I called the attention of the departmental officers and Senators to this, and I have heard nothing but a deep, impenetrable silence. I have not received a word from my own people in the yards at California, because you will find in that letter that that gentleman had convinced them, at another period in the history of this matter, that a long vacation with pay will give all the work ultimately to private yards. The constant danger is the governmental employment itself might be destroyed.

I would be very sorry to think that I am the only man in this Chamber who presents this view. I want the facts; that is why I raise the question. I would be very sorry to think that intelligent and organized labor would resent the voice of one who is pleading not that they be deprived of a holiday—all love a holiday—but that they be not deprived of their work. Is it true that with 30 days on full pay, which, with other holidays, exclusive of Sunday, means 43 days a year on full pay, is

going to impair the ability of the Government to construct its own ships, whether for war or peace? And if it does impair the ability, it necessarily will drive the mechanic to shipyards that are going up throughout the country, one of which was projected the other day at Baltimore, to pick up these valuable contracts; and they will get them just as soon and just as long as the Government fetters its own hands. That is the question.

I am here pleading for the men, and I am pained at the silence with which this matter has been greeted, even in places high and charged with responsibility for the interests of the workingman. What is the truth? What is best in labor's cause? It is a most delicate subject, and I perhaps lack delicacy. I feel that by projecting it at this time in the Senate of the United States I am raising a question which will lead to political turmoil and trouble, but that does not worry me so much, Mr. President, as the fear I entertain, after looking into the facts, that the Government of the United States will be deprived of the ability to construct its own ships for war or for peace. That is the main issue before the body in the consideration of this amendment; and I submit that if this assembly is not ready to hear it, having inadequate information, as I have, it should go over, and for that purpose I move, if it is in order, that the amendment be committed to the Committee on Naval Affairs. I can not say, in view of my previous explanations, that it ever came out of the committee. I am sure it was never discussed by the committee.

Mr. PITTMAN. Mr. President, a parliamentary inquiry. Is that motion in order?

The VICE PRESIDENT. The Chair sees no reason why a motion to commit an amendment to a committee is not in order.

Mr. PITTMAN. Mr. President, just a few words. The Senator from California is extremely anxious to prevent these men from being thrown out of employment. I am astounded that he has not been flooded with letters and telegrams from the laboring people of the country instead of having received two letters, one from a chamber of commerce in some little town in California and the other from Mr. Taylor. Mr. Taylor's letter, in referring to the only contract in the navy yard, says that it was not only less than cost but less than any price bid by private parties.

Mr. PHELAN. May I interrupt the Senator to correct him? The letter was not from a chamber of commerce. These bodies I know are looked upon with disfavor in certain circles. The letter is from the ex-secretary of the Vallejo Chamber of Commerce, and Vallejo practically consists of the navy yard, and he speaks as one interested in labor.

Mr. PITTMAN. He speaks as one interested in labor. I have heard others speak as interested in labor. This man from the little town of Vallejo, an ex-secretary of a chamber of commerce, takes such a deep interest in the welfare of labor that he takes upon his own shoulders the great burden of causing them to work more hours and of denying to them the necessary vacation to upbuild them and keep them in a decent condition for work. Oh, I have heard them speak for labor, speak in the interests of the great labor movement of this country.

Where are the great labor organizations? Have any of them come here saying that they were afraid this was some dastardly measure to throw them out of work? It is an impossible thing and does not require argument. Talk about our Government navy yards being abandoned by reason of this amendment!

The Senate is afraid we will have to abandon the use of the navy yards by reason of this amendment. Think of it, that the Government will abandon the use of the navy yards because the men are given 15 days more vacation! If that is the case, the tenure of our navy yards is exceedingly weak. If treating men decently is going to abolish these navy yards, then let them be abolished at once. But how absurd. The Government owns the navy yards. It owns the ships that it is building. It builds its own ships, and it is an absurd thing to stand here and say that people are going to cease to build ships in their own yards. He is attempting to compare the cost of a private-built ship with the cost to the Government. He does not add the profit of the private builder to the price the Government pays.

Mr. PHELAN. Neither have I added the overhead charge, which the private concern does, as against the Government.

Mr. PITTMAN. Yes; and the distinction as to overhead charges is simply this: That in the private yards they have the high-priced superintendent and the high-priced secretary and vice president, and in our Government navy yards the naval officers are at the head of those institutions, the men who should be at the head of them, the men who are the most deeply interested in them, and they are working for the same salary that they would receive whether they are building those ships or fighting in them out on the ocean. Talk about your overhead charges! There is no comparison whatever in overhead charges.

Mr. HARDING. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Ohio?

Mr. PITTMAN. I yield.

Mr. HARDING. The Senator from Nevada made a very interesting statement a little while ago, and I desire to request that he elaborate it somewhat. I should like to know what he meant when he referred to intolerable conditions in privately owned shipyards.

Mr. PITTMAN. I asked the Senator from California if there were intolerable conditions in private shipyards which permitted them to build ships cheaper than the Government would he be in favor of having those same intolerable conditions in the Government navy yards so as to meet that competition.

Mr. HARDING. The Senator does not state it now as he stated it before.

Mr. PITTMAN. I said that was the question I asked the Senator. The Senator did not answer that question, but he went on to another situation and said that he did not think the conditions were intolerable.

Mr. HARDING. Will the Senator answer the question, then?

Mr. PITTMAN. Just let me go on a little further. I say that when they do not give their men any vacation at all those conditions are intolerable, and as one of the Representatives of this Government having power to control our navy yards I would consider it intolerable in Government work and would not stand for it.

Mr. HARDING. Does the Senator from Nevada mean that private employment without vacation on pay is an intolerable condition?

Mr. PITTMAN. I consider it intolerable.

Mr. HARDING. Has the Senator from Nevada ever been an employer in his life?

Mr. PITTMAN. I have.

Mr. HARDING. Did you grant employees leave with pay?

Mr. PITTMAN. We did.

Mr. HARDING. I want to proclaim the Senator from Nevada as a very fine example.

Mr. PITTMAN. I thank the Senator for it. I belong to two institutions that have followed that practice, and I want to state that I believe it was not so much a charitable act as it was an act of benefit not only to the men but to the industry, because I believe that when men have a vacation they accomplish more for their employers. I do not believe that you can work a man down to the lowest possible state of vitality, both mental and physical, and get out of him what you can out of a strong, healthy, wholesome man.

Mr. HARDING. Will the Senator yield?

Mr. PITTMAN. I do.

Mr. HARDING. I wish to make another inquiry. I may state before I make my inquiry, without having said very much about it, that as a newspaper publisher I am the employer of union labor. It is not generally advertised, however; it does not seem necessary. I want to ask the Senator from Nevada what line of labor he has been employing?

Mr. PITTMAN. Miners.

Mr. HARDING. What extent of vacation do you grant without pay?

Mr. PITTMAN. Four days in a month.

Mr. HARDING. Other than Sundays?

Mr. PITTMAN. No; Sundays.

Mr. HARDING. Oh! Mr. President, I think the answer is a sufficient argument for the occasion. I did not know that the granting of a Sunday leave of absence was a vacation with pay.

Mr. PITTMAN. It is considered vacation with pay for the men who are working for day's pay and not for a monthly salary. When men are receiving, as they do in our country, $4 and $4.50 a day for eight hours a day's work, if they do not work on Sunday but receive pay for it, they are receiving some consideration. Let me ask the Senator from Ohio a question.

Mr. HARDING. I will be very glad to answer it.

Mr. PITTMAN. At present under the law the employees in the executive departments are getting 30 days leave of absence. Does the Senator approve that?

Mr. HARDING. I have no objection to it, if the Senator wants an explicit answer.

Mr. PITTMAN. That is what I want. I want to know your view of this matter. There are in the Bureau of Engraving and Printing 4,000 employees getting 30 days leave of absence with full pay. Does the Senator approve of that?

Mr. HARDING. I make this reply to the Senator from Nevada: Confessing in the beginning that I have not yet

acquainted myself with the unlimited opulence of public employment to make this distinction, but we make this distinction in private practices, which are usually of a pretty good character for Government operation, because private practices are founded usually on sane business methods, the clerical force in a great business institution which has no fixed time of labor may be given two weeks or a month's leave with pay, whereas the united laboring force which exact from the employer time and a half for overtime, and is very explicit in their hours, are limited to the literal compliance with their contracts. I think that would be quite fair in the Government dealings with its employees. So far as I know the clerical force working for the Government works according to the needs of the occasion. But I undertake to say no organized labor employee of the United States Government works one moment over the contract time, and that creates a different situation.

If the Senator from Nevada can contrive some successful means of doing so, I should like to have him, as a friend of labor, not only provide for a 30-day leave of absence for Government employees in these shops, but provide, in addition, for a 30-day leave of absence for every toiler of this country in the Government pay. Let us make the thing complete.

Mr. PITTMAN. I will accept such an amendment if the Senator will offer it.

Mr. HARDING. Very well; then we are agreed.

Mr. PITTMAN. Mr. President, I have nothing more to say on this amendment except that the motion to recommit is just another form in which it is attempted to kill it.

Mr. CUMMINS. Mr. President, I desire to ask a question of the Senator from Nevada. I want to understand his amendment better than I do now. Is it the law that these employees shall have a half a day in the week for 26 weeks? Is that a matter of law or is it a matter of regulation?

Mr. PITTMAN. I myself know of no law to that effect.

Mr. CUMMINS. I want to know whether the effect of the amendment, if adopted, would be to give to our employees 43 week days a year with pay and without work?

Mr. PITTMAN. It has been construed by the comptroller that it means 30 days.

Mr. CUMMINS. I am in favor of 30 days leave; that does not seem to be unreasonable; but I do not believe it would be quite fair or right to give employees anywhere 43 week days in a year with pay and without work.

Mr. PITTMAN. The same provision with regard to the other employees that I have read has been construed by the Comptroller of the Treasury to mean 30 days.

Mr. CLAPP. As I understand, Mr. President, the afternoon vacation or recess, whatever you may call it, of employees generally——

Mr. SMOOT. The Saturday afternoon.

Mr. CLAPP. The Saturday afternoon is not counted as a part of the 30-day annual leave. To add it up in the various departments, or any of them where it is allowed, would make, I presume, over 45 days.

Mr. SMOOT. Mr. President, I will ask the Senator from Nevada if the employees referred to in his amendment are allowed sick leave?

Mr. PITTMAN. They are not.

Mr. SMOOT. I will say to the Senator that the employees in the other departments of the Government are allowed sick leave. Thirty days' leave of absence; half a day on every Saturday, during the summer months; a sick leave, I think, of 10 days are allowed.

Mr. SWANSON. Thirty days.

Mr. GALLINGER. Thirty days. They used to get 30 days, I know, for sick leave.

Mr. SMOOT. I may be mistaken in stating the sick leave as being for 10 days; but, at least, I know it is that much, and in some cases it is 30 days, as is suggested.

Mr. PITTMAN. They have not the sick leave.

Mr. SMOOT. Does the Senator from Nevada know that?

Mr. PITTMAN. I do know that. I discovered that after investigation. I have investigated the matter most carefully, and I have read the hearings held by the committee of the other House. I have also talked with heads of departments, and I find no sick-leave provision. As I have stated, I have examined the subject, and I say there is no sick leave.

Mr. SMOOT. The employees under the amendment of the Senator from Nevada, if it be adopted, will be given 30 days' leave of absence, a half holiday on Saturday, 7 legal holidays, and are there not other leaves of absence granted them?

Mr. PITTMAN. I do not know. I will state that, with the exception as to the sick leave, for which there is no provision in this department, they have been treated with regard to the 15 days' leave of absence just the same as have the others with regard to the 30 days' leave.

Mr. CUMMINS. Mr. President, I hope the Senator will make that clear in his amendment, for it will make a great deal of difference in my attitude toward it, at any rate. I do not believe that we ought to give these employees 43 or 45 week days a year with pay and without work; but I do think we ought to give them 30 days. If the Senator has any doubt about that subject, I think he ought to make his amendment so clear upon it that the doubt will be removed.

Mr. PITTMAN. I think that the language is practically identical—that is my recollection, but I will look it up—with the provision for the other executive departments, the Bureau of Engraving and Printing, and the Government Printing Office, with the exception as to the sick leave.

Mr. CUMMINS. But we are not now dealing with the Government Printing Office or any other bureau; and when the Senate deals with a subject, it ought to deal with it upon the right basis. Does the Senator think these employees ought to have 43 or 45 days without work and with pay?

Mr. PITTMAN. I do not think that 45 days' leave would be too much where it is made up by including a half holiday on Saturday. The real object of this amendment is to give a man 30 days' continuous leave of absence, so that he may go out to the mountains or go down to the seashore, or go somewhere else, in order that he may build himself up. As to whether these employees are going to have the Saturday afternoon holiday or vacation is a matter for separate determination.

Mr. CUMMINS. What do the words "pro rata" mean in the amendment that is before the Senate? The amendment provides that these employees shall have pro rata leave.

Mr. PITTMAN. I will explain what that means. The amendment provides, for instance, that no one shall have a leave of absence unless he has rendered 12 months' service.

Mr. CUMMINS. Consecutive service?

Mr. PITTMAN. Yes; it must be consecutive service. If such service continues on into the second year, in the second year there will be an accumulation to those who have been in the service one year.

Mr. CUMMINS. Does it mean, if an employee serves two years without vacation that in the third year he might have 130 days?

Mr. PITTMAN. It means an accumulation of that kind.

Mr. SMOOT. Mr. President, let me say to the Senator that I have just telephoned the Navy Department in relation to leaves of absence to employees at navy yards, and I am informed that an employee in a navy yard for the first year is allowed 15 days leave of absence. If he serves in the navy yard another year or any portion of a year, he is allowed one day and a quarter for each month's service; in other words, if the employee serves the second year, he is allowed the original 15 days and also one and a quarter days a month, which would amount to 15 days more, making 30 days leave of absence in all the second year. Mr. President, every mechanic under the Navy Department to-day, if he serves over one year and serve for a full two years, receives 30 days leave of absence.

I asked the department whether such employees were allowed sick leave, and I was informed that mechanics are not allowed sick leave, but that all of the clerks are allowed sick leave, just as are the clerks in the other departments. So, Mr. President, if the amendment of the Senator be adopted, each mechanic in a navy yard will be allowed 30 days leave of absence, and that does not take into account the half-day holiday on Saturday or regular national holidays. That is the situation, as I have just learned from the Navy Department, as to leaves of absence in navy yards.

Mr. PHELAN. Mr. President, did I understand the Senator to say that the employee would have 45 days' leave of absence on full pay?

Mr. SMOOT. Nearly so; on full pay if this amendment be adopted.

Mr. PHELAN. I made the statement I did on the authority of the letter I had read into the RECORD.

Mr. SMOOT. I make the statement on the authority of the Navy Department on information received direct within five minutes. To-day such employees for the first year only get 15 days regular leave; but if they serve the second year they get 30 days, the same as in the case of the other departments of the Government. If the Senator's amendment shall be agreed to, then they will receive regular leave of absence of 30 days in every year.

Mr. PITTMAN. No; not in the third year, nor the fourth year, nor the fifth year

Mr. SMOOT. I think it would be the same in all the years after the first.

Mr. PITTMAN. No.

Mr. SMOOT. I asked the question of the Navy Department on the telephone within five minutes whether during the second year——

Mr. PITTMAN. The first year they can not have any leave of absence under this provision.

They have no leave, but the 15 days is added to their leave the second year, making 30 days the second year. Under the amendment those men who receive no leave of absence during the first 12 months would have 45 days the second year, but in the third year they would have 30 days, and in the fourth year 40 days, and in the fifth year 30 days.

Mr. SMOOT. That is not in accordance with what the department told me. The department advised me that in the first year all employees were allowed 15 days' leave of absence, but if they continued their work they earned one and a quarter days' leave each month over and above what they received the first year. If they worked 12 months, one and one-quarter days a month would make 15 days, which, added to the 15 days' regular leave of absence to which they would be entitled for the first year, would make 30 days' leave of absence.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. SMOOT. Certainly.

Mr. NORRIS. Mr. President, if we agree to this amendment, will not the terms of the amendment itself be the law which will govern the matter? I can not see how anyone can put the construction on this amendment that an employee could have 45 days' leave of absence.

Mr. BRANDEGEE. Mr. President, will the Senator yield?

Mr. SMOOT. It does not repeal the original law providing for leave of absence of 15 days.

Mr. NORRIS. Fifteen days is provided by the law, is it?

Mr. SMOOT. Yes; that is provided by law.

Mr. NORRIS. It ought to be repealed in this act; and I should think it was repealed by implication, at any rate.

Mr. SMOOT. It may be. That I am not discussing; I am only stating the facts as the Navy Department told them to me.

Mr. NORRIS. Of course, I do not want the Government to be placed in the position the Senator describes, but on its face this amendment, it seems to me, plainly provides that 30 days shall be the legal leave of absence, and, if the amendment is agreed to, I should think it would govern and overrule any law on this subject which existed prior to its passage.

Mr. SMOOT. The Senator may be right. I have not read the amendment closely.

Mr. BRANDEGEE and Mr. MARTINE of New Jersey addressed the Chair.

The VICE PRESIDENT. The Senator from Connecticut.

Mr. MARTINE of New Jersey. Mr. President, if the Senator will yield a moment, I wish to say that in conversation with a gentleman who is familiar with this subject——

Mr. BRANDEGEE. Mr. President, I believe I have the floor. I do not like to have a duet going on; I prefer to do a solo act at this time, and if I need any help I will call upon some other Senator to come to my aid; but, until I do, I prefer to be the sole occupant of the floor.

Mr. MARTINE of New Jersey. I have no desire to interfere with the Senator.

Mr. BRANDEGEE. I know the Senator has not, and I do not desire him to have. I thank the Senator very much for his courtesy.

Mr. President, I think the point made by the Senator from Nebraska [Mr. NORRIS] is worthy of considerable attention. It does not certainly appear from the face of this amendment whether or not the 30 days' leave is additional to the leave which the employees are now entitled to. All this amendment says is that each and every employee of the arsenals, and so forth, is hereby granted 30 days' leave of absence. If an employee has in some cases received 15 days and in other cases 30 days already, the query would certainly arise whether this is additional or not, and that certainly ought to be made plain in the amendment.

I want to ask the Senator from Nevada, if he is in the Chamber, and if not, any other Senator who may think he understands this amendment, whether the prorating described in the fifth line of the amendment means that the leave can be taken at the option of the employee two or three days at a time until his 30 days is used up? I also want to ask him, inasmuch as he has stated that leave which was not taken in the particular year during which the employee was entitled to it would be cumulative, what is his authority for that statement?

Mr. PITTMAN entered the Chamber.

Mr. BRANDEGEE. Inasmuch as the Senator from Nevada has just reentered the Chamber, I will repeat my question. I understood the Senator to say that if an employee under existing law did not use all of his leave in one year, it would be cumulative; so that after four years, for instance, if he were entitled to 30 days' leave a year, he would have 120 days' leave with pay coming to him. Does the law so provide at present?

Mr. PITTMAN. No; not at present.

Mr. BRANDEGEE. Then, where does the Senator get his idea that it would be cumulative?

Mr. PITTMAN. I might have misunderstood the Senator, or I might have been misunderstood myself.

Mr. SMOOT. I will say that it is cumulative.

Mr. PITTMAN. I think that the prorating referred to in the amendment relates to a part of a year. For instance, an employee can not get any leave until he has served one year. At the end of the year, I understand, an employee would be entitled to 15 days' leave.

Mr. BRANDEGEE. Let me ask the Senator if at present the employee would be entitled to 15 days, or 30 days, as the case may be, can he take that leave in portions as he may elect, for instance, three days at a time?

Mr. PITTMAN. I can not answer that. I do not know. I know that the pending amendment intends that the Secretary of the Navy shall control the leave of absence. I do not know about the past practice.

Mr. BRANDEGEE. Of course, this proposed amendment provides that in all cases the heads of divisions shall have discretion as to the time when the leave can best be allowed.

Mr. PITTMAN. Yes.

Mr. BRANDEGEE. But it does not provide whether or not the whole 30 days must be taken together in one continuous vacation.

Mr. PITTMAN. No; it does not.

Mr. BRANDEGEE. But the Senator said one of the objects of the amendment was to allow a man 30 days, so that he could go on a considerable vacation if he wanted to do so.

Mr. PITTMAN. Yes; I think so.

Mr. BRANDEGEE. I do not know what the existing law is as to these allowances in other departments; but I do think that if this policy is to be adopted the amendment ought to be carefully redrafted to make it uniform with the allowances made in other departments.

Now, I want to ask the Senator another question, if he will permit me. Is this supposed to be entirely confined to the Navy?

Mr. PITTMAN. No; it is not. It expresses right on its face those to whom it is intended to apply.

Mr. BRANDEGEE. I had supposed it was, inasmuch as it goes on the naval appropriation bill; but I call the attention of the Senator to the fact that the amendment reads:

Each and every employee of the navy yards, gun factories—

I assume there may be gun factories in the country which are making guns for the Army, although I do not know—

naval stations, and arsenals of the United States,

Now, I know there are arsenals that make ordnance for the Army; and I did not know whether or not it was the intention under this amendment to grant this further leave of absence to men employed in the arsenals of the Army or War Department. Does the Senator know?

Mr. PITTMAN. It was the intention of the committee to include those in the same category with all of the others whom I have enumerated.

Mr. MARTINE of New Jersey. Mr. President, will the Senator——

Mr. BRANDEGEE. Not having concluded my remarks nor yielded the floor, I will now make the further inquiry of the Senator whether he does not think that in line 6, where it provides "that it shall be lawful to allow pro rata leave only to those serving 12 consecutive months," it should be "to those who have served" that time?

Mr. MARTINE of New Jersey. Mr. President, will the Senator from Nevada permit me? Inasmuch as there has seemed to be a considerable mix up as to the holidays, I will state that it was my opportunity a moment ago to talk with a gentleman who is connected with the department——

Mr. BRANDEGEE. Mr. President, I rise to a question of order. Has the Senator from New Jersey been recognized as having the floor?

The VICE PRESIDENT. He has.

Mr. BRANDEGEE. It is a very unusual proceeding.

Mr. MARTINE of New Jersey. I will say to the Senator from Connecticut that I felt that the dignified nod of the Presiding Officer's head gave me reasonable assurance that I was recognized, so the Senator from Connecticut need have no worry on that score.

As I say, hearing this discussion, I consulted with a gentleman who is identified with the labor organizations and con-

nected with the Government, hearing, as he did, this discussion, and he gave me this bit of information, which I jotted down:

All Government clerks and employees get seven holidays a year, and all get Saturday afternoons for the three summer months in the year. Other classes of employees, in addition, get 30 days leave, and they get 30 days sick leave. The navy yard and the arsenal get 15 days leave of absence.

That was the gentleman's statement, which, I think, elucidates the situation.

The VICE PRESIDENT. The question is on the motion of the Senator from California [Mr. PHELAN] to commit the amendment to the Committee on Naval Affairs.

Mr. CLAPP. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. PITTMAN. Mr. President, a parliamentary inquiry: Is this roll call on the motion to recommit to the committee?

The VICE PRESIDENT. It is not a motion to recommit. It is on the motion to commit the amendment to the Senate Committee on Naval Affairs.

Mr. PITTMAN. I wanted to understand the matter and the Senate wanted to understand it, because some Senators thought we were voting on the amendment itself.

Mr. GALLINGER. Let the roll call proceed, Mr. President.

The Secretary resumed the calling of the roll.

Mr. OVERMAN (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. WARREN], and therefore withhold my vote.

Mr. REED (when his name was called). I have a pair with the senior Senator from Michigan [Mr. SMITH]. I transfer that pair to the junior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "nay."

Mr. TILLMAN (when his name was called). Announcing the same transfer of my pair that I announced on the other vote, I vote "nay."

The roll call was concluded.

Mr. JAMES (after having voted in the negative). I transfer the pair I have with the junior Senator from Massachusetts [Mr. WEEKS] to the senior Senator from Nevada [Mr. NEWLANDS] and will allow my vote to stand.

Mr. DILLINGHAM (after having voted in the affirmative). I observe that the senior Senator from Maryland [Mr. SMITH] has not voted. As I have a pair with him, I withdraw my vote.

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN]. In his absence I withhold my vote.

Mr. LIPPITT. I have a pair with the junior Senator from Montana [Mr. WALSH]. As he is not present, I withhold my vote.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON]; and

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS].

The result was announced—yeas 17, nays 50, as follows:

YEAS—17.

Brandegee	Kenyon	Phelan	Wadsworth
Bryan	Lee, Md.	Smith, Ga.	Walsh
Cummins	Nelson	Smoot	
Harding	Oliver	Thomas	
Hardwick	Penrose	Vardaman	

NAYS—50.

Ashurst	Hollis	Martine, N. J.	Smith, S. C.
Bankhead	Hughes	Norris	Sterling
Borah	Husting	Page	Stone
Broussard	James	Pittman	Swanson
Catron	Johnson, Me.	Poindexter	Taggart
Chamberlain	Johnson, S. Dak.	Ransdell	Thompson
Clapp	Jones	Reed	Tillman
Clark, Wyo.	Kern	Robinson	Townsend
Culberson	Lane	Shafroth	Underwood
Curtis	Lewis	Sheppard	Williams
du Pont	Lodge	Sherman	Works
Fletcher	McCumber	Simmons	
Gronna	Martin, Va.	Smith, Ariz.	

NOT VOTING—28.

Beckham	Gallinger	McLean	Saulsbury
Brady	Goff	Myers	Shields
Chilton	Gore	Newlands	Smith, Md.
Clarke, Ark.	Hitchcock	O'Gorman	Smith, Mich.
Colt	La Follette	Overman	Sutherland
Dillingham	Lea, Tenn.	Owen	Warren
Fall	Lippitt	Pomerene	Weeks

So the motion to commit the amendment to the Committee on Naval Affairs was rejected.

Mr. LEE of Maryland. Mr. President, I offer the following amendment to the amendment offered by the Senator from Nevada:

And provided further, That in arriving at the cost of any unit of construction in navy yards only actual time made shall be charged, and leave of absence hereby granted and extended shall not be charged against any unit of construction in yards.

Mr. President, I voted in favor of referring this amendment to the committee because for a long time I have been interested in navy-yard construction. We have listened here to-day to an argument from the Senator from Nevada [Mr. PITTMAN], who comes from a mountain State and has no actual and immediate experience in navy-yard construction, or knowledge of the long struggle that has been necessary to secure that privilege for the Government and for the laboring classes. I say "to secure that privilege" because the privilege has been, in a measure, wrested from the great ship-constructing companies. On the other hand, we have heard here the argument of the Senator from California [Mr. PHELAN]. He represents a great navy yard and the best interest of the citizens employed there. The opinion of the labor expert, which he sent to the desk and which was read, represents the mature experience of a man who seems to have been for many years in this struggle to secure the construction of Government ships in Government navy yards.

Mr. President, I am very fearful that the adding of this additional leave will be a very short-sighted move from the standpoint of the men who are interested as laborers in the navy yards, because of the fact that naval construction, as it stands to-day, as has been shown by the Senator from California, is already more costly in the navy yards than it is in the private concerns; and to add this further burden to the navy-yard construction is a very dangerous experiment, indeed, for the men whose livelihood depends upon the labor in the yards.

Two years ago, in June, 1914, we had the naval bill up for consideration, and the Senator from New York [Mr. O'GORMAN] endeavored to have an amendment put on that bill providing that the cost of ship construction in navy yards should be the actual cost and should not include the overhead cost or yard maintenance. He was ruled out of order by the Chair. Finally, after several efforts, an amendment which I offered was held in order by the Chair and adopted, which for the first time permitted the actual cost of battleship construction to be obtained by the Secretary of the Navy.

The Senator from Nevada is obviously ignorant of the long struggle that has been going on here to permit the construction of vessels in navy yards and of how hard it was to get at the actual cost of such work. The yard construction is desirable from many standpoints for at least a part of all new ships added to the Navy. It educates the naval officers in detail of construction. It raises the quality of the work done, because quality, strength, and durability are the things sought for in yard construction, rather than profit.

It also has improved the condition of laboring men who are engaged in the work. Their interest and the Government's interest went hand in hand, and finally it enabled the Government to ascertain exactly what the cost of this construction is without regard to the hidden element of profit, which may be greater or less in any case. It was particularly important that the Navy Department should be authorized to ascertain the actual cost of construction, without overhead charges or the charge of the maintenance of a navy yard, in advance of this great period of naval development, both as a protection to the Government and a protection to the contracting class as well, and in the cause of reasonable preparedness.

Mr. President, if we are going to have this additional leave offered to these employees, and if it is going to be accorded to them regardless of the effect it may have on their future livelihood, I think we ought to now meet the situation squarely and say this is a bonus, a gift, a holiday from the National Government, and it must not be charged against the cost of a battleship made in a navy yard. Let us have a clear understanding of this expenditure in advance.

Therefore I have offered this amendment, and I hope the Senator from Nevada will accept it, because it goes with his idea. If the Government is going to present this additional leave to the labor employed in the navy yards, it ought to provide that its cost shall not be used as a leverage or an argument against future construction in navy yards.

I believe the Senator from Nevada offered his original amendment in good faith. I do not believe he is aiming to strike down construction in navy yards. I do not believe he is aiming at the employment of the men in the navy yards or that he is desirous of making the cost of the battleships so high in navy yards that they will have to be constructed elsewhere. Therefore I sug-

gest this amendment, and I hope it will prove satisfactory to the Senator and to the Senate.

I will ask that it be read by the Secretary.

Mr. CHAMBERLAIN. Before it is read I should like to ask the Senator a question. What is the rule of apportioning the work now or letting contract for shipbuilding? What proportion goes to the navy yards of the country and what proportion is done by private contract?

Mr. LEE of Maryland. I am not aware that there is any definite rule, but I am under the impression that the Secretary of the Navy has the discretion, and that he exercises that discretion in view of the cheapness of construction, and that he compels the navy yards to estimate and to bid, as it were, against the contracting classes that are in competition with one another and the yards.

The Senator from California, who is very solicitous about continuing work in navy yards, and whose whole argument has been based here this morning on the hope of continuing such work in the navy yards, is doubtful of the effect of this amendment granting this additional leave, and in addition to that he has produced evidence here to show that only in one small class of construction is navy-yard construction cheaper than contractors' construction.

So under the circumstances, Mr. President, I hope the Senator from Nevada will clear up the situation. I hope he will show clearly that he has no ultimate design to overthrow the employment of these men in the yards under the advantageous conditions of Government employment, and that he wants to make it clear that this is a gift, a bonus, or whatever you may call it, and that it must not be charged up against the cost of a battleship built in a Government yard.

Mr. CLAPP. Mr. President, while I am heartily in favor of the amendment offered by the Senator from Nevada, I do not see anything to be gained by the amendment offered by the Senator from Maryland to it. The opponents of the building of battleships in our shipyards will at least insist and claim to the public that the expense incident to this leave of absence should be charged against the construction. Surely it is a charge against somebody. It is a charge against the common taxation and revenue force of the country.

I do not see anything to be gained in a mere matter of bookkeeping. Whether the dollars are on one side or the other, they are just the same. I believe it is infinitely better to just take this matter fairly and candidly and treat these people as we are treating the others who render service to the Government; no more and no less.

Mr. LEE of Maryland. Will the Senator yield for a question?

Mr. CLAPP. Certainly.

Mr. LEE of Maryland. Ought not this bonus or gift to be charged to the liberality of Uncle Sam rather than to the cost of the ship?

Mr. CLAPP. You can charge it to anybody you like, but it comes out of the people who contribute to the revenue of the country. It does not lessen the cost to the Government one iota by charging it to one account or to the other. I never have believed in beating around the bush with these things. I believe these men are just as much entitled to this vacation as the others who are in the service of the Government, and the men who will continue to combat the building of battleships and our marine structures in our Government navy yards will insist, of course, that, call this what we may, it is a part of the cost of running the Government, which they will insist might be lessened if all the battleships and other maritime structures were built by private contract.

Mr. LEE of Maryland. Will the Senator yield for another question?

Mr. CLAPP. Certainly.

Mr. LEE of Maryland. The Senator agrees, then, that this ought to be charged up against the men. Why charge it up against the ship's cost? If we charge it up against the ship, it is going to be used as an argument to take work away from these men, and that argument will be made in favor of contractors doing the work.

Mr. CLAPP. It will be, anyway. You can not get away from the fact that a dollar is a hundred cents, call it what you will. I believe it is better that we should meet this fairly and candidly.

Mr. LEE of Maryland. I want to make it clear that the dollar was given for a leave or holiday to the men, and it was not the cost of the ship.

Mr. CLAPP. It would not be given as a holiday to the men if we had no navy yards. It will be charged as one of the incidents to the maintenance of our navy yards, and I think it ought to be. I am in favor of the amendment, but can not for the life of me see what we will gain by a process of bookkeeping that does not lessen in the final and last analysis the expense to the Government.

Mr. LEE of Maryland. Mr. President, under the old system of accounting, before the amendment that I alluded to was in 1914 put on the naval appropriation bill, the overhead charges of the yards were charged up against the ships constructed in the yards.

There are a great many overhead charges in navy yards. Under the old system of frigate building in the old Navy the whole navy yard was run out of an appropriation to build an old three-decker. When a ship was being constructed in a yard, all the various incidents that kept up the navy yard were charged against that frigate, number so-and-so. That system of accounting came down, and it was a system of charges for the maintenance for the various navy yards against capital ships being constructed in the yards. The system was brought down from the past, and was always relied on by the contracting classes as proof positive that the Government can not build these ships in a navy yard, with eight-hour labor, and so forth—that it costs too much. It was not really material or labor that made the apparent high cost, but it was the system of putting all the charges of yard repairs against a given ship.

Mr. CLARK of Wyoming. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Wyoming?

Mr. LEE of Maryland. Certainly.

Mr. CLARK of Wyoming. I wish to ask the Senator, because of this proposed amendment, if he thinks it would make a battleship cost less by charging it to some other account?

Mr. LEE of Maryland. No; it will not cost less, but I do not want it to be made to appear to cost more. Just because the Senate votes a holiday to a large number of men I do not want naval construction taken from navy yards and the very livelihood of those men ultimately taken away from them by arguing that such ship construction is too costly.

Mr. CLARK of Wyoming. As to the actual cost of a battleship in a Government yard, will that battleship cost any more or any less simply because you make a difference in your method of bookkeeping as to the charges?

Mr. LEE of Maryland. That is just exactly what I would like to have appear. I want to get at the real facts of the case. The real fact in the case is what does the ship cost in labor and material; but to charge a series of holidays, vacations, or leaves, or anything else against the cost of that battleship is not the actual fact. I think it will be used, and I think this very amendment of the Senator from Nevada will hereafter be used, to take away employment from these men in the navy yards on the argument that their construction is too costly. Let us keep the cost of the ship separate from the cost of the leave or holiday, so that hereafter the men may not be compelled to lose the cost of the ship, which is their living, if you conclude that the yard construction cost must be reduced.

Mr. HARDING. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Ohio?

Mr. LEE of Maryland. Certainly.

Mr. HARDING. The Senator has been speaking of the amount of labor and gratuity or generosity on the part of the Government. I should like to ask the Senator how many Government employees will this measure affect?

Mr. LEE of Maryland. I can not advise the Senator; I have not looked into that phase of it; but it affects all the Government employees who are engaged in the construction of ships in the Government navy yards, and the number must be very considerable.

Mr. HARDING. Can the Senator from Nevada inform me?

Mr. PITTMAN. Twenty-nine thousand eight hundred and seventeen.

Mr. HARDING. I want to ask the Senator from Nevada if this gift of a million and a half is to be accounted in any way under the contemplated corrupt practices act relating to elections?

Mr. PITTMAN. Well, I would not think so. If the Republican Party had anything to do with it, the paying of the money to laborers instead of the trusts might be considered corrupt. I have never known them to be——

Mr. HARDING. In reply to that I will say that if the Republican Party ever contemplated such a thing as that it would not deserve to be returned to power.

Mr. PITTMAN. The people thought that four years ago.

Mr. HARDING. If the Republican Party for the purpose of influencing the vote would give a million and a half dollars of the public's funds, it does not deserve the confidence of the people of this country.

Mr. PITTMAN. That Republican standpoint depends upon whether it is given to private institutions or whether it is given to labor.

Mr. CLAPP. Mr. President, I want to say to the Senator from Maryland that I would not want, of course, to do anything that would weaken the construction of battleships and other structures in our Government navy yards. My opposition, or rather my suggested criticism of this amendment did not go to that. I am simply taking the position that in the last analysis it does not make any difference what you call a thing, it is not very material.

Mr. LEE of Maryland. Mr. President, I simply urge this amendment in the interest of truth, that, as to the money expended, it should be known where it goes, just as in the interest of truth we differentiated here two years ago between the actual cost of a ship and the maintenance of a navy yard. The United States has to have navy yards whether it builds ships in them or not. It has to have the yards for repair purposes and for the exigencies of war, and for the natural necessities of a naval establishment. It was absolutely wrong to charge the maintenance of these yards with their great establishments of officers, and so forth, to an individual unit of naval construction. For that reason the Senate apparently adopted that amendment two years ago, and in the interest of truth it separated the cost of the ship from the maintenance of the yard.

Now, Mr. President, in the interest of truth I ask that this gift to labor of additional leave or vacation be separated from the cost of the ship, and I ask it not only in the interest of truth but in the interest of the laborers themselves, because I am fearful that unless this is separated it will be brought back hereafter to show that this navy yard work must be taken from these men.

Mr. PITTMAN. Mr. President, I am sorry that I can not agree to the Senator's amendment. I am glad the Senator is in favor of the amendment that I offered, and I think his explanation here on the floor of the Senate is perfectly plain as to the construction of it.

Mr. REED. Mr. President, I wish to say just a word about this amendment. I am not sure that the friends of labor are by this proposed legislation doing labor a friendly service. Whenever it is established that the Government can not do work in Government factories, yards, or institutions save at a price in excess of that charged by private contractors, the work done in Government yards and all governmental enterprises will languish and may be finally abandoned. Whenever it is so circumscribed or abandoned, the example which the Government has been putting before the country—of a liberal policy to those in its employ—will be lost to the country and labor will be relegated for its relief to such benefit as it may be able to exact through strikes or persuasion or organization. In the end I question whether a sincere friend of labor is voting in the interest of labor when he proposes to give a holiday of 47 days with full pay.

I think it is well for every man to stop and consider that question. If, for instance, Congress was to yield to every demand made, and if the demands, for instance, should become exorbitant in the Post Office Department, the time might come when a party in power adverse to the interests of labor and very friendly to capital would turn the post office over to private contractors upon the theory that governmental management had broken down. Whoever contributes to the breaking down of Government management in any department contributes ultimately to turning over that department to private management.

Some of us have been seeking to enlarge governmental activities along certain lines, particularly in the creation of munition and armor factories, the enlargement of our governmental navy yards, and so forth. The worst enemy of that system or the growth of that system might be a gentleman who proposed a wage so great or conditions so liberal that no vessel could be built or no powder manufactured or no armaments created in a governmental yard without the cold figures demonstrating a governmental cost far in excess of private cost. Whenever that is done, the first evil that results is that we put ourselves in the hands of the private contractor or manufacturer. Whenever that has occurred we have always found the private manufacturer willing to exact an enormous price from the Government. Thus, the Government loses the benefit of the competition and the regulatory result coming from a governmental agency.

The second effect is that, as the Government closes its factory and discharges its men, they are relegated for their employment to the private manufacturer, in which event they receive just such holidays as the private manufacturer sees fit to grant.

I believe we can benefit all labor by keeping these governmental agencies open and by enlarging them; but if we are to keep them open, if we are to enlarge them, then we must always, while pursuing a liberal policy and furnishing an example of liberality to all other employers of labor, nevertheless proceed with discretion or we shall injure the very cause to which we are devoted.

Mr. President, I think we did right when we limited the day of labor in governmental factories to eight hours; but even when that was done, I remember reading a report of the then Secretary of the Navy, the practical import of which was to advocate the closing of the governmental navy yards and the doing of all our work by private contract, because, as was argued by that distinguished official of the Government, the cost of a ship made in a governmental yard was so far in excess of the cost of a ship made in a private yard. He charged, in substance and effect, that the reason for that increased cost was the 8-hour day in the public yard as against the 9 or 10 hour day in the private yard. After making that argument he submitted his proof in the form of figures showing the aggregate cost of the ships as shown by his books. However, an examination of the facts upon which he based his figures demonstrated that the extra cost of the Government-built ship could not justly be charged to the 8-hour day in the Government yard, as opposed to the 9 or 10 hour day in the private yard, but that there had been carried into the cost of the ship other large sums which could not be legitimately charged against the particular vessel under construction. The cold truth was—and the wayfaring man, though a fool, could not err therein—that this Government official, being opposed to anything except private shipbuilding, had kept his books so that it would appear that because Congress had yielded to the just demands of labor, we therefore could not build ships at a reasonable price, whereas the truth was that, fairly stated, the labor cost of a Government ship was but slightly in excess of the labor cost of a similar ship in a private yard. Some remedy was made in subsequent legislation so that a modified system of bookkeeping was introduced, as was stated by the Senator from Maryland [Mr. LEE].

Now the Senator from Maryland comes forward and proposes that if the Government shall grant these men 43 days' vacation, those 43 days shall not be charged to the cost of the ships, but shall be put to the generosity of the Government, to the end that we may constantly know how much is the actual labor cost of the ships. I think there is a great deal of wisdom in the demand of the Senator from Maryland. It can do no harm to have it simply understood that if we work our men as many hours we can make ships as cheaply or more cheaply than they will be made in private yards. Then the question will be before the people whether they see fit, in their generosity or in their desire to furnish to other employers of labor an example of fair or even generous treatment—the question will be presented to the country, in dollars and cents, how much the Government has done in the way of generous treatment of its employees; and the question will still be before the country whether, charging up hour for hour, the Government can build ships as cheaply as they can be built in private yards, or whether it can build them cheaper, or whether it can build them at a certain advance in price. Whatever the fact is, it will be before the country. It occurs to me that just that kind of bookkeeping ought to be adopted. Then, if the laborer and the employee come here with further demands, the cold figures will be before Congress and the country as to just how much these demands cost the country.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. REED. I do.

Mr. BRANDEGEE. It occurred to me that, if this is a desirable thing to do, instead of making the accounting officers of the department keep their books in a certain way and practically represent the cost to be something different from what it actually was, would it not be an easier and simpler matter to provide that the department should certify to Congress or should make a report as to how much of the cost of the vessel was due to the provisions of this amendment giving the vacation to the employees?

Mr. REED. Well, Mr. President, that would be the inevitable result of the practical carrying out of the provisions of the amendment. The cost of labor in the aggregate cost of the vessel would necessarily be stated, but only that part would be charged to the vessel itself that was paid for the labor actually rendered. I do not think there would be any real difference.

Mr. BRANDEGEE. Mr. President, the only suggestion I intended to convey was that, as I read the amendment, which I took from the Secretary's desk, it seemed to me to provide that the loss in connection with the time of labor should not

be charged to the cost of the vessel. Now, it seems to me that it would be undesirable in official bookkeeping to say that what was cost should not be charged as cost if the same object could be achieved in some other way. I assume the object sought after is to find what part of the cost of the vessel is due to giving laborers time off, and that could be easily ascertained by having the department simply report to Congress that fact.

Mr. REED. Well, it seems to me that we come out substantially at the same point.

I want to offer one observation which I desire to make because of the remarks of the Senator from Ohio [Mr. HARDING]. The remarks of the Senator from Ohio were very clearly intended to convey the idea that this proposed holiday is being given to the men in order to secure their votes. Mr. President, I think that innuendo hardly does justice to the Senator from Ohio. A total of 29,000 men are to be affected. A very great number of them live in the District of Columbia, and can not vote at all. Those who are scattered at other points, I think an analysis would show, live in States where their vote is so infinitesimal in comparison with the population that it would not change the result in a congressional district in the United States. So there could be nothing in the Senator's innuendo because there are no facts back of it and no results to be accomplished by such a scheme as he intimates exists. No sane man would think of attempting to carry an election in that way.

But, in addition to that, I think it is hardly a worthy innuendo to throw out, that every time a man votes to ameliorate the condition of his fellow man he has a sinister and evil purpose; that it is his intention to buy that man's favor or corrupt that man's vote. I take it that the Senator from Ohio, who has always filled a high and honorable place in the councils of his State and who occupies a similarly dignified position in the councils of his party and his country in this body, always and at all times, according to the lights that God has given him, is casting his vote for the purpose of aiding the people of his country, and when he does so cast his vote I think that all his associates are willing to ascribe to him no other motive than that he has hoped to benefit his country and his fellow man.

No one would be so ungenerous as to say of and concerning him that he did not love his country, but that he wanted to get some votes; that he did not really vote his honest conviction, but that he desired to court the favor of electors; that he was not inspired by an honest desire to do the right thing because it was right, but that he only acted in response to a sordid, a selfish, or a contemptible motive. So, I think the Senator from Ohio ought not to insinuate that those who propose to give a holiday—perhaps even an overgenerous holiday—to men who stand at anvils within the clang of the hammer, who stand at forges within the blaze and the flame and the heat, of men who toil and sweat and labor amidst the grime and dirt, of men whose tired backs ache at night, of men who have some desire for a little recreation and pleasure in life—I think the Senator from Ohio ought not to ascribe to those who want to lighten that condition the vile, the evil, and the senseless purpose of trying to get votes from men a majority of whom do not even have the privilege of casting a vote.

Mr. HARDING. Mr. President, I do not care to make reply to the latter part of the speech of the Senator from Missouri. The Senator from Ohio will answer for his motives in any vote that he casts in the Senate; but I want the Senator from Missouri to answer me a question, which is pertinent to the main issue he has been discussing.

I am just as much interested as he is in the men who bend their backs to toil. I have bended my own back in my time, and I know the methods by which a man can ascend the scale, if you call it an ascending scale, from that of the employee to the employer, and I know something, if you please, about sane methods of business and employment.

If I understood the Senator from Nevada correctly, the chief reason for granting this great and generous gift, costing the Treasury of the United States a million and a half of dollars, is that it will add to the efficiency of the men employed in Government work. I am not prepared to dispute that statement. If it be true, then this money is well expended. If it be not true, then this money is inexcusably wasted.

Now, if it be true that the addition of 30 days' vacation will add to the efficiency of the workmen employed in Government shipyards and arsenals, then the Government, by the outlay of this million and a half of dollars, has added to the efficiency which it commands over and above that of the private employer. Then, if the argument holds, the Government, by this expenditure, has so enhanced its creative ability that it has the advantage over the private employer. Therefore it is very logical, to my mind, that this expenditure must be taken into account in reckoning the cost of production in a Government plant as compared with the cost of production in a private plant.

This is the question, Mr. President, I wish to present to the Senator from Missouri; and if it be not true that this efficiency is created by the vacation, then the expenditure will not have been well made.

Mr. REED. Mr. President, I shall answer the Senator with very great frankness.

If it be assumed that a 30 days' vacation being granted, the employee will do as much work in the 11 remaining months of the year as he would have done if he had been compelled to work the 12 months, then the granting of the vacation would not cost the Government any money in the aggregate, and therefore the laborer's annual wage ought to be added in as part of the cost. If we start with the assumption with which the Senator from Ohio started, which he based upon the statement of some one other than myself, then my answer is, answering for myself and not for that other, that the wages paid the man during the year, including therein his 43 days of vacation, are and ought to be legitimately charged to the cost of the ship, because the Government has lost nothing.

I am not of the opinion that the granting of 43 days' leave of absence does increase the efficiency of the man to the extent that he will fully make up the 43 days of absence. It may, in the aggregate of his life, increase his efficiency. It may, in the aggregate of his life, give a full return. It may lengthen the period of his life. It may give to the people a longer period of his service. In that way there may be a full compensation. But I doubt whether, taking any single year by itself, a man will do as much work in a year with 43 days' vacation as he will in a year where he only had 10 or 15 days' vacation.

The VICE PRESIDENT. The question is on the amendment of the Senator from Maryland [Mr. LEE] to the amendment of the Senator from Nevada [Mr. PITTMAN].

The amendment to the amendment was rejected.

Mr. CUMMINS. Mr. President, I offer the amendment which I send to the desk to the amendment proposed by the Senator from Nevada.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to add to the amendment the following proviso:

Provided, That not more than 30 days' leave with pay shall be allowed any such employee in any one year.

Mr. CUMMINS. Mr. President, just a word with regard to the proposal I have suggested.

I believe that the adoption of the amendment as proposed by the Senator from Nevada will be a very serious obstacle in the way of the enlargement of governmental activity. The Government can not pay greatly more than is paid by private enterprise and continue in the activities it has assumed. The people of the country will not tolerate a gross discrimination between the employees of the Government and the employees of private concerns.

I think no one can question my interest in labor, or my sympathy for the great movement that has accomplished so much for the toilers of the land. I not only think the amendment as it is proposed by the Senator from Nevada is a serious impediment in the way of governmental activity, but I believe that it will finally reflect unfavorably upon labor itself.

I believe in the establishment of a plant for the manufacture of armor plate; and we are about to pass a law authorizing such an enterprise. I believe that the Government should manufacture its own powder, and therefore its own nitric acid; and we are about to authorize, if we have not already authorized, the establishment of a manufacturing plant of that character—more than one, possibly. I believe that the Government ought to manufacture all its munitions of war and all its armament of every character. No one can tell how soon the day may come when the Government must extend its operations to other forms of business which we are now attempting to regulate and control. If the rule suggested in the amendment offered by the Senator from Nevada is to prevail in all governmental work, it will impose upon the people a burden which I do not believe they will be willing to bear.

One does not know, of course, just how much vacation or recreation any given man should have in a single year; but it seems to me that when we allow 30 days' leave of absence with pay we have done all that the laws of health and humanity can possibly require, and we have done a great deal more than is done for the millions and tens of millions of men and women who must labor throughout the year without vacations.

Then, again, while I do not know how those who are connected with labor feel with regard to this amendment, I venture to say that the more intelligent and farsighted among them would much rather have the amount added to their wages than to their leaves of absence. One can not tell how much it will cost, all told; but I think it was said a few moments ago that it would cost a million and a half dollars a year. If so, the extra 15 days will cost $500,000 a year. If it is true that if the amendment is adopted the employees of the navy yards and of the arsenals will have 60 days' leave without pay, it will, under the present extent of activity, involve us in an expenditure of a million dollars a year. Now, I should like to ask the laboring men of this country—and I have been on rather intimate terms with many of them—whether they would not rather have 30 days' leave of absence with pay and the remainder of the generosity, if you please, added to their wages.

How are their wages fixed? The Senator from Nevada knows. The law declares that the wages of men employed in the navy yards and in the arsenals and other plants of that kind shall be the same as the wages in the locality in which the plant is located. These wages are always low, always too low; and I for one would much rather give the laboring man an opportunity to earn enough to sustain himself and his family with 30 days' leave of absence in the year, than to continue him upon the inadequate wages which he now receives, and give 45 or 60 days' leave of absence.

It does a laboring man comparatively little good to give him an opportunity for a vacation unless you also give him an opportunity to enjoy the vacation. He must have a little surplus, accumulated from his wages, in order that the time of recreation can be of any great value to him.

Therefore for the double reason that this provision will be constantly presented to us, as we seek to expand the functions of the Government, as an obstacle or impediment in the way; and, second, because it must finally be reflected in the wages of the laboring men themselves, I hope that the amendment I have proposed will be adopted.

Mr. REED. Mr. President——

Mr. CUMMINS. I yield to the Senator from Missouri.

Mr. REED. I want to ask the Senator from Iowa if more than 30 days' leave of absence are given to any other class of governmental employees?

Mr. CUMMINS. I am sorry to say that more than 30 days are given to some of the Government employees; but the fact that we have done wrong, if we have done it at all, in one instance has not seemed to me to justify a false policy in another.

Mr. REED. Let me ask a further question. Is it the general rule to give more than 30 days in the Government employment?

Mr. CUMMINS. I have heard this afternoon what the rule is. I do not know. It is asserted here that a very large number of the Government employees have 60 days.

Mr. REED. I think there are some of them who do not get over 15 days, but I am not speaking by the record. Perhaps the Senator from Nevada can answer the question.

Mr. CUMMINS. The Senator from Utah, I believe, said a few moments ago that there were certain departments in which the employees had 30 days' leave of absence; then they have 15 days half holiday during the year, and added to that they have 30 days' sick leave, so that the accumulation of these leaves of absence makes 75 days.

Mr. REED. Of course we might extend it and cut off the other 290 days.

Mr. CUMMINS. Now, I do not believe that that is right. I think it is not necessary, to preserve a man or a woman in health and vigor, that he or she shall have 75 days of absence from work. I would much rather add it to the salaries of these people, and I believe they would much rather have it added to their wages than to extend their vacations.

Mr. GALLINGER. Mr. President——

Mr. CUMMINS. I yield to the Senator from New Hampshire.

Mr. GALLINGER. As to the matter of sick leave, I will suggest to the Senator from Iowa that they are allowed not exceeding 30 days. A great many of them take 15 or 20 days, and some of them do not take sick leave at all. I do not know what the average would be if it were estimated, but the law is that they shall have not exceeding 30 days.

Mr. CUMMINS. I was quite unfamiliar with the subject until it was explained by the Senator from Utah a few moments ago.

Mr. REED. Will the Senator permit me to ask the Senator from New Hampshire a question?

Mr. CUMMINS. Just a moment. I did not mean that the employees of the Government generally take 75 days out of the year and use it for their own purposes upon pay. I heard it for the first time this afternoon.

Mr. REED. I wish to ask the Senator from New Hampshire, who seems to be familiar with the question, if there is sick leave with pay not to exceed 15 days?

Mr. GALLINGER. Not to exceed 30 days.

Mr. REED. Suppose a man is not sick at all, is he allowed that time?

Mr. GALLINGER. He is not allowed it unless he feigns sickness and takes a portion of the time.

Mr. REED. Of course, if he feigns sickness, he would be subject to discharge.

Mr. GALLINGER. However, an employee has to have a medical certificate.

Mr. REED. I think we must assume that while there may be some abuses, as there are abuses in everything, speaking broadly, the man must be sick and prove he is sick if he gets his pay when he is absent.

Mr. GALLINGER. That is undoubtedly so.

Mr. REED. The provision, as I understand it, that we are now discussing is not the question of sick leave, it is a question of general leave of absence. I do not know what the figures show. I do not know what the health reports are, but I am curious to know if everybody in Government employment has been sick 15 days in the last year.

Mr. CUMMINS. I have no knowledge whatsoever. I was absolutely unacquainted with the whole subject until I heard it discussed this afternoon. I shall be very sorry to learn that any employees in the District secure false certificates of illness. That is simply a rumor that I know nothing about. But, after all, that has nothing to do with the merits of this particular proposition. It is a matter of good judgment among Senators as to how much time a workingman ought to have during the year in the way of vacation in order to preserve his health.

I do not profess to be an expert upon this matter, but if I know anything about the temper of the workingmen most of them would much rather have an hour off in a day than a month off in a year. They would rather have their hours of labor reduced than to be sent upon an imaginary vacation which they could not possibly enjoy, because, at least, most of them are not rich enough to surround themselves with the incidents of a vacation. I know that you will be conferring upon them a greater advantage, a greater blessing, if you will increase their wages. They want to earn more money, they are entitled to earn more money, and every hour that you permit them to enjoy the employment of the United States with pay and without work will in the end reduce their compensation, because there are forces stronger than any enactent of Congress which will finally determine what the Government of the United States will pay for the work it must do.

I believe the amendment that I have proposed is at once humane and reasonable, and that it will meet the approval of the great majority of those who labor with their hands.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa [Mr. CUMMINS] to the amendment of the Senator from Nevada [Mr. PITTMAN].

Mr. CUMMINS. Upon that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. VARDAMAN. May I ask to have the amendment to the amendment read?

Mr. GALLINGER. Let it be read.

The SECRETARY. It is proposed to add, at the end of the amendment proposed by the Senator from Nevada, the following proviso:

Provided, That not more than 30 days' leave with pay shall be allowed any such employee in any one year.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). In view of my pair with the senior Senator from Missouri [Mr. STONE], who is not present in the Chamber, I withhold my vote.

Mr. GALLINGER (when his name was called). I have a general pair with the senior Senator from New York [Mr. O'GORMAN], who is absent. For that reason I withhold my vote. If privileged to vote, I would vote "yea."

The roll call was concluded.

Mr. TILLMAN. I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. LEA] and vote "yea."

Mr. SIMMONS. I wish to inquire whether the Senator from Minnesota [Mr. CLAPP] has voted?

The VICE PRESIDENT. He has not.

Mr. SIMMONS. I transfer my pair with that Senator to the Senator from Nevada [Mr. NEWLANDS] and vote "yea."

Mr. GALLINGER. Since announcing my pair I have learned that I can transfer it to the junior Senator from Idaho [Mr. BRADY]. I do so, and I vote "yea."

Mr. WALSH. I transfer my pair with the Senator from Rhode Island [Mr. LIPPITT] to the Senator from Oklahoma [Mr. GORE] and vote "nay."

Mr. JOHNSON of Maine. I transfer my pair with the Senator from North Dakota [Mr. GRONNA] to the Senator from Ohio [Mr. POMERENE] and vote "yea."

Mr. REED. I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. CURTIS. I was requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Delaware [Mr. DU PONT] with the Senator from Kentucky [Mr. BECKHAM];

The Senator from New Mexico [Mr. FALL] with the Senator from West Virginia [Mr. CHILTON];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS]; and

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 52, nays 15, as follows:

YEAS—52.

Bankhead	Husting	Overman	Smoot
Brandegee	Johnson, Me.	Page	Sterling
Catron	Johnson, S. Dak.	Penrose	Stone
Chamberlain	Jones	Phelan	Taggart
Culberson	Kenyon	Poindexter	Thomas
Cummins	Kern	Reed	Tillman
Curtis	Lee, Md.	Shafroth	Townsend
Dillingham	Lippitt	Sherman	Underwood
Fletcher	Lodge	Simmons	Vardaman
Gallinger	McCumber	Smith, Ariz.	Wadsworth
Harding	Nelson	Smith, Ga.	Warren
Hardwick	Norris	Smith, Md.	Weeks
Hollis	Oliver	Smith, S. C.	Works

NAYS—15.

Ashurst	La Follette	Martine, N. J.	Thompson
Broussard	Lane	Pittman	Walsh
Hughes	Lewis	Sheppard	Williams
James	Martin, Va.	Swanson	

NOT VOTING—28.

Beckham	Clarke, Ark.	Hitchcock	Pomerene
Borah	Colt	Lea, Tenn.	Ransdell
Brady	du Pont	McLean	Robinson
Bryan	Fall	Myers	Saulsbury
Chilton	Goff	Newlands	Shields
Clapp	Gore	O'Gorman	Smith, Mich.
Clark, Wyo.	Gronna	Owen	Sutherland

So Mr. CUMMINS's amendment to Mr. PITTMAN's amendment was agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Nevada as amended.

Mr. BRANDEGEE. I should like to have the amendment as amended read in full.

The VICE PRESIDENT. It will be read.

The SECRETARY. On page 174, after the amendment heretofore agreed to at that place, after line 21, insert the following, which as amended will read:

That each and every employee of the navy yards, gun factories, naval stations, and arsenals of the United States Government is hereby granted 30 days' leave of absence each year, without forfeiture of pay during such leave: *Provided*, That it shall be lawful to allow pro rata leave only to those serving 12 consecutive months or more: *And provided further*, That in all cases the heads of divisions shall have discretion as to the time when the leave can best be allowed: *And provided further*, That not more than 30 days' leave with pay shall be allowed any such employee in any one year.

Mr. BRANDEGEE. Mr. President, I want to ask any Senator who has the knowledge if the proviso last adopted that no employee shall have more than 30 days' leave without pay would cut off the sick leave in any case, or if the sick leave was cut off whether the man would get any other leave or not?

Mr. SMOOT. I will say to the Senator that the employees who are affected by this amendment are not allowed sick leave under the present law. Therefore it would not have any effect whatever except——

Mr. VARDAMAN. I could not hear the Senator from Utah. I should like to have the Senator repeat his statement.

Mr. SMOOT. I said that the employees affected by the amendment were not allowed sick leave under the law to-day. Therefore the amendment offered by the Senator from Iowa would not interfere with them in any way.

Mr. PITTMAN. I hope that construction is true.

Mr. SMOOT. Does the Senator say they are allowed sick leave to-day?

Mr. PITTMAN. No; I know they are not allowed sick leave. Here is what I am getting at: In the hearings before the House committee it was testified, as I shall read. They were speaking of an employee being sick and they were speaking of the sick leave granted in the other departments, and it was testified that there was no sick leave granted in the departments which are referred to in this bill. Mr. Alifas said:

Yes; that applies to our 15 days now. A man will lose 8 or 10 days a year because he must be off on business or something like that, and when he reports sick those days lost are taken from his leave of absence, and if he has that much time taken off he has little leave left for a vacation.

Mr. SMOOT. That statement is absolutely true, Mr. President.

Mr. PITTMAN. All actual sick leave will be deducted from this leave of absence. They will have no vacation at all if they happen to be in bed for 30 days. They will be worse off than they are now.

Mr. SMOOT. No, Mr. President; to-day they are not allowed sick leave. If they are sick it is taken out of their 15 days' leave of absence; that is not the case with the other departments granting sick leave.

I will say in answer to the question asked by the Senator from Connecticut [Mr. BRANDEGEE] as to whether the amendment offered by the Senator from Iowa, and which was just adopted by the Senate could have any effect upon the employees as provided in the amendment, I said no as far as sick leave is concerned, because to-day they have no sick leave.

Mr. BRANDEGEE. Then is it correct, that if this amendment is adopted it will in no case curtail any leave that any man now has but will operate to give those who do not have any leave 30 days' leave.

Mr. SMOOT. That is the object of the amendment and that will be the result of it. There is no question but that the amendment now as amended will double the leave of absence that those employees have. They will have 30 days' leave of absence, and that is all they can have under the amendment, instead of 15 as at present.

Mr. CUMMINS. My purpose was to just double the leave of absence with pay as compared with the present law.

Mr. SMOOT. That is right.

Mr. CUMMINS. And that, I understood, was the original purpose of the Senator from Nevada.

Mr. PITTMAN. It was my purpose, and I only voted against the Senator's amendment because I doubted the construction which might be placed upon it. I do not think any department of the Government that had the construction of this act could question the position taken by the Senator from Iowa and the Senator from Utah and others, and with their construction that that is intended by the Senate, I am satisfied.

Mr. PHELAN. Mr. President, I voted for the amendment on the theory that the statements freely made here were correct, that under the present law 15 days were allowed, and that under the proposed amendment 30 days would be allowed, adding to which the holidays would make an aggregate of 45 days a year. The Senator from Utah said the department so informed him. So when the Senator from Iowa [Mr. CUMMINS] proposed an amendment making a fixed limit of 30 days, I was under the impression that I was voting to do away with the added 15 days which had been cumulated by reason of legal holidays and from other sources; all of which confirms me in my conviction that the amendment should have been committed, as I moved, to the committee, because we are voting without knowledge. I now move the commitment of the amendment as amended to the Committee on Naval Affairs, in order that the facts may be determined.

Mr. BRANDEGEE. Mr. President, before the amendment had been amended, I voted to commit it to the Committee on Naval Affairs, thinking that the committee could in a short time get it in proper shape and report it back, but I should hesitate to vote for another motion to commit the amendment, inasmuch as it has been now amended. I think sufficient attention has been drawn to it, and sufficient debate has been had upon the facts now before the Senate, so that the conference committee can make any correction in it that may be necessary. Therefore I can not support the second motion to commit the amendment.

The VICE PRESIDENT. The Senator from California [Mr. PHELAN] moves to refer the amendment as amended to the Committee on Naval Affairs.

The motion was rejected.

The VICE PRESIDENT. The question recurs on agreeing to the amendment as amended.

The amendment as amended was agreed to.

POST OFFICE APPROPRIATIONS—CONFERENCE REPORT (S. DOC. NO. 499).

Mr. BANKHEAD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the conference report on the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes.

Mr. BRANDEGEE. I understand that unanimous consent is asked.

The VICE PRESIDENT. Unanimous consent is asked for the present consideration of the conference report.

Mr. BRANDEGEE. Before giving unanimous consent, would the Senator from Alabama state whether the consideration of this conference report is likely to lead to extended debate?

Mr. BANKHEAD. I can not say as to that. I do not think, however, that it will. My idea was that if the Senate is not going to pass the naval appropriation bill this afternoon, we might dispose of this conference report. It is very important, indeed, that the conference report should be adopted as soon as possible, for I am informed by the Post Office Department that a number of things are occurring which appear to be violations of law, for the reason that the appropriation bill has not passed, those things not being covered perhaps by the joint resolution extending the appropriations.

Mr. SWANSON. Mr. President, I understand the conference report has not been printed.

Mr. BANKHEAD. Oh, yes; it has been printed. It was presented yesterday and was then printed.

Mr. SWANSON. I can not consent that the pending bill shall give way, and I hope the Senator will not insist on his request.

Mr. BANKHEAD. Does the Chair hold that it requires unanimous consent for the consideration of the conference report?

The VICE PRESIDENT. Oh, no. The Senator from Alabama can move to proceed to the consideration of the conference report.

Mr. BANKHEAD. Then, Mr. President, I move that the Senate proceed to the consideration of the conference report on the Post Office appropriation bill.

The VICE PRESIDENT. The question is on the motion of the Senator from Alabama.

The motion was agreed to; and Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes.

Mr. BANKHEAD. Mr. President, I wish briefly to state that the conferees have agreed upon this report, the House conferees concurring in nearly all of the amendments placed on the bill by the Senate. There are only one or two amendments agreed to in conference which at all affect the bill as it passed the Senate and went to conference.

It may be well enough to say, in this connection, that the provision of the bill which proposes to send to the Interstate Commerce Commission the question of railway mail pay was amended in conference. The bill as the Senate passed it required the Interstate Commerce Commission to investigate under the same rules and regulations under which they are required to investigate other questions submitted to them, notably the question of freight, passenger, and express rates. We had a conference with the Interstate Commerce Commission, and they advised that, in their opinion, it would be very difficult, if not impossible, for their commission to make a just determination of the question unless they were permitted to have the space system put into operation in such localities, or sections as might be determined upon as being necessary in order to get an actual test, an actual comparison, between the two systems. That is the only amendment of any importance at all which the conferees adopted which affects the provisions of the bill.

The conference report has been printed; every amendment and the reasons for the amendment are explained in the report. If Senators care to do so, they may examine the report, or if there are any questions which any Senator desires to ask the conferees in the way of explanation or as to any changes, I think some of us perhaps will be able to satisfy Senators as to the reasons and the necessity for such changes and of the improvements made by those changes.

That is all I care to say about the matter, unless there is some Senator who wishes to make some particular inquiry in reference to the conference report.

Mr. SMOOT. Mr. President, I should like to ask the Senator from Alabama what became of section 7 of the bill, known as the blue-tag provision?

Mr. BANKHEAD. Section 7 of the bill is retained practically with the amendment of the Senator from Wisconsin [Mr. LA FOLLETTE].

Mr. SMOOT. Mr. President, I ask the Secretary to read the amendment which was adopted by the conferees in lieu of section 7. It is amendment numbered 54.

Mr. HARDWICK. It is found on page 5 of the conference report.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: On page 31, line 19, in lieu of the matter inserted by said amendment, insert the following: "but no publication shall be sent by freight if such method of transportation results in unfair discrimination: *Provided*, That whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is unfairly discriminated against, he may apply to the Post Office Department for an opportunity to be heard; that upon such application being duly filed in writing, the owner of such publication shall have opportunity for a full and fair hearing before said department, and pending final determination no change shall be made in the method of transportation of such publication as ordered by the department. The testimony in any such hearing or proceedings shall be reduced to writing and filed in the Post Office Department prior to entering an order upon such hearing. That upon such hearing if the Post Office Department decides adversely to the contention of the publisher, such publisher shall have the right, within the period of 20 days after the date of the order of the Post Office Department made upon such hearing, to appeal to the United States court of appeals of the District of Columbia for a review of such order by said court of appeals, by filing in the court a written petition praying that the order of the Post Office Department be set aside. A copy of such petition shall be forthwith served upon the Post Office Department and thereupon the said department forthwith shall certify and file in the court a transcript of the record and testimony. Upon the filing of such transcript the court shall have jurisdiction to affirm, set aside, or modify the order of the department."

Mr. LA FOLLETTE. Mr. President, will the Senator permit the Secretary now to read section 7 as it was passed by the Senate, so that the Senate may observe the changes which have been made in the section by the conferees?

Mr. BANKHEAD. Certainly.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

SEC. 7. That so much of section 1 of the act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes, approved August 24, 1912, which provides that the Post Office Department shall not extend or enlarge its present policy of sending second-class matter by freight trains, is hereby repealed, but no publication shall be sent by freight if such method of transportation results in unfair discrimination or in the undue delay of the delivery of such publication at its destination: *Provided*, That whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is injured or discriminated against, he may apply to the Post Office Department for an opportunity to be heard; that upon such application being duly filed in writing the order of the Post Office Department as to the transportation of such publication by freight shall be suspended, and the owner of such publication shall have opportunity for a full and fair hearing before said department. The testimony in any such hearing or proceedings shall be reduced to writing and filed in the Post Office Department prior to entering an order upon such hearing. That upon such hearing, if the Post Office Department decides adversely to the contention of the publisher, such publisher shall have the right, within the period of 20 days after the date of the order of the Post Office Department made upon such hearing, to appeal to the United States court of appeals of the circuit within which such periodical is published for a review of such order by said court of appeals by filing in the court a written petition praying that the order of the Post Office Department be set aside. A copy of such petition shall be forthwith served upon the Post Office Department, and thereupon the said department forthwith shall certify and file in the court a transcript of the record and testimony. Upon the filing of such transcript the court shall have jurisdiction to affirm, set aside, or modify the order of the department.

The jurisdiction of the circuit court of appeals of the United States to affirm, set, aside, or modify such orders of the Post Office Department shall be exclusive.

Such proceedings in the circuit court of appeals shall be given precedence over other cases pending therein and shall be in every way expedited.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. ASHURST. Mr. President, I shall take but a moment in discussing the report of the conference committee on the disagreeing votes of the two Houses so far as it relates to section 7.

It would be profitless and idle now to review the history of the blue-tag controversy. While I did not vote for the amendments which were proposed to this section, preferring to indicate my entire disapprobation of the whole procedure, I nevertheless think that the amendment proposed by the Senator from Nebraska [Mr. NORRIS] and the amendment proposed by the Senator from Wisconsin [Mr. LA FOLLETTE] improved the situation very much, and I wish to express my deep regret that the conferees could not retain the Senate amendments.

I am not going to make any criticism of the conferees. First, it would not be parliamentary, and, second, I have been on conference committees myself, and I know how difficult it is sometimes to secure concurrence in the amendments of the Senate; but, Mr. President, I feel it to be my duty to point out that very little, if any, relief will come to a blue-tag publication under the law as it is now proposed by this conference report.

First, in the amendment proposed by the Senator from Nebraska [Mr. NORRIS] it was provided that if there were undue delay the publication should be relieved. The conferees have stricken out that provision in regard to undue delay.

Mr. HARDWICK. Mr. President, will the Senator yield to me just for a moment?

Mr. ASHURST. I yield to the Senator.

Mr. HARDWICK. The reason the conferees on the part of the Senate agreed to that change was that the House conferees and the Post Office Department contended with a good deal of force that most of the cases of undue delay brought to the notice of the department were caused by the delay of the publishers themselves, and that there was danger of the language being given that construction and thus operating entirely against the department and the Government. It was believed that the retention of the words "unfair discrimination" was all that was necessary in that connection. I merely suggest that for the consideration of the Senator, so that he will understand why we agreed to that change.

Mr. ASHURST. I thank the Senator for the suggestion. Secondly, a very important phrase has been omitted which I think should have been retained. On line 5, page 40 of the bill as it passed the Senate, it is provided, among other things, that if the owner of a blue-tag publication believed himself to be injured he should have the right of appeal. That language has been stricken out. I think that language should have remained, so that if the party believed he was injured he could then have had an opportunity to appeal.

Mr. HARDWICK. Mr. President, if the Senator will pardon me——

Mr. ASHURST. I yield.

Mr. HARDWICK. I know the Senator wants to know exactly what the conferees have done. We have preserved fully the right of appeal. We did not leave that language in, because it is not necessary. A man can appeal from a decision whether he thinks he is injured or for whatever reason seems to him good. In fact, we broadened the right of appeal, in my opinion, by leaving out that language.

Mr. ASHURST. The Senator is a very good lawyer, and I need not tell him that when this matter gets before the court—and it can only come before one court now—all this language in section 7, the Norris amendment and the La Follette amendment, will be construed in pari materia, and the court will render its decision having in view the mischief sought to be remedied and the end sought to be accomplished. I think it would have made the provision giving the relief much stronger had those words remained.

Mr. HARDWICK. I do not think so.

Mr. ASHURST. Next, I wish to call attention, Mr. President—and I think this is a very serious matter—to the fact that under the amendment proposed by the Senator from Wisconsin, I believe, when a publication was blue tagged and required to go by freight its publisher had 20 days within which to take his appeal, the district court was omitted, and the publisher could appeal to the circuit court of the circuit in which the publication was published. Now, we find that when a magazine or other publication is blue tagged, the blue-tag order stands against it until the court passes upon it, thus throwing the burden on the publisher.

Mr. HARDWICK. Mr. President, if the Senator will pardon me, the conferees do not so understand this language, and they were assured by the Post Office Department that it would not give it that construction. The language in question leaves them this way:

> And pending final determination no change shall be made in the method of transportation of such publication as ordered by the department.

Mr. ASHURST. That is, if the department orders any publication blue tagged, no change shall be made.

Mr. HARDWICK. No change in the order of the department shall be made pending final determination.

Mr. ASHURST. If that be the construction which the department agrees to put upon it, I would withdraw that criticism.

Mr. HARDWICK. I thought the Senator would.

Mr. ASHURST. But I think it would have been more definitely and happily expressed had it remained in the original form.

Mr. HARDWICK. I am inclined to agree with the Senator there; but we agreed to make this change because the department officials stated that was their construction of it.

Mr. ASHURST. Now, Mr. President, one other point. A blue-tagged publication would only have 20 days in which to appeal. Let us assume that it is published in Walla Walla, Wash.; let us assume it is published in Carson City, Nev.; in Phoenix, Ariz.; in San Francisco, in Denver, or in Austin, Tex. That blue-tagged publication has 20 days in which to take its appeal, and, instead of being permitted to take its appeal to the circuit court of the circuit in which the publication is issued, it is relegated to Washington. The Court of Appeals of the District of Columbia is given original and exclusive jurisdiction, and there is no appeal beyond that.

Mr. HARDWICK. Mr. President, will the Senator yield again?

Mr. ASHURST. Certainly.

Mr. HARDWICK. The publisher of the magazine has to come to Washington to argue out the matter before the Post Office Department. The Post Office Department of the Government has a considerable interest in this matter. The Government might have a world of these cases. It could not send lawyers all over the country to every different circuit in the United States. These other people all have to come here anyhow to do it, and it looks like it is just and fair to everybody to have it done here.

Mr. ASHURST. Why, in every State in the Union the United States has a district attorney, and sometimes a State is divided into more than one district. The result will be that this publisher will be obliged to hire a Washington lawyer in every instance.

Mr. HARDWICK. If the Senator will pardon me again——

Mr. ASHURST. I yield.

Mr. HARDWICK. The ordinary district attorney would not know a thing in the world about this sort of a case. The Post Office Department has to have its experts, men who know the postal laws and one thing and another, to represent it in these matters, just as the publishers will; and I imagine the personnel of the lawyers will be pretty much the same, no matter where the cases are tried. There will be a class of lawyers who will know this particular, specific business both for the Government and for the publishers, so there is no hardship in just consolidating it all right here. They have come to Washington anyhow to be heard before the department and to have the decision made here before the department, and we say that in 20 days they may appeal to the court here.

Mr. ASHURST. I rose and premised my remarks by saying I did not intend to make a protracted discussion, and I am not going to be carping in my criticism or anything of that sort. I do not intend to be. In fact, I appreciate the difficulty the conferees had, and I wish to have them know it. Yet I do think, Mr. President, that under ordinary conditions, in the case of a publication issued, we will say, in the far West, in the South, or in any part of our country, where a controversy arises between that publisher and the Government of the United States, it is not fair to the publisher, it is not fair under our polity and scheme of laws and government, to relegate him to the court which sits here, and only here. He should have resort and recourse at least to the circuit court of the district in which his publication is published. Had I my way I would have let him have resort to the district court of his district, because it is a principle of our institutions that a man shall have resort and recourse to the nearest court where business is being transacted.

That is about all I have to say. I am sure I tired the Senate in June in discussing this subject. The situation is somewhat improved, but it would have been infinitely more improved had the two amendments been agreed to—the one proposed by the Senator from Nebraska [Mr. NORRIS] and the one proposed by the Senator from Wisconsin [Mr. LA FOLLETTE].

I hope, after this discussion, if the conference report should be rejected, that the conferees will make an additional effort—they have already made a noble and earnest effort—to try to secure from the House conferees at least the right to let the publisher have recourse and resort to the circuit court of the circuit in which he lives.

Mr. BANKHEAD. Mr. President, in reply to the Senator from Arizona, I desire to say that every Senator on the floor knows something of the difficulties confronting a conference committee. We were opposed, and strongly opposed, by the House conferees in a number of these items, and particularly in this one. Not only were the House conferees there armed with every argument that could be made, but they had the unqualified support of the Post Office Department; so that we were up against two difficulties instead of one.

The conferees on the part of the Senate did the very best they could to stand by the action of the Senate in every particular. We felt that to be our duty, and we labored to that end for days and days; but we can not forget that the business of a conference is to compromise the differences between the two bodies, and when the Senate can not have its way all the time we must necessarily yield on some of the minor questions,

at least, some of the differences that do not go to the very vitals of the bill and the questions in dispute.

All that we could do we have done. We labored for days and days to stand by and write into the statutes what we conceived to be the will of the Senate. Out of 63 amendments placed on the bill by the Senate, we only receded from 3. It is true that some of the other amendments were agreed to with amendments.

I do not say that we have done as well, perhaps, as some others with more experience and greater influence might have done and who are more persuasive in their manner than we were, because that is one of the essentials in a conference committee, to persuade the other fellow to agree with you. I do not betray any secrets of the conference when I say that we were up against what I believed then to be a very contrary set of conferees. [Laughter.] It may be, Mr. President, that they had the same opinion of the Senate conferees. They were continually complaining all along, "We are conceding everything, and you are giving us nothing." That is not true, however, because the concessions were of a minor character, in the main.

We have done our best, and I hope the Senate will adopt the conference report.

Mr. JONES. Mr. President, I should like to ask the Senator a question.

Mr. BANKHEAD. I yield to the Senator from Washington.

Mr. JONES. I understood the Senator from Georgia [Mr. HARDWICK] a few moments ago to say that the department construed the provision with reference to section 7 as not continuing in effect the order of which the publisher would complain until final determination by the court.

Mr. BANKHEAD. That is the way they construe it.

Mr. JONES. I do not understand how in the world they can give any such construction as that to it.

Mr. BANKHEAD. That matter was gone over several times and rewritten more than once, and that was the construction placed upon it.

Mr. JONES. I want to ask the Senator about that a little. The first part of this provision is:

> But no publication shall be sent by freight if such method of transportation results in unfair discrimination.

The Post Office Department, as I understand, make a ruling requiring these publications to go by freight if they want them to go that way. They make the order, and the publisher has to comply with it. If he thinks that that order works unfair discrimination against him, then he makes an appeal. He applies to the Post Office Department for an opportunity to be heard, but the order directing him to ship his publication by freight has been made. It is in effect.

Mr. HARDWICK. It does not go into effect, however. That is where I take issue with the Senator. The department says it does not go into effect. That is the very vital part of the contention.

Mr. JONES. There is nothing here to say it does not go into effect.

Mr. HARDWICK. Well, it does not go into effect.

Mr. JONES. It says:

> Whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is unfairly discriminated against, he may apply to the Post Office Department for an opportunity to be heard.

There is nothing there to say that the order is held up if he makes this application.

> That upon such application being duly filed in writing, the owner of such publication shall have opportunity for a full and fair hearing before said department, and pending final determination no change shall be made in the method of transportation of such publication as ordered by the department.

Mr. HARDWICK. That is it—no change of the character ordered by the department.

Mr. JONES. The department has ordered it to be sent by freight.

Mr. HARDWICK. I understand; but they do not make the change pending final determination.

Mr. JONES. They do not make the change as ordered by the department.

Mr. HARDWICK. That is right.

Mr. JONES. They do not change it from sending it by freight.

Mr. HARDWICK. No. Of course, I think myself the language is not as clear as it might be.

Mr. JONES. I do not see how you can make any other construction of it, so far as that is concerned. The present department officials may construe it in that way, but if you get another department official in office he will very likely construe it as the language reads here. I think it is very clear what the department will do when the time comes to construe it.

Mr. HARDWICK. I will say this to the Senator, because I do not want any misunderstanding about that, either now or in the future: The department contend, and did strenuously contend before the conferees, that exactly what I have said is the construction that they propose to give to this language, and that that is exactly what it means; in other words, that pending the appeal, pending the hearing, first, before the department, and pending the final decision of the court, this matter was not to be blue tagged. That is what they say. They gave us that assurance. Now, I admit that the language is capable of the construction contended for by the Senator from Washington.

Mr. JONES. Who gave the assurance on behalf of the department?

Mr. HARDWICK. Mr. Stewart, the special officer for the department, who was there by instructions of the Postmaster General to represent him in this matter. There can be no possibility of a misunderstanding about that. We were assured, before we ever appealed to them, that the department so construed it. I brought it up, not once but thrice, and asked that question, because I pointed out to Mr. Stewart and to the House conferees that the language was capable of the very construction that is contended for by the Senator from Washington and the Senator from Arizona. The Senate conferees were assured that while that might be true that was not what they meant at all, and there would be no such construction as that given to it.

Let me say one thing further before I take my seat. There has been no substantial change made—accepting the assurances of the department in regard to that language, and it is capable of that construction—in this amendment, except one, according to my view of it, and that was requiring these people to come to the Court of Appeals of the District of Columbia. I think that is fully justified when you consider that the department may be vexed with many of these cases from all over the country, and when you consider that the interests of the Government ought to be promoted and protected about this sort of matter, and that these people have to come here anyhow to contest the orders originally before the department.

That is all I have to say.

Mr. SMOOT. Mr. President, I had hoped that the Senate conferees could retain section 7 in the bill, together with the two amendments that were adopted by the Senate. I believe the language of the amendment that was adopted by the Senate can not be misconstrued, nor do I believe that the language adopted by the conferees can be misconstrued, notwithstanding the statement made by the Senator from Georgia [Mr. HARDWICK].

The amendment adopted by the Senate provides:

> That whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is injured or discriminated against he may apply to the Post Office Department for an opportunity to be heard; that upon such application being duly filed in writing the order of the Post Office Department as to the transportation of such publication by freight shall be suspended and the owner of such publication shall have opportunity for a full and fair hearing before said department.

Now, the crux of this whole change lies in the provision as agreed to by the conferees. The conferees provide the following:

> But no publication shall be sent by freight if such method of transportation results in unfair discrimination: *Provided*, That whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is unfairly discriminated against he may apply to the Post Office Department for an opportunity to be heard; that upon such application being duly filed in writing the owner of such publication shall have opportunity for a full and fair hearing before said department.

Now, mark these words:

> And pending final determination no change shall be made in the method of transportation of such publication as ordered by the department.

Mr. President, I can conceive of only one construction of that language. In other words, the Senate amendment provided that upon the application "being duly filed in writing, the order of the Post Office Department as to the transportation of such publication by freight shall be suspended." The conferees provide that "pending final determination no change shall be made in the method of transportation of such publication as ordered by the department."

Mr. HARDWICK. Mr. President, let me ask the Senator just one question right there.

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Georgia?

Mr. SMOOT. Certainly.

Mr. HARDWICK. Suppose there was a comma after the word "publication"?

Mr. SMOOT. I hardly think it would make any difference.

Mr. HARDWICK. It might make a very great difference; and my recollection is that there was such a comma there.

Mr. SMOOT. Well, it might; but I do not believe that even were the comma there——

Mr. HARDWICK. I just suggest that idea because it conveys the construction that they sought to give to us, if the Senator will keep that in mind.

Mr. SMOOT. I might say that if Gen. Stewart were the party to decide this question finally, perhaps we could rely upon the promise that was made by him to the conferees; but Mr. Stewart is not going to be the final arbiter of this question.

Mr. HARDWICK. If the Senator will pardon me, two mail divisions already have this blue tag without any appeal except the right of appeal if the property is confiscated under the Constitution. These people would not be any worse off in the two divisions than they are in the other two if the Senator were right in his contention.

Mr. SMOOT. The Senator is perfectly right in that statement; I agree with him absolutely. But we are trying to correct what is considered by the publishers to be an unjust discrimination against their publications. I believe that the measure ought to be such that there can be no misunderstanding. I want to say frankly to the Senator that I do not believe there can be any misunderstanding of the language as the conferees have adopted it, and that it means this, supposing there is a monthly magazine published in San Francisco and the Post Office Department orders that that magazine shall go by freight and the publishers of the magazine make a protest to the Post Office Department, if the amendment as adopted by the Senate had been in the conference report and agreed to by the conferees then the order that the magazine should go by freight would be suspended and it would be carried as other magazines are carried until there was a final determination of it. But with the wording that is provided by the conference report the publisher can make a protest and the protest will do him no good whatever until the final determination is made, and it may be one year or it may be two years before the final decision is reached. In the meantime the publisher may be ruined financially, his magazine may be of no use whatever to the subscribers, whom perhaps it had taken him years and years to obtain.

Mr. GALLINGER. If the Senator will permit me, what reason has the Senator for saying that it might take a year or two to decide this matter? As I read this provision, these cases are given precedence in the court.

Mr. SMOOT. But the way it has been finally agreed upon—and I have no doubt the conference report will be adopted—he can not go to the circuit court; he has got to come to Washington to the district court.

Mr. GALLINGER. That is true.

Mr. SMOOT. To do that will place him at an enormous expense of traveling across the country.

Mr. GALLINGER. I agree to the proposition that that would seem to be a hardship.

Mr. SMOOT. I consider that to be one of the greatest hardships. I can not see why he should not have the right to go into the circuit court in the State in which he lives and have the matter decided there. The United States would be at no extra expense; they have United States attorneys in every district, and the publisher could go to the court at home at very little expense, and under that condition I do not believe it would take two years to reach a final decision.

But, Mr. President, when you stop to think that a small publisher would have to make the journey; that he would have to stop at a hotel; that he would be to the expense of railroad transportation both across the country to Washington and return, we must admit there are not many of them who could afford to do it. They would have to either borrow the money or they would have to wait until they got relief in some other way in order to come to Washington to see if relief could be granted them by the court here in the District of Columbia.

Mr. GALLINGER. Is it not true that he has to come here and make his complaint before the Post Office Department before it reaches the court?

Mr. SMOOT. No; not necessarily would he have to do so. He could present his complaint by mail to an attorney here in Washington. The attorney could present his whole case, having all the facts in writing, and the attorney could handle it without the publisher coming here, just as attorneys handle cases affecting the public lands.

Mr. GALLINGER. And pensions.

Mr. SMOOT. Or pensions or any other matter that comes before the different departments of the Government.

But I do believe this is a hardship upon the small publisher, and I was in hopes to see the provision as it was passed by the Senate adopted. I am not finding fault with the Senate conferees. I have been on too many conferences to say that the conferees of either House can have their own way, but it seems to me that after what was said by Gen. Stewart, and the construction that he put upon this language, the provision adopted by the conferees ought to have been made so plain that there could be no question about it.

In my opinion it is plain. I believe whenever it is construed it will mean that if the Postmaster General orders a publication in California to go by freight, and the editor of that publication protests and wants it to go by mail, and presents his case, the change can not be made, under this provision, until it is finally determined either at the Post Office Department by presenting the case there or by taking it into court, and that only in the court of the District of Columbia.

Mr. STERLING. Mr. President——

Mr. SMOOT. I yield to the Senator from South Dakota.

Mr. STERLING. I confess I can not quite, under the reading of this provision, appreciate the objection made by the Senator from Utah. His complaint is that upon the application being made by a party feeling himself aggrieved by an order compelling him to ship second-class mail matter by freight the order will not be suspended pending the hearing.

Mr. SMOOT. That is the Senate amendment, and I have no objection to it. But the conference report provides pending final determination. What is final determination? Final determination is either a decision by the Postmaster General or the decision of the court, as provided in the amendment. It reads:

> And pending final determination no change shall be made in the method of transportation of such publication as ordered by the department.

That is the conference report. The bill, as amended in the Senate, provided—

> That upon such application being duly filed in writing, the order of the Post Office Department as to the transportation of such publication by freight shall be suspended, and the owner of such publication shall have opportunity for a full and fair hearing before said department.

Mr. STERLING. Was not that provision agreed upon by the conferees?

Mr. SMOOT. No; that has been stricken out, and the provision that I read has been inserted.

Mr. GALLINGER. I will ask the Senator from Utah this question: If the provision of the Senate had remained in, would it not necessarily follow that the Postmaster General would have been compelled to send all the publications by fast mail?

Mr. SMOOT. Not necessarily, Mr. President.

Mr. GALLINGER. Every publisher whose publication was being sent by freight would have entered a protest. That would have been held up, and as a consequence the effort of the Postmaster General to minimize the cost of transmitting these publications would have been absolutely nullified, in my judgment, pending the final determination which, as the Senator says, might be a year or two years in each case.

Mr. SMOOT. No; I want to call the Senator's attention to a fact to show that such would not be the case. As to the publications that have their great circulation within a radius, say, of 100 or 200 miles, the publishers never object to their publications going by freight. They never make a protest, but it is the magazines that have to travel 1,500 miles or 2,000 miles.

Mr. GALLINGER. Precisely; and the short carriage is very inconsequential as compared to those that go 1,500 miles, some of which have an immense circulation.

Mr. SMOOT. Mr. President, the bulk of the magazines that have a great circulation in this country circulate in a radius of a few hundred miles. Of course, many of them go farther, and they could be separated. For instance, take the Youth's Companion. That goes all over the United States, but the bulk of the copies of the Youth's Companion are distributed in New York and Massachusetts. Barring, I suppose, Illinois, the great bulk of them would be distributed within a short radius.

Mr. GALLINGER. Would the Senator have them divided, and a portion of them go by freight and a portion by fast mail?

Mr. SMOOT. I think it could be done.

Mr. GALLINGER. I do not see how they could possibly do it.

Mr. SMOOT. This is the way it could be done: For instance, for all subscribers, we will say, in the State of Utah the publication could be shipped in bulk to that State and there distributed. Within a few hundred miles it could be shipped by freight in just the same way and distributed, but Utah is 2,500 miles distant, and that is too long a distance to send it by freight.

Mr. GALLINGER. There might be 50 post offices to which it goes, and they would have to count them all up, and I do not see how it could very well be done.

Mr. SMITH of Georgia. Mr. President, will the Senator yield?

Mr. SMOOT. I yield.

Mr. SMITH of Georgia. Is it not true that the average distance a magazine goes is over 600 miles?

Mr. SMOOT. That is, taking all of the magazines of the country together.

Mr. SMITH of Georgia. Yes; taking the magazine service.

Mr. SMOOT. Taking in farmers' papers and everything else, I apprehend that is correct.

Mr. SMITH of Georgia. So that the average cost to the Government for forwarding magazines is about six times as much as the magazine pays the Post Office Department.

Mr. SMOOT. The Post Office Department report states that it is nearly five times—4.81 times, or something like that, as I remember.

Mr. HARDWICK. It is over five times as much without the cost of handling. When you add the cost of handling it runs to 8.24 cents.

Mr. SMOOT. That cost must be taken into consideration whether the publication goes by freight or by mail.

Mr. HARDWICK. That is true.

Mr. SMOOT. The handling of it, of course, in most cases is about the same.

Mr. SMITH of Georgia. Is the Senator sure that the near-by service is not frequently rendered by mail cars?

Mr. SMOOT. I said it was. That is what I said to the Senator in answer to his charge that all publishers would protest against their publications going by freight. They are not protesting to-day.

Mr. SMITH of Georgia. Is it not true, then, that we must do with these magazines one of two things, when we give them a long haul which costs the Government such an enormous sum—either make them go by freight or charge them something like what they cost the public?

Mr. SMOOT. I will say to the Senator that would be the business way of doing, but neither the amendment adopted by the conferees nor the amendment adopted by the Senate would reach that question at all.

Mr. GALLINGER. Mr. President, if there is one thing that has become tedious in our legislation it is this blue-tag business. There is only one remedy for it, in my judgment, and that requires a degree of courage on the part of Congress that it has failed to display up to the present time. The truth is these publications ought to be charged a fair rate of postage, which ought to be ascertained by some careful investigation, and then they ought to be sent in some manner applying equally to all; but for some inscrutable reason Congress has not been willing to do that.

Mr. SMITH of Georgia. If the Senator will allow me, when we had this subject up two or three years ago the Senate amended the blue-tag provision so as to permit them, if they wanted to go by fast mail, to pay 2 cents per pound, but they were not willing even to do that, and they got the provision stricken out by the House conferees.

Mr. GALLINGER. And even if they had agreed to that, the publications would then have gone through the mails for less than one-half the cost to the Government.

Mr. SMITH of Georgia. But they were not willing even to do that.

Mr. GALLINGER. No; they were not willing to do that.

Now, I hope, Mr. President, that we will get rid of this blue-tag controversy some time by the Congress of the United States having the courage to do exact justice to these publications, charging a fair rate of postage to transmit them through the mails, the rate to apply to one equally with the other. Until Congress does that, we will have this everlasting controversy about the blue-tag system; we will have contests before the Postmaster General and before the courts of the country, and no conclusion will be reached that will be satisfactory to anybody, unless it be to the publishers who are getting their publications sent through the mails at from one-fourth to one-fifth what the Government is paying to transmit them.

I want to go on record, Mr. President—and I am only one Senator—as being ready to vote at any time for a rate of postage on these publications which will be fair to the publishers and fair to the Government, and which will take out of our legislation this everlasting controversy about the blue-tag system and the question of sending these publications by fast mail or freight.

Mr. NORRIS. Mr. President——

Mr. GALLINGER. I yield to the Senator.

Mr. NORRIS. I am very much impressed with what the Senator said about the necessity for some legislation in regard to these publications, and it has just occurred to me—I have not looked it over with that in view, but perhaps the Senator can give me the information—that the reference to the Interstate Commerce Commission of the question of railway mail pay may be broad enough so that the commission will have power to report what would be a fair compensation for the transportation of second-class matter.

Mr. GALLINGER. Without being able to give a legal opinion that would be worth anything, for I am not a lawyer, I would say that I think that that is the tribunal that ought to be required to investigate this matter and determine it.

Mr. NORRIS. Probably the Senator did not quite grasp the question I asked. I meant to ask the Senator whether from his examination of this conference report he considers the language referring the matter of mail pay and so forth, to the Interstate Commerce Commission sufficiently broad so that the commission could ascertain and report to Congress what the rate ought to be for magazines and like publications?

Mr. GALLINGER. In reply to the Senator from Nebraska, I will say frankly that I have not examined it critically enough to be able to answer that question. I hope it is broad enough and that the matter will be determined.

Mr. NORRIS. While we are referring the question of mail pay to the Interstate Commerce Commission it seems to me that it would be wise to include this matter.

Mr. GALLINGER. I think so, too.

Mr. SMITH of Georgia. Mr. President, if the Senator will yield, I served on the Post Office Committee, and took a great deal of interest four years ago in the investigation of the cost to the Government of forwarding these magazines and also I investigated blue-tag transportation. There was a Republican Postmaster General at that time, and everybody was knocking him. I concluded that he was doing his duty about this matter and seeking properly to save expense.

There is no trouble about our ascertaining what these publications cost the Government. There is not a particle of trouble about that, and we do not need the aid of the Interstate Commerce Commission to find out what they cost us. We know what the magazines weigh; we know what the average haul is; and we know what our average payment to the railroad companies is per pound per mile, and the Post Office Department, without the help of anybody, just as easily as the Interstate Commerce Commission, can sit down, when they know what the railroads are paid per mile for hauling, and work out for us in a very short time a statement of what the average cost is of hauling these magazines.

Mr. NORRIS. Mr. President, I should like to ask the Senator from Georgia a question. The average length of a haul, it seems to me, is not the proper criterion to determine the matter, because, as I understand—and if I am wrong the Senator will be able to correct me—under the present rate some of these publications are sent by the publishers short distances by express and freight. Am I not right in that?

Mr. SMITH of Georgia. Yes.

Mr. NORRIS. That being true, does it not follow that any system must necessarily take distance into consideration? In other words, we ought to have a zone system.

Mr. SMITH of Georgia. That is a question for us to determine, and we do not need the Interstate Commerce Commission for that. We know what it costs to handle the publications.

There are two elements of expense to the Government in transporting second-class matter; one is handling, and the other is hauling. Weight and distance fix the cost of the haul. It is perfectly easy for the department to furnish the committee figures showing with substantial accuracy the cost of the handling and the cost per hundred miles of haul; and if we are willing to charge the magazines substantially what it costs the Government to transmit them through the mails, it is for Congress to determine whether it will give them average rates on an average haul, adding the cost of handling, or whether it shall be so much for a haul of a hundred miles, so much for 200 miles, so much for 500 miles, and so on, dividing it into zones. We do not need the Interstate Commerce Commission to help us; we do not need anybody to help us, except to make up our minds that we have the courage to face the magazine owners and make them pay something like the cost the carriage of their publications places upon the Government. The trouble has been the fear of criticism from magazine owners if we placed a charge somewhat in accord with the cost to the Post Office Department.

Mr. GALLINGER. Mr. President, I rose simply to put on record——

Mr. SMITH of Georgia. I am sorry the Senator from Arizona is impatient for a vote. When those of us who have something to say get through, there will be an opportunity.

Mr. SMITH of Arizona. Mr. President, since the Senator has mentioned my name——

Mr. GALLINGER. Mr. President, I appeal to the Chair that I have the floor.

The VICE PRESIDENT. The Senator from New Hampshire has the floor.

Mr. GALLINGER. I rose simply for the purpose of putting on record my views on this subject. I have no concealments about it. I have no fear in my mind or heart of what the magazines may do to me. They have done their worst already on more than one occasion, and I have survived it.

I simply want to say that when the Congress of the United States get to a point where they have the courage to legislate on this subject as they ought to legislate on it, we will get rid of this blue-tag controversy. We will be charging these magazines relatively what they ought to pay, and we will have them all placed upon the same basis of equal and exact justice to them and of some degree of justice to the Government of the United States.

That is all I care to say.

Mr. BANKHEAD. Mr. President, I move the adoption of the conference report.

Mr. NORRIS. Mr. President, I should like to ask the Senator from Alabama about Senate amendment No. 64. It has not been discussed at all. To my mind it is one of the very important amendments that the Senate put on this bill. I notice, from the report, that our conferees have receded from this amendment.

Mr. BANKHEAD. Mr. President, the conferees struck out that provision because we felt that second-class matter had been extended just as far as we could afford to extend it, or as far as it ought to be extended, unless there was some investigation made somewhere to ascertain how much more we were extending it. We had no information on the subject as to the amount, as to the weight, as to the publication, or anything else; and we thought it was proper to wait at least for another Congress in order to take up that question, inasmuch as we were having so much trouble already with the blue-tag business.

Mr. NORRIS. Mr. President, this only emphasizes, perhaps, the necessity of some legislation along the line suggested by the Senator from New Hampshire and the Senator from Georgia. In order, however, that the Senate may have in mind this particular amendment, I want to read it. It is very brief. It seems to me it is one that is important, and, regardless of what effect it has on the Post Office Department, it is one that is for the benefit of all the people, and ought to be put in the law. It reads as follows, after the introductory part:

> All periodical publications issued from a known place of publication at stated intervals as frequently as four times a year by State departments of agriculture and of labor and industry and of State boards or departments charged with the enforcement of laws regulating the distribution and sale of food, poultry, dairy, and drug products, or any of these, shall be admitted to the mails as second-class mail matter: *Provided*, That such matter shall be published only for the purpose of furthering the objects of such departments: *Provided further*, That such publications shall not contain any advertising matter of any kind.

Mr. President, it seems to me that there could be no possible objection to sending this kind of matter through the mails at second-class rates, with the one exception—and I contend that where it is for the benefit of all the people, as this is, that objection has no merit—that it will perhaps increase the deficit of the Post Office Department. Let it be emphasized and increased, if necessary, by the instrumentalities named in that amendment. While we are sending newspapers and magazines through the mails ostensibly for the benefit of the people—and I concede that there is something in that argument; I am in favor of being liberal with them—but while they carry mostly advertisements and other things out of which the people who send them at this reduced rate make large profits, we are compelling our State boards of agriculture and of labor and the departments engaged in sending out literature in regard to food and drugs and the health of the people generally to pay a higher rate of postage than those publications, even though there is not any advertising in it and no profit in it for anybody. They are sent out for the benefit of the people themselves. If there is any class of publications that ought to go free, that is the class, it seems to me, that ought to be included, at least.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

NAVAL APPROPRIATIONS.

Mr. SWANSON. I move that the Senate resume the consideration of House bill 15947, the naval appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the concurrent resolution (S. Con. Res. 12) requesting the President of the United States to designate a day on which funds may be raised for the relief of the Armenians.

The message also announced that the House had passed a bill (H. R. 17053) making additional appropriations for the Public Health Service for the fiscal year 1917, in which it requested the concurrence of the Senate.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, requests a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LEVER, Mr. LEE, Mr. RUBEY, Mr. HAUGEN, and Mr. MCLAUGHLIN managers at the conference on the part of the House.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes.

The message further returned to the Senate in compliance with its request the message announcing the agreement to the conference report on the bill (S. 5425) to standardize lime barrels.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

S. 35. An act to authorize the Secretary of the Interior to issue patents for certain lands to the town of Myton, Utah;

S. 36. An act to authorize the Secretary of the Interior to issue patents for certain lands to the town of Duchesne, Utah.

H. R. 6057. An act to amend section 14 of the reclamation extension act, approved August 13, 1914;

H. R. 11262. An act for the relief of Mrs. C. D. Corbin;

H. R. 11261. An act for the relief of Mary S. Corbin;

S. J. Res. 60. Joint resolution creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee; and

S. J. Res. 150. Joint resolution to authorize the Secretary of the Treasury to accept from the city of Pittsburgh certain lands in exchange for other lands of equal area.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a telegram in the nature of a memorial from F. M. Prince, president of the Clearing House Association of Minneapolis, Minn., remonstrating against a tax on bankers, which was referred to the Committee on Finance.

Mr. TAGGART presented petitions of Rich Mountain Post No. 42, Grand Army of the Republic, of Lebanon, and of sundry citizens of Redkey, in the State of Indiana, praying for the passage of the so-called Ashbrook Civil War widows' pension bill, which were ordered to lie on the table.

Mr. TOWNSEND presented a memorial of sundry citizens of Muskegon, Mich., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Ludington, Mich., remonstrating against any appropriation to defray the expenses of entertaining delegates to the national convention of the Anti-Saloon League, which was referred to the Committee on Appropriations.

Mr. OLIVER presented petitions of sundry citizens of Reading, Pa., praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of St. Clair, Pa., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which was referred to the Committee on the Judiciary.

Mr. PHELAN presented a memorial of the Board of Supervisors of Kings County, Cal., remonstrating against a Federal inheritance tax, which was referred to the Committee on Finance.

Mr. THOMPSON presented petitions of Jewell Post, No. 3, Department of Kansas, Grand Army of the Republic, of Pleasanton, and of sundry citizens of Onaga, in the State of Kansas, praying for the passage of the so-called Ashbrook widows' pension bill, which were ordered to lie on the table.

He also presented a petition of the congregation of the Brethern Church, of McPherson, Kans., praying for the enactment of legislation to prohibit the interstate transmission of race gambling odds and bets, which was referred to the Committee on Post Offices and Post Roads.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MARTINE of New Jersey:

A bill (S. 6666) to carry out the findings of the Court of Claims in the case of John R. McGinness; to the Committee on Claims.

By Mr. SMITH of Maryland:

A bill (S. 6667) to incorporate the American Nurses' Association; to the Committee on the District of Columbia.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. WORKS submitted an amendment authorizing the Commissioners of the District of Columbia to convey by good and sufficient deed of conveyance to the Government of the United States all property of the District of Columbia of every kind and nature, real, personal, and mixed, etc., intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was ordered to lie on the table and be printed.

He also submitted an amendment providing that the following sums are hereby appropriated out of any money in the Treasury not otherwise appropriated for the support of the Government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes, intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was ordered to lie on the table and be printed.

Mr. CURTIS submitted an amendment proposing to extend the provisions of the act of May 11, 1908, as amended by the act of March 3, 1909, relating to pay to beneficiaries of officers and enlisted men on the active list of the Army, etc., intended to be proposed by him to the Army appropriation bill (H. R. 16460), which was ordered to lie on the table and be printed.

AMENDMENT OF THE RULES.

Mr. LA FOLLETTE. I give notice of the following proposed amendment to the rules of the Senate, which I ask may be read.

The VICE PRESIDENT. The notice will be read.

The Secretary read as follows:

On Wednesday, July 19, or as soon thereafter as possible, I shall move to suspend that provision of paragraph 3 of Senate Rule XVI, prohibiting any amendment proposing general legislation to any general appropriation bill, for the purpose of offering the following amendment to the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, by inserting, after line 13, page 172, a new paragraph, as follows:

"*Provided*, That the Army and Navy of the United States shall not be used to coerce or compel the collection of any pecuniary claim of any kind, class, or nature, or to enforce any claim of right to any grant or concession for or on behalf of any private citizen, copartnership, or corporation of the United States against any foreign Government with which this Government is at peace until said citizen, copartnership, or corporation shall have exhausted his legal remedies in the courts of the foreign Government or if a denial of justice after the exhaustion of such legal remedies being alleged the foreign Government shall decline an offer on the part of the Government of the United States to submit the case to arbitration."

ROBERT M. LA FOLLETTE.

AGRICULTURAL APPROPRIATIONS.

The VICE PRESIDENT laid before the Senate the action of the House of Representative, disagreeing to the amendments of the Senate to the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SMITH of South Carolina. I move that the Senate insist upon its amendments and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Vice President appointed Mr. SMITH of South Carolina, Mr. SMITH of Georgia, Mr. SHEPPARD, Mr. WARREN, and Mr. GRONNA conferees on the part of the Senate.

HOUSE BILL REFERRED.

H. R. 17053. An act making additional appropriations for the Public Health Service for the fiscal year 1917 was read twice by its title and referred to the Committee on Appropriations.

GOVERNMENT OF THE PHILIPPINES.

Mr. HITCHCOCK. I ask the Chair to lay before the Senate the action of the House of Representatives on the bill (S. 381) to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands and to provide a more autonomous government for those islands.

The VICE PRESIDENT. The Chair lays before the Senate the action of the House of Representatives insisting on the amendments of the House to the bill (S. 381) to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands and to provide a more autonomous government for those islands, requesting a conference with the Senate on the disagreeing votes of the two Houses thereon, and appointing Mr. JONES, Mr. GARRETT, and Mr. TOWNER managers at the conference on the part of the House.

Mr. HITCHCOCK. I move that the Senate disagree to the amendments of the House and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. HITCHCOCK, Mr. SHAFROTH, and Mr. LIPPITT conferees on the part of the Senate.

Mr. SWANSON. I move that the Senate adjourn until 10 o'clock to-morrow morning.

The motion was agreed to; and (at 6 o'clock and 28 minutes p. m., Tuesday, July 18, 1916) the Senate adjourned until to-morrow, Wednesday, July 19, 1916, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

TUESDAY, *July 18, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

"O Lord, our Lord, how excellent is Thy name in all the earth! Who hast set Thy glory above the heavens," which day unto day and night unto night in a thousand ways reflect that glory. Help us by the fruition of an honest, brave, and upright life to reflect that glory among men, that we may accomplish Thy purposes in ourselves, and so fulfill the desires of Thy heart. In the spirit of Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. WALSH. Mr. Speaker, I ask that my colleague, Mr. DALLINGER, of Massachusetts, be given leave to extend his remarks in the RECORD by printing a letter from the Cambridge Board of Trade, embodying a report from a special committee of the board of trade of that city upon the post-office situation.

The SPEAKER. The gentleman from Massachusetts [Mr. WALSH] asks unanimous consent that his colleague, Mr. DALLINGER, have permission to extend his remarks in the RECORD on the subject of the post-office situation at Cambridge, Mass. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to inquire how lengthy is the newspaper article that the gentleman desires to have incorporated as a part of his remarks?

Mr. WALSH. The newspaper article, Mr. Speaker, contains several columns, and it relates to the matter which was debated here on the floor of the House relative to the separation of the Cambridge post office from the Boston postal district. Now, as the bill comes back to the House, that separation is not provided for. A very thorough investigation of that matter has been made by the Cambridge Board of Trade, and my colleague from Massachusetts desires that the entire situation may appear in his remarks in the RECORD.

Mr. STAFFORD. Mr. Speaker, I hardly think this is a matter of national concern, and therefore I object.

The SPEAKER. The gentleman from Wisconsin objects.

Mr. CHIPERFIELD. Mr. Speaker, I desire to ask unanimous consent to extend my remarks in the RECORD on the subject of the proposed Illinois waterway.

The SPEAKER. The gentleman from Illinois [Mr. CHIPERFIELD] asks unanimous consent to extend his remarks on the subject of the proposed Illinois waterway. Is there objection?

There was no objection.

LEAVE TO ADDRESS THE HOUSE.

Mr. LIEB. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes immediately after the conclusion of the business reported by the conferees on the Post Office appropriation bill.

The SPEAKER. The gentleman from Indiana [Mr LIEB] asks unanimous consent to address the House for not to exceed 15 minutes immediately after the conclusion of the discussion of

the conference report on the Post Office appropriation bill. Is there objection?

There was no objection.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that on Friday next—and I understand the House will adjourn to-day to that time—after the business of the morning hour at the desk is cleaned away, I may have one hour in which to address the House.

The SPEAKER. The gentleman from Oklahoma [Mr. FERRIS] asks unanimous consent that on next Friday, after the reading of the Journal and clearing up of the business on the Speaker's table——

Mr. MANN. And the disposition of conference reports——

Mr. FERRIS. Certainly.

The SPEAKER. Yes; the Chair was going to insert that; after the disposition of conference reports, shall have not to exceed one hour in which to address the House. Is there objection?

There was no objection.

Mr. BENNET. Mr. Speaker, I ask unanimous consent that at the conclusion of the remarks of the gentleman from Indiana [Mr. LIEB] I may address the House for 30 minutes.

The SPEAKER. The gentleman from New York [Mr. BENNET] asks unanimous consent that at the conclusion of the remarks of the gentleman from Indiana [Mr. LIEB] he shall be permitted to address the House for not to exceed 30 minutes. Is there objection?

There was no objection.

REPRINT OF THE PUBLIC-ROADS ACT.

Mr. ASWELL. Mr. Speaker, I ask unanimous consent that 50,000 copies of the good-roads act be printed for distribution through the document room.

The SPEAKER. The gentleman from Louisiana [Mr. ASWELL] asks unanimous consent that 50,000 copies of the good-roads act be printed for distribution through the document room. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I think it is perfectly evident that the gentleman would not want them distributed through the document room, to begin with; not all of them, because I do not suppose he would want them all. Has any estimate been made of the cost of printing 50,000 copies by the Public Printer?

Mr. ASWELL. No.

Mr. MANN. The gentleman ought to obtain an estimate from the Public Printer. I have no objection to printing the act, but the gentleman should get an estimate from the Public Printer and introduce a proper resolution, and provide that a part of them be distributed by the document room, and most of them by the folding room.

Mr. ASWELL. I am willing that it shall be done either way.

Mr. MANN. I hope the gentleman will not press his request now. An estimate should be had on the cost.

Mr. ASWELL. I will withdraw my request for the present.

The SPEAKER. Does the gentleman withdraw his request?

Mr. ASWELL. Yes.

RELIEF OF ARMENIANS.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to take up Senate concurrent resolution No. 12, asking the President to designate a day on which the citizens of this country may give expression of their sympathy by contributing funds for the relief of the Armenians.

The SPEAKER. The gentleman from Virginia [Mr. FLOOD] asks unanimous consent for the present consideration of Senate concurrent resolution No. 12, of which the Clerk will report the title.

Mr. MANN. Let him report it in full.

The Clerk read as follows:

Concurrent resolution (S. Con. Res. 12) requesting the President of the United States to designate a day on which funds may be raised for the relief of the Armenians.

The SPEAKER. Is there objection?

Mr. MANN. I ask to have it reported in full.

The SPEAKER. The Clerk will report it.

Mr. MOON. Mr. Speaker, I would like to know how long it will take.

Mr. FLOOD. I do not think it will take over two or three minutes.

Mr. STAFFORD. It will take more than that.

The Clerk read as follows:

Senate concurrent resolution 12.

Whereas in countries now engaged in war there are several hundreds of thousands of Armenians in need of food, clothing, and shelter; and

Whereas great numbers of them have been required by conditions growing out of the state of war to leave their homes and their property, deprived of an opportunity to make provision for their most elementary wants, causing starvation, disease, and untold suffering; and

Whereas the people of the United States of America have learned with sorrow of this terrible plight of great numbers of human beings, and have most generously responded to the cry for help whenever such an appeal has reached them: Therefore be it

Resolved by the Senate (the House of Representatives concurring), That, in view of the misery, wretchedness, and hardships which these people are suffering, the President of the United States be respectfully asked to designate a day on which the citizens of this country may give expression to their sympathy by contributing to the funds now being raised for the relief of the Armenians in the belligerent countries.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I wish to inquire of the gentleman offering this resolution whether in the history of the Congress we have ever passed any similar joint resolution calling upon or authorizing the President to designate a national tag day for the relief of suffering humanity abroad or at home?

Mr. FLOOD. Mr. Speaker, early in this year the Senate passed a similiar resolution in reference to the destitute Jews in the war zones, in consequence of which the President issued a proclamation on January 27. It proved to be of great benefit in raising funds for the needy Jews, and that suggested to the American relief committee of New York, which has done such splendid work for the Armenians in Turkey and the Caucasus, and which is trying to raise funds for 700,000 or 800,000 Armenians who have been driven out of Turkey into the deserts and plains of Mesopotamia, and are now in an almost starving condition, and other friends of these unfortunate people, the passage of this resolution.

I will here incorporate a letter which I received from the prelate of the Armenian Church in America:

JUNE 20, 1916.

Hon. HENRY D. FLOOD,
Chairman Committee on Foreign Affairs,
House of Representatives, Washington, D. C.

SIR: The undersigned, the Right Rev. Arsene Vehouni, prelate of the Armenian Apostolic Church of the United States of America, and Miran Sevasly, chairman of the Armenian National Defense Union of America, respectfully represent that on the 10th day of February, 1916, a concurrent resolution was submitted to both Houses, having for its object to designate a day on which the citizens of this country may give expression to their sympathy by contributing to the funds that are being raised for the relief of the Armenians now within the belligerent countries. The said resolution was passed by the Senate, but the House of Representatives has not so far acted upon the same. The object of your petitioners is to respectfully approach you on this urgent matter of Armenians relief before the present session of the House of Representatives is brought to a close, with the hope and the conviction that you will think fit to submit the same to the House for an early or if possible for an immediate consideration and approval.

We beg leave to remind your committee that on the 6th day of January a resolution was considered and agreed to in the Senate of the United States, having a similiar object and affecting the destitute Jews in the war zones, and in consequence of which the President issued a proclamation.

The resolution concerning the Armenians being a concurrent one needs the ratification of the House of Representatives.

We will not go into details of the misery and wretchedness endured by the Armenians throughout Turkey and within that part of the trans-Caucasus where they have sought refuge. The necessities are not only urgent but almost crying, as is shown in the two documents annexed and marked A and B, the first of which is a translation of an appeal by his holiness, Kevork, the primate and catholicos and supreme patriarch of the Armenians, which speaks for itself, and to which we respectfully invite your earnest attention; and the second is the bulletin issued by the American Relief Committee, of New York, which has been working steadily and heartily for the redemption of the surviving Armenians throughout Turkey and the Caucasus. Ambassador Morgenthau, who has so admirably performed his duties as ambassador at Constantinople, lays stress on page 7 of said bulletin upon the conditions prevailing in that part of the world and upon the immediate necessity for relief.

It is our wish and hope that some Sunday in October of this year may be appointed and proclaimed upon which the people of the United States may make such contribution as they feel disposed in aid of the stricken Armenian people.

Respectfully and gratefully submitted.

ARSÈNE E. VEHOURI,
Prelate of the Armenian Church,
65 Laurel Street, Worcester, Mass.
MIRAN SEVACLY,
Chairman of National Defense Union,
751 Old South Building, Boston, Mass.

Mr. FITZGERALD. If the gentleman will permit me, several other resolutions have been passed, and proclamations issued.

Mr. FLOOD. I knew about the Jewish resolution. There are some others pending. I did not know that any others had passed except the Jewish resolution, which was a Senate resolution.

Mr. BENNET. There was a resolution passed in the other body with reference to the Poles.

Mr. FITZGERALD. And also the Syrians.

Mr. BENNET. There were two resolutions passed—one in reference to the Jews and the other in reference to the Poles.

Mr. FITZGERALD. And one in relation to the Syrians.

Mr. BENNET. And one in relation to the Syrians. My colleague is right.

Mr. STAFFORD. There has never heretofore been any concurrent resolution of Congress authorizing the President to designate any certain day for the collection of funds for the relief of stricken people.

Mr. FLOOD. This is a Senate concurrent resolution. I do not know why the Senator who introduced it made it a concurrent resolution instead of a simple Senate resolution as the others have been; but I know the Senate has passed the Jewish resolution, and the gentlemen from New York [Mr. BENNET and Mr. FITZGERALD] have told me about three others, and that the President has issued proclamations in pursuance of those resolutions, just as the President will issue a proclamation with reference to the Armenians when we pass this concurrent resolution.

Mr. STAFFORD. Prior to this Congress, and other than the Senate resolutions referred to by the gentlemen from New York, has Congress, to the gentleman's knowledge, ever been called upon to authorize the President to designate a day for a similar purpose?

Mr. FLOOD. I do not recall any, but we have conditions existing in the world to-day that never existed before.

Mr. STAFFORD. Oh, the gentleman knows that Armenia has been a sore spot for many years, by reason of massacres similar to those now being perpetrated.

Mr. FLOOD. I know that there have been Armenian massacres before, but there never has been a time before when seven or eight hundred thousand Armenians were driven out into the desert and were there starving, or living on grass and roots, as they are to-day.

Mr. STAFFORD. Has the gentleman considered the precedent that would be established if we adopt this resolution, and if every similar condition of affairs——

Mr. GARNER rose.

The SPEAKER. For what purpose does the gentleman from Texas rise?

Mr. GARNER. Mr. Speaker, I ask the regular order. I am not going to object, but I ask for the regular order.

The SPEAKER. The regular order is, Is there objection?

Mr. STAFFORD. I think we have a right to consider this resolution. If the gentleman wants to demand the regular order, he may.

The SPEAKER. The gentleman from Texas demands the regular order, and the regular order is, Is there objection?

Mr. STAFFORD. I object, because of being unable to obtain the information which I desire.

Mr. MANN. If we are going to have the regular order demanded, I will demand it all the time while we are considering these things.

Mr. FITZGERALD. Do not do that.

Mr. MANN. I will. If the Democratic whip demands the regular order, under the circumstances, I shall demand the regular order all the time.

Mr. GARNER. I have no desire to force the consideration of this resolution offered by the gentleman from Virginia, but it did occur to me that the House had some business to attend to to-day, and the question was asked by the gentleman from Wisconsin [Mr. STAFFORD] whether there were any precedents to justify the passage of this resolution. The gentleman from Virginia [Mr. FLOOD] stated that there had been none to his knowledge. Now, it seemed to me that that was about all the information that the gentleman from Wisconsin wanted, and I wanted to see the business of Congress transacted rather than to have this continued conversation.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, I objected.

Mr. GARNER. I withdraw the request for the regular order so far as the concurrent resolution is concerned.

Mr. FLOOD. The gentleman from Texas withdraws his demand for the regular order.

Mr. STAFFORD. If the gentleman withdraws his demand, I withdraw the objection until I obtain the necessary information.

Mr. FLOOD. This resolution is deemed by the American relief committee of New York to be a very important one, and it is also deemed important by others who are interested in relieving the distress of the suffering Armenians.

Mr. STAFFORD. At the time the gentleman from Texas demanded the regular order I was seeking to inquire whether the gentleman or the committee had considered the danger of the precedent we would be establishing by having other peoples or communities who might be suffering likewise, and perhaps not so seriously, abroad or in this country, appealing to Congress every time to authorize the President to designate a tag day when funds might be collected.

Mr. FLOOD. I expect there will be other resolutions of this character. There are some pending in the Foreign Affairs Committee now, but I do not see that any harm can be done by establishing this precedent. In fact, I think it is a good precedent to establish. No one need give unless he desires to do so, and there is no charge on the Government.

Mr. MADDEN. And if the gentleman will yield to me, in the catastrophe which befell the Italian people at the time of the earthquake I think the Congress appropriated $800,000 out of the Public Treasury.

Mr. FLOOD. That was an appropriation by Congress. This asks for no appropriation by Congress. It simply seeks to give dignity to a movement the purpose of which is to raise money from private individuals for suffering humanity.

Mr. STAFFORD. Mr. Speaker, having obtained the information I desired, I will not press the inquiry any further.

The SPEAKER. Is there objection?

Mr. HULBERT. Reserving the right to object—and I do not intend to object, for I should like to see this resolution adopted—my only regret is that Congress has not seen fit at the same time to take similar action on the principle that charity begins at home, and that Congress has not looked after the soldiers of the District of Columbia, who, I understand, have been waiting since the 17th of June, and also looked after the destitute families of the members of the National Guard who are on the border at the present time. [Applause.]

The SPEAKER. Is there objection?

There was no objection.

The concurrent resolution was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the amendments of the House of Representatives to joint resolution (S. J. Res. 60) creating a joint subcommittee for the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee.

The message also announced that the Senate had passed the following resolution:

Senate resolution 234.

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. HUNTER HOLMES MOSS, Jr., late a Representative from the State of West Virginia.

Resolved, That a committee of six Members of the Senate be appointed to join the committee appointed by the House of Representatives to take order for superintending the funeral of the deceased.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives.

Resolved, That, as a further mark of respect to the memory of the deceased, the Senate take a recess until 10 o'clock a. m. to-morrow.

In accordance with the provisions of the foregoing resolution the Vice President had appointed as the committee on the part of the Senate Mr. CHILTON, Mr. GOFF, Mr. BRYAN, Mr. OLIVER, Mr. STERLING, and Mr. HUSTING.

The message also announced that the Senate had passed without amendment joint resolution (H. J. Res. 218) authorizing the acceptance of the gift of Berkshire Trout Hatchery, Berkshire County, Mass.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On July 14, 1916:

H. R. 16911. An act making an appropriation for the relief and transportation of destitute American citizens in Mexico.

On July 17, 1916:

H. R. 3673. An act to establish a term of the United States circuit court of appeals at Asheville, N. C.;

H. R. 8351. An act to accept a deed of gift or conveyance from the Lincoln Farm Association, a corporation, to the United States of America, of land near the town of Hodgenville, county of Larue, State of Kentucky, embracing the homestead of Abraham Lincoln and the log cabin in which he was born, together with the memorial hall inclosing the same; and further, to accept an assignment or transfer of an endownment fund of $50,000 in relation thereto;

H. R. 11878. An act to amend section 99 of the act to codify, revise, and amend the laws relating to the judiciary;

H. R. 13486. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 16287. An act granting the consent of Congress to the county of Sumter, or to the county of Dooly, both of the State of Georgia, acting jointly or separately, and their successors and assigns, to construct a bridge across the Flint River; and

H. R. 16641. An act granting the consent of Congress to Julian B. McCurry, A. G. McCurry, P. W. Walton, and J. J. Fretwell to construct a bridge across the Savannah River.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committee, as indicated below:

S. 5441. An act for the relief of the heirs of Albert Sidney Johnston; to the Committee on Claims.

S. 1056. An act for the relief of Alfred Sjostrom; to the Committee on Claims.

S. 1429. An act for the relief of Artemus W. Pentz; to the Committee on Claims.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 36. An act to authorize the Secretary of the Interior to issue patent for certain lands to the town of Duchesne, Utah.

PUBLIC HEALTH SERVICE.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 17053) making additional appropriations for the Public Health Service for the fiscal year 1917.

The SPEAKER. The gentleman from New York asks unanimous consent for the present consideration of a bill which the Clerk will report.

The bill was read, as follows:

Be it enacted, etc., That the following additional sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Public Health Service for the fiscal year 1917, namely:

For additional assistant surgeons, $50,000.

Interstate quarantine service: For cooperation with State and municipal health authorities in the prevention of the spread of contagious and infectious diseases in interstate traffic, $85,000.

The SPEAKER. Is there objection?

There was no objection.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from New York asks that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. FITZGERALD. Mr. Speaker, an epidemic of poliomyelitis, otherwise known as infantile paralysis, has been affecting the people of the city of New York. It has become so great that the municipal authorities have called upon the Public Health Service to assist them in the work. Fifteen surgeons of the Public Health Service have already been detailed to duty in New York and 17 others are to be sent there. In addition to more than 2,000 cases, with a mortality of more than 400, cases have been reported from Illinois, Wisconsin, Florida, California, Connecticut, Maryland, New Jersey, and Kentucky. There are not so many cases in those sections, but evidently there is some danger of the disease being carried and spread so as to make it a very serious affliction to the entire country.

One of the unfortunate features of the situation is that very little is known about the disease, either as to what the germ is, how it is carried, or what is the effective treatment. The Public Health Service is doing the most effective work possible under the conditions.

At this time, Mr. Speaker, I desire to say a word in the hope that it will arouse the officials of the city of New York to the performance of their duty in a very important particular in this respect. On the 11th of July the President approved a joint resolution authorizing the use of the hospital buildings at Ellis Island for persons affected by the disease. The city of New York, because of the policy of insisting upon hospital treatment in cases where it is impossible to have either a trained nurse or some intelligent person to devote their time to the case, has had its hospital facilities very greatly overcrowded. The officials of the Public Health Service detailed to New York City in charge of the work have applications from 60 different persons for admission into the hospital at Ellis Island, but because of the failure of the municipal authorities in the city of New York to make provision for trained nurses and for the subsistence of the patients who are applying and ready to be sent to the hospital, it is impossible to utilize the buildings turned over by the Federal Government in this emergency. There are 580 available beds there at the disposition of the Public Health Service. It seems that somebody should raise his voice to awaken the officials of the municipality to the importance of doing their part fully in this very urgent work. This bill carries every dollar requested by the Public Health Service. They ask for additional surgeons, because they have two requests—one from Birmingham, Ala., and one from Norfolk, Va.—because of typhoid fever.

In Kansas City, Mo., the health officer is dead, if I recollect correctly, and his assistant has been ordered to the border with the troops, and Kansas City, Mo., is appealing to the Public Health Service for assistance under existing conditions.

For these reasons the committee believes it to be highly important to give the additional assistance asked for to prevent the interstate communication of this highly infectious and contagious disease.

The SPEAKER. The time of the gentleman from New York has expired.

Mr. HARRISON. Mr. Speaker, I ask that the time be extended one minute in order to ask him a question.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi? [After a pause.] The Chair hears none.

Mr. HARRISON. The gentleman stated a good many States where they have cases of infantile paralysis, but he did not name Mississippi. I want to say to the gentleman that very much to my surprise, and to the surprise of the people of my State, the Saturday papers in that State stated that the health authorities reported 75 cases of infantile paralysis in that State.

Mr. FITZGERALD. I did not intend to make a complete statement; I had a list of States that had been mentioned as among those where cases have been reported.

Mr. HARRISON. They report that the mortality in the cases in Mississippi is very slight.

Mr. MANN. Mr. Speaker, some years ago when there was a threatened outbreak of plague or some other disease in the country we put an emergency appropriation of $500,000 to the credit of the Public Health Service. It was not all expended, and, if I recollect correctly, the unexpended balance was continued from year to year. Subsequently we adopted the policy of appropriating an emergency fund for each year, in the case of an epidemic or the outbreak of certain specified diseases which do not include paralysis. The law just went on the statute book, just became available, and we appropriated $400,000 for that purpose. It was supposed by everybody in Congress, unless somebody on the inside knew better, that here was an emergency fund at the command of the Public Health Service to meet any emergency. Now, it is very easy in this case to simply amend that act by including infantile paralysis or poliomyelitis. But instead of doing that the Public Health Service comes in and wants additional money. Instead of proposing to use the fund now provided for an emergency, whenever the emergency really arises they want an additional appropriation. The Public Health Service ought to be severely spanked in this connection. They have got to the point where it is impossible for Congress to make an appropriation for an emergency that they do not utilize it right away for the ordinary course of diseases.

Mr. FITZGERALD. I was about to suggest that when the emergency fund was first created, after it had existed several years, it was found that a very large force was permanently employed.

They were transferred to the statutory roll, and the appropriation made for the present fiscal year will be utilized in the maintenance of what has practically become a permanent force. It is impossible to set aside an emergency fund in the Public Health Service because it would at once become absorbed in the payment of current services.

Mr. MANN. That is what I was just saying.

Mr. FITZGERALD. I desired to emphasize it.

Mr. MANN. Here we make a special emergency appropriation, and under that special emergency appropriation in all likelihood the Public Health Service will again provide a permanent corps and they will want that covered into the regular service, and they will want this additional appropriation made year after year to cover that. I think the Public Health Service does a great work. I like to vote for appropriations for the Public Health Service, but if they would be honest with Congress, if they would learn to be on the square with Congress in asking for appropriations, they would get more money more easily than they get what they do now, because no one here credits them with absolute good faith in asking for appropriations for emergency purposes. They can get all the money they need for emergency, and they could get a good deal more for the ordinary course of their work if we could be sure they were on the square with us as to emergencies.

Mr. CANNON. Mr. Speaker, a very interesting hearing touching this bill was held this morning by the subcommittee

on deficiencies. It was a pretty searching hearing, and it appeared from that hearing—and I have no reason to question the truth of it—coming from a very intelligent member of the staff, that all appropriations made for the present fiscal year were apportioned to the current ordinary service, and that if this emergency service was cared for the other services would be crippled, and that it could not be cared for without this appropriation. As the population of the country grows, as new diseases afflict the country, as diseases like typhoid and typhus and the Rocky Mountain fever require care, and as real progress has been made and is being made in arresting them, I quite agree, without going into the detail of the hearing, with the propriety of appropriations of this kind. When the hearing began I was skeptical about it, and when it closed I was a very hearty though perhaps not very intelligent convert as to the necessity from the standpoint of the protection of the population for cooperation by the Public Health Service. It seems to me that it is absolutely demanded, and, therefore, I assented to the reporting of this bill.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FITZGERALD, a motion to reconsider the vote by which the bill was passed was laid on the table.

AGRICULTURAL APPROPRIATION BILL.

Mr. LEVER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from South Carolina asks unanimous consent to take from the Speaker's table the Agricultural appropriation bill, with Senate amendments, disagree to all of the Senate amendments, and ask for a conference. Is there objection?

Mr. FITZGERALD. Mr. Speaker, reserving the right to object, I desire to say that there has been incorporated in this bill by the Senate several amendments which should be eliminated. One is an amendment which was debated in the House and to which the House declined to agree. It was afterwards incorporated upon an appropriation bill and eliminated in conference. It has now been put upon the Agricultural appropriation bill, where it has no proper place. It relates to the Geological Survey. Another amendment proposes an appropriation direct from the Treasury for the Reclamation Service, which amendment does not properly belong upon the Agricultural appropriation bill. I have had a conference with the gentleman from South Carolina [Mr. LEVER], and I have no doubt that the amendments will be eliminated; but I wish to serve notice now that if it continues to be the practice of another body to keep jumping from one appropriation bill to another with various propositions, in the hope that in one place or another they will find some one sufficiently complacent to comply with their requests, that the work of Congress will not be speeded up.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to have the sentiment of the House expressed before final agreement is reached on amendment No. 50, providing for an appropriation this year of $1,000,000 for the Appalachian Mountain Reserve and $2,000,000 next year.

Mr. LEVER. Mr. Speaker, if the gentleman from Wisconsin will permit, I will say that I shall see to it that the gentleman gets a separate vote upon that proposition.

Mr. STAFFORD. Then, as to amendment No. 65, providing for the establishment of the potash industry, while I have no objection to authorizing the Secretary of Agriculture to experiment in the manufacture of potash, nevertheless I question very seriously the advisability, as contained in the second provision of that authorization, of granting him the right to sell the product of these various potash factories which he is authorized to establish and have the funds resulting from the sale continually at his disposal, thereby surrendering the authority of Congress over the control of the appropriation that may be used for that purpose.

Mr. LEVER. I think there is no disagreement between the gentleman and myself upon that proposition. The gentleman would have those funds go into the Treasury as miscellaneous receipts?

Mr. STAFFORD. Yes. And there is one minor amendment which I hope the gentleman will see his way clear to resist, being amendment No. 216, with reference to the use of lump-sum appropriations by the departments in the purchase of automobiles. This amendment seeks to lift that restriction, so far as automobiles in the Agricultural Department are concerned.

Mr. LEVER. I am glad to have the gentleman's view on that matter.

Mr. STAFFORD. I am particularly interested, however, in the Appalachian appropriation and desire a separate vote upon that if it is not disagreed to.

Mr. LEVER. I assure the gentleman he will have that opportunity.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Speaker announced the following conferees:

Mr. LEVER, Mr. LEE, Mr. RUBEY, Mr. HAUGEN, and Mr. McLAUGHLIN.

LEAVE OF ABSENCE.

Mr. FORDNEY, by unanimous consent, was granted leave of absence indefinitely, on account of death of a business associate.

WITHDRAWAL OF PAPERS.

Mr. BRUCKNER, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, papers in the case of James Dodds (H. R. 12081, 63d Cong.), no adverse report having been made thereon.

PRINT OF GOOD-ROADS ACT.

Mr. ASWELL. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. ASWELL. I rise to renew my request for unanimous consent.

The SPEAKER. For what?

Mr. ASWELL. To print 50,000 copies of the good-roads act. I have ascertained it will cost $62.23. I ask that this number be printed, and 10,000 be assigned to the document room and 40,000 to the folding room.

The SPEAKER. The gentleman from Louisiana asks unanimous consent that 50,000 copies of the good-roads act be printed, to cost $62.23, and that 40,000 copies go through the folding room and 10,000 copies through the document room. Is there objection?

Mr. FERRIS. Mr. Speaker, reserving the right to object, which I do not intend to do, would the gentleman couple with that the rural-credits act, which is not yet printed? That is needed also.

Mr. ASWELL. I will be delighted to do that.

Mr. MANN. We are not able to do that. The gentleman from Virginia spoke about that the other day, but it has not reached the point where it is printed.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT OVER.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Friday next.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet on Friday next. Is there objection?

There was no objection.

POST OFFICE APPROPRIATION BILL.

Mr. MOON. Mr. Speaker, I desire to call up for consideration the conference report on the Post Office and post roads appropriation bill (H. R. 10484).

The SPEAKER. The gentleman from Tennessee [Mr. MOON] calls up for consideration the conference report on the Post Office and post roads appropriation bill.

Mr. MOON. Mr. Speaker, there will probably be some debate desired on the bill longer than the hour under the control of the chairman. I suggest to the gentleman from Minnesota [Mr. STEENERSON] that we take two hours, or so much of that time as may be necessary, and at the end of the debate the motion for the previous question on the adoption of the report be considered as ordered.

Mr. STEENERSON. The time to be equally divided?

Mr. MOON. The time to be divided between the gentleman from Minnesota and myself.

Mr. STEENERSON. That is perfectly satisfactory.

Mr. MADDEN. Reserving the right to object——

Mr. COX. Mr. Speaker, reserving the right to object——

The SPEAKER. Does the gentleman from Minnesota desire——

Mr. STEENERSON. The request meets with my approval, Mr. Speaker. I hope it will be granted.

Mr. COX. Reserving the right to object, I would like to know if I can have 10 minutes' time.

Mr. MOON. I suppose the gentleman can. I can not tell. I will be glad to yield time to my colleague on the committee, the gentleman from Indiana.

Mr. COX. I am a little bit afraid, I will say to the chairman of the committee, that the time will be consumed otherwise. He will be called upon to answer a great many questions.

Mr. MOON. Does the gentleman desire to have further time than the two hours?

Mr. COX. I would like to have 10 minutes. I may not require all of that time, but I would like to be heard on some of these items.

Mr. MOON. I will amend the motion, Mr. Speaker, and ask, in addition, that 10 minutes be given to the gentleman from Indiana [Mr. Cox], if it turns out that we are not able to yield him 10 minutes out of the hour allotted to this side.

The SPEAKER. The gentleman from Tennessee [Mr. MOON] asks unanimous consent that debate on this conference report be limited to 2 hours and 10 minutes.

Mr. STEENERSON. Mr. Speaker, I would suggest that the request be modified so as to make it 2 hours and 20 minutes.

The SPEAKER. Two hours and 20 minutes, then; half of it to be controlled by the gentleman from Tennessee [Mr. MOON] and the other half by the gentleman from Minnesota [Mr. STEENERSON], with the understanding, however, that 10 minutes of that time will go to the gentleman from Indiana [Mr. Cox]. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Tennessee [Mr. MOON] is recognized for 1 hour and 10 minutes.

Mr. MOON. It is not necessary, I deem it, that I enter into any very extensive discussion of the conference report. It has been printed in the RECORD in connection with the statement, and gentlemen who desire to be informed as to the details of this report can do so by reading the statement and the report that are presented in connection with the bill. However, it must be conceded that the statement in this case is not quite so full and explicit as it possibly ought to have been, although probably complying with the technical rule of the House to present a statement in connection with the bill.

Mr. STAFFORD. A parliamentary inquiry, Mr. Speaker. Will the gentleman from Tennessee yield?

Mr. MOON. I yield.

The SPEAKER. The gentleman from Wisconsin will state his parliamentary inquiry.

Mr. STAFFORD. I asked the gentleman if he would yield, and he said that he would.

Mr. MOON. I yield to the gentleman from Wisconsin.

Mr. STAFFORD. I would like to ask whether the conference report or statement in lieu of the conference report ought not to be considered before the debate?

The SPEAKER. Of course it ought to be read.

Mr. MOON. The statement may be read in lieu of the report, or if it is desired that they both be read they may be read.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the statement may be read in lieu of the report. Is there objection? [After a pause.] The Chair hears none.

The Clerk will read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (NO. 981).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 43, 55, and 64.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 25, 27, 28, 30, 31, 32, 34, 36, 37, 38, 40, 42, 44, 47, 49, 50, 51, 52, 53, 56, 57, 58, 59, 60, and 61, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3 and agree to the same with an amendment as follows: Page 5, after line 4, in lieu of the matter inserted by the said amendment, insert the following: "That the Postmaster General shall not approve or continue any rule or regulation which terminates the employment of any employee by reason of absence on account of illness for a period of less than one year, and that any postal employee who has entered the military service of the United States or who shall hereafter enter it shall, upon being honorably discharged therefrom, be permitted to resume the position in the Postal Department which he left to enter such military service"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: Page 5, after line 4, at the end of the amendment of the Senate, following the amount "$6,000," insert the following: "And the employment of such officer hereafter is authorized"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: Page 12, restore the matter stricken out by said amendment and amend to read as follows: "For compensation to printers, mechanics, and skilled laborers, 22 at $1,200 each, 4 at $1,100 each; 3 at $1,000 each and 28 at $900 each; in all, $59,000"; and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: On page 13, line 16, strike out all of the amendment after the amount "$130,000"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: Page 29, line 19, in line 3 of the amendment, strike out all after the word "annum"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: Page 16, line 5, in line 4 of said amendment strike out "June 30" and insert in lieu thereof the words "March 4"; and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: Page 16, after line 16, at the end of said amendment, after the word "sixteen," insert the following: "And that section 10 of the said act be amended by inserting after the first word of said section, 'That,' the words 'section 198 of the'"; and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: Page 17, line 24, in lieu of the matter inserted by the said amendment insert the following: "*Provided*, That hereafter every railroad company carrying the mails shall carry on any train it operates and without extra charge therefor the persons in charge of the mails and when on duty and traveling to and from duty, and all duly accredited agents and officers of the Post Office Department and the Railway Mail Service and post-office inspectors, while traveling on official business, upon the exhibition of their credentials: *Provided further*, That no part of this appropriation shall be paid for carrying the mail over the bridge across the Mississippi River at St. Louis, Mo., other than upon a mileage basis: *But provided further*, That the Postmaster General may, in his discretion, pay within the present law a fair and reasonable price for the special transfer and terminal service at the Union Station at East St. Louis, Ill., and at the Union Station at St. Louis, Mo., including the use, lighting, and heating of the mail building, and transfer service at St. Louis, Mo., provided the amount so paid shall not exceed $35,000"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: Page 19, line 8, in lieu of the matter inserted by the said amendment insert the following: "*Provided further*, That railway postal clerks shall be credited with full time when deadheading under orders of the department"; and the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment as follows: On page 26, line 16, restore the amount proposed by the House, and on page 26 of the bill, in line 14, after the word "purchase," insert the word "rental"; and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: On page 27, line 26, in lieu of the matter stricken out and inserted by said amendment insert the following:

"That rural mail delivery shall be extended so as to serve, as nearly as practicable, the entire rural population of the United States.

"Hereafter all rural mail delivery routes shall be divided into two classes to be known as—

"Standard horse-drawn vehicle routes, which shall be 24 miles in length, and

"Standard motor-vehicle routes, which shall be 50 miles in length, and shall only be established hereafter when a majority of the proposed patrons who are heads of families residing upon such proposed routes shall by written petition ask the Post Office Department to establish the same.

"Nothing herein contained shall be construed to prohibit the establishment of horse-drawn vehicle routes of less length than the standard of 24 miles: *Provided*, That if in the discretion of the Postmaster General, in order to render more complete service, it should be necessary to do so the Postmaster General is hereby authorized to increase the length of routes not to exceed 50 per cent above the standards herein prescribed, and in such cases the compensation of the carrier on such horse-drawn vehicle routes shall be increased above the maximum pay heretofore fixed by law for rural carriers at the rate of $24 per annum for each mile of said routes in excess of 30 miles, and any major fraction of a mile shall be counted as a mile: *Provided further*, That carriers in rural mail-delivery service shall furnish and maintain at their own expense all necessary vehicle equipment for prompt handling of the mail: *And provided further*, That nothing herein shall be construed, and no order shall be issued, to prevent the use of motor vehicles on horse-drawn vehicle routes: *Provided further*, The Postmaster General in his discretion may require all carriers to furnish sufficient equipment to properly handle postal business on their routes: *And provided further*, That the Postmaster General may, in his discretion, allow and pay additional compensation to rural letter carriers who are required to carry pouch mail to intermediate post offices, or for intersecting loop routes, in all cases where it appears that the carriage of such pouches increases the expense of the equipment required by the carrier or materially increases the amount of labor performed by him, such compensation not to exceed the sum of $12 per annum for each mile such carrier is required to carry such pouch or pouches.

"The Postmaster General is hereby authorized and directed to reorganize and readjust existing rural mail delivery service where necessary to conform to the standards herein prescribed: *Provided further*, That in making appointments of rural carriers for service on new routes, which may be created by the reorganization herein ordered, preference shall be given to carriers who were formerly employed in rural-delivery service and who were separated therefrom on or after June 30, 1915, by reason of any previous reorganization of the service and without charges against them: *And provided further*, That the Postmaster General is authorized and directed to pay, out of the appropriations already made and still available and unexpended for rural free-delivery service for the fiscal year ending June 30, 1915, to all letter carriers in the Rural Free Delivery Service during the fiscal year ending June 30, 1915, their executors or administrators, the difference between what they received for their said services and the amount that would have been paid to them in accordance with the proviso contained in joint resolution making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1916, approved March 4, 1915: *Provided*, That no part of the money paid under this provision shall be paid to any agent or attorney, directly or indirectly, for any alleged services in connection with this appropriation."

And the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: Page 28, line 7, strike out all of the amendment after the amount "$250,000"; and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: On page 31, line 19, in lieu of the matter inserted by said amendment insert the following: "but no publication shall be sent by freight if such method of transportation results in unfair discrimination: *Provided*, That whenever the owner of any publication required by an order of the Post Office Department to be transmitted by freight believes that he is unfairly discriminated against, he may apply to the Post Office Department for an opportunity to be heard; that upon such application being duly filed in writing, the owner of such publication shall have opportunity for a full and fair hearing before said department, and pending final determination no change shall be made in the method of transportation of such publication as ordered by the department. The testimony in any such hearing or proceedings shall be reduced to writing and filed in the Post Office Department prior to entering an order upon such hearing. That upon such hearing if the Post Office Department decides adversely to the contention of the publisher, such publisher shall have the right, within the period of 20 days after the date of the order of the Post Office Department made upon such hearing, to appeal to the United States court of appeals of the District of Columbia for a review of such order by said court of appeals, by filing in the court a written petition praying that the order of the Post Office Department be set aside. A copy of such petition shall be forthwith served upon the Post Office Department and thereupon the said department forthwith shall certify and file in the court a transcript of the record and testimony. Upon the filing of such transcript the court shall have jurisdiction to affirm, set aside or modify the order of the department. The jurisdiction of the circuit court of appeals of the District of Columbia to affirm, set aside or modify such orders of the Post Office Department shall be exclusive. Such proceedings in the circuit court of appeals of the District of Columbia shall be given precedence over other cases pending therein and shall be in every way expedited"; and the Senate agree to the same.

Amendment numbered 62: That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: On page 36, line 6, in lieu of the matter stricken out and inserted by said amendment, insert the following:

"SEC. 16. That the Postmaster General is authorized and directed to readjust the compensation to be paid to railroad companies from and after the 30th day of June, 1916, or as soon thereafter as may be practicable, for the transportation and handling of the mails and furnishing facilities and services in connection therewith upon the conditions and at the rates hereinafter provided.

"The Postmaster General may state railroad mail routes and authorize mail service thereon of the following four classes, namely: Full railway post-office car service, apartment railway post-office car service, storage-car service, and closed-pouch service.

"Full railway post-office car mail service shall be service by cars 40 feet or more in length, constructed, fitted up, and maintained for the distribution of mails on trains. The authorizations of full railway post-office cars shall be for standard-sized cars 60 feet in length, inside measurement, except as hereinafter provided.

"Apartment railway post-office car mail service shall be service by apartments less than 40 feet in length in cars constructed, fitted up, and maintained for the distribution of mails on trains. Two standard sizes of apartment railway post-office cars may be authorized and paid for, namely, apartments 15 feet and 30 feet in length, inside measurement, except as hereinafter provided.

"Storage-car mail service shall be service by cars used for the storage and carriage of mails in transit other than by full and apartment railway post-office cars. The authorizations for storage cars shall be for cars 60 feet in length, inside measurement, except as hereinafter provided: *Provided*, That storage space in units of 3 feet, 7 feet, 15 feet, and 30 feet, both sides of car, may be authorized in baggage cars at not exceeding pro rata of the rates hereinafter named for 60-foot storage cars.

"Service by full and apartment railway post-office cars and storage cars shall include the carriage therein of all mail matter, equipment, and supplies for the mail service and the employees of the Postal Service or Post Office Department, as shall be directed by the Postmaster General to be so carried.

"Closed-pouch mail service shall be the transportation and handling by railroad employees of mails on trains on which full or apartment railway post-office cars are not authorized, except as hereinbefore provided. The authorizations for closed-pouch service shall be for units of 7 feet and 3 feet in length, both sides of car.

"The rates of payment for the services authorized in accordance with this section shall be as follows, namely:

"For full railway post-office car mail service at not exceeding 21 cents for each mile of service by a 60-foot car.

"In addition thereto he may allow not exceeding $4.25 as a combined initial and terminal rate for each one-way trip of a 60-foot car.

"For apartment railway post-office car mail service at not exceeding 11 cents for each mile of service by a 30-foot apartment car and 6 cents for each mile of service by a 15-foot apartment car.

"In addition thereto he may allow not exceeding $2.75 as a combined initial and terminal rate for each one-way trip of a 30-foot apartment car and $2 as a combined initial and terminal rate for each one-way trip of a 15-foot apartment car.

"For storage-car mail service at not exceeding 21 cents for each mile of service by a 60-foot car.

"In addition thereto he may allow not exceeding $4.25 as a combined initial and terminal rate for each one-way trip of a 60-foot car.

"Where authorizations are made for cars of the standard lengths of 60, 30, and 15 feet, as provided by this section, and the railroad company is unable to furnish such cars of the length authorized, but furnishes cars of lesser length than those authorized, but which are determined by the department to be sufficient for the service, the Postmaster General may accept the same and pay only for the actual space furnished and used, the compensation to be not exceeding pro rata of that provided by this section for the standard length so authorized: *Provided*, That the Postmaster General may accept cars and apartments of greater length than those of the standard requested, but no compensation shall be allowed for such excess lengths.

"For closed-pouch service, at not exceeding 1½ cents for each mile of service when a 3-foot unit is authorized, and 3 cents for each mile of service when a 7-foot unit is authorized.

"In addition thereto he may allow not exceeding 25 cents as the combined initial and terminal rate for each one-way trip of a 3-foot unit of service and 50 cents as a combined initial and terminal rate for each one-way trip of a 7-foot unit of service.

"Railroad companies whose railroads were constructed in whole or in part by a land grant made by Congress, on the condition that the mails should be transported over their roads at such price as Congress should by law direct, shall receive only 80 per cent of the compensation otherwise authorized by this section.

"The initial and terminal rates provided for herein shall cover expenses of loading and unloading mails, switching, lighting, heating, cleaning mail cars, and all other expenses incidental to station service and required by the Postmaster General in connection with the mails that are not included in the car-mile rate. The allowance for full railway post-office cars, apartment railway post-office cars, and storage cars may be varied in accordance with the approximate difference in their respective cost of construction and maintenance.

"In computing the car miles of the full railway post-office cars and apartment railway post-office cars, the maximum space authorized in either direction of a round-trip car run shall be regarded as the space to be computed in both directions, unless otherwise mutually agreed upon.

"In computing the car miles of storage cars, the maximum space authorized in either direction of a round-trip car run shall be regarded as the space to be computed in both directions, unless the car be used by the company in the return movement, or otherwise mutually agreed upon.

"New service and additional service may be authorized at not exceeding the rates herein provided, and service may be reduced or discontinued with pro rata reductions in pay, as the needs of the Postal Service may require: *Provided*, That no additional pay shall be allowed for additional service unless specifically authorized by the Postmaster General.

"The Postmaster General is authorized to make special contracts with the railroad companies for the transportation of the mails where in his judgment the conditions warrant the application of higher rates than those herein specified, and make report to Congress of all cases where such special contracts are made and the terms and reasons therefor.

"All cars or parts of cars used for the Railway Mail Service shall be of such construction, style, length, and character, and furnished in such manner as shall be required by the Postmaster General, and shall be constructed, fitted up, maintained, heated, lighted, and cleaned by and at the expense of the railroad companies. No pay shall be allowed for service by any railway post-office car which is not sound in material and construction and which is not equipped with sanitary drinking-water containers and toilet facilities, nor unless such car is regularly and thoroughly cleaned. No pay shall be allowed for service by any wooden full railway post-office car unless constructed substantially in accordance with the most approved plans and specifications of the Post Office Department for such type of cars, nor for service by any wooden full railway post-office car run in any train between adjoining steel cars, or between the engine and a steel car adjoining. After the 1st of July, 1917, the Postmaster General shall not approve or allow to be used, or pay for service by, any full railway post-office car not constructed of steel or steel underframe or equally indestructible material; and all full railway post-office cars accepted for this service and contracted for by the railroad companies hereafter shall be constructed of steel. Until July 1, 1917, in cases of emergency and in cases where the necessities of the service require it, the Postmaster General may provide for service by full railway post-office cars of other than steel or steel underframe construction, and fix therefor such rate of compensation within the maximum herein provided as shall give consideration to the inferior character of construction, and the railroad companies shall furnish service by such cars at such rates so fixed.

"Service over property owned or controlled by another company or a terminal company shall be considered service of the railroad company using such property and not that of the other or terminal company: *Provided*, That service over land-grant roads shall be paid for as herein provided.

"Railroad companies carrying the mails shall furnish all necessary facilities for caring for and handling them while in their custody. They shall furnish all cars or parts of cars used in the transportation and distribution of the mails, except as herein otherwise provided, and place them in stations before the departure of trains at such times and when required to do so. They shall provide station space and rooms for handling, storing, and transfer of mails in transit, including the separation thereof, by packages for connecting lines, and such distribution of registered mail in transit as may be necessary, and for offices for the employees of the Railway Mail Service engaged in such station work when required by the Postmaster General, in which mail from station boxes may be distributed if it does not require additional space.

"If any railroad company carrying the mails shall fail or refuse to provide cars or apartments in cars for distribution purposes when required by the Postmaster General, or shall fail or refuse to construct, fit up, maintain, heat, light, and clean such cars and provide such appliances for use in case of accident as may be required by the Postmaster General, it shall be fined such reasonable sum as may, in the discretion of the Postmaster General, be deemed proper.

"The Postmaster General shall in all cases decide upon what trains and in what manner the mails shall be conveyed. Every railroad company carrying the mails shall carry on any train it operates, and with due speed, all mailable matter, equipment, and supplies directed to be carried thereon. If any such railroad company shall fail or refuse to transport the mails, equipment, and supplies when required by the Postmaster General on any train or trains it operates, such company shall be fined such reasonable amount as may, in the discretion of the Post-Postmaster General, be deemed proper.

"The Postmaster General may make deductions from the pay of railroad companies carrying the mails under the provisions of this section for reduction in service or infrequency of service where, in his judgment, the importance of the facilities withdrawn or reduced requires it, and impose fines upon them for delinquencies. He may deduct the price of the value of the service in cases where it is not performed, and not exceeding three times its value if the failure be occasioned by the fault of the railroad company.

"The provisions of this section shall apply to service operated by railroad companies partly by railroad and partly by steamboats.

"The provisions of this section respecting the rates of compensation shall not apply to mails conveyed under special arrangement in freight trains, for which rates not exceeding the usual and just freight rates may be paid, in accordance with the classifications and tariffs approved by the Interstate Commerce Commission.

"Railroad companies carrying the mails shall submit under oath, when and in such form as may be required by the Postmaster General, evidence as to the performance of service.

"The Postmaster General shall, from time to time, request information from the Interstate Commerce Commission as to the revenue received by railroad companies from express companies for services rendered in the transportation of express matter, and may, in his discretion, arrange for the transportation of mail matter other than of the first class at rates not exceeding those so ascertained and reported to him, and it shall be the duty of the railroad companies to carry such mail matter at such rates fixed by the Postmaster General.

"The Postmaster General is authorized, in his discretion, to petition the Interstate Commerce Commission for the determination of a postal carload or less-than-carload rate for transportation of mail matter of the fourth class and periodicals, and may provide for and authorize such transportation, when practicable, at such rates, and it shall be the duty of the railroad companies to provide and perform such service at such rates and on the conditions prescribed by the Postmaster General.

"The Postmaster General may, in his discretion, distinguish between the several classes of mail matter and provide for less frequent dispatches of mail matter of the third and fourth classes and periodicals when lower rates for transportation or

other economies may be secured thereby without material detriment to the service.

"The Postmaster General is authorized to return to the mails, when practicable for the utilization of car space paid for and not needed for the mails, postal cards, stamped envelopes, newspaper wrappers, empty mail bags, furniture, equipment, and other supplies for the Postal Service.

"The Postmaster General, in cases of emergency between October 1 and April 1 of any year, may hereafter return to the mails empty mail bags and other equipment theretofore withdrawn therefrom as required by law, and, where such return requires additional authorization of car space under the provisions of this section, to pay for the transportation thereof as provided for herein out of the appropriation for inland transportation by railroad routes.

"The Postmaster General may have the weights of mail taken on railroad mail routes, and computations of the average loads of the several classes of cars and other computations for statistical and administrative purposes made at such times as he may elect, and pay the expense thereof out of the appropriation for inland transportation by railroad routes.

"Pending the decision of the Interstate Commerce Commission, as hereinafter provided for, the existing method and rates of railway mail pay shall remain in effect, except on such routes or systems as the Postmaster General shall select, and to the extent he may find it practicable and necessary to place upon the space system of pay in the manner and at the rates provided in this section, with the consent and approval of the Interstate Commerce Commission, in order to properly present to the Interstate Commerce Commission the matters hereinafter referred thereto: *Provided*, That if the final decision of the Interstate Commerce Commission shall be adverse to the space system, and if the rates established by it under whatever method or system is adopted shall be greater or less than the rates under this section, the Postmaster General shall readjust the compensation of the carriers on such selected routes and systems in accordance therewith, from the dates on which the rates named in this section became effective. All railway common carriers are hereby required to transport such mail matter as may be offered for transportation by the United States in the manner, under the conditions, and with the service prescribed by the Postmaster General and shall be entitled to receive fair and reasonable compensation for such transportation and for the service connected therewith.

"The Interstate Commerce Commission is hereby empowered and directed as soon as practicable to fix and determine from time to time the fair and reasonable rates and compensation for the transportation of such mail matter by railway common carriers and the service connected therewith, prescribing the method or methods by weight, or space, or both, or otherwise, for ascertaining such rate or compensation, and to publish the same, and orders so made and published shall continue in force until changed by the commission after due notice and hearing.

"In fixing and determining the fair and reasonable rates for such service the commission shall consider the relation existing between the railroads as public-service corporations and the Government, and the nature of such service as distinguished, if there be a distinction, from the ordinary transportation business of the railroads.

"The procedure for the ascertainment of said rates and compensation shall be as follows:

"Within three months from and after the approval of this act, or as soon thereafter as may be practicable, the Postmaster General shall file with the commission a statement showing the transportation required of all railway common carriers, including the number, equipment, size, and construction of the cars necessary for the transaction of the business; the character and speed of the trains which are to carry the various kinds of mail; the service, both terminal and en route, which the carriers are to render; and all other information which may be material to the inquiry, but such other information may be filed at any time in the discretion of the commission.

"The Postmaster General is authorized to employ such clerical and other assistance as shall be necessary to carry out the provisions of this section, and to rent quarters in Washington, D. C., if necessary, for the clerical force engaged thereon, and to pay for the same out of the appropriation for inland transportation by railroad routes. The Postmaster General shall file with the commission a comprehensive plan for the transportation of the mails on said railways, and shall embody therein what he believes to be the reasonable rate or compensation the said railway carriers should receive. Thereupon the commission shall give notice of not less than 30 days to each carrier so required to transport mail and render service, and upon a day to be fixed by the commission, not later than 30 days after the expiration of the notice herein required, each of said carriers shall make answer and the commission shall proceed with the hearing as now provided by law for other hearings between carriers and shippers or associations.

"All the provisions of the law for taking testimony, securing evidence, penalties, and procedure are hereby made applicable.

"For the purpose of determining and fixing rates or compensation hereunder the commission is authorized to make such classification of carriers as may be just and reasonable and, where just and equitable, fix general rates applicable to all carriers in the same classification.

"Pending such hearings, and the final determination of the question, if the Interstate Commerce Commission shall determine that it is necessary or advisable, in order to carry out the provisions of this section, to have additional and more frequent weighing of the mails for statistical purposes, the Postmaster General, upon request of the commission, shall provide therefor in the manner now prescribed by law, but such weighing need not be for more than 30 days.

"At the conclusion of the hearing the commission shall establish by order a fair, reasonable rate or compensation to be received, at such stated times as may be named in the order, for the transportation of mail matter and the service connected therewith, and during the continuance of the order the Postmaster General shall pay the carrier from the appropriation herein made such rate or compensation.

"Either the Postmaster General or any such carrier may at any time after the lapse of six months from the entry of the order assailed apply for a reexamination, and thereupon substantially similar proceedings shall be had, with respect to the rate or rates for service covered by said application, provided said carrier or carriers have an interest therein.

"For the purposes of this section the Interstate Commerce Commission is hereby vested with all the powers which it is now authorized by law to exercise in the investigation and ascertainment of the justness and reasonableness of freight, passenger, and express rates to be paid by private shippers.

"The Interstate Commerce Commission shall allow to railroad companies whose railroads were constructed in whole or in part by a land grant made by Congress on condition that the mails should be transported over their roads at such price as Congress should by law direct only 80 per cent of the compensation paid other railroads for transporting the mails and all service by the railroads in connection therewith.

"The existing law for the determination of mail pay, except as herein modified, shall continue in effect until the Interstate Commerce Commission under the provisions hereof fixes the fair, reasonable rate or compensation for such transportation and service.

"That the appropriations for inland transportation by railroad routes and for railway post-office car service for the fiscal year ending June 30, 1917, are hereby made available for the purposes of this section.

"That it shall be unlawful for any railroad company to refuse to perform mail service at the rates or methods of compensation provided by law when required by the Postmaster General so to do, and for such offense shall be fined $1,000. Each day of refusal shall constitute a separate offense."

And the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment as follows: Page 48, line 15, in line 16 of the amendment strike out all of the balance of the amendment after the word, "Commission," and in lieu thereof insert the following: "after thorough and independent consideration by that body in such manner as it may determine"; and the Senate agree to the same.

JOHN A. MOON,
D. E. FINLEY,
H. STEENERSON,
Managers on the part of the House.
J. H. BANKHEAD,
T. W. HARDWICK,
CHAS. E. TOWNSEND,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference of the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes, submit the following written statement explaining the effect of the action agreed upon.

The Post Office appropriation bill as it passed the House carried a total appropriation of $320,559,879. As amended by the Senate the total appropriation was $322,184,579. As agreed to by the committee of conference the bill now carries a total appropriation of $322,206,579.

The following statement shows the action taken by the conference on each of the Senate amendments:

Amendment No. 1: Authorizes the Postmaster General to have plans prepared for the erection of a building for an equipment shop and appropriates $200,000 out of any money in the Treasury not otherwise appropriated. And the House agrees.

Amendment No. 2: Makes more specific the persons who shall receive compensation for injuries received when on duty. And the House agrees.

Amendment No. 3: Provides for extension of leave of absence for employees on account of illness and for those called into the military service of the United States. And the House agrees with an amendment.

Amendment No. 4: Provides for the compensation at $6,000 per annum of a special Assistant Attorney General to assist in defense of cases against the United States arising out of transportation of mails. And the House agrees.

Amendments Nos. 5 and 6: Relating to the compensation of postmasters. And the House agrees.

Amendment No. 7: Relating to post-office station, Cambridge, Mass. And the House agrees.

Amendments Nos. 8 to 16, inclusive: Relating to the compensation of assistant postmasters, increasing the number in different grades of salaries on account of growth of the service, and provides the necessary increase in appropriation. And the House agrees.

Amendment No. 17: Amends section 5 of the act approved August 24, 1912, so as to include in provisions special clerks. And the House agrees.

Amendment No. 18: Enables the Postmaster General to carry out the provisions of the act of March 2, 1907. And the House agrees.

Amendment No. 19: Relates to compensation to printers, mechanics, and skilled laborers. House provision restored and the amount of appropriation corrected. And the House agrees with an amendment.

Amendment No. 20: For compensation to watchmen, messengers, and laborers. Amount of appropriation corrected to agree with number of persons in salary grades. And the House agrees.

Amendment No. 21: Relates to contract postal stations. Proviso stricken out because now provided for in the postal savings act. And the House agrees.

Amendment No. 22: To make harmonious with other legislation affecting clerks and employees. And the House agrees.

Amendment No. 23: Increase in appropriation for compensatory time allowed for holiday work. And the House agrees.

Amendment No. 24: Making law permanent by adding the word "hereafter." And the House agrees.

Amendment No. 25: Specifies the holidays for which compensatory time will be allowed. And the House agrees.

Amendment No. 26: Increases the appropriation for unusual conditions in the Postal Service. And the House agrees.

Amendment No. 27: Provides for assistant postmasters at third-class post offices. And the House agrees.

Amendment No. 28: Provides for promotion of 5 per cent of carriers in second-class post offices from fifth to sixth grades. And the House agrees.

Amendment No. 29: Makes appropriation for the above and also provides for carriers assigned to Detroit River postal service. And the House agrees with amendment.

Amendment No. 30: Increases the appropriation on account of compensatory time allowed for holiday service. And the House agrees.

Amendment No. 31: Screen-wagon service, etc. Amending the act of May 17, 1878. And the House agrees.

Amendment No. 32: Mail messenger service. Authorizes the Postmaster General to employ postmasters, assistant postmasters, and clerks to carry the mail. And the House agrees.

Amendment No. 33: Pneumatic-tube service. Authorizes the continuance of existing contracts. And the House agrees with an amendment.

Amendment No. 34: Relates to fees for special-delivery messengers. House proviso stricken out. And the House agrees.

Amendment No. 35: Amends act approved July 1, 1916, with an amendment. House agrees with an amendment.

Amendment No. 36: Strikes out provision inserted by the House. Already provided for in existing law. And the House agrees.

Amendment No. 37: Relating to disposition of dead letters. And the House agrees.

Amendment No. 38: Provides for service by aeroplanes. And the House agrees.

Amendment No. 39: Provides for transportation of postal officials while on official business. And the House agrees with an amendment.

Amendment No. 40: Reduces appropriation $900,000 for salaries for railway mail employees. And the House agrees.

Amendment No. 41: Relates to assignment of railway mail clerks and to clerks in terminal railway post offices. And the House agrees with amendment.

Amendment No. 42: Provides for 15 days' vacation for railway postal clerks and increases the appropriation $700,000. And the House agrees.

Amendment No. 43: Provides for the transfer of post-office clerks to railway post offices and railway postal clerks to post offices. Senate recedes.

Amendment No. 44: Increases the amount $370,000 for transportation of foreign mails. And the House agrees.

Amendment No. 45: Reduces the appropriation $25,000 for mechanical mail-handling devices and inserts the word "rental." And the House agrees with amendment restoring the appropriation.

Amendment No. 46: Relates to Rural Delivery Service. And the House agrees with amendments.

Amendment No. 47: Authorizes the Postmaster General to conduct experiments in the Parcel Post Service and provides $10,000 for that purpose. And the House agrees.

Amendment No. 48: Increases the appropriation for the village delivery service, and fixes the salary of the carriers. And the House agrees with an amendment.

Amendments Nos. 40 to 53, inclusive: Stricken out. Provided for in existing law. And the House agrees.

Amendment No. 54: The "blue-tag" service. And the House agrees with an amendment.

Amendment No. 55: Relates to civil-service employees. Senate recedes.

Amendments Nos. 56 to 61, inclusive: Stricken out. Provided for in existing law. And the House agrees.

Amendment No. 62: Relates to railway mail pay for the transportation of the mails. The Senate amendment, known as the Cummins amendment, refers the matter to the Interstate Commerce Commission for investigation, with power to fix the rates of compensation. As agreed upon by the conferees parts of the so-called Moon bill and part of the Cummins amendment adopted, both being modified. The Interstate Commerce Commission is authorized to put in the space system on certain routes or systems for "tests" if it desires to do so, for statistical purposes. And the House agrees with amendments.

Amendment No. 63: Relates to parcel post. Provides for methods of modification in rates and zones by reference to Interstate Commerce Commission. And the House agrees with an amendment.

Amendment No. 64: Extending second-class rates of postage to publications by State boards or departments. And the Senate recedes.

JOHN A. MOON,
D. E. FINLEY,
H. STEENERSON,
Managers on the part of the House.

The SPEAKER. The gentleman from Tennessee [Mr. MOON] is recognized for 1 hour and 10 minutes.

Mr. MOON. Now, Mr. Speaker, the time necessary for the reading of that statement has been taken, and not a man in this House has heard a word of it, I am sure. It becomes necessary that the material part of the report be explained to the House.

There are a number of amendments made by the Senate that simply changed the phraseology and made it better than that of the House, to which we agreed. There were a number of amendments in which the appropriations were reduced or increased slightly. It is not necessary that I call attention to those. But to the four or five vital propositions involved in dispute between the two Houses I desire to call the attention of the House briefly.

On the question of the Rural Mail Service of the United States there was very much disagreement. The Senate, by its amendments, proposed to place restrictions upon the department other than those provided for by the general law creating the rural delivery. The question was debated by the conferees very fully, and we at last agreed that the standard route should be 24 miles in length and that the routes might be increased or decreased, but if increased the extent of the increase should be 50 per cent, or 36 miles, and $24 should be paid for each additional mile over 30.

Mr. STAFFORD. Mr. Speaker, will the gentleman permit me right there——

Mr. MOON. Yes.

Mr. STAFFORD. I have before me the law where the standard route of 24 miles is increased to 30 miles. Is it in excess of the 24 or the 30?

Mr. MOON. It is in excess of the figure placed there as a standard—24 miles. We pay, for all over 30 miles, additional.

It is provided that automobile routes may be 50 miles in length, and they are to be established only on a written petition of the majority of the heads of families who are patrons upon that route. The Postmaster General is given the discretion, by changes made in the Senate amendment, to require proper and efficient equipment upon all of these routes. This section is not satisfactory to the department.

There is a provision in the same section, placed there by the Senate, that requires the payment by the United States of what may be termed back pay to rural carriers. In other words, in a recent act under which we were operating $1,200 was fixed as the maximum pay of rural carriers. The comptroller construed the act of 1914 with the act of 1902 and held that the maximum of $1,200 did not necessarily have to be paid under the rules and regulations of the department to the carrier. The result was that that maximum pay was not given in all cases.

Now, the Senate conferees felt that while the law probably was so drawn that under its technical construction that payment should not be forced or could not be forced, yet a moral obligation rested upon the Congress to carry out what its intent and purpose was in that enactment. I want to say for myself, as one of those conferees, that I do not believe the law, when all the acts of Congress on the subject are considered together, authorized or justified that payment, and it has been so held in a written opinion by the comptroller. I expressed that opinion then. I do not believe that any moral obligation rests upon the Congress for this back pay, because I can not see how a moral debt can arise under a condition where Congress failed to put the words into law which it is said it meant to put in to give the maximum pay.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. MOON. The gentleman will excuse me just a minute.

Mr. COX. All right. It was right in that connection.

Mr. MOON. I do not want to pause right in the midst of this question. The views I entertained did not prevail. The conferees of the House—the other two—and those of the Senate agreed to place in this bill an appropriation for the payment of this back pay amounting to $2,500,000.

I am not dissenting from the judgment of the conferees upon this question to the extent of asking this House to fail to adopt that provision of the bill, because the momentous questions settled by the whole act are of too great interest to the American people to be justly a rejection of the report on that.

I say now, as I said to the gentleman in this House who on all occasions seems more than anxious to do the behests of the rural carrier, that I believe in proper pay of rural carriers, but that a limit has come. I said then that under the law, as I understood it, when the last act was passed, you could not get the maximum. In your anxiety to make law in the interest of the carrier you overreached your legal vision and failed to make known what was your intent upon that question. And now I am going to say to you again you had better look to the construction if you expect them to get this money under this act of Congress in connection with the other act of Congress on this question. But I did not draft this provision, I did not report it, and am not responsible for it, because I think more of the Treasury and of the rights of the American people than I do of the rural carriers or any other employees of this Government, as much as I like them. [Applause.]

But, as I said, I am not dissenting. The importance of this measure is too great to justify a dissent now upon that question.

There is another question with which we had to deal that is of profound importance to the American people. It is the question of the parcel post, and when we come to the explanation of the railway mail proposition of this bill I hope to be able to demonstrate to this House, if I have time, the close connection between that proposition and the question of railway mail pay and the necessity on the part of this Government for the inauguration of a policy that will preserve, foster, encourage, and extend the parcel post for the benefit of the American people within the limit of the cost of the service. I shall, Mr. Speaker, being subject possibly to the charge of immodesty, make an observation on the question of the parcel post origin in the United States. A great many people claim to be the originators of the parcel-post proposition. There is no man now living who originated that proposition. It was the suggestion of hundreds of different people in all sections of the civilized world. It was taken up in the United States only a short while ago.

There were a hundred bills or more that went to various committees upon that question. I want to call attention to a fact that will be remembered by Members of this House and is shown in the RECORD, that the Post Office appropriation bill contained a section on the subject of rural parcel post which was a copy of the bill that I had introduced and which was before the committee, and there was nothing new in it; not a thing.

Mr. SIMS. In what year?

Mr. MOON. When the present law was passed it was incorporated in the Post Office bill, and on the floor of this House I moved a substitute for that proposition, and that substitute was passed by this House, enlarging the extent and scope of the service. That went to the Senate, and in conference on the disagreeing votes of the two Houses the Senate and House conferees directed the Senator from Oregon [Mr. Bourne], chairman of the Senate Committee on Post Offices and Post Roads, and myself as chairman of the Committee on the Post Office and Post Roads in this House, to draw a parcel-post law. We drew the law that is on the books to-day. It was approved by the conferees and passed by the House. I have referred to this before. There was more work done by Mr. Bourne in the drafting of that bill than was done by myself. We combined the features of the House and Senate measures and added others. I do not care for any personal credit, but I have never heard any man say that Jonathan Bourne was entitled to any credit on that subject. I am here to assert that he is entitled to more credit than any other living man for the parcel post. [Applause.]

I mention this to show you the profound interest that I must have had in this question. The Senate proposed so to hamper and hedge about the department on the question of the extension of zones, the weights and rates, that in connection with the present method of compensation for carrying the mail and the deprivation of space pay your parcel post would have been absolutely destroyed. They wanted the Interstate Commerce Commission to have an independent and separate hearing and an investigation of the whole question that would in effect have required that commission to go into the consideration of rates for first, second, third, and fourth class mail matter, and a separation of all rates and compensation on all these classes of matter before they could have determined the result as to the parcel post. Finally we agreed that the Interstate Commerce Commission should give a separate or independent consideration to the question in such manner as they saw fit and reenacted the whole of the old law on the subject. That leaves it exactly as it was, with the 50-pound limit stricken out. The Postmaster General may go to the Interstate Commerce Commission to-day and upon such consideration as they want to give, without going into the whole question of railway mail rates, action may be taken upon any new question as to change of zones or rates or weights, and so forth.

Mr. RANDALL. Will the gentleman yield?

Mr. MOON. Yes.

Mr. RANDALL. Will the gentleman state what is the practical difference between the amendment adopted by the conference committee and the Senate amendment?

Mr. MOON. Yes; it is with reference to the view that the Interstate Commerce Commission would take as to the legislative intent. In view of the fact that heretofore the Interstate Commerce Commission have simply considered the matter on the request of the Post Office Department, and have not given any special hearings on it, under the Senate proposition we thought they would have regarded the intent of Congress to be that they should have separate, independent hearings at which the railroads and express companies might be heard and the whole question of rates and zones be considered. Now the language is substantially that they may consider it in such manner as they may suggest.

Mr. RANDALL. Is it not a fact that the conference report required that the Postmaster General shall not make any different arrangement of zones or rates? Is not the Postmaster General prohibited from recommending any changes to the commission? Is not the commission given the absolute power to hold an independent hearing?

Mr. MOON. If the gentleman will look at the present law he will see that it gives to the Postmaster General full power to change rates, zones, and weights on application, and by consent of the Interstate Commerce Commission. That is the law to-day.

Mr. RANDALL. Yes; but under the conference report he is prohibited from doing that, and from recommending——

Mr. MOON. Oh, no; he is not prohibited from doing that at all in the conference report.

Mr. RANDALL. Under the language——

Mr. MOON. Will the gentleman read to me some language that says he is prohibited from doing that?

Mr. RANDALL. On page 62 of the bill:

That before any change is hereafter made in weight limit, rates of postage, or zone or zones by the Postmaster General, the proposed change shall be approved by the Interstate Commerce Commission after a thorough and independent consideration by that body in such manner as it may determine.

Mr. MOON. Exactly.

Mr. RANDALL. Now, what does an independent consideration mean?

Mr. MOON. It means the consideration of the matter that they desire to make, that is all.

Mr. RANDALL. It means a consideration of evidence taken independently.

Mr. MOON. Of course they can take independent evidence or not. There is no objection to that. The gentleman is making a difference 'twixt tweedledum and tweedledee. There is absolutely nothing in that, because to-day, under the law as it is now written, regardless of this bill, the Postmaster General may go to the Interstate Commerce Commission, and that commission can, if it sees fit, have a separate independent hearing and consideration of any proposition he may make, and they may take his statement and act upon that, as they have done, in the matter about which the complaint was made. Now this language here in legal effect does not make any change in the spirit of the law, in my judgment.

Mr. RANDALL. Will the gentleman yield long enough to have the views of the Postmaster General read from the desk?

Mr. MOON. No. I am not going to yield any further. The views of the Postmaster General have been before us, and I think if the gentleman does not understand the language that is used there as we understand it, one or the other is unfortunate in that.

Mr. SIMS. May I ask my colleague about the subject he has already been discussing?

Mr. MOON. Yes.

Mr. SIMS. If I caught my colleague's words correctly, if the Senate amendment had been agreed to by the conferees, the opinion of my colleague is that it would have very much hampered and throttled the parcel post?

Mr. MOON. I think so. I think the language in which the Senate amendment was put restricted too closely the power of the Postmaster General and imposed too much of an obligation on the commission to make a separate and independent hearing—that it might involve a hearing on all the questions of rates and zones and weights—and therefore it was changed from hearings and independent reports, and so on, to the language contained in the report.

Mr. RANDALL. The language of the conference report is practically the language of the Senate amendment, is it not?

Mr. MOON. Oh, no. The gentleman does not know what he is talking about if he thinks that.

Mr. SIMS. I should like to finish my inquiry. The conferees of the House, having in view the preventing of any such result as was apparent in the Senate amendment, have agreed to the adoption of the language that is now carried in the conference report——

Mr. MOON. Of course.

Mr. SIMS. Upon the theory that the House conferees have negatived the evident purpose of the Senate amendment, the Interstate Commerce Commission will not feel called upon in a mandatory way to do more than is practically being done under existing law.

Mr. MOON. That is true.

Mr. SIMS. I want to ask my colleague further if this Senate amendment which has been eliminated was suggested by the Postmaster General or the department, or has there been any demand for it throughout the country?

Mr. MOON. No; there has been no demand that I am aware of.

Mr. SIMS. I mean through Members of the House so far as the gentleman knows. I am referring to such legislation as was put in the Senate amendment which is now eliminated. Does the gentleman know for what reason the amendment was adopted which in his judgment would have practically throttled the parcel post?

Mr. MOON. I know things that I can hardly establish by proof, and I dislike to draw inferences too close from facts.

Mr. SIMS. May I say that I am very much interested in the parcel post, as the gentleman is; but I do not know half as much. I am interested in the great work of the Interstate Commerce Commission, and this bill increases their duties in addition to those the law now puts upon them. This House passed a bill increasing the Interstate Commerce Commission by three members to enable them to do what the law has imposed upon them. If the Interstate Commerce Commission is going to have it thrust upon them to make investigations, especially with relation to the Post Office Department, it seems to me we are loading it down with a lot of inconsistent and divergent duties which will make it impossible for them to perform them.

Mr. MOON. I have already said about that same thing. The whole amendment that is there now is the present law except the latter clause which seems to restrict the commission in the investigation of questions that would impose upon the rights of the Post Office Department, and they have been modified.

Mr. SIMS. The work will be concurrent and not independent, and in no sense antagonistic.

Mr. MOON. Now, Mr. Speaker, I am going to leave this subject and take up another. There is another question in reference to the pneumatic-tube service which is in vogue in some larger places of the country. These contracts lapsed on the 30th of June, but were extended under the operation of the law by the Postmaster General for six months. The two companies have desired an extension for 12 months. The department is possessed of information by which they believe that in some places the service can be rendered for less than the amount now paid, which is $17,000 a mile. As to whether this may be done or not is not certain, but it was attempted in this bill to extend the contract 12 months. It was thought best to extend them two months beyond what the Postmaster General determined in order that Congress might have an opportunity to pass on the question in the next session. Therefore they directed the extension of the contract to the 4th of March next. That is not satisfactory to the department, but it is to a majority of the conferees.

Mr. MADDEN. Will the gentleman yield?

Mr. MOON. Yes.

Mr. MADDEN. Why did the conferees tie the hands of the Postmaster General in this connection by authorizing and directing him to do the thing that he is required to do here? He has never been directed before.

Mr. MOON. I know that a great many things have never been done before which ought not to be done now, and this is perhaps one of them.

Mr. MADDEN. Here is a case where the Post Office Department has the right under the law to extend a contract six months, which it did. There was a commission investigating the propriety of continuing or abandoning the service, and the facts are, as the record will show, that at least $7,000 a mile can be saved on the rent of these tubes.

Mr. MOON. The gentleman is taking up my time without asking his question.

Mr. MADDEN. I am coming to the question now. I was curious to know whether the conferees felt——

Mr. MOON. The conferees thought just this much about it: The tube companies protested that it was a practical confiscation of their property. They did not want to do that. They did not believe that we would be justified in extending it 12 months at a cost of $17,000 a mile when it might be operated for $10,000 a mile. They did not think it was wise to make it six months, because Congress would not have an opportunity to act upon it in that time. So it was extended, because there could be no harm done. It is an open question, and it was thought fair to leave the situation here so that both sides may be heard.

Mr. MADDEN. Did the conferees take into account the fact that the Postmaster General had the power to advertise for new bids and might save $7,000 a mile without any act of Congress?

Mr. MOON. The pneumatic-tube service is a special system for the transmission of the mails. It is possible that the new pneumatic tubes may be made to give the same service for less, but it is by no means certain. Of course, the superservice—above the tubes; on the ground—might be rendered at a less cost to the Government, but at the same time at a greater disadvantage to the public in many respects. It is a great question that affects the public rights and the rights of the people who have millions of dollars invested in the service, and it ought not to be disposed of until the truth can be ascertained. Personally I have never favored the service and regard it as useless, but others think otherwise.

Now, Mr. Speaker, the mail-bag repair shop at Washington is a very unhealthy and incommodious plant. This bill provides for a new building, sanitary in every respect, at a cost of $200,000. This is an amendment put on by the Senate and agreed to by the conferees of the House. The present building costs $32,000 rent. Six per cent on the new building cost would be only $12,000, and the Government can get money at less than that. It would be a saving of $20,000 a year, and therefore we agreed to that.

Now, there are a vast number of propositions here that might be discussed with some profit. I want to go to the main proposition of this bill and present the features of the railway mail proposition, the proposition of the Government to the roads and the roads to the Government, for a few moments to see if the conferees had reached a conclusion that is just to the people and just to the railroads.

Under the present weight-basis law, with some amendments, the Government has been paying for carrying the mails since 1873. The cost to the Government in round numbers in that year was about $7,000,000. It has increased until this year it will be about $64,000,000, an increase that is apparently abnormal compared with the increase of commercial transactions for railroads in this country. It is continually growing, more and more.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. MOON. I do not care to yield when I have started to discuss a question like this, but I will yield to the gentleman.

Mr. MADDEN. I was just wondering if the chairman of the committee would state to the House how the $7,000,000 compared with the receipts of the Post Office Department at the time it cost $7,000,000, as compared with the condition to-day?

Mr. MOON. I do not know. Those are figures that the gentleman will have to get up himself. I could not offhand tell him that. Mr. Speaker, if I may not be interrupted again, and I hope I shall not be for a few moments, I want to say that the great railroads of the United States have been well treated by this Government on the question of compensation for carrying the mails. The great transcontinental lines that have received 158,000,000 acres of land as a donation by the American people have been well treated. In view of that which has been done for them, in view of the understanding at the time that it was done, this bill will carry only 80 per cent of its maximum pay to that class of land-grant railroads. Under this basis of weight, as I said, we have been operating for years, and it has been so entirely unsatisfactory that the chief officers of the department, the Postmasters General, their assistants and clerks, have never been able to come within $15,000,000 per annum of what the legitimate pay may or should be. This committee has undertaken to remedy that situation, to establish a more satisfactory, more accurate, more adequate, and just rate of compensation for the railroads for carrying the mails, one that will compensate them fully, one that will protect the Treasury of the United States from that progressive advance in pay that comes, as I have said, abnormally every year, as the result of the present system.

I need not enlarge upon the subject of the railway mail proposition, as contained in the House bill. It is sufficient to say that by that plan we can obtain accuracy, we can know just exactly what all mail costs for its transportation and its handling; we can provide the means under the plan proposed in the House bill for the protection of the public upon that question, a question that has been open and fought over now for more than 40 years, a great subject of controversy, and we hoped to settle it by the House bill. That was as fair a bill as could possibly be drafted. There has been one commission appointed to determine this question between the railroads and the people, and the railroads fought off action under that commission. Another commission was appointed, and they fought off action under that commission; and then came this bill, and they proposed that the whole subject should be relegated for consideration to the Interstate Commerce Commission—for the purpose of delay and for the purpose of preventing any action that would affect the present status, and in order to accomplish that purpose they have maligned and traduced the Postmaster General of the United States for 12 months, as well as the chairman of this committee and other Members, for daring to advocate a policy that was in the interest of the people. They are powerful. The railroad association opposing any new law represented 274,000 miles of railway, and was supported by a vast majority of the papers. But I shall not review the features of that bill, which is a complete plan and system within itself, with the rates fixed justly, with the provision for a private contract where roads have felt to be unjustly treated; with a further provision for Interstate Commerce Commission intervention where 51 per cent of them felt they were not properly treated. That was the House bill. It went to the Senate, and the Senate struck out every line of the House bill and provided that the whole question of plan and rates should go to the Interstate Commerce Commission for settlement, and that that commission should fix the rates. It was in that attitude that the conferees of the two Houses met. The result as reported to you here is rather meagerly stated in the statement of the conferees on the part of the House, and possibly may be misleading. I shall read what we have said, and I shall read from the bill to show the possible error, although the statement technically perhaps states the case. But I want to be entirely frank with you. I do not want you to think a thing is going to happen under the peculiar legal language that sometimes looks one way and means another. I want you to know just what has happened. We state (and I will explain in a few minutes what we mean):

> The Senate amendment, known as the Cummins amendment, refers the matter to the Interstate Commerce Commission for investigation, with power to fix the rates of compensation; as agreed upon by the conferees, parts of the so-called "Moon" bill and part of the Cummins amendment adopted, both being modified. The Interstate Commerce Commission is authorized to put in the space system on certain routes or systems for "tests" if it desires to do so, for statistical purposes.

That is true. That statement is not full enough, and you will not get from it, meager as it is, the exact meaning of it. The conferees on the part of the House and the Senate reenacted in the amendment that is now before you almost every word of the House bill. The Senate had struck it all out. The conferees have put it all back except one or two sections, to which I shall refer, and we added other sections germane to the subject matter for the purpose of perfecting the space system. We took out of the House bill the proposition that fined the railroad companies $5,000 for failure to carry the mail. We took it out of the House bill and modified it in that respect, because it came at a better place in an amendment proposed by the Senate, and the Senate amendment on that subject we adopted. We struck that from the House section and adopted the Senate amendment, which provided that railroads that refused to carry the mail according to the contract proposed by the Postmaster General under the law—and, of course, that had to be a contract that would not be confiscatory in its nature—would be obliged to carry it. The Cummins amendment provided a thousand-dollar fine, and each day's refusal would be an offense. We thought that better than the House proposition. The railroads have contended that they ought not to be subjected to this summary process. Under the law to-day you can not make the railroad carry the mail unless it wants to without going into the courts and forcing the railroad companies to accept the mail as any shipper may force a common carrier to accept in proper shape the matters that he has for shipment. It would follow that the courts would issue not, as is the usual practice, a peremptory mandamus, but the alternative writ, and at the conclusion the peremptory writ might be used as the judgment of the court, and the roads forced to carry the mail; but in the meantime there would be no public service, and this might last for years or more. Two railroads have now notified this Government that they are not going to carry this mail any longer—one in Ohio and one in Louisiana. Watch them carry the mail when this bill becomes a law. They can not stand a thousand-dollar-a-day fine. The people will get the service. If they can show under the law that they are not being paid enough, then the fine will not be operative, and they will get compensation. It would seem from the report that I read that this bill of the House is to be used only as a test proposition. I do not want to deceive you in that way.

The full text of the House bill, which contains many and various laws in the postal system and is a practical reenactment of all of them, making them conform to the provisions of the space basis, will go into effect. Now, it does not appear so from the reading possibly, but I will explain to you why. Here is the language, coupling together the House bill and the Senate provision (by which the Interstate Commerce Commission shall at last make the test of the efficacy of these two methods, the railway mail transportation and pay):

> Pending the decision of the Interstate Commerce Commission, as hereinafter provided for, the existing method and rates of railway mail pay shall remain in effect, except on such routes or systems as the Postmaster General shall select, and to the extent he may find it practicable and necessary to place upon the space system of pay in the manner and at the rates provided in this section, with the consent and approval of the Interstate Commerce Commission, in order to properly present to the Interstate Commerce Commission the matters hereinafter referred thereto: *Provided*, That if the final decision of the Interstate Commerce Commission shall be adverse to the space system, and if the rates established by it under whatever method or system is adopted shall be greater or less than the rates under this section, the Postmaster General shall readjust the compensation of the carriers on such selected routes and systems in accordance therewith, from the dates on which the rates named in this section became effective. All railway common carriers are hereby required to transport such mail matter as may be offered for transportation by the United States in the manner, under the conditions, and with the service prescribed by the Postmaster General and shall be entitled to receive fair and reasonable compensation for such transportation and for the service connected therewith.

Now, that means that the new system of space will not be effective, but that the old system will remain as it is. How long? Until the Postmaster General, with the assent of the Interstate Commerce Commission, shall substitute the new plan or system for the old. He may do it on part of some roads, a

certain system, or he may take them all. If you will think a moment about it, it will be evident to you that in the consummation of a great plan for transportation of mails in a country like this, where the conditions in one place are entirely different from those in another, covering a vast area of country like ours, if you were to take one zone, one mailing division, of your country and make a test upon that, while you might reach a conclusion that would give adequate compensation and provide properly for the transportation of your mail in that system, it would not and could not determine what would be the proper and just system in another division of your country. The result inevitably must be that you must have a trial of the space basis practically over the whole of the United States, as well as a reweighing, in order to obtain those statistical facts which, placed in connection and comparison with each other, will enable the Interstate Commerce Commission to determine that system which is best, the rates that are fair, and that are just. You can not do it in any other way.

Theoretically it is well that we propose provisions to the space bill, for, theoretically, they are clear, but who knows what the practical effect of them may be. So as to the weight proposition, you have got to test it out to obtain the practical statistics as to both propositions in order to reach a correct conclusion in behalf of the Government and in behalf of the railroad. These things, of course, will be apparent to the Interstate Commission, and they will give their assent to a trial of this question over the whole country unquestionably. How do I know it? A thoughtful consideration of the question would drive you and me to that conclusion. It is inevitable. But more than that, and that is where I want to be frank with you about it, the Post Office Department officials have reached the conclusion that there can be no adequate system devised by a mere selected route here and there to determine this question. It has reached the conclusion that roads of certain classes must be represented in the consideration of this question, and that practically the whole of the United States must go under the space-basis system in order that we may know what is the ultimate justice and right to the roads and to the people on that question. Fortunately we are not in the dark as to the view of the Interstate Commerce Commission. That commission, when this question was put to them, addressed a letter to the Post Office Department, in which they say in substance that it is of the utmost importance that as many of the roads as may be necessary shall be put under the space system in order that they may determine that fact; that they can not determine so well a question by the presentation of a theory as by the demonstration of the actual facts, which we all understand to be true.

So, in voting upon this measure, vote upon it with the realization of that which must occur, that the law which you passed in this House, with the exception I cited, is going into effect, every line and letter; that the country may be placed nearly altogether, if not altogether, under the space basis; and that it will be done with the assent not only of the Postmaster General, as provided in this law, but that tribunal which must ultimately dispose of this question.

We provide that which I think is very just and proper here, namely, that if in the final solution of this question it be found that the space basis is not the proper basis, the railroad company shall be paid upon a weight basis or by some other means by which they can obtain adequate compensation for the services rendered during the time of the pendency of this investigation.

A fortunate thing about this is, if we agree, that we end a controversy that has lasted almost half a century. We end it upon the broad and sound principles of common sense and common justice. We end it with the protection of the rights of the people and the protection of the rights of the railroad companies. No just man ought to want more; no just man ought to want less.

Now, Mr. Speaker, I have said in a general, offhand way what I desire to say about this matter. I might talk a day or two to you on the provisions of this bill, because they are exceedingly interesting, but I want to make this observation before closing. I have never in my life known such a desperate fight by corporate power against just legislation as the railroads of this country have put against this measure. They have demanded the commission. We give them the commission, satisfied that under the plan we have adopted they can no longer deprive this Government of a proper service at just compensation. I would not speak, perhaps, of the Postmaster General but for the vile and malicious warfare that these people have waged in the newspapers of the country against him and this committee, though we sought at no time to do anything but absolute justice to them, to be liberal with them under all circumstances, because we realized the value and the greatness of the corporations of this country, the necessity for their existence, for the upbuilding of the commerce and maintenance of the social relations of the people throughout the domain of this great Government. We could not afford to be unjust to them. We can not afford to let them longer proceed under the policy that we know is unjust to the people. Let it be settled as it is, as we propose in this measure. The energies of the Postmaster General have been directed to this end all along. And while many of you gentlemen in the House have felt called upon to censure him very severely in the interests of your rural carriers and your routes and for other matters, you seem to have forgotten that he is at the head of the great department of Government, that he must protect through the instrumentalities of that office unfair and unjust raids from every source against the integrity of his department and the Treasury of his country. You take your own routes in your district and you will have a proposition that you would apply as though you were controlling all. Do not you know that he has 46,000 of them to look after and their administration? Do you know that he has had to look closely to the contracts on the pneumatic-tube question? Do not you know that he understands that you do not have a conscious responsibility for the discharge of the duties and the functions of his office as you have for your own?

I want to say to you deliberately I do not believe that this House on the question of rural routes and other matters has been either fair or just to the Postmaster General. The State that complained most had less cause on examination.

Mr. MADDEN. Mr. Speaker, will the gentleman yield for a question right there?

Mr. MOON. Not at this moment. It is an office in which $320,000,000 of money is expended yearly, and in which there are 270,000 operatives. You, as the legislative masters of your country, ought to be more tolerant with his administrative officers when they attempt to do that which is best, in their judgment, for their country, even when it does not meet with your approval or mine. And I am going to say that which I have never said before. Take it from beginning to end and eliminate every partisan consideration; take into consideration the things that he has had to deal with, the trials that have confronted him, the means that have been put at his disposal, and the assaults that have been made against him and I believe there has never been in the history of this Government a Postmaster General so grandly and profoundly loyal to the department, so true to all those ideas that challenge our admiration as Albert Burleson. [Applause.] I know of but one other man to-day, and that because of his more extensive field of duty and responsibility, who has loyally at heart any more than Burleson has the welfare, the honor, the dignity, the peace, the prosperity, and the glory of a great people, and that man is Woodrow Wilson. [Applause on the Democratic side.]

The SPEAKER pro tempore (Mr. RAGSDALE). The gentleman from Minnesota [Mr. STEENERSON] is recognized for 1 hour and 10 minutes.

Mr. STEENERSON. Mr. Speaker, I am in favor of agreeing to this conference report. I want to compliment my friend, the chairman of the Committee on the Post Office and Post Roads, for the diplomacy and the skill with which he conducted the proceedings of the conferees on the part of the House, and I want to say that to him is largely due the fact that we have reached an agreement which I think is satisfactory to everybody on both sides of this Chamber, at least so far as the mooted question of railway mail pay is concerned.

It may perhaps be appropriate to make a few remarks on that subject, although it is a somewhat intricate one. I want to remind you of the fact that the bill as it passed the House contained a complete provision for the ascertainment of railway mail pay by what is known as the space plan, as contradistinguished from the weight plan, which for 40 years has been the law of the land.

We have before us in this conference report that space plan; that is, we have a law providing for the space plan as completely—and, in fact, more completely—than when the bill left the House. The existing law provides for the ascertainment of the pay by weight. The Senate struck out our provision for space, but we reinserted it. We inserted a provision that the whole subject matter of railway mail pay and the question of what method of ascertainment of that pay should be adopted should be referred to the Interstate Commerce Commission. We have agreed to that; but we have also provided that the Postmaster General may designate a system of railroads and put in force the space plan as outlined in this statute.

However, the extent of this experiment must be approved by the Interstate Commerce Commission, the law directing that

a sufficient area should be used in order to have a fair experiment and to determine the merits of the two contending plans.

Mr. FOCHT. Mr. Speaker, will the gentleman yield?

Mr. STEENERSON. I yield to the gentleman.

Mr. FOCHT. I will ask the gentleman what the railroads think about this plan, and what do the railway mail employees, the mail clerks, think about it?

Mr. STEENERSON. The railroads, during the hearings on the space plan before the House committee, were all asking that the whole question be referred to the Interstate Commerce Commission. That was the burden of their argument everywhere. It has been their request ever since the subject has been debated. So far as the railway postal employees are concerned, they are not interested one way or the other as to which plan is to be adopted. It does not concern them, and they have said nothing.

Mr. FOCHT. They are certainly interested in the regulation as to the payment of their salaries and their trips home and their passes and meals.

Mr. STEENERSON. I do not want to go into that.

Mr. FOCHT. But you have inveighed so vociferously on this floor about those things that I was inclined to think you were right about them. Now you have changed your mind, have you?

Mr. STEENERSON. No, sir; I have not. What does the gentleman want to know?

Mr. FOCHT. I want to know whether the small railroads are satisfied with what they are going to get by this method, and whether the postal clerks are satisfied with their salaries?

Mr. STEENERSON. The postal clerks have nothing to do with the railway mail pay, and so far as I know, they are entirely satisfied with the provisions of this bill. The smaller railroads, if the space plan should be adopted and recommended by the Interstate Commerce Commission, will certainly be taken care of. However, there is an additional provision in the space-plan law in this bill that authorizes special agreements with railroads in case the general rule may be too harsh and inapplicable to the small railroads.

There is another provision of this space-plan law which guarantees justice to the small railroads, or the big ones for that matter. It authorizes the Interstate Commerce Commission to classify railroads and to adjust the pay according to the classification. That is, a trunk line with a very heavy tonnage and dense volume of mails would necessarily be able to carry mail more economically and cheaply to the Government than a railroad carrying a smaller volume of mail. And it is contemplated by this act that we shall have the Interstate Commerce Commission classify the railroads in order to be able to adjust more adequately and correctly the compensation due from the Government.

Mr. OAKEY. Will the gentleman yield for a question?

Mr. STEENERSON. Certainly.

Mr. OAKEY. Does the Interstate Commerce Commission have the right of veto before a trial of a certain zone has been made? In other words, if the Postmaster General should designate a certain zone for the trial of the space idea, does the Interstate Commerce Commission have the right to examine and veto that before the trial or after the trial?

Mr. STEENERSON. In order to make it plain I will say that the Interstate Commerce Commission is required to ascertain and adjust the pay under the space plan in a zone adopted for that purpose. However, they need not pay the railroads under the space plan until they decide whether the railroads shall be paid by weight or space, which comes later on. And if they have paid them under the space plan, and that is not sufficient, under the final order of the commission they must pay them the difference. That is provided for. Does that answer the gentleman?

Mr. OAKEY. Then the authority of the Interstate Commerce Commission comes after the Postmaster General's office has designated a certain zone?

Mr. STEENERSON. That is only for experimental purposes, to determine which is the fairer method.

Mr. OAKEY. Excuse me just a moment. The final conclusion rests with the Interstate Commerce Commission?

Mr. STEENERSON. Certainly it does. The idea now is that they will adopt the space plan and put it into effect to see how it works out, and then they can easily compute the pay under the existing law by weight, because the weights are taken quadrennially, and they have the figures, so they can ascertain which is the more favorable to the Government, and so forth.

Mr. OAKEY. I thank the gentleman.

Mr. STEENERSON. It ought to be satisfactory to the railroads, because they have been asking for a reference to the Interstate Commerce Commission. It is satisfactory to the Post Office Department, because they have been asking for the space plan and now we are giving it to them, at least experimentally, in order that it may be determined which is the best method.

Mr. FESS. Will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. FESS. When I vote for this conference report, do I vote to continue the weight plan until otherwise determined by the Interstate Commerce Commission?

Mr. STEENERSON. You do.

Mr. FESS. Except where——

Mr. STEENERSON. No exceptions at all. You vote to continue the pay under existing law, although the Interstate Commerce Commission may designate a certain zone for experimental purposes, and if that does not turn out satisfactorily, they can compute the pay under existing law.

Mr. FESS. That being experimental, could they include in it an entire trunk line?

Mr. STEENERSON. Oh, yes; I think they could include the whole United States if they wanted to.

Mr. FESS. Under the experimental zone?

Mr. STEENERSON. Yes; if the Postmaster General so desired. Of course, the Postmaster General does not desire to have the space plan applied to all railroads. He only wants it applied to the heavier lines; that is, those that carry a considerable amount of mail; because the recommendation is that on the smaller railroads, where they simply carry closed pouches, they shall continue to be paid by weight, and that is provided for. They can pay in that way if the commission so desires.

Mr. FESS. However, if the conference report is adopted, it still continues the present system until changed by the Interstate Commerce Commission?

Mr. STEENERSON. Yes.

Mr. TOWNER. If the gentleman will yield, I was just going to call attention to the language which shows that it may be applied to an entire system. The language is that the present system shall continue—

Except on such routes or systems as the Postmaster General shall select.

Mr. FESS. He might take the whole country?

Mr. TOWNER. Yes.

Mr. STEENERSON. I think this is a very good solution of this vexed problem. You will recall that this question of railway mail pay has been before Congress for a great many years, ever since any of you have been here. It was a live question in 1901, when the Wolcott Commission was appointed, and it has been investigated by half a dozen commissions since that time. A great deal has been said and is being said at the present time about the adequacy or inadequacy of railway mail pay under existing law. The gentleman from Tennessee [Mr. MOON], the chairman of the committee, has indicated that he thinks the Postmaster General has made a very patriotic effort to reduce railway mail pay. He seems to think that we have been paying excessive amounts. Last year in the debate on this question he stated that we were paying very largely in excess of what we ought to pay, and that the Moon bill then pending would save the Government $9,000,000 or $10,000,000 a year. These statements are rather wild. The fact is that in 1901, when the question was investigated by a commission, that commission found that the railways were not overpaid. Then the Bourne Commission was appointed in 1911. This commission consisted of two Democrats in the House, Mr. LLOYD and Mr. Tuttle, and one Republican, Mr. WEEKS. From the Senate there were two Republicans, Mr. Bourne and Mr. Richardson, and one Democrat, Mr. BANKHEAD, So the House being Democratic and the Senate being Republican, it was what you might call a nonpartisan commission, because over there they had one Democrat and two Republicans and over here we had two Democrats and one Republican as members of the commission. This commission investigated the question most thoroughly. Among others, they called in the statistician of the Interstate Commerce Commission, who went into the subject very exhaustively. They called in the department officials, and they printed some 2,000 pages of testimony. They made a unanimous report, and that report says that the railroads at that time, in 1911 and 1912, were not overpaid. Seeing that that was a unanimous report, it is hard to understand why any gentleman should make these sensational statements that we have heard here, that the railroads are being overapid.

Mr. FESS. Will the gentleman yield?

Mr. STEENERSON. In a minute. Now, the railroads have been just as extravagant in their statements as persons on the other side. They have advertised throughout the press and carried on propaganda for the last two or three years to show

that they were grossly abused and underpaid by the Government. In some instances they have been underpaid by reason of the adoption of the parcel post. They had a just grievance in those cases where the parcel post was adopted and put into effect immediately after the quadrennial weighing. The mail is weighed once in four years, and the railroads that had to begin carrying the parcel post in January, 1913, just after they had had their quadrennial weighing, had to carry all the parcel post practically for nothing for four years.

That was their grievance, and we sought to correct that by allowing 1 per cent additional compensation, but they have proven that in some instances that was not sufficient. I only mention this to show that the claims on both sides, the claim on the part of the railroads has been exaggerated, and the claim on the part of the Government that they were losing so much was exaggerated. The truth is that there has been no great injustice done. The difficulty, however, is that the weight of the mail has been increasing so enormously by reason of the parcel post and the growth of second-class matter that there ought to be a more economic way of transporting it. The railroads are opposed to the space plan chiefly because they are opposed to the Government exercising the economy which is possible. You can ship magazines by freight, you can ship many of the articles of merchandise that go in the parcel post by fast freight, more cheaply than you can in a railway-mail car where you carry two or three tons in a car that weighs over 100,000 pounds. That kind of transportation is expensive.

Mr. FESS. Will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. FESS. Have we any standard by which we can determine whether this country pays more for carrying the mail than other countries?

Mr. STEENERSON. I do not know; I am not going into that because conditions are so different that I do not think that comparisons are of any value.

Mr. FESS. I understood that we were paying less for carrying the mails than other countries.

Mr. STEENERSON. They have so many Government-owned roads in other countries that it is difficult to make a comparison.

Mr. LLOYD. Will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. LLOYD. As a member of the Bourne Commission, I want to say that that commission did not find that it would be a saving to the Government of $9,000,000.

Mr. STEENERSON. Did not the Bourne Commission report mention $9,000,000?

Mr. LLOYD. The Bourne Commission found that the railroads were not underpaid.

Mr. STEENERSON. Did not the Bourne report mention $9,000,000?

Mr. LLOYD. That was in the discussion of it.

Mr. STEENERSON. I think in some figures he said that the loss to the railroads would be $14,000,000, and in other figures that it would be $9,000,000.

Mr. LLOYD. I do not want to go into a discussion of this matter because it is a long story.

Mr. STEENERSON. But the commission did find that the railroads were not underpaid?

Mr. LLOYD. In the beginning the railroads companies insisted that they were underpaid $15,000,000 and the Post Office Department said that they were overpaid $9,000,000.

Mr. STEENERSON. Well, that was the way of it then, and the commission found that they were not underpaid.

Mr. FOCHT. That answers my question and I accept the apology.

Mr. STEENERSON. Now, Mr. Speaker, I want to say that the agitation for the space plan originated because of the enormous increase of second-class mail matter, and was accentuated by the adoption of a more liberal parcel post. The Postmaster General, Mr. Hitchcock, was the first one to propose it, and it was being discussed by this so-called Bourne Commission when this administration came in.

Although I agree with my friend, the chairman of the committee, in his encomium on the Postmaster General, at the same time I want to call attention to one point on which I think he has failed to exercise as much diplomacy as might be expected. When the Bourne Commission was about to make its report in favor of the space plan they fixed the exact rates that we have now adopted in this bill. It was known that the Bourne Commission would have a bill prepared within a week, and it was known that they had agreed on the rates. The Post Office Department, under the leadership of the present Postmaster General, instead of waiting for the Bourne Commission to report drafted a bill with the space plan in it, and it was introduced as the Moon bill, and contained lower rates by far than the Bourne Commission had recommended. A disagreement at once arose, naturally, and the members of the Bourne Commission felt slighted because of the action of the administration in pressing the bill containing different rates before they had had an opportunity to present their case. But the Moon bill finally failed of a passage in the Senate, or rather it failed in conference.

Now, I believe if the Postmaster General had a year ago done what he has done this year, agreed to the Bourne Commission rates, he might have had the space plan in operation now. It should be remembered that all of the Bourne Commission rates are now approved by the department and made a part of this bill. I want to compliment the members of the Bourne Commission as highly as did the chairman of the committee compliment ex-Senator Bourne.

More faithful work has never been performed than was done by that commission, consisting of Mr. LLOYD, Mr. Tuttle, and Mr. WEEKS, and the Senators I have named. They have now been vindicated by the House and the Senate and by the Post Office Department, because these rates are the rates that the Bourne Commission recommended and favored.

I think we have rendered a great service to the people by having this whole matter referred to the Interstate Commerce Commission for determination. I believe that under this law they will be able to make a final determination of that vexed question of railway mail pay, and it will have a far-reaching effect on the future prosperity of the country because it affects the Postal Service in every branch, and especially the question of the development of the parcel post.

The chairman of the Post Office Committee referred to the provision for the back pay of rural carriers. He agreed to the report, signed it, and now explains that the claim of the rural carriers for this back pay did not meet with his approval—he did not think it was just, but that he yielded his convictions in order to arrive at an agreement upon the more important part of the bill, which concerned the whole country. The other conferees—five others—did not have any such compunctions. They agreed because they thought it was right, and they never have been convinced to the contrary. They believed that when Congress passed the act giving authority to pay that as the maximum salary, and appropriated the full maximum amount to pay it, that the law would be carried out as it had been theretofore. The practice has always been for the department to pay the maximum. For instance, if you appropriate for salaries that the Postmaster General shall pay not to exceed a certain sum, he will pay that sum, and if you appropriate as we do to the railways—that the Postmaster General is authorized to pay not exceeding certain amounts—he invariably pays the maximum. The rural carriers' pay was fixed in the same way, and we had a right to believe that the maximum would be paid, and when we appropriated the full amount it was in one sense an indication that we desired it to be paid. Of course, technically and legally, the Postmaster General had the authority to withhold part of that $1,200 from each carrier, but it was not the real intention of Congress, and so we have again authorized the payment of this deferred salary because the appropriation was made two years ago. I do not know whether it is more creditable to yield when you think it is wrong for the sake of advantage in another part of the bill or to yield because you think it is right. However, I am glad that the gentleman has agreed to it, and that these faithful servants of the Government, the rural carriers, are at last to get the pay which has been, as we believe, wrongfully withheld from them.

Mr. FESS. Does the back pay refer to two years?

Mr. STEENERSON. No; it is one year's back pay. The salary was raised to $1,200, and the full amount required to pay that for the fiscal year ending June 30, 1915, was appropriated, and that was what we always had done; but instead of paying them $1,200 a certain amount was deducted on certain routes where the number of pieces carried was small and the business was light. They were paid $1,150 and $1,125, and so forth, and it is these claims that are covered by this item.

Mr. FESS. Amounting to about how much?

Mr. MANN. Two million three hundred thousand dollars.

Mr. STEENERSON. They do not seem to know exactly, but between two and three million dollars.

Mr. FESS. The Government owes $2,300,000 that has not been paid?

Mr. STEENERSON. Exactly; and when you take that $2,300,000 out of the 1915 fiscal year, you will find that the deficit is so much greater.

The pneumatic-tube item has been discussed. The gentleman from Tennessee [Mr. MOON] stated correctly that we had extended that to March 4, 1917. The Postmaster General has

by contract extended it for six months to December 30, 1916. I do not know whether the other conferees were of the opinion or not, but it was my opinion at the time that there would be no difficulty in these matters when we got a more practical head of the department, and as I expected that Mr. Hughes would be elected President [applause on Republican side] I felt sure he would select such a man. You see we have extended the contract until a time when we will get rid of the present administration. That seemed to be satisfactory to the Democratic conferees, and it certainly was to your humble servant.

Mr. LLOYD. Mr. Speaker, will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. LLOYD. The gentleman does not wish to leave the impression that the conferees agreed that Mr. Hughes would take his seat on the 4th of March, does he?

Mr. STEENERSON. Did I say that?

Mr. LLOYD. The gentleman did not say it; no.

Mr. STEENERSON. No; but the conferees agreed that this contract should be continued by direction of Congress until this present administration expired. There would be no object in limiting it to March 4 unless we expected a change of administration, it seems to me, and the argument, therefore, is on my side, because if they desired to continue it it was not necessary to specify that day if we are not going to have a change of administration.

A great deal has been said about the rural carriers' service, and I want to call attention to the fact that the complaint about the administration of the rural carriers' service can not be said to be a partisan complaint, because it comes almost entirely from the other side. In fact, the Republicans have been very quiet about it. So far as Minnesota is concerned, I have not heard a single complaint. It may be that the wild theories about reform and economy which are entertained by the Postmaster General and his Fourth Assistant could be put into force, as they thought, with less danger in strong Democratic States. They first wanted to experiment, so to speak, on the dog, and they therefore tried it down in Georgia, and there is where most of the trouble has come from. Having proved a failure to some extent there, it will not be extended to any other region, I hope.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. STEENERSON. Yes.

Mr. COX. In all seriousness let me ask this question, if he is not in complete accord and absolute harmony with any Postmaster General who undertakes to effect economy in the administration of that great department?

Mr. STEENERSON. Yes; if he preserves the efficiency of the service. [Applause on the Republican side.] But if he sacrifices the efficiency of the service for the purpose of accumulating a million or two, or even $10,000,000, he is the most mistaken man that ever occupied an office. I think it is a misfortune to have a postal surplus to brag about when the service is neglected, or where the faithful servants are not sufficiently paid for their work.

Mr. COX. Will the gentleman yield for another question in that connection?

Mr. STEENERSON. Certainly.

Mr. COX. Does the gentleman regard it as a fortunate affair to have a postal deficit?

Mr. STEENERSON. I say sometimes it is a misfortune to have a surplus.

Mr. COX. Answer my question.

Mr. STEENERSON. The gentleman knows that I have preached here in season and out of season that the Postal Service of itself ought to be self-sustaining. That is the purpose and aim of it, but you must always bear in mind that the people must have an efficient service.

Mr. COX. Then I take it the gentleman does not think it is a matter of importance and benefit to this country to have a great postal deficit?

Mr. STEENERSON. I certainly do not. But I say that efficiency is the main purpose and object, and that sometimes you can sacrifice efficiency, as has been attempted, I think, in these cases, and it has been very unfortunate.

Mr. KELLEY. Mr. Speaker——

The SPEAKER. Does the gentleman from Minnesota yield to the gentleman from Michigan?

Mr. STEENERSON. I yield.

Mr. KELLEY. I would like to ask the gentleman from Minnesota something about the lines at the bottom of page 34 in the bill, which seem to direct the Postmaster General to restore the 24-mile horse route. Does it, in fact, require the Postmaster General to do that absolutely?

Mr. STEENERSON. Well, the gentleman is as good a judge of language as I am.

Mr. KELLEY. It is the intention that the Postmaster General shall reorganize the routes?

Mr. STEENERSON. That seems to be the purpose.

Mr. KELLEY. On the basis of 24 miles?

Mr. STEENERSON. On horse-drawn vehicle routes?

Mr. KELLEY. On horse-drawn vehicle routes.

Mr. STEENERSON. It is stated in another part of the bill that the standard route shall be 24 miles, and that it may exceed 24 miles by 50 per cent, which is 36, and, if it is more than 30 miles, they pay $24 a mile extra for those miles.

Mr. KELLEY. For instance, in the State of Michigan, under the reorganization of the postal routes a year or so ago the routes were nearly all made 30 miles in length. What I would like to ask the gentleman is whether the 24-mile routes are going to be restored up there in place of the 30-mile routes under this language?

Mr. STEENERSON. That is a matter of administration.

Mr. KELLEY. That is to say, the Post Office Department will do it if they so please? You have not required them to do so here. On page 34, lines 25, 26, 27, and 28——

Mr. STEENERSON. It reads:

The Postmaster General is hereby authorized and directed to reorganize and readjust existing rural mail-delivery service where necessary to conform to the standards herein prescribed: *Provided*, That nothing contained in this section shall in any way affect automobile routes already established where good and efficient service satisfactory to the postmasters at the points of distribution of the mail to be delivered is being rendered; nor shall the provisions of this section apply to rural carriers who have been heretofore appointed and who have purchased or contracted for automobiles intended and designed for use in such rural-delivery service.

Mr. KELLEY. There is nothing in the language you were just reading there that throws any light upon those three lines.

Mr. STEENERSON. What is the precise question? Whether they were going to reorganize a route that is now more than 24 miles?

Mr. KELLEY. That is what I want to know.

Mr. STEENERSON. I do not think so.

Mr. ANDERSON. May I ask my colleague a question?

The SPEAKER. Does the gentleman yield to his colleague?

Mr. STEENERSON. Yes.

Mr. ANDERSON. What I want to ask is this: Suppose a route remains 30 miles, does the carrier receive more pay than for 24 miles under this?

Mr. STEENERSON. No.

Mr. ANDERSON. Ought he not to do so?

Mr. STEENERSON. I am not concerned now with what ought to be. I am concerned with what it is.

Mr. KELLEY. Are there many horse-drawn vehicle routes in the United States more than 30 miles in length?

Mr. STEENERSON. I think the majority of them in my district are more than 26 miles.

Mr. KELLEY. More than 30 miles?

Mr. STEENERSON. Some of them more than 30 miles, and some of them more than 34 miles. I think we had a book here at the time of the consideration of the appropriation bill giving the length of those routes. There are quite a number of them in the northern part of the State where the country is flat and there are no hills.

There is one item inserted by the Senate, which the conferees agreed to, for carrying the mail by aeroplanes. I was very glad to agree to that, because for two or three years I have been trying to get a clause of that kind inserted in the Post Office appropriation bill but was unable to secure the approval of the House, the opposition of the chairmen being sufficient to veto it. But we have finally got it, and I am very glad that it is in there. I believe it is destined to be a great success.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The gentleman reserves 25 minutes.

The gentleman from Tennessee [Mr. MOON] is recognized.

Mr. MOON. Mr. Speaker, I yield 10 minutes to the gentleman from Indiana [Mr. COX].

Mr. COX. Mr. Speaker and gentlemen of the House, I recognize that all legislation, in the very course of events, must be a compromise. I recognize that all conference reports must be compromises. I am not going to criticize the conferees upon this bill. I am going to state my views upon certain propositons contained in the conference report.

There were 62 amendments proposed to this bill in the Senate. The House yielded on 46 of them. I do not believe that the Senate yielded upon a single amendment. The House yielded upon the remaining 16 amendments with amendments or concurred in them with amendments. I am not here to argue which of the conferees got the best of the bargain, but I am here to submit a few remarks upon one or two items contained in it.

I was delighted to hear the chairman of the committee, with whom I have served for the last eight years, say that, so far as he was concerned, he was opposed to yielding to the Senate

amendment whereby it is proposed to pay the rural-route carriers $2,300,000.

I repeat, and I reiterate, that I was delighted to hear the chairman of the committee say he was opposed to that item. It depends, however, again upon the viewpoint of the individual as to how he looks at a given proposition. I have served long enough in this House to recognize that a Member ordinarily gets along best who follows the lines of least resistance, and the lines of least resistance every time lead directly to the Treasury of the United States, and they led to the yielding by the House conferees on this item. Of course they had a right to do it. The chairman of this committee was absolutely helpless. By yielding on this item the conference committee deliberately reaches its arm into the Treasury of the United States to pay to the rural-route carriers of this country $2,300,000—an absolute bonus, an absolute gift.

We may be hard pressed for votes on this side of the Chamber this fall, gentlemen [applause on the Republican side], but, so far as I am concerned, the price is too high for me to pay. To deliberately go into the Treasury and take from the people $2,300,000 and pay it to the rural-route carriers is a thing that Congress never intended to do, and I challenge the authority to show that it did.

Mr. SMITH of Michigan. Mr. Speaker, will the gentleman yield there?

Mr. COX. I will yield for a question solely.

Mr. SMITH of Michigan. Is there no consideration moving on the part of the rural carriers for that extra amount?

Mr. COX. None whatever. That was inserted in the bill absolutely over the protest and over the objection of the Post Office Department. But from the arguments made here this evening, and from arguments made on that side of the Chamber heretofore, they commend it. If you want to take the position on that side of the Chamber that it is a sound, healthy policy to run the Post Office Department upon the deficit theory, you can do it. I refuse to follow you.

Another bill I want to speak of, pending here——

Mr. SMITH of Michigan. Mr. Speaker, will the gentleman yield there?

Mr. COX. I refuse to yield further. It is coming up at the first opportunity; the minimum wage scale. But that is a little item. What is the use of talking about it? It would only be a charge upon the Treasury of $24,500,000 the first year. That is all it would be, and this little item of $2,300,000 is almost too insignificant for any Democrat to stand upon this floor and discuss this evening, in view of the fact that our appropriations this year will amount to the enormous and appalling sum of $1,550,000,000. In view of the fact that we are compelled in our revenue measures to take care of certain conditions by issuing bonds, I am at a loss to understand how any Democrat standing upon the platform of 1908 or 1912 could yield upon this item and deliberately pay to the rural route carriers $2,300,000, especially in view of the Treasury condition at this time.

But that is not all. What else does this report provide? The Postmaster General in the last two or three years has made an honest and a diligent effort to practice economy. And let me say to my Republican friends, if you should, unfortunately, get control of this House next time and I should be, fortunately, placed upon the Committee on the Post Office and Post Roads, you will find me standing side by side with your Postmaster General, to economize upon these things. I give you that promise and pledge now.

The Postmaster General attempted to bring about economy by motorizing various routes in the United States. He did bring about economy. He saved approximately $5,000,000 by that process, and he did not disturb in all those reorganizations to exceed 500 patrons. It was ascertained that he did not do it when the facts were applied to the case. You have taken away from the Postmaster General the power of motorizing the routes in this country in the future by this language:

> Standard motor-vehicle routes, which shall be 50 miles in length, and shall only be established hereafter when a majority of the proposed patrons who are heads of families residing upon such proposed routes shall by written petition ask the Post Office Department to establish the same.

He can only motorize a route when a majority of the patrons upon the route petition the Postmaster General to motorize it. Great God, Mr. Speaker, language could not be used any stronger to destroy the power of the Postmaster General to motorize routes than that language; and yet it is a known fact that all over the United States there are thousands of rural routes which can be covered in six hours' time with an automobile and save millions of dollars every year. But that right, that power, that discretion, is taken away from the Postmaster General by this conference report.

Mr. SMITH of Michigan. I think the gentleman reads the bill wrong.

Mr. COX. Oh, I am not reading the bill wrong; the gentleman does not understand it. I am reading from the conference report.

Mr. SMITH of Michigan. Not the bill.

Mr. COX. And then you provide that the standard horse-drawn route shall be 24 miles. Then you provide:

> *And provided further,* That nothing herein shall be construed and no order shall be issued to prevent the use of motor vehicles on horse-drawn vehicle routes.

The SPEAKER. The time of the gentleman from Indiana has expired.

Mr. COX. Mr. Speaker, will the chairman give me five minutes more?

The SPEAKER. The gentleman from Tennessee [Mr. MOON] has only four minutes more.

Mr. COX. I ask unanimous consent, Mr. Speaker, to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. STEENERSON. Mr. Speaker, I yield to the gentleman from Illinois [Mr. MADDEN].

The SPEAKER. How much?

Mr. STEENERSON. Fifteen minutes.

The SPEAKER. The gentleman from Illinois [Mr. MADDEN] is recognized for 15 minutes.

Mr. MADDEN. Mr. Speaker, I would like to know when I have used 10 minutes. I want to yield to another gentleman.

The SPEAKER. Very well.

Mr. MADDEN. Mr. Speaker, I was interested in the statement of the gentleman from Tennessee [Mr. MOON], who lauded the loyalty and devotion of the Postmaster General in his management of the Rural Delivery Service, and it made me wonder why the members of his party in the House and in the Senate and in the conference had tied his hands so that he will be unable in the future to create motor routes except by the consent of the patrons on each route.

The motor has become the advance guard of progress, and yet the Democrats in Congress, by the provisions of this bill, are forcing the Post Office Department to go back to the ox-cart period.

Oh, you have given another evidence of your unfitness to manage a big business. You have expressed your want of confidence in your own Postmaster General. You have tied his hands; you have bound and gagged him so that he can no longer establish a motor route except by appealing to the millions of patrons who live on the 46,000 rural routes. Instead of one manager for the rural delivery business of the country you have created 46,000, multiplied by the number of patrons who live on that number of routes, and you compel your Postmaster General to go hat in hand to ask the citizens how and when he can deliver their mail. You have demoralized the Post Office Department. You have destroyed its efficiency. You have humiliated the Postmaster General. You have proved by your own acts that you are an ox-cart party.

You tell the Postmaster General he does not understand his business, and before he can arrange a rural route he must get every farmer on the route to give his consent. Oh, what a systematic lot you are and how beautifully you display your confidence in your Postmaster General.

Yes; I see you have tied his hands also on the pneumatic-tube service. You have given him directions to extend the contract. You refuse to allow him to advertise for bids or to reduce the price paid for that service. It is said that $7,000 a mile could be saved on every mile of pneumatic-tube service. Why did you deprive your Postmaster General of an opportunity to save it, and why, in the face of your refusal to allow this and other savings, do you still persist in imposing new burdens of taxation upon the people?

You have expressed your want of confidence in the Postmaster General by taking away his discretion on a purely administrative matter, and thereby you have destroyed the efficiency of the department. You have once more expressed your want of confidence in your Postmaster General by directing him to return $2,300,000 to the rural carriers, which amount is said to have been unjustly deducted from their pay. Was the Postmaster General opposed to the return of this money? Would he have refused to return the money if authorized? Were the conferees afraid to trust him to act if he was given authority? Was this the reason he was bound and gagged, without the right to do more than perform the clerical work in connection with the return of the sum of $2,300,000? Oh, what a humiliating

thing it must be to be a Democratic Postmaster General when the party in power has no more confidence in his integrity than to bind and gag him and tie him to the table and tell him that he must be forced to act. I should not like to be Postmaster General under a Democratic administration that had no more respect for the high office than you have for the Postmaster General, who is my friend, and who I believe has integrity of purpose that is worthy of more confidence than you have expressed in him. [Applause.] And while you have taken away the power from the Postmaster General in all these important matters, you have by amendment No. 18, published on page 14 of the bill, authorized the Postmaster General to employ more clerks in any particular grade in the Post Office Department than is provided for in the appropriation bill.

Mr. SLOAN rose.

Mr. MADDEN. I can not yield. I have not time. I have only 10 minutes.

The SPEAKER. The gentleman declines to yield.

Mr. MADDEN. This will give the Postmaster General the right to use men in the $800 grade who ought perhaps to be entitled to be in the $1,200 grade. Do you want to deprive these men of this money by the direction that you have given him, by forcing him to pay men $800 a year who ought to be getting $1,200 a year? Oh, it is always the man in the line who suffers from the action that you take. I do not know how to characterize such an agreement as this, except to say that I have no confidence in the judgment of the men who made it.

Now as to the railway pay. I made a study of that for three or four years. I convinced myself that the space basis was the right basis on which to fix the compensation. Others did not agree with me. Some thought we ought to send it to the Interstate Commerce Commission and let them decide. Others thought we ought to send it to them to investigate, and others thought, some one thing and some another. I believe that where there is a question of so serious doubt it is just as well and perhaps better to let some disinterested body study the facts in the case. And I am more than glad that some satisfactory compromise has been reached by which the question may be solved, for it has been a troublesome question, and if when it is solved the people of America are satisfied that no compensation is to be granted except that to which the railroads are entitled, and that the Government and the railroads both are awarded that measure of justice which the American people believe in, I shall feel that all the work we have done in this connection has not been done in vain. [Applause.]

I yield five minutes to my colleague [Mr. McKENZIE].

Mr. McKENZIE. Mr. Speaker and gentlemen of the House, I shall support this conference report if for no other reason than that in my judgment it opens the way to a solution of the complex and technical question of railway mail pay. I am glad that we have finally arrived at a decision which in my judgment will settle this very grave question. I am very glad that it is to be left to the Interstate Commerce Commission. I believe that great commission will do entire justice not only to the railroads of this country but to the people. No fair man desires that the railroads of our country shall render services to this great Government of ours without just compensation, and no fair man desires that any advantage shall be taken of the people by the railroad corporations of our country. And I am inclined to feel now that we have at least opened the way whereby this great question can be solved.

One other thing I want to mention, and that is in relation to the $2,300,000 which the gentleman from Indiana said will be taken from the Treasury of the United States and given to the rural carriers of our country. Gentleman of the House, I do not feel that this is a steal. I do not feel that under the circumstances it is taking money and giving it to these men without any just reason at all. I was in this House, as many of you were, when we passed the resolution carrying over the appropriations on March 4, 1915, and I leave it to any man in this House if it was not his understanding, if it was not the understanding of us all, that the rural carriers were to receive this pay. I am sure that every carrier in the United States felt that he was entitled to this and expected to get it. Yet an administrative officer of the Government stepped in and autocratically decided that these men were not entitled to that money, and refused to pay them. This provision simply provides that they shall receive what Congress intended they should receive. And in so doing I can not see where any injustice is going to be done to the Government of the United States. I well remember when I first came here I voted for a pension law, the law of 1911, and I thought then, and I know that my colleagues were of the opinion, that the bill provided that where a man was wounded in battle or contracted disease in the service he should receive the maximum of $30 per month; but after the law was enacted the Commissioner of Pensions held that unless the wound or disease from which he suffered had rendered him wholly incompetent to perform manual labor, and had resulted in total disability, he could not get the maximum pay. Now, I am one of those who believe that when Congress passes an act no executive officer of the Government should have the right or power to construe it his way, and thereby defeat the will of Congress, but I maintain he should construe it according to the intention of the Congress of the United States when the law was enacted. [Applause.] Mr. Speaker, that is all I care to say.

The SPEAKER. The gentleman from Minnesota [Mr. STEENERSON] has 10 minutes and the gentleman from Pennsylvania has 4 minutes.

Mr. STEENERSON. I yield to the gentleman from Iowa [Mr. TOWNER] 5 minutes.

[Mr. TOWNER addressed the House. See Appendix.]

Mr. MOON. Mr. Speaker, I want to say in reply to the gentleman from Iowa, who discussed what the conditions are in that State, that there is a great deal of country where a 30 or a 36 mile route can be maintained by a horse-drawn vehicle. In relation to the strictures upon the Postmaster General, I have not the time to enter into a general statement, and he made no specific charges. I want to enter my dissent to the gentleman's remarks in relation to the Postmaster General by saying that the gentleman from Iowa is totally outside of the facts as I understand them.

[By unanimous consent Mr. MADDEN, Mr. HULL of Iowa, and Mr. VOLSTEAD were given leave to extend their remarks in the RECORD.]

JOURNAL OF THE EXECUTIVE COUNCIL OF PORTO RICO (H. DOC. NO. 1291).

The SPEAKER laid before the House the following message from the President of the United States, which was read and referred to the Committee on Insular Affairs, and, without the accompanying documents, was ordered to be printed:

To the Senate and House of Representatives:

As required by section 19 of the act of Congress approved April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," I transmit herewith a copy of the Journal of the Executive Council of Porto Rico for the second session of the eighth legislative assembly, beginning February 14 and ending April 13, 1916.

WOODROW WILSON.

THE WHITE HOUSE, *July 17, 1916.*

POST OFFICE APPROPRIATION BILL.

Mr. STAFFORD. Mr. Speaker, the history of the present railway-mail pay provision is rather interesting. In June, 1914, the House Committee on the Post Office and Post Roads was suddenly directed to consider what was then known as the Moon railway-mail pay bill. We did not follow the provisions of the select committee that had been appointed to examine this question. The total pay as carried in the original bill was five or six million dollars less than that contained in the committee's recommendation. Two weeks after the committee had reported that bill, to which two members of the committee, of which I was one, had entered a dissent, the committee was again called together and considered a revised Moon bill, which increased the rate something like three or four million dollars; but still the rates of pay did not conform to the recommendations of the Joint Committee on Railway Mail Pay. At last when the bill was presented into this Congress as a part of the Post Office appropriation bill, it conformed substantially to the report of the Joint Committee on Railway Mail Pay, except in this particular, that the railroads were obliged to perform the transfer service of carrying the mails from the railroads to the post offices and from the post offices to the railroads, when the post offices were located within 80 rods of the railway stations.

That now has been eliminated, and we now have the complete recommendation of the Joint Committee on Railway Mail Pay. That one provision which has been eliminated in conference from the railway-mail-pay provision as it passed the House will cost the Government something like $3,000,000 or $3,500,000 more. For my part I have always been in favor of imposing that burden upon the railroads rather than having it performed by the Government, because it was no undue hardship on the railroads to have their station agents, mostly in small communities, take the mails from the post offices and return. So you see that this great "holler" that has been made about the saving that is going to result to the Government because of the establishment of this new space basis will result in no saving whatsoever, but will result in an added burden to the Government in the way of increased pay to the railroads.

Mr. MOON. Mr. Speaker, I would suggest to the gentleman from Wisconsin that the section he speaks of was stricken from the bill because it is already a regulation, and an objection was made to making a regulation into law. It is, however, a regulation still, with the force and effect of law, and will be in operation.

Mr. STAFFORD. This new railway-mail provision covers all existing laws, and it is purposed to cover every character of law, and the conferees struck that out, so as to have that burden rest on the Government rather than on the railroads, and I insist it will amount to an extra burden upon the Government to the extent of $3,000,000 more than what we are now paying the railroads.

Mr. MOON. I suggest to the gentleman that his opinion is different from that of the Senate conferees or the House conferees or of the Postmaster General.

Mr. STAFFORD. Why should the Postmaster General, then, when we were considering this four years ago, be so insistent that it should be a part of the then Moon railway proposition? The railroads have succeeded in having it eliminated, and have shifted the burden to the extent of $3,000,000 onto the taxpayers.

Mr. MOON. I will say that that regulation is now in force and will remain in force.

Mr. STAFFORD. But this bill is a comprehensive bill, and it covers every character of service performed, and the gentleman should know that with its elimination the Postmaster General has no right to impose the burden on the railroads, because there is nothing in this phraseology which will compel them to deliver the mail to the respective post offices.

Mr. MOON. It does not affect the regulation. That controls it anyway.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

Mr. MOON. Mr. Speaker, I yield two minutes to the gentleman from California [Mr. RANDALL].

Mr. RANDALL. Mr. Speaker, the distinguished chairman of the committee has well referred to the gigantic fight that the railroad companies have been conducting against this bill during the eight months it has been before Congress, and the ostensible fight has been against railway-mail payment by space; but the real African in the woodpile is the American Parcel Post System. The amendment which the Senate adopted, to my mind, put a strangle hold on the Parcel Post System, and with a view of getting information upon that subject, I addressed an inquiry to the Postmaster General, his reply to which I send to the desk and ask to have read in my time.

The Clerk read as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., July 12, 1916.

Hon. C. H. RANDALL,
House of Representatives.

MY DEAR MR. RANDALL: With reference to your inquiry as to the effect Senate amendment No. 63, beginning with line 10, page 62, of H. R. 10484, making appropriations for the Postal Service for the fiscal year ending June 30, 1917, will have upon the administration of the parcel post, I wish to state that this proposed amendment, if adopted, will seriously handicap the department in extending and improving the service. At the present time the Postmaster General recommends to the Interstate Commerce Commission such changes as he believes will promote the service to the public. Such recommendations are accompanied by data and statistics in support thereof, and if, after careful consideration of the data presented, the commission consents to the changes proposed, they can then be put into effect without further delay.

Under the proposed amendment the commission could not accept the statement of the department that the proposed changes would promote the parcel post to the public, neither could it accept the data of the department as to the revenue and costs of the service, but would be compelled to hold hearings and make an independent investigation to determine these facts for itself. This would necessarily require many months, and the department would, therefore, not only be unable to meet any emergency that might arise requiring changes, but would be frequently delayed in putting into effect improvements which would be of material benefit to the public.

It can readily be seen from the above that the proposed amendment would not be in the interest of the Postal Service or the patrons of the parcel post, but would greatly interfere with the administration and development of the service, which is yet in its infancy and consequently requires changes from time to time.

Yours, very truly,
A. S. BURLESON,
Postmaster General.

Mr. RANDALL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. WALSH. Mr. Speaker, I ask unanimous consent on behalf of my colleague, Mr. DALLINGER, that he be permitted to extend his remarks in the RECORD upon the Post Office appropriation bill.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

On motion of Mr. MOON, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

Mr. MOON. Mr. Speaker, I ask unanimous consent that the Clerk be directed to resection the bill.

Mr. MANN. The Clerk will do that anyway; and, in any event, it could not be done by unanimous consent in one body. That is the duty of the Clerk.

Mr. MOON. I suppose the Clerks are in the habit of doing that, but I called attention to it so that it might not be overlooked.

LIME BARRELS.

The SPEAKER laid before the House the following Senate resolution:

Resolved, That the Secretary be directed to request the House of Representatives to return to the Senate the message showing agreement to conference report on the bill (S. 5425) to standardize lime barrels.

The SPEAKER. Without objection, the request of the Senate will be granted.

There was no objection.

CORRECTION OF ENROLLED BILL.

Mr. MOON. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Tennessee asks unanimous consent for the present consideration of the resolution which the Clerk will report.

The Clerk read as follows:

House concurrent resolution 49.

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H. R. 10484) entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes," the Clerk be, and he is hereby, authorized and directed to strike out the word "chairs," on page 26, line 19, of said bill, and to insert in lieu thereof the word "chains"; and further, to strike out, in amendment No. 54, the word "circuit" wherever it precedes "court of appeals" in said amendment.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the resolution.

The concurrent resolution was agreed to.

EXTENSION OF REMARKS.

Mr. PARK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the revenue bill.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD on the revenue bill. Is there objection? [After a pause.] The Chair hears none.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the coast defenses of the North Pacific.

The SPEAKER. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD on the coast defenses of the North Pacific. Is there objection? [After a pause.] The Chair hears none.

BALANCE DUE LOYAL CREEK INDIANS.

Mr. TILLMAN. Mr. Speaker, I ask unanimous consent to call up the bill H. R. 9326, No. 103 on the Union Calendar, an act entitled "An act to pay the balance due the loyal Creek Indians on the award made by the Senate on the 16th day of February, 1903."

Mr. ADAIR. Mr. Speaker, was not there an agreement this morning that the gentleman from Indiana [Mr. LIEB] should address the House?

The SPEAKER. There was; and the gentleman from Indiana [Mr. LIEB] is recognized for 15 minutes. [Applause.]

NEUTRALITY OF THE UNITED STATES.

Mr. LIEB. Mr. Speaker, I was born in Germany. At the age of 14 years I came to the United States in response to a youthful conviction that freedom and success could be realized here as in no other land. I stood as in the presence of God and swore allegiance to the land of my adoption. I did so without the least misgivings as to the wisdom of my decision to give up all national ties with the country of my birth, thereby unalterably casting my lot with the greatest Nation in the world, the United States. [Applause.] Never to this day have I wavered in my conception of duty to the country of my adoption. Never have I allowed myself to be influenced by any other motive than that involving loyalty to the United States. [Applause.]

To-day I speak in the presence of Representatives of every section of the Republic. I seek with honest intent and purpose to express my humble convictions of the duties of all those claiming citizenship under the flag of all flags.

I sincerely trust that whatever I might say will not be considered as having connection with any political ambitions, for I am not a candidate for office, and I so informed my constituents soon after I took my oath of office for a second term in Congress.

Not very long ago the Congress of the United States considered the resolution for warning American citizens not to take passage on armed merchant vessels. As a Congressman representing a constituency in an Indiana district of more than a quarter of a million of people I felt it my duty more than ever before to give my country the benefit of my best judgment in a matter involving the honor and future well-being of every one of a hundred millions of people. Furthermore, the question involved the well-being of millions of people of other lands who were so fortunate as not to be drawn into the vortex of the great war of nations on the other side of the sea.

While it is already a matter of record that I voted to sustain President Wilson and his policies in the armed-ship controversy [applause on the Democratic side], I now feel that it is incumbent on me to express my full attitude on this and other questions. I have received scores of letters from people who say they are of German extraction, and who desire to have my views, pointing to the fact that other Members of Congress had made statements, but that none had been printed in the RECORD from me.

Closely following the tabling of the McLemore resolution came the address of President Wilson to Congress outlining the contents of the note of the United States to Germany in regard to submarine warfare. Coincident with this was a deluge of telegrams and letters I received from constituents requesting my offices in helping to keep the United States out of war with Germany.

In addition to this mass of correspondence, there have been numerous complaints in which the neutrality of our own country has been questioned. In fact there has been such a turmoil since the outbreak of the war, in which accusations have been promiscuously and unjustly made against our beloved and patriotic President, Woodrow Wilson, that hardly a mail has failed to contain some kind of protest. [Applause on the Democratic side.]

Therefore I feel obliged and justified in discussing freely every phase of the war situation as it concerns the neutrality of the United States and the wisdom of the policies of Woodrow Wilson.

No man has had greater trials as President of the United States than Woodrow Wilson, with the possible exception of Abraham Lincoln. In the midst of these great problems it must be admitted that our President has maintained a splendid poise. Oh, that the rulers of Europe had displayed one-half the patience and level headedness as that which has characterized the bearing of Woodrow Wilson in steering his country safely through one great crisis after another! And where is there a dignitary in the United States to-day who could have matched with the diplomatic sagacity and courage of our own leader, in dealing in matters of international significance?

Indeed, there has hardly been a day since the late summer of that terrible year of 1914 when something has not been pending, where a single false step by our President would have plunged us into that awful holocaust of human lives. For we must not think only of the lives that have been sacrificed, but of the ones left at home whose dear ones have been put forever beyond their worldly reach.

WILSON'S SINCERITY UNQUESTIONED.

Why should anyone have ever doubted the sincere desire of Mr. Wilson to keep us free from the horrors of warfare? Following the situation as closely as I have I can not see one move of the President which has justified the least suspicion that Woodrow Wilson had any other motive than peace, if peace were at all possible. And yet that very criticism has been made in connection with every step of negotiation it has been necessary for this country to conduct. But let us not forget that the history of our country bears out the contention oft made that the greatest of our national patriots have been subjected to the harshest criticism. Point out to me the men who have the least to do in their dealings with the rest of humanity and I will show you the men who have been subjected to the least of criticism.

But I predict that in years to come, in calm moments of retrospection, these same decriers of the President's handling of our recent foreign complications will be the loudest in their praise of the valiant service rendered the country by Woodrow Wilson. For as history shows us that some of the greatest deeds result in the harshest of unjust criticism, so history unfolds to us a corresponding inclination of national decriers to eventually heap words of praise upon those whose duty to their country is manifested by service that in other ages loom up as towers of hope to those standing for right, justice, and humanity.

SCHURZ ONCE QUESTIONED LINCOLN.

Carl Schurz, in writing of the life of Abraham Lincoln, said:

It may truly be said that few men in power have ever been exposed to more daring attempts to direct their course, to severer censure of their acts, and to more cruel misrepresentation of their motives; and all this he met with that good-natured humor peculiarly his own and with untiring effort to see the right and to impress it upon those who differed from him.

Thus he presented the singular spectacle of a President who, in the midst of a great civil war, with unprecedented duties weighing upon him, was constantly in person debating the great features of his policy with the people.

It might be mentioned that Carl Schurz at one time strongly opposed various policies of Lincoln, but later paid him the highest tribute that could be given any great man.

MAXIMILIAN HARDEN'S VIEWS.

Maximilian Harden, editor of Die Zukunft, and a subject of the German Empire, in a recent article entitled "The Real Wilson," said, among other things:

I have collected excerpts from the campaign speeches of Woodrow Wilson (that under the title, "The New Freedom: A Call for the Emancipation of the Generous Energies of a People," has also been published in the German language) in order to indicate what manner of man it is over whom there has been so much talk during the past weeks and months. So much silly and, unfortunately, also miserably shameless talk. "A dusty professor." "A rabid enemy of Germany, who has sworn to prevent England's defeat with all the means in his power." "A rascal bought by England." This is the parrotlike chatter of lazy ignorance that has nothing in common with holy love of country. Burn up at least ninety-nine hundredths of all the parasitical war "literature" bound in warlike covers and throw all these poems, speeches, romances, treatises, boostings, and tracts in the only place where they are of any use—in the paper mills—and devote your time to books from which you draw the spiritual inspiration of clear speech. Then perhaps pure reason will return to its home and awaken the duty of respecting the dignity of strangers.

GERMANY MIGHT BE PROUD TO OWN WILSON.

As Rodin and Hodler, Maeterlinck and Verhaeren, Kipling and Wells, Forain and Raemaekers, Spitteler and d'Annunzio, by their angry attacks on Germany lose none of their value in an artistic sense, so, too, Woodrow Wilson, the scholar and politician, would not be a wretch, even if he did prefer English ways and statesmanship to Germany. That he has done so has never been shown. The problem, if the President of the United States is an eagle, may be decided when he spreads out his wings for a flight. He certainly is a man of high moral and intellectual rank. A man of whom we might be proud, if he were one of ours (and he could speak, as I let him speak from these pages two weeks ago). He is at the least an American Fichte. In the State of Virginia he was born by the descendant of an Irishman to the grandson of a Scotchman. So this man, who is now nearly 60 years old, has no blood prejudice that promotes blind deification of England.

As a student at Princeton University he writes against "Cabinet Government," boldly attacks the secrecy and avoidance of responsibility that prevail in the business of the Government and that lull into a sounder sleep from year to year the people's desire for active cooperation. The review is followed by a book over "Government by Congress" that earns him the call to a chair in the youngest college for women. He leaves the presidency of Princeton University (that, as the favorite resort of the proud and rich youth, might be called the Bonn of America) after eight years of fruitful administration because an endowment of $12,000,000 had conditions attached to it the acceptance of which the President feared would be of serious injury to his college (through a deepening of the gulf between the classes). In order not to soil his ideals, his image of his power of thought, he goes and, as the wise and valiant fighter of ugly abuses, is chosen as the governor of New Jersey. He frees this State from the bondage in which it was held by the trusts. In defiance of the silly inrooted custom that limits the governor to written communication with the assembly, he defends his plans of reform personally in the legislature and also at the voters' meetings and in the press. He does not hesitate to make known throughout the land the names of the obstinate deputies. And, with the enthusiastic support of the people's will, he puts his plans through.

REBUKE FOR SLANDERERS OF THE PRESIDENT.

He has outlined the life of Washington, the history of the American people, and the nature of the State in good books; and in the collection of essays, Only Literature, on politicians and statesmen, poets and writers, he has said as many wise things as hardly another in the two worlds for many a year. Then, as a new man in the highest place in the Republic, he has made far-reaching mistakes. Is he the only one among all the heads of Governments? This man loves his people and has the desire to lead it upward to the heights of the ideal from which it has slipped into the swamp. Germany must be ashamed of the persons who slander him, because there has been slimy dirt in the newspapers.

Wilson, the teacher of political law, who now speaks in the name of the United States of America, stands upon the conviction that the announcement that from March, 1915, the Imperial Government would treat the waters around Great Britain and Ireland as being in the war zone was a gross denial of international law; that the premeditated method of the German submarine warfare is not compatible with the basic laws of humanity; that this method which, without the flimsiest legal justification, without a twinge of conscience, destroys mighty ocean liners and unarmed passenger ships, and has cost the lives of hundreds of peaceful Americans, wantonly smashes to bits the undeniable rights of neutrals and the sacred privileges of all those not engaged in the war; that the Imperial Government, whose uprightness

and good faith are not put in doubt, neither has succeeded nor ever will succeed in reconciling its methods with the basic principles of humanity.

THE SUBMARINE QUESTION.

This brings us to the submarine question and the United States insistence that the points of international law be strictly adhered to, as affecting noncombatants. I have been in close touch with diplomatic and legislative channels of the Federal Government for many months, and I am firmly convinced that the Wilson administration has at all times demanded of every belligerent government the protection of neutral lives and property. Diplomatic correspondence has been carried on with Great Britain and the allies with the same fervor that has characterized the exchange of notes between the United States and Germany. England has been charged with numerous arbitrary changes by royal order, and, it is alleged, has been untroubled by the requirements of law on the high seas. Germany was in the first place censured for the sinking of the *Lusitania* and for the conduct of her submarine war.

Many in our land were so bold as to charge we showed extreme partiality in demanding things of Germany, while putting off our negotiations with England. But the President insisted that the two cases dealt with separate varieties of American rights. The President did not admit that Germany could give up the submarine war if England kept within the laws of the seas and should be forced to do so by America.

Now, I quote Dr. Bernhard Dernburg, formerly Germany's minister of Colonies, who said of this phase of the question in the Berliner Tageblatt in November, 1915:

The submarine war had first to be settled, because this act was not a question, as in Great Britain's commercial war with Germany, of replaceable wares or financial losses, but of lives of American citizens. The difference with Great Britain, therefore, was postponed until a way had been cleared through Germany's wise giving in in the Arabic case. After Germany had yielded to the American standpoint the President sent a note to England and announced two more to come.

Thus the American note will lead to an era of discussion with England, paving the way at the same time to the fulfillment of the demand for the freedom of the seas—a discussion the outcome of which will beyond shadow of doubt be in favor of those who represent the right.

GERMANY YIELDS TO UNITED STATES.

When President Wilson made up his mind that a long chain of German methods of conducting undersea warfare had worn away and broken to pieces the laws of humanity and the holy custom of nations, it was not only his right but his duty to speak with uncompromising clearness. And he did with unmistakable firmness, when, on April 20, a note was dispatched to the German Government. The German Government yielded in the face of the evidence it had been guilty of violating the laws of the seas, and admitted the contentions of our President had been just and fair.

Germany had embarked upon a policy which violated every principle of international law. Instead of capturing vessels, she proceeded to send them to the bottom of the ocean. Her submarines laid in wait in many instances and without even giving passengers a reasonable opportunity to take to their boats, and trust themselves to the dangers of the deep, sent them to the bottom without reasonable warning and without chance of escape.

To those who have complained because we have been less insistent with England than with Germany I want to call attention to a few features of the entire controversy well worth consideration.

First, why should anybody complain because we push a murder claim with greater vigor than we do a claim involving seizure of property?

Second, in the case of England there was a remedy because upon seizing our ships they took the matter into a court of law to try the question of her right to confiscate the property. But in the case of Germany, when American men and women and children were sent to the bottom of the sea, no possible remedy was open. Life can not be restored by the payment of damages. Blood spilled can not oe compensated in money.

Consequently no fair person can deny that we have dealt with these nations with rigid impartiality.

WARNING RESOLUTION UNCALLED FOR.

The question of warning Americans against traveling on armed merchant vessels was entirely foreign to the vital questions of diplomacy. Every person knew it was dangerous to travel on any kind of merchant vessel. Why warn a man when he is already warned? Besides, had Congress passed the McLEMORE resolution, it would have interfered with the negotiations for abandonment of submarine warfare at the expense of lives of noncombatants. It would have embarrassed the Government at a critical time. Whatever sentiment was created in favor of the proposed resolution was the result of a spell of hysteria which developed about that time. This hysteria was assuredly not based on any foundation of human justice. Had it been founded on human justice and had it been in the interest of the neutrality of America, I am quite sure President Wilson would have been the first one to champion its speedy passage.

I received more than 1,000 telegrams and letters from constituents on April 25 or thereabouts. With one or two exceptions these seemed to originate from a common source. By that I mean to say that the reading of the messages was identical. Therefore I am glad to say that certain statements in these messages which were uncalled for were not the expressions of the persons whose names were signed thereto. For instance this unpatriotic statement was made:

Country awakening to belief that administration may seek to draw United States into present European conflict.

WILSON SHUNNED WAR.

How it originated I do not know, but the impression seemed to take hold in some quarters that we were recklessly headed for war. The same persons who insisted upon this theory, that the President was deliberately trying to get into the conflict in Europe, were only subscribing to the unfortunate impression created abroad that citizens of this country believed the United States was to blame for demanding rights which we, as well as other neutrals, were justified in holding out for. In the crisis he faced the President should have had the hearty support of every man, woman, and child in America. For it developed that Mr. Wilson pursued exactly the right course. Any other attitude of the President would have plunged us either into war or prolonged the submarine controversy. No matter what other construction may be put, I say that Germany's answer was an open admission that Wilson was not only right, but fair. Another President might have gone to war with Germany, without sending any kind of note. And we all ought to thank God that there was a Woodrow Wilson in the White House to withstand the pressure of the war seekers on the one hand and the war partial on the other. Wilson's course was the middle road, and he fearlessly took that road. We have all much to be thankful for for that as true Americans and with allegiance to one flag, and one flag only.

GERMAN REPUBLICAN SPEAKS.

While there was no such well-defined congressional campaign among those who saw the justice of this Government's attitude in this particular situation, it is worth remarking that hundreds of citizens voluntarily communicated with me to urge support of the President. The following letter is a sample:

EVANSVILLE, IND., *April 24, 1916.*

Hon. CHARLES LIEB,
House of Representatives, Washington, D. C.

DEAR SIR: A few ultra partisans are passing postal cards out of the kind inclosed. They are using street cars, street corners, and every public place possible to get them into the hands of everybody in the hope that somebody will send them to you. "Your constituents urge and expect you to stand like a rock" in support of President Wilson. This is true without reference to politics. I am of German descent myself, but I am American first. Ninety-nine out of one hundred of your constituents who have German blood in their veins feel, I am sure, as I do. Of course we all want peace, but loyal Americans have not forgotten the heroism of the patriots at Yorktown, Valley Forge, and Bunker Hill.

The author of this letter is a prominent Republican lawyer in Evansville. I do not divulge his name, because I do not want to violate any man's confidence. But it is a fair sample of many letters I received from persons of German descent, who viewed the situation from an entirely nonpartisan standpoint.

EYES OF WORLD ON UNITED STATES.

In all the dark days that have passed the eyes of the whole world have been on the United States. America's part in the world war has not been of its own making. Great problems have been constantly thrust upon this Nation, and the frequency of this has been such as to place the United States in the universal limelight as it never has been before as a neutral. Every combatant has taken advantage of America's position in an effort to gain our support in one guise or another. How well they have succeeded in breaking down the bars of our neutrality is emphasized in the numerous claims put forth by unofficial sources that this Nation has not sided with them on this question or that. Prejudicial construction has been put to matters summed up by our country from unbiased decisions based on the international laws.

From hundreds of press accounts of complaints of the combating nations I have selected the following dispatch, coming from London under date of January 15:

If Count von Bernstorff succeeds in obtaining a quid pro quo for the outward recantation by Germany of her acts of piracy and succeeds in enlisting the United States as one of Germany's minor, indirect allies in her efforts to rule the world, we may expect fresh attacks

upon our interpretation of international law. If President Wilson should elect to walk the road so obligingly constructed for him by Berlin, it is well he should realize where it is going to lead him—

Says the Pall Mall Gazette—

The British Empire, which is shedding blood and not ink for the vindication of "neutral rights," has reached a stage in the conflict where technicalities will not be allowed to restrain the legitimate use of all its weapons of warfare. Our right to prevent supplies from reaching the enemy is absolute, and if the process assumes fresh disguises, it is the business of international law to strip them off and not to be fettered by the wording of its former rescripts.

No British Government would dare to relax its grip on Germany now in deference to its interests and threats of outsiders who are chiefly interested in what profit they can make out of the world's agony. The blockade in future must be tighter instead of looser, and nothing will impart to it a sterner temper than any external interference.

Accused by pro-English as indirect allies of the Imperial German Government! Accused by pro-Germans as indirect allies of the Government of Great Britain!

Immediately following this article was another dispatch from London with headlines:

Says Germany and United States bully England.

It reads as follows:

Germany is now clothed in a white sheet, the Evening Standard says. She and America are joining hands in the noble task of bullying the nation that has respected every law of humanity and has persistently interpreted the law of nations to her own disadvantage.

UNITED STATES GODFATHER TO FOREIGN SUBJECTS.

No sooner had the various nations cast off peaceful disguise and flown at one another's throats than the United States was called upon to assume the obligation of representing the subjects of the warring powers in enemy countries. It was a tremendous task in itself. At present this country is protecting the Germans, Austrians, and Turks in England, the British and Japanese in Germany and Austria, the Germans and Austrians in France, and the French and British in Turkey.

Aside from handling the immense mass of correspondence caused by the necessarily roundabout channel through which the warring nations communicate with one another, the American diplomats have been forced to keep a fatherly eye on prison camps, provide food and money for men, women, and children of the belligerents, superintend the exchange of letters between the dependents and home countries, and do innumerable other gratuitous tasks.

In London alone the American embassy for months has maintained extra staffs at the German embassy, 9 Carlton House Terrace; at the Austrian embassy, in Belgrave Square; and at the American embassy proper, in Grosvenor Gardens.

Into these establishments American consuls throughout the United Kingdom have wired their daily reports and received instructions regarding the care of enemy aliens in their respective districts. In many cases women and children or old men have been repatriated through American intervention at the British home office.

Apart from the great mass of clerical work and the ordinary work incumbent upon them, American embassies in European warring nations have been obliged to perform countless duties for belligerents.

In London about 16 buildings formerly occupied by German, Austrian, or Turkish diplomats, either as offices or residences, have been under Ambassador Page's care.

In several instances the embassy has been forced to superintend the packing and storing of household goods. Attachés frequently have appeared in London courts to oversee the work of counsel hired in behalf of Germany by the embassy.

HOLD PROTECTING WING.

All the European embassies have constantly held a protecting wing over the American Red Cross. The movements of hospital shipments have been watched. Exchanges of prisoners most always are superintended by American diplomatic agents.

The safety at sea and the entrance into Belgian harbors of relief ships constantly demands the attention of the American embassy in London. Cases of American shippers in prize courts also demand attention.

In hundreds of these matters President Wilson has lent his helping hand, but has never complained. Diplomatic questions involving neutral rights have never been so arduous but that he has had time to do his humble part in carrying out the tremendous obligations imposed upon his Nation in holding the protecting wing over millions of foreign subjects.

UNITED STATES HAS NO CONTROVERSY.

And yet, despite the great burdens resting on the shoulders of this Nation and the large volume of correspondence that has passed across the sea, to-day there exists no highly fundamental differences between the United States and any of the warring powers.

Germany has never by official utterance of any kind protested against the export of munitions from this country. Germany has never said to us that we ought to declare an embargo on arms. Not that she has not had opportunity to do so, for many diplomatic notes have come to the United States from the Imperial German Government. But for the issue raised in this country by those unfavorable to the construction of the matter by this Government, it is likely we would hardly ever hear anything about an agitation for an embargo.

THE MUNITIONS QUESTION.

Herr Harden, the Zukunft editor, was recently quoted on the subject of the vilification of President Wilson for allowing munitions to go to the allies. He states that Germany has supplied munitions to every belligerent in the world in the decades past and that she was prevented from supplying the Boers with ammunition "only by the same sea power which now prevents Germany from getting American munitions." Referring to the lament for the grief of Germans who mourn the bloodshed caused by American munitions, Harden asks if their grief is more poignant than that which followed the carnage wrought by the Krupps' murderous products.

Count von Bernstorff, the German ambassador, has twice placed himself upon record on the subject of the traffic in munitions. His first utterance was in September, 1914, when he said:

I have no complaint on contraband of war being taken out of this port (referring to New York), as the law allows that contraband goods may be taken from this port, and even taken to a belligerent power, at the risk of being captured by the ships of another belligerent power.

Eight months later Count von Bernstorff swung around to a different attitude on the subject and seemingly based a large part of his argument on the ground that "the situation in the present war differs from that of any previous war."

The two memoranda, of course, were unofficial in a sense that they were not sent by the German Government, a fact which Count von Bernstorff was quick to explain to our Government.

But in his first statement the German ambassador said the "law allows" such shipments, and it matters not what else he said on the subject, for if the "law allows" it there is certainly no justification in the United States preventing it at the surrender of its neutrality.

KUNO FRANCKE SPEAKS ON NEUTRALITY.

I quote part of a letter written to Hon. Richard Bartholdt, former Member of Congress, by Kuno Francke, head of Harvard's Germanic Museum, in telling why he would not join the conferees on "American neutrality" in Washington:

CAMBRIDGE, MASS., *January 28, 1915.*

HON. RICHARD BARTHOLDT,
Committee on Foreign Affairs, Washington, D. C.

MY DEAR MR. BARTHOLDT: My sympathies, therefore, in this war are wholly and fervently on the German side. But my German sympathies can not make me forget what seem to me my duties as an American citizen.

I believe it would be against my duties as an American citizen if I were to take part in a propaganda the purpose of which will be thought to be to force our Government into a hostile attitude toward England. Your circular letter speaks of England as "America's archenemy." It calls for a "New declaration of independence" which is to "eliminate all undue English influences from our American life." And it protests "against the continued traffic in arms and munitions of war which practically arrays our country on the side of England." I do not wish to emphasize the fact that the proclamation of an embargo on arms and munitions of war would be an altogether illusory thing. Arms and other implements of war would, if our Government established an embargo on them, be shipped from this country to Habana or to Vigo or to some other neutral port and would reach their destination from there without any hindrance. What I do wish to emphasize is that the establishment of such an embargo would inevitably bring our Government into conflict with England and might drive us into war with England. As a man of German blood I might welcome the help which would accrue to Germany by such a conflict between the United States and England.

But as an American citizen I can not possibly support a policy which would bring the terrors of war to our own country. What I feel bound to support as an American citizen is a policy which holds itself strictly within the now accepted rules of neutrality, although, to my regret, this policy, through circumstances over which the United States has no control, practically turns out to the advantage of England and to the detriment of Germany.

DISCRIMINATION NOT SHOWN.

There is another point in your circular letter in which as an American citizen I feel bound to disagree with you. You say that "an emphatic protest should be entered against every attempted discrimination against the many millions of our citizens who happen to bear non-English names." If by these many millions you mean citizens of German descent, I fail to see what you mean by attempted discrimination against them. That there is a strong anti-German feeling in this country at the present moment can not be denied. I believe this feeling to be rooted in a wrong and shortsighted view of the issues at stake in the European war. The necessity of combating shortsighted views of the majority makes the situation for us German-Americans for the moment far from pleasant. But of discriminations proposed or attempted against German-American citizens I am unaware. Nothing, it seems to me, is more prejudicial to our position as American citizens than the clamor for recognition which is so often heard at German

mass meetings. Nothing would be more fatal to our standing in the community than the insistence on racial contrasts and demands. We have every opportunity in this country to make felt what is best in German character and life. Let us continue to do so; let us continue to have a prominent part in all endeavors for political, civic, and industrial progress; let us stand for the German ideals of honesty, loyalty, truthfulness, devotion to work; let us cultivate our language, our literature, and our art; let us fearlessly defend the cause of our mother country against prejudices and aspersions, but let us refrain from political organizations which would set Germans in this country apart as a class by themselves. Such an attempt would lead not to the raising but to the degredation of the German name in this country. It would foster hatred instead of sympathy; and only by gaining the sympathy of the majority of the American people can we German-Americans help the cause of our mother country.

Very truly, yours, KUNO FRANCKE.

"DEUTSCHLAND" PROVES UNITED STATES RIGHT.

We could look nowhere to find better evidence of the impartiality of this administration than the case of the *Deutschland*, the merchant submarine liner. This craft came from Germany with a cargo of goods which was delivered at an American port. On the return trip American-made goods, as well as nickel and rubber, which are used in the manufacture of war material, were allowed to clear the port, bound for Germany. This vessel could just as well have carried guns and ammunition, for our Government permits our manufacturers to sell to anyone who comes to buy—to do otherwise would be a breach of our neutrality.

The coming of the *Deutschland* was nothing else but an admission that the United States Government has been within its rights in permitting merchant vessels to carry goods to the allies. For if Germany takes goods out of this country to be used in the manufacture of its guns, it certainly does not believe the United States could honorably prevent the allies from doing the same thing. If Germany could turn the tables on the allies in the blockade situation, it of course would have a distinct advantage, but because the advantage has been on the other side all along is no indication that the administration has been unneutral or unfair to Germany.

The reception given the *Deutschland* crew in Washington proved distinctly that neutrality really exists in the seat of our Government. And conversely it disproves the theory that there is any hostile feeling here in official quarters toward the Imperial German Government.

In fact, the whole attitude of the United States Government in giving a clearance status to the *Deutschland;* in allowing it to deliver its merchandise; in allowing it to take away cargo, part of which was a product of the soil of Canada; in giving its crew a cordial reception as it would the subjects of any other foreign nation in a legitimate quest, is all a striking indication that the best of friendly relations exist between this country and Germany.

MISREPRESENTATIONS ARE MADE.

Among other instances where misrepresentations have been made regarding this Government's attitude toward Germany is that of the question of Germany's milk supply. Here are the contents of a dispatch sent from Washington by the correspondent of the Christian Science Monitor, which throws some light on the question:

One of the more recent movements intended to embarrass this Government in its dealings with Great Britain is the plan to enlist the American Red Cross in the movement to get hospital supplies and condensed milk into Germany. Americans have been appealed to and told pitiful stories of hungry babies in Germany who are deprived of milk, and they have been told also of soldiers in hospitals who are suffering neglect because they can not get necessary supplies from the United States.

This bureau is informed that all the milk necessary for the German babies is obtainable in Denmark and Holland, but that the real purpose is to use the milk fat in the manufacture of explosives and the tin can containing it for the manufacture of gas bombs and other containers for explosives.

More recently an official report from the American Embassy in Berlin, as made public by the State Department at Washington and published by authority of the German foreign office, stated that children in Germany are not starving because of lack of milk and other nutritive foods.

Children, as a class, says the report, which was compiled by Dr. A. E. Taylor, of the embassy staff, have presented during the recent months a condition of health and a reduction in death rate not present before the beginning of the war.

NO MILK SHORTAGE IN GERMANY.

Instead of there being any truth in the statement that the infants of Germany are suffering from lack of milk—

The report continues—

the very opposite is true. The question of the adequacy of the supply of milk for needs of the German Empire was realized early in the war and regulations were promulgated by the authorities for the purpose of accurate control.

I conferred with the State Department myself in person merely to confirm what I already was convinced was true in regard to the misrepresentations.

Now, is not all this quite in contradiction with a statement published in the Fatherland recently, quoting A. F. Beach, staff correspondent of the New York American:

I have been told that the State Department at Washington is withholding insurance on a ship donated to carry a cargo of milk to Germany because the State Department does not believe the milk is needed. Whatever the international aspects of the scheme, the milk should not be withheld for this reason.

As I said before, the State Department has never evidenced the least inhumane attitude with reference to the milk situation, and America in this, as in other questions agitated in muckraking periodicals, emerges clean and straightforward in its dealings with all the nations of the world, whether these nations be at war or peace.

And, again, I believe I have answered a criticism against this country, summed up in the Fatherland, thus:

What will America do? Will she make herself the accomplice of the British Government, or will she insist on her right, which in such a case becomes a duty, to ship milk to the babies of the Central Empires?

FOREIGN PREJUDICE MISLEADS.

Fellow countrymen, whether you who hear this spoken are of foreign birth or whether you are one born in this, our country, do you not deplore misstatements like this, calculated as they are to stir up antagonism? Does not it appeal to you that every right-thinking man in America should desist from listening to any kind of tirade against our own Government when it smacks of a foreign prejudice like this?

It is deplorable that a few people in this country seem inclined to listen to every attempt made to villify our President. Why pass hasty judgment on anything? Why give credence to every rumor? Why pay attention to superficial utterances that may do incalculable damage to our Nation in times when all heads should be calm?

CONCLUSIONS SOMETIMES HASTY.

A man came to me shortly before the *Lusitania* catastrophe whose uppermost impression seemed to be that our administration was sneaking around in an effort to give Great Britain every assistance possible. He insisted that the administration was pro-English in its every fiber.

"Why should this be?" I asked.

"Well, you know Bryan has a son-in-law in the English Army, and he wants England to win," replied my constituent.

A few weeks later, when it was announced Bryan had resigned from the Cabinet, this same man came to me and said:

I was wrong, Mr. LIEB. I suppose I was too hasty in my conclusions.

MISSED GUESS ABOUT BRYAN.

In the April 5 edition of the Fatherland this statement was made in connection with an article entitled "What Bryan will do at the Democratic convention":

Bryan will force attention to the submarine issue at the Democratic national convention.

I will leave it to my auditors as to the fate of this prediction. Here are other statements made in the same article:

It is a foregone conclusion that Bryan will, by hook or crook, make the convention at St. Louis in June face squarely and unequivocally the main issue which drove him from the Cabinet. From the floor and in the committee rooms he will plead for a declaration that will run squarely counter to the administration's whole course in the submarine controversy. That will be exactly in line with his attitude from the inception of the issue which so sharply defined the difference between himself and the President while he was Secretary of State. It will give a more practical character to his work in the interest of keeping this country out of war.

He will wage the fight more zealously at St. Louis than ever before, because he was convinced by first-hand evidence on his last visit to Washington that, based upon the House report, the Wilson administration thinks this country's "duty to civilization" is to help England crush the central powers.

BRYAN INDORSES ADMINISTRATION.

Now, what did Bryan do at the St. Louis convention? To show you how far the Fatherland was off the track I quote some of the most expressive extracts of Mr. Bryan's speech to the convention. He said:

After 16 years of waiting our party entered the White House, and, fortunately, we won the Senate and the House at the same time. Our party became responsible for national affairs, and now we come, after three years of labor, to make our plans for the future and to submit to the American people the claims of our party to continued confidence.

To-day those who stand for the Democratic Party are able to go before this Nation and not only give a reason for the faith that is in them but give a defense of the administration's claims to the confidence of the people.

You may take all the administrations from the beginning of our history as a Republic to the beginning of the present one and you will not find as many laws written upon the statute books of great importance to the people as you will find written in the last three years by Woodrow Wilson, a Democratic President.

We have a record upon which we can appeal to the people for their support without fear and without blush. I believe the American people, grateful for what this administration has done, grateful that we have peace in this country while war stalks throughout the world, will not be unmindful of the fact that it was a Democratic President, supported by a Democratic Senate and House, who has thus saved the country the horrors of that war.

My friends, I believe that there is now before this country an opportunity such as no other country has ever had since the beginning of time. I believe that God, in his providence, has reserved for the United States the honor and the task of lifting the moral code that governs individuals up to the level of nations and making it a part of the code of all nations.

BRYAN SAYS WILSON PREVENTED WAR.

Note from this that Bryan failed to utter one word against Wilson. Instead he gave Wilson and the Democratic Congress the credit for saving the country the horrors of war.

Others in the President's Cabinet besides Bryan have not escaped the tirade of abuse which has been waged for so many months. My attention has just been called to a slanderous article against Hon. William B. Wilson, Secretary of Labor. Here is a characteristic sentence I picked out:

Will Congress acquiesce in this traitorous action of a British-born Cabinet officer?

Does anyone believe that the person who made that statement is a loyal American in the true meaning of the word? British born! Why, is not this country of ours made up of to quite a large extent of persons who are British born, German born, Irish born, French born, and of other nations born? I have always been taught that this is the land of the free, where foreign born are given the same opportunities as the native born, regardless of the country he was born in. I hope no one thinks I ought not be a Member of Congress because I was born in Germany, and I am sure William B. Wilson has a right to expect the same conception of his prerogatives as a member of the Cabinet. William B. Wilson was appointed to the Cabinet before the war broke out in Europe, and since the war began. I am sure, knowing him as well as I do, that he has conducted himself in his high office in a manner that merits praise from all foreign as well as native born patriots of this free land of ours.

GEN. WINKLER INDORSES WILSON.

One of the finest examples of citizenship I know of on the part of a foreign born is the recent attitude announced by Gen. Frederick C. Winkler, of Milwaukee, Wis., who has been referred to as the most representative German-American living in Wisconsin. This brave soldier of the Republic, who during the Civil War fought for the Union by the side of Gen. Carl Schurz, and a lifelong Republican, has announced his intention of voting for the reelection of President Wilson next November.

In a telegram sent to Mr. Wilson Gen. Winkler said:

Have read your New York Press Club address with great satisfaction. A Republican voter since 1860, I hold that in the present crisis the party has no place. True Americanism must stand by the man who manfully stands at the helm. I support your reelection.

F. C. WINKLER.

JULY 4, 1916.

RENDERS COUNTRY A SERVICE.

In doing this thing Gen. Winkler has rendered a very great and distinct service both to his country and to the whole body of American citizens who, like him, are of German blood. This service in nowise lies in the fact that he, a Republican, is going to vote to reelect a Democratic President. His motive and purpose, like the question upon which they rest, rise far above any consideration of partyism. His great service lies in the fact that he, an American leader born in Germany, refuses to permit any consideration whatsoever to affect his duty and his devotion to America. It is not Woodrow Wilson the man nor Woodrow Wilson the Democratic candidate with whom he is concerned, but Woodrow Wilson the head of the Republic, the pilot who has guided the ship of state patiently and skillfully and with stout courage through waters more stormy and dangerous than any in which the good ship has found itself in half a century and more. By voting for the President who has served the country so ably and faithfully, Gen. Winkler best serves his country. This is the real meaning and effect of his act: He casts his ballot for America.

Gen. Winkler has set a great example for German-Americans, but he is not alone in his conception of the righteous dealings of Woodrow Wilson in this time of tribulation. There are thousands in this country of German birth who hold views like those of the Milwaukee patriot. It is no uncommon thing for newspapers printed in the German language to pay tribute to the justice of this Nation's attitude in upholding its neutrality.

INDIANA EDITOR SPEAKS.

Editor Pickhardt, of the Huntingburg (Ind.) Signal, is of German blood, and until recently his paper was printed in the German language. As an American, with no apologies for his German descent, he speaks through the Signal to other Americans of German descent. Among other things, he says:

The Germans of the country, and particularly those of the third congressional district of Indiana, should resent the efforts of certain German professional politicians in the employ of the interests to prejudice the honest, loyal, industrious Germans against Woodrow Wilson. Now is a good time to prove your loyalty to your country. There are some professional politicians in this country who are disloyal citizens. They, aided and abetted by their Republican allies, will do all they can to defeat President Wilson. But these professional politicians are neither large in number nor representative of the Americans of German ancestry or birth in the United States.

Editor Pickhardt goes on to say that certain influences have tried to represent that the President has repeatedly insulted German-American citizens by charging them with disloyalty to the American Government because of their sympathies for their fatherland in the present struggle in Europe. He vigorously maintains that Mr. Wilson has done nothing of the kind; that the President's words have been twisted around to suit the purpose of his decriers; that President Wilson has never spoken disrespectfully of our German citizens on account of their sympathies; that as schoolmaster, governor, and President, Woodrow Wilson has often given just praise to the German-American citizens of this country for their loyalty to the flag, their industrious and faithful religious character, and their honesty of purpose.

WISCONSIN PAPER CHARGES CONSPIRACY.

Speaking of the injustice done President Wilson, with reference to a recent discussion, the Waldbote, a German-language weekly of considerable influence at Medford, Wis., recently declared editorially:

Party politics are the sole motive of misinterpreting the reference of President Wilson to disloyal citizens. But there are writers and public speakers who are demagogues enough to do such a monstrous injustice to the President of the United States as a means to their political ends.

President Wilson declared on two different occasions, and said practically the same thing in the Democratic national platform, "that there exists in the United States a small number of such, who conspire for the purpose of advancing the interests of foreign countries and to the prejudice of our own country." The President said explicitly that the number was only small and designated no particular nationality.

But, orally and in writing, it is preached to the German-Americans of the whole country for party political ends that President Wilson means exclusively German-Americans and all German-Americans.

The purpose back of such demagogic substitution of a false interpretation to the words of the President is clear. It is a monstrous injustice.

Let us be just!

SAYS WILSON SAVED COUNTRY.

In another editorial the Waldbote said recently in denouncing attempts to deliver the solid German vote to the Republican Party:

German-Americans are not poll cattle. They will vote independently, and the Waldbote believes that the Democratic Party will lose fewer German-American votes than the Republican Party. Many German Republicans will vote for Wilson, because he kept the country out of war, while they know that under any Republican administration it would have been involved long ago.

"AMERICANISM" PLANK UPHELD.

Of the editorial opinions on the "Americanism" plank of the Democratic platform, none has attracted more attention and interest than the view expressed by the Chicago Abendpost. This paper, which ranks as one of the most influential journals in the German language, declares that the Democratic declaration is "unobjectionable," and that those who feel themselves to be hit by it should ask themselves if they have not put themselves in a false light.

FROM DODGE COUNTY (WIS.) BANNER.

Another German editor in Wisconsin has recently made some interesting comments on the political situation. I refer to the publisher of the Dodge County Banner, a German language paper. He says in his contention that Charles E. Hughes is supported by the violently proally element:

Up to the present Mr. Hughes has always followed the proverb "silence is golden." Only occasionally has he expressed himself and then in a way which allowed all sorts of interpretations. But now he has sent a document to his "dear Col. Roosevelt," which is an encomium and flattery of the first rank, an unconditional acceptance of Roosevelt's doctrines, and a repetition of Roosevelt's manner of speaking. He begs the Colonel for "effective cooperation in the carrying out of common plans and the achievement of common goals—national safety and the peace of law and justice."

A man who has common goals with Mr. Theodore Roosevelt really looks mighty strange as a German-American candidate.

Politicians are just now playing a great game to win the German vote in the coming election. Every sort of trickery is being resorted to. I believe I am right in warning German-Americans to proceed cautiously in considering the conditions.

POLITICIANS TRY TO DELUDE.

On the one hand, we behold the spectacle of the Hughes-Roosevelt sponsors trying to entice Germans from the Democratic to the Republican Party. On the other hand, we look over the Republican platform and fail to find a mention of the

very issues they are trying to raise by mouth and pen. Yes, they come to you, fellow countryman, and say Wilson was wrong on the embargo question, that he was wrong on the submarine issue. But if they believe those things so enthusiastically just ask them if their platform contains one word of criticism in condemnation of President Wilson's stand on the embargo question or on the submarine question or on the question of the right of American citizens to travel on armed belligerent vessels armed for defensive purposes only.

"Oh!" they will say, "Our platform covers that point when we condemn the present administration for its foreign policies."

"But," you can answer, "the platform could just as well be construed that a Republican administration would have declared war on Germany."

As a matter of fact, fellow countrymen, the platform is nothing but a "scrap of fly paper," designed in the hope of catching your vote as well as those inclined to the proally side.

From a study of the Republican platform adopted at Chicago and of the public utterances of Mr. Roosevelt, Mr. Root, Mr. Lodge, and even of Mr. Hughes, since his nomination at Chicago, it would appear that President Wilson's European policy is censured not because he has dealt too strenuously with Germany, or because he has been too lenient with England in the matter of her violations of international law in the interference with our neutral commerce, but because he has dealt too leniently with Germany.

Perhaps Mr. Hughes, who has been silent on all public questions for the past six years, may have the audacity to come out of his hiding at this time and this day and tell the people what he would have done under the trying circumstances that President Wilson went through, now that he has the passing of time to aid him in his hindsight.

GOOD EVIDENCE OF INTEGRITY.

The fact that President Wilson's foreign policy is bitterly denounced not only in London and Paris, but in Berlin and in Vienna, and the fact that their followers have joined hands in this election to defeat him is pretty good evidence of the fact that President Wilson has steered the ship of state pretty near to the center of the stream of trouble and that he has done all that any human being could do under the most trying circumstances to have our country occupy a neutral position in the unfortunate European war.

For the half century I have lived in the United States I have often had occasion to observe the true citizenship that has characterized the German people who have come to make this land their home. I know they are as loyal as the truest. They are proud of the mighty and noble Nation of which they are a part; proud of the glorious Stars and Stripes; proud of the part they have taken in the development of this greatest of all free countries. They joyfully fulfill their duties as citizens. Always when their new country called her sons to war against foreign or domestic foes, the German-born citizen has been among the first to rush to the defense of the flag and, on the battlefield, to offer his blood and his life to the common cause. German names have never been wanting on the roll of heroes and martyrs of the Republic. The German mind and the German hand have toiled with diligence and with abundant results in the workshop and the domain of thought. The political rights which the new fatherland has bestowed upon them have been put into practice with generous liberality. The fondness for the old home has never been so pronounced that the German-American has allowed his sense of duty to the new fatherland to become divorced from the idea of leading this Republic from the paths of its traditional and wise policies.

AMERICA ALWAYS GERMANY'S FRIEND.

In the light of the high place we hold in the esteem of others, we have the right to maintain our fondness for the old ties of our days of young manhood, without endangering our true sense of obligation to the country we now owe unstinted allegiance. It is with a certain amount of satisfaction that history unfolds the fact that America has always been at peace with Germany.

I think I thoroughly understand the sentiments of the naturalized constituency I represent in Indiana.

They are peace-loving people and they want to be neutral. It is true they have a deep and profound sympathy for their respective fatherlands, and it is commendable that they have; but in spite of it they are for their own adopted country first, and the hot-headed partisans who have tried to mislead them into believing that the present administration is not observing absolute neutrality will find that their efforts have been wasted. If there is one virtue greater than any other in our German-American citizen, it is his sense of loyalty to his Government. He feels that he must depend upon this Government for life, liberty, and opportunity. He knows that his Government must be loyally supported in times of stress like these, and he shuns most cordially an agitator.

Words can not express the gratitude I feel for the opportunities which have been afforded me as a foreign-born citizen. When I set foot on American soil 50 years ago, I had no wordly possessions with which to start my life battle. I had only a willing heart, a firm determination, and a full appreciation of the possibilities that lay open in the land where freedom and opportunity stand forth as in no other land. I had left behind me in Germany my only kin. I had left behind the home in which my father and mother had given me my childhood instructions in honesty and fair dealing with mankind.

He that cometh to God must believe, first, that He is; secondly, that He is the rewarder of them that diligently seek Him.

This passage, found in Hebrew xi:6, imparts that religion in any valid sense must start from the belief that God exists and that He is responsible and responsive; that is, includes in his nature those elements of personality which are necessary for the forming of personal relationship.

So it is with the young man who bundles up his few belongings, turns his back to the Old World, and faces the New. His faith must be unbounded in the Nation he seeks; he must believe that the Republic is responsible as well as responsive to he who earnestly strives to the fulfillment of the highest aims of citizenship.

AMERICA LAND OF OPPORTUNITY.

America at once gave me the sense of being grateful and true to the trust of citizenship which I set about to earn, for I knew the land of opportunity held much and gave much to the new citizen who possessed an honesty of purpose and a keen sense of loyalty to the Stars and Stripes.

Even though a few years afterwards, when word came across the ocean that my brother had been crippled fighting for Prussia against France, and that my father had faced danger by the side of my brother in the field of battle, I never wavered in my loyalty to the country I had adopted. For on this side I realized I had a battle of my own to fight—I was fighting for success, for honest recognition, for the glory of a true citizenship under a flag that symbolizes all that is great and just.

And I can not pass on in retrospect without giving due credit to the opportunities that have been afforded me in the State of Indiana, in the first district of that State, which I have the honor to represent, in the county and city in which I live, for they are all a glorious part of this great land.

DUTY TO CONSTITUENTS.

I felt when I first took my seat in Congress that I could not better show my deep sense of appreciation to my constituency than to work for the high ideals that had been intrusted to me for fulfillment. So I have always acted only after saying to myself, "I am trying conscientiously to do what my people want me to do." When matters came up that were not local in character, but concerned the well-being of the Nation in its entirety, I said to myself: "I believe I have the right conception of the duties of true citizenship; if I act on this conception I will be doing as those who elected me would do if they were in my place."

Hence I feel I have no apologies to make. I am only doing my duty in expressing my conception of the foreign policies of our administration and the delicate questions of our foreign relationships.

To you who may not be a constituent of mine, I hope I have in some small way conveyed some inspiration that may accrue to your benefit. To all who may know of my representations, whether native born or foreign born, I extend a wish that Providence may continue to lead you to a wholesome realization of the duties that every citizen owes to this land of the free. [Applause.]

The SPEAKER pro tempore (Mr. BORLAND). Under the special order the gentleman from New York [Mr. BENNET] is recognized for 30 minutes.

IMMIGRATION STATION AT ELLIS ISLAND.

Mr. BENNET. Mr. Speaker, before I commence I ask unanimous consent to extend my remarks in the RECORD by inserting letters from persons to which I shall refer.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. BENNET. Mr. Speaker, on the 24th of June I offered the following amendment to the sundry civil bill:

Page 168, line 26, after the end of the line, insert:

"*Provided further*, That no part of the sum hereby appropriated shall be expended for the maintenance at any United States immigrant station of any of the privileges now disposed of after public competition, as provided by the act of February 20, 1907, entitled 'An act to regulate the immigration of aliens into the United States.'"

In connection with that amendment, the proceedings, which were brief, were as follows:

Mr. FITZGERALD. I reserve a point of order on the amendment. I could not understand it from the reading.

Mr. BENNET. Mr. Chairman, I would be very glad to be heard on the point of order. This is simply a limitation. The amendment provides that no part of the appropriation shall be used for the purpose of maintaining any of the privileges—that is, money changing or anything of that sort—which now by law are let by competitive bidding. It is not subject to a point of order.

The Chairman, the gentleman from Virginia [Mr. HAY], who so recently has been justly honored by the President of the United States by being appointed a judge of the Court of Claims, said:

Does the gentleman from New York make the point of order?

Mr. FITZGERALD. If the statement of my colleague, Mr. BENNET, is correct, I can not make the point of order.

The CHAIRMAN. The Chair does not think it is subject to the point of order.

Mr. FITZGERALD. I do not see that there is any objection to the amendment, and we will accept it.

The question was taken, and the amendment was agreed to.

Every Member of the House will recognize, particularly when I tell him that that amendment was offered at the end of the appropriation for the maintenance of the Immigration Service, that it was offered at the proper place and, relating to immigration, it was offered at the fairest time, in order that those who were interested in the subject of immigration would be presumed to be in the House. As a matter of fact, within five minutes before that there had been a vote upon another amendment to the immigration section. There had been tellers, and tellers had disclosed the presence of a quorum. So the attendance was larger than was usual.

I knew when I offered that amendment I would receive criticism from two sources, one the New York Globe and the other Frederic C. Howe, the commissioner of immigration at Ellis Island. The criticism from the New York Globe can be briefly disposed of. Three years ago, when I was not a Member of Congress, the New York Globe, which makes a specialty of criticism of all kinds of foods and at the same time carries in its columns in some editions—I forget the exact name, but across the top of it is the legend that the advertisers whose names appear in that particular part of the paper advertising food products for sale, the Globe assures its readers, sell food products that are all right. And it has happened, to my knowledge, that a man had been vigorously attacked by the Globe in relation to food products, that the attack had slowed down, and that then the solicitor from the advertising end had come around and asked him for his advertisement for that particular part of the paper. That paper made an attack against Hudgins & Dumas, who were the food contractors at Ellis Island. They had just been awarded a three-year contract, and the Globe asked that their contract be annulled, and made charges that their food was bad and their methods were worse. If what they said was true, both members of the firm ought to have been in the penitentiary. They retained me as their counsel. We had two weeks' hearing before the commission appointed by the Department of Labor.

Not only did the Globe fail to prove its charges but Hudgins & Dumas were able to affirmatively prove the untruth; yes, more than that, the motive behind the charges as they came originally to the Globe, with the result that the department did not cancel their contract, and it continued until it expired on the 30th day of June, this year. Naturally the New York Globe has been looking for a chance to get even with me since, and when I offered this amendment, which gave Hudgins & Dumas no right which Congress had not already given them by law, the Globe raised the cry that I was practicing law upon the floor of the House of Representatives.

They have kept it up ever since at reasonable intervals, the latest being the publication of a letter in last night's edition from a Mr. Paul B. Sweet, whose acquaintance I have not the honor of possessing, and who, I find from the directory, lives in the nineteenth congressional district, the district represented by my colleague, Mr. CHANDLER. Mr. Sweet inquired with some solicitude if it were not possible that I might be compelled to serve a term in the penitentiary [laughter], to which the Globe replied, with apparent regret, that I was not subject to indictment for the amendment which I had offered. [Laughter.]

Gentlemen, it is the old, old story that we are all familiar with, of a man who has been licked, and licked well, in a lawsuit waiting his time to get square. If that were all that had been in it, I would have been content to let time and my district decide the question.

Mr. CAMPBELL. Did they not "cuss the court," too?

Mr. BENNET. Yes. The gentleman from Kansas asks, "Did they not cuss the court, too?" Yes. The things they said about the Department of Labor I could not repeat in the presence of gentlemen.

But the question, so far as it relates to the Commissioner of Immigration, is a very serious question. Mr. Frederic C. Howe removed to New York about 1910 from the city of Cleveland. He is more radical in his views in regard to governmental affairs than any Member of this House, and that gives somewhat of an idea of him as an extremist.

Mr. PLATT. Mr. Speaker, will the gentleman yield?

Mr. BENNET. Yes.

Mr. PLATT. Did he remove to New York?

Mr. BENNET. I think so. He became superintendent of what is known as "The People's Institute," an organization whose function was to incite discussion amongst the people, and I have always thought that Mr. Howe was a good choice for the place. For some reason or other he was chosen as Commissioner of Immigration at Ellis Island in 1914.

Mr. Howe does not believe that anything ought to be done by private contract which by any possibility the Government can do. I believe with the old Jeffersonian democracy and Hamiltonian Federalists that everything that can be done by individuals ought to be done by individuals, and that that country is governed best which is governed least. [Applause.] But I recognize Mr. Howe's right to get his views to prevail if he can do it honestly. He took the matter of changing from the private contract system to the governmental operation system up with the Department of Labor, and on the 15th of April, 1916, the Department of Labor wrote this letter to the Attorney General:

APRIL 15, 1916.

SIR: The contract awarded by this department in pursuance of section 30 of the act of February 20, 1907 (34 Stat., 898), for the exclusive privilege of operating a restaurant and exchanging money at the immigration station at Ellis Island, N. Y., expires June 30, 1916. The department has experienced from time to time considerable difficulty with commissary contractors at Ellis Island, and it has under consideration the proposition of operating the restaurant itself at the expiration of the present contract for that privilege. Before formulating any definite plans in this matter, however, the department desires to have an expression of your views in the premises.

In view of the foregoing, I have the honor to request an expression of your opinion as to the authority of the Secretary of Labor to discontinue the awarding of this privilege to private individuals and the assumption of the operation of the restaurant by the Government.

Incidentally, operating a restaurant and exchanging money are two distinct privileges, held by different people, and why they allude to them as one contract I do not know. It must have been a typographical error.

Then they asked for an expression of opinion as to the authority of the Secretary of Labor to discontinue the awarding of this privilege to private individuals and the assumption of the operation of the restaurant by the Government. I read:

In accordance with your instructions in matters of this kind, there is inclosed herewith an opinion of the solicitor for this department on the subject.

On the 11th of July I wrote to the department asking for a copy of that opinion of the Solicitor, just a week ago, and have not received it.

On the 26th of April the Department of Justice rendered a most extraordinary opinion. They said:

DEPARTMENT OF JUSTICE,
Washington, April 26, 1916.

SIR: I have the honor to acknowledge receipt of your letter of April 15, 1916, wherein you request my opinion as to whether, after the now outstanding exclusive contract privilege therefor shall have expired—as it will have on June 30 next—the Department of Labor may itself operate the restaurant at the immigration station at Ellis Island, N. Y.

I assume that a suitable building is used at Ellis Island for the detention and examination of incoming aliens, and that the proposed restaurant service will be there conducted in connection with such detention and examination. On that assumption I answer your question in the affirmative and for these reasons:

Section 8 of the act of March 3, 1891 (26 Stat., 1085), provides:

"SEC. 8. * * * the inspection officers may order a temporary removal of such aliens for examination at a designated time and place, and then and there detain them until a thorough inspection is made. * * * During such inspection after temporary removal the superintendent shall cause such aliens to be properly housed, fed, and cared for, and also, in his discretion, such as are delayed in proceeding to their destination after inspection."

This provision, if unrepealed, confers ample authority for the action proposed. Claim of repeal can only rest on section 43 of the act of February 20, 1907 (34 Stat., 898, 911). This section repeals certain specific acts not here material and "all acts and parts of acts inconsistent with" the act of which it is a part. That act (of 1907) not only contains no provisions inconsistent with the above-quoted provision of section 8 but in its section 16 indicates generally a like purpose, in the following language:

"SEC. 16. * * * *Provided*, That where a suitable building is used for the detention and examination of aliens the immigration officials shall there take charge of such aliens, and the transportation companies, masters, agents, owners, and consignees of the vessels bringing such aliens shall be relieved of the responsibility for their detention thereafter until the return of such aliens to their care."

So that sections 8 and 16, supra, in connection with section 22 of the act of 1907, reading—

"SEC. 22. That the Commissioner General of Immigration * * * shall, under the direction of the Secretary of * * * Labor, have charge of the administration of all laws relating to the immigration of aliens," * * * etc.—

clearly confide the choice of methods of feeding to the administrative discretion of the Secretary of Labor. And the appropriation provided by the act of March 3, 1915 (38 Stat., 877), is equally available for any method that may be chosen.

Section 30 of the act of 1907, reading—

"SEC. 30. That all exclusive privileges * * * of keeping eating houses * * * in connection with any United States immigrant station shall be disposed of after public competition," * * * etc.—

applies only in the event the particular method referred to, i. e., the bestowal of an exclusive privilege, shall be the method selected. It does not in any manner limit the otherwise unrestricted power of selection.

Respectfully,

T. W. GREGORY,
Attorney General.

To the SECRETARY OF LABOR.

After having obtained that opinion the department obtained an opinion from the Comptroller of the Treasury to the effect that they could use the existing appropriations for the purpose of maintaining the restaurant.

There never were so many statutes overlooked in a decision as in that decision of the Attorney General.

Immigration originally at the port of New York was regulated by the State, which levied a head tax. That commenced in part in 1824 and continued until 1890. For more than 20 years prior to 1890 the State let the various restaurant privileges at Castle Garden by contract. At first there was no legislative authority, but by the act of 1883 it was provided that all privileges, whether exclusive or not, should be let by competitive bidding, recognizing an existing practice. In 1890 there arose a controversy between the State of New York and the United States Government as to who should control immigration; and during three successive Congresses, the Fiftieth, the Fifty-first, and the Fifty-second, the two committees, the committee of the House and the committee of the Senate, were appointed as a joint committee to investigate the subject of immigration at Ellis Island.

On March 3, 1891, in the Fifty-first Congress, was passed the act which allowed the superintendent to feed the immigrants. That act lasted just two years, and only two years. Representative Herman Stump, the chairman of the House committee in the Fifty-second Congress, reported a bill, section 10 of which is as follows:

That after the 30th day of June, 1892, all exclusive privileges of exchanging money, transporting passengers or baggage, or keeping eating houses, and all other like privileges in connection with the Ellis Island Immigrant Station shall be disposed of after public competition, subject to such conditions and limitations as the Secretary of the Treasury may prescribe.

Mr. Stump was an immigration expert. He subsequently became Commissioner General of Immigration under the second administration of Grover Cleveland. Doubtless the gentleman from Illinois [Mr. CANNON] remembers him. That provision which he reported to the Congress became a law in that Congress (27 Stats., p. 571), so that the provision on which the Attorney General bases his opinion that the Department of Labor now has the right to proceed with governmental operation ceased to exist 23 years ago. In citing the statutes the Attorney General never even referred to this particular statute.

Now, was there any reason why that change was made? Yes; there was. Those two years were the worst years of scandal in connection with that privilege that there has ever been on Ellis Island. I can say that with more freedom because it happened under a Republican administration. The old system of the State of New York of competitive bidding was swept away, and the commissioner of immigration picked out two friends, fixed the price that they should pay at $200 a month, and they ran the privilege for two years for all there was in it, with the result that in 1892 the employees on Ellis Island struck in a body against eating at the restaurant. That is the way governmental operation worked out, and the succeeding Congress changed back to the old competitive bidding plan originally instituted by the State of New York. Now, that is not all. Since that date the matter has been before this House five times. The Attorney General said there was no repealing statute. In the revision of 1903 (32 Stats., p. 1213) the provision of the act of 1891 was repealed in section 36, the provision being—

All acts and parts of acts inconsistent with this act are hereby repealed

And the provision as to competitive letting was continued in section 30.

Not only do I make this assertion, but the Department of Labor in its official pamphlet of the immigration law, issued under date of February 12, 1916, page 50, under the heading of "Law not repealed, or reenacted by the immigration act of February 20, 1907, or passed subsequent to its enactment," includes one provision from the act of March 3, 1891, and only one, and that one not the provision on which the Attorney General relies. So the Department of Labor concedes that the portion of the act of March 3, 1891, cited by the Attorney General is repealed.

More than that, in the act of February 20, 1907, the provision in relation to the competitive letting is again inserted and again the repealing clause is inserted. That is three times that this House has passed on the question in one way. Then it passed the immigration bill which President Taft vetoed, and in that was the same provision. Then it passed the immigration bill which President Wilson vetoed, and in that was the same provision. And this spring it passed an immigration bill, which is now pending in the other body, in which the matter was not permitted to go through by inadvertence, but there were improvements in the form of the language. So that is six times since the act of March 3, 1891, that the Congress of the United States has emphatically said that competitive bidding for these privileges is the method to be pursued.

I wrote the Attorney General of the United States a letter on the 12th of July, in which I called his attention to all these statutes, called his attention to the way the privileges were operated, and asked him if he had known those things whether it would have made any difference in his opinion. I am not favored with a reply as yet.

This controversy had one effect. It called my attention to the Commissioner of Immigration at Ellis Island.

I have known Ellis Island for years. I was six years on the Immigration Committee. I secured appropriations of over $2,000,000 to build the hospitals, baggage rooms, and other necessary buildings for the care and comfort of the immigrants, and when I was a member of the immigration commission, in connection with my friend Judge Goldfogle, I conducted an independent investigation of Ellis Island which resulted in rectifying some evils that did exist there.

Now, what did I find? I found first, from my present inquiry, that this commissioner of immigration is the most negligent commissioner of immigration that we have ever had, the most frequently absent, and that he pays the least attention to his duty of any commissioner in my time. Then I found a startling condition. The gentleman from Illinois [Mr. MANN] and myself collaborated in 1910 in the passage of what is known as the white-slave act, his provision applying to interstate commerce and treaties, and the amendment which I had the honor of reporting applying to immigrants. In connection with those bills he and I made somewhat of a study of this subject, revolting but very vital in its connection with the life of our people. Section 3 of the immigration law provides that an alien prostitute may be arrested anywhere in the United States at any time after entry into the United States. And during the year 1914–15 there was commendable activity on the part of the department in connection with that. These women were brought to Ellis Island. Now, investigation through the Wassermann reaction test shows that women of that character who have reached the point where they become subject to arrest are in 60 or 70 per cent of the cases diseased, and it is common knowledge that that disease is transmissible; sometimes it results in blindness in the innocent person to whom communicated. Some years ago we enlarged Ellis Island so that persons of that character, both those brought in on warrants and those detained on suspicion as to their character, might be segregated from the decent women who were detained there, largely waiting for money to be sent by their people. I found to my horror that this commissioner of immigration had abrogated those salutary rules, and that he permitted the prostitutes, the pimps, the procurers, to mingle at will with the other inmates of Ellis Island. The department sent over there as matron of the detention room and the restaurant a Mrs. Harris, a very estimable lady, a fine woman. I do not have the honor of personal acquaintance with her, but everything I hear about her is of the best. She had the old-fashioned idea that you can not touch pitch without being defiled, and by reason of some of her recommendations, conditions there have been to some extent mitigated, and some of the scandalous occurrences that used to typify the twilight hours of the island have ceased to exist.

But to-day, at this very hour, another condition exists which if persisted in will be far more harmful, and perhaps has been far more harmful, to the city of New York than the scourge of infantile paralysis that is pervading the city. This commissioner has opened a recreation ground. In the old days the sexes were kept separate. This commissioner turns them all—men, women, and children—out into a common recreation ground, hardened prostitutes and adolescent youths. Furthermore, in the last two years, on repeated occasions, in a number

of cases he has recommended to the department at Washington that these individual prostitutes be admitted on bond, which simply means a license to proceed wherever they will to practice their vocation.

Mr. COX. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. COX. The gentleman is certainly indicting a man of the worst moral crimes I ever heard. If they are true—and I have no doubt they are, because I have confidence in the gentleman that he would not indict a man unless he had the facts—is not there some way in which you can impeach him?

Mr. BENNET. I am going to suggest it; I have it in my hand. On yesterday I offered a resolution to investigate Ellis Island.

As I was saying, he has recommended the admission of prostitutes on bond. I do not believe hat he is morally wrong in the sense that my remarks might indicate; I simply think that his governmental ideas are wrong. It is natural that a course of conduct like that would culminate in something, and I shall give you a specific instance.

There was within the last two weeks detained at Ellis Island a young Portuguese charged with having brought into this country a woman for immoral purposes. In the middle of the night the watchman in the cabin department where he was saw him leave the room and proceed to a room, the door of which was open and which was occupied by a woman detained as an alleged prostitute, not the woman with whom he was accused. The watchman commanded him to go out, but before he reached the room the door was locked. The man did not come out until some time afterwards, and then, when asked by the watchman for what purpose he had been in the room, he made a specific and direct statement. The next day the woman, in a general gathering of women, told of the visit and its purpose and showed the money she had received.

A written report was made by the night watchman to Frank McKee, the superintendent of deportation at Ellis Island.

I do not see how we could sink any lower in administration than to permit the prostitute to ply her vocation for money on a Government reservation, and, worse than that, to sow the seeds from her own undoing amongst the innocent women with whom she is allowed to mingle freely. That is the condition at Ellis Island. I introduced a resolution asking for an investigation at Ellis Island. I know there is not a quorum in town, and I believe there is no quorum of the Committee on Rules, but there is a way by which we can start the department working on this to-morrow. I told the gentleman from Alabama [Mr. BURNETT] yesterday that I was going to make this speech this afternoon. He is as much opposed to this sort of thing as any man on earth. I served on the Committee on Immigration and on the immigration commission with him, and I know his attributes. I propose to introduce this resolution of inquiry which I hold in my hand, and I suggest to the gentleman from Alabama that he send it to the department to-morrow to investigate whether the statements I make are correct or not. That resolution of inquiry asks for particulars—I will not burden the RECORD with it—as to all matters I have alluded to somewhat hastily.

Mr. Speaker, it is of very little moment to the people at large whether in offering the particular amendment which I read in your hearing I discharged my duty to the best of my capacity. I believe I did, I know I did; but it is of tremendous importance that a half-baked radical who has no proper idea of the effect of the mingling of the bad with the good, should be spoken of plainly, and, while the subject is distasteful in the extreme, I have taken the first opportunity, after the facts were brought to my notice, to bring to the House of Representatives the conditions as they exist at Ellis Island, in the sincere hope and belief that once they are made public the department will see that they are rectified. [Applause.]

Under leave to extend my remarks I annex the letter to the Attorney General, to which he has not yet replied; the correspondence between the Department of Labor and the Comptroller of the Treasury; my letter to the Department of Labor, which remains unacknowledged and unanswered; and a letter which I wrote to the New York Globe, but which I have not yet seen in its columns:

JULY 12, 1916.

DEAR SIR: The Department of Labor at my request has furnished me with a copy of your opinion that that department could maintain a restaurant at the immigration station at Ellis Island.

Your opinion does not indicate that the following facts were called to your attention:

First. That in the revision of 1903 (32 Stats., 1213) the provision of the act of 1891, on which you rely, was dropped out. The provision as to competitive letting was continued (sec. 30) and that all inconsistent acts were repealed (sec. 36).

Second. That the Department of Labor in its edition of the immigration laws and rules of February 12, 1916, reports the provision of the act of 1891, on which you rely, as repealed (p. 50).

Third. That by the act of October 22, 1913 (38 Stats., 226), the entire expense of maintenance of immigrants is put upon the transportation company.

Fourth. That section 8 of the act of 1891, which you quote, merely authorized the superintendent to feed aliens "during such inspection" and "also in his discretion, such as are delayed in proceeding to their destination," while the department proposed to feed, in addition, those who had been ordered deported, to run a public restaurant for the convenience of visitors to Ellis Island and of employees, and to conduct a counter or counters for the sale of food to immigrants in transit.

Fifth. That the provisions in the statutes of 1891, 1903, and 1907 for an "immigrant fund" have been repealed (35 Stat., 982), that the method of competitive letting dates back to January 1, 1893 (27 Stat., 571).

If these statutes and facts had been brought to your attention, would they have changed your opinion?

Very truly, yours, WILLIAM S. BENNET.

ATTORNEY GENERAL,
Washington, D. C.

—

No. 54166.

MAY 31, 1916.

SIR: I have to request your decision as to the following:

It has been suggested that this department should undertake the operation of the restaurant at Ellis Island rather than have the said restaurant conducted under an exclusive privilege. The Attorney General rendered an opinion under date of April 26, 1916, to the effect that there was no legal objection to having the restaurant operated by the Government.

In the event of that being done, however, the expenses for food supplies would be defrayed from the appropriation "Expenses of regulating immigration," and a question arises as to the disposition of the money which would be received from steamship companies and others on account of the operation of the restaurant. It may be stated here that the operation of the restaurant by the Government will involve something more than the mere furnishing of subsistence to detained aliens for which the steamship companies are liable under the immigration act. The restaurant will be compelled, of necessity, to keep for sale to aliens large quantities of food and other articles that have no direct connection with the maintenance of detained aliens for which the steamship companies are liable, and, as a matter of convenience, will furnish meals to employees at Ellis Island.

In the sundry civil act approved March 4, 1911 (34 Stat., 1442), occurs the following provision:

"That from and after July 1, 1911, all moneys paid into the Treasury to reimburse the Immigration Service for expenses of detained aliens paid from the appropriation for expenses of regulating immigration, shall be credited to the appropriation for the expenses of regulating immigration for the fiscal year in which the expenses were incurred."

Pursuant to this provision all amounts collected on account of the detention of aliens in hospitals at immigration stations have been credited in the manner indicated by the statute. The bills of the catering contractor for meals furnished detained aliens have, however, been submitted to and paid by the transportation lines or other persons responsible for such maintenance.

The question therefore arises as to whether, pursuant to the above quoted provision, amounts which might be collected by the Government in the operation of the restaurant, i. e., moneys received from steamship companies and others on account of maintenance expenses of aliens for which they are liable under the immigration act and moneys received from all other sources in connection with the operation of the restaurant, may be credited to the appropriation for the fiscal year in which such expenses were incurred. I would appreciate a decision from you resolving this question, and in view of the fact that the end of the fiscal year is close at hand and the existing contracts are about to expire at several of the immigration stations, an early decision would be highly appreciated.

Respectfully, J. B. DENSMORE,
Acting Secretary.

THE COMPTROLLER OF THE TREASURY,
Treasury Department, Washington, D. C.

—

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, June 8, 1916.

The Hon. SECRETARY OF LABOR.

SIR: I have your letter of the 31st ultimo requesting decision as to whether receipts from the operation of a restaurant at Ellis Island, in connection with the enforcement of the laws regulating immigration of aliens, may be deposited to the credit of the appropriation from which the expenses of operating the restaurant are to be borne, to wit, "Expenses of regulating immigration."

The appropriation in question provides:

"For enforcement of the laws regulating immigration of aliens into the United States, including the contract-labor laws; * * * enforcement of the provisions of the act of February 20, 1907, entitled 'An act to regulate the immigration of aliens into the United States,' and acts amendatory thereof; necessary supplies, * * * and for all other expenses authorized by said act; * * * all to be expended under the direction of the Secretary of Labor, $2,450,000." (38 Stat., 877.)

The sundry civil act of March 4, 1911 (38 Stat., 1442), provides:

"That from and after July 1, 1911, all moneys paid into the Treasury to reimburse the Immigration Service for expenses of detained aliens paid from the appropriation for expenses of regulating immigration, shall be credited to the appropriation for expenses of regulating immigration for the fiscal year in which the expenses were incurred."

This provision relates specifically to expenses of detained aliens, but I am of opinion that if the operation of this restaurant is authorized in connection with the detention of aliens, the expenses of its operation may be regarded as "expenses of detained aliens" within the meaning of said provision.

The question submitted is answered in the affirmative.

Respectfully, W. W. WARWICK, *Comptroller.*

JULY 11, 1916.

GENTLEMEN: I have yours of recent date, inclosing copies of correspondence between your department and the Department of Justice and the comptroller. I would be obliged if you would obtain for me from the commissioner at Ellis Island copies of all letters of criticism or commendation which he has sent to the food contractors at Ellis Island during the past year. I would also like to have a copy of the opinion of the solicitor inclosed in your letter of the 15th to the Attorney General.

Thanking you for your courtesy and promptness in sending me the correspondence asked for, I am,

Very truly, yours, WILLIAM S. BENNET.

DEPARTMENT OF LABOR,
Washington, D. C.

JULY 14, 1916.

EDITOR GLOBE.

DEAR SIR: My attention has been called to an editorial in your paper of the 12th instant. Upon conclusions that you draw from the passage of the amendment to the immigration statute to the sundry civil bill I have no comment to make. As to the facts, I must ask you to correct some of your statements.

First. You say, "That the joker was slipped into the bill late on a Saturday afternoon, when the attendance in the House was not large, and under a statement which misled the Members present, does not tend to carry conviction of Mr. BENNET'S sincerity." If you had consulted your Washington correspondent, he would have told you that under the rules of the House an amendment to a particular portion of a bill must be offered when that portion of the bill is reached, whether it happens to be Wednesday or Saturday. In addition the sundry civil bill, being an important bill, the attendance was not small. There were no misleading statements made. Mr. FITZGERALD reserved a point of order on the amendment. I described the amendment briefly from a parliamentary standpoint, and then Mr. FITZGERALD having acquainted himself with the contents of the amendment stated that the Committee on Appropriations would accept the amendment, and there was no discussion. There was not and is not anyone opposed to the amendment in the House. Congress has some six times passed legislation providing that these privileges shall be let at competitive bidding.

The Department of Labor attempted to get around this law, relying, as I now find, on section 8 of the act of March 3, 1891 (26 Stat., 1085). This section, so far as it relates to the feeding of immigrants, was superseded by the act of 1893 (27 Stat., p. 571). This fact the Department of Labor seems to have overlooked, although that the statute was repealed, is shown by its own pamphlet (edition of Feb. 12, 1916, p. 50).

I repeat, if Mr. Howe and the department think that the method of operating a restaurant and exchanging money at the immigration station at Ellis Island, N. Y., ought to be that of governmental operation, let them come frankly before Congress and attempt to have the law changed, and not attempt to evade the law as six times passed by Congress. There are arguments, legitimate arguments, that could be made in favor of Mr. Howe's views. I do not regard these arguments as sound or conclusive, but I recognize his right to make them. So long, however, as I remain in Congress I will not knowingly permit any executive officer to override an express statute by evasion, if I can prevent it.

Your statement in relation to Mr. Howe's legal position is answered by the simple fact that the law on which he relies was superseded by another statute 23 years ago. You seem to think that a detained immigrant pays for the meals which he consumes. In this you are in error. The meals for the detained immigrants and all their expenses are and have been since 1891, and, I think, before that date, paid by the transportation companies which bring the immigrants here, and this obligation on the transportation companies was made specific by the act of October 22, 1913. The immigrant does buy what is known as a dollar box and a fifty-cent box of food for use on his journey inland. The price of everything in these boxes is fixed for three-year terms by open competition, and it is within Mr. Howe's power to change the composition of the boxes. Furthermore, no single article of food can be sold over the counters except as permitted by Mr. Howe and at a price satisfactory to him, which can not be more than 20 per cent over the wholesale cost. In addition, the food served to the immigrant is inspected daily by men detailed by Mr. Howe and, as a matter of fact, the inspection of the food sold at Ellis Island is more rigid than that of the most expensive hotel on Manhattan Island.

Mr. Howe knows what I have stated to be the facts, and therefore I am surprised if he said anything indicating that the contractor is "gouging" the immigrant. If that is going on, then Mr. Howe ought to be removed from office, for the whole matter is under his supervision.

I was retained by the present contractor when your paper made charges against that firm three years ago. At that time you asked for the removal of the contractor. The department appointed a commission, before which you were asked to bring testimony. That you did not prove your charges is shown by the fact that the contractors were not removed and carried their contract to completion. Naturally I accepted money for appearing as counsel in an investigation which occupied something over two weeks; but that was two years before I was elected to Congress. I do not deny that that investigation gave me even a better knowledge of immigration conditions than I had and that I do know the immigration law. I prevented Mr. Howe from evading it and, in my judgment, acted in so doing in the interests of the immigrant. I might add that we had Government operation at Ellis Island prior to 1893, and that conditions became so bad that the employees refused to eat in the restaurant, and a congressional investigation was had which resulted in the change to competitive bidding—the present system.

Yours, truly, WILLIAM S. BENNET.

BALANCE DUE LOYAL CREEK INDIANS.

Mr. TILLMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 9326.

The SPEAKER. The gentleman from Arkansas asks unanimous consent for the present consideration of the bill H. R. 9326, which the Clerk will report.

The Clerk read the bill at length.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas.

Mr. COX. I object.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SMITH of South Carolina, Mr. SMITH of Georgia, Mr. SHEPPARD, Mr. WARREN, and Mr. GRONNA as the conferees on the part of the Senate.

J. H. PATTEN AND JAMES M. BAKER.

Mr. AIKEN. Mr. Speaker, I ask the indulgence of the House for a few minutes.

The SPEAKER. The gentleman from South Carolina asks to address the House for a few minutes. Is there objection?

There was no objection.

Mr. AIKEN. Mr. Speaker, some days ago the Columbia (S. C.) State, one of the leading newspapers of the South, contained a news article from its Washington correspondent, in which occurred this paragraph:

> Mr. [J. H.] Patten has just returned from the St. Louis convention, where he acted as a substitute for one of the South Carolina alternates. He believes that there is no doubt whatever of the reelection of President Wilson. Mr. Patten, who is prominently connected with the work of the national farmers' organization, is well known in South Carolina.

Knowing that this man Patten is known in South Carolina as a Republican carpetbagger and is known here around Washington as a lobbyist and a grafter, I was much surprised at this article. I asked the correspondent of the State, a most estimable gentleman, about it, and he told me that the statements therein were furnished him by Patten himself and that he had accepted them as true without investigation. I thereupon wrote to Hon. John Gary Evans, Democratic State chairman for South Carolina, and who was himself a delegate to the St. Louis convention, and have received a reply, in which he says:

> Patten took no part in the proceedings of the convention as an alternate from South Carolina, but merely was given a ticket and badge to enable him to get into the convention.

It thus appears that Patten was simply given a ticket of admission to the convention, and then upon returning to Washington undertook to get himself paraded before the people of South Carolina as having acted as a substitute for a delegate and as having taken part in the proceedings of the convention. I am told that upon his return to Washington he stated that he went to St. Louis in response to a telegram from Hon. SCOTT FERRIS, of Oklahoma, a Member of this House. I asked Mr. FERRIS about that, and he tells me that while he was in the West he received a telegram from the man, asking him to engage a room for him at a hotel in St. Louis, and that he telegraphed back that he had done so. He states emphatically that Patten did not go to St. Louis at his request or upon his invitation. Mr. FERRIS, as all of us know, is an affable and courteous gentleman, and no doubt he would have done a favor of this kind for anybody who had asked him to do so.

I am personally interested in this, for the reason that Patten has at times, when it suited his purposes to do so, claimed residence in my district, although he has spent but little time there and is known to but few people in the district, and is not held in high esteem by those who do know him. Knowing the man as I do, and knowing his reputation here and elsewhere, I will not let go unchallenged the statement that he has, even in the capacity of substitute for an alternate delegate, represented the Democracy of South Carolina in a national convention.

It is stated in the article above quoted that Patten "is prominently connected with the work of the national farmers' organizations." The truth of the matter is that he was at one time counsel for the National Farmers' Union, but after the executive committee of that organization, composed of C. S. Barrett, of Atlanta, president of the National Union, E. W. Dabbs, of Mayesville, S. C., president of the South Carolina State Union, and others, found out the kind of man that he is, they immediately removed him from that position. Messrs. Barrett and Dabbs came to me, and to other Members of the House, and assured us that Patten was no longer connected with the Farmers' Union in any capacity. They said they had been deceived in the man and begged us not to hold the Farmers' Union responsible for anything he had done or might do. In all my life I never heard any man get such an excoriation as these gentlemen gave Patten in their conversation with me. And yet, after having been bodily fired out of his position, this man wrote letters to farmers in my district, using the printed stationery of the union, and signing himself as counsel

of the union, in which he made false statements concerning me and misrepresented my work here in the grossest manner possible. This will indicate to the Members of the House who may not know him, and to others who may not know him, the kind of creature he is. In this connection I will quote two letters written by President Barrett to a prominent farmer of my district:

ATLANTA, GA., *September 14, 1914.*

Hon. T. T. WAKEFIELD,
Anderson, S. C.

BROTHER WAKEFIELD: J. H. Patten is not the attorney of the Farmers' Union. He has no connection whatever with the organization. He has been condemned by a lot of the conventions.

Yours, fraternally,

C. S. BARRETT.

ATLANTA, GA., *September 14, 1914.*

Hon. T. T. WAKEFIELD,
Anderson, S. C.

BROTHER WAKEFIELD: Referring further to your letter of September 7, I am mighty sorry that this thing occurred, and it will not occur any more. Patten was not the attorney for the Farmers' Union at the time he wrote that letter.

Yours, fraternally,

C. S. BARRETT.

One of the most beloved men who ever sat in this House was the late Judge S. A. Witherspoon, of Mississippi, who died only a few months ago, and who is affectionately remembered by us all. If there ever was an honest man in Congress it was Judge Witherspoon. And yet in the campaign just before Judge Witherspoon's death this man Patten sent letters into his district, misrepresenting him in the most outrageous manner, accusing him of unfaithfulness to his duties here and of voting and working against the interests of his constituents. Those of us who knew Judge Witherspoon know that he was slow to anger, and charitable in his judgments of others, but I well remember, and others in this Hall remember, how very much wrought up he became over these cruel slanders and the unsparing manner in which he denounced Patten and his methods.

Patten has not only lied upon and misrepresented many Democratic Members of this House, as he has lied upon and misrepresented me, but he has been in trouble with members of his own party. A few years ago the gentleman from New York [Mr. BENNET] incurred his displeasure, and Patten circulated many outrageous falsehoods in his district. Mr. BENNET, in righteous indignation, arose to a question of personal privilege on the floor of this House and denounced the man in the most vigorous terms.

Mr. BENNET is on the opposite side from me in politics—we have little if anything in common politically—but he is one of the cleanest and most respected Members of the House, as well as one of the ablest, as all of us know.

Patten was at one time connected in some sort of official capacity with the National Purity League, an organization composed of good people, working for a good cause, but when the members learned his true character they removed him from office with the same promptness with which he was thrown out of the Farmers' Union.

I have it on the best authority that during the last senatorial campaign in Pennsylvania, Patten was in that State working for PENROSE, the Republican candidate, against Palmer, the Democratic candidate, and went from one end of the State to the other denouncing the Democratic Party and the Wilson administration in the bitterest terms, and he will not deny that he would be an unwelcome visitor to at least one of the great committees of the House because of his bitter and unfounded criticisms of the administration in the presence of its chairman and several other prominent men. And yet this slimy, sneaking creature would have it appear that he has this year represented the Democrats of South Carolina in a national convention. I am proud to bear testimony that the democracy of South Carolina has not sunk so low, and I resent any such imputation.

Patten is a relative by marriage and a copartner in iniquity of another man who has engaged in a campaign of falsehood and misrepresentation against me for several years. Together and separately they have circulated all sorts of falsehoods against me in my district, by word of mouth, by personal letters, and by having articles printed in one or two venal newspapers in the district. The man to whom I now refer happens to be secretary of another legislative body which sits in this building and his name is James M. Baker. I have denounced Baker in public speeches and in the public prints as a liar, a thief, and a forger [laughter and applause], and I have told him that if the things I have said about him are not true he has an adequate remedy. I am now, and always have been and always will be, personally responsible for my remarks here or elsewhere.

It is a well-recognized principle of law and equity that when a man is unjustly attacked he may, as part of his defense, show the character of the man making the attack, and I am forced to do so in this instance.

Before coming to Washington Baker was connected with a bank in South Carolina. He was publicly charged with having wrecked the bank and robbed it of practically every dollar of its deposits, and then permitted his brother-in-law to be tried and convicted in order to shield himself. This is a matter of common knowledge in South Carolina and is borne out by the records of the court of general sessions for Abbeville County, S. C., for the year 1896.

After his grandfather, a most estimable and highly respected gentleman, died some years ago Baker went to a prominent lawyer in South Carolina and presented a note for a large sum of money, purporting to be signed by his grandfather, and asked the lawyer to collect it from the estate. The lawyer, after examining the note, pronounced it to be a forgery and refused to have anything to do with it. The executors of the estate afterwards settled the note for a fraction of its face value. By accepting such a settlement Baker practically admitted that the note was a forgery, while the action of the executors was prompted by a natural desire to keep from giving publicity to a dirty family scandal. All these things are matters of record in the courts of South Carolina.

A few years ago Baker was vice president and a member of the executive committee of the United States Savings Bank here in the city of Washington. He was caught in an attempt to wreck the bank and in pilfering from its funds, in collusion with the notorious Daniel Thew Wright, at one time a justice of the Supreme Court of the District of Columbia, and who was forced to resign while impeachment proceedings were pending. The full history of Baker's dirty transactions with the bank was brought out in public testimony before a Senate committee investigating the charges against Judge Wright, and is now a part of the printed record of the Senate. Baker was promptly removed from the vice presidency of the bank and from its executive committee, as the following excerpt from the minutes of the directors' meeting shows:

"*Resolved*, That James M. Baker be, and he is hereby, removed as first vice president of this bank and as a member of the executive committee, for the good of the bank."

Mr. Thomas E. Cooper seconded Mr. Carrick's motion for the adoption of said resolution, and upon the motion being put the resolution was adopted without a dissenting vote, Mr. Baker not voting.

Some years ago, while Baker was an employee of the United States Senate, the cotton gambling house of Sully & Co., of New York, failed. The failure was tainted with more or less scandal, and there was an investigation of it by the United States court for the southern district of New York. An examination of its books showed that the firm had been carrying an account for James M. Baker, with the understanding that the losses, if any, would be borne by the firm, and the profits, if any, should go to Baker. When asked the reason for such an unusual arrangement, a member of the firm testified under oath to the effect that Baker was useful to them, that he kept them posted as to what was liable to happen in Congress and in the departments, and that it was "good business" to have such an arrangement with him. It was just about this time that a scandal developed in the Agricultural Department or the Census Bureau—I have forgotten which—in connection with the leakage of cotton statistics before they were given to the public. All this was brought out in testimony in the investigation of the Sully failure. I will not take the time of the House to read this testimony, but will insert part of it in the RECORD so that Members and others interested may read it in full:

EXCERPTS FROM TESTIMONY ADDUCED IN THE MATTER OF THE BANKRUPTCY OF DANIEL J. SULLY & CO. AND DANIEL J. SULLY, SAMUEL F. B. MORSE, EDWIN HADLEY, AND WILLIAM R. FAGIN, INDIVIDUAL BANKRUPTS, BEFORE REFEREE M'GRANE COXE ON THE DATES MENTIONED.

OCTOBER 19, 1904.

[Sully—Direct.]

By Mr. BALDWIN:

Q. Mr. Sully, who is James M. Baker?—A. Why, I know the name but I don't know the man.

Q. A customer of D. J. Sully & Co.?—A. Why, he was a man for whom we did business.

Q. Well, he was a customer, wasn't he?—A. Yes, sir.

Q. Who was Bob?—A. I don't know.

Q. You don't know?—A. No, sir.

Q. Mr. Sully, you stand right here [indicating]. I show you at page 470 of the general ledger of D. J. Sully & Co., No. 1, what purports to be an account of James M. Baker.—A. Yes.

Mr. BALDWIN. Question withdrawn.

Q. You recognize this book here as the customers' contract ledger, don't you?—A. Yes, sir.

Q. I call your attention to page 160, which has the heading, "Bob's account."—A. Yes, sir.

Q. I ask you also to look, if you will, through it—the page at the top—and it seems to indicate that there has been an erasure there, don't it?—A. [Looking at book.] I should say so; yes.

Q. Do you know anything about how that erasure came?—A. I absolutely do not.
Q. Do you know how this account, the words "Bob's account," happen to be there?—A. I do not.
Q. I call your attention to the transactions of March 7 and 14, 1904, in July cotton.—A. Yes, sir.
Q. You see that there are a number of purchases there, don't you?—A. Yes, sir.
Q. At respective prices?—A. Yes, sir.
Q. Do you recognize the handwriting of those entries?—A. No, sir; I do not.
A. You don't know that at all?—A. No, sir.
Q. (Handing witness book.) I show you book and I would like to have you state just what that book is.—A. It is a copy of sale notices that are sent to each customer.
Q. And the book was used in your office?—A. Yes, sir.
Q From what time?—A. That I couldn't say; I don't know.
Q. Wasn't that book in your office to take the place of——A. Copying books.
Q. Of those copying books?—A. Yes.
Q. When a statement was made up was it made up in this book and they were duplicated and carbon copies made?—A. That is the carbon copy [indicating].
Q. And the original of which this is a duplicate or carbon copy was sent to the customer?—A. Yes, sir.
Q. In due course of business?—A. Yes.
Q. I show you this one which I hold in my hand and at page—March 14, 1904, an account appears to be made out to James M. Baker, doesn't it?—A. Yes, sir.
Q. You will notice there that on the 14th are 900 bales July cotton, 16.63?—A. Yes, sir.
Q. And you will notice that on the account in the contract ledger book; that is, under Bob's account, so-called, you will find an account of 900 bales bought at the same figure on the same date and for July cotton?—A. Yes, sir.
Q. You will also find on the same day there was purchased, as appears by this duplicate copy book, 200 of July cotton at 16.62.—A. Yes, sir.
Q. A like entry appears on the contract ledger book under Bob's account, for exactly the same amount?—A. Yes, sir.

By the REFEREE:

Q. Do you see that yourself?—A. Yes, sir; I see it.

By Mr. BALDWIN:

Q. On the same day there were 2,200 bales purchased?—A. Yes, sir.
Q. Of July cotton at 16.61?—A. Yes, sir.
Q. And the same entry appears, the same transaction appears, on Bob's account, does it not?—A. Yes, sir.
Q. For a like amount, at the same price, and July cotton?—A. Yes.
Q. On the same date there is another purchase of 600 bales July cotton at 16.60?—A. Yes, sir.
Q. And under Bob's account is a like entry for 600 for 16.60?—A. Yes, sir.
Q. Also 100 bales of July cotton at 16.59, which appears on Bob's account, of the same amount, at the same price, and the same month of delivery?—A. Yes, sir.
Q. (Showing witness book.) I also call your attention to what is known as the confirmation copy book, and I show you under the date of March 7, 1904, purchased 6,000 bales of cotton deliverable in July, at 16.15.—A. Yes, sir.
Q. And billed to James M. Baker?—A. Yes, sir.
Q. (Showing witness book.) On the contract ledger book I show you an entry under Bob's account on the same date, 6,000 bales of July cotton at 16.15?—A. Yes, sir.
Q. Now, Mr. Sully, that cotton which was billed to James M. Baker was Baker cotton, was it not?—A. Yes, sir.
Q. Well, then, if that is so, why do we find it entered on Bob's account, upon a page which, even by casual inspection, shows that some name has been erased out? You can even see the sweep of the lower part of the letter "J," and "Bob's A/C" written in.—A. I have absolutely no idea, and I never saw it until you called my attention to it in the presence of the committee.

By the REFEREE:

Q. And since that day have you made any investigation to ascertain what might be the cause?—A. I have not.

By Mr. BALDWIN:

Q. Now, Mr. Sully, it appears that this account——

By the REFEREE:

Q. Do you think that you could make an investigation that may disclose to you the situation, so that you might tell these creditors?—A. Yes, sir.
The REFEREE. Then I suggest that it be done, if it can be done.
Mr. HARDING. It certainly will.

By Mr. BALDWIN:

Q. This account, taking the entries as they appear under Bob's account, show that these 10,000 bales were open—they were open contracts to the extent of 10,000 bales bought?—A. Yes, sir.
Q. And then closed at the average price of either Friday's or Saturday's prices?—A. I think so.
Q. Then, that account owes the firm of Sully & Co. quite a lot of money?—A. Yes, sir.

By the REFEREE:

Q. At either average?—A. Yes, sir.

By Mr. BALDWIN:

Q. Do you know whose handwriting that Bob's account is?—A. No, sir; I do not.
Q. And you don't know when it was made there?—A. No.
Q. And you don't know anything about Baker's account?—A. I do not.
Q. Now, I show you——A. I want to restrict my last answer. You asked me about Baker's account. I simply used to know the orders that came to me.
Q. Well, did you give any orders to have any purchases of cotton for Baker entered upon the books of D. J. Sully & Co. as Bob's account?—A. No, sir; I did not.
Q. You know that this cotton was bought for Baker, don't you?—A. Yes, sir.
Q. And ought to have been entered upon the books against the account of Baker—James M. Baker?—A. Yes.
Q. And as far as you know there is no reason for the change?—A. No, sir.

By the REFEREE:

Q. Did I understand you to say that you don't know who James M. Baker is?—A. I know the name, but I don't know the man.
Q. You receive orders in the name of James M. Baker?—A. Yes, sir.
Q. But you did not inquire as to who it was?—A. Why, I knew, incidentally, who it was.
Q. Who was it?—A. I knew James M. Baker; I knew the man's name.
Q. Do you know where he lived?—A. Washington, D. C.; and this is right on the books.
Q. But you did not know what his business was or what his financial responsibility was?—A. No, sir.
Q. You did not know anything about him except that his name was James M. Baker and that he lived at Washington, D. C.?—A. Washington, D. C.

By Mr. BALDWIN:

Q. Do you know how he happened to become a customer of D. J. Sully & Co.?—A. I believe he is a friend of Mr. Morse.
Q. (Handing witness book.) Do you recognize this index that I show you? I mean to say, do you recognize the book?—A. Yes, sir.
Q. It is an index to the contract ledger book, isn't it?—A. I should judge so; I don't know, Mr. Baldwin.
Q. You will notice that under "B" there appears to be Bob's account, 160?—A. Yes, sir.
Q. Do you see?—A. Yes, sir.
Q. It looks as if it had been erased, doesn't it?—A. Yes.
Q. And what was put there after—the capital letter "B" was erased and B-o-b A/c added?—A. Yes, sir.
Q. In place there? You don't know anything about that?—A. No, sir; I do not.

By the REFEREE:

Q. You see, Mr. Sully, do you not, that apparently the name which was erased was very much longer than "Bob's A/c"?—A. Yes.
Q. You see it seems to have been quite as long as the brown line——A. Yes, sir.
Mr. BALDWIN. I offer that in evidence. Marked by consent "Trustee's Ex. 1, Oct. 19/04. G. H. H."

By Mr. BALDWIN:

Q. You say that the first time you ever knew or heard of this was when I called your attention to it at some meeting of the creditor's?—A. Yes.
Q. A committee of creditors?—A. Yes; some time ago; that was the first time I heard of it.
Q. I think you stated to the referee a moment ago that you had not made any further inquiry about it?—A. I don't think I have, Mr. Baldwin.
Q. When your attention was called to it didn't it impress you as a rather personal transaction?—A. It did.
Q. And that being an account there that, with the contracts open, indicated a debtor balance over $100,000, didn't suggest to you the necessity of inquiring who Baker was?—A. I knew who Baker was, Mr. Baldwin, I thought that as long as it had nothing to do with any instructions I gave that until it was absolutely required of me to find out the best thing for me was not to inquire.
Q. That is to say, that account stands in the name of an individual, or a fictitious individual, as the case may be, for a large sum of money, in which your creditors would have a very strong interest, and you didn't think that under the circumstances it called upon you to inquire any further?—A. Not that way, Mr. Baldwin. Whenever my creditors as a creditors' committee—when I was before them, at all times—asked questions I gave them all the information, absolutely, that it was in my power to give them, and am still willing to do so; but I did think that under the circumstances that as long as it was in the condition is was in that the best thing for me to do was not to make any more inquiries than were necessary.
The REFEREE. Perhaps, lest there should be a misunderstanding, it may be proper for me to state, Mr. Sully, that the law is that you should do everything reasonable and proper in your power to recover and to aid in the recovery of any assets of Daniel J. Sully & Co. or of yourself individually for the benefit of these creditors.
Mr. SULLY. I realize that, Mr. Referee, and I have been trying so hard to get a settlement of some kind for the best interests of the creditors that perhaps my mind was taken on that too much rather than to find out other things that were going on.

OCTOBER 19, 1904.

[Morse—Direct.]

By Mr. BALDWIN:

Q. Mr. Morse, have you heard the testimony of Mr. Sully to-day?—A. Yes, sir.
Q. Now, what do you know about James M. Baker?—A. I know Mr. Baker personally very well, indeed.
Q. He resides in Washington?—A. Yes, sir.
Q. What is his business?—A. He is assistant librarian, I believe, of the United States Senate.
Q. Was it through you that he became a customer of D. J. Sully & Co.?—A. Yes, sir.
Q. What do you know about the change in the entries, upon these various books of Daniel J. Sully & Co., of the accounts standing in his name?—A. On that particular account, when Mr. Sully's suspension occurred, Mr. Hadley, who had charge of the cottons—I explained to Mr. Hadley that there was a loss on it—a house loss—and while I did not know of the change at that time or what account it was in, I presume Mr. Hadley could explain. I can only infer——

By the REFEREE:

Q. One moment. Mr. Hadley is not here. If you are going to give any inference what he was going to do——A. I simply told Mr. Hadley that the loss was a house loss.

By Mr. BALDWIN:

Q. If he was a customer of D. J. Sully & Co., how would the loss be a house loss?—A. Mr. Baker desired to purchase some cotton. He was a friend of mine, and I rather encouraged him in it, and feeling, too, that he might prove useful in Washington to us in a good many different ways. When he made this suggestion he agreed to put up the first margin. If you will go back to the first transaction, you will find the first purchase was in the neighborhood of 3,000 or 4,000 bales. He was to put up the first margin and the house was to be responsible for any loss thereon. That first margin was placed in accordance with that, and, I believe, a profit originated out of the first transaction; and later on he came back into the market, as I believe, applying part of his profits from the first transaction in the purchase of 6,000 bales of cotton, and later on 4,000 bales of cotton. I was handling the transaction as commissary. I ordered the cotton sold. I have forgotten just what period it was. However, there was a profit in it, and the sale was not made. A few days after that the house of Daniel J. Sully & Co. suspended.

Q. Then, this 6,000 and 4,000 bales of cotton are the transactions that took place on the 7th and 14th of March?—A. I really don't know, Mr. Baldwin. I couldn't explain how the cotton was purchased. I merely know that the order was 6,000 and 4,000 bales or 4,000 and 6,000 bales; the total, I recall, was 10,000 bales.

Q. That is right. And they stood open then? —A. Yes, sir; they were open the day of the suspension.

The REFEREE. Lest you may have misunderstood me, it is proper for you to state whatever you know Mr. Hadley did, but you need not state what you infer or might infer what he did. If you know that he did anything, you can state that.

Q. Now, you say that this cotton purchased on the 7th and 14th could have been sold at a profit?—A. Yes, sir.

Q. Now, at what date between the 7th and 14th could it have been sold?—A. I don't recall the situation. It was in the neighborhood of 16 cents, and something like 4,000 or 5,000 bales—16.60 or 16.62. I thought at one time it would yield a profit. That is my recollection, Mr. Baldwin.

Q. Well, wasn't that all before the 14th of March? Has there been any time since the 14th of March and up to or including the failure of Sully & Co. in which a profit could have been realized on the 4,000 bales?—A. Not on the four.

Q. So that when you said a moment ago 4,000 or 5,000 you mean the 6,000 and not the 4,000?—A. Yes, sir. I thought if the transaction would have been closed out it would have yielded a profit, and I ordered the cotton sold.

Q. To whom did you give the order?—A. To Mr. Brophy.

Q. You said nothing to Sully about it?—A. Mr. Brophy said something about it, I believe.

Q. Well, in your presence?—A. No; on the floor; wherever he was; Mr. Brophy came back to me——

Q. I don't care about that. Did Mr. Sully state to you that he received any instructions from Brophy about it?—A. Not that I recall.

Q. What did Brophy say to you about examining the order of sale?—A. Mr. Brophy said that he had presented it to Mr. Sully and Mr. Sully had instructed him not to sell it; that he would take care of it.

Q. Now, when was it that you had this conversation with Hadley?—A. I think it was possibly a day or so within the suspension—when the house was in difficulties.

Q. Had you looked at the contract ledger book up to that time?—A. No, sir.

Q. Did you know that there had been any change in the entry of James M. Baker's account?—A. No, sir.

Q. When did you first learn of it?—A. I think at a meeting of the creditors Mr. Hadley told me that that account was in the name of Bobs, or Roberts.

By the REFEREE.

Q. And that the accounts now in the name of Bobs were the accounts of James M. Baker?—A. Yes.

By Mr. BALDWIN:

Q. Did you give any instructions to any person to change the entry on that contract ledger book from Baker to Bobs?—A. No, sir; nothing except that Mr. Hadley said that account was a house account.

Q. You mean to say by house account——A. If there was a loss the house would assume it.

Q. Had you had a talk with Sully about such a contract between him and Baker?—A. Yes, sir.

Q. When was that?—A. Some time before the failure.

Q. You told him that whatever losses there were upon that account should be the loss of the house?—A. Yes, sir.

Q. Why should the house assume the loss of any customer?—A. Because I thought Baker would prove useful to us.

Q. How?—A. Mr. Sully, for instance, at that time had under consideration the matter of introduction of, or of fostering an introduction in, legislative lines in regard to the inspection of seeds, cotton seeds, and matters of that description. I had known Mr. Baker to be thoroughly familiar with those things——

By the REFEREE:

Q. You mean to say that he knew about seeds and cotton seeds?—A. No; about legislation; the methods of securing legislation.

By Mr. BALDWIN:

Q. In other words, you expected to use him for the lobby?—A. Yes, sir.

Q. What is his position?—A. Assistant librarian.

Q. Had you made any agreement with Mr. Baker that he should so act for D. J. Sully & Co. in matters of this kind, provided he should be exempted from any loss?—A. No; I knew we could command him.

Q. That is to say, if you made any request of him, he would do that request?—A. Any reasonable request; anything that was fair and reasonable.

Q. But you never suggested to him in any way that if there should be any loss that D. J. Sully & Co. should stand it and he should not?—A. Well——

Q. I ask you now did you make any such suggestion to him?—A. Yes, sir.

Q. You stated that to him, did you?—A. Yes.

Q. Then why did you take his margin?—A. Because he was willing to put up the margin, and I didn't expect the market to go below that.

Q. Then he had his margin there and profits on the first deal?—A. Yes, sir.

Q. Then the profits and margin on the first deal were credited to him on the books of D. J. Sully & Co. for the purpose of making the second deal?—A. Part of them, I believe.

Q. Then what did you take with it?—A. He was caught in February's slump; at least, I didn't expect it, and he lost quite a large proportion of his profits in that decline.

Q. Why didn't D. J. Sully & Co. assume that loss if they expected to use him for the consideration of that assumption?—A. For the reason that I explained.

Q. I don't think you explained it at all. It was proposed to have D. J. Sully & Co. assume any losses that were made by James M. Baker after the first transaction. The reason for that firm assuming his loss was that you would use him in some way in Washington. Then why was it that this loss, which occurred in February's slump, was not assumed by Daniel J. Sully & Co.?—A. Because he had a profit on the book at that time.

Q. You appreciate, don't you, Mr. Morse, that as far as the creditors of D. J. Sully & Co. are concerned, they are not bound by any agreement which you made with Baker that you would exempt him from loss, provided he was a customer of D. J. Sully & Co.? You appreciate that?

Mr. KING. That is a question of law. You don't expect the witness to decide that?

The REFEREE. I think that is argumentative and open to objection.

Mr. BALDWIN. Your honor rules that I can't ask that question?

The REFEREE. Yes.

Mr. BALDWIN. Give me an exception.

The REFEREE. The creditors and the trustee have very great latitude in inquiring as to facts, but this, it seems to me, is an inquiry not as to the fact but a question as to the opinion of this witness.

Q. Mr. Morse, was it for any purpose of concealing from the creditors of D. J. Sully & Co. the liability, if such obtains in this account, that any change was made on this account?—A. No, sir.

Q. The account appears to be open to the extent or was open to the extent of 10,000 bales on the day of the failure. That you knew, I suppose?—A. Yes, sir.

Q. So that the account of James M. Baker is a debtor account on Friday's or Saturday's average to quite a large amount?—A. Yes, sir.

Q. Did you report to Mr. Baker that the firm of D. J. Sully & Co. had or would assume any loss on those latter purchases?—A. Prior to that time under the original——

Q. I mean at or subsequent to March 7?—A. No; I think not.

Q. The bills were sent to him, were they not, right along?—A. Presumably so; I do not know anything about that, Mr. Baldwin.

Q. Did you have anything to do with sending out the statements to customers?—A. No, sir.

Q. Did you give any instructions about them?—A. No, sir.

Q. Did you make any inquiry at all about whether they had been sent out or not?—A. No, sir.

Q. Well, up to the time of the failure did you know what the status of the Baker account was?—A. No; I did not until afterwards. I really do not know what it is to-day, excepting that there is a loss according to the book account.

Q. A very slight fluctuation in the market, say even a point or two points, upon 10,000 bales would mean quite a little loss?—A. I should say so.

Q. And this arrangement that you claim you had with Mr. Baker and the very nature of the transaction, we will say the exception, may entail considerable loss on D. J. Scully & Co.?—A. I should think so, although I did not anticipate it.

Q. You knew when you purchased 10,000 bales of cotton for his account there was quite a large liability?—A. There was a possible liability in purchasing it.

NOVEMBER 2, 1904.

[Hadley—direct.]

By Mr. BALDWIN:

Q. Are you familiar with the account that stands under the name in the contract ledger book, the account called "Bob" account?—A. I know of the account; yes, sir.

Q. If you will look at page 160, at the top of the page, you will see that there has been an erasure.—A. I know there has been an erasure.

Q. You know that?—A. Yes, sir.

Q. I would like to have you explain how "Bob" was substituted for the name, evidently, of James M. Baker.—A. Yes.

Q. And it was substituted for Baker, was it not?—A. Yes, sir.

Q. State how that occurred.—A. That was done at my orders, in this way, Mr. Baldwin: There was, as I knew, a customer of Mr. Morse's in Washington, whose name I did not know, and I knew that he was operating for him at 20 points margin. After the failure Mr. Morse—and we all supposing it was a matter of only a short time, the matter under consideration—told me that anything coming in should not go in Baker's name, and asked me if I wouldn't do what I could without having Baker's name mentioned, which I did by ordering the account changed in that manner. At that time, as I say, it was only for a short time that I thought the name would be hidden, and later on your auditor asked me in reference to it. I told him that account of Bob and Baker were one and the same.

Q. Now, when was it that Mr. Morse asked you to make that change?—A. Either Friday night or Saturday morning. The night of the suspension or the day after.

Q. Was it after or before the assignment had been made to Hoadley?—A. Before.

Q. Before the assignment had been made?—A. Yes, sir.

Q. But after the firm of D. J. Sully & Co. had announced their suspension to the cotton exchange?—A. Yes, sir.

Q. Now up to that time you did not know anything about the account of Baker, excepting that it was on the books?—A. That is all.

Q. And did you know who Baker was?—A. I did not.

Q. Had you had any talk with Mr. Morse about it?—A. I did not.

Q. Did Mr. Morse ever inform you at any time that he did not want that account of Baker's to be margined; that is, he did not want Baker to be called upon for margins other than his first one?—A. I understood that was the arrangement with him. I only understood that he was simply a friend of his in Washington.

Q. He did not disclose his name?—A. No; he simply spoke of him as his Washington friend.

Q. He did not disclose his name before the failure?—A. Not before the failure.

Q. I am speaking of the time he made the request.—A. At the time he made the request he said he would like Mr. Baker's name not to become public.

Q. At any time after the account of James M. Baker was opened upon the books of D. J. Sully & Co. did Mr. Morse ever say to you that he did not want the Baker account to be called upon for margins except the first margin?—A. No, sir; he never said anything to me about that. It was in his own hands.

Q. Did he ever tell you that he desired the Bob account to be a house account?—A. He told me it is his Washington friend's account—after the margins were wiped out.

Q. How long?—A. It may have been a week; it may have been three or four weeks.

Q. Who was the party you told, or the employee, to erase the "James M. Baker"?—A. I should say I think it was a boy we called George Wendle.

Q. When Mr. Morse told you about this—that is, making this change—it was before the assignment to Hoadley?—A. Yes, sir.

Q. It must have been, then, sometime on Saturday?—A. Yes.

Q. In the morning or in the afternoon?—A. Early Saturday morning.

Q. You knew at that time, didn't you, Mr. Hadley, that it was being contemplated that an assignment should be made?—A. Only in a general way, by general talk.

Q. Between the partners?—A. Yes; between the partners, in a general way.

Q. And notwithstanding that, you, knowing that that was contemplated, you still made that change?—A. I did. I did not know, though, that the contemplation of that step was an act to put us in bankruptcy.

Q. You mean you did not know the object of the making of the assignment?—A. That is it.

Q. Now, it seems that this account was carried into the ledger.—A. I don't think I ever seen it in the ledger. I think that it was done by my orders; I presume it was done in them all.

Q. Do you know when that entry was made [indicating]?—A. No, sir; I do not.

Q. You didn't follow that up?—A. I did not follow the details through. I gave the order and presume that it was carried out.

NOVEMBER 3, 1904.

[Hadley—Continued.]

By Mr. HARDING:

Q. In the minutes of yesterday—this is in the nature of a correction of the minutes—on page 565 [reading]: "After the failure, Mr. Morse—and we all supposing it was a matter of only a short time, the matter under consideration—told me that anything coming in should not go in Baker's name." Did you say that?—A. No, sir; I said, "Anyone coming in should not see Baker's name."

Q. That is what Mr. Morse told you?—A. Yes, sir.

Q And was that the first time that Mr. Morse mentioned Baker's name to you?—A. He did not mention the name; he said his Washington friend.

Q. When did he tell you that; after Baker's margin was exhausted, or that Washington friend's margin was exhausted, it should be a house account?—A. A few days before March 18.

Q. Some days before?—A. Yes, sir.

Q. And you did not know up to March 18 who Baker was?—A. No, sir.

Q. And you did not know there was such an account on the books, except as his Washington friend's?—A. That is all.

Q. And what was your idea for changing the name Baker, or having changed the name Baker to Bobs?—A. I suppose it was simply to keep that name from any party who might momentarily come in there. As I say, I did not expect this thing to last only a few days.

Q. You had no idea of concealing Mr. Baker?—A. No.

Q. (Reading.) "And later on your auditor asked me in reference to it." Whom did you mean?—A. Mr. Cuthbert.

Q Who was the accountant of Mr. Miller?—A. Yes, sir.

Q. And you told him that Baker and Bobs were one and the same?—A. I did, yes.

By Mr. BALDWIN:

Q. How did you happen to choose the name Bobs?—A. A mere happening of the mind at the moment.

Q. A coincidence?—A. A coincidence; yes, sir.

By Mr. KING:

Q. Did Mr. Morse give you any instructions to make the erasures in the books?—A. In intent, but not in so many words.

Q. Did he say anything about erasing anything in the books and putting in Bobs?—A. Not in so many words.

Q. What did he say?—A. The general impression——

Q. No. What did he say to you?—A. Mr. Morse's remarks to me were that he wished to have Mr. Baker's name kept from the public, and wished me to do all I could to see that that was so done.

Q. Did he mention the fact that you were to make any erasures? Do you recall those words?—A. I don't think those words transpired.

Q. In the division of the labor of the firm of D. J. Sully & Co. what department fell to your lot?—A. Oversight and the matter of details.

Q. In the bookkeeping department?—A. Yes, sir.

Q. And what to Mr. Morse?—A. Looking out for the literary departments.

Q. Now, did he have anything to do with those books directly?—A. To what extent, Mr. King?

Q. In any way did he examine the books in keeping track of things?—A. No.

Q. He looked in the books?—A. He did; yes, sir.

Q. When, do you know?—A. Why, at numerous times I have seen him look at the books.

Q. Do you know of his looking at the books after you made the erasure?—A. I do not.

Q. Did you tell him that you had erased the name of Baker and substituted the name of Bobs?—A. I don't know that I said those words; no, sir.

By the REFEREE:

Q. Did you say anything to the same effect?—A. I think I told him that I changed it so Baker's name was no longer in evidence; words to that effect.

Q. Do you mean to say you told him words to the effect that you had erased Baker and put in some other name?—A. Words to that effect; yes, sir.

Q. Did I understand you to say that Mr. Morse's instructions to you were to change matters on the books and that Baker's name should not appear to the public?—A. To any party that might momentarily come in there.

Q. You said "the public." You did not mean that? The public did not have access to the books of D. J. Sully & Co.?—A. No, sir.

Q. You mean customers?—A. Yes, sir.

By Mr. BALDWIN:

Q. Or a possible assignee?—A. No; we did not consider a possible assignee at the time.

By the REFEREE:

Q. You did not mean the public in the ordinary sense when you mentioned the public?—A. No, sir.

By Mr. BALDWIN:

Q. Did Mr. Morse in any way suggest to you in what manner and by what means Mr. Baker's name was to be kept from any person who might momentarily have access to the books?—A. No, sir. His remarks led me to the conclusion that that was the way to keep it.

Mr. BALDWIN. That is the extent of the examination of Mr. Hadley.

The REFEREE. Do you want to examine anyone else?

Mr. BALDWIN. No

Mr. Speaker, I wish to read in the hearing of the House just a few excerpts from the testimony, the insertion of which in the RECORD has been granted. I do this to acquaint Members with the type of man with whom, on account of his official position, they at times must be brought in contact.

A Mr. Morse, of the firm of Sully & Co., cotton brokers, was under examination. Mr. Baldwin asked him:

Q. If he [Baker] was a customer of D. J. Sully & Co., how would the loss be a house loss?—A. Mr. Baker desired to purchase some cotton; he was a friend of mine and rather encouraged him in it, and feeling, too, that he might prove useful in Washington to us in a good many ways.

Note the language—

He might prove useful in Washington to us in a good many ways.

Baker was an assistant librarian of the Senate. He looked up documents, books, and so forth, for the Senators. He had to keep in close touch with the introduction of bills and reports to committees and the progress of legislation. Necessarily he became the confidant of many Senators and was in position to know in advance what was likely to happen. Therefore it was that Mr. Morse, of the firm of D. J. Sully & Co., had a feeling that "he might prove useful in Washington to us in many ways."

Again I desire to direct your attention to the testimony. Mr. Morse is still under examination:

By Mr. BALDWIN:

Q. Did you give any instructions to any person to change the entry on that contract ledger book from Baker to Bobs?—A. No, sir; nothing except that Mr. Hadley said that account was a house account.

Q. You mean to say by house account——A. If there was a loss the house would assume it.

Q. Had you had a talk with Sully about such a contract between him and Baker?—A. Yes, sir.

Q. When was that?—A. Some time before the failure.

Q. You told him that whatever losses there were upon that account should be the loss of the house?—A. Yes, sir.

Q. Why should the house assume the loss of any customer?—A. Because I thought Baker would prove useful to us.

Q. How?—A. Mr. Sully, for instance, at that time had under consideration the matter of introduction of or of fostering an introduction in legislative lines in regard to the inspection of seeds, cotton seeds, and matters of that description. I had known Mr. Baker to be thoroughly familiar with those things——

Q. You mean to say that he knew about seeds and cotton seeds?—A. No; about legislation—the methods of securing legislation.

By Mr. BALDWIN:

Q. In other words, you expected to use him for the lobby?—A. Yes, sir.

Q. What is his position?—A. Assistant librarian.

Q. Had you made any agreement with Mr. Baker that he should so act for D. J. Sully & Co. in matters of this kind, provided he should be exempted from any loss?—A. No; I knew we could command him.

Q. That is to say, if you made any request of him he would do that request?—A. Any reasonable request; anything that was fair and reasonable.

Q. But you never suggested to him in any way that if there should be any loss that D. J. Sully & Co. should stand it and he should not?—A. Well——

Q. I ask you now, did you make any such suggestion to him?—A. Yes, sir.

Q. You stated that to him, did you?—A. Yes.

I want you to note this question and answer:

Q. In other words, you expected to use him for the lobby?—A. Yes, sir.

Here it is as plain as the English language can make it that this Mr. Baker, upon the confession of part of the lobby, was the mere tool of the lobby.

Again, note the statement of Mr. Morse:

I knew we could command him.

In other words, Mr. Morse, under oath, states that the firm of D. J. Sully & Co., through him, owned the soul and body of James M. Baker. This is the kind of man who is attempting to assassinate my character and standing with the people amongst whom I was born and with whom I have lived all my life.

Another line of this testimony that I have put into the RECORD touching the conduct of James M. Baker, at the time holding a confidential Government position, the keeper, in some respects, of the sacred archives of the Senate of the United States, the confidential and trusted friend of many Senators, is an unqualified exposure of the corrupt conduct of this individual. The mere reading of it brings a blush of shame and humiliation to the cheeks of honest and incorruptible men, and my only reason for bringing this dirty record to the attention of the House is that honorable men here and elsewhere may be advised of the real character of this man, who is permitted to walk the earth in the robes of respectability.

Thus, it is proven that this man, while holding a responsible and confidential Government position, was willing to sell any information that he might get hold of, and that the gambling cotton firm, operating against the interests of both the cotton producers and the cotton consumers, had bought him for an agreed price.

This man Baker and his tool and side partner, Patten, have been lying on me and misrepresenting me in every way possible for the past several years. I have not the time to take up all their false statements, but will mention just one. They have industriously circulated the report that I was denied the chairmanship of a committee of the House, while the truth is that I voluntarily relinquished a chairmanship in favor of another Member, as is shown by the following letter signed by all the Democratic members of the Ways and Means Committee of the Sixty-second Congress, which had the naming of all the other committees in that Congress:

HOUSE OF REPRESENTATIVES,
Washington, April 24, 1913.

Hon. WYATT AIKEN,
House of Representatives.

DEAR SIR: In response to your inquiry, we, the members of the Committee on Ways and Means of the Sixty-second Congress, take pleasure in stating that in the selection of the committee chairmen at the beginning of the Sixty-second Congress you would have been chosen as the chairman of the Committee of the District of Columbia if we had not received your declination. There can be no question about this, as you were the ranking member of that committee and no other name was considered until your declination had been received.

Yours, very truly,

O. W. UNDERWOOD.	ANDREW J. PETERS.
HENRY T. RAINEY.	FRANCIS BURTON HARRISON.
CORDELL HULL.	W. S. HAMMOND.
A. MITCHELL PALMER.	D. W. SHACKLEFORD.
CLAUDE KITCHEN.	OLLIE M. JAMES.
LINCOLN DIXON.	WM. HUGHES.

For some time past Baker seems to have had free access to all the papers in the Post Office Department relating to matters in my district, and he has repeatedly circulated false statements as to my actions in post-office contests, rural-mail routes, and so forth. On more than one occasion I have gone to the department to look over the records in certain cases and have found that some of the papers in a case, part of the official record, were missing, and I have been seriously handicapped in the discharge of my official duties to my constituents. Now, one of two things is true: Baker or his agents have been stealing those papers, or the department has been granting him privileges not granted to a Member of Congress, and which should not be granted to anybody, that of taking important papers, parts of official records in important cases, from the department. And let me say, frankly, that I do not believe the department has been granting him any such privilege.

My record as a Member of Congress is open to the public, and I am more than willing to be judged by it; but I have a right to demand that the record be stated correctly. I am tired of being misrepresented and lied on, especially by men who, if they had their deserts, would to-day be wearing convict garb. It has been very distasteful to make this statement, but I have been forced to do so in justice to myself, and I believe that in making it I have rendered a service to the other Members of the House and to the Members of the other legislative body in this building, in exposing the character of these men who have been waging such a campaign of falsehood and calumny against me. If they will lie about me, they will lie about others who may incur their ill will. A crook always hates an honest man who knows him to be a crook, and this is the real and sole reason for the fight these crooks have been making on me. [Applause.]

EXTENSION OF REMARKS.

Mr. BORLAND. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the live-stock industry.

The SPEAKER. Is there objection?

There was no objection.

Mr. BENNET. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech delivered by my colleague, Mr. SIEGEL, on Flag Day in New York City.

The SPEAKER. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 16 minutes p. m.), in accordance with the order heretofore made, the House adjourned until Friday, July 21, 1916, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. SINNOTT, from the Committee on the Public Lands, to which was referred the bill (H. R. 16532) authorizing an adjustment of the boundaries of the Whitman National Forest, in the State of Oregon, and for other purposes, reported the same with amendment, accompanied by a report (No. 984), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (S. 2500) authorizing an adjustment of the rights of settlers on a part of the Navajo Indian Reservation in the State of Arizona, reported the same with amendment, accompanied by a report (No. 985), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. CLARK of Florida, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 6904) authorizing the donation of the United States jail at Guthrie, Okla., to Logan County, reported the same with amendment, accompanied by a report (No. 986), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 16630) authorizing and directing the Secretary of the Treasury to extend the time of payment of the amount due the Government by the city of Augusta, Ga., reported the same without amendment, accompanied by a report (No. 987), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 16700) to amend an act relating to the Public Utilities Commission of the District of Columbia, approved March 4, 1913, reported the same without amendment, accompanied by a report (No. 988), which said bill and report were referred to the House Calendar.

Mr. DEWALT, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 16764) to authorize the commissioners of Northumberland and Union Counties, in Pennsylvania, their successors in office, to construct a bridge across the West Branch of the Susquehanna River from the borough of Watsontown, Northumberland County, Pa., to White Deer Township, Union County, Pa., reported the same without amendment, accompanied by a report (No. 989), which said bill and report were referred to the House Calendar.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 16875) granting the consent of Congress to Crisp County, Ga., to construct a bridge across Flint River, Ga., between Crisp and Sumter Counties, reported the same without amendment, accompanied by a report (No. 990), which said bill and report were referred to the House Calendar.

Mr. REAVIS, from the Committee on Coinage, Weights, and Measures, reported the bill (H. R. 17058) to fix standards for Climax baskets for grapes and other fruits and vegetables, and to fix standards for baskets and other containers for small fruits, berries, and vegetables, and for other purposes (H. Rept. 991), which said bill and report were referred to the House Calendar.

Mr. STEPHENS of Texas, from the Committee on Indian Affairs, to which was referred the bill (H. R. 14731) to amend an act entitled "An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1914," approved June 30, 1913, reported the same with amendment, accompanied by a report (No. 993), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. VENABLE, from the Committee on Indian Affairs, to which was referred the bill (H. R. 11161) providing for the taxation of the lands of the Winnebago Indians and the Omaha Indians in the State of Nebraska, reported the same with amendment, accompanied by a report (No. 994), which said bill and report were referred to the Committee of the Whole House of the state of the Union.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 13165) authorizing the Flandreau Band of Sioux Indians to submit claims to the Court of Claims, reported the same without amendment, accompanied by a report (No. 995), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DILL, from the Committee on Indian Affairs, to which was referred the bill (H. R. 15575) to amend the act of March 22, 1906, entitled "An act to authorize the sale and disposition of surplus or unallotted lands of the diminished Colville Indian Reservation, in the State of Washington, and for other purposes," reported the same with amendment, accompanied by a report (No. 996), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 11288) for the relief of S. S. Yoder, reported the same with amendment, accompanied by a report (No. 992), which said bill and report were referred to the Private Calendar.

Mr. CARTER of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (H. R. 10007) for the relief of William H. Woods, reported the same without amendment, accompanied by a report (No. 997), which said bill and report were referred to the the Private Calendar.

Mr. SHALLENBERGER, from the Committee on Military Affairs, to which was referred the bill (S. 1781) for the relief of Nathaniel Monroe, reported the same without amendment, accompanied by a report (No. 998), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15718) for the relief of Thomas Baker, reported the same without amendment, accompanied by a report (No. 999), which said bill and report were referred to the Private Calendar.

Mr. CARTER of Oklahoma, from the Committee on Indian Affairs, to which was referred the bill (H. R. 14679) for the relief of Jacob B. Moore, reported the same with amendment, accompanied by a report (No. 1000), which said bill and report were referred to the Private Calendar.

Mr. SMITH of Idaho, from the Committee on the Public Lands, to which was referred the bill (H. R. 15725) to confirm the entry of John Dowd, reported the same with amendment, accompanied by a report (No. 1001), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. FITZGERALD [from the Committee on Appropriations]: A bill (H. R. 17053) making additional appropriations for the Public Health Service for the fiscal year 1917; to the Committee of the Whole House on the state of the Union.

By Mr. LEWIS: A bill (H. R. 17054) to provide for the enlargement of the public building at Cumberland, Md.; to the Committee on Appropriations.

By Mr. SINNOTT: A bill (H. R. 17055) providing when patents shall issue to the purchaser or heirs on certain lands in the State of Oregon; to the Committee on the Public Lands.

By Mr. KAHN: A bill (H. R. 17056) to establish an aerial coast-patrol system and for the education and training as aviators of the aviation section of the Naval Militia of the several States; to the Committee on Naval Affairs.

By Mr. BRUMBAUGH: A bill (H. R. 17057) to amend paragraph 1 of section 406 of the Postal Laws and Regulations; to the Committee on the Post Office and Post Roads.

By Mr. REAVIS [from the Committee on Coinage, Weights, and Measures]: A bill (H. R. 17058) to fix standards for Climax baskets for grapes and other fruits and vegetables, and to fix standards for baskets and other containers for small fruits, berries, and vegetables, and for other purposes; to the House Calendar.

By Mr. MANN: Resolution (H. Res. 310) for the appointment of a select committee to inquire into the increased price of print paper, and for other purposes; to the Committee on Rules.

By Mr. JAMES: Resolution (H. Res. 311) directing the Secretary of State to negotiate a treaty with the Austria-Hungary Government defining the status of former Austria-Hungary subjects who have become American citizens; to the Committee on Foreign Affairs.

By Mr. JAMES: Resolution (H. Res. 312) directing the Secretary of State to negotiate a treaty with the Imperial Government of Germany defining the status of former German subjects who have become American citizens; to the Committee on Foreign Affairs.

By Mr. DAVIS of Minnesota: Joint resolution (H. J. Res. 269) directing the Secretary of the Treasury to acquire by purchase the estate known as Monticello, in the State of Virginia, including the former home of Thomas Jefferson and lands surrounding the same, being about 700 acres, said property being located in Albemarle County, Va.; to the Committee on Public Buildings and Grounds.

By Mr. KITCHIN: Joint resolution (H. J. Res. 270) to empower the Treasury Department to import free of duty dry coloring matter for the use of the Bureau of Engraving and Printing; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. CARTER of Massachusetts: A bill (H. R. 17059) for the relief of Austin Foster Hitchcock; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 17060) granting an increase of pension to Edward Byrd; to the Committee on Invalid Pensions.

By Mr. DRISCOLL: A bill (H. R. 17061) granting a pension to John Tade; to the Committee on Pensions.

By Mr. DUPRÉ: A bill (H. R. 17062) granting an increase of pension to Amanda Foster; to the Committee on Pensions.

By Mr. KIESS of Pennsylvania: A bill (H. R. 17063) granting a pension to John Yoder; to the Committee on Invalid Pensions.

By Mr. LLOYD: A bill (H. R. 17064) granting an increase of pension to Minnie E. Pinkerton; to the Committee on Invalid Pensions.

By Mr. McGILLICUDDY: A bill (H. R. 17065) to remove the charge of desertion from the military record of Franklin S. Trufant, alias Frank Trufant; to the Committee on Military Affairs.

By Mr. MOORES of Indiana: A bill (H. R. 17066) granting a pension to Maggie B. Wagner; to the Committee on Invalid Pensions.

By Mr. POWERS: A bill (H. R. 17067) granting an increase of pension to Dudley R. Sloan; to the Committee on Pensions.

By Mr. RUSSELL of Missouri: A bill (H. R. 17068) granting an increase of pension to William T. Dixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17069) granting an increase of pension to Robert Carter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 17070) granting an increase of pension to John W. Abbott; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 17071) granting a pension to William Estes; to the Committee on Pensions.

By Mr. SHERWOOD: A bill (H. R. 17072) granting an increase of pension to Al. A. Reineck; to the Committee on Pensions.

By Mr. SLOAN: A bill (H. R. 17073) to award Otto F. Steen, late a corporal in Company K, Fifteenth Wisconsin Volunteer Infantry, now a resident of Wahoo, Nebr., a special medal of honor for gallantry exhibited on frequent occasions throughout his military career; to the Committee on Military Affairs.

By Mr. SMITH of Michigan: A bill (H. R. 17074) granting a pension to William I. Fowler; to the Committee on Pensions.

By Mr. TAGGART: A bill (H. R. 17075) granting an increase of pension to Gilbert O. Hoffman; to the Committee on Invalid Pensions.

By Mr. TAVENNER: A bill (H. R. 17076) granting a pension to Arcenith Sample; to the Committee on Invalid Pensions.

By Mr. WILLIAMS of Ohio: A bill (H. R. 17077) granting a pension to George H. Wuchter; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of delegates to the International Stereotypers and Electrotypers' Union, favoring woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. DALE of New York: Petitions of Brookline (Mass.) Equal Suffrage Association and delegates to the International Stereotypers and Electrotypers' Union at Indianapolis, Ind., favoring woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. DAVIS of Texas: Memorial of Cuero (Tex.) Commercial Club relative to the designation, construction, and maintenance of a system of national highways; to the Committee on Roads.

Also, petition of Brotherhood of Railroad Trainmen, relative to wage controversy between employees and railroads; to the Committee on Interstate and Foreign Commerce.

By Mr. GOODWIN of Arkansas: Papers to accompany House bill 16267, granting a pension to A. J. Pope; to the Committee on Pensions.

By Mr. HAMLIN: Papers to accompany House bill 16835, to pension Thomas Stephenson; to the Committee on Invalid Pensions.

By Mr. KAHN: Memorial of Nelson A. Miles Camp, No. 10, United Spanish War Veterans, of San Francisco, Cal., favoring Nolan minimum-wage bill; to the Committee on Labor.

Also, petition of citizens of San Francisco, Cal., protesting against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, memorial of San Francisco (Cal.) Chamber of Commerce, favoring construction of a railroad in Alaska to the Bering coal fields; to the Committee on Interstate and Foreign Commerce.

By Mr. MOORES of Indiana: Papers to accompany House bill 17066, for pension for Maggie B. Wagner; to the Committee on Invalid Pensions.

By Mr. SHALLENBERGER: Petition of citizens of Cambridge, Nebr., asking Congress to pass a bill amending the Constitution so that the people may decide whether or not there shall be war; to the Committee on the Judiciary.

By Mr. SLOAN: Petitions of Dr. F. T. Schowengerdt and 53 others, of Cortland; C. Oscar Olson and F. D. Petteys, of Shelby; and Dr. J. H. Downing and 15 others, of Rising City, Nebr., relative to investigation by Interstate Commerce Commission of wage controversy between employees and railroads; to the Committee on Interstate and Foreign Commerce.

By Mr. TEMPLE: Two petitions of citizen of Beaver County, Pa., favoring a Christian amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. WILLIAMS of Ohio: Petitions of sundry citizens of Elyria, Ohio, against bill for Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

SENATE.

WEDNESDAY, *July 19, 1916.*

The Senate met at 10 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we pray for the power of spiritual discernment that we may make the correct estimate of things and know the final supremacy of character over the forces of this world. We thank Thee that Thou hast taught us that the pure in heart shall see God; that the meek, the peace lover, the patient, the burden bearer conquers in the end. We pray that we may enter into league with Thee, that our lives may be a willing submission to Thy will, and that we, through the great plan of God, may win the lasting peace and blessing of the people whom we serve. For Christ's sake. Amen.

THE JOURNAL.

On request of Mr. SMOOT, and by unanimous consent, the reading of the Journal of the proceedings of the legislative day of Monday, July 17, 1916, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a concurrent resolution (No. 49) providing that in the enrollment of the bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes, the Clerk be authorized and directed to strike out the word "chairs," on page 26, line 19, of said bill, and to insert in lieu thereof the word "chains"; and further to strike out, in amendment No. 54, the word "circuit" wherever it precedes "court of appeals," in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. JONES. I am in receipt of a great many letters protesting against the passage of Senate joint resolution 145, introduced by the Senator from Nevada [Mr. NEWLANDS], with reference to arbitration in connection with disputes between railroad employees and the railroads. I have two letters here, one from Mr. W. W. Wolcott, chairman of the general grievance committee, Brotherhood of Railroad Trainmen, of Seattle, and the other from G. O. Barnhart, general chairman Brotherhood of Locomotive Engineers, of Spokane, setting out in detail their objections to this joint resolution. I ask that these two letters may be printed in the RECORD and that this statement may go with reference to other letters which I receive in regard to the matter.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

GENERAL GRIEVANCE COMMITTEE,
BROTHERHOOD OF RAILROAD TRAINMEN,
Seattle, Wash, July 12, 1916.

Senator WESLEY L. JONES,
Washington, D. C.

DEAR SIR: In answer to the presentation of the proposition of an eight-hour day and time and one-half, for freight and yard employees, the national conference committee of managers are most insistent that the organizations involved leave to the Interstate Commerce Commission or to Federal arbitration, under the Newlands Act, the matters in controversy, including a mythical proposition of their own so far-reaching as to break down almost entirely what we have built up in 25 years.

Most of us believe that it was never intended that the commission should handle anything of this sort, and we also believe that this was suggested for effect only, that the public might be led to believe we had the choice of two propositions. Arbitration has been accepted, tried, and found wanting, not once but several times by all of the four organizations involved. Compromises resulted, unsatisfactory to both sides, and delay in settlement seemed to be the only sure thing to look forward to.

These organizations are creditable, sane, reliable, and among the most conservative among labor unions. The strike and other alarming talk and publicity is coming not from the organizations but from the railroad managers, who, when in trouble, try to appear to be much concerned over the public welfare while at any other time the public is looked at through the wrong end of the spy glass.

The men are represented on each system by men in my position, a chairman for each class of enginemen, one for conductors, and one for other train and yardmen. On the lines west of the Missouri River I represent by membership in the brotherhood and otherwise about 1,000 men, about 450 of whom are in this State. Other chairmen of the various roads represent somewhere near the same number. These men are among the highest type of skilled labor, intelligent, highly trained, and efficient. Most of them are men with families and they are counted among the best citizens in the State. Almost to a man they are American citizens, and together with their wives, mothers, and sisters, legally qualified voters, depending upon you for representation in the way of justice.

Almost unanimously these men feel that the matter in question can and should be handled between their representatives and those of the railroads. They know that a great hue and cry has been raised by the national commercial bodies and they know, too, that behind that body is the General Managers' Association. In reality, the national commercial body has been the mouthpiece for the managers, because in every commercial club of any size there is one or more representatives of the railroads whose business it is to further their ends. These bodies have heard the pitiful tales of the railroads but they have not been fair enough, before passing on the matter, to hear labor's side.

Congressional intervention is the much sought-after aid of the railroads at this time. If they can secure it in the way of a compulsory arbitration law or otherwise, it will be very much to their advantage, and incidentally very much to the disadvantage of about 400,000 men and their dependents. As I have intimated, we believe we can secure what other labor already has, if we are allowed to proceed alone, and without seriously discommoding the public, if at all.

As a direct representative of conductors, brakemen, flagmen, and yardmen employed in this State and as a citizen of it I have put these matters before you as concretely as I believed consistent with the seriousness of the case itself, in the hope that you will, as you have done formerly, actually lend your aid to the people of the State, and by that I mean the majority, the men and women who have made the State and maintain it, not to the few individuals who try to control it.

I trust that you will oppose any measures directed toward compulsory arbitration or intervention, and I will appreciate an expression from you as to your views on this matter.

Very truly, yours,

W. W. WOLCOTT, *Chairman.*

—

SPOKANE, WASH., *July 14, 1916.*

Hon. WESLEY L. JONES,
United States Senate, Washington, D. C.

MY DEAR SIR: I am reliably informed that the railroads have already caused to be introduced in the Senate and House of Representatives Senate joint resolution No. 145, which has for its purpose the referring our requests of the railroads for an eight-hour day and time and one-half for overtime to the Interstate Commerce Commission to investigate and report back to Congress, in the meanwhile deferring all action until the commission makes this report. This seems to us an unusual procedure, especially at this time when there has been no threatened interruption of transportation, nor do we know there will be. True, we are taking the vote of train and enginemen at this time, asking them for the privilege of using the power of these organizations if a satisfactory settlement can not be made. The fact that we are taking this vote should not be alarming, because there is only one case in history where this vote was not required before a settlement could be reached, and yet we have had no serious interruption of transportation. We have the same experience with these railroads that the public does; the public has to force laws to control them, and then afterwards keep an army of public servants to compel them to live up to the law. We have to force every word of our contracts, and do just as the public has to do—spend thousands of dollars to make them live up to the contract. We have adopted the simple method of computing time in train and engine service, "eight hours a day and time and one-half for overtime." This is on a speed basis of 12½ miles per hour. The mileage constitutes the day, or the basis of the day, and as long as the average time of the train is equal with 12 miles per hour, or the mileage is greater than the time on this basis, the penalty of time and one-half will not apply; therefore it is possible for the railroads to work their train crews under our propositions up to the full limit of the law—16 hours without paying any overtime. Thus, if a run is 125 miles, overtime would not accrue until the lapse of 10 hours; on a run of 150 miles overtime would not accrue until the lapse of 12 hours. This method of computing time is simple, and we are in hopes that, if we can get it adopted, will be easily understood and less liable to be technically violated in allowance of claim for time by officials.

There is no question but what resolution 145 is the work of the railroads. They are very anxious to have the Interstate Commerce Commission rule upon this matter, because when they have the rate-making body of the country grant our request upon the railroads, they hope later to have the same body approve an increase of freight and passenger rates, and thereby, like the darky's coon trap, catch them coming and going, and for $1 spent in payment for employees gain $2 in freight rates.

In conclusion I wish to call your attention to the inconsistent position of the railroads in calling upon Congress and the public to assist them, because, in 1914, when the engineers and firemen west of Chicago were at the breaking point the mediators proposed arbitration, which the employees accepted; but we had to vote the men, set the day, and even set the hour to leave the service of the railroads to force them to arbitrate, and not until they were called to Washington, and pressure brought to bear by the President, did they consent.

We shall regret exceedingly if resolution 145 should be adopted so early in the game as now. We think it is premature and unnecessary, and an advantage sought by the railroads. We do not even know yet whether the vote of the membership will sustain any further action of the chief executives until it has been counted, and the interruption of transportation is by no means assured. However, the eight-hour day and time and one-half for overtime is something railroad employees

have long contemplated; they feel that the strenuous life of great responsibilities entitle them to it. We feel that the safety of the public is involved in excessive hours. With a penalty on overtime, it will expedite transportation; thus the public and the employees have a dual interest in this movement. We know the railroads will not concede a farthing until they are forced. If the employees are not weakened by restrictions made by Congress, we will have little trouble in gaining what is due them; to hinder them prolongs the trouble. I am therefore addressing you this very lengthy letter, asking you to consider well our side before you cast your vote for any resolution that has for its purpose tieing our hands.

Yours, very truly,

G. O. BARNHART,
General Chairman B. of L. E. O.-W. R. & N. System.

Mr. JONES. I present a telegram in the nature of a memorial from the Clearing House Association of Seattle, Wash., protesting against the special tax upon the banks and upon its reinsertion in the revenue bill, it having been cut out in the other House. I move that the telegram be referred to the Committee on Finance.

The motion was agreed to.

Mr. GRONNA. I ask to have printed in the RECORD telegrams in the nature of memorials from citizens of my State, protesting against the tax on banks in the so-called revenue bill.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

FARGO, N. DAK., *July 8, 1916.*

Hon. A. J. GRONNA,
United States Senate, Washington, D. C.:

Eight hundred North Dakota banks enter vigorous protest against additional tax burdens on banks. Present bankers' special tax is gross discrimination and wholly unwarranted. We urge you to enter strong protest before committee.

NORTH DAKOTA BANKERS' ASSOCIATION.

—

BOTTINEAU, N. DAK., *July 15, 1916*

A. J. GRONNA,
Washington, D. C.:

Please protest against reinstating bankers' special tax in Kitchin revenue bill.

F. W. CATHRO.

—

GRAND FORKS, N. DAK., *July 15, 1916.*

Hon. A. J. GRONNA,
Washington, D. C.:

We are advised effort is made to reinstate in Kitchin revenue bill (H. R. 16763) bankers' special tax of $1 for each thousand of capital, surplus, and profits after this provision was eliminated in the House. In view of increased income tax and other taxes to which banking business is subjected, we consider special tax unjust and unwarranted discrimination. We ask your best efforts to prevent reinstatement of this tax in Kitchin bill. Believe this request is fair, not only to stockholders but to customers also, as they must eventually bear burden of increased cost of operation through excessive taxation. Interest on deposits and interest rates must necessarily reflect increased cost of operation.

SCANDINAVIAN AMERICAN BANK.
FIRST NATIONAL BANK.
NORTHERN STATE BANK.
FARMERS AND MECHANICS' SAVINGS BANK.
NORTHWESTERN TRUST CO.

—

GRAND FORKS, N. DAK., *July 15, 1916.*

Hon. A. J. GRONNA,
Washington, D. C.:

Letter officially signed by all Grand Forks banks protesting bankers' tax in Kitchin revenue bill goes forward to-night by wire. Your support of this protest requested.

M. C. BATCHELLOW,
Member Executive Committee,
North Dakota Bankers' Association.

—

CANDO, N. DAK., *July 15, 1916.*

Senator A. J. GRONNA,
Washington, D. C.:

I wish that you would use your influence against the reinstatement of the bankers' special tax that is before your body at the present time. I refer to the Kitchin revenue bill.

C. J. LORD.

Mr. WADSWORTH presented a petition of sundry citizens of Bolton, N. Y., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

Mr. PHELAN presented a memorial of the Board of Supervisors of Ventura County, Cal., remonstrating against the proposed inheritance tax, which was referred to the Committee on Finance.

Mr. CURTIS presented a petition of sundry inmates of the National Military Home, Kansas, praying for the passage of the so-called Volunteer officers' retired list bill, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Wakefield, Kans., praying for a settlement of the difficulties between the railroads and their employees by the Interstate Commerce Commission, which was referred to the Committee on Interstate Commerce.

Mr. McCUMBER presented a petition of the Commercial Club of Drayton, N. Dak., praying for the settlement of difficulties between the railroads and their employees by the Interstate Commerce Commission, which was referred to the Committee on Interstate Commerce.

He also presented a petition of sundry citizens of Wheelock, N. Dak., praying for the passage of the so-called stock-raising homestead bill without the 20-mile radius limitation clause, which was ordered to lie on the table.

Mr. SHEPPARD presented a petition of sundry citizens of the District of Columbia, praying for prohibition in the District of Columbia, which was ordered to lie on the table.

Mr. PENROSE presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the enactment of legislation providing for the erection of a Government-owned armor-plate plant, which was ordered to lie on the table.

Mr. WILLIAMS presented a petition of sundry citizens of Eden, Miss., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of the Woman's Christian Temperance Union of Starkville, Miss., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a petition of sundry citizens of the District of Columbia, praying for prohibition in the District of Columbia, which was ordered to lie on the table.

Mr. ASHURST. I present a petition of the Arizona State Federation of Labor praying for the passage of the immigration bill at this session of Congress. I ask that the petition may be printed in the RECORD.

There being no objection, the petition was ordered to lie on the table and to be printed in the RECORD, as follows:

ARIZONA STATE FEDERATION OF LABOR,
Phoenix, Ariz., July 14, 1916.

To Hon. HENRY F. ASHURST,
United States Senate, Washington, D. C.

MY DEAR SIR: I am instructed on behalf of the Arizona State Federation of Labor to ask you to use all honorable means to bring about the enactment, at this session of Congress, of the immigration bill, H. R. 10384.

We understand that the above bill has been passed by the lower House, and it is feared that it may not be acted upon by the Senate at the present session.

Anything that you may be able to do toward bringing action on this bill at the present session will be considered a great favor by the labor movement of this State.

Thanking you, and with best wishes, I beg to remain,

Very respectfully, yours,

[SEAL.] THOS. A. FRENCH,
Secretary-Treasurer Arizona State Federation of Labor.

Mr. ASHURST. I have received resolutions adopted by the Navajo County Division of the Arizona Branch of the Congressional Union for Woman Suffrage favoring the passage of the Susan B. Anthony amendment to the Constitution. I ask that the resolutions may be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

CONGRESSIONAL UNION FOR WOMAN SUFFRAGE,
Winslow, Ariz., June 30, 1916.

Resolved, That we women voters of Winslow, Navajo County, Ariz., meeting this 23d day of June, 1916, conscious of our political power, and determined to use it to obtain political freedom for our eastern sisters, do hereby indorse the Susan B. Anthony amendment, now blocked by the Judiciary Committee of the House of Representatives, and urge Congress to pass the amendment on to the States for ratification. Be it further

Resolved, That we call upon President Wilson, as the head of his party, to use his personal influence to bring about federally the political recognition of all the women of our country. Be it finally

Resolved, That these resolutions be sent to Woodrow Wilson, President of the United States; to the Vice President as presiding officer of the Senate; to the chairman and members of the Judiciary Committee of the House; to the floor leaders of both the Democratic and Republican Parties in Congress; and to the Arizona delegation, with the request that they be read into the CONGRESSIONAL RECORD.

Mrs. GEO. H. KEYES, Jr.,
Winslow Member of the Committee for the Navajo Division of the Arizona Branch of the Congressional Union.

CALLING OF THE ROLL.

Mr. JOHNSON of South Dakota. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Johnson, Me.	Page	Sutherland
Brandegee	Johnson, S. Dak.	Penrose	Swanson
Catron	Jones	Ransdell	Taggart
Clark, Wyo.	Kern	Reed	Tillman
Culberson	La Follette	Robinson	Underwood
Cummins	Lane	Shafroth	Vardaman
Curtis	McCumber	Sheppard	Wadsworth
Dillingham	Martin, Va.	Simmons	Warren
Gallinger	Martine, N. J.	Smith, Ga.	Weeks
Gronna	Nelson	Smith, S. C.	Williams
Husting	Norris	Smoot	Works
James	Overman	Sterling	

Mr. MARTINE of New Jersey. I was requested to announce that the Senator from West Virginia [Mr. CHILTON] is absent on public business. I was also requested to announce the absence of the Senator from Illinois [Mr. SHERMAN] on public business.

The VICE PRESIDENT. Forty-seven Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the name of absent Senators, and Mr. STONE and Mr. TOWNSEND answered to their names when called.

Mr. CHAMBERLAIN, Mr. THOMPSON, Mr. LODGE, and Mr. BECKHAM entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-three Senators have answered to the roll call. There is a quorum present.

REPORTS OF COMMITTEES.

Mr. CATRON, from the Committee on Claims, to which was referred the bill (H. R. 8200) for the relief of M. E. Sitters, reported it without amendment and submitted a report (No. 688) thereon.

Mr. SIMMONS. From the Committee on Commerce I report back favorably with amendments the bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes, and commonly known as the shipping bill. I also desire to file a report (No. 689) to accompany the bill.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. ASHURST, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 20) providing an additional appropriation for the Federal building at Steubenville, Ohio, reported it with an amendment and submitted a report (No. 692) thereon.

Mr. CHAMBERLAIN, from the Committee on Commerce, to which was referred the bill (S. 5395) to repeal sections 2588, 2589, and 2590 of the Revised Statutes of the United States, reported it without amendment and submitted a report (No. 691) thereon.

He also, from the Committee on Military Affairs, to which was referred the bill (H. R. 3690) repealing certain sections contained in the urgent deficiency act approved December 22, 1911, asked to be discharged from its further consideration and that it be referred to the Committee on Claims, which was agreed to.

Mr. KERN, from the Committee on Printing, to which was referred the bill (S. 6626) to fix the rate of pay for compositors and bookbinders in the Government Printing Office, reported it without amendment and submitted a report (No. 690) thereon.

Mr. WEEKS, from the Committee on Commerce, to which was referred the bill (H. R. 11129) for the relief of the owners of the barkentine *Mable I. Meyers* and her master and crew, and for the relief of the owners of cargo of molasses late on board said barkentine, asked to be discharged from its further consideration and that it be referred to the Committee on Claims, which was agreed to.

THE FUTURE OF CULEBRA.

Mr. FLETCHER, from the Committee on Printing, reported the following resolution (S. Res. 235):

Resolved, That the manuscript submitted by the Senator from Wyoming [Mr. WARREN] on June 22, 1916, entitled "Are subterranean gases cause of Panama Canal slides?" by Hon. Thomas Kearns, former United States Senator from Utah, be printed as a Senate document with illustrations.

The VICE PRESIDENT. The resolution will be placed on the calendar.

TRANSCONTINENTAL RAILWAY CELEBRATION.

Mr. MARTINE of New Jersey. From the Committee on Industrial Expositions I report back favorably without amendment the joint resolution (S. J. Res. 152) providing that the Congress of the United States shall participate in the celebration of the "golden wedding" of the first transcontinental lines of railway in the United States. I ask the attention of the Senator from Utah [Mr. SUTHERLAND] to the report.

Mr. SUTHERLAND. Mr. President, the joint resolution just reported carries no appropriation. It simply recognizes the importance of the completion of the first transcontinental line of railroad which united by rail the two great oceans. This event—one of the most important in all our history—the fiftieth anniversary of which occurs May 10, 1919, is to be fittingly celebrated at the city of Ogden in my State, where the junction of the railroads completing the line across the continent was effected. But for the great help afforded by the acts of Congress this event would have been delayed perhaps for a generation or more, and therefore it is peculiarly appropriate that the Congress should be represented at the celebration. I ask for the present consideration of the resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read as follows:

Whereas May 10, 1919, marks the fiftieth anniversary of the completion of the Union Pacific and Central Pacific lines of railway by the joining of the rails of each at Ogden, Utah; and

Whereas the great enterprise was consummated only by the direct aid given by the Government of the United States; and

Whereas this national epoch-making event will be commemorated in a manner befitting its international importance by a celebration at Ogden, Utah, in 1919, to be participated in by the people of this Nation: Therefore be it

Resolved, etc., That the Congress of the United States participate in the celebration and that a committee of 12 of its Members be appointed to attend and represent the Congress of the United States at said celebration, 4 to be appointed by the Vice President in behalf of the Senate and 8 by the Speaker of the House of Representatives in behalf of the House of Representatives.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MARTINE of New Jersey:

A bill (S. 6668) for the acquisition of a site for a public building at Washington, N. J.; to the Committee on Public Buildings and Grounds.

By Mr. HITCHCOCK:

A bill (S. 6669) reinstating Benjamin M. Koehler, late major of the Coast Artillery Corps, to his former rank and grade in the United States Army; to the Committee on Military Affairs.

By Mr. MYERS:

A bill (S. 6670) authorizing the State of Montana to select other lands in lieu of lands in section 16, township 2 north, range 30 east, within the limits of the Huntley irrigation project and the ceded portion of Crow Indian Reservation in said State; and

A bill (S. 6671) to validate the homestead entries of Anna W. Thrailkill; to the Committee on Public Lands.

By Mr. PENROSE:

A bill (S. 6672) granting a pension to Clarissa F. Dye (with accompanying papers); and

A bill (S. 6673) granting a pension to Daniel Boran (with accompanying papers); to the Committee on Pensions.

By Mr. CATRON:

A bill (S. 6674) granting a pension to John W. McCown; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 6675) granting an increase of pension to James W. Bloyd (with accompanying paper); to the Committee on Pensions.

A bill (S. 6676) to provide for the purchase of a site for a public building in the city of Bartlesville, Okla.; to the Committee on Public Buildings and Grounds.

By Mr. BANKHEAD:

A bill (S. 6677) granting an increase of pension to George P. Cross; to the Committee on Pensions.

By Mr. TAGGART:

A bill (S. 6678) granting an increase of pension to Samuel E. Nichols;

A bill (S. 6679) granting an increase of pension to Jasper W. Shoemaker (with accompanying papers); and

A bill (S. 6680) granting an increase of pension to Jacob Coffman (with accompanying papers); to the Committee on Pensions.

By Mr. McCUMBER:

A bill (S. 6681) granting an increase of pension to Sarah Dolan; to the Committee on Pensions.

By Mr. CURTIS:

A bill (S. 6682) granting a pension to William A. Wilburn (with accompanying papers);

A bill (S. 6683) granting an increase of pension to James N. Seip (with accompanying papers); and

A bill (S. 6684) granting an increase of pension to Daniel Newby (with accompanying papers); to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 6685) granting a pension to Lucy Romary, widow of Henry Romary (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 6686) granting a pension to Schuyler C. Morgan (with accompanying papers); to the Committee on Pensions.

By Mr. WADSWORTH:

A joint resolution (S. J. Res. 154) authorizng the printing of 5,000 copies of the Flags of Maritime Nations; to the Committee on Printing.

AMENDMENTS TO GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. CURTIS submitted an amendment proposing to appropriate $12,000 for the repair, rebuilding, and completion of the macadam road on the Fort Riley Military Reservation, in the State of Kansas, intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. RANSDELL submitted an amendment proposing to appropriate $27,800 to pay Elizabeth White, administratrix of the estate of Samuel N. White, deceased, late of West Feliciana Parish, La., in full satisfaction of her claim as reported by the Court of Claims, intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. JOHNSON of Maine submitted an amendment proposing to appropriate $1,200 to pay Dennis M. Kerr for extra and expert services rendered to the Committee on Pensions during the first session of the Sixty-fourth Congress, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Pensions and ordered to be printed.

THE REVENUE.

Mr. POINDEXTER submitted an amendment intended to be proposed by him to the bill (H. R. 16763) to increase the revenue, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

WITHDRAWAL OF PAPERS—JAMES M'TODD.

On motion of Mr. DU PONT, it was

Ordered, That the papers in the pension case of James McTodd (S. 694, 64th Cong.) be, and the same are hereby, withdrawn, no adverse report having been made thereon.

THE LUTEN PATENTS.

Mr. JAMES. Mr. President, at the last session of Congress the Committee on Patents was directed to make an investigation into the issuance of certain patents to Mr. Luten and to ascertain whether they were fraudulently issued. The committee desires me to present and have printed in the RECORD a letter from the First Assistant Commissioner of Patents, Mr. Newton, in regard to these patents, together with a list of the Luten patents, involved in suits reported prior to January 1, 1916, and also a list and record of actions in these patents as shown by Patent Office files, they having been filed with the Commissioner of Patents.

There being no objection, the matter was ordered to lie on the table and to be printed in the RECORD, as follows:

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., June 5, 1916.

Hon. OLLIE M. JAMES,
Chairman Committee on Patents, United States Senate.

MY DEAR MR. JAMES: Replying to your request of June 1, 1916, asking that an official investigation of the issuance of the Luten patents be made, I beg to say that the records of the office have been carefully scrutinized without finding any indication of fraud therein, but that you may have a résumé of the office actions I am sending herewith all that appears of record bearing on this question.

Since, as you state, it has been charged that the patents were fraudulently issued, it was thought best to embody in the report the names of all the officials who were responsible for allowing the patents, the dates on which they were allowed, and the general character of the actions made in each case by officials of the office, and you will find these matters set forth on pages 3 to 7 of this report.

These patents have been involved in numerous suits, and you will find on pages 1 and 2 of this report a general statement of the result of such decisions as have been reported prior to January 1, 1916.

Some time ago an attorney who had been connected with many of the Luten suits sent me a list of these suits, many of which had not been reported in any of the published reports, and I inclose this also for what it may be worth to you.

I also send you herewith copies of the Luten patents referred to in this report.

Should there be any further information that you desire not included in this report I will be glad to furnish the same if possible.

Very sincerely,

J. T. NEWTON,
First Assistant Commissioner.

LIST OF LUTEN PATENTS INVOLVED IN SUITS REPORTED PRIOR TO JANUARY 1, 1916.

818386. Luten *v.* Dover Construction Co. (189 Fed. Rep., 405). Demurrer to bill overruled. Case still pending January 1, 1916. Luten *v.* Rhoads et al. (194 Fed. Rep., 169). Decree does not involve this patent. Luten *v.* MacAfee (206 Fed. Rep., 175). Noninfringement; defendant held to be licensee. Bill dismissed.

830483. Luten *v.* Sharp et al. (200 Fed. Rep., 151). Demurrer to bill overruled. Defendant's answer in Luten *v.* Sharp (217 Fed. Rep., 76). Decree does not involve this patent.

852970. Luten *v.* Sharp et al. (200 Fed. Rep., 151, supra,); Luten *v.* Sharp et al. (217 Fed. Rep., 76). Decision does not involve this patent. Luten *v.* Washburn Engineering News, December 2, 1915, volume 74, page 1094, held invalid.

853183. Luten *v.* Sharp (200 Fed. Rep., 151, supra); Luten *v.* Sharp (217 Fed. Rep., 76). Decree does not involve this patent. Luten *v.* Washburn Engineering News, December 2, 1915, volume 74, page 1094, held invalid.

853202. Luten *v.* Dover Construction Co., supra; Luten *v.* MacAfee, supra; Luten *v.* Washburn Engineering News, December 2, 1915, volume 74, page 1094, held invalid.

853203. Luten *v.* Dover Construction Co., supra; Luten *v.* Sharp et al. (200 Fed. Rep., 151); Luten *v.* Sharp et al. (217 Fed. Rep., 76). Noninfringement of this patent. Validity of the patents not in issue. Their validity was presumed by the court. Luten *v.* MacAfee, supra; Luten *v.* The Town of Lee et al. (206 Fed. Rep., 904). Noninfringement. Bill dismissed. Luten *v.* Washburn Engineering News, December 2, 1915, volume 74, page 1094, held invalid.

853204. Luten *v.* Sharp et al. (200 Fed. Rep., 151, supra); Luten *v.* Sharp et al. (217 Fed. Rep., 76). Decree does not involve this patent.

923058. Luten *v.* Dover Construction Co., supra.

933771. Luten *v.* Sharp et al. (200 Fed. Rep., 151, supra); Luten *v.* Sharp et al. (217 Fed. Rep., 76). Decree does not involve this patent, Luten *v.* Washburn Engineering News, volume 74, page 1094, held invalid.

934411. Luten *v.* Dover Construction Co., supra.

979776. Luten *v.* Sharp et al. (200 Fed. Rep., 151, supra); Luten *v.* Sharp et al. (217 Fed. Rep., 76). Decree does not involve this patent, Luten *v.* Washburn Engineering News, volume 74, page 1094, held invalid.

989272. Luten *v.* Sharp et al. (200 Fed. Rep., 151, supra); Luten *v.* Sharp et al. (217 Fed. Rep., 76). Decree does not involve this patent. Luten *v.* Washburn Engineering News, volume 74, page 1094, held invalid.

852970. Luten *v.* Rhoads et al. (194 Fed. Rep., 169). Claim 46 held valid and infringed. No appeal taken.

List and record of actions in Luten patents as shown by Patent Office files.

41708	Aug. 22, 1911	Design. Examiner, J. H. Carnes. 1 rejection.

STANDARDIZATION OF LIME BARRELS.

Mr. JONES. Mr. President, the other day I entered a motion to reconsider the vote by which the conference report on the bill (S. 5425) to standardize lime barrels was agreed to, and also requested the return of the message of the Senate and the conference report from the House of Representatives. The Senator from Minnesota [Mr. CLAPP] asked me at the time to take the matter up if he was not here when the report was returned. So I ask that the vote by which the conference report was adopted be reconsidered. I will state that a mistake was made in the preparation of the report.

The motion to reconsider was agreed to.

Mr. JONES. I ask that the conference report be rejected.

The report was disagreed to.

Mr. JONES. I move that the Senate further insist upon its disagreement to the amendments of the House and request a further conference with the House on the disagreeing votes of the two Houses and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. CLAPP, Mr. SHIELDS, and Mr. BANKHEAD conferees on the part of the Senate.

POST-OFFICE APPROPRIATIONS.

The VICE PRESIDENT laid before the Senate the following concurrent resolution (No. 49) of the House of Representatives, which was read:

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H. R. 10484) entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes," the Clerk be, and he is hereby, authorized and directed to strike out the word "chairs," on page 26, line 19, of said bill, and to insert in lieu thereof the word "chains"; and further to strike out in amendment No. 54 the word "circuit" wherever it precedes "court of appeals" in said amendment.

Mr. BANKHEAD. I move that the concurrent resolution be agreed to with the following amendments, which I send to the desk.

The VICE PRESIDENT. The amendments will be stated.

The SECRETARY. At the end of Senate amendment No. 29 restore the following:

: *Provided further*—

And that the Clerk be directed and authorized to renumber the sections of the bill in numerical order; and also to insert at the beginning of the last paragraph of said bill the following:

SEC. 6.

The amendments were agreed to.

The concurrent resolution as amended was agreed to.

COTTON STATISTICS CONFERENCE REPORT (S. DOC. NO. 501).

Mr. SHEPPARD. I submit a conference report on the bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, which I ask may be printed and lie on the table for the present.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4767) entitled "An act authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products," after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 6.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, and 5; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of said bill, and agree to the same.

WILLIAM E. CHILTON,
MORRIS SHEPPARD,
ROBERT M. LA FOLLETTE,
Managers on the part of the Senate.

H. W. SUMNERS,
J. B. ASWELL,
GEORGE R. SMITH,
Managers on the part of the House.

FRANCHISES OF PORTO RICO (S. DOC. NO. 502).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Pacific Islands and Porto Rico and ordered to be printed:

To the Senate and House of Representatives:

As required by section 32 of the act of Congress approved April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," I have the honor to transmit herewith certified copies of the franchises granted by the Executive Council of Porto Rico, which are described in the accompanying letter from the Secretary of War transmitting them to me.

WOODROW WILSON.

THE WHITE HOUSE, *July 19, 1916.*

THE CALENDAR.

Mr. SMOOT. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of unobjected bills on the calendar under Rule VIII.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

FEDERAL JUDGES.

The bill (S. 706) to amend section 260 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, was announced as first in order.

Mr. NELSON. Let that go over, Mr. President.

Mr. SMITH of Georgia. I ask that I be permitted to offer an amendment to the bill before it goes over.

Mr. SMOOT. Will it lead to discussion?

Mr. SMITH of Georgia. No. I only want to present an amendment, so that it may be made a part of the bill.

The VICE PRESIDENT. Is there objection?

Mr. NELSON. I withdraw my objection.

Mr. SMITH of Georgia. On page 2, line 10, of the bill, I move to strike out the words "if, in his opinion, the public good so requires, may" and to substitute therefor the words "if he finds

that efficient administration of the business of the court so requires, shall."

Mr. SMOOT. Let the amendment be printed, Mr. President.

Mr. SMITH of Georgia. It is suggested that the amendment be printed. I do not object to that.

Mr. NELSON. I have objected to the present consideration of the bill.

The VICE PRESIDENT. The bill goes over.

Mr. SMITH of Georgia. I send the amendment to the desk, and ask that it be stated. It will not then be necessary to detain the Senate longer.

The VICE PRESIDENT. The amendment proposed by the Senator from Georgia will be stated.

The SECRETARY. On page 2, in lines 10 and 11, it is proposed to strike out the words "if, in his opinion, the public good so requires, may" and to insert "if he finds that the efficient administration of the business of the court so requires, shall."

Mr. SMOOT. Now, let the bill go over.

The VICE PRESIDENT. The bill will go over, and the amendment will be printed in the bill and be considered pending.

BILLS PASSED OVER.

Mr. SMOOT. I ask that the next three bills on the calendar be passed over.

The VICE PRESIDENT. Being objected to, the next three bills on the calendar, Orders of Business 22, 23, and 27 will be passed over.

The bill (S. 2406) to amend section 162 of the act to codify, revise, and amend the laws relating to the judiciary, approved March 3, 1911, was announced as next in order.

SEVERAL SENATORS. Let it go over.

The VICE PRESIDENT. The bill goes over.

COST OF LIVING IN THE DISTRICT OF COLUMBIA.

The joint resolution (S. J. Res. 43) authorizing and directing the Department of Labor to make an inquiry into the cost of living in the District of Columbia and to report thereon to Congress as early as practicable, was announced as next in order.

Mr. WILLIAMS. Let that go over, Mr. President.

Mr. KENYON. Mr. President, does the Senator from Mississippi insist on his objection? This matter has been on the calendar now for about four months.

Mr. WILLIAMS. I think it is a little too big a question to take up right now.

Mr. KENYON. I do not think it will require any debate.

Mr. WILLIAMS. I know it will not require any debate; but I am talking about what a big question it is when it shall have been inaugurated. It would involve a pretty extensive inquiry. What is the necessity of an inquiry into the cost of living in the District of Columbia? Is not everybody pretty well acquainted with it?

Mr. KENYON. The necessity is the same as the necessity for the inquiry into the cost of living in any other place or a survey into the cost of living or into labor conditions anywhere. A law has been passed in the District of Columbia limiting the hours of labor for women. That will amount to very little, as would any survey of conditions, without knowing what is the cost of living of wage earners in the District of Columbia. This is only as to wage earners. The proposition has been indorsed by the Secretary of Labor and the Department of Labor, and it is to be the basis for a minimum-wage law in the District of Columbia. That is the object of the inquiry.

There have been hearings before the Labor Committee and the bill has twice been reported to the Senate—once at the last session and once at this session. If this inquiry is ever to be made, there is no use of raising an objection now.

Mr. WILLIAMS. Mr. President, my objection is based altogether upon the uselessness of the inquiry. I do not see that it is necessary to set the machinery of the Department of Labor to work in order to acquire knowledge of the cost of living in the District of Columbia. Any committee dealing with any legislation can make the investigation for itself just as well. I think we have had too many of these rather expensive inquiries, taking men in the departments away from their usual work and breaking up the routine of their work. I am not opposed to that when any useful purpose is to be accomplished, but I really do not see any useful purpose to be accomplished in this case.

Mr. KENYON. Does the Senator from Mississippi think it is worth while to investigate the cost of living anywhere or to have any survey of living conditions or labor conditions anywhere in the United States?

Mr. WILLIAMS. Well, frankly, I do not.

Mr. KENYON. Then the Senator differs from a great many others.

Mr. President, I wish to say that this joint resolution is going to receive consideration at this session of Congress. Such a resolution has passed the other House, and if this resolution is not to be considered, while I do not like to object to other resolutions, and I am not going to do so to-day, I shall insist on the next call of the calendar that this joint resolution be considered or that none be considered.

Mr. WILLIAMS. We are now undergoing a good deal of expense in many directions; and while this is a mere drop in the bucket, I do not desire any useless inquiry made.

Mr. KENYON. The Senate joint resolution is slightly different from House joint resolution 91, which I was going to ask unanimous consent to have substituted for it.

Mr. WILLIAMS. I feel compelled to insist on the objection.

Mr. KENYON. I am glad the Senator from Mississippi is getting economical.

The VICE PRESIDENT. Being objected to, the joint resolution goes over.

Mr. SMOOT. I ask that Orders of Business 49, 63, 64, 65, and 66 may be passed over.

The VICE PRESIDENT. Being objected to, the business on the calendar stated by the Senator from Utah will be passed over.

The bill (S. 1082) to prevent the manufacture and sale of alcoholic liquors in the District of Columbia, and for other purposes, was announced as next in order.

Mr. PENROSE. Let that go over, Mr. President.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 2730) to fix the compensation of assistant appraisers of merchandise, and for other purposes, was announced as next in order.

Mr. SMOOT. Let that go over, Mr. President.

The VICE PRESIDENT. The bill goes over.

VOCATIONAL EDUCATION.

The bill (S. 703) to provide for the promotion of vocational education; to provide for cooperation with the States in the promotion of such education in agriculture and the trades and industries; to provide for cooperation with the States in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditure, was announced as next in order.

Mr. SMITH of Georgia. Mr. President, I wish to offer several amendments to that bill and then ask to have a reprint of it. We can not dispose of the bill at this time, but I should like to have made the changes which I desire in order that Senators may examine them.

Mr. SMOOT. I suggest to the Senator to offer his amendments and to have them printed.

Mr. SMITH of Georgia. One of the amendments, I am sure, the Senate will accept at once. It will simplify the bill. It is simply a change of date. This bill as drawn would apply to the calendar year ending July 1, 1917. Now, we must make it for a year later, and I should like to have those dates printed in the bill so as to give it an intelligent reading at the present time. With the consent of the Senate I ask that these changes may be made.

Then I have two important amendments which I wish to offer and to have printed, and I should also be glad to have them in the reprint of the bill, so that they may readily be seen by Senators. I ask unanimous consent that that direction be made.

The VICE PRESIDENT. Without objection, it is so ordered.

BUSINESS PASSED OVER.

The resolution (S. Res. 7) providing that any Senator upon his own request may be recorded and counted as present in order to constitute a quorum was announced as next in order.

Mr. NORRIS. Let that go over.

The VICE PRESIDENT. The resolution will go over.

The resolution (S. Res. 20) for appointment of a committee of Senators to examine into questions relating to the acquisition or construction of manufacturing plants to supply the Army and Navy with arms, armament, etc., was announced as next in order.

Mr. GALLINGER. Let that go over.

The VICE PRESIDENT. The resolution will be passed over.

The bill (S. 1428) to reimburse certain fire insurance companies the amounts paid by them for property destroyed by fire in suppressing the bubonic plague in the Territory of Hawaii in the years 1899 and 1900 was announced as next in order.

Mr. GRONNA. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 3551) relating to the procedure in the United States courts was announced as next in order.

Mr. CATRON. I ask that that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The joint resolution (S. J. Res. 93) authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States, was announced as next in order.

Mr. SMOOT and Mr. KENYON. Let that go over.

The VICE PRESIDENT. The joint resolution will be passed over.

The bill (S. 1107) to amend, revise, and codify the laws relating to the public printing and binding and the distribution of Government publications was announced as next in order.

Mr. SMOOT. It is impossible to consider that measure today, and I ask that it go over.

The VICE PRESIDENT. The bill will be passed over.

PENSIONS AND INCREASE OF PENSIONS.

The bill (S. 4654) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, was considered as in Committee of the Whole. It proposes to pension at the rates stated the following-named persons:

Joseph Wessler, late of Battery B, Battalion Utah Volunteer Light Artillery, War with Spain, $16 per month.

Charles A. Myers, late of Company B, Fifty-first Iowa Volunteer Infantry, War with Spain, $30 per month.

William Peters, late of Hospital Corps, United States Army, War with Spain, $30 per month.

Floyd E. Driskel, late of Troop I, First Regiment United States Cavalry, War with Spain, $12 per month.

George Beals, late of Company I, Fifth Regiment United States Volunteer Infantry, War with Spain, $12 per month.

Omar E. Brown, late of Company K, Eighteenth Regiment United States Infantry, Regular Establishment, $12 per month.

Anson Meyers, late of Company E, Twenty-fourth Regiment United States Infantry, Regular Establishment, $40 per month in lieu of that he is now receiving.

Joseph D. Sovern, late of Company H, Eleventh Regiment United States Infantry, Regular Establishment, $17 per month in lieu of that he is now receiving.

Virginia Watson, widow of Eugene W. Watson, late rear admiral United States Navy, retired, $40 per month in lieu of that she is now receiving.

James Conway, late boiler maker, United States Navy, Regular Establishment, $30 per month.

Henry Dussault, late of Company H, First Regiment New Hampshire Volunteer Infantry, War with Spain, $12 per month.

James C. Larimer, late of Troop K, Eighth Regiment United States Cavalry, War with Spain, $14 per month.

Lizzie Breen, widow of Patrick Breen, late of Troop G, First Regiment United States Cavalry, Regular Establishment, $12 per month.

George Milholland, late of Company H, Twenty-first Regiment United States Infantry, War with Spain, $30 per month in lieu of that he is now receiving.

Cyreneus Rodgers, late of Company C, Third Regiment Kentucky Volunteers, War with Mexico, $40 per month in lieu of that he is now receiving.

James M. Freeman, late of Company E, Eighth Regiment United States Infantry, War with Spain, $20 per month in lieu of that he is now receiving.

John A. Smith, late of Company C, One hundred and sixty-first Regiment Indiana Volunteer Infantry, War with Spain, $12 per month.

Caleb St. Clair, late of Company B, Eleventh Regiment United States Infantry, Regular Establishment, $20 per month.

Carrier Thompson, late of Company L, Sixteenth Regiment Pennsylvania Volunteer Infantry, War with Spain, $20 per month in lieu of that he is now receiving.

James G. Royse, late of Capt. Parker's company, Iowa Dragoon Volunteers, War with Mexico, $20 per month.

Dennie Dixon, late of Company L, Sixth Regiment United States Infantry, War with Spain, $30 per month in lieu of that he is now receiving.

Julia P. Denny, widow of Frank L. Denny, late colonel and quartermaster, United States Marine Corps, $30 per month.

Louisa M. Fletcher, widow of William Fletcher, late of Company G, First Regiment Ohio Volunteers, War with Mexico, and captain, Twentieth Regiment United States Infantry, and major, United States Army, retired, $40 per month in lieu of that she is now receiving.

William Bradley, late of Company L, Second Regiment United States Volunteer Engineers, War with Spain, $30 per month in lieu of that he is now receiving.

Samuel A. Greenlee, late of Company I, First Regiment West Virginia Volunteer Infantry, War with Spain, $12 per month.

Caroline Heywood, widow of Charles Heywood, late major general commandant, United States Marine Corps, Regular Establishment, $50 per month in lieu of that she is now receiving.

John A. Avirett, late of Company I, Fourteenth Regiment United States Infantry, War with Spain, $30 per month.

Andrew Houlihan, late of Company D, Nineteenth Regiment United States Infantry, War with Spain, $36 per month in lieu of that he is now receiving.

Edward J. Gainan, late first lieutenant Company D, First Regiment Montana Volunteer Infantry, War with Spain, $20 per month.

John P. Todd, late of Troop I, Second Regiment United States Cavalry, Texas and New Mexico Indian War, $20 per month.

Sarah Warnack, widow of Frederick C. Warnack, late of Company E, Second Regiment Illinois Volunteers, War with Mexico, $20 per month in lieu of that she is now receiving.

Frank McCabe, late of Company I, First Regiment New Hampshire Volunteer Infantry, War with Spain, $12 per month.

Grant E. Getchell, late of Company M, Thirteenth Regiment Minnesota Volunteer Infantry, War with Spain, $20 per month in lieu of that he is now receiving.

Clifford T. Cheek, late of Company C, Thirtieth Regiment United States Volunteer Infantry, War with Spain, $24 per month in lieu of that he is now receiving.

Edward J. Cuzzort, late of Company E, Eighteenth Regiment United States Infantry, and Signal Corps, United States Army, Regular Establishment, $16 per month in lieu of that he is now receiving.

Louise M. Swift, widow of Franklin Swift, late lieutenant, United States Navy, Regular Establishment, $35 per month in lieu of that she is now receiving.

Joseph C. Chilton, late of the United States Marine Corps, Regular Establishment, $24 per month in lieu of that he is now receiving.

Elizabeh J. Burt, widow of Andrew S. Burt, late brigadier general, United States Army, Regular Establishment, $50 per month in lieu of that she is now receiving.

Edward Lenfesty, late of Company M, One hundred and fifty-seventh Regiment Indiana Volunteer Infantry, War with Spain, $20 per month.

Edward D. Smith, late of Company H, Fourth Regiment United States Infantry, War with Spain, $16 per month in lieu of that he is now receiving.

Williamson S. Wright, late first lieutenant Fourteenth Company United States Volunteer Signal Corps, War with Spain, $20 per month.

Paul F. Busch, late of Company D, Signal Corps, United States Army, Regular Establishment, $12 per month.

Emer A. Robbins, late of Company L, Sixteenth Regiment United States Infantry, War with Spain, $20 per month.

Michael H. Spaulding, late of Company H, Third Regiment United States Volunteer Engineers, War with Spain, $17 per month.

Benjamin Kelsey, late of Troop D, Second Regiment United States Dragoons, Regular Establishment, $30 per month in lieu of that he is now receiving.

Joseph A. Nolan, late of Company B, Forty-fifth Regiment United States Volunteer Infantry, War with Spain, $24 per month in lieu of that he is now receiving.

Fred Lamke, late of Company A, Second Regiment United States Infantry, War with Spain, $12 per month.

Robert F. Seawell, late of Company B, First Regiment Alabama Volunteer Infantry, War with Spain, $12 per month.

Curt Seay, late of Battery C, First Regiment United States Artillery, War with Spain, $16 per month.

John T. Krenek, late of Company A, Third Regiment United States Infantry, Regular Establishment, $30 per month in lieu of that he is now receiving.

Sophronia Neel, widow of Thomas Neel, late of Company C, First Regiment Illinois Volunteers, War with Mexico, $20 per month in lieu of that she is now receiving.

Samuel C. Cochran, late of Company E, First Regiment Idaho Volunteer Infantry, War with Spain, $12 per month.

James A. Saurbaugh, late of the Hospital Corps, United States Army, War with Spain, $40 per month in lieu of that he is now receiving.

Frank L. Simpson, late of Company D, Fifty-first Regiment Iowa Volunteer Infantry, War with Spain, $15 per month in lieu of that he is now receiving.

Viola C. McConville, widow of Edward McConville, late major, First Regiment Idaho Volunteer Infantry, War with Spain, $35 per month in lieu of that she is now receiving.

Bertha Z. Smith, widow of Howard Smith, late surgeon, United States Navy, Regular Establishment, $30 per month.

Elizabeth W. C. Allen, widow of Charles J. Allen, late brigadier general, United States Army, Regular Establishment, $50 per month in lieu of that she is now receiving.

Elie Jones Quinby, widow of Ira Quinby, late major, First Regiment United States Infantry, and lieutenant colonel, United States Army, retired, $40 per month in lieu of that she is now receiving.

Joseph H. Cote, late of Company G, First Regiment Maine Volunteer Infantry, War with Spain, $30 per month in lieu of that he is now receiving.

Maria L. Dougherty, widow of William E. Dougherty, late brigadier general, United States Army, $50 per month in lieu of that she is now receiving.

Eliza J. Salmon, widow of John Salmon, late of Capt. Thomas Graves's company, Virginia Militia, War of 1812, $24 per month in lieu of that she is now receiving.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 645) to provide for the closing of barber shops in the District of Columbia on Sunday was announced as next in order.

Mr. GRONNA. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

RECORDER OF DEEDS OF THE DISTRICT OF COLUMBIA.

The bill (H. R. 7571) to provide for the appointment of the recorder of deeds of the District of Columbia by the Commissioners of the District of Columbia was announced as next in order.

Mr. CLARK of Wyoming. Let that go over.

Mr. SMITH of Georgia. Mr. President, we might just as well get rid of that bill, it having been reported adversely; and if the Senator will withdraw his objection, I will move that the bill be indefinitely postponed.

Mr. CLARK of Wyoming. I withdraw the objection.

The VICE PRESIDENT. The question is on the motion of the Senator from Georgia that the bill be indefinitely postponed.

The motion was agreed to.

PENSIONS AND INCREASE OF PENSIONS.

The bill (H. R. 11240) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, was considered as in Committee of the Whole. The bill had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 2, after line 2, to strike out:

The name of Jane M. Torrance, widow of Robert Torrance, late of Company D, Third Regiment Indiana Volunteers, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 2, line 20, before the words "per month," to strike out "$17" and insert "$12," so as to make the clause read:

The name of Edward H. Dalton, late of the Hospital Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 3, line 14, after the name "Hill," to strike out "deceased," so as to make the clause read:

The name of Sarah Hill, widow of Isaac Hill, late of Company G, First Regiment Illinois Foot Volunteers, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 4, line 15, after the name "Anna," to strike out "Phillips Shepherd, formerly" and insert "J. Phillips, now Shepherd, former," and in line 19, before the words "per month," to strike out "$20" and insert "$12," so as to make the clause read:

The name of Anna J. Phillips, now Shepherd, former widow of Orange H. Phillips, late of Company I, Second Regiment Illinois Volunteer Infantry, War with Mexico, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 5, after line 21, to strike out:

The name of Peter Black, late of United States Navy, U. S. S. *Ohio*, War with Mexico, and pay him a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 6, line 7, before the name "Harry," to strike out "the late," and in line 12, before the word "reaches," to strike out "it" and insert "she," so as to make the clause read:

The name of Mayme Hall, widow of Harry C. Hall, late of Company G, Nineteenth Regiment United States Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of the minor child of the said Harry C. Hall until she reaches the age of 16 years.

The amendment was agreed to.

The next amendment was, on page 6, line 21, after the word "Regiment," to insert "Indiana Volunteer Infantry, War with Mexico," and in line 23, after the word "Infantry," to strike out "War with Mexico," so as to make the clause read:

The name of John W. Gahan, late of Company K, Second Regiment Indiana Volunteer Infantry, War with Mexico, and Company D, Fifty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 7, after line 12, to strike out:

The name of Julia Tomlin, dependent mother of Archie Tomlin, late of Company A, Fourth Regiment Missouri Volunteer Infantry, War with Spain, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, at the top of page 8, to strike out:

The name of Edward T. Conway, late of Company E, Twelfth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $30 per month.

The amendment was agreed to.

The next amendment was, on page 8, line 19, after the word "Artillery," to insert "and captain, United States Army, retired," so as to make the clause read:

The name of Mary E. Galbraith, widow of William W. Galbraith, late first lieutenant and captain, Fifth Regiment United States Artillery, and captain, United States Army, retired, Regular Establishment, and pay her a pension at the rate of $20 per month, and the sum of $2 per month additional on account of each of the three minor children of the said William W. Galbraith until they reach the age of 16 years.

The amendment was agreed to.

The next amendment was, at the top of page 10, to strike out:

The name of Louis L. Jones, late of Company I, Second Regiment South Carolina Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

HEIRS OF HUNDLEY V. FOWLER.

Mr. VARDAMAN. Mr. President, I find that I shall be compelled to leave the Chamber for an hour or more, and I desire to ask unanimous consent for the immediate consideration of calendar No. 246, being the bill (H. R. 8787) for the relief of the heirs of Hundley V. Fowler, deceased. It will take but a moment. The bill has passed the House.

The VICE PRESIDENT. Is there any objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8787) for the relief of the heirs of Hundley V. Fowler, deceased. It directs the Secretary of the Treasury to pay to the heirs of Hundley V. Fowler, deceased, $2,202.83 for services rendered in carrying mail on route No. 8697, in the State of Texas, from January 1, 1861, to May 31, 1861; but the Secretary of the Treasury shall require, before making payment, from all attorneys having a contract with the heirs of Hundley V. Fowler for attorney's fees a waiver of all the fees in excess of 20 per cent.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OSAGE OIL LANDS.

The resolution (S. Res. 107) relative to leasing of Osage oil lands was announced as next in order.

Mr. CURTIS. Mr. President, that resolution might as well be indefinitely postponed. The question involved in it has largely been settled.

The VICE PRESIDENT. The Senator from Kansas moves that the resolution be indefinitely postponed.

Mr. FLETCHER. Mr. President, the Senator from Oklahoma [Mr. OWEN] is not present, and it seems to me that it would be advisable to pass over the resolution without taking final action on it. I do not know what his views may be concerning it.

Mr. GALLINGER. Let it go over.

Mr. CURTIS. Let it go over. There is no use taking up time about it.

Mr. SMITH of Georgia. That resolution has reference to a matter which has been disposed of, namely, the leasing of Osage oil lands, as I understand.

Mr. CURTIS. Yes; it relates to a matter that has been disposed of.

The VICE PRESIDENT. The resolution will be passed over.

BILLS PASSED OVER.

The bill (S. 1100) to pay the balance due the loyal Creek Indians on the award made by the Senate on February 16, 1903, was announced as next in order.

Mr. CURTIS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1096) to provide for carrying into effect of the agreement between the United States and the Muskogee (Creek) Nation of Indians ratified by act of Congress approved March 1, 1901, and supplemental agreement of June 30, 1902, and other laws and treaties with said tribe of Indians, was announced as next in order.

Mr. CURTIS. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

OTTAWA INDIAN TRIBE.

The bill (S. 4250) for the relief of the Ottawa Indian Tribe of Blanchard Fork and Roche de Bœuf was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That jurisdiction is hereby conferred upon the Court of Claims, with right of appeal to the Supreme Court of the United States, to consider and determine all legal and equitable claims, if any, of the Indian Tribe of Blanchard Fork and Roche de Bœuf against the United States for the misappropriation of any funds of the tribe or for the failure of the United States to pay the tribe any money due under way of treaty; and also to consider and determine any legal or equitable defenses, set-offs, or counterclaims which the United States may have against the said tribe of Indians, and to enter judgment thereon, all claims and defenses to be considered without regard to lapse of time; and the final judgment and satisfaction thereof shall be a full and final settlement of all claims of said Indians against the United States.

SEC. 2. That suit under this act shall be begun by the filing of a single petition setting forth the claims of said Indians, to be verified by an attorney or attorneys selected by the claimant Indians with the approval of the Secretary of the Interior and the Commissioner of Indian Affairs, as provided by existing law. The Indian tribe of Blanchard Fork and Roche de Bœuf shall be party plaintiff, and the United States party defendant, and such suit shall, on motion of either party, be advanced on the docket of the Court of Claims and of the Supreme Court. Official letters, papers, reports, and public records, or certified copies thereof, may be used as evidence. The compensation to be paid the attorneys for the claimant Indians shall be determined by the Court of Claims, but in any event shall not be greater than that provided in the contract between the claimant Indians and their attorney or attorneys, and shall be paid out of any sum or sums found and adjudged to be due said Indians.

SEC. 3. That the balance of any judgment rendered in favor of claimant Indians may be placed in the Treasury of the United States to the credit of the Indians entitled thereto, and shall draw interest at the rate of 4 per cent per annum, or may, in the discretion of the Secretary of the Interior, be deposited in such bonded bank or banks as the Secretary may select and under such regulations as he may prescribe, and said principal and interest may, in the discretion of the Secretary of the Interior, be paid to the Indians, or expended for their benefit.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 3927) for the relief of the legal representatives of Francis Busch, deceased, was announced as next in order.

Mr. SMOOT. I ask that that bill go over, and that the bills following it on the calendar, down to and including Calendar No. 254, be passed over.

The VICE PRESIDENT. Objection being made, the bills referred to by the Senator from Utah will be passed over.

SUMMER-RESIDENCE HOMESTEADS.

The bill (S. 1065) to provide for summer-residence homesteads, and for other purposes, was announced as next in order.

Mr. NORRIS. Mr. President, I ask that that bill go over.

Mr. SHAFROTH. I hope the objection will not be insisted upon.

Mr. NORRIS. Mr. President, let me say to the Senator that on a former call of the calendar I objected to that bill. The Senator from Montana [Mr. MYERS], who reported the bill from the committee, told me afterwards that, on information he had received since the bill had been reported, he was also opposed to it, and was glad that I had objected. He also said that in the future he would object to the bill if I did not. He is not present. The bill is opposed by the Agricultural Department in a very strong letter; and while personally, if there were time to take it up and debate it, I should not object to debating and voting on it, in view of the absence of the Senator from Montana I feel disposed to object.

The VICE PRESIDENT. Objection is made, and the bill goes over.

BILL PASSED OVER.

The bill (S. 5126) giving the consent of the United States for the bringing of certain suits in the Supreme Court of the United States, and for other purposes, was announced as next in order.

Mr. CLARK of Wyoming. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

PENSIONS TO SPANISH WAR WIDOWS.

The bill (H. R. 54) to pension widows and minor children of officers and enlisted men who served in the War with Spain, Philippine insurrection, or in China, was announced as next in order.

Mr. BRYAN. Let that bill go over.

Mr. OLIVER. Mr. President, I move that the Senate proceed to the consideration of that bill, notwithstanding the objection.

Mr. PENROSE. I second the motion.

Mr. SMOOT. That can not be done. We are operating under a unanimous-consent agreement.

Mr. SMITH of Georgia. We are proceeding under a unanimous-consent agreement.

The VICE PRESIDENT. Unanimous consent was given to proceed to the consideration of unobjected bills on the calendar, and the Chair holds the motion of the Senator from Pennsylvania out of order.

Mr. GALLINGER. Mr. President, before that bill is finally disposed of I will ask if my impression is correct that, according to statements in the newspapers, that bill was included in the program of the majority as one of the measures to be acted upon at this session?

Mr. SMITH of Georgia. We decline to discuss that at present. The Senator is out of order. We are proceeding under a unanimous-consent agreement.

Mr. GALLINGER. The Senator is not out of order in asking a civil question.

Mr. SMITH of Georgia. I did not mean to be discourteous to the Senator from New Hampshire.

Mr. GALLINGER. But the Senator was discourteous.

Mr. SMITH of Georgia. And if he feels that I was I withdraw the statement——

Mr. GALLINGER. I am very glad the Senator does.

Mr. SMITH of Georgia. Because I would not under any circumstances be discourteous to him.

Mr. GALLINGER. I have nothing further to say about it at all.

Mr. SMITH of Georgia. I do not think we ought to stop to discuss the measure at this time.

Mr. PENROSE. Mr. President, does the Senator from Georgia expect that this bill will lead to any debate? Is there any opposition to it?

Mr. SMITH of Georgia. Oh, undoubtedly. I have vigorously opposed it on the floor of the Senate, and others will.

Mr. PENROSE. I was not informed of that fact.

Mr. SMITH of Georgia. Oh, unquestionably; yes. It will take up considerable time, and that is why it is impossible for us to consider it now.

Mr. PENROSE. I earnestly hope that an opportunity will be afforded at an early date for the debate and consideration of the measure.

Mr. SMITH of Georgia. I earnestly hope that we will be able to defeat the bill when it comes to be voted on.

Mr. ROBINSON. Mr. President, I realize that discussion of this bill is not in order under the objection which has been made, but I merely desire to express the hope that the bill may be considered at a very early date and passed.

The VICE PRESIDENT. The bill will be passed over.

BUFFALO RIVER ZINC MINING CO.

The bill (S. 2530) for the relief of the Buffalo River Zinc Mining Co. was considered as in Committee of the Whole.

The bill has been reported from the Committee on Claims with an amendment, on page 2, after line 1, to insert:

Provided, That the Secretary of the Interior shall first make an investigation of all the facts concerning said claim, and shall be satisfied of its justness and of the good faith of the said company and its officers, and that the acts of the agent of the company by reason of which the said patents were canceled were done wholly without the knowledge or consent of said company or of any of its officers, and shall certify these facts to the Secretary of the Treasury. The expense, however, of said investigation, if any, shall be deducted from the amount found to be due said company.

So as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the Treasury not otherwise appropriated, to the Buffalo River Zinc Mining Co., a corporation of St Louis, Mo., the sum of $4,200, being the amount of money paid by the said company to the United States of America, on or about the 21st day of July, 1904, as the purchase price of certain public lands in Searcy County, Ark., the patents to which have since been canceled at the suit of the United States of America, and the said lands having been restored to the public domain: *Provided*, That

the Secretary of the Interior shall first make an investigation of all the facts concerning said claim, and shall be satisfied of its justness and of the good faith of the said company and its officers, and that the acts of the agent of the company by reason of which the said patents were canceled were done wholly without the knowledge or consent of said company or of any of its officers, and shall certify these facts to the Secretary of the Treasury. The expense, however, of said investigation, if any, shall be deducted from the amount found to be due said company.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 4086) to provide for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States was announced as next in order.

Mr. SMOOT. That bill will lead to discussion. I ask that it may go over.

Mr. FLETCHER. The Senator from Louisiana [Mr. RANSDELL] had to be absent at this time, but requested me to ask to have the bill considered. The same bill has passed the House.

Mr. SMOOT. It can not be considered this morning by unanimous consent.

The VICE PRESIDENT. The bill will be passed over.

BARKENTINE "MABEL I. MEYERS."

The bill (S. 3270) for the relief of the owners of the barkentine *Mabel I. Meyers* and her master and crew, and for the relief of the owners of cargo of molasses late on board said barkentine, was announced as next in order.

Mr. WEEKS. I ask unanimous consent that House bill 11125 be substituted for that bill. They are for the same purpose, but differ in that the House bill has, on line 9 of the Senate bill, omitted the words "including interest" and the whole of section 2. Otherwise, with the exception of the amendment in the Senate bill, they are the same.

Mr. CLARK of Wyoming. Is the House bill on the calendar?

Mr. WEEKS. I understand it is.

Mr. SMOOT. Does the House bill provide that interest shall be paid?

Mr. WEEKS. The House bill eliminates the provision for the payment of interest.

The VICE PRESIDENT. The Chair will ask the Senator from Massachusetts whether the House bill is on the calendar?

Mr. WEEKS. I have not found it, but I think it is. It has passed the House.

Mr. GRONNA. Mr. President——

Mr. WEEKS. I ask that it be passed over temporarily, Mr. President.

The VICE PRESIDENT. The bill will be passed over temporarily.

BILLS PASSED OVER.

The bill (S. 392) to create in the War Department and the Navy Department, respectively, a roll designated as the "Civil War volunteer officers' retired list," to authorize placing thereon with retired pay certain surviving officers who served in the Army, Navy, or Marine Corps of the United States in the Civil War, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

Mr. GALLINGER. I am very sorry that that goes over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 3526) to amend an act entitled "An act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or cocoa leaves, their salts, derivatives, or preparations, and for other purposes," was announced as next in order.

Mr. ROBINSON. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 4971) to authorize the designation and withdrawal of water-power sites and the construction of water-power and other plants by the United States for the manufacture of nitrates, and for other purposes, was announced as next in order.

Mr. GALLINGER. Let that go over.

Mr. SMITH of South Carolina. Mr. President, that is a bill which I introduced. As it has been incorporated in another bill, passed and signed, I move the indefinite postponement of this bill.

The VICE PRESIDENT. Is there any objection to the indefinite postponement of the bill? The Chair hears none, and it is indefinitely postponed.

The bill (H. R. 406) to authorize exploration for and disposition of coal, phosphate, oil, gas, potassium, or sodium was announced as next in order.

Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (H. R. 10384) to regulate the immigration of aliens to, and the residence of aliens in, the United States was announced as next in order.

Mr. WALSH. Let that go over.

Mr. GALLINGER. Mr. President, was objection made to the consideration of this bill—the immigration bill?

The VICE PRESIDENT. The Senator from Montana [Mr. WALSH] objected to its consideration. The bill will be passed over.

STOCK-RAISING HOMESTEADS.

The bill (H. R. 407) to provide for stock-raising homesteads, and for other purposes, was announced as next in order.

Mr. WILLIAMS. Let that go over.

Mr. STERLING. Mr. President, do I understand that there is objection to the consideration of House bill 407?

The VICE PRESIDENT. There is.

Mr. STERLING. I hope the Senator who interposed the objection to the present consideration of that bill will not insist upon the objection. This is a House bill. It passed the House on January 18 last, more than six months ago. It is a very important bill, and it seems to me——

Mr. SMOOT. I ask if objection was made?

The VICE PRESIDENT. Objection was made.

Mr. SMOOT. Then I ask for the regular order.

The VICE PRESIDENT. The Senator from Utah calls for the regular order.

Mr. WILLIAMS. What is meant by "stock-raising homesteads"?

The VICE PRESIDENT. The regular order has been called for. The bill will be passed over.

RELIEF OF MAIL CONTRACTORS.

The bill (S. 5206) for the relief of mail contractor was announced as next in order.

Mr. SMOOT. Let that go over.

Mr. ROBINSON. Mr. President, just one moment. Will the Senator withhold his objection until I can make just a brief statement?

Mr. SMOOT. Does the Senator mean as to the object of the bill?

Mr. ROBINSON. No. It will take only a moment.

It was my intention, if no objection had been made to the consideration of this bill, to ask for the substitution of a similar or identical bill, which has already passed the House. I merely want to say that these bills embrace a great many claims for carrying the mails during a certain period, which have all been audited and found correct, and which ought to be paid all at once. The bill ought to be considered and passed. It merely heaps consideration of a multiplicity of details upon the committees having jurisdiction of these bills. Since they have been audited and embraced in an omnibus bill, I think the Senator, if he can find it consistent to do so, ought to withdraw his objection and let it pass.

Mr. SMOOT. I ask that it go over for to-day, and I will look it up.

The VICE PRESIDENT. The bill will be passed over.

PENSIONS AND INCREASE OF PENSIONS.

The bill (H. R. 12194) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, was considered as in Committee of the Whole.

The VICE PRESIDENT. This bill has been heretofore considered and the first amendment agreed to. The Secretary will state the next amendment.

The next amendment was, on page 2, to strike out lines 15, 16, and 17, in the following words:

The name of Martin W. Ryan, late of Company D, Seventeenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

Mr. POMERENE. Mr. President, this matter was up for consideration once before, and I moved at that time to disagree to this amendment. I now renew that motion, and if I may I will make a very brief statement in regard to it.

The facts are these: This man served during the Spanish War from June 20 to October 26, 1898. Later he reenlisted and served in the Philippines from December 12, 1898, to September 17, 1901, having nearly three and a half years of service to his credit. While in the service he became sick, a portion of the time while he was in the Philippines, and later he made

application for a pension. It was denied him because the medical examiner reported that the history of the case showed that he had some stomach difficulty prior to his first enlistment. He had passed two medical examinations, and was received into the service, and rendered nearly three and a half years of valuable service to his country, and now he is denied relief because the trouble antedated the day of his enlistment.

I may say further that I think the medical examiner misunderstood this testimony. In answer to some questions which were asked him the claimant stated that occasionally when he had been drinking as a very young man he would vomit, and from that slender testimony they concluded that he had this serious trouble before his enlistment.

Mr. GALLINGER. Mr. President, is that the only ground upon which this item has been stricken out?

Mr. POMERENE. I am very glad the Senator has asked that question, because of what appears in the record. There was some other trouble stated in the record. Later there was another examination, and that record was corrected, the medical authorities of the Government saying that there was no foundation for the first report that was made. I had in my possession a letter from The Adjutant General on that subject, which I turned over to the committee, and do not have it with me now.

Mr. GALLINGER. The fact that this man was accepted by the medical officers of the Government, and served three years and a half, ought to be sufficient reason for his being pensioned, it seems to me.

Mr. POMERENE. I think so; and I may add just a word further—that he is in such physical condition now that he is not able to work, and half of the time he can not retain food upon his stomach.

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

Mr. JOHNSON of Maine. Mr. President, I wish to say just one word about the motion of the Senator from Ohio. In this case action was taken by the Senate Committee on Pensions as reported because of the fact that the claimant himself admitted, upon examination, that when he entered the service of the United States he had the disease for which he now claims pension. That is the report that came to the Committee on Pensions, and for that reason we recommended that the item be stricken out.

Mr. GALLINGER. Mr. President, if the Senator from Maine will permit me, is it not to this man's credit, even if he had some previous ailment, that he enlisted and served three years, admitting that he had some kind of illness?

Mr. JOHNSON of Maine. Yes; but, Mr. President, I call the attention of the Senator from New Hampshire to the difference between the law relating to Spanish War cases and the law with regard to Civil War cases. It is necessary to show, in the case of Spanish War claims, that the soldier suffers from an injury received or disease contracted in the service, while under the Civil War pension act he is entitled to a pension simply for service.

In this case the claim was made that the claimant is entitled to a pension because of disease of the stomach, and it was stated by him that he had this disease when he entered the service. That is the reason for the action taken by the committee.

Mr. POMERENE. Mr. President, may I ask the Senator whether he has the exact statement which this soldier made at that time?

Mr. JOHNSON of Maine. Yes.

Mr. POMERENE. I have a statement from the soldier himself.

Mr. CLARK of Wyoming. What difference does it make?

Mr. GALLINGER. Mr. President, inasmuch as we are pensioning soldiers who did not serve 90 days, and this man served three years and a half, I think we ought to throw aside technicalities.

Mr. POMERENE. The Senator from New Hampshire exactly expresses my idea on this subject.

Mr. CLARK of Wyoming. I suppose that if this man's medical record were perfect he could secure a pension through the Pension Office without coming here, could he not?

Mr. POMERENE. That is true.

Mr. CLARK of Wyoming. The very fact that he is unable to secure a pension, notwithstanding his meritorious service, is the reason why he appears before Congress for a special act.

Mr. JOHNSON of Maine. The Senator from Wyoming is quite correct in his statement, of course.

Mr. POMERENE. I may say that the House reported this matter favorably and passed the bill, and the Senate committee objected simply because of this technicality. I wish to add that I have not seen a case which appealed to me more than this. If this soldier, after nearly three and a half years' service, is to be turned down because of a technicality, a great injustice will be done. After the medical advisers of the Government twice examined him and he was twice received into the service and then to turn him down because of, perhaps, an incipient trouble, which the doctors did not discover, it would be violative of every principle of equity for the Government to deny him relief. The medical officer who recently made an adverse report is at fault in misconstruing a statement made by this soldier.

Mr. BRYAN. Mr. President, I should like to ask the Senator from Ohio where is the amendment to which he objects?

Mr. POMERENE. It is on the second page, lines 15, 16, and 17.

Mr. BRYAN. In what war was it that this soldier served three and a half years?

Mr. POMERENE. He served during the Spanish-American War from June 20 to October 26, 1898. He then reenlisted and served in the Philippines in Company D, Seventeenth United States Infantry, from December 12, 1898, to September 17, 1901, when he was transferred to Company F, Twenty-third United States Infantry, from which he was honorably discharged on December 11, 1901.

Mr. BRYAN. The war was over when he reenlisted.

Mr. POMERENE. Which war?

Mr. BRYAN. The Spanish-American War, when he enlisted the second time.

Mr. POMERENE. When he enlisted the second time; yes. But not when he enlisted the first time.

Mr. BRYAN. He could not have served three and a half years while the war was going on.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. SMITH of Georgia. Mr. President, was this the amendment of the committee that was rejected?

The VICE PRESIDENT. Yes; it was.

Mr. SMITH of Georgia. I thought it was the amendment of the Senator from Ohio that I voted against.

The next amendment was, on page 3, after line 5, to strike out:

The name of Samuel P. Kahler, late of Company E, First Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 3, line 17, before the name "Goddard," to strike out "Marcellus" and insert "Marcellous," so as to make the clause read:

The name of Ella M. Goddard, widow of Marcellous Goddard, late of Troop I, Eighth Regiment United States Cavalry, Regular Establishment, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 5, after line 15, to strike out:

The name of John P. Bloodworth, late of Company D, Third Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 6, line 20, after the word "company," to strike out "in the," so as to make the clause read:

The name of Martha J. Hovey, widow of Horace W. Hovey, late of Capt. Jones's company, Twelfth Regiment United States Infantry, War with Mexico, and pay her a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 6, line 24, after the word "Regiment," to insert "United States," so as to make the clause read:

The name of Aurora Griffith, widow of Frederick D. Griffith, late of Troop A, Fifth Regiment United States Cavalry, War with Spain, and pay her a pension at the rate of $12 per month and $2 per month additional on account of each of the five minor children of the said Frederick D. Griffith until they reach the age of 16 years.

The amendment was agreed to.

The next amendment was, on page 8, line 17, before the word "Infantry," to insert "Volunteer," so as to make the clause read:

The name of Benjamin F. Barden, late of Company G, First Regiment Georgia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 8, after line 18, to strike out:

The name of Otto H. Staron, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 9, after line 11, to strike out:

The name of Robert H. Beckham, late captain and commissary of subsistence United States Volunteers, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 10, line 3, after the words "widow of," to strike out "Laurence" and insert "Lawrence," so as to make the clause read:

The name of Grace P. McCarty, widow of Lawrence F. McCarty, late of Company I, Thirty-eighth Regiment United States Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 10, line 11, after the words "account of," to insert "each of," so as to make the clause read:

The name of Martha E. Brabson, widow of Charles H. Brabson, late of Company B, Fourth Regiment United States Artillery, War with Spain, and pay her a pension at the rate of $12 per month, and $2 per month additional on account of each of the three minor children of the said Charles H. Brabson, until they reach the age of 16 years.

The amendment was agreed to.

The next amendment was, on page 11, line 7, after the name "Cooke," to strike out "who served in" and insert "late of," so as to make the clause read:

The name of William H. Cooke, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 12, after line 5, to strike out:

The name of Abraham H. Martin, late of Company A, Thirty-fifth Regiment Michigan Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

STOCK-RAISING HOMESTEADS.

Mr. WILLIAMS. A moment ago I objected to the consideration of the bill (H. R. 407) to provide for stock-raising homesteads, and for other purposes. Since that time I have read the bill and I find that I was resting under a misapprehension as to its character. I withdraw the objection and request unanimous consent to recur to it.

The VICE PRESIDENT. Is there objection? The Chair hears none.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with amendments.

The first amendment was, on page 3, in lines 8 and 9, to strike out the words "subject to the requirements of law as to residence and improvements."

The amendment was agreed to.

The next amendment was, at the end of line 10, page 3, after the word "acres," to insert the following proviso:

Provided further, That the entryman shall be required to enter all contiguous areas open to entry prior to the entry of any noncontiguous land.

The amendment was agreed to.

The next amendment was, after the word "of," on page 3, line 14, to insert "residence and," and in line 16 after the word "the," to insert "additional," so as to read:

Provided further, That instead of residence and cultivation as required by the homestead laws the entryman shall be required to make permanent improvements upon the additional land entered before final proof is submitted tending to increase the value of the same for stock-raising purposes, of the value of not less than $1.25 per acre, and at least one-half of such improvements shall be placed upon the land within three years after the date of entry thereof.

The amendment was agreed to.

The next amendment was, in section 4, page 3, line 22, after the word "entryman," to strike out the words "of lands of the character herein described," so as to read:

SEC. 4. That any homestead entryman who has not submitted final proof upon his existing entry, shall have the right to enter, subject to the provisions of this act, such amount of contiguous lands designated for entry under the provisions of this act as shall.

Mr. STERLING. As to the amendment last read, striking out the words "of lands of the character herein described," I ask that it be not agreed to.

Mr. SMOOT. If there is going to be any change in the bill as it was reported from the committee it is going to lead to discussion, and I must object to its consideration.

Mr. STERLING. Very well, I will withdraw the request.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. BORAH. Are we proceeding with the consideration of unobjected bills?

The VICE PRESIDENT. We are.

Mr. BORAH. I shall have to object to this bill.

Mr. SHAFROTH. I hope the Senator will not do that.

Mr. GALLINGER. Regular order!

Mr. SHAFROTH. This bill has been on the calendar for a long time, and a great many people in the West are interested in it.

The VICE PRESIDENT. The regular order has been called for.

Mr. BORAH. Mr. President, may I say just a word? We have no time to discuss the bill under this order, and that is the reason why I objected. If you will take it up and give us an opportunity to make some amendments and deal with the bill, I have no disposition to prevent its passage.

Mr. SHAFROTH. Mr. President——

Mr. OVERMAN. Regular order!

The VICE PRESIDENT. The regular order is called for, and the bill goes over.

CHILD LABOR.

The bill (H. R. 8234) to prevent interstate commerce in the products of child labor, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

The VICE PRESIDENT. The bill will go over.

The SECRETARY. Order of Business 353——

Mr. SUTHERLAND. What became of House bill 8234?

The VICE PRESIDENT. It went over.

Mr. SUTHERLAND. Was that objected to?

The VICE PRESIDENT. The Senator from North Carolina [Mr. OVERMAN] objected to it.

Mr. SUTHERLAND. I am sorry that objection should be made to that bill.

Mr. OVERMAN. I objected.

Mr. SUTHERLAND. I understand that both the great political parties have declared in favor of it.

Mr. OVERMAN. Mr. President, the regular order.

Mr. NORRIS. May I ask the Senator if it is the intention of the majority to pass this bill at the present session?

Mr. SUTHERLAND. I do not know whether it is the intention or not.

Mr. WILLIAMS. The regular order!

Mr. ROBINSON. I desire to express the hope that this bill may receive consideration.

Mr. OVERMAN. Regular order!

The VICE PRESIDENT. The Chair desires to express the hope that either the unanimous-consent agreement shall be lived up to or be set aside. Otherwise it is a waste of time. The next bill on the calendar will be announced.

CONVICT-MADE GOODS.

The bill (S. 4060) to limit the effect of the regulation of interstate commerce between the States in goods, wares, and merchandise wholly or in part manufactured, mined, or produced by convict labor or in any prison or reformatory was announced as next in order.

Mr. WILLIAMS. Let that go over.

The VICE PRESIDENT. The bill will go over.

PENSIONS AND INCREASE OF PENSIONS.

The bill (H. R. 13620) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors was considered as in Committee of the Whole. The bill had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 1, after line 9, to strike out:

The name of Florence B. Eckert, widow of David Eckert, late of Company I, Sixteenth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 2, line 14, before the words "late of," to strike out the name "Minnich" and insert "Minnick," so as to make the clause read:

The name of William F. Minnick, late of Company K, Eighteenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 4, after line 5, to strike out:

The name of Thomas W. Oastler, dependent father of Paul R. Oastler, late of United States Navy, Regular Establishment, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 5, line 6, before the word "assistant," to insert "late," and in line 8, before the words "per month," to strike out "$24" and insert "$30," so as to make the clause read:

The name of Elizabeth O. Sawyer, widow of General James E. Sawyer, late assistant quartermaster general with rank of colonel, United States Army, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 5, after line 17, to strike out:

The name of George Zederbaum, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was on page 6, after line 3, to strike out:

The name of Nellie L. Wilson, widow of George M. Wilson, late of Company F, Ninth Regiment Illinois Volunteer Infantry, War with Spain, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving, and $2 per month additional on account of the minor child of the said George M. Wilson until he reaches the age of 16 years.

Mr. SMOOT. Mr. President, I wish to call the attention of the Senator having the bill in charge to a letter I have received from Representative DENISON in relation to Nellie L. Wilson, an individual whom this Congressman personally knows. He says since the report was made of her condition Mrs. Wilson has become wholly disabled by a stroke of paralysis which has permanently paralyzed one side of her body, and she is otherwise permanently disabled by chronic rheumatism to such an extent that she is unable to perform any work, and most of the time can not even comb her hair and dress herself.

I will say that I agreed that this item should be stricken out upon the testimony which was before the committee, but in this letter the Congressman tells me that he is personally acquainted with Mrs. Wilson and knows this statement to be true. If it is true we ought not to agree to the amendment of the committee.

Mr. JOHNSON of Maine. I have not just in mind the particular case. Will the Senator call my attention to the action of the Senate committee?

Mr. SMOOT. It is the amendment striking out the name of Nellie L. Wilson on page 6, widow of George M. Wilson, late of Company F, Ninth Regiment Illinois Volunteers, War with Spain. The House gave her a pension at the rate of $20 per month. We struck that out.

Mr. JOHNSON of Maine. She was restored to $12.

Mr. SMOOT. She was restored to $12 on the testimony that was before the committee, and I agreed that it should be stricken out. As I said, I have a letter from Congressman DENISON giving the facts I have just stated, and if those facts be true, then she is entitled to a pension of $20 a month, and we ought to disagree to the amendment.

Mr. JAMES. Let her have the increased pension.

Mr. JOHNSON of Maine. I have no objection to rejecting the amendment.

The amendment was rejected.

The next amendment was, at the top of page 7, to strike out:

The name of Martin V. Stanton, late of Company I, Twenty-first Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 7, after line 8, to strike out:

The name of Samuel Armistead, late of Company G, Ninth Regiment New York Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 9, after line 14, to strike out:

The name of Louis S. Harris, late of Battery A, Third United States Artillery, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 10, after line 6, to strike out:

The name of Anna J. Meilstrup, dependent mother of Elmer M. Meilstrup, late of the United States steamship *Maine*, United States Navy, Regular Establishment, and pay her a pension at the rate of $12 per month.

Mr. SMOOT. Representative LOUD wrote me, July 14, 1916, in relation to the pension for Anna J. Meilstrup, the dependent mother of Elmer M. Meilstrup. The Senate committee struck out the item upon the ground that the mother at the time of the death of her son was certainly not a dependent upon the son, and which I thought was perfectly right. Congressman LOUD sends me the following affidavit from Anna J. Meilstrup, sworn before a notary public May 25, 1916. She says:

Anna Meilstrup, of Grayling, Mich., being duly sworn, deposes and says that she has three sons, Spencer, age 26, married, now living at Lansing, Mich.; Ambrose, age 24, married, Bay City, Mich.; and Carleton, age 17, living with her at home. Deponent further says that her said sons, Spencer and Ambrose, earn barely enough to support themselves and family, and that she receives no support from them whatever, and that Carleton is a junior, in high school, and is dependent upon deponent for his support, as is also her daughter, Cornelia, who is living at home with her.

That the land at Turner was sold five years ago, and the proceeds from the sale thereof has been her only means of support since that time, and that this money is now practically gone; that she still owns her house and lot in the village of Grayling, but that the same is in need of repairs, and the tax rate and the cost of living in said village is high. That she has had a great deal of sickness in her family, and has expended for medical attendance during the past year approximately $567. That dependent has been in delicate health for some time, and still is, and during the past year she has been under the doctor's care for a period of seven months, and was in the hospital for five weeks in a serious condition. And further deponent saith not.

ANNA J. MEILSTRUP.

Subscribed and sworn to before me this 17th day of March, 1916.

[SEAL.] GLEN SMITH,
Notary Public, Crawford County, Mich.

My commission expires May 25, 1918.

I simply present it to the Senate now, as I promised Congressman LOUD I would do, and it is for the Senate to say whether it wants to disagree to the amendment or not.

Mr. JOHNSON of Maine. Will the Senator from Utah state the amount of property which the dependent mother owns?

Mr. SMOOT. In the affidavit?

Mr. JOHNSON of Maine. In the report which came to us, if the Senator has it before him.

Mr. SMOOT. I have not the report in my file; but it was the sale of a farm, as I remember, for about $2,500. She refers to that in this affidavit, saying there was but little of that money left, and she is now dependent upon what little is left. I suppose it must be only a few hundred dollars from the testimony. I told Congressman LOUD I would present the case to the Senate, and if the Senate felt like disagreeing to the amendment and allowing the mother to receive the pension, well and good.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

UNSURVEYED ISLANDS IN MINNESOTA.

The bill (S. 4287) to grant unsurveyed islands to the State of Minnesota for forestry purposes was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands with amendment, on page 1, line 3, after the first word "That," to insert "the Secretary of the Interior is hereby authorized to cause to be surveyed"; in line 7, before the word "Indian," strike out the word "or," and, after the word "Indian," in the same line, to insert "or any other"; in the same line, after the word "reservation," to insert "or lands to be sold for the benefit of Indians"; in line 11, after the word "granted," to insert the words "to the State," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to cause to be surveyed the unsurveyed islands in lakes and streams north of the forty-sixth degree of latitude, in the State of Minnesota which are not included in any national forest, Indian, or any other reservation, or lands to be sold for the benefit of Indians and the title to which is in the United States, be, and the same are hereby, granted to the State of Minnesota as additions to the State forests of said State. The islands hereby granted to the State shall be used as additions to State forests only; and should the State of Minnesota abandon the use of said islands for such purpose, the same shall revert to the United States.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BLACKFEET INDIAN RESERVATION LANDS.

The bill (S. 793) modifying and amending the act providing for the disposal of the surplus unallotted lands within the Blackfeet Indian Reservation was announced as next in order.

Mr. SMOOT. I wish to ask the Senator from Montana a question in relation to the bill before deciding as to whether I shall object to its consideration. There was a delegation of Blackfeet Indians here in Washington for a month. They called at my home several times in relation to this matter. I understood from them that they were trying to get both factions together, and they objected strenuously to the bill as it was originally presented. I ask the Senator if the amendment that is offered by the committee has been agreed to by both factions.

Mr. WALSH. By all parties.

Mr. SMOOT. Then I have no objection.

There being no objection, the bill was considered as in Committee of the Whole, which had been reported from the Committee on Indian Affairs with an amendment, to strike out all after the enacting clause and insert:

That so much of the Indian appropriation act of March 1, 1907 (34 Stat. L., pp. 1015 and 1035), as relates to the disposal of the surplus unallotted lands within the Blackfeet Indian Reservation in Montana is hereby modified and amended so as to authorize the disposal, in the manner provided for in that act, of the surplus unallotted lands only within the reservation which lie east of the range line between ranges 7 and 8 west: *Provided*, That the Secretary of the Interior may make allotments under existing laws within the diminished reservation to any living children of said Blackfeet Tribe who have not heretofore been allotted, so long as any unallotted tribal or reservation lands shall remain undisposed of: *Provided further*, That nothing herein shall be construed to repeal the grants of land made by the act of March 1, 1907, to religious institutions and to the State of Montana for school purposes nor repeal the authority of the Secretary of the Interior to dispose of any lands within said reservation suitable for town-site purposes as provided by that act: *And provided further*, That the State of Montana, in making indemnity school selections, shall be confined to the surplus nonirrigable lands within the territory subject to disposition under this act.

SEC. 2. That the provision of the act of March 1, 1907, which requires a division of the funds received from the sale of the surplus lands immediately upon the date of the approval of the allotments of land, is hereby repealed, and there is hereby appropriated, out of any money in th Treasury not otherwise appropriated, the sum of $750,000, to be immediately available and remain available until expended, which sum may be expended by the Secretary of the Interior for the purchase of stock cattle, to be administered for the benefit of the Blackfeet Indians as a tribal herd or distributed to them per capita, in the discretion of the Secretary of the Interior, for agricultural equipment, building, rebuilding, repairing, and furnishing Indian homes, digging wells in connection therewith, and for other purposes conducive to the advancement of the Indians toward civilization and self-support: *Provided*, That the pro rata shares of old and indigent Indians, of the sum of $750,000, herein appropriated, may be paid to them in cash or expended for their benefit if deemed for their best interests by the Secretary of the Interior: *Provided further*, That the sum hereby appropriated shall be reimbursed to the United States from the proceeds, when received, from the sale of surplus lands within the Blackfeet Indian Reservation: *And provided further*, That the balance of the proceeds, when received, from the sale of surplus lands over and above the amount required to reimburse the United States for the sum herein appropriated may be expended in the same manner and for like purposes in the discretion of the Secretary of the Interior.

SEC ?. That the lands within said reservation, whether allotted, unallotted, reserved, set aside for town-site purposes, granted to the State of Montana for school purposes, or otherwise disposed of, shall be subject to all the laws of the United States prohibiting the introduction of intoxicants into the Indian country until otherwise provided by Congress.

SEC. 4. That any and all minerals, including coal, oil, and gas, in the lands hereby opened are reserved for the benefit of the Indians of said reservation: *Provided*, That the allotments heretofore or which may hereafter be made of lands classified as coal or valuable for coal or other minerals shall proceed to patent, which patent shall contain a reservation of the coal, oil, or gas, or other mineral deposits for the benefit of the said tribe.

SEC. 5. That the Secretary of the Interior be, and he is hereby, authorized and directed to announce, at such time as in his opinion seems proper, the charge for construction of the irrigation system on the Blackfeet Indian Reservation in Montana, which shall be made against each acre of land irrigable by the system on said reservation. Such charges shall be assessed against the land irrigable by the system on said reservation in the proportion of the total construction cost which each acre of such land bears to the whole area of irrigable land thereunder.

On the 1st day of December after the announcement by the Secretary of the Interior of the construction charge the allottee, entryman, purchaser, or owner of such irrigable land which might have been furnished water for irrigation during the whole of the preceding irrigation season, from ditches actually constructed, shall pay to the superintendent of the reservation where the land is located, for deposit to the credit of the United States as a reimbursement of the appropriations made or to be made for construction of said irrigation system, 5 per cent of the construction charge fixed for his land as an initial installment, and shall pay the balance of the charge in 15 annual installments, the first 5 of which shall each be 5 per cent of the construction charge, and the remainder shall each be 7 per cent of the construction charge. The first of the annual installments shall become due and payable on December 1 of the fifth calendar year after the initial installment: *Provided*, That any allottee, entryman, purchaser, or owner may, if he so elects, pay the whole or any part of the construction charges within any shorter period: *Provided further*, That the Secretary of the Interior may, in his discretion, grant such extension of the time for payments herein required from Indian allottees or their heirs as he may determine proper and necessary, so long as such land remains in Indian title.

That the tribal funds heretofore covered into the Treasury of the United States in partial reimbursement of appropriations made for constructing the irrigation system on said reservation shall be placed to the credit of the tribe and be available for such expenditure for the benefit of the tribe as may be made under existing law.

The cost of constructing the irrigation system to irrigate allotted lands of the Indians on said reservation shall be reimbursed to the United States as hereinbefore provided, and no further reimbursements from the tribal funds shall be made on account of said irrigation works, except that all charges against Indian allottees or their heirs herein authorized unless otherwise paid, may be paid from the individual shares in the tribal funds, when the same is available for distribution, in the discretion of the Secretary of the Interior.

That in addition to the construction charges every allottee, entryman, purchaser, or owner shall pay to the superintendent of the reservation a maintenance and operation charge, based upon the total cost of maintenance and operation of the system on the said reservation, and the Secretary of the Interior is hereby authorized to fix such maintenance and operation charge upon such basis as shall be equitable to the owners of the irrigable land. Such charges, when collected, shall be available for expenditure in the maintenance and operation of the system on the said reservation: *Provided*, That the delivery of water to any tract of land may be refused on account of nonpayment of any charges herein authorized, and the same may, in the discretion of the Secretary of the Interior, be collected by a suit for money owed: *Provided further*, That the rights of the United States heretofore acquired to water for Indian lands referred to in the foregoing provision, namely, the Blackfeet Reservation land, shall be continued in full force and effect until the Indian title to such land is extinguished.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RETIRED NAVAL PETTY OFFICERS AND ENLISTED MEN.

The bill (S. 833) to provide that petty officers, noncommissioned officers, and enlisted men of the United States Navy and Marine Corps on the retired list who had creditable Civil War service shall receive the rank or rating and the pay of the next higher enlisted grade was announced as next in order.

Mr. BRYAN. Let that go over.

The VICE PRESIDENT. The bill will go over.

ELWIN CARLTON TAYLOR.

The bill (S. 1807) to reinstate Elwin Carlton Taylor as a passed assistant surgeon in the United States Navy was considered as in Committee of the Whole. It authorizes the President of the United States, in his discretion, to appoint Acting Asst. Surg. Elwin Carlton Taylor, United States Navy, to the grade of passed assistant surgeon, United States Navy, as an additional number, to rank next after the fifty-ninth officer in lineal standing on the list of passed assistant surgeons, and that no back pay or allowances shall accrue as a result of the passage of this act; but the said Elwin Carlton Taylor shall be required to satisfactorily pass the usual examinations required by law to determine his physical, mental, moral, and professional fitness to perform the duties of the grade to which he is to be appointed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS POSTPONED INDEFINITELY.

The bill (S. 4054) to reorganize and increase the efficiency of the personnel of the Hospital Corps of the United States Navy, and for other purposes, was announced as next in order.

Mr. TILLMAN. This and the next bill, the bill (S. 3521) to establish a United States Naval Reserve, have already been provided for in the naval appropriation bill. I move that the bills be indefinitely postponed.

The motion was agreed to.

FORT PECK INDIAN RESERVATION.

The bill (S. 4761) providing for the classification, appraisal, and disposal of certain lands within the former Fort Peck Indian Reservation, Mont., was considered as in Committee of the Whole.

Mr. TOWNSEND. Is there coal on this land?

Mr. WALSH. There is coal on the reservation. Under the act opening it, passed in 1908, that land can not be appropriated by homesteaders. In 1910 Congress passed a general law allowing homestead entries to be made on coal land, the coal to be reserved to the Government; but that act can not be made applicable to the Fort Peck Reservation, it being applicable only to public lands.

This bill is intended to make the general act of 1910 applicable to lands on the Fort Peck Reservation, and it provides that the lands shall be open to homestead entry and that the coal in the lands shall be reserved and the coal disposed of for the benefit of the Indians.

Mr. CLARK of Wyoming. Mr. President, I wish to ask the Senator from Montana one question. I ask the Senator whether it has been definitely determined by proper legal authority as to whether or not lands in a condition such as is described in the bill are public lands or Indian lands.

Mr. WALSH. I am of the impression that it is held that these are not public lands, that they are open to disposition only under the special act of 1908, and thus would not fall under the operation of the general statute applicable to public lands.

Mr. CLARK of Wyoming. I was very anxious to get the Senator's opinion, because I take it it is a legal opinion. There have been a variety of holdings in the Department of the Interior as to the exact status of land upon ceded portions of Indian reservations. They have found sometimes when they have been applied for as public lands that they were held to be Indian lands and when they have been thought to be leased from the Indians they have been held to be public lands.

I am glad to get the statement of the Senator that in his opinion these are undoubtedly public lands.

Mr. SHAFROTH. I should like to ask the Senator from Montana a question. Do I understand that the act applies solely to Indian lands in the State of Montana?

Mr. WALSH. To lands in the Fort Peck Reservation only.

Mr. SHAFROTH. Very well.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COMMITTEE ON FISHERIES.

The next business on the calendar was Senate resolution 119, authorizing the Committee on Fisheries to employ a stenographer to report its hearings held before the committee.

Mr. OVERMAN. Let that go over.

The VICE PRESIDENT. The resolution will go over.

PUBLIC HEALTH SERVICE.

The bill (S. 2215) to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service was announced as next in order.

Mr. WORKS. Let that go over.

The VICE PRESIDENT. The bill will go over.

PENSIONS AND INCREASE OF PENSIONS.

The bill (S. 5914) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors was considered as in Committee of the Whole.

It proposes to pension the following persons at the rates stated:

William Bell, late of Company A, Twenty-fourth Regiment United States Infantry, War with Spain, $24 per month.

Michael Lacey, late of Company L, Third Battalion Engineers, United States Army, War with Spain, $12 per month.

Margaret Rowsell, widow of George Rowsell, late of Company D, Fourth Regiment United States Infantry, Regular Establishment, $20 per month in lieu of that she is now receiving.

Odelon Valcour, late of Seventy-eighth Company, United States Coast Artillery Corps, Regular Establishment, $20 per month.

John E. Halaas, late of Company I, Thirty-sixth Regiment United States Volunteer Infantry, War with Spain, $12 per month.

Michael Urell, alias Charles Welsh, late of Company K, Seventeenth Regiment United States Infantry, Regular Establishment, $20 per month.

Thomas F. Lancaster, late of Troop E, Eleventh Regiment United States Volunteer Cavalry, War with Spain, $12 per month.

Adesta L. Kendall, widow of Lucius H. Kendall, late colonel First Regiment Maine Volunteer Infantry, War with Spain, $30 per month.

Wilber Feaster, late of Company C, One hundred and sixty-first Regiment Indiana Volunteer Infantry, War with Spain, $12 per month.

Joseph T. Kling, late of Company G, Second Regiment Kentucky Volunteer Infantry, War with Spain, $20 per month.

Minnie A. Curtis, widow of Lee A. Curtis, late of Battery B, Utah Volunteer Light Artillery, War with Spain, $12 per month.

Thomas E. Sims, late of Company K, Twenty-first Regiment Kansas Volunteer Infantry, War with Spain, $12 per month.

Jennie G. George, widow of Charles P. George, late captain, Sixteenth Regiment United States Infantry, and major, United States Army, retired, Regular Establishment, $35 per month in lieu of that she is now receiving, and $2 per month additional on account of the minor child of said Charles P. George until she reached the age of 16 years.

George A. Wilson, late of Battery C, Utah Volunteer Light Artillery, War with Spain, $24 per month.

Henry Lee, late of Company K, Second Regiment Oregon Volunteer Infantry, War with Spain, $12 per month.

Mary S. Colborn, widow of Robert G. Colborn, late of Company G, Fifteenth Regiment United States Infantry, War with Spain, $12 per month, and $2 per month additional on account of the minor child of said Robert G. Colborn until he reaches the age of 16 years.

Edward Smith, late of Company E, Sixteenth Regiment United States Infantry, War with Spain, $8 per month.

Martha L. Sternberg, widow of George M. Sternberg, late brigadier general and Surgeon General United States Army, Regular Establishment, $50 per month in lieu of that she is now receiving.

Henry Koehler, late of Troop D, Seventh Regiment United States Cavalry, War with Spain, $18 per month.

William R. Claxton, late of Company B, Second Regiment New Jersey Volunteer Infantry, War with Spain, $20 per month.

Dale C. Cook, late of Company C, Fortieth Regiment United States Volunteer Infantry, War with Spain, $20 per month.

Raymond Christian, late of Company B, Nineteenth Regiment United States Infantry, Regular Establishment, $8 per month.

George P. Thompson, late of Company B, First Regiment West Virginia Volunteer Infantry, War with Spain, $8 per month.

Henry Sparman, late of Company G, Second Regiment Louisiana Volunteer Infantry, War with Spain, $12 per month.

Milford W. Oxley, late of U. S. S. *Franklin*, United States Navy, Regular Establishment, $24 per month in lieu of that he is now receiving.

John B. Lucas, late of Battery A, Missouri Volunteer Light Artillery, War with Spain, $12 per month.

Minnie Jeffers, widow of Le Roy Jeffers, late of Company I, First Regiment Tennessee Volunteer Infantry, War with Spain $12 per month and $2 per month additional on account of each of the minor children of said Le Roy Jeffers until they reach the age of 16 years.

Fonetta W. D. Scott, widow of Bernard O. Scott, late commander, United States Navy, Regular Establishment, $30 per month.

John McClintic, late of Company G, One hundred and fifty-ninth Regiment Indiana Volunteer Infantry, War with Spain, $12 per month.

Minnie Kinder, widow of Everett Kinder, late of Company D, Thirty-fifth Regiment United States Volunteer Infantry, and One hundred and third Company, United States Coast Artillery, War with Spain, $12 per month and $2 per month additional on account of each of the minor children of the said Everett Kinder until they reach the age of 16 years.

William Meyers, late of Company M, Twentieth Regiment United States Infantry, War with Spain, $16 per month.

Joseph England, late of Company B, Ninth Regiment Illinois Volunteer Infantry, War with Spain, $12 per month.

George W. Mosier, late of Company C, Second Battalion, Nineteenth Regiment United States Infantry, Regular Establishment, $30 per month in lieu of that he is now receiving.

Reuben Allred, late of Company A, Mormon Battalion, Iowa Volunteers, War with Mexico, $50 per month in lieu of that he is now receiving.

Harry B. Helm, late of Company A, One hundred and fifty-eighth Regiment Indiana Volunteer Infantry, War with Spain, $12 per month.

George Rhode, late of Troop I, Second United States Cavalry, Regular Establishment, $17 per month.

Margaret S. Gemberling, widow of John W. Gemberling, late second lieutenant Company F, One hundred and seventy-second Regiment Pennsylvania Drafted Militia Infantry, and dependent mother of George B. Siegles, late of Company A, Fourth Regiment United States Infantry, War with Spain, $20 per month in lieu of that she is now receiving.

Jennie S. Gilman, widow of Forrest J. Gilman, late of Company M, First Regiment Maine Volunteer Infantry, War with Spain, $12 per month and $2 per month additional on account of each of the minor children of the said Forrest J. Gilman until they reach the age of 16 years.

William A. Bowen, late of Company E, Third Regiment Georgia Volunteer Infantry, War with Spain, $12 per month.

Mary A. C. Kaigler, widow of William Kaigler, late of Company D, First Regiment Georgia Volunteers, War with Mexico, $20 per month in lieu of that she is now receiving.

Willie Hall, late of Company E, Third Regiment Wisconsin Volunteer Infantry, War with Spain, $8 per month.

Thomas Campbell, late of Battery L, First Regiment United States Artillery, Regular Establishment, $12 per month in lieu of that he is now receiving.

Caroline Carr, dependent mother of William H. Carr, Company A, Thirty-third Regiment Michigan Volunteer Infantry; Alvin Carr, Company K, Thirtieth Regiment United States Infantry; and Philo V. Carr, Company K, Thirtieth Regiment United States Volunteer Infantry, War with Spain, $20 per month.

Charles Groves, late of Company D, Seventh Regiment United States Infantry, War with Spain, $24 per month.

Newton H. Reed, late of Company M, Fourth Regiment Wisconsin Volunteer Infantry, War with Spain, $12 per month.

Oliver Bryant, late of Company F, Fifteenth Regiment Minnesota Volunteer Infantry, War with Spain, $12 per month.

Horace A. Gerald, late of Company K, First Regiment Maine Volunteer Infantry, War with Spain, $12 per month.

Sarah J. Lewis, widow of Samuel Lewis, late of Company C, Mormon Battalion, War with Mexico, $20 per month in lieu of that she is now receiving.

Jen Rody Chauncey, late of Company H, Seventeenth Regiment United States Infantry, Regular Establishment, $24 per month in lieu of that he is now receiving.

Charles M. Bradbury, late of Company G, First Regiment Maine Volunteer Infantry, War with Spain, $24 per month in lieu of that he is now receiving.

Robert H. Cowan, late second lieutenant Company K, Second Regiment North Carolina Volunteer Infantry, War with Spain, $40 per month in lieu of that he is now receiving.

Irene Blalock, widow of Vernon D. Blalock, late of Sixth Battery, United States Field Artillery, Regular Establishment, $12 per month and $2 per month additional on account of the minor child of said Vernon D. Blalock until she reaches the age of 16 years.

Joseph W. Carrier, late of Company A, Third Regiment Tennessee Volunteer Infantry, War with Spain, $20 per month in lieu of that he is now receiving.

William B. Hanley, late of Company F, Third Regiment Wisconsin Volunteer Infantry, War with Spain, $12 per month.

Peter F. Weasel, late of Company I, Sixteenth Regiment United States Infantry, Regular Establishment, $10 per month.

Karl S. Newstrom, late of Company H, Second Regiment Tennessee Volunteer Infantry, War with Spain, $12 per month.

Margaret A. Ede, widow of Alfred L. Ede, late lieutenant (junior grade), United States Navy, Regular Establishment, $50 per month in lieu of that she is now receiving, and $2 per month additional on account of each of the minor children of said Alfred L. Ede until they reach the age of 16 years.

Flora C. Plumb, widow of Charles F. Plumb, late of Company A, Fourth Regiment United States Volunteer Infantry, War with Spain, $12 per month.

Margaret R. Thompson, widow of Richard E. Thompson, late colonel, Signal Corps, United States Army, Regular Establishment, $30 per month.

Mary O'Hara Carnes, widow of John Carnes, late of Battery M, Seventh Regiment United States Artillery, War with Spain, $12 per month, and $2 per month additional on account of each of the minor children of said John Carnes until they reach the age of 16 years.

Grace W. Post, widow of Henry B. Post, late second lieutenant, Twenty-fifth Regiment United States Infantry, Regular Establishment, $25 per month in lieu of that she is now receiving.

Edward Louden, late of Company F, Fifth Regiment United States Infantry, Regular Establishment, $12 per month.

Mary A. Loveland, widow of Leslie R. Loveland, late of Company H, Third Regiment United States Infantry, War with Spain, $12 per month, and $2 per month additional on account of each of the minor children of said Leslie R. Loveland until they reach the age of 16 years.

Maria A. Hastings, widow of Daniel M. Hastings, late of Capt. Walker's company, First Regiment Texas Volunteer Cavalry, War with Mexico, $20 per month in lieu of that she is now receiving.

Lilias E. Knapp, widow of John J. Knapp, late captain, United States Navy, Regular Establishment, $50 per month in lieu of that she is now receiving.

Isaiah S. Watkins, late hospital steward, Forty-ninth Regiment United States Volunteer Infantry, War with Spain, $12 per month.

Sarah A. Herndon, widow of Dabney Herndon, late assistant surgeon, United States Army, Florida Indian War, $20 per month in lieu of that she is now receiving.

Susan L. F. Rand, widow of Stephen Rand, late rear admiral, United States Navy, retired, Regular Establishment, $50 per month in lieu of that she is now receiving.

Louise D. Finley, widow of Walter L. Finley, late colonel, First Regiment United States Cavalry, Regular Establishment, $40 per month in lieu of that she is now receiving.

Susan S. Stran, widow of Thomas V. Stran, late of Company A, Second Regiment Indiana Volunteer Infantry, War with Mexico, $20 per month in lieu of that she is now receiving.

Frank D. Haskell, late of Ordnance Detachment, United States Army, Regular Establishment, $12 per month.

Helen A. Gibbs, dependent mother of Randolph H. Gibbs, late of U. S. S. *Annapolis*, United States Navy, Regular Establishment, $20 per month in lieu of that she is now receiving.

Thomas J. McBride, late of Battery K, Fourth Regiment United States Artillery, War with Spain, $30 per month in lieu of that he is now receiving.

Mr. GALLINGER. Mr. President, I am well aware of the fact that the Committee on Pensions and the Congress itself is not as liberal in the matter of the payment of pensions to the widows of general officers as it was at the time when I had the privilege of acting as chairman of the Committee on Pensions. However, I wish to call the attention of the Senate to the case of Mrs. Sternberg, widow of the late Gen. Sternberg, which is so unusual, so clearly out of the ordinary, that I want to make an appeal to the Senate to increase the amount that is allowed in the bill.

Gen. Sternberg had a most remarkable career, Mr. President. It was Gen. Sternberg who organized the yellow-fever commission in 1900, which commission, under the late Maj. Reed, made that famous investigation resulting in the discovery that yellow fever was due to inoculation by mosquitoes, which discovery revolutionized the views that were held concerning that disease and practically obliterated it from the United States.

Gen. Sternberg, Mr. President, as a scientific man probably held more important positions than any other man in the history of this Government. I have here a list of the positions he held, with which I hope every Senator will acquaint himself if he has any objection to the motion which I am about to make. I would, if time permitted, discuss this matter at considerable length, but I have only five minutes in which to do it and shall content myself with reading one or two letters in reference to the matter which I find in the report of the Committee on Pensions.

Mr. TILLMAN. I suggest to the Senator to insert them in the RECORD without reading.

Mr. GALLINGER. I want to read what Dr. Gorgas—Gen. Gorgas, as we ordinarily know him—says. I find this letter from him.

WAR DEPARTMENT,
OFFICE OF THE SURGEON GENERAL,
Washington, March 9, 1916.

Mrs. GEORGE M. STERNBERG,
2005 Massachusetts Avenue, Washington, D. C.

DEAR MRS. STERNBERG: My long service in the Army Medical Corps under Gen. Sternberg has given me a very intimate knowledge of the character of his work during the long period he served his country. He began his service during the Civil War at the Battle of Manassas, on which occasion his services were most gallant and conspicuous. For many years after the Civil War he served on our western frontier.

His scientific investigations with regard to yellow fever were extensive and useful. He had a severe attack of yellow fever at Fort Barrancas, Fla., contracted while he was post surgeon at that post in connection with his duties. When he was made Surgeon General of the Army in 1902 he was in the forefront of bacteriologists and would have at that time ranked among the first two or three bacteriologists of the world. I think his memory deserves well of our country.

Very sincerely, yours,

WM. C. GORGAS,
Surgeon General, United States Army.

Mr. President, there is a very interesting letter here from Dr. George M. Kober, a well-known scientist of this city; a remarkable letter from ex-Senator Root, in which he pays tribute to the remarkable achievements of Gen. Sternberg; a letter from Gen. Wood, and other testimony that is of very great importance in connection with this matter.

I feel personally, Mr. President, in view of the most unusual services of Gen. Sternberg, and the fact that he has left a widow in feeble health and moderate circumstances, that $100 a month would not be an excessive pension for Mrs. Sternberg. I therefore move that "$50" be stricken out and that "$100" be inserted in the hope that the House will agree to that amount if we insert it, and thus adequately provide for the widow of this illustrious scientist and patriotic American.

The VICE PRESIDENT. The question is on the amendment of the Senator from New Hampshire [Mr. GALLINGER].

Mr. JOHNSON of Maine. Mr. President, the case of Mrs. Sternberg appeals very strongly to the committee because of the eminent services of her late husband, which the Senator from New Hampshire [Mr. GALLINGER] has detailed here; but in only very few cases has Congress given a pension above $50 a month. Fifty dollars a month is the limit which the Committees on Pensions in the House and in the Senate have established where a soldier requires the help of another person to care for him; and we have felt that in the case of Mrs. Sternberg in allowing $50 a month we had been very liberal. There are on the list very few, but there are a few who have pensions at $75 a month and a few who have pensions of $100, and only a very few, as the Senator from New Hampshire knows.

Mr. GALLINGER. And there are one or two who have a pension as high as $200 a month.

Mr. JOHNSON of Maine. I have not known of any pensions of that amount.

Mr. GALLINGER. I beg pardon, I know of them.

Mr. JOHNSON of Maine. In view of the fact that we allow a pension of but $50 a month to a soldier of the Civil War who is now paralyzed and in such condition that he requires the help of another person—a blind man, or a paralytic, for instance—

the committee felt that they had gone to the extreme limit and had been as liberal as they ought to be when they fixed this pension at $50 a month.

Mr. SHAFROTH. Mr. President, it seems to me that this case is upon a different basis from the one which is suggested by the Senator from Maine. Dr. Sternberg was a man who contributed to science a wonderful discovery that has revolutionized the treatment of one of the most terrible diseases that has ever scourged mankind. It seems to me as a tribute to that discovery, if nothing else, the amendment offered by the Senator from New Hampshire ought to be adopted.

Mr. GALLINGER. Mr. President, if the Senator from Colorado will permit me, I desire to suggest that during the last years of Dr. Sternberg's life he did remarkable service in the matter of tuberculosis, giving his time freely and contributing very largely to the knowledge of that dread disease, as well as to the knowledge of yellow fever.

The VICE PRESIDENT. The question is on the amendment of the Senator from New Hampshire.

The amendment was agreed to.

Mr. GALLINGER. I ask that the record of Dr. Sternberg, as it appears in the report of the Committee on Pensions, be published in the RECORD for the benefit of the other House of Congress, and also possibly for the conference committee.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

S. 1716. Martha L. Sternberg is the widow of George M. Sternberg, late brigadier general and Surgeon General, United States Army.

George Miller Sternberg was born in New York June 8, 1838. He entered the Army May 28, 1861, by appointment on that date as first lieutenant and assistant surgeon, and was in the service continuously until June 8, 1902, when placed on the retired list by operation of law. He was promoted to captain May 28, 1866; major and surgeon, December 1, 1875; to lieutenant colonel, January 2, 1891; and to brigadier general and Surgeon General, May 30, 1893. A biographical sketch of Dr. Sternberg is as follows:

"George Miller Sternberg, Washington, D. C., son of Rev. Levi (D. D.) and Margaret Levering (Miller) Sternberg, was born June 8, 1838, at Hartwick Seminary, Otsego County, N. Y., and educated at the same place; commenced the study of medicine in 1857 at Cooperstown, N. Y., under Dr. Horace Lathrop, of that place; attended two courses of lectures at the College of Physicians and Surgeons in the city of New York, and was graduated in 1860.

ARMY SERVICE.

"Actual rank: Assistant surgeon, May 28, 1861, accepted May 31, 1861; captain and assistant surgeon, May 28, 1866; major and surgeon, December 1, 1875; lieutenant colonel and deputy surgeon general, January 12, 1891; brigadier general and Surgeon General, May 30, 1893; retiring year, 1902; appointed from New York.

"Service: With Gen. Sykes's command, Army of the Potomac, to August, 1862; hospital duty, Portsmouth Grove, R. I., to November, 1862; with Gen. Banks's expedition and assistant to the medical director, Department of the Gulf, to January, 1864; in office of medical director, Columbus, Ohio, and in charge of United States general hospital at Cleveland, Ohio, to July, 1865; with the Thirteenth United States Infantry, Jefferson Barracks, Mo., to April, 1866; post surgeon at Fort Harker, Kans., to October, 1867 (cholera epidemic); at Fort Riley, Kans., and in the field from April, 1868 to 1870 (Indian campaign); Fort Columbus, New York Harbor, to May, 1871 (yellow-fever epidemic); Fort Hamilton, New York Harbor, to June, 1871; Fort Warren, Boston Harbor, Mass., to August, 1872; ordered to Department of the Gulf, July 22, 1872, acting medical director, New Orleans, La., to October, 1872; post surgeon, Fort Barrancas, Fla., to August, 1875 (epidemics of yellow fever in 1873 and 1875); on sick leave to May, 1876; ordered to Department of the Columbia, May 11, 1876; attending surgeon department headquarters to September, 1876; post surgeon, Fort Walla Walla, Wash., to May, 1879; in the field, Nez Perces expedition, 1877; on special duty with National Board of Health from July, 1879, to August, 1881 (member of Habana yellow-fever commission, 1879); ordered to Department of California, August 10, 1881; post surgeon, Fort Mason, Cal., to May, 1884; attending surgeon and examiner of recruits at Baltimore, Md., to October, 1890; in charge medical purveying depot, San Francisco, Cal., to February, 1892; attending surgeon, New York City to May, 1893.

"Brevet commissions and 'honorable mention' in official communications: Captain and major, United States Army, 'for faithful and meritorious services during the war.' Lieutenant colonel, 'for gallant service in performance of his professional duty under fire in action against Indians at Clearwater, Idaho, July 12, 1877.'

WAR OF THE REBELLION—OFFICIAL RECORDS.

[Series I, Vol. XI, Part II, Report of Brig. Gen. George Sykes, United States Army, commanding second division of the Battle of Gaines Mill, engagement at Turkey Bridge, and Battle of Malvern Hill.]

Dr. Sternberg added largely to the reputation already acquired on the disastrous field of Bull Run. (Op. cit., p. 352.)

[Extract from letter of the Surgeon General, United States Army, to the honorable the Secretary of War.]

WAR DEPARTMENT, SURGEON GENERAL'S OFFICE,
Washington, D. C., November 13, 1879.

* * * Asst. Surg. Sternberg has since his appointment (May 28, 1861) served in the field during the war; * * * from May 31, 1868, to December 9, 1868, chief medical officer of the expedition serving south of the Arkansas River; * * * from September 2, 1872, to the present date, as post surgeon, Fort Barrancas, Fla., and has rendered there valuable and efficient services during two epidemics of yellow fever.

Very respectfully, your obedient servant,

JOS. K. BARNES,
Surgeon General United States Army.

Special details: Member and secretary of the Habana yellow-fever commission of the National Board of Health (1879). Delegate from the United States, under special instructions from the honorable the Secretary of State, to the International Sanitary Conference of Rome (1885). Detailed, by direction of the President, in pursuance of the authority contained in the provisions of the act of Congress, approved March 3, 1887, to make investigations in Brazil, Mexico, and Cuba, relating to the etiology and prevention of yellow fever (1887–1889). Consulting bacteriologist to the health officer of the port of New York (1892) by authority of the War Department, and in compliance with special request of the health officer of the port of New York and the advisory committee of the New York Chamber of Commerce.

Membership in medical and scientific societies: Member and ex-president of the American Public Health Association; member of the American Association of Physicians; of the American Medical Association; of the American Physiological Society; of the American Microscopical Society (vice president); fellow of the American Association for Advancement of Science; fellow of the New York Academy of Medicine; president of section on military medicine and surgery of the Pan American Medical Congress; president of the Association of Military Surgeons United States (1894); fellow of the Royal Microscopical Society of London; late fellow by courtesy in Johns Hopkins University (1885–1890); honorary member of the Epidemiological Society of London; honorary member of the Royal Academy of Medicine of Rome; honorary member of the Academy of Medicine of Rio de Janeiro; honorary member of the American Academy of Medicine; honorary member of the French Society of Hygiene, etc.

Elected president American Medical Association in 1897.

President Biological Society of Washington in 1895–96.

President Philosophical Society of Washington in 1900.

Principal published works and scientific researches: "Bacteria," 498 pp., 8vo., including 152 pp. from the work of Dr. Antoine Maguin, translated from the French in 1880, illustrated by photomicrographs and cuts. Wm. Wood & Co., New York, 1884.

"Malaria and Malarial Diseases," 329 pp., 8vo. Wm. Wood & Co., New York, 1884.

"Photomicrographs and How to Make Them," 204 pp., 8vo., illustrated by numerous photomicrographs. Jas. R. Osgood & Co., 1884.

"The Biological Characters of the Cholera Spirillum," etc. The Medical Record, New York, 1893.

"Disinfection of Quarantine Stations, Especially in Cholera." The New York Medical Journal, 1893.

Report of chairman of committee on "Protective Inoculations in Infectious Diseases." Boston Medical and Surgical Journal, 1893.

Titles of papers published since 1893 are not included in above list.

Dr. Sternberg has made original researches in the etiology of infectious diseases, the comparative value of disinfectants, etc. The degree of LL. D. was conferred on him by the University of Michigan in 1894 and by Brown University in 1897.

Dr. Sternberg married first, in 1866, Mill Maria Louisa Russell, of Cooperstown, N. Y., who died of cholera in 1867; married second, in 1869, Miss Martha L. Pattison, of Indianapolis, Ind. They have no children.

Dr. Sternberg was one of the leading bacteriologists of his day. He suffered an attack of yellow fever in Florida in 1875, and in after years he devoted much time and study to scientific investigations of that dread plague and to him is generally credited much of the success achieved in its elimination from our southern cities and from Habana and Panama. He organized the Yellow Fever Commission of 1900, with Maj. Walter Reed as chairman, and Drs. Lazear, Carroll, and Agramonte as members, which proved so fruitful in results; and he was equally distinguished in other lines of useful work of incalculable benefit to humanity. The following letters filed with the committee are of interest in the case:

WASHINGTON, SANITARY HOUSING CO.,
Washington, D. C., December 10, 1915.

Hon. J. H. GALLINGER,
United States Senate, City.

DEAR SENATOR: I beg to inform you that Gen. George M. Sternberg, United States Army (Surgeon General, retired), died in this city November 3, 1915.

His wife, Martha L. Sternberg, is left without adequate support, and it is hoped that Congress may provide a special pension for her.

Gen. Sternberg's distinguished services to his country, to science, and humanity were recognized upon the occasion of his seventieth birthday in 1908 and are set forth in the accompanying publication.

It is generally held that much of the success achieved by the Yellow Fever Commission organized by him in 1900 was rendered possible by the preliminary work of Dr. Sternberg. His work in yellow fever began during an epidemic at Governors Island, New York Harbor, in 1871; was continued in the yellow-fever zone in New Orleans in 1872. At Fort Barrancas, Fla., he witnessed two epidemics, in 1873 and 1875, and during the latter epidemic he suffered, himself, a severe attack.

From 1879 to 1888 he visited Habana several times, also Rio de Janiero, Vera Cruz, and the town of Decatur, Ala., in the investigation of the cause of yellow fever.

Having exhausted the resources at his command in his search for the germ of yellow fever by microscopical examination of the blood and tissues, by culture methods, and by experiments on the lower animals, he felt that the only method left which offered any promise of success was that of direct experiment on man.

If the blood of a yellow-fever patient contained the specific infectious agent, this should be shown by inoculating a nonimmune individual with such blood.

With this object in view, he organized in 1900 the Yellow Fever Commission, with Maj. Reed as chairman. The investigation of this commission resulted in the demonstration that in yellow fever the specific infectious agent is present in the blood of those suffering from the disease and that the usual, and probably the only, method of transmission is through the bites of mosquitoes of the genus Stegomyia. This brilliant demonstration by Reed and his colleagues has furnished the necessary basis for preventive measures which have been applied with entire success in the yellow-fever zone, and the practical results are of incalculable value to mankind.

It certainly speaks well for the painstaking work of Dr. Sternberg that even now, when we know that the infectious agent is transmitted through the sting of a mosquito and the search has been narrowed down to the body of this insect, it has not been isolated, and neither Sternberg nor Reed have found it, probably because it is ultramicroscopic.

In giving due credit to all the participants of this splendid piece of research, it is generally conceded that Dr. Sternberg's work was of the highest scientific value, and his daily contact with the sick, his autopsies, and bacteriological investigations in different countries and climes in search of the yellow-fever germ involved at least the same risks and heroism displayed by members of the Yellow Fever Commission.

Very sincerely, yours,

GEO. M. KOBER.

WAR DEPARTMENT,
OFFICE OF THE SURGEON GENERAL,
Washington, March 9, 1916.

Mrs. GEORGE M. STERNBERG,
2005 Massachusetts Avenue, Washington, D. C.

DEAR MRS. STERNBERG: My long service in the Army Medical Corps under Gen. Sternberg has given me a very intimate knowledge of the character of his work during the long period he served his country. He began his service during the Civil War at the Battle of Manassas, on which occasion his services were most gallant and conspicuous. For many years after the Civil War he served on our western frontier.

His scientific investigations with regard to yellow fever were extensive and useful. He had a severe attack of yellow fever at Fort Barrancas, Fla., contracted while he was post surgeon at that post in connection with his duties. When he was made Surgeon General of the Army in 1902 he was in the forefront of bacteriologists and would have at that time ranked among the first two or three bacteriologists of the world. I think his memory deserves well of our country.

Very sincerely, yours,

WM. C. GORGAS,
Surgeon General, United States Army.

NEW YORK, *March 8, 1916.*

DEAR MRS. STERNBERG: I have received your letter of March 6, and I respond heartily to the very moderate statements which you make regarding Gen. Sternberg's merits and the claims of his memory to recognition by Congress. Senator GALLINGER'S bill does not rest alone upon long and faithful service, including both the Civil War and the War with Spain, but chiefly and distinctively upon the great part which Gen. Sternberg played in the service rendered by the Medical Corps of the Army in the nine years during which he was Surgeon General. The practical extirpation of yellow fever in Cuba and on the Isthmus of Panama and the development of methods of preventive medicine which have secured the phenomenal freedom from typhoid in recent years are achievements in which the Medical Corps of the Army bore a great part and won the highest distinction. Congress has paid great honor to the medical officers who in the field and in camp became distinguished for their part in this extraordinary work. Let no one think, however, that the man who was at the head of the corps can be left out of account in this creditable record. Such things do not happen by accident. No body of men accomplishes what our medical officers accomplished for the 10 years succeeding 1902 except in response to leadership, incitement, encouragement, opportunity, motive power, coming from the head of the corps.

The Medical Corps accomplished what it did largely because the man at the top was a pioneer in bacteriology, an advance worker in protective medicine, and had the enthusiasm and devotion through which science wins victories. That spirit communicated itself to the corps, directed its energies, made it the field of opportunity for scientific effort, kept good men in it, brought good men into it, and furnished the indispensable element of leadership without which the work could not have been done. Gen. Sternberg was the general commanding in that campaign. Congress has been honoring his subordinates gratefully and properly. It is all wrong that there should be no appreciation for the commander. I have not received yet the copies of resolutions, etc., which you have sent, but I do not need them, for I know about this subject myself upon the experience of four years and a half during which it was my business to observe and estimate the influences working for and against efficiency in the War Department.

With kind regards, dear Mrs. Sternberg, I am always,

Faithfully, yours,

ELIHU ROOT.

Mrs. GEORGE M. STERNBERG,
2005 Massachusetts Avenue NW., Washington, D. C.

HEADQUARTERS EASTERN DEPARTMENT,
Governors Island, N. Y., March 6, 1916.

MY DEAR MRS. STERNBERG: It gives me great pleasure to state that I am well acquainted with the late Gen. George M. Sternberg's long, honorable, and highly efficient services in the Army. He was one of the leading authorities on bacteriology and did most valuable work. His studies in connection with yellow fever and his general research work in connection with tropical diseases all had a far-reaching effect on the successful conduct of these experiments. His life was devoted to the best interests of the service and humanity at large. I sincerely trust you will be able to secure some definite recognition in the way of a pension.

Sincerely, yours,

LEONARD WOOD.

Mrs. GEORGE M. STERNBERG,
2005 Massachusetts Avenue NW., Washington, D. C.

Mrs. Sternberg is now receiving the small pension of $12 per month (certificate No. 803582) provided by the act of April 19, 1908, for the widow of an officer or enlisted man who served 90 days in the Civil War. She is unable to obtain pension under the general law more commensurate with the rank and services of her distinguished husband, for the reason that she can not show that his death from heart disease was due to his active military service, although it is highly probable that such was the case. She married the deceased officer September 1, 1869, and is now 72 years of age.

Evidence filed with the committee shows that Mrs. Sternberg is broken in health and in comparatively necessitous circumstances, having only a little property and with but a small income for her support. It is believed the long and faithful and exceedingly valuable services of Gen. Sternberg and the widow's necessitous circumstances justify your committee in reporting the bill favorably with recommendation for increase of pension to $50 per month.

Mr. JONES. Mr. President, on page 5, line 7, I move to strike out "$8" and to insert "$12," making the pension in that case $12 a month.

The VICE PRESIDENT. The amendment proposed by the Senator from Washington will be stated.

The SECRETARY. On page 5, line 7, it is proposed to strike out "$8" and in lieu thereof to insert "$12," so as to read:

The name of Raymond Christian, late of Company B, Nineteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

Mr. JONES. Mr. President, just a word. I very seldom find any fault with the action of the Pensions Committee with reference to these matters, because I know they do what they think to be right on the records placed before them; but this case, on the testimony as shown in the record, especially appeals to me. It seems to me that we ought to allow this man a little bit more than $8 a month. He enlisted in the Regular Establishment of the Army on March 25, 1902, and was discharged October 24, 1903. In his application for pension to the Pension Office he alleged very many different kinds of disability. The claim was rejected at the department on the ground that there was not any disability traceable to service. The report of the committee states:

The medical records on file in the War Department show that soldier was treated during service from June 26 to July 3, 1902, for chronic catarrhal dysentery; November 12 to 15, 1902, acute indigestion; January 17 to March 2, 1903, croupous pneumonia, right lower lobe; pleurisy, acute, lower left lobe.

That is the hospital record of the man during his service. Two of his neighbors testified, on May 20, 1909, that in the month of November, which was just a month after he was discharged on October 24, 1903—

they helped claimant build a shed and that at that time claimant was unable to work much on account of dizziness and numbness of his limbs, being unable to hold a hammer in his hand or lift any lumber, and came near falling off of a scaffold on account of dizziness; that claimant has been so afflicted since 1903, and is now become worse; that his right arm is now useless and helpless and he has to carry it in a sling, and that he is totally incapacitated for doing any manual labor.

Then a physician testified in 1910 that in an examination of the man he found one whole side practically paralyzed. I shall not take the time of the Senate to read his statement. Then there is an affidavit of John Abtz, who says:

That claimant was an able-bodied man prior to service; that he now shows serious defect in his speech, hesitation, and stuttering, a shortening of the right wrist, and inability to grasp objects firmly, and indications of partial paralysis of right side and right forearm; that claimant's disabilities are such as to prevent him from earning a living by manual labor.

Then the committee refer to an affidavit of the claimant and state:

He is 46 years of age, and, as the evidence shows, without means for his support, and your committee recommends a pension for this claimant at $8 per month.

Mr. President, I think that we ought at least to grant this man, on the showing here, $12 a month. He is practically paralyzed on one side now; is practically helpless; and I think the hospital records show that his condition is without doubt due to disability incurred in the service. The record shows that when he enlisted—and I think we have a right to assume the fact—he was an able-bodied man. I hope the committee will increase the sum from $8 to $12 a month.

Mr. SMOOT. Mr. President, in all such cases as this the other House has a fixed rate of $8 a month. The Senate committee did not change that in this case, nor have they ever

changed it in the past. This soldier purchased his way out of the Army on October 24, 1903. He enlisted—and, mind you, this was in the Regular Army—on March 25, 1902.

I think if the pension of this soldier is increased from $8 a month, the limit allowed under the rules of the House committee, that we ought to go through all of the pension bills and increase other pensions in similar cases. The very next item is for George P. Thompson, who is also given a rate of $8 per month.

Mr. JONES. Mr. President, I want to ask the Senator what is the rule fixing a limit of $8 a month?

Mr. SMOOT. That has always been the rule governing the committee in the other House.

Mr. JONES. This is not a House bill.

Mr. SMOOT. In the Senate the rule has been the same. The rates generally are fixed, first, upon length of service, and, second, upon whether, after investigation by the department, it is found that the soldier suffers from any disease contracted while in the service. In this instance the department holds that not to be the case. This soldier purchased his way out of the Army; he was not discharged for any reason; he was not so sick that they thought he ought to be discharged on account of sickness.

The Senate committee has adopted a rule limiting the amount in such cases to $8 a month, if any pension is granted at all, and the House has followed the same rule. Of course, if the Senate feel that they want to increase the rate here provided, I will simply say that very many others ought to be increased also.

Mr. JONES. Mr. President, just a word. I supposed that each one of these cases was passed upon according to the special facts of the case. These are special bills, and pensions are allowed for special reasons. Here is a case where the record shows that this man is practically paralyzed on one side and helpless.

Mr. SMOOT. Mr. President——

The VICE PRESIDENT. Just a moment. The Senate is proceeding under the rule which allows a Senator to speak only once, and then not to exceed five minutes.

Mr. JONES. Very well; I have no desire to transgress the rule.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Washington. [Putting the question.] The "ayes" seem to have it; the "ayes" have it, and the amendment is agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BARKENTINE "MABEL I. MEYERS."

Mr. WEEKS. Mr. President, I now ask that the Senate return to Calendar No. 283, being Senate bill 3270.

The VICE PRESIDENT. The Senator from Massachusetts asks unanimous consent to return to Calendar No. 283, Senate bill 3270.

Mr. WEEKS. Mr. President, that is a bill to give relief in the case of a ship that was run down by a man-of-war. The House passed a similar bill, but when it came to the Senate, instead of being referred to the Committee on Claims, it was referred to the Committee on Commerce. As it is simply a relief bill, it seems that it ought not to be delayed; and I move to take up House bill 11125 and to strike out all after the enacting clause and substitute the Senate bill therefor, and then I will ask that the Senate bill be indefinitely postponed.

Mr. GALLINGER. Is the House bill on the calendar?

Mr. WEEKS. The House bill is not on the calendar.

The VICE PRESIDENT. If the House bill is not on the calendar, the Chair does not see very well how the House bill can be substituted for the Senate bill.

Mr. TILLMAN. Under the circumstances, I think the bill can not be considered, and I ask for the regular order.

Mr. WEEKS. Mr. President, would it be in order to move at this time to discharge the Committee on Commerce from the further consideration of the House bill and that it be referred to the Committee on Claims?

Mr. GRONNA. I call attention to the fact that we are operating under a unanimous-consent agreement.

Mr. WEEKS. I will not take any more time, if I can get the Senate Committee on Commerce discharged from the further consideration of the bill and have it referred to the Committee on Claims.

The VICE PRESIDENT. Is there objection?

Mr. GRONNA. I object.

The VICE PRESIDENT. Objection is made.

STOCK-RAISING HOMESTEADS.

Mr. STERLING. Mr. President, I wish to recur for a moment to Calendar No. 324, House bill 407. The Senator from Idaho [Mr. BORAH], it will be remembered, objected to the present consideration of this bill. The Senator, I think, has had an opportunity to read the bill since he made the objection, and I should be pleased to know whether or not he will not withdraw the objection he made to the consideration of the bill?

Mr. BORAH. Mr. President, I have no desire to stand in the way of a final vote upon this bill, but I want to say a few words about it when it is taken up for consideration.

Mr. SMOOT. Mr. President, I know that the Senator from Arizona is going to offer an amendment to the bill which will lead to discussion. There is no need of taking the 20 minutes of time which we have left under the present order for the consideration of this bill.

Mr. GALLINGER. Regular order!

The VICE PRESIDENT. The regular order is demanded. The Secretary will state the next bill on the calendar.

BILLS PASSED OVER.

The bill (S. 5854) to provide for the erection, furnishing, and equipping of a building in the city of Washington, D. C., for the Department of Justice was announced as next in order.

Mr. GALLINGER. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (H. R. 308) to amend the act to regulate commerce, as amended, and for other purposes, was announced as next in order.

Mr. LODGE. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 5716) to establish the Mount McKinley National Park, in the Territory of Alaska, was announced as next in order.

Mr. NELSON. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 681) providing for the election of a Delegate to the House of Representatives from the District of Columbia, and for other purposes, was announced as next in order.

Mr. SMITH of Georgia. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

CAPT. JOHN H. GIBBONS, UNITED STATES NAVY.

The bill (S. 5675) for the relief of John Henry Gibbons, captain on the retired list of the United States Navy, was announced as next in order.

Mr. LODGE. Mr. President, that bill may be indefinitely postponed. It is covered by name in the naval appropriation bill by a provision inserted by the House, which has been agreed to by the Senate. I therefore move that the bill be indefinitely postponed.

The VICE PRESIDENT. The question is on the motion of the Senator from Massachusetts.

The motion was agreed to.

RESOLUTION PASSED OVER.

The resolution (S. Res. 195) to amend the standing rules of the Senate relative to closing debate in the Senate was announced as next in order.

Mr. SUTHERLAND. Let that go over.

The VICE PRESIDENT. The resolution will be passed over.

RADIO STATION, UNGA ISLAND, ALASKA.

The bill (S. 3776) providing for the establishment of a radio station at Unga Island, Alaska, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Naval Affairs with amendments, in line 6, after the article "a," to strike out "high power"; and in line 8, after the word "Alaska," to insert:

There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $45,000, or so much thereof as may be necessary, for the purpose of carrying out the provisions of this act.

So as to make the bill read:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to acquire, by purchase or otherwise, and to prepare a suitable site, purchase and erect towers and buildings, and purchase and install machinery and apparatus for a radio station, to be located on Unga Island, Alaska. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $45,000, or so much thereof as may be necessary, for the purpose of carrying out the provisions of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PROTECTION OF THE WATERSHEDS OF NAVIGABLE STREAMS.

The bill (S. 6047) to carry out the purposes mentioned in section 3 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," was announced as next in order.

Mr. GALLINGER. I move that that bill be indefinitely postponed. It is included in the Agricultural appropriation bill.

The VICE PRESIDENT. The question is on the motion of the Senator from New Hampshire that the bill be indefinitely postponed.

The motion was agreed to.

GLACIER NATIONAL PARK.

The bill (S. 778) to amend an act entitled "An act to establish the Glacier National Park in the Rocky Mountains south of the international boundary line, in the State of Montana, and for other purposes," approved May 11, 1910, was announced as next in order.

Mr. GRONNA. I ask that that bill go over.

The VICE PRESIDENT. The bill will be passed over.

LANDS IN MONTANA.

The bill (S. 790) to repeal an act entitled "An act to amend section 3 of the act of Congress of May 1, 1888, and extend the provisions of section 2301 of the Revised Statutes of the United States to certain lands in the State of Montana embraced within the provisions of said act, and for other purposes," was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands with an amendment, to strike out all after the enacting clause and insert:

That nothing contained in the act approved March 3, 1911, entitled "An act to amend section 3 of the act of Congress of May 1, 1888, and extend the provisions of section 2301 of the Revised Statutes of the United States to certain lands in the State of Montana embraced within the provisions of said act, and for other purposes," shall be construed to validate any selections or attempted selections of any of the lands to which the said act relates under the indemnity provisions of the act approved July 2, 1864, entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Lake Superior to Puget Sound on the Pacific coast by the northern route," or any act amendatory or supplemental thereto, nor to authorize any such selections to be made, and the said act approved March 3, 1911, so far as the same may authorize or validate any such selections, is hereby repealed.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend an act entitled 'An act to amend section 3 of the act of Congress of May 1, 1888, and extend the provisions of section 2301 of the Revised Statutes of the United States to certain lands in the State of Montana embraced within the provisions of said act, and for other purposes.'"

GLACIER NATIONAL PARK.

Mr. WALSH. Mr. President, my attention was diverted when the Senate reached Order of Business 421, Senate bill 778, to amend an act entitled "An act to establish the Glacier National Park in the Rocky Mountains south of the international boundary line, in the State of Montana, and for other purposes," approved May 11, 1910. That is a measure that is exceedingly urgent in its character, and the interests of the Government are largely involved. I should like to take the time to state what the bill means, in order that we may have action on it. It has already passed the Senate once.

There are certain private holdings in the Glacier National Park which were acquired before the park was created. Many of those have long rows of beautiful trees on them.

Mr. CATRON. I call for the regular order.

Mr. SMOOT. I will say to the Senator from Montana that I did not object to the bill, but that the Senator from North Dakota [Mr. GRONNA] objected. He is not in the Chamber at present.

The VICE PRESIDENT. There is a call for the regular order.

Mr. WALSH. I will ask, then, to recur to this matter later.

BILL PASSED OVER.

The bill (S. 5772) to provide for the sinking of artesian wells, and for other purposes, was announced as next in order.

Mr. TILLMAN and Mr. SMITH of Georgia. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

JULIA R. GOODLOE.

The bill (H. R. 4866) for the relief of Julia R. Goodloe was considered as in Committee of the Whole. It proposes that the title of Julia R. Goodloe in and to fractional section 31, township 2, range 13, Colbert County, Ala., be quieted and confirmed, and that patent therefor issue to Julia R. Goodloe.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RECLAMATION PROJECTS.

The bill (S. 782) granting additional rights to settlers on reclamation projects was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands with amendments.

The first amendment was, on page 2, after line 4, to insert as a new section the following:

SEC. 2. That any person otherwise qualified to enter a homestead under the laws of the United States who shall have made entry of a tract of less than 160 acres outside of a reclamation project may make an additional entry of a farm unit subject to entry within a reclamation project of such area as added to his original entry will not exceed 160 acres.

The amendment was agreed to.

The next amendment was, on page 2, line 13, after the word "entries," to strike out "save that the entryman shall not be required to reside on the tract entered under the provisions of this act," so as to make the bill read:

Be it enacted, etc., That any person otherwise qualified to enter a homestead under the laws of the United States who shall have made entry of a tract less than 160 acres within or under any reclamation project, or who, having made an entry of any area under such project, has been required to release or surrender a part thereof that the same may conform in extent to the farm unit prescribed for such project or the part thereof embracing the land so entered by him, may make an additional homestead entry of so much land open to such entry, and not within or under any reclamation project or withdrawn in anticipation of the initiation of such, as, with the land which he theretofore entered or was permitted to retain, shall amount to 160 acres.

SEC. 2. That any person otherwise qualified to enter a homestead under the laws of the United States who shall have made entry of a tract of less than 160 acres outside of a reclamation project may make an additional entry of a farm unit subject to entry within a reclamation project of such area as added to his original entry will not exceed 160 acres.

SEC. 3. That all laws in relation to homesteads shall be applicable to such additional entries.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BALTIMORE & WASHINGTON TRANSIT CO.

The bill (S. 5976) to amend an act approved May 29, 1908, entitled "An act to amend an act to authorize the Baltimore & Washington Transit Co., of Maryland, to enter the District of Columbia," approved June 8, 1896, was considered as in Committee of the Whole. It proposes to amend section 2 of an act approved May 29, 1908, entitled "An act to amend an act to authorize the Baltimore & Washington Transit Co., of Maryland, to enter the District of Columbia, approved June 8, 1896," so as to read as follows:

SEC. 2. That the said transit company shall be empowered to construct, maintain, equip, and operate a single or double track street railway over said line, with all necessary buildings, switches, machinery, appliances, appurtenances, and other devices necessary to operate the same by electricity, compressed air, storage battery, or other motive power, to be approved by the Public Utilities Commission of said District.

Also that section 4 of the act entitled "An act to authorize the Baltimore & Washington Transit Co., of Maryland, to enter the District of Columbia," approved June 8, 1896, be repealed, provided that said railway shall be constructed of good material, with rails of approved pattern, and in a neat and substantial manner, subject to the supervision and approval of the Public Utilities Commission of the District of Columbia; the standard gauge to be used, and the surfaces of the tracks to conform to the grades of the streets established by the Commissioners of the District of Columbia, and where the tracks lie within the streets of the District of Columbia the same to be paved between the rails and 2 feet outside thereof with such material and in such manner as shall be approved by the said commissioners, and kept in repair by the said railway company.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PINEY BRANCH ROAD, DISTRICT OF COLUMBIA.

The bill (S. 5525) to provide for the abandonment of Piney Branch Road between Allison Street and Buchanan Street NW.,

in the District of Columbia, was considered as in Committee of the Whole. It authorizes the Commissioners of the District of Columbia, upon the opening of Buchanan Street for traffic between Piney Branch Road and Sixteenth Street NW., in the District of Columbia, to abandon as a public highway that part of Piney Branch Road lying between the north line of Allison Street and the south line of Buchanan Street, and the title to the land contained in said abandoned part of road shall revert to the owners of the land abutting thereon.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was rejected.

NATIONAL FOREST LANDS.

The bill (S. 5539) to consolidate national forest lands, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands, with an amendment, on page 1, after line 10, to insert "*Provided further*, That the lands so selected shall be approximately equal in area and value to the lands surrendered, and in the same State, and shall be surveyed, nonmineral, nonsaline, unoccupied, vacant public land," so as make the bill read:

Be it enacted, etc., That for the purpose of consolidating the Government lands within the national forests the Secretary of the Interior be, and he hereby is, authorized and empowered, upon recommendation of the Secretary of Agriculture, to exchange Government lands for privately owned lands within the exterior boundaries of national forests: *Provided*, That such lands, upon examination, are found to be of approximately equal value, and that public interests are benefited thereby: *Provided further*, That the lands so selected shall be approximately equal in area and value to the land surrendered, and in the same State, and shall be surveyed, nonmineral, nonsaline, unoccupied, vacant public land: *Provided further*, That upon the consummation of such exchanges the lands deeded to the United States thereunder shall become parts of the national forests in which they are situated.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

WILLIAM WALTERS, ALIAS JOSHUA BROWN.

The bill (S. 2701) for the relief of William Walters, alias Joshua Brown, was announced as next in order.

Mr. SMITH of Georgia. Let that bill go over, Mr. President, unless there is some special reason for its consideration at this time.

Mr. THOMPSON. There is very urgent reason why the bill should be passed now. The beneficiary is 91 years old.

Mr. SMITH of Georgia. Then I will not delay the business of the Senate for a further explanation of it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that in the administration of the pension laws William Walters, alias Joshua Brown, who was a private of Battery M, First Regiment United States Artillery, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said battery and regiment on the 13th day of September, 1865: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ANTOINE BAYARD.

The bill (S. 2222) for the relief of the heirs of Antoine Bayard was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment, on page 1, line 10, after the word "fifty-five," to insert "which has heretofore been lost and has never been used," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to issue to the heirs of Antoine Bayard, late member of the Mississippi Militia during the War of 1812, a duplicate bounty land warrant for 120 acres, in lieu of warrant No. 34205, heretofore issued under the act of March 3, 1855, which has heretofore been lost and has never been used.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

GLACIER NATIONAL PARK.

Mr. WALSH. I ask unanimous consent now to recur to Order of Business 421, Senate bill 778, to amend an act entitled "An act to establish the Glacier National Park in the Rocky Mountains south of the international boundary line, in the State of Montana, and for other purposes," approved May 11, 1910. The Senator from North Dakota [Mr. GRONNA] has withdrawn his objection.

The VICE PRESIDENT. Is there any objection to recurring to the bill? The Chair hears none.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with an amendment to strike out "that the Secretary of the Interior, for the purpose of eliminating private holdings within the Glacier National Park and the preservation intact of the natural timber along the roads in the scenic portions of the park, both on patented and park lands, is hereby empowered, in his discretion, to obtain for the United States the complete title to any or all of the lands held in private or State ownership within the boundaries of said park, by the exchange of dead, decadent, or matured timber that can be removed from any part of the park without affecting the scenic beauty thereof or from the Government lands within the metes and bounds of the national forests within the State of Montana, and also, in his discretion, to exchange for patented lands in the Glacier National Park Government lands of equal value within the metes and bounds of the national forests within said State: *Provided, however*, That the lands in the national forests to be offered in exchange shall be determined by the Secretary of Agriculture," and insert:

That the Secretary of the Interior, for the purpose of eliminating private holdings within the Glacier National Park and the preservation intact of the natural forest along the roads in the scenic portions of the park, both on patented and park lands, is hereby empowered, in his discretion, to obtain for the United States the complete title to any or all of the lands held in private or State ownership within the boundaries of said park, by the exchanges of dead, decadent, or matured timber of approximately equal values that can be removed from any part of the park without injuriously affecting the scenic beauty thereof; or, upon the approval of the Secretary of Agriculture, the timber to be selected or exchanged may be taken from the Government lands within the metes and bounds of the national forests within the State of Montana; and also, in his discretion, to exchange for patented lands in the Glacier National Park along such roads Government lands of approximately equal value within the metes and bounds of the national forests within said State.

The amendment was agreed to.

Mr. GRONNA. Mr. President, I wish to have the bill read in full. I was under the impression that it contained provisions condemning private lands. I have been assured by the Senator from Montana that that part of the bill has been changed, and I should like to have the bill read in full.

The Secretary read the bill.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize an exchange of lands with owners of private holdings within the Glacier National Park."

LIEUT. COL. JUNIUS L. POWELL.

The bill (S. 453) to place Lieut. Col. Junius L. Powell on the retired list of the Army with the rank of brigadier general was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert:

That the President be, and he is hereby, authorized to appoint to the grade of brigadier general, and place him on the retired list with the pay of said grade, one lieutenant colonel, now on the retired list of the Army, who has served continuously for 30 years with credit and distinction as a commissioned officer in the Regular Army, and who also served four years in the Confederate Army with credit and distinction and is now the only officer on the rolls of the United States Army who had such Confederate service; said lieutenant colonel being recommended by the Secretary of War for said advancement and commended in the highest terms by distinguished general officers under whom he served at various times, in Indian campaigns, in the War with Spain, and at numerous garrison stations, during his years of active duty.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MARTIN V. PARMER.

The bill (S. 2880) for the relief of Martin V. Parmer was considered as in Committee of the Whole. It provides that in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged soldiers, Martin V. Parmer, late of One hundred and thirty-eighth Company, Second Battalion, Veteran Reserve Corps, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said company on the 4th day of August, 1864: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHARLES G. GRIFFA.

The bill (S. 4473) for the relief of Charles G. Griffa was considered as in Committee of the Whole. It provides that in the administration of the pension laws and the laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, Charles G. Griffa, now a resident of Oregon, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of Company B, Ninety-third Regiment Ohio Volunteer Infantry: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CLYDE R. ALTMAN.

The bill (S. 3973) for the relief of Clyde R. Altman was considered as in Committee of the Whole. It authorizes the President of the United States to appoint Clyde R. Altman, late a cadet at the Military Academy at West Point, to the position of second lieutenant of Infantry of the Army, and to place him upon the retired list with the pay of a retired second lieutenant of Infantry.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PETER KENNEY.

The bill (S. 1553) for the relief of Peter Kenney was considered as in Committee of the Whole. It provides that in the administration of any laws conferring rights, privileges or benefits upon honorably discharged soldiers, Peter Kenney, late of Company G, Fifth Regiment Michigan Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said company and regiment on the 5th day of February, 1864: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JOHN DUGGAN.

The bill (S. 3268) for the relief of John Duggan was considered as in Committee of the Whole. It provides that in the administration of the pension laws John Duggan, alias John McCarty (or McCarthy), shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of Troop K, Sixth Regiment United States Cavalry, on the 27th day of July, 1865: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PENSIONS AND INCREASE OF PENSIONS.

The bill (H. R. 15048) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war was considered as in Committee of the Whole. The bill had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 1, line 9, before the words "per month," to strike out "$30" and insert "$25," so as to make the clause read:

The name of Laura E. Headington, widow of John W. Headington, late of Company H, and major, One hundredth Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 4, after line 12, to strike out:

The name of Anna L. Yachmann, former widow of Robert W. Scott, late of Company F, One hundred and fifty-third Regiment Indiana Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 5, after line 21, to strike out:

The name of Jennie Raley, former widow of Thomas Raley, late of Companies C and B, First Regiment District of Columbia Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, at the top of page 7, to strike out:

The name of Julia A. Sheck, former widow of Christian Sheck, late of Company G, One hundred and seventh Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 7, line 18, after the name "Aaron D.," to strike out "Egleston" and insert "Egelston," so as to make the clause read:

The name of Aaron D. Egelston, late of Company C, Seventh Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 8, line 6, before the words "per month," to strike out "$40" and insert "$30," so as to make the clause read:

The name of Warren S. Read, late of Company B, One hundred and thirty-seventh Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 11, after line 15, to strike out:

The name of Edward M. Willis, late of Company C, Sixtieth Regiment Massachusetts Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 12, after line 14, to strike out:

The name of Alice A. Wing, widow of Charles E. Wing, late of Company I, Fifty-third Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 13, after line 22, to strike out:

The name of Wallace W. Jackson, late of Company E, Eighteenth Regiment, and Company A, Ninth Regiment, Michigan Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 15, line 22, before the words "per month," to strike out "$24" and insert "$21," so as to make the clause read:

The name of Thomas Tirrell, late of Company K, Seventh Regiment Massachusetts Volunteer Infantry, and pay him a pension at the rate of $21 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 16, line 3, after the name "John," to insert the initial "H.," so as to make the clause read:

The name of John H. Sanders, late of Company G, Fourth Regiment New York Volunteer Heavy Artillery, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 17, after line 4, to strike out:

The name of Abbie M. Holyoke, former widow of Eugene J. Holyoke, late of Company K, Fifty-seventh Regiment Massachusetts Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 22, after line 14, to strike out:

The name of Mary Larkin, widow of James Larkin, late of Company C, One hundred and second Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 23, after line 14, to strike out:

The name of Ellen J. McIntire, helpless and dependent child of John McIntire, late of Company H, Seventh Regiment Vermont Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 24, line 13, before the words "per month," to strike out "$60" and insert "$50," so as to make the clause read:

The name of William B. Gere, late major and lieutenant colonel, Fifth Regiment Minnesota Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 25, after line 11, to strike out:

The name of Kate M. Miller, widow of Stephen C. Miller, late captain and commissary of subsistence, United States Volunteers, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 27, line 11, after the word "Infantry," to insert "and former widow of William S. Koch, late of Company K, One hundred and fifty-eighth Regiment Pennsylvania Volunteer Infantry," so as to make the clause read:

The name of Mary Jane Glaser, widow of William M. Glaser, late of Company H, Seventy-ninth Regiment Pennsylvania Volunteer Infantry, and former widow of William S. Koch, late of Company K,

One hundred and fifty-eighth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 27, after line 15, to strike out:

The name of Silas J. Pickerill, late of Company I, Sixth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 *per month* in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 29, line 3, before the words "per month," to strike out "$24" and insert "$25," so as to make the clause read:

The name of Fannie M. Lorain, widow of Lorenzo Lorain, late captain, Third Regiment United States Artillery, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 29, after line 21, to strike out:

The name of Annie M. Sweeney, widow of Dennis Sweeney, late of Company I, Twenty-ninth Regiment New Jersey Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 30, after line 12, to strike out:

The name of Sarah A. Lofton, widow of John G. Lofton, late of Company I, Thirty-second Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 31, line 4, before the words "per month," to strike out "$30" and insert "$25," so as to make the clause read:

The name of Lucy A. Butts, widow of Frank A. Butts, late of Company H, and major, Forty-seventh Regiment New York Volunteer Infantry, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 31, after line 13, to strike out:

The name of Rosa T. Wallace, widow of William J. Wallace, late of Company A, Eighty-seventh Regiment New York Volunteer Infantry, and Company A, Thirteenth Regiment New York State Militia Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 33, after line 23, to strike out:

The name of Susan A. Cross, former widow of Jacob F. Jackson, late of Company F, Sixteenth Regiment Massachusetts Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 34, after line 6, to strike out:

The name of Otilla H. Smith, widow of Amos T. Smith, late of Company D, Ninth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 35, after line 6, to strike out:

The name of Adelaide V. Disbrow, former widow of David W. Ostrander, alias William Arnold, late of Company A, Eleventh Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 35, after line 22, to strike out:

The name of Precilla A. Chilton, former widow of James P. Chilton, late of Company K, Thirty-first Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, at the top of page 36, to strike out:

The name of Jane C. Smith, widow of William W. Smith, late of Company C, Eightieth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 38, after line 14, to strike out:

The name of Adella I. Cummings, former widow of John A. Cummings, late of Company E, Sixth Regiment New Hampshire Volunteer Infantry, and major, First Regiment New Hampshire Volunteer Cavalry, and pay her a pension at the rate of $25 per month.

The amendment was agreed to.

The next amendment was, on page 38, after line 19, to strike out:

The name of Benjamin F. Longenecker, late of Company B, Seventh Regiment, Company D, Fourth Regiment, and Company L, Twelfth Regiment, Illinois Volunteer Cavalry, and pay him a pension at the rate of $30 per month.

The amendment was agreed to.

The next amendment was, on page 40, line 16, after the words "United States Navy," to insert "and lieutenant colonel, United States Marine Corps," and in line 18, before the words "per month," to strike out "$30" and insert "$20," so as to make the clause read:

The name of Carrie Porter, widow of Carlile P. Porter, late admiral's secretary, United States Navy, and lieutenant colonel, United States Marine Corps, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 41, line 3, after the name "Dunham," to insert "widow of Simeon H. Dunham, late of Company B, First Battalion, Sixteenth Regiment United States Infantry, and," so as to make the clause read:

The name of Alvena A. Dunham, widow of Simeon H. Dunham, late of Company B, First Battalion, Sixteenth Regiment United States Infantry, and former widow of Peter Plant, late of Company H, One hundred and tenth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 44, after line 20, to strike out:

The name of Thomas Lynch, late of Company D, Thirty-fifth Regiment, and Company H, Twentieth Regiment, Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 45, line 11, before the words "per month," to strike out "$50" and insert "$30," so as to make the clause read:

The name of William Turner, late of Company A, Twenty-fourth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The bill (H. R. 14576) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and widows of such soldiers and sailors, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 1, after line 5, to strike out:

The name of Mary E. Bacon, widow of Harvey S. Bacon, late of Company K, Fifty-first Regiment Iowa Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was at the top of page 2, to strike out:

The name of Alexander M. Rainey, late of Companies E, Second, and D, First, Recruiting Battalion, Second Regiment Oregon Mounted Volunteers, in Indian war, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 3, line 19, before the words "per month," to strike out "$17" and insert "$12," so as to make the clause read:

The name of Sankey Gray, late of Company L, Eighth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 6, after line 6, to strike out:

The name of Thomas F. Muldoon, late of Company G, Sixth Regiment Massachusetts Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 6, after line 10, to strike out:

The name of Alice T. McClaughry, widow of John G. McClaughry, late adjutant and first lieutenant, Third Regiment Illinois Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month and $2 per month additional on account of each of the two minor children of the said John G. McClaughry until they reach the age of 16 years.

Mr. STERLING. Mr. President, in the case of Alice T. McClaughry, which is the second amendment on page 6, lines 11 to 17, inclusive, I hope the committee amendment will be rejected. I have gone over the evidence as found in the House report in regard to this item, and I think the finding of the committee in striking it out is against the evidence in the case, fairly considered, and that this claimant ought to be allowed a pension of $12 per month. It may be of interest to state——

Mr. JOHNSON of Maine. I have no objection to the amendment being rejected on the statement of the Senator from South Dakota.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The next amendment was, on page 7, line 25, before the word "Infantry," to strike out "Volunteer," so as to make the clause read:

The name of Henry Dana, late of Companies M, G, and A, Fifth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 8, after line 15, to strike out:

The name of Fred Reidy, late of Company A, Tenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 9, after line 12, to strike out:

The name of John McMahon, late of Company E, Twenty-fourth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 13, after line 6, to strike out:

The name of Mary Buckley, widow of John Buckley, late of Company B, Fourth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 13, after line 17, to strike out:

The name of Francis M. Lamb, late of Capt. Tracy's company B, Battalion California Volunteers, Indian wars, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 14, line 4, before the words "per month," to strike out "$17" and insert "$24," so as to make the clause read:

The name of Joseph D. Donellen, late of Company D, Twenty-seventh Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 14, after line 11, to strike out:

The name of Howard W. Bingham (insane), late of Company G, Signal Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $12 per month. Pay to duly appointed guardian.

The amendment was agreed to.

The next amendment was, on page 15, after line 20, to strike out:

The name of Louis F. Moebus, late chief musician, Second Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 16, after line 9, to strike out:

The name of Matilda Delisle, widow of Joseph Delisle, late of Company G, Fifth Regiment United States Artillery, Regular Establishment, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 17, line 1, after the word "receiving," to insert "and $2 per month additional on account of Edith G. Henderson, minor child of said John B. Henderson, until she reaches the age of 16 years," and in line 11, after the name "Henderson," to strike out: "and also $2 per month additional on account of the minor child, Edith G. Henderson, of said John B. Henderson shall be paid to the widow until she reaches the age of 16 years," so as to make the clause read:

The name of Barbara Henderson, widow of John B. Henderson, late of Troop F, Third Regiment United States Cavalry, Regular Establishment, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving and $2 per month additional on account of Edith G. Henderson, minor child of said John B. Henderson, until she reaches the age of 16 years: *Provided*, That in the event of the death of Susie Elgretta Henderson, helpless and dependent child of said John B. Henderson, the $12 additional pension herein granted shall cease and determine: *Provided further*, That in the event of the death of Barbara Henderson the name of said Susie Elgretta Henderson shall be placed on the pension roll, subject to the limitations and provisions of the pension laws, at the rate of $12 per month from and after the death of said Barbara Henderson.

The amendment was agreed to.

The next amendment was, on page 17, after line 14, to strike out:

The name of Henry Juvenile, late of Troop M, Third Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 18, after line 11, to strike out:

The name of Roy Tow, late third-class electrician, United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

DONATIONS OF CONDEMNED CANNON.

Mr. TILLMAN. Mr. President, I ask unanimous consent for the immediate consideration of Senate bill 6625, calendar No. 605. It is a bill in which many Senators are interested, as it donates condemned cannon and cannon balls for monuments, mainly to Grand Army posts. There are two or three items in the bill, however, for the South, and in one of these I am very much interested. In that item only the element of time enters, because the bill must pass the House after it passes the Senate to become a law, and that will take some time.

The Daughters of the American Revolution chapter of Gaffney, S. C., have recently removed the bones of Col. James Williams, who was killed at the battle of Kings Mountain, October 7, 1780, to the public square in the town of Gaffney, where these good women desire to erect a monument to his memory. The battle field of Kings Mountain is only a few miles distant from Gaffney, and the desire is to have the monument erected and its dedication occur on the anniversary of the battle.

Therefore it is easy to understand why I am urging the passage of this bill. The cannon and cannon balls can be obtained at the arsenal in Augusta, Ga., and their installation, the erection of the monument, and everything else connected with it will have to be pressed with energy.

I urge action on this bill in order that the ladies of Gaffney may know that they can get the cannon and cannon balls without paying for them. I am sure no one will object under these circumstances.

Mr. GALLINGER. The next two bills on the calendar provide for payment of six months' salary to widows of men who have died in the service of the Senate. I hope they will be acted on. They will take but a moment, after which I trust the bill in which the Senator from South Carolina is interested will be passed without objection.

Mr. TILLMAN. It will take only a moment to pass this bill. It is entirely unobjected to.

Mr. GALLINGER. Let these two poor widows be provided for, and then act on the Senator's bill.

The VICE PRESIDENT. Does the Senator call for the regular order?

Mr. GALLINGER. I ask that we take the next two resolutions in order on the calendar.

CAROLINE L. RIFENBERG.

The resolution (S. Res. 121) authorizing the Secretary of the Senate to pay to Caroline L. Rifenberg, widow of Sherman Rifenberg, late a laborer in heating department of the United States Senate, a sum equal to six months' salary at the rate he was receiving at the date of his death was considered and agreed to, as follows:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, from the miscellaneous items of the contingent fund of the Senate, to Caroline L. Rifenberg, widow of Sherman Rifenberg, late a laborer in heating department, United States Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

CLARA M. CURRAN.

The resolution (S. Res. 136) to authorize the Secretary of the Senate to pay Clara M. Curran, widow of John W. Curran, late a laborer of the United States Senate, a sum equal to six months' salary, etc., was considered and agreed to, as follows:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay from the miscellaneous items of the contingent fund of the Senate to Clara M. Curran, widow of John W. Curran, late a laborer of the United States Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

DONATIONS OF CONDEMNED CANNON.

Mr. TILLMAN. I ask the Senate now to consider the bill (S. 6625) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized, in his discretion, to deliver—

To the city of Evanston, in the State of Wyoming, two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls.

To Crocker Post, Grand Army of the Republic, Des Moines, Iowa, one bronze or brass condemned cannon, with a suitable outfit of cannon balls.

To Bluff City, Sullivan County, Tenn., two brass or bronze cannon and a suitable outfit of cannon balls.

To the town of Roxbury, Conn., one condemned bronze or brass cannon or fieldpiece and a suitable outfit of cannon balls.

To the Odessa, Wash., public schools, two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls.

To Bradley Post, No. 134, Grand Army of the Republic, at Wood River, Nebr., one bronze or brass condemned cannon or fieldpiece and a suitable outfit of cannon balls.

To Pawnee Rock State Park, Pawnee Rock, Kans., two cannon or fieldpieces and a proper outfit of cannon balls for a pyramid.

To Harlan Post, No. 197, Grand Army of the Republic, at Harlan, Iowa, two brass or bronze cannon or fieldpieces and a suitable outfit of cannon balls.

To the commanding officer, National Guard armory, in the city of Anoka, Minn., two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls.

To the city of Detroit, in the State of Minnesota, one condemned bronze or brass cannon or fieldpiece and a suitable outfit of cannon balls.

To the city of Blue Earth, in the State of Minnesota, one condemned bronze or brass cannon or fieldpiece and a suitable outfit of cannon balls.

To the city of Roseville, in the State of Ohio, one condemned bronze or brass cannon or fieldpiece and a suitable outfit of cannon balls.

To the order of McDowell Post, No. 22, Department of Washington and Alaska, Grand Army of the Republic, two condemned cannon and a suitable outfit of cannon balls for each.

To the town of Northville, in the county of Wayne, State of Michigan, two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls.

To the Grand Army of the Republic at Pomeroy, Wash., two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls.

To Henry W. Lawton Camp, No. 10, United Spanish War Veterans, Walla Walla, Wash., two condemned bronze or brass cannon or fieldpieces and a suitable outfit of cannon balls.

To the Daniel Morgan Chapter of the Daughters of the American Revolution, Gaffney, S. C., two condemned bronze or brass cannon and a suitable outfit of cannon balls.

To the board of supervisors of Halifax County, Va., two condemned bronze or brass cannon and a suitable outfit of cannon balls.

To James B. Sample Post, No. 170, Grand Army of the Republic, at Fort Madison, Iowa, two brass or bronze cannon or fieldpieces and a suitable outfit of cannon balls.

To Alexander Hamilton Chapter, No. 7, Sons of the American Revolution, at Sheldon, Iowa, two brass or bronze cannon or fieldpieces and a suitable outfit of cannon balls.

Provided, That no expense shall be incurred by the United States through the delivery of any of the foregoing condemned military equipment: *Provided further*, That each and every article of condemned military equipment covered by this act shall be subject at all times to the order of the Secretary of War.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF STORM SUFFERERS.

Mr. BANKHEAD. I desire to introduce a joint resolution and ask the unanimous consent of the Senate for its present consideration. There can be no objection to it.

The joint resolution (S. J. Res. 155) for the relief of storm sufferers in Alabama and Mississippi, was read the first time by its title.

Mr. SMOOT. There was so much confusion in the Chamber I could not hear what the joint resolution is.

The VICE PRESIDENT. It will be read at length.

The joint resolution was read the second time at length, as follows:

Resolved, etc., That there is hereby appropriated and made immediately available, out of any money in the Treasury not otherwise appropriated, the sum of $20,000 for the purchase and distribution of seeds by the Secretary of Agriculture to the people in the storm and overflowed localities in Alabama and Mississippi who are made destitute by the recent storms and floods in those States.

Mr. SMOOT. Does the Senator from Alabama desire to have the joint resolution referred to the Committee on Appropriations?

Mr. BANKHEAD. Mr. President, an item covering this matter has been included in the Agricultural appropriation bill by the unanimous consent of the Senate. That bill is in conference and the indications are that it will be quite a while perhaps before the conferees reach an agreement. The situation is such that if this relief is to be given at all it ought to be given immediately because it will be too late in a few days to plant any crop of any kind. That is the purpose of the joint resolution. These suffering people are almost exclusively negroes and they are absolutely destitute and helpless.

Mr. SMITH of Georgia. The provision in the Agricultural appropriation bill is for $10,000, not $20,000. The joint resolution proposes to appropriate $20,000. All down the eastern side of the Chattahoochee in the State of Georgia the same condition exists.

The VICE PRESIDENT. The hour of 12 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. SMOOT. I ask the Senator having the bill in charge if he will not agree to lay it aside temporarily for one hour and let us get through with the calendar.

Mr. SWANSON. I can not. I must insist on proceeding with this bill.

Mr. SMOOT. It would not take more than an hour to get through with the balance of the cases on the calendar.

The VICE PRESIDENT. Is there objection to the consideration of the joint resolution introduced by the Senator from Alabama.

Mr. OVERMAN. Mr. President, I do not like to object to it. I have not offered anything for the sufferers in North Carolina. The papers have been full of accounts of great loss of life and destruction of property and the starving condition of people there. Of course if anything is done for Alabama I will have to ask it for North Carolina. I think the Senator from Alabama had better let the joint resolution go to the committee.

Mr. BANKHEAD. I can not help myself if the Senator objects to it.

Mr. OVERMAN. I do not want to object, but——

Mr. SWANSON. Regular order!

The VICE PRESIDENT. The joint resolution will go to the Committee on Appropriations.

PROSPERITY AND THE FEDERAL RESERVE ACT.

Mr. SHAFROTH. Mr. President, in compliance with a notice which I gave on Monday I desire to submit some remarks on prosperity and the Federal reserve act.

Mr. President, the Wilson administration has been in power for more than three years. Upon assuming control of the Government it found the business life of the Nation in a deplorably enfeebled condition. The disastrous effects of the panic of 1907 were still distressingly evident, and were sharply reflected in the prevailing low prices of railway, industrial, commercial, and other stocks and securities. It has been estimated that the losses occasioned by that panic were equivalent to the destruction that would be wrought if a mighty conflagration had devastated a strip of our land, including towns and the smaller cities thereon, 100 miles wide and extending from the Atlantic to the Pacific Ocean.

There was no occasion or excuse for that panic, as the banks were solvent. It had its beginning and ran its wild, unchecked course because there were no laws by which banks might discount their commercial paper and thus obtain currency to meet the demands of their depositors, although the Republican Party had been in power almost uninterruptedly for more than a generation. At that time each bank had to stand on its own bottom; it had to weather the storms alone and unaided or go down. When the money stringency began banks felt impelled to call in loans and thus build up reserves, so as the better to meet the demands of depositors. They could not discount their commercial paper because other banks, being in like circumstance, also needed to increase their reserves. The fear of depositors that they could not get their funds when needed caused withdrawals and the hoarding of large quantities of money.

That very action of the banks in the calling of loans aggravated the stringency of the money market and eventually precipitated the panic. Panics produce insistent demands for the payment of debts. The immediate effect is the foreclosure of securities hypothecated as collateral, causing the sacrifice at ruinous prices of stocks, bonds, and other evidences of wealth. Then mortgages are foreclosed and the property is bought in at half price, and the value of all property follows the low prices established by the mortgage sales. Thus even the unencumbered property of a country is by the action of a panic greatly reduced in value.

The depressing effects of the 1907 panic extended through the balance of the Roosevelt administration, through all of the Taft administration, and into the first part of the Wilson administration. So sluggish were the channels of commerce, so stagnant the currents of trade, that hundreds of thousands of empty railway cars remained on sidetracks for years. Many factories were closed, and thousands were running only on half time. Industrial and railway stocks had been falling for a long period.

THE FEDERAL RESERVE ACT.

Mr. President, one of the first laws to be enacted during the Wilson administration was the Federal reserve act, a piece of legislation which may well be styled a charter of freedom to the business interests of the Nation.

THE ALDRICH-VREELAND ACT.

A sharp controversy has arisen recently as to whether it was by virtue of the Aldrich-Vreeland Act or the Federal reserve

act that the panic of 1914 was averted. It is universally conceded that at the outbreak of the European war on July 30, 1914, all the conditions of a most disastrous panic existed in the United States. Suddenly, and without warning, selling values of our principal products sank so low that it can be said there was in reality no market for them. Cotton which just previously had been selling for 11 and 12 cents suddenly dropped to 5 and 6 cents a pound. Credits that had been extended on normal values suddenly collapsed, and forced sales at sacrifice prices were threatened. Everything indicated that the most gigantic panic this country had ever experienced was imminent.

The original Aldrich-Vreeland Act was in existence, having been passed on May 30, 1908; but it was not workable. It provided for the issuance of emergency currency by the Government to the banks through their associations to the extent of not exceeding $500,000,000 upon the hypothecation of securities, the banks paying a tax at the rate of 5 to 10 per cent per annum dependent upon the length of time of the accommodation. It was not intended to be a permanent statute, as its existence was limited in the act itself to June 30, 1914. The Federal reserve act of December 23, 1913, extended its life to June 30, 1915, and the Republicans themselves by voting against that act voted against the extension. The Federal reserve act provided for a reduction of the tax for the issuance of the currency to the rate of from 3 to 6 per cent per annum, the former higher rates having rendered it unworkable. No currency under the act had been issued.

The Federal reserve banks had not been organized at this time, but the Secretary of the Treasury courageously undertook to avert the panic, and with singular foresight and energy took steps to remove further obstacles in the way of rendering the Aldrich-Vreeland Act workable. At his instance Congress on August 4, 1914, amended the act by giving him authority as Secretary of the Treasury to suspend the limitations which prescribed that the circulation should be issued only to national banks having notes outstanding to an amount not less than 40 per cent of their capital stock, and also to suspend the limitations of section 5 of that act. The amendment made the act more liberal and permitted a bank temporarily through its association to issue circulating notes to the amount of 125 per cent of its unimpaired capital and surplus.

Mr. OWEN. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Oklahoma.

Mr. OWEN. I wish to emphasize the point the Senator is now making and to state that the act of August 4, 1914, really had the effect of suspending the operations of the obstructions imposed in the Vreeland-Aldrich Act in section 1, section 3, section 5, section 7, and section 9.

Mr. SHAFROTH. I fully appreciate the fact that if it had not been for that amendatory act there never would have been any currency issued under the Aldrich-Vreeland Act. It is absurd to say that an act which required from 5 to 10 per cent interest as a penalty or tax and which imposed the other harsh restrictions of the original act affecting the issuing of currency would ever have been utilized by the banks of the United States. The act of August 4, 1914, permitted the banks to issue money under certain regulations and restrictions to the extent of 125 per cent of their paid-up capital and surplus. It was in view of those two amendments, both of which were absolutely necessary to make the Aldrich-Vreeland Act available and workable that the currency was issued in 1914.

NO CURRENCY ISSUED UNDER ORIGINAL ACT.

No currency under the Aldrich-Vreeland Act was issued until after the approval of that amendment on August 4, 1914.

The bankers had refused to take out circulation under the provisions of the original act, although stringency in the money market had appeared for years at crop-moving periods and stringency had been felt for more than a year caused by some of the European nations drawing gold from us to prepare for the great conflict.

It was not until both of these amendments were passed in the Wilson administration that the act became workable and thereafter currency to the amount of $382,502,645 was issued.

It required not only the amendments to the law, but the most active and persistent efforts upon the part of Secretary McAdoo to induce the bankers to take out the emergency circulation.

But the greatest force of all in preventing the panic was the confidence implanted in the minds of the bankers and in the people by the passage of the Federal reserve act. The bankers realized immediately upon its passage that with the protecting power of the Federal reserve banks they need never fear a run upon their deposits as long as they had commercial paper in their vaults and that they need not make further calls of their loans. The depositors knowing of that protecting power, relied with confidence upon its effectiveness. No matter under what law the panic was averted, no one can deny great credit to the Wilson administration for having prevented the greatest catastrophe that ever threatened the business activities of the Nation.

Mr. President, three great beneficial results followed from the passage of the Federal reserve act:

First. The concentration and mobilization of reserves in the 12 nonprofit, public-serving Federal reserve banks, which theretofore had been scattered among the 367 national banks of the 47 reserve cities and 3 central reserve cities of the Union, each looking out first for its own interest. These reserves can now be utilized when there is a stringency in the money market, thereby making secure to the people their deposits and preventing panics with their resultant destructive effects upon business and property values.

Second. The establishment of an unlimited public discount market for gilt-edged commercial paper instead of the old system of relying upon the ability or desire of large privately owned institutions to discount the same. These institutions discounted adequately in times of tranquillity, but they often withheld the service in times of stress and panic, when the very existence of the banks depended upon the cashing of their paper. It is this discount market which in times of panic protects the solvent banks from failure and the depositors thereof from loss of their savings.

Third. The issuance of an elastic currency by the Government to meet the demands of commerce as long as prime commercial paper bearing the indorsement of the maker, the acceptor, the national bank, and the Federal reserve bank, can be presented to the National Government as security for the same. The issuance of this currency automatically responds to the demands of commerce.

Not one dollar of loss has ever been sustained on account of the issuance of currency under the Federal Reserve System.

ADEQUATE MONEY SUPPLY A PRIME NECESSITY.

No one factor has such a far-reaching influence upon commerce as an adequate supply of money. The scarcity of money caused by the locking up of reserves not only produces stagnation and depression but often suspension and destruction of industries, while an adequate supply produces increased commerce and prosperity.

The beneficial effects of the Federal reserve act were realized almost immediately after its passage. In fact, confidence in the ability of the banks to meet all demands followed even before the system was put in operation. Instead of banks further accumulating large reserves in their vaults in anticipation of a crisis, they began to loan money to their customers, and thereby the wheels of commerce began to move with increasing activity. Instead of limited deposits being the rule as for so many years, millions of currency that had been hoarded and concealed were deposited in banks and thereby entered into the channels of commerce, all of which accelerated an activity in business the equal of which has never been known in the history of the world.

Mr. OWEN. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. OWEN. Would it interrupt the Senator now to have presented the evil prophecy which was made by the leader of the Republicans as to the results which would occur?

Mr. SHAFROTH. I should be pleased to have it.

Mr. OWEN. Hon. Elihu Root, speaking to the Democratic side, denounced the bill, and declared that in the event of war it would bring complete catastrophe upon the United States. He said:

> There is another thing you must remember. Europe is an armed camp. For many, many years peace has been kept by the most delicate adjustments and by the most strenuous exertions of many men in many countries, who have been alert and solicitous to stop controversy as near its origin as possible and to prevent the frightful effect of general war; but war is always possible. The fear of it is always present. If a war comes, immediately our securities come back to us. Immediately, in every country where they are held, the desire to strengthen up, to increase the amount of gold, will operate to lead to a general conversion of the American securities they hold into immediately available gold.
>
> It is not necessary that we should wait for a war actually to take place. The fear of it leads to the result. The fear of the Balkan war, far off on the edge of civilized Europe, as it was, because of the apprehensions of possible implication of the great commercial nations in a war consequent upon the Balkan war, sent hundreds of millions of securities back to this country, which had to be bought.
>
> So, sir, if we enter upon this career of inflation we shall do it in the face of clearly discernible danger—danger which, if realized—

That is, war—

will result in dreadful catastrophe.

He said also:

> Ah, Mr. President, we are turning our faces away from the fundamental principle upon which we have come to our high estate. We are turning them weakly toward practices which history shows have invari-

ably led to decadence, to degradation, and the downfall of nations. We are setting our steps now in the pathway which through the protection of a paternal government brought the mighty power of Rome to its fall.

He said also in the same connection:

I say that this bill presents the financial heresy twice repudiated by the people of the United States. I say that the central reserve board appointed under this bill will have to represent that very heresy. If this bill passes as it stands, America stands to lose all we saved when Grant vetoed the inflation bill, all we saved when Grover Cleveland abolished the silver purchase, all we saved when we elected McKinley, all the Republicans, all the gold Democrats saved when they helped in the repudiation of the vital principle which has been put into this bill.

DEPOSITS INCREASE $2,741,949,228.

Mr. SHAFROTH. Mr. President, I thank the Senator from Oklahoma very much for the quotation he has made from the speech of the former Senator from New York. I wish now to show that instead of that prophecy materializing there has come the most wonderful development and the most marvelous prosperity that has ever existed in the history of this country.

Instead of gold leaving our country as was predicted by the able former Senator from New York, we have now a stock of gold, including all redemption funds, of $2,400,000,000, an increase of more than $1,000,000,000 over the amounts which were held at the time he made his prediction.

The gross bank deposits of the 7,578 national banks have grown from $8,393,372,772.65 on January 13, 1914—about the time of the passage of the Federal reserve act—to $11,135,322,000 on May 1, 1916, an increase in two years and four months of the enormous sum of $2,741,949,228.

The quantity of money in circulation in the United States on July 1, 1915, was $3,585,140,626 or $35.59 per capita, while that on July 1, 1916, was $4,018,043,555 or $39.23 per capita, an increase of $432,902,929 in one year.

Mr. CURTIS. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. CURTIS. I wish the Senator would tell us, in view of the statement he has just made, if there has been so much money and it has been so easy to get why there were more failures in 1914 than in 1913, and why there were more in 1915 than in 1914, and why so far in 1916 there have been more than for the same month in 1915 or 1914 or 1913?

Mr. SHAFROTH. I will state to the Senator I am not familiar with the figures he has quoted, but I have taken the reports from Bradstreets's and Dun's agencies which indicate that the failures are less now and have been less at least for the last year than the year preceding.

Mr. CURTIS. Mr. President, if the Senator will allow me, I should like to state that the failures show from 1914 a record breaker. In that year there were 15,759 failures. In 1915 there were 19,322 failures. The failures in 1916 will amount to 19,984 if the ratio is kept up.

Mr. SHAFROTH. I presume that what the Senator is trying to prove is that there is no prosperity in the land.

Mr. CURTIS. No, Mr. President; what I am trying to show is that there is prosperity in certain lines but the prosperity is not general, as the Senator tries to make believe.

Mr. SHAFROTH. Mr. President, I want to meet that issue fairly. I will do it by a reference to the reports of agencies that are nonpartisan and which are the most complete organizations for commerce in the world and by quotations from even independent and Republican newspapers.

Other causes to some extent no doubt aided this upward tendency, but the predominant accelerating force was the passage and operation of the Federal reserve act. It was freely predicted at the time of the passage of this act that New York City would soon become the financial center of the world. The fact that the banks of that city since that time have financed loans extending into the billions, including one to Great Britain and France of $500,000,000, demonstrates the fulfillment of the prophecy.

I have heard of administrations going down in defeat because of stagnation and depression in the business of the country, but I have never heard of a political party which, through the passage and administration of laws producing or accelerating prosperity, was repudiated by the people.

Opinions may differ as to the cause of our prosperity, but in view of the evidences that are daily published it seems to me no one can deny that the long-looked-for period of abundance is now here in the administration of President Wilson. Disaster and depression, predicted by our opponents upon the accession of the Democratic Party to power, have faded before the sun of smiling plenty and prosperity.

EVIDENCE OF THE MARVELOUS PROSPERITY.

We do not prove our claims of prosperity by our own declarations. They come from the facts detailed not only in Democratic but also in independent and Republican newspapers. These declarations are printed not occasionally but nearly every day in the columns of the press.

I have been a constant reader for years of the Washington Post, an independent, able, and conservative newspaper. It has no bias in favor of President Wilson; on the contrary, it has been opposed to most of his policies during the past three years, but in recording conditions which it finds exist it is eminently fair. In an editorial printed in that newspaper on May 22, 1916, entitled "This wonderful year of gigantic business," the following language is used—I want to direct the attention of the Senator from Kansas to the language showing the general character of this prosperity. It says:

Woolen, cotton, silk, steel, iron, glass, pottery, coke, machinery, tools, and chemical industries are to-day running at their utmost capacity, and yet they are now facing for the autumn and winter trade a demand that is unparalleled in volume and in value, and there are months of the greatest activities ahead of the majority of our industries.

The recent advances in the wages of a majority of the largest numbers of skilled and unskilled workers has added scores of millions of dollars to the purchasing power of the masses of our population, and this purchasing power is having a telling effect upon the stocks of the merchants and the shopkeepers, and is resulting in heavy orders for new stocks from the manufacturers.

It is a year of enormous business in this Republic, and every month between now and January 1, 1917, will find the general business exhibiting larger totals in volumes and values.

In an editorial in the same newspaper on June 5, 1916, entitled "General business steadily improves," the following statement appears:

Labor in this country never before was so fully employed, never before received such a high average per capita of pay.

This is a positive proof of prosperity.

This is an evidence of a purchasing power now possessed by the masses of the people of the United States beyond that of any prior period in the history of the Republic.

That purchasing power of the masses insures large and profitable trade to the merchants, busy times for the industrial establishments, large home demand for the products of our lands.

General business, in volumes and values, will pass beyond all records during the autumn and winter months of 1916.

Mr. President, is there a clearer or more convincing answer to the statement or contention of the Senator from Kansas than is contained in these two editorials?

The Washington Post published a very able editorial in its issue of July 1, 1916. It is as follows:

BUILDING UP THE UNITED STATES.

Exchanges from all over the United States carry reports of contracts let in their immediate vicinities for railway construction, highway construction, municipal construction, and for private building work, and totaling these contracts is most convincing as to the fact that there is now beginning in the United States an exceedingly widespread and comprehensive building and construction movement.

If we begin at the coast cities and harbors of the country, we find a great demand for terminals, docks, and warehouses, and we also find conditions of commerce which fully justify the investment of funds in the construction of such terminals, docks, and warehouses.

In every commercial district of every town and city in the United States the stimulant of good times has produced an optimism as to the future that is compelling expansion and extension of stores and shops and the building of larger, finer, and more commodious new structures.

New hotels and apartment houses are the favorites of the day as investments of capitalists fond of realty operations, while moving-picture theaters and garages are a close second as paying propositions for those having funds to invest and who desire handsome returns from the very beginning of the business.

In the manufacturing districts of the country—

I want to call the attention of the Senator from Kansas to this statement to show that the prosperity is great and general—

it is new mills, new factories, new shops, new potteries, new glass houses, new homes, new offices, new storehouses, new buildings of every class needed where business is breaking all records and profits are coming in every day.

* * * * * * *

There are new depots, new car shops, new roundhouses, new machine shops, new repair shops, new storage houses to be erected, and the beauty of the railway situation is that the money necessary to pay for these buildings is being earned by the operations of the roads, and the American public is ready to buy railway securities now to the extent of thousands of millions of dollars and the railway managers do not have to beg foreign syndicates to place them.

There is a new navy to build and a new mercantile marine to construct, and every shipbuilding yard in our country has already work for years ahead.

Is there any other form of business prosperity which our bankers, our merchants, our manufacturers, our farmers, our workingmen would like to have? Everything seems coming their way.

No better index of the business conditions in a country exists than the reports of Bradstreet's and Dun's Commercial Agencies. They are nonpartisan, keep in close touch with commerce in all lines, and each week give a general review of conditions in the United States. For the last year they have been noting the marked increase of activity in industry and commerce, and they have recorded the fact that there has been a greater increase of production in all lines of industry in the United States than has

occurred in the entire history of the Republic. Bradstreet's Weekly Review of October 9, 1915, was as follows, and I invite the attention of the Senator from Kansas to this statement:

EVERY INDUSTRY GOING AT TOP SPEED.

In the economic situation performance follows promise at a rapid pace, and as unfavorable factors are eliminated even lagging lines are brought in touch with the circle of growing activity. Industry shows notable activity. Shipyards are working at top speed, steel mills are producing at a rapid rate, blast furnaces are working at an unparalleled gait, eight of the country's crops are of record proportions, this week's bank clearings reached peak point, textile mills are on full time, woolen mills are busy, plants making munitions of war are overtaxed, flour millers are pushing production on a night-and-day basis to take care of home and foreign demands, machine tool shops are turning down orders because of inability to make deliveries, building values for September show a sharp gain over last year, our relations to international political affairs are seemingly more reassuring than at any time since the European war started, and almost everywhere in the country optimism is rife. Weekly bank clearings, $4,861,657,000.

Following that, I desire to call attention to Bradstreet's Weekly Review of November 6, 1915, which I ask to insert in the RECORD without reading. It is a very optimistic statement.

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

Two features loom large in this week's reports, the ever-widening activity of trade and the increased momentum attained in many industries. Out of these grow overtime in factory, mill, and shop; progressive improvement in industries almost wholly dependent on domestic wants; larger pay rolls; sustained, if not increased, demand upon jobbers and wholesale dealers; more confident futures buying, accompanied, however, by urgent calls for goods already ordered, and although mild weather has prevented retail trade in the cities from running its full course, much of the slack in this respect has been taken by increased buying in various country districts. Apparently pessimism has been altogether unseated, activity in the stock market continues, money is plethoric, legitimate demand is being supplied at easy rates, collections are freer, railway traffic east and northwest is of record proportions, the grain movement from the leading producing States has reached a new high-water mark, production of pig iron is the largest in the history of the country, prices for iron and steel continue on an ascending scale, and railway buying indicates pressure to get orders booked. Weekly bank clearings, $4,482,962,000.

Mr. SHAFROTH. Dun's Review of July 1, 1916, in its report of the entire year, says:

Further remarkable progress in finance, commerce, and industry has been achieved during the fiscal year just ended. Domestic production and distribution have surpassed all reports, with profits unprecedented and the enormous growth in over-sea trade has placed this country in the foremost position in the money markets of the world.

Mr. President, when the Senator from Kansas admits that there is prosperity in some lines, meaning evidently munitions of war, I do not see how he can blind himself to the nonpartisan reports made by Dun's agency, by Bradstreet's agency, and reaffirmed by nonpartisan newspapers in the United States.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. SHAFROTH. I yield.

Mr. CURTIS. I should like to ask the Senator again—and I wish he would answer the question—whether or not the fact that there were 16,759 failures in 1914, which broke the record for any year prior to that time, and that there were in 1915, 19,032 failures is not evidence that there is not general prosperity, as intimated by the Senator from Colorado?

Mr. SHAFROTH. Well, Mr. President, I may have to read some more of these quotations in order to demonstrate my contention to the Senator.

Mr. MARTINE of New Jersey. Mr. President——

Mr. SHAFROTH. I yield to the Senator.

Mr. MARTINE of New Jersey. I ask whether it would disconcert the Senator if I should present a matter for the consideration of the Senator from Kansas?

Mr. SHAFROTH. Not at all.

Mr. MARTINE of New Jersey. It is uncomfortable, I know, but the truth must be told. What I am about to read is not from Dun's, but is from the Philadelphia North American, in an issue of May last. The headlines are:

Five hundred thousand dollars will be put into new factories and mills in Philadelphia—Flood of building orders will give army of workers jobs—Another rubber plant—Prudential Woolen Co. to build structure on new site.

I will not read it all; but it goes on to say that a new plant is being constructed by the American Radiator Co., that a new dyeing plant of large capacity is being erected in Philadelphia, that an autocar company is increasing its plant, and that all the alterations and additions contemplated will make possible the employment of many hundreds of persons, with the result that labor will be scarce in Philadelphia for months to come. Happiness and prosperity seem to prevail, notwithstanding the fact that the Democratic Party is in power. It is a sad and sorry thing for our friend from Kansas, but he will have to take the pill, however bitter it is. I ask, Mr. President, that the article to which I have referred, from the Philadelphia North American, be inserted in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article referred to is as follows:

FIVE HUNDRED THOUSAND DOLLARS WILL BE PUT INTO NEW FACTORIES AND MILLS IN PHILADELPHIA—FLOOD OF BUILDING ORDERS WILL GIVE ARMY OF WORKERS JOBS—ANOTHER RUBBER PLANT—PRUDENTIAL WOOLEN CO. TO BUILD STRUCTURE ON NEW SITE.

Although all the mills and factories of the city are working under pressure, they find themselves completely overwhelmed by the flood of orders being received. As a result new factories and mills, to cost $500,000 or more, are springing up in the manufacturing districts, and contracts are daily being signed for more.

A two-story-and-basement mill is to be built for the Belmont Packing & Rubber Co. at Janney and Butler Streets, size 80 by 130 feet. A two-story boiler house is to be built for the Atlantic Refining Co. at Twenty-eighth Street and Passyunk Avenue, this building to measure 99 by 100 feet.

At a cost of $25,000 the American Radiator Co. will build a one-story warehouse addition at the northwest corner of Wharton and Taylor Streets, size 120 by 134 feet. The Prudential Woolen Mills will erect a one-story factory, to measure 92 by 170 feet, at the northeast corner of Large and Orthodox Streets, at a cost of $23,000. A warehouse is to be erected at Front and York Streets for Derbyshire Bros. and a factory building for Leeds & Northrup at Wayne Junction.

NEW DYEING PLANT.

There will be built a factory building at Holmesburg for the Summerdale Dyeing, Printing & Finishing Works. F. W. Tunnell & Co. are having extensive alterations made to their factory at Gaul Street and Wheatsheaf Lane, and alterations are to be made to the factory of the Pringle Electric Co., 1906–1912 North Sixth Street.

Additions and alterations will be made to the buildings of the New York Pie Baking Co. at 2505 Lombard Street, and the Counties Gas & Electric Co. will build a new transformer building at Ardmore. A warehouse will be erected at Second and York Streets for the Stelwagon Manufacturing Co.

In addition to this, work is about to begin upon alterations to the factory of the Hardwick & Magee Co., at Seventh Street and Lehigh Avenue, and a weave shed is to be built for A. Holmes & Son, Allegheny Avenue and A Street. The John Illingsworth Co. will erect a foundry building at Lewis Street, east of Tacony, and extensive alterations will be made to the boiler house of the Westmoreland Dye Works, Westmoreland and Jasper Streets.

AUTOCAR CO. TO BUILD.

A large new storage building will be built at Ardmore for the Autocar Co.; a factory building for the New Jersey Leather Co., at Camden; alterations to the warehouse of the Magnesia Covering Co., at 1927–1929 Market Street; and extensive machine-shop alterations for the General Manufacturing Co., Snyder Avenue and Swanson Street.

Benjamin Alexander will erect a loft building at Nineteenth and Wood Streets, and extensive alterations will be made to the factory building of the Orinoka Mills Co., Somerset and Jasper Streets.

All these alterations and additions will make possible the employment of many hundreds of persons, with the result that labor will be made more scarce in Philadelphia in the months to come.

Mr. CURTIS. Mr. President, the Senator from Kansas is perfectly willing to take the "pill," but he calls attention to the fact that those matters largely grow out of war conditions, out of contracts for war materials or materials that are used by the nations engaged in war.

Mr. MARTINE of New Jersey. Frankly, I say that some portion of it is due to the war, and I would sacrifice it all if I could. God knows I want none of the war profits; but you have got to realize the fact that the world is moving.

I have here a copy of the Washington Times of to-day, which contains a dispatch from Philadelphia in relation to the tremendous growth of the shipbuilding industry in that city. I ask that the dispatch referred to may be published in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The dispatch referred to is as follows:

SHIPBUILDING BOOM ON IN PHILADELPHIA—WITH NEW YARDS AND CONTRACTS CITY BECOMES CENTER OF INDUSTRY.

PHILADELPHIA, *July 19, 1916.*

An investigation by the United Press to-day disclosed that with present facilities and those being added under millions of dollars' worth of new contracts just closed this city in less than 12 months will be the greatest and biggest shipbuilding center in the world.

There are now under construction or contracted for 76 ships with a total gross tonnage of 420,253. Millions of dollars are being poured into the shipbuilding industry along the Delaware River. Thousands of men are working long hours getting new shipyards together.

This tremendous boost is due primarily to the fact that the seas have been practically stripped of foreign shipping by the European war, and there is an enormous demand for bottoms which will carry foreign and domestic sea trade.

All the big yards here are jammed with all the work they can do for the next three years. They are refusing orders every day. Among the largest of these yards is the Cramp Co., New York Shipbuilding Co., Philadelphia Navy Yard, Pusey & Jones, Harlan & Hollingsworth, Chester Shipbuilding Co., and Quigley & Dorp.

The Pennsylvania Shipbuilding Co. is completing a big new $6,000,000 yard.

The Sun Shipbuilding Co., organized by New York, Philadelphia, and Pittsburgh men, is completing a new yard, costing several million. A report to-day shows that Cramp is building 13 ships, with a total gross tonnage of 81,300; the Chester Co., 10 ships, with 48,500 tonnage; the New York Co., 24 ships, with 126,305 tonnage; Harlan & Hollingsworth, 14 ships, with 85,000 tonnage; Pusey & Jones, 9 ships, with 37,048 tonnage; and the Pennsylvania Co., 6 ships, with 42,000 tonnage.

Mr. SHAFROTH. Now, Mr. President, in answer to the declaration of the Senator from Kansas [Mr. CURTIS] I desire to call attention to a few sentences from Dun's Review of November 13, 1915, in which it is said:

In spite of the rapidity of the movement, there is no slackening of the advance that foreshadows the greatest commercial development in the history of the country. * * *

Some of these, such as the figures of merchandise exports, pig-iron output, bank clearings, and railroad earnings, bring to light achievements without precedent, and to the list of remarkable attainments have been added those of unfilled steel tonnage and commodity prices.

I also call his attention to Bradstreet's Report of July 1, 1916, which contains the following statement:

While finishing the most active six months ever experienced, trade as well as industry keeps on moving at an active pace, such seasonal slack as generally intervenes at this time of year being less conspicuous than usual and in effect quite fully, if not wholly, offset by rush orders placed by the United States Government for Army supplies.

Mr. President, the Senator says there is prosperity among the munitions factories. There is no doubt of that; but to say that that constitutes the bulk of prosperity that exists is absurd. Our whole foreign trade does not exceed 5 per cent of our total trade; the munitions part of the shipments is a fraction only of the foreign trade; and, consequently, to say that the present prosperity is only among a few people who manufacture and deal in munitions of war, it seems to me, is absolutely absurd.

FORMER REPUBLICAN COMPTROLLER'S TRIBUTE.

Mr. William B. Ridgely, a former Republican Comptroller of the Currency, in an interview made public in New York a short time ago, declared that the present prosperity of the United States rests upon safe and sure foundations. He admits that the Federal reserve act is largely responsible for this prosperous condition. In part, he said:

The balance of trade in favor of the United States for the first nine months of the current fiscal year down to the end of March reached the enormous sum of $1,491,000,000, more than double that of last year and something over three times that of the same period of 1913 and 1914. This is at the rate of about $2,000,000,000 a year, in round figures. During the whole history of the Government, from Washington to McKinley, a period of over 110 years, the total balance of trade in our favor was less than $500,000,000, so that in one year the balance in our favor is more than four times the amount it was for this long period.

It is difficult to contemplate figures of such gigantic proportions with anything like calmness and to estimate their effect on the present and future business of the country without being too much carried away and impressed by them. * * *

And I call the attention of the Senator from Kansas to this remark of the former Republican Comptroller of the Currency:

Of almost equal importance is the improvement in our financial system, due to the establishment of the Federal reserve bank, which gives us the machinery and organization for utilizing credits and such a mobilization of our reserve money as to make impossible any such sudden derangement of our financial matters as we have frequently seen in the past. It was extremely fortunate that this reform in our financial machinery was in operation soon enough to be of assistance during the crisis brought on by the war.

Mr. President, credit has been given to the President and various Senators and Representatives for the work which they performed in the framing of the Federal reserve act. To each of them great praise should be accorded, but in my opinion the services of none were greater than those of the Hon. William G. McAdoo, the Secretary of the Treasury. He was consulted almost daily by members of the Banking and Currency Committee for advice and assistance in the framing of the measure, and it was he who threw his whole soul into the administration of the act, which guaranteed its successful operation. While his notification that no money of the Government would ever be deposited in national banks without the payment of interest somewhat startled and estranged the bankers, yet his assurance that he would use all the powers of his office to issue money upon proper security to prevent runs upon banks and thereby to avert threatened panic showed even to them his great executive ability and sound judgment.

Mr. WEEKS. Mr. President, do I understand that former Comptroller Ridgely made that statement?

Mr. SHAFROTH. No; the last statement is my own. The quotation from Mr. Ridgely was to this effect:

Of almost equal importance is the improvement in our financial system due to the establishment of the Federal reserve bank, which gives us the machinery and organization for utilizing credits and such a mobilization of our reserve money as to make impossible any such sudden derangement of our financial matters as we have frequently seen in the past. It was extremely fortunate that this reform in our financial machinery was in operation soon enough to be of assistance during the crisis brought on by the war.

That is the end of the quotation from Mr. Ridgely.

Our exports for one month—May, 1916—amounted to $472,000,000, breaking all previous monthly records. They exceeded by $61,000,000 the previous high record for May, 1915, and were $300,000,000 more than the average exports for the month of May, 1911 to 1914.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield to the Senator.

Mr. GALLINGER. Has the Senator the aggregate exports of war materials?

Mr. SHAFROTH. No; I have not. I have seen statements to the effect that they are quite large; but they do not constitute anything like a preponderance of our exports.

Mr. GALLINGER. I have seen it stated somewhere that they have amounted to practically 50 per cent of our exports in some months.

Mr. SHAFROTH. Of course, in the last six months they have been larger than they were in the period shortly following the outbreak of the war. There is no doubt they constitute a considerable proportion of our exports; but not a dominant proportion.

Mr. GALLINGER. And if the war should close to-morrow or next month, what does the Senator think the condition would be, so far as the interests of our well-paid laboring men are concerned? I observe that 3,000 of them were dismissed from one establishment a little while ago, because orders for war material had ceased.

Mr. SHAFROTH. Well, Mr. President, I want to say with relation to that statement that the increase in the domestic trade of the United States is perfectly wonderful. It has been recently estimated that our factories are turning out an annual output now for the domestic and foreign trade of $30,000,000,000 a year. The whole export foreign trade, including everything, amounts only to about $4,000,000,000. The estimate was made two years ago that our foreign and domestic trade at that time amounted to $24,000,000,000; so that it can readily be seen that we have the greatest market in the world in which to dispose of the products of the industries of our own land.

Mr. GALLINGER. We have always believed, if the Senator will permit me, that we have the greatest market in the world, and that is undoubtedly true to-day, as it always has been. I think statistics show that in normal times we consume over 90 per cent of the products made in the United States.

Mr. SHAFROTH. I think it is 95 per cent.

Mr. GALLINGER. Well, 95 per cent. There is no doubt that we have the greatest market in the world, and we ought to protect it in every possible way.

Mr. SHAFROTH. After the Spanish-American War no disturbance occurred by reason of the fact that the purchase by the Government of supplies, armament, and related material ceased, and I do not apprehend that there is going to be any great disturbance in the United States following the conclusion of peace in Europe; but no matter what the conditions may be then, there can be no denying the fact that now, in the year 1916, according to the reports of the independent and even the Republican press, and also the reports of Bradstreet's and Dun's agencies, prosperity exists in the land unequaled in the history of the United States; and that, too, during the administration of Woodrow Wilson.

Mr. GALLINGER. Mr. President, if I am not misinformed, that prosperity does not to a very great degree extend to the small producers. They are having a very hard time, I am told. Has the Senator looked into that?

Mr. SHAFROTH. I have taken these reports, which indicate—I do not know whether the Senator has heard me read them all—a perfectly wonderful development. They show that the increase in trade has been so great that orders can not be filled and that there is with us now a state of prosperity that has had no parallel in the history of the Government.

Mr. GALLINGER. Beyond question, the enormous amount of money which has come into the country because of the exportation of war munitions has given a certain degree of prosperity all along the line. There has been more money than ever before because of that condition; but the fact that there have been more failures year by year, even during this administration, than previously indicates that the small manufacturers are having a rather hard time of it. That is my information.

Mr. SHAFROTH. Mr. President, it is difficult to tell when the disintegration of a business begins. It is very difficult to tell when the causes of the failures really arise; many of the debts may have been incurred years before, and people in failing circumstances generally continue business for a year or two after a condition of insolvency first threatens them. But, it seems to me, when Dun's agency and Bradstreet's agency report that, notwithstanding the failures referred to by the Senator from Kansas [Mr. CURTIS], there is universal prosperity in the land and orders are greater than ever before, the facts can not be denied. Besides, at all times there are some failures for profit.

Mr. THOMAS. Mr. President, if my colleague will permit me——

The PRESIDING OFFICER. Does the Senator from Colorado yield to his colleague?

Mr. SHAFROTH. Yes, sir.

Mr. THOMAS. I have been laboring under the impression that the munition makers were prosperous until the revenue bill passed the House and was referred to the Senate Committee on Finance. In interviews which I have had with a number of them since then and from letters and telegrams which I have received I am convinced that not only have most of them not made any money but, if the tax which is imposed by the bill as it came from the House is retained, it is going to drive many of them into bankruptcy.

INCREASE IN EXPORTS, $1,576,000,000 IN ONE YEAR.

Mr. SHAFROTH. Mr. President, the total exports for the year ending June 30, 1916, amounted to $4,345,000,000, an increase of $1,576,000,000 over those of the preceding 12 months.

The imports for the year ending June 30, 1916, also broke all previous records, the total being $2,180,000,000.

Our balance of trade for the 12 months was $2,165,000,000, which exceeds that of the preceding year by $1,070,580,400. To offset this balance the United States has repurchased over a billion dollars of its own securities and has loaned as much more abroad.

It is contended by some, and evidently by the Senator from New Hampshire [Mr. GALLINGER], that the great demand for war materials produced this wonderful tide of prosperity. While that factor no doubt was a contributing cause, yet no one can deny that the activity has extended into all branches and lines of domestic trade, and this satisfactory condition would not have resulted were it built upon and sustained by the manufacture and sale of war materials alone. It must be remembered that all of our foreign exports are less than 5 per cent of our domestic trade, and that the munition orders are only a fraction of our total exports. The Republicans refuse to give us any credit for prosperity because some of the demands for export come for war materials, yet if there had been light or no demands they would have vociferously blamed the administration for incompetency. But notwithstanding this, it is asserted by some that the large increase in the exports of our country has benefited only those engaged in the manufacture of war supplies. A review of the increase of our exports to the nonbelligerent countries demonstrates that the exports are drawn from all of the industries of our country. The following are the respective totals of our exports and imports for the first 10 months of the fiscal year 1916 to nonbelligerent countries, as compared with those for the corresponding period of the year 1915:

	Exports.		Imports.	
	1916	1915	1916	1915
Spain	$49,930,259	$30,137,401	$21,296,998	$15,226,172
Mexico	40,063,824	27,249,659	79,023,437	61,038,709
Cuba	102,381,773	61,480,743	165,121,402	138,534,461
Argentina	53,189,863	21,875,408	90,638,024	61,088,455
Brazil	31,292,440	20,029,871	108,590,045	84,396,342
Chile	18,537,421	8,562,457	46,496,765	21,462,968
China	18,659,270	12,375,531	56,446,685	30,727,247
Japan	56,166,665	33,298,865	116,986,207	83,414,255
Australia and New Zealand	62,198,054	39,957,299	54,162,344	17,659,998
Philippines	18,578,378	19,991,944	21,421,077	20,266,228

Mr. GALLINGER. Mr. President, if the Senator will permit me——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield.

Mr. GALLINGER. Is it not reasonable to suppose that the fact that Germany is unable to export her goods to those nonbelligerent countries, and the dislocation of business in the combatant countries—England, France, Italy, Russia, and the others—gives us a greater market than we otherwise would have?

Mr. SHAFROTH. Oh, there is not any doubt that there is a demand for these things; but why it should be said that we are not entitled to any credit because there happens to be a demand for our products I can not understand. The very fact that the demand exists, the very fact that it is producing activity, not only in munition factories but in all other factories, demonstrates that prosperity is here now in abundance.

Mr. GALLINGER. And the further fact remains, and it can not be winked aside, that because those countries are now incapable of getting goods from Germany and to a large extent from the other countries which are engaged in war a market was opened for our products such as we would not have if normal conditions prevailed.

Mr. SHAFROTH. To a certain extent that is true; but we ought to keep that market, and we will be able to keep it.

Mr. GALLINGER. We probably will have difficulty in keeping it when in the days to come Germany gets on her feet and normal conditions return to England, France, Russia, and other European countries.

Mr. SHAFROTH. I have some remarks to submit with relation to that matter, but it seems to me that we will be able to retain that market.

HIGH RECORD FOR SOUTH AMERICAN TRADE.

From a statement of the Department of Commerce issued July 3, 1916, the exports from the United States to South American countries alone during the past fiscal year reached approximately $175,000,000, which establishes the high record for inter-American trade. The exports to the Latin American countries for the preceding year were $99,000,000. Our total exports for the 1916 fiscal year to the West Indies, Central and South American countries has been estimated to be $450,000,000, an enormous increase over the year preceding.

Mr. GALLINGER. Mr. President, the Senator is very kind, and I will not interrupt him if he objects.

Mr. SHAFROTH. I have no objection to being interrupted.

Mr. GALLINGER. Is it not likewise a fact—we want to be fair about this matter; I know the Senator wants to be fair——

Mr. SHAFROTH. Certainly.

Mr. GALLINGER. Is it not a fact that our increased trade with South America results largely from the circumstance that Germany for the time being is shut out from the South American market and that the other countries which are engaged in destroying each other likewise to a certain extent are shut out of that market.

Mr. SHAFROTH. Yes; to a certain extent; but that is no reason why we should refuse their commerce.

Mr. GALLINGER. Of course not.

Mr. SHAFROTH. There is never any increase in commerce anywhere unless there is a demand for it from some source.

Mr. GALLINGER. I agree to that.

Mr. SHAFROTH. And for that reason it seems to me that there can be no objection to such commerce.

Mr. GALLINGER. No; it is quite to our advantage, and we are wise in taking advantage of the opportunity; but the opportunity will not always continue.

Mr. SHAFROTH. That depends upon what we do; upon our own efforts.

GREAT INCREASE IN RAILROAD TRAFFIC.

In an editorial dated June 24, 1916, of the Christian Science Monitor, of Boston, Mass., an able, fair, and independent paper, the following statement is made under the title "The Business Situation Reviewed":

One of the most satisfactory features of business in the United States is the record-breaking traffic of the railroads. Gross business not only has reached an unprecedented volume, but net earnings are the largest in history. It is gratifying to know that these earnings are being devoted largely to liquidating debts and making necessary repairs and improvements.

Returns from 134 railroads of the United States to the Interstate Commerce Commission show gross earnings for May, 1916, to be $212,840,101 and a net revenue of $74,632,518, which net revenue was $23,874,052 increase over the same month of 1915.

I should like to call the attention of the Senator from New Hampshire to the fact that there is no better barometer of business than the record of shipments made by the railroads. Those shipments do not extend only to goods for foreign commerce, which is a mere twentieth part of our total commerce, but extend also to our domestic trade.

RAILROADS PLACE TREMENDOUS ORDERS.

Along every operated railway line in the United States construction work and improvements are being undertaken in an unprecedented degree. Orders for millions and millions of tons of steel rail and for thousands of cars and locomotives have been placed during the past year.

In an Associated Press dispatch from New York, dated April 22, 1916, the following statement is made, and I should like to call the attention of the Senator from Kansas and of the Senator from New Hampshire to this statement:

STEEL MILLS ARE CROWDED WITH ORDERS FROM RAILROADS.

The railroad companies, large and small, are still ordering rails for 1917 shipment as heavily as the mills can be induced to make sales. The manufacturers find much difficulty in declining orders from importunate buyers. Trolley lines, industrial roads, and manufacturers

of frogs and switches, as well as contractors of railroad construction, also are anxiously making efforts to secure places on rail-mill schedules before May 1.

In the past week contracts for light and heavy sections, reported specifically, amounted to nearly 150,000 tons, including 30,000 tons for the Great Northern, 28,000 tons for the Southern Railroad, 12,000 tons for the Chesapeake & Ohio, 6,000 tons for the Clover Leaf, 15,000 tons for the Pere Marquette, and 3,700 tons for the Lake Superior & Ishpeming. Four southern roads bought an aggregate of 35,000 tons standard sections. There were also orders of girder rails and light sections, agregating 16,000 tons. Since the 1st of April rail contracts have amounted to nearly 800,000 tons.

Mr. Elbert H. Gary, chairman of the United States Steel Corporation, which does not manufacture any munitions of war, in a statement on July 3, 1916, said that—

the steel business of the United States for domestic use and for export is better than ever in its history. Production is larger, profits are greater, and workmen are receiving higher wages. Unfilled orders of subsidiary companies of the corporation amount to nearly 10,000,000 tons. The corporation is producing at the rate of 51,000 tons a day.

I submit that in the building and improvement operations of railroads extending all over the country there is presented one of the best indications of general prosperity. Railroads do not plan construction and betterments unless business conditions justify expectation of profit from the outlay.

Mr. President, there was an Associated Press dispatch sent out from New York on March 25, 1916, and I want to call the attention of the Senator from Kansas to it to demonstrate to him that this railroad building indicates that there is a tide of prosperity here in all lines that is unequaled in the history of the world.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. SHAFROTH. I yield.

Mr. CURTIS. Does not the Senator know that prior to the breaking out of the war there were more idle cars in this country than there had been in any one year prior to that time in the history of the country?

Mr. SHAFROTH. I know that there had been a large number of idle cars ever since the panic of 1907, and it is true that the conditions did not improve until after the Federal reserve act got into active operation, after which business began to improve immensely.

Mr. GALLINGER. Mr. President, will the Senator permit me?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield.

Mr. GALLINGER. The Senator has just spoken of the great prosperity indicated by railroad building. Has the Senator acquainted himself with the fact that during the year 1915 there was less railroad mileage added to our existing mileage than there had been in any one year for the last 25 years?

Mr. SHAFROTH. Oh, Mr. President, of course it takes a good while for railroad companies to get rails; there is no doubt about that; and it takes a good, long while to finance railroad building. The Federal Reserve System had to get into operation and establish credits through confidence that there would be no more panics, so as to get a great amount of money in circulation, but when the money was forthcoming so that the railroads could get it, they availed themselves of it, and that is what they are doing now.

This dispatch reads as follows:

The railroads entered upon a most vigorous buying campaign for equipment during the week, placing contracts for nearly 500,000 tons of rails for delivery during first quarter and first half of 1917. Included in the orders were 140,000 tons for the New York Central System; 75,000 tons for the Baltimore & Ohio; 40,000 for the Erie; 35,000 tons for the Illinois Central; 40,000 tons for the Chicago & Northwestern; 20,000 tons additional for the Burlington; 15,000 tons more for the Southern Pacific; 15,000 tons each for the Union Pacific, the Missouri, Kansas & Texas, the Atlantic Coast Line, and the Chesapeake & Ohio; 10,000 tons additional for the Santa Fe; 8,000 tons for the Chicago & Alton; 5,000 tons for the Minneapolis & St. Louis; 6,000 tons for the Stone Construction Co. for roads in Kansas; 5,000 tons of light sections and 20,000 tons of miscellaneous orders for late 1916 and early 1917 deliveries.

Mr. President, I want to call the attention of the Senators to the fact that that is only one week's orders in the steel industry for railroad building.

The Pennsylvania Railroad Co. probably will close for 150,000 to 200,000 tons before the end of the month. Other contracts for about 100,000 tons also are pending.

* * * * * * *

The Philadelphia & Reading divided equally an order for 1,000 cars between the Standard and Pressed Steel Car Cos.; and the Atlantic Coast Line is reported to have bought 1,000 cards from the Mount Vernon Car Co.

The locomotive builders took orders for 90 engines and received new inquiries for 81 engines.

SHIPBUILDING GREATEST IN HISTORY.

Mr. President, the Department of Commerce on May 13, 1916, issued a statement that steel merchant vessels building or under contract in the United States now number 368 of more than 1,000,000 tonnage. The statement says that these figures denote the greatest shipbuilding activity the country ever has known and that every shipbuilding plant is working to capacity.

I should like to know, from these Senators who assert that the prosperity is confined to munitions factories and to those supplying arms to the European nations what they think of a statement of that kind.

The great prosperity that exists in the United States extends not only to merchandise and factory products, but also to every other branch of industry.

According to a report of the Geological Survey of June 30, 1916, the output of American mines for the first six months of this year establishes a breaking record in the annals of production. This increased production no doubt has been induced by good prices and active demand. The production of manganese is increasing as never before. Copper, lead, and zinc are also being mined in unprecedented quantities.

The year 1915 witnessed the greatest production of gold in the United States ever recorded. The total output of gold was $101,035,700. The total production of gold and silver in 1915 was $138,432,000, the highest joint production ever recorded. All indications are that the production of 1916 will be still greater.

The estimate by the Geological Survey of the first six months' output of bituminous coal in the United States is 261,000,000 tons, an increase of 35 per cent over the production of the first half of 1915. This production, according to the Geological Survey, is the greatest ever recorded in any half year period in the history of the United States. The report says:

Every coal-mining State is sharing in this prosperity, and of course, this demand for coal is traced back to increased business of the railroads and of the steel and other large industries.

How can anyone say that this prosperity is confined to a few industries, when he reads one after another of the articles showing great increases of production and the great activity of other industries? It seems to me that the Senator from Kansas must concede at last that there is general prosperity in the land.

Ore shipments from the Lake Superior district in June, 1916, amounted in the aggregate to 9,507,576 tons, a new high record of any month in the development of that district, and the shipments during the first five months of 1916 were 83 per cent greater than those of the corresponding period of 1915. The production of coke and anthracite pig iron in the first five months of 1916 showed an increase of 66 per cent over that of the corresponding period of 1915.

There have been filed articles of incorporation for new companies of $100,000 capital and over, during the month of June, 1916, in the principal States which aggregated $327,871,000, an increase over the month of June, 1915, of $97,012,000.

The total resources of the 19,460 trust companies, State, savings, and private banks on June 23, 1915, were $16,010,061,690.58, a gain of $520,854,439 over the statement for 1914.

MANUFACTURES WILL TOTAL $30,000,000,000.

According to an analysis of the 1915 census returns recently made by the National City Bank, of New York, it is shown that the total output of the manufactories of the United States for the preceding year was $24,000,000,000, as compared with less than $12,000,000,000 indicated by the census of 1900. When we consider that in the year preceding the European war the output of Germany was $12,000,000,000 and that of Great Britain in 1907—the only available returns—was about $8,000,000,000, and that of France was about the same as Great Britain, we can readily understand that now the manufacturing output of the United States must be equal to that of Germany, Great Britain, and France combined in normal times.

In the Manufacturers' Record of June 22, 1916, the following is said as to the steel trade:

The value of the output of the steel works and rolling mills of the United States, which was $919,527,244 in 1914, will this year, by virtue of an increase of nearly 100 per cent in output in iron and steel products, and a very large increase in value, probably run to $2,500,000,000.

It is estimated that the total output of the manufactories of the United States for the year 1916 will equal $30,000,000,000.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield to the Senator.

Mr. GALLINGER. The Senator has dwelt, among other things, upon the great output of gold and the fact that we are

the possessors of so much gold. I find in a newspaper printed an hour ago the following headline:

Golden stream to pour into the United States—Four hundred millions—

That is, in gold—

to be sent here by Great Britain for war supplies.

Mr. President, after the Senator has made his interesting speech, if he will investigate the matter, I think he will find that the phenomenal prosperity which he says we are enjoying in this country is largely due to the fact that these enormous sums of money are coming here from Great Britain, France, and Russia for war materials. This article indicates that $400,000,000 in gold is to come here, at the rate of $3,000,000 a day, for some time, for the liquidation of the obligations that Great Britain owes to this country for what we have sent her to prepare her for the great struggle in which she is engaged.

Mr. SHAFROTH. Mr. President, I am glad the Senator read the article, because it was handed to me by my colleague [Mr. THOMAS] to read myself, and I intended to do so, but had not reached a point when it could well fit in with the balance of my remarks. There is not any doubt but that great orders made by European nations have poured money into this country, but that money permeates every part of the country, and obviously makes for increased prosperity in every line; but when you consider that munitions are only a part of our exports, you can readily see that while that business is a factor it can not be given the credit which the Senator from New Hampshire is trying to give it by making it appear as the basis of our general prosperity.

Mr. GALLINGER. Mr. President, the Senator will admit—because the Senator is fair—that when this enormous exportation of war material ceases and the great corporations that are producing this material find their orders canceled the great prosperity that the Senator pictures as having come to the laboring men of this country will be very materially changed. One great corporation, if I have read correctly, recently filled its last order, and 3,000 highly paid men were discharged in a bunch. Now, when these orders cease—as they will cease, perhaps not during the period of this administration but probably during the next administration, whether it be Democratic or Republican—what will happen to the men who are now working in these factories at enormous pay?

Mr. SHAFROTH. Mr. President, it is easy to predict. At the time of the passage of the Federal reserve act there were predictions made of the most dire disaster, such as were read by the Senator from Oklahoma a short time ago. Dire disaster was predicted to follow the change in the tariff laws, and it was said that we should have a terrible condition of affairs. It is easy to predict now that when this war is over we are going to have very distressing times; but, Mr. President, those who make that assertion can not get over the fact that the prosperity which exists now in such abundance is here, and there can be no doubt but that we are entitled to the credit of it as far as good government can go in making it.

Mr. GALLINGER. If the Senator will permit me, we did have pretty bad times for eight months preceding the war under the operation of the present tariff law. The Senator knows that.

Mr. SHAFROTH. Mr. President, we have had an upward tendency in the last two years; and it seems to me that inasmuch as we have it now, contrary to all the predictions that were made by Mr. Root and others, it is not exactly a thing to tie faith to when one makes a prediction as to something that might occur. All of the prosperity of the land everywhere in every year depends upon demand from somewhere; and inasmuch as we are getting these demands now, it seems to me that that is the thing that concerns us more than a prediction which, as I will show later, is likely not to be verified.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado further yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield.

Mr. GALLINGER. The Senator has pictured the great amount in the matter of balance of trade under existing conditions that is to our credit. I do not dispute the Senator's figures; but the Senator must know that for four months immediately preceding the war the balance of trade against the United States was $240,000,000, or $60,000,000 a month for those four months. That was before this great prosperity came, which in another place has been aptly termed "battle-field prosperity."

Mr. SHAFROTH. Mr. President, there is not any doubt but that the balance of trade goes from one nation to another. As indicated in the statement by Mr. Ridgely, the entire balance of trade in favor of the United States, from the time of Washington to the time of McKinley, was only $500,000,000. That statement showed that the balance of trade was one way in one administration, or in a part of an administration, and the other way in another one. It did not show want of prosperity. It does not indicate anything except that the conditions are such that we are buying more or we are selling more at a given time. But, Mr. President, there can be no doubt but that we have an enormous balance of trade now, contrary to the predictions that were made by these gentlemen; and now they say that this prosperity does not exist in general business, and does not exist except in munitions plants and establishments that are furnishing supplies for the use of foreign soldiers.

Now, I want to read another little indication of prosperity from the Indicator, of New York, of June 5, 1916:

There were 12 life insurance companies which wrote upward of $50,000,000 each last year, the Metropolitan leading with $592,800,860, the Prudential coming next with $581,090,889, industrial being included in each, while the New York ranked third with $228,894,119.

People do not take out life insurance in any such gigantic figures unless they are able to pay for it.

BIG INCREASE IN BUILDING PERMITS.

Mr. President, I want to call the attention of the Senator from Kansas and the Senator from New Hampshire to the following to show where this prosperity has permeated and to what extent it exists. In the Washington Evening Star, an independent Republican newspaper, there appeared on July 1, 1916, a comparative statement of building operations in the 108 principal cities of the United States. The statement shows that the building permits issued during May, 1916, were $113,904,515, as compared with $86,469,129 for May, 1915, or an increase of 32 per cent. It also shows that for the first five months of 1916 the building permits issued in these cities totaled $393,018,536, as compared with $317,373,988 for the corresponding period last year, an increase of 24 per cent.

Is it possible we can have these gigantic building operations increasing in such great proportions, reported from the 108 principal cities of the Union, without recognizing that there is a great degree of prosperity existing in each of those cities and contiguous territory.

The increase for December, 1915, over the same month of the preceding year was 65 per cent; and the increase for November, 1915, over the same month of 1914 was 75 per cent. Compared with the building of 1912 and 1913, the percentage is very much higher.

These figures demonstrate that prosperity exists, not only in trade, commerce, and manufacturing industries, but also in the building trades throughout the country.

According to a statement of the officials of the American Federation of Labor—and I invite the attention of the Senators to this statement—organized labor received more in the year ended May 1, 1916, in increased wages, shortening of hours, and legislation than ever before in its history. It is claimed that wage advances were general and in practically every line of industry.

That is the report made by the officials of the American Federation of Labor. Often they protest against low wages when their is stagnation in their line of work.

STOCK SALES AND PRICES EVIDENCE OF PROSPERITY.

Another evidence of prosperity is furnished by the prices and sales of 50 leading railroad and industrial stocks on the New York Stock Exchange.

Total number of shares sold from Jan. 1 to July 1—

1916	85,158,448
1915	63,039,246
1914	38,468,283

There is no better index to be found than the 50 leading industrial and railroad stocks which are quoted upon the Stock Exchange in New York; and when you find that they increase almost in geometrical ratio in sales, it shows that great activity prevails and great prosperity exists.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield to the Senator.

Mr. GALLINGER. Does the Senator contend that the fact that men holding stocks sell them is an evidence of prosperity?

Mr. SHAFROTH. When they are offered the price they want; yes.

Mr. GALLINGER. I have not many stocks, but when I sell a share of stock it is because I need some ready money.

Mr. SHAFROTH. I will take up that matter now and show you why they sold the stocks.

The advance in the prices of nearly all of the railroad and industrial stocks on the New York Exchange indicates clearly

the wide extent of the prosperity which is upon us. The yearly range of the prices of the stocks from January 1 to July 1 was:

In 1916.

High	91.87
Low	80.91

In 1915.

High	73.36
Low	58.99

That shows there was enormous increase in the price of the stock, and that was what made the activity on the New York market. That is the reason why they sold. It was because, on a rising market, men will dispose of their holdings; and that rising market indicates that there is prosperity in each one of the stocks presented upon the exchange.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado further yield to the Senator from New Hampshire?

Mr. SHAFROTH. I yield.

Mr. GALLINGER. Does the Senator contend that there has been any great increase in the price of the leading railroad stocks lately?
